UNIVERSITY CALENDAR

1931		FIRST SEMESTER	
August 22-23	Saturday-Sunday	Dormitories open to students	
August 24-25	Monday-Tuesday	Examinations for admission	
August 24-25	Monday-Tuesday	Reexamination to remove conditions	
August 24-25	Monday-Tuesday	Matriculation and registration	
August 26	Wednesday	Regular class work begins	
September 7	Monday	Labor Day	
September 15	Tuesday	Registration closes	
October 21	Wednesday	Mid-semester reports are due	
November 11	Wednesday	Armistice Day	
Nov. 26-29	Thursday-Sunday, inc.	Thanksgiving recess	
December 12	Saturday	Mid-year graduates' standings must be on file with the Registrar	
December 19	Saturday, 12 m.	First semester closes	
December 22	Tuesday, 4 p. m.	Final grades must be on file with Registrar	

  

1932		SECOND SEMESTER	
January 4-5	Monday-Tuesday	Matriculation and registration	
January 6	Wednesday	Regular class work begins	
January 26	Tuesday	Registration closes	
March 2	Wednesday	Mid-semester reports are due	
March 19	Saturday	Mackay Day	
March 25-27	Friday-Sunday, inc.	Easter recess	
May 2	Monday	Senior standings must be on file with Registrar	
May 6	Friday	Meeting of Honorary Board of Visitors	
May 7	Saturday, 12 m.	Second semester closes	
May 7	Saturday evening	Phi Kappa Phi address	
May 8	Sunday	Baccalaureate Sunday	
May 9	Monday	COMMENCEMENT DAY	
May 11	Wednesday, 12 m.	Final grades must be on file with Registrar	
August 22	First Semester of University year 1932-1933 opens		

## OFFICERS OF THE UNIVERSITY

## THE BOARD OF REGENTS

HON. FRANK WILLIAMS (1933)	Goodsprings
HON. WALTER E. PRATT (1935)	Reno
HON. GEORGE S. BROWN (1937)	Reno
HON. GEORGE WINGFIELD (1939)	Reno
HON. A. C. OLMSTED (1941)	Wells

## OFFICERS OF THE BOARD

HON. GEORGE S. BROWN, Chairman	Reno
MR. GEORGE H. TAYLOR, Secretary Emeritus	Reno
MISS CAROLYN M. BECKWITH, Secretary	Reno

## COMMITTEES OF THE BOARD

<i>Executive Committee</i> —GEORGE S. BROWN, GEORGE WINGFIELD, A. C. OLMSTED.
<i>Property Committee</i> —GEORGE WINGFIELD.
<i>Instruction Committee</i> —A. C. OLMSTED.
<i>Library Committee</i> —FRANK WILLIAMS.
<i>Student-Welfare Committee</i> —GEORGE S. BROWN.

## HONORARY BOARD OF VISITORS

HON. B. W. COLEMAN, Chairman	Carson City
HON. D. W. LUCAS	Fallon, Churchill County
	Clark County
HON. MAURICE MACK	Minden, Douglas County
	Elko County
HON. E. C. RICHARDS	Millers, Esmeralda County
HON. J. S. MANN	Eureka, Eureka County
MRS. W. BLATTNER	Winnemucca, Humboldt County
HON. LOUIS A. LEMAIRE	Battle Mountain, Lander County
HON. E. F. RONNOW	Panaca, Lincoln County
MRS. G. E. LEAVITT	Yerington, Lyon County
MRS. HENRY BOERLIN	Hawthorne, Mineral County
HON. C. F. WITTENBERG	Tonopah, Nye County
MRS. W. H. AUSTIN	Carson City, Ormsby County
MRS. E. J. THACKER	Imlay, Pershing County
HON. JAMES M. LEONARD	Virginia City, Storey County
HON. ARCHIE L. CROSS	Sparks, Washoe County
HON. R. A. BAIRD	Ely, White Pine County

## ADMINISTRATIVE OFFICERS

WALTER E. CLARK, Ph.D., LL.D., President.
MAXWELL ADAMS, Ph.D., Vice-President.
CHARLES H. GORMAN, Comptroller.
LOUISE M. SISSA, Registrar.
MARGARET E. MACK, A.M., Dean of Women.
CHARLES HASEMAN, Ph.D., Dean of Men.
JOSEPH D. LAYMAN, B.L., Emeritus Librarian.
THEA C. THOMPSON, Acting Librarian.
HORACE P. BOARDMAN, C.E., Director of the Engineering Experiment Station.
CARL STODDARD, Curator of the Mackay Museum.
EDMUND S. LEAVER, Met.E., Superintendent, United States Bureau of Mines Experiment Station.
JOSEPH B. LYNCH, Superintendent of Buildings and Grounds.
MRS. ETHEL SHURTLEFF, Matron University Hospital.
IRMA MAE WILSON, B.S., Matron of Manzanita Hall.
MRS. LAURA E. AKIN, Matron of Artemisia Hall.
WILLIAM R. BLACKLER, M.S., Master of Lincoln Hall.

*Colleges and Schools*—

MAXWELL ADAMS, Ph.D., Dean of College of Arts and Science.
FREDERICK H. SIBLEY, M.E., Dean of College of Engineering.
ROBERT STEWART, Ph.D., Dean of the College of Agriculture.
JOHN W. HALL, M.A., Dean of the School of Education and Director of the Summer Session.
JOHN ALLEN FULTON, E.M., Director of the Mackay School of Mines.

*Public Service Division*—

WALTER S. PALMER, E.M., Director of the State Analytical Laboratory.
VERA LAUTENSCHLAGER, M.A., Acting Director of the Hygienic Laboratory.
EDWARD RECORDS, V.M.D., Director of Veterinary Control Service.
SANFORD CROSBY DINSMORE, B.S., Commissioner, Food and Drugs Control and Weights and Measures.
SAMUEL BRADFORD DOTEN, M.A., Director of the Agricultural Experiment Station.
CECIL W. CREEL, B.S., Director of Agricultural Extension.
JOHN ALLEN FULTON, E.M., Director, State Mining Bureau.

*General Library Staff*—

RUTH NASH, B.A., Assistant Librarian.
CLARE LOUISE JOHNSON, Cataloguer.
PRECIOUS D. P. NASH, Loan Desk Assistant.

## Central Clerical Staff—

CAROLYN M. BECKWITH, Secretary to the President.  
 MRS. FREDA METCALF, Clerk, Comptroller's Office.  
 ALICE TERRY, Clerk, Comptroller's Office.  
 LOIS LAMERTON, Departmental Stenographer.

OFFICERS OF INSTRUCTION<sup>1</sup>University Faculty<sup>2</sup>

WALTER ERNEST CLARK, Ph.D., LL.D., President.

A.B., Ohio Wesleyan University, 1896; A.M., Ohio Wesleyan University, 1898; Ph.D., Columbia University, 1903; LL.D., Ohio Wesleyan University, 1918; Instructor in Mathematics, Ohio Wesleyan University, 1896-1899. Tutor in Philosophy, College of the City of New York, 1901-1902; Instructor in Philosophy, *ibid.*, 1902-1906; Assistant Professor of Philosophy, *ibid.*, 1906-1907; Associate Professor and Acting Head of the Department of Political Science, *ibid.*, 1907-1910; Professor and Head of the Department of Political Science, 1910-1918; Extension Lecturer in Economics, Columbia University, 1916-1918; President, University of Nevada, September, 1917-.

MAXWELL ADAMS, Ph.D., Professor of Chemistry, Dean of the College of Arts and Science, and Vice-President.

A.B., Leland Stanford Junior University, 1895; A.M., *ibid.*, 1896; Ph.D., University of Chicago, 1904; Instructor in Chemistry, Leland Stanford Junior University, 1896; Teacher of Science, Chico State Normal School, 1897-1900; Vice-President of the Chico State Normal School, 1901-1906; Professor of Chemistry, University of Nevada, 1906-; Acting Dean of the College of Arts and Science, 1917-1918; Dean of the College of Arts and Science, 1918-; Vice-President of the University, 1922-.

\*JAMES EDWARD CHURCH, JR., Ph.D., Professor of the Classics.

A.B., University of Michigan, 1892; Ph.D., University of Munich, 1901; Instructor in Latin and German, University of Nevada, 1892-1894; Assistant Professor of the Latin Language and Literature, 1894-1895; Associate Professor of the Latin Language and Literature, 1895-1896; Professor of the Latin Language and Literature, 1896-1918; Professor of the Classics, 1918-.

JEANNE ELIZABETH WIER, B.A., LL.D., Professor of History and Political Science.

B.D., Iowa State Teachers' College, 1893; B.A., Leland Stanford Junior University, 1901; LL.D., University of Nevada, 1924; Acting Assistant Professor of History, University of Nevada, 1899-1901; Associate Professor of History, 1901-1906; Professor of History and Political Science, 1906-1917; Professor of History, 1917-1921; Professor of History and Political Science, 1921-.

PETER FRANSEN, A.M., LL.D., Professor of Biology.

A.B., University of Nevada, 1895; A.B., Harvard University, 1898; A.M., *ibid.*, 1899; LL.D., University of Nevada, 1924; Assistant Professor of Zoology and Bacteriology, University of Nevada, 1900-1902; Associate Professor of Zoology and Bacteriology, 1902-1903; Professor of Zoology and Bacteriology, 1903-1906; Professor of Biology, 1906-.

HORACE PRENTISS BOARDMAN, C.E., Professor of Civil Engineering and Director of the Engineering Experiment Station.

B.S., University of Wisconsin, 1894; C.E., *ibid.*, 1911; Professor of Civil Engineering, University of Nevada, 1907-; Director of the Engineering Experiment Station, 1921-.

LEON WILSON HARTMAN, Ph.D., Professor of Physics.

B.S., Cornell University, 1898; A.M., *ibid.*, 1899; Ph.D., University of Pennsylvania, 1903; Assistant Instructor in Physics, Cornell University, 1900-1901; Professor of Physics, Kansas Agricultural College, 1901-1902; Instructor in Physics, Cornell University, 1904-1905; Assistant Professor of Physics, University of Utah, 1905-1906; Associate Professor of Physics, 1906-1909; Professor of Physics, University of Nevada, 1909-.

<sup>1</sup>The record of teaching experience does not include work in high schools or academies, except for members of the School of Education, and of the Public Service Divisions, nor University instruction as fellows or student assistants. Summer-school and extension instruction is also excluded.

<sup>2</sup>The President, Vice-President, Deans, Librarian, Registrar, and all persons with the rank of instructor or above, who give instruction in any of the regular college departments of the University, constitute the University Faculty.

<sup>3</sup>The order beginning here is seniority.

- CHARLES HASEMAN, Ph.D., *Dei* of Men; Professor of Mathematics and Mechanics.  
A.B., Indiana University, 1903; A.M., *ibid.*, 1906; Ph.D., Göttingen University, 1907; Instructor in Mathematics, Indiana University, 1907-1908; Assistant Professor of Mathematics, 1908-1909; Associate Professor of Mathematics and Mechanics, University of Nevada, 1909-1910; Professor of Mathematics and Mechanics, 1910-; Dean of Men, 1929-.
- FREDERICK WESTON WILSON, M.S., Professor of Animal Husbandry.  
B.S., Kansas State Agricultural College, 1906; M.S., University of Illinois, 1913; Assistant Professor of Animal Husbandry, in charge of Farmers' Institute Work, University of Arizona Agricultural Experiment Station, 1905-1906; Associate Professor of Animal Husbandry, University of Arizona Agricultural Experiment Station 1908-1912; Professor of Animal Husbandry, University of Arizona Agricultural Experiment Station, 1912-1913; Professor of Animal Husbandry, University of Arizona, 1913-1914; Professor of Animal Husbandry, University of Nevada, 1914-.
- REUBEN CYRIL THOMPSON, M.A., Professor of Philosophy.  
B.A., McMinnville College, 1899; B.A., Harvard University, 1901; M.A., *ibid.*, 1902; Teacher in Latin, Albion State Normal School, Idaho, 1905-1908; Instructor in Latin and Greek, University of Nevada, 1908-1909; Assistant Professor of Latin and Greek, 1909-1910; Associate Professor of Latin and Greek, 1910-1914; Professor of Latin and Greek, 1914-1915; Professor of Philosophy, 1915-.
- J CLAUDE JONES, Ph.D., Professor of Geology and Mineralogy, Curator of Mackay Museum.  
A.B., University of Illinois, 1902; Ph.D., University of Chicago, 1923; Assistant in Geology, University of Illinois, 1904-1905; Instructor in Geology, *ibid.*, 1905-1906; Instructor in Mineralogy and Geology, University of Nevada, 1909-1910; Assistant Professor of Geology and Mineralogy, 1910-1914; Professor of Geology and Mineralogy, University of Nevada, 1914-.
- WALTER S. PALMER, E.M., Professor of Metallurgy; Director State Analytical Laboratory.  
B.S., University of Nevada, 1905; E.M., Columbia School of Mines, 1907; Instructor in Mining and Metallurgy, University of Nevada, 1910-1913; Assistant Professor of Mining and Metallurgy, 1913-1916; Professor of Metallurgy, 1916-; Director, State Analytical Laboratory, 1925-.
- ALBERT ELLSWORTH HILL, A.B., Professor of English.  
A.B., University of Chicago, 1899; Assistant in English, University of Chicago, 1905-1907; Associate in English, 1907-1909; Instructor in English, 1909-1913; Assistant Professor of English, University of Nevada, 1913-1914; Associate Professor of English, 1914-1916; Professor of English, 1917-.
- JAMES REED YOUNG, Ph.D., Professor of Psychology.  
B.L., Berea University, 1907; A.B., Leland Stanford Junior University, 1909; A.M., *ibid.*, 1910; Ph.D., University of Chicago, 1916; Teacher San Diego Normal Training School, 1910-1912; Instructor in History of Education, University of Chicago, 1913-1915; Associate Professor of Education, University of Nevada, 1915-1917; Professor of Education, 1917-1920; Professor of Psychology, 1920-.
- JOHN PAUL RYAN, Colonel U.S.A., Professor Emeritus of Military Science and Tactics.  
U. S. Military Academy, 1888; Professor of Military Science and Tactics, University of Nevada, 1917-1918; Commanding Officer, S. A. T. C. October, 1918-January, 1919; Professor of Military Science and Tactics, 1919-1928; Professor Emeritus of Military Science and Tactics, 1928-.
- STANLEY GUSTAVUS PALMER, M.E., Professor of Electrical Engineering.  
B.S., University of Nevada, 1909; M.E., Cornell University, 1910; Instructor in Electrical Engineering, University of Nevada, 1915-1916; Assistant Professor of Electrical Engineering, 1917-1918; Professor of Electrical Engineering, September, 1918-.

- VERNER E. SCOTT, B.S., Professor of Dairying and Poultry.  
B.S., University of Wisconsin, 1911; Instructor in Dairying, University of Nevada, 1912-1915; Acting Instructor in Animal Husbandry, 1915-1914; Professor of Dairying, 1919-1929; Professor of Dairying and Poultry, 1929-.
- JOHN WILLIAM HALL, M.A., Professor of Education and Dean of the School of Education.  
Principal Normal Practice School, 1890-1892; Principal Franklin School, Observation School of the University of Buffalo, 1895-1897; Superintendent Training Department, Colorado Teachers College, 1898-1900; B.S., Teachers College, Columbia University, 1901; M.A., Columbia University, 1902; Teacher of Psychology and History of Education, New York Training School for Teachers, 1901-1905; Professor Elementary Education, University of Cincinnati, 1905-1920; Dean of the School of Education and Professor of Education, University of Nevada, 1920-.
- FREDERICK H. SIBLEY, M.E., Professor of Mechanical Engineering and Dean of the College of Engineering.  
Ph.B., Brown University, 1898; M.E., Case School of Applied Science, 1905; Professor of Mechanical Engineering, University of Alabama, 1907-1912; Professor of Mechanical Engineering, University of Kansas, 1912-1920; Professor of Mechanical Engineering, University of Nevada, 1920-; Dean of the College of Engineering, 1921-.
- ROBERT STEWART, Ph.D., Professor of Agronomy and Dean of the College of Agriculture.  
B.S., Utah Agricultural College, 1902; Ph.D., in Agronomy, University of Illinois, 1909; Assistant Chemist, Utah Experiment Station, 1902-1905; Assistant Professor of Chemistry, Utah Agricultural College, 1905-1908; Professor of Chemistry and Station Chemist, Utah Agricultural College, 1908-1915; Professor of Soil Fertility, University of Illinois, 1915-1920; Dean of the College of Agriculture and Professor of Agronomy, University of Nevada, 1920-.
- SARAH LOUISE LEWIS, M.A., Professor of Home Economics.  
B.S., Columbia, 1919; M.A., Teachers College, Columbia, 1923; Instructor at Oregon Agricultural College, 1912-1915; Assistant Professor, Oregon Agricultural College, 1915-1917; Professor of Household Science and Head of Department, O. A. C., 1919-1920; Professor of Home Economics, University of Nevada, 1920-.
- BENJAMIN FRANKLIN CHAPPELLE, Ph.D., Professor of Modern Languages.  
A.B., Dickinson College, 1908; A.M., *ibid.*, 1911; Diplome de L'Alliance Francaise University of Poitiers, 1914; Ph.D., University of Pennsylvania, 1917; Acting Head of the German Department, Dickinson College, 1910-1911; Instructor in French, Gettysburg College, 1911-1912; Head of the Department of Romanic Languages, 1912-1916; Assistant Instructor in Romanic Languages, University of Pennsylvania, 1916-1917; Assistant Professor of Romanic Languages and Literatures, University of Nevada, 1917-1918; Assistant Professor of Romanics, University of Pennsylvania, 1918-1921; Professor of Romanic Languages, University of Nevada, 1921-1922; Professor of Modern Languages, 1922-.
- SAMUEL BRADFORD DOTEN, M.A., Professor of Agricultural Research.  
B.A., University of Nevada, 1898; M. A., *ibid.*, 1912; Instructor in History and Mathematics, University of Nevada, 1890-1900; Instructor in Mathematics and Entomology, 1900-1902; Assistant Professor of Mathematics and Entomology, 1902-1903; Assistant Professor of Entomology, Meteorology, and Mathematics, 1908-1905; Professor of Entomology, 1906-; Entomologist and Director, Nevada Agricultural Experiment Station, 1913-; Professor of Agricultural Research, 1922-.
- EDWARD RECORDS, V.M.D., Research Professor of Veterinary Science.  
V.M.D., University of Pennsylvania, 1909; General practice, 1909-1910; First Assistant, State Livestock Sanitary Board, Pennsylvania, 1910-1911; Veterinarian with H. K. Mulford Co., 1911-1914; Veterinarian, Nevada Agricultural Experiment Station, 1914-1917; Head of Department of Veterinary Science, 1918-; Research Professor of Veterinary Science, 1922-.

CHARLES ELLIOT FLEMING, B.S.A., Research Professor of Range Management.

B.S., Utah Agricultural College, 1909; B.S.A., Cornell University, 1910; Plant Ecologist, U. S. Forest Service, 1910; Grazing Examiner, U. S. Forest Service, 1911-1912; In Charge of Grazing Studies, Montana, 1913-1914; In Charge Grazing Reserves in New Mexico and Arizona, 1915-1916; Head of Department of Range Management, Nevada Agricultural Experiment Station, 1916-; Research Professor of Range Management, 1922-.

CECIL WILLIS CREEL, B.S., Professor of Agricultural Extension.

B.S., University of Nevada, 1911; Agent, Bureau of Entomology, U.S.D.A., 1911-1912, detailed at Salt Lake City, Utah, and Agricultural Experiment Station, Purdue University, Lafayette, Indiana; Special Agent, U. S. Department of Interior, 1912-1913; Scientific Assistant, Bureau of Entomology, U.S.D.A., 1913-1919; County Agent Leader, Agricultural Extension Division, University of Nevada, 1919-1921; Director Agricultural Extension Division and Professor of Agricultural Extension in the College of Agriculture, University of Nevada, 1921-.

GEORGE WALLACE SEARS, Ph.D., Professor of Chemistry.

B.S., Drury College, 1908; M.S., University of Illinois, 1911; Ph.D., University of Illinois, 1914; Instructor in Chemistry, University of Illinois, 1914-1917; Instructor in Chemistry, University of Nevada, 1917-1918; Associate Professor of Chemistry, 1918-1924; Professor of Chemistry, 1924-.

FRED W. TRAINER, Ph.D., Professor of Education.

A.B., Beloit College, 1908; M.A., University of California, 1920; Ph.D., University of California, 1930; Instructor in High School, Lancaster, Wisconsin, 1908-1909; Superintendent of Schools, Lancaster, Wisconsin, 1909-1914; Instructor in Education, University of Nevada, 1915-1918; Assistant Professor of Education, 1918-1920; Associate Professor of Education, 1920-1924; Professor of Education, 1924-; Head of Department of Secondary Education, 1931-.

JOHN ALLEN FULTON, E.M., Professor of Mining Engineering, and Director, Mackay School of Mines.

B.S., University of Nevada, 1898; E.M., Columbia University, 1900; Practical work in Africa and the United States, 1900-1924; Professor of Mining Engineering, Director Mackay School of Mines, University of Nevada, 1924-; Director State Mining Bureau, 1929-.

PHILIP A. LEHENBAUER, Ph.D., Professor of Biology.

A.B., Westminster College, 1907; A.M., Millikin University, 1909; Ph.D., University of Illinois, 1914; Instructor in Botany and Horticulture, University of Nevada, 1914-1916; Assistant Professor of Botany and Horticulture, 1916-1917; Plant Physiologist, University of Illinois, 1917-1923; Associate Professor of Biology, University of Nevada, 1922-1925; Professor of Biology, 1925-.

FREDERICK L. BIXBY, C.E., Professor of Civil Engineering.

B.S., University of California, 1905; C.E., University of Nevada, 1918; Professor of Civil and Irrigation Engineering, New Mexico College of Agriculture and Mechanic Arts, 1910-1913; Associate Professor of Agronomy, University of Nevada, 1919-1920; Associate Professor of Civil Engineering, 1922-1926; Professor of Civil Engineering, 1926-.

FRANCIS CLARK MURGOTTEN, Ph.D., Professor of Modern Languages.

A.B., Stanford University, 1901; A.M., *ibid.*, 1908; Ph.D., Columbia University, 1924; Professor of Hebrew, Church Divinity School of the Pacific, 1908-1918; Instructor in French, Tenth Division Schools of the British Army in Egypt, 1919; Assistant Professor of Modern Languages, University of Nevada, 1922-1924; Associate Professor of Modern Languages, 1924-1926; Professor of Modern Languages, 1926-.

JAY ARNOLD CARPENTER, E.M., Professor of Mining.

B.S., University of Nevada, 1907; E.M., Mackay School of Mines, University of Nevada, 1911; Instructor in Metallurgy, University of Nevada, 1908-1909; Assistant Professor of Metallurgy, *ibid.*, 1909-1910; Professor of Mining, South Dakota School of Mines, 1921-1922; Professor of Mining, University of Nevada, 1926-.

THEODORE H. POST, M.A., Professor and Director of Music.

Graduate New England Conservatory of Music, 1918; A.B., Washburn College, 1922; M.A. in Music, Harvard University, 1926; Assistant Professor of Voice Culture and Singing, 1919-1921, Smith College; Professor of Voice Culture and Singing, Washburn College, 1921-1924; Assistant Professor of Theory, Teacher of Singing and tenor soloist, Grinnell College, 1926-1927; Professor and Director of Music, University of Nevada, 1927-.

WILLIAM RUSSELL STANDIFORD, Colonel, United States Army, Professor of Military Science and Tactics.

A.B., West Virginia University, 1897; Assistant Principal, West Virginia State Normal School, 1897-1898; Captain, 2d West Virginia Volunteer Infantry, 1898-1899; First Lieutenant and Captain, 41st U. S. Infantry, 1899-1901; Second Lieutenant and First Lieutenant, 2d Infantry, 1901-1907; Signal Corps, 1907-1910; Captain, 5th Infantry, 1911-1914; Major, Philippine Scouts, 1914-1917; Major and Lieutenant Colonel (temporary), 1917-1919; Colonel, National Army, 1919-1920; Lieutenant Colonel, United States Army, 1920-1928; Colonel, United States Army, 1928-; Instructor, Army School of the Line, Langre, France, 1918; Chief of Staff of the Tank Corps in France, 1918. *Graduate*, Infantry and Cavalry School, 1906; Army Signal School, 1907; Army School of the Line, 1922; Army Staff College, 1923; Army War College, 1924. Member of the General Staff Corps Eligible List, United States Army. On War Department General Staff, 1917-1921; on General Staff with Troops, 1924-1927. Professor of Military Science and Tactics, University of Nevada, 1928-1931.

JOHN EDWARD MARTIE, M.P.E., Professor of Physical Education for Men.

B.S., Central Missouri State Teachers College, 1923; M.P.E., Y. M. C. A. College, Springfield, Massachusetts, 1930; Instructor of Physical Education for Men, University of Nevada, 1923-1924; Assistant Professor of Physical Education for Men, 1924-; Acting Head of Department, 1924-1926; Associate Professor of Physical Education for Men, 1926-1929; Head of Department and Professor of Physical Education for Men, 1929-.

ELSA SAMETH, M.S., Professor of Physical Education for Women.

A.B., Cornell University, 1911; B.S., Columbia University, 1911; M.S., University of Wisconsin, 1922; Instructor in Physical Education for Women, University of Nevada, 1913-1915; Assistant Professor of Physical Education for Women, 1915-1918; Associate Professor, *ibid.*, 1918-1930; Professor of Physical Education for Women, 1930-.

ALFRED LESLIE HIGGINBOTHAM, M.A., Professor of English.

A.B., Oberlin College, 1920; A.M., *ibid.*, 1920; Correspondent for Ohio Metropolitan Newspapers, 1918-1920; Reporter, Copyreader and State Editor Cleveland Plain Dealer, 1920-1922; Editorial Staff Nevada State Journal, summer of 1923; Contributor to Magazines and Newspapers, 1918-; Instructor in English, University of Nevada, January, 1923-1924; Assistant Professor of English, 1924-1926; Associate Professor of English, 1926-1930; Professor of English, 1930-.

ROBERT MAURO BRAMBILA, Colonel United States Army, Professor of Military Science and Tactics.

B.S., Nevada, 1897; M.A., *ibid.*, 1909; First Lieutenant, U. S. A., 1898; Chief of Constabulary, Manila, 1898-1900; Commandant, University of Nevada, 1904-1909; graduated from Infantry and Cavalry School, 1904; Promoted to Captain, 1905; Promoted to Major, 1917; Promoted to Lieutenant Colonel 1917; Promoted to Colonel, 1918; graduated from Infantry School, Field Officer's course, Fort Benning, 1921. Besides serving in all sections of the United States, had service in Cuba and in Hawaii and had war service in the Philippines in 1899, 1905 and 1911, in China in 1900 and in France in 1918; Professor of Military Science and Tactics, University of Nevada, 1931-.

Associate Professors<sup>1</sup>

- KATHERINE LEWERS**, Associate Professor of Freehand Drawing.  
Instructor in Freehand Drawing, University of Nevada, 1905-1907; Assistant Professor of Freehand Drawing, 1907-1914; Associate Professor of Freehand Drawing, 1914-.
- KATHARINE RIEGELHUTH, M.A.**, Associate Professor of English.  
B.A., University of Nevada, 1897; M.A., Columbia University, 1913; Instructor in German, University of Nevada, 1905-1916; Assistant Professor of German, 1916-1917; Associate Professor of German, 1917-1922; Associate Professor of English, 1922-.
- MARGARET ELIZABETH MACK, A.M.**, Associate Professor of Biology and Dean of Women.  
B.S., University of Nevada, 1910; A.M., Columbia University, 1913; Instructor in Biology, University of Nevada, 1913-1917; Assistant Professor of Biology, 1917-1922; Associate Professor of Biology, 1922-.
- MEREDITH RAINES MILLER, M.S.**, Associate Research Professor of Agricultural Chemistry.  
B.S., University of California, 1912; M.S., University of Nevada, 1927; Assistant Chemist, Alameda Sugar Co., 1909-1912; Assistant Chemist, Insecticide and Fungicide Laboratory, University of California, 1912-1918; Chemist, Nevada Agricultural Experiment Station, 1918-; Associate Research Professor of Agricultural Chemistry, 1922-.
- MARY E. BUOL, B.S.**, Associate Professor of Agricultural Extension in the College of Agriculture.  
B.S., St. Lawrence University, 1912; Home Economics Teacher, Swarthmore High School, 1912-1914; Home Economics Teacher, East Orange High School, 1914-1915; Home Economics Department Head, Germantown High School, 1915-1917; Emergency Home Demonstration Agent, University of Minnesota, 1917; County Home Demonstration Agent, Minnesota, 1918-1921; Assistant Director of Agricultural Extension and Associate Professor of Agricultural Extension in the College of Agriculture, University of Nevada, 1922-.
- SILAS CALVIN FEEMSTER, A.M.**, Associate Professor of History and Political Science.  
A.B., Drury College, 1907; A.M., University of Nebraska, 1912; Professor of Latin and History, York College, 1907-1910; Assistant in History and Political Science, University of Nevada, 1913-1915; Instructor in History and Political Science, 1915-1916; Assistant Professor of History, 1917-1924; Associate Professor of History and Political Science, 1924-.
- GILBERT BRUCE BLAIR, A.M.**, Associate Professor of Physics.  
A.B., Tabor College, 1902; A.M., Washburn College, 1904; Assistant in Physics and Astronomy, Washburn College, 1904-1905; Assistant in Alleghany Observatory, 1905-1906; Professor of Physics, Morningside College, 1907-1909; Instructor and Assistant Professor of Physics, Oregon Agricultural College, 1912-1919; Assistant Professor of Physics, University of Nevada, 1919-1924; Associate Professor of Physics, 1924-.
- EDWARD G. SUTHERLAND, A.B.**, Associate Professor of Economics, Business and Sociology.  
A.B., University of Utah, 1923; Instructor in Economics, Business and Sociology, University of Nevada, 1924-1925; Assistant Professor of Economics, Business and Sociology, 1925-1926; Associate Professor of Economics, Business and Sociology, 1926-.
- THOMAS E. BUCKMAN, B.S.**, Associate Professor of Agricultural Extension.  
B.S., University of Nevada, 1921; County Agricultural Agent, Lyon County, 1921-1922; County Agricultural Agent, Washoe County, 1923-1924; Acting Assistant Director, Nevada Agricultural Extension, University of Nevada, 1925-1926; Assistant Director of Agricultural Extension and Associate Professor of Agricultural Extension in the College of Agriculture, University of Nevada, 1926-.

<sup>1</sup>Order of Seniority.

- VICTOR ELWIN SPENCER, M.S.**, Associate Professor of Soils Research in the Nevada Agricultural Experiment Station.  
B.S., University of Illinois, 1915; M.S., *ibid.*, 1926; Associate in Soil Fertility, *ibid.*, 1915-1927; Associate Professor of Soils Research in Nevada Agricultural Experiment Station, 1928-.
- CHARLES ROGER HICKS, A.M.**, Associate Professor of History and Political Science.  
A.B., Clark University, 1915; A.M., Stanford University, 1922; Instructor in First Commercial School, Kyoto, Japan, 1916-1918; Professor of History and Political Science, Ottawa University, 1922-1924; Instructor in History and Political Science, University of Nevada, 1924-1925; Assistant Professor of History and Political Science, *ibid.*, 1925-1928; Associate Professor of History and Political Science, *ibid.*, 1928-.
- JESSIE P. POPE, M.A.**, Associate Professor of Home Economics.  
B.S., University of Nebraska, 1913; M.A., Columbia, 1926; Instructor in Home Economics, University of Nevada, 1918-1927; Assistant Professor of Home Economics, *ibid.*, 1920-1929; Associate Professor of Home Economics, *ibid.*, 1929-.
- SIGMUND W. LEIFSON, Ph.D.**, Associate Professor of Physics.  
B.S., North Dakota State Agricultural College, 1922; Teaching Fellow in Physics, University of California, 1922-1925; Ph.D., University of California, 1925; Instructor in Physics, University of Nevada, 1925-1926; Assistant Professor of Physics, *ibid.*, 1926-1929; Associate Professor of Physics, *ibid.*, 1929-.
- VINCENT P. GIANELLA, M.S.**, Associate Professor of Geology and Mineralogy.  
B.S. in E.E., Oregon Agricultural College, 1910; B.S. in E.M., Oregon School of Mines, 1911; M.S. in E.M., Mackay School of Mines, 1920; Instructor in Metallurgy, University of Nevada, 1923-1928; Assistant Professor of Geology and Mineralogy, *ibid.*, 1928-1929; Associate Professor of Geology and Mineralogy, *ibid.*, 1929-.
- JOHN R. GOTTARDI, M.A.**, Associate Professor of Modern Languages.  
B.A., University of Nevada, 1921; M.A., *ibid.*, 1926; Instructor in Modern Languages, University of Nevada, 1922-1926; Assistant Professor of Modern Languages, *ibid.*, 1926-1930; Associate Professor of Modern Languages, *ibid.*, 1930-.
- EDWIN EUGENE WILLIAMS, M.A.**, Associate Professor of Modern Languages.  
B.S., University of Nevada, 1912; Licentiate, Instituto de Barcena, Mexico, 1918; M.A., University of Nevada, 1928; Associate Professor of Spanish and German, University of Redlands, 1920-1921; Instructor in Modern Languages, Oregon Agricultural College, 1919-1920; Instructor in Modern Languages, University of Nevada, 1924-1925; Assistant Professor of Modern Languages, 1925-1930; Associate Professor of Modern Languages, 1930-1931.
- PAUL ATKINS HARWOOD, M.A.**, Associate Professor of English.  
B.A., University of Nevada, 1924; M.A., *ibid.*, 1929; Instructor in English, *ibid.*, 1927-1929; Assistant Professor of English, *ibid.*, 1929-1930; Associate Professor of English, *ibid.*, 1930-.

Assistant Professors<sup>2</sup>

- GEORGE HARDMAN, M.S.**, Assistant Research Professor of Irrigation.  
B.S., Oregon Agricultural College, 1915; M.S., *ibid.*, 1916; Field Agent, Bureau of Good Roads and Rural Engineering, U.S.D.A., 1915-1916; Soil and Irrigation Expert, Eastern Oregon Land Co., 1916-1917; Irrigation Engineer, Goose Lake Valley Irrigation Co., 1917-1918; Assistant Agronomist, Nevada Agricultural Experiment Station, 1918-1919; Assistant in Irrigation, 1919-; Assistant Professor of Agronomy, University of Nevada, 1919-1926; Assistant Research Professor of Irrigation, 1922-.

<sup>2</sup>Order of seniority.

- LYMAN R. VAWTER, D.V.M., Assistant Research Professor of Veterinary Science.  
D.V.M., Kansas State Agricultural College, 1918; Meat Inspector, Bureau of Animal Industry, 1917-1918; Assistant in Pathology, Kansas State Agricultural College, 1918-1919; Instructor in Pathology, 1919-1920; Pathologist, Nevada Agricultural Experiment Station, 1920-; Assistant Research Professor of Veterinary Science, 1922-.
- LOUISE KERR SPRINGER, B.S., Assistant Professor of Home Economics.  
B.S., Oregon Agricultural College, 1921; Instructor in Home Economics, University of Nevada, 1922-1924; Assistant Professor of Home Economics, 1924-.
- JOHN HYRUM WITTWER, B.A., Assistant Professor of Agricultural Extension.  
B.A., Utah Agricultural College, 1917; County Agricultural Agent, Uintah County (Utah), 1917-1921; County Agricultural Agent, Clark County, 1921-1923; District Extension Agent, Clark and Lincoln Counties, 1924-; Assistant Professor of Agricultural Extension in the College of Agriculture, University of Nevada, 1924-.
- EDITH M. RUEBSAM, B.A., Assistant Professor of Education.  
B.A., Columbia, 1921; Demonstration Teacher of Kindergarten and Teacher Training, San Jose (California) State Teachers College, 1915-1924; Supervisor of Rural Schools, Sonoma County, California, 1924-1925; Assistant Professor of Education, University of Nevada, 1925-.
- CHARLES LOUIS SEARCY, A.M., Assistant Professor of Mathematics.  
B.C.E., Purdue University, 1891; C.E., *ibid.*, 1892; A.M., University of California, 1922; Professor of Mathematics, College of Montana, 1897-1899; Assistant Professor of Civil Engineering, University of Kansas, 1899-1900; Instructor in Mathematics and Physics, Eureka (California) Junior College, 1918-1921; Instructor in Mathematics, University of Nevada, 1925-1926; Assistant Professor of Mathematics, 1926-.
- WILLIAM REGINALD BLACKLER, M.S., Assistant Professor of Economics, Business and Sociology; Master of Lincoln Hall.  
B.S., University of Utah, 1924; M.S., University of California, 1925; Instructor in Economics, Business and Sociology, University of Nevada, 1925-1928; Assistant Professor of Economics, Business and Sociology, *ibid.*, 1928-; Master of Lincoln Hall, 1929-.
- WILLIAM I. SMYTH, E.M., Assistant Professor of Metallurgy and Analyst in State Mining Laboratory.  
B.S., University of Nevada, 1914; E.M., *ibid.*, 1927; Instructor in Metallurgy and Analyst in State Mining Laboratory, University of Nevada, 1925-1928; Assistant Professor of Metallurgy and Analyst, *ibid.*, 1928-.
- S. ALLAN LOUGH, M.S., Assistant Professor of Chemistry.  
A.B., University of Denver, 1924; M.S., University of Michigan, 1927; Teacher of Organic Chemistry, University of Denver Dental College, 1923-1924; Research Assistant in Physiological Chemistry, Medical School, University of Michigan, 1924-1926 and 1927; Instructor in Chemistry, University of Nevada, 1928-1929; Assistant Professor of Chemistry, *ibid.*, 1929-.
- CLAUDE CARSON SMITH, M.A., Assistant Professor of History and Political Science.  
A.B., Carson-Newman College, 1921; M.A., University of Oklahoma, 1924; Instructor in Social Science, Kansas City University, 1927-1929; Instructor in History and Political Science, University of Nevada, 1929-1930; Assistant Professor of History and Political Science, *ibid.*, 1930-.
- ORPHA A. MILLER, B.A., Assistant Professor of Agricultural Extension.  
B.A., Indiana State University, 1913; Teacher of Home Economics, High School, Carlisle, Indiana, 1915-1916; Teacher of Home Economics, High School, Los Angeles, Calif., 1919-1922; Home Demonstration Agent, Imperial County, California, 1922-1927; District Extension Agent, Clark and Lincoln Counties, 1928-; Assistant Professor of Agricultural Extension in the College of Agriculture, University of Nevada, 1929-.

- JOSEPH WILLIS WILSON, B.S., Assistant Professor of Agricultural Extension.  
B.S., University of Nevada, 1913; County Agricultural Agent, Lyon County, 1917-1920; Humboldt County, 1921-1925; Elko County, 1925-1928; District Extension Agent, Northern Eureka and Elko Counties, 1929-; Assistant Professor of Agricultural Extension in the College of Agriculture, University of Nevada, 1929-.
- MERYL WILLIAM DEMING, Ph.D., Assistant Professor of Chemistry.  
B.S., University of Oregon, 1923; M.S., *ibid.*, 1925; Ph.D., University of Washington, 1928; Instructor in Chemistry, Oregon State College, 1928-1929; Instructor in Chemistry, University of Nevada, 1929-1930; Assistant Professor of Chemistry, *ibid.*, 1930-.
- CHESTER M. SCRANTON, M.A., Assistant Professor of Physical Education for Men.  
B.A., University of Nevada, 1924; M.A., *ibid.*, 1928; Instructor in Physical Education for men, *ibid.*, 1928-1929; Assistant Professor of Physical Education for Men, 1929-; Acting Head of Department, 1929-1930.
- CHARLES LEROY BROWN, M.A., Assistant Professor of Biology.  
B.A., University of Nevada, 1912; M.A., *ibid.*, 1913; Instructor in Biology, University of Nevada, 1918-1929; Assistant Professor of Biology, 1929-.
- KARL WILLIAM NIEMANN, D.V.M., Assistant Research Professor of Veterinary Science in the Nevada Agricultural Experiment Station.  
B.S., Kansas State Agricultural College, 1926; D.V.M., *ibid.*, 1929; Assistant Research Professor of Veterinary Science in the Nevada Agricultural Experiment Station, 1929-.
- HAROLD N. BROWN, A.M., Assistant Professor of Education.  
B.S., Kansas State Teachers College, 1923; A.M., Stanford, 1927; Teacher in Clifton, Kansas, Elementary Schools, 1918-1920; Superintendent of Tampa, Kansas, Schools, 1923-1926; Critic, Junior High School, Arizona State Teachers College, 1927-1930; Instructor in Summer Session, Kansas State Teachers College, 1928; Assistant Professor of Education, University of Nevada, 1930-.
- RALPH A. IRWIN, M.S., Assistant Professor of Psychology.  
B.S., Kansas State Agricultural College, 1928; M.S., *ibid.*, 1929; Instructor in Psychology, University of Nevada, 1929-1931; Assistant Professor of Psychology, 1931-.
- Instructors<sup>1</sup>*
- OSCAR THORVALD ROCKLUND, Instructor in Shop Practice and Superintendent of Shops.  
Instructor in Shop Practice and Superintendent of Shops, University of Nevada, 1923-.
- BERTRAND FRANKLIN COUCH, Instructor in Mine Accounting.  
Instructor in Mine Accounting, University of Nevada, 1924-.
- MAE BERNASCONI-SIMAS, B.A., Instructor in Physical Education for Women.  
B.A., University of Nevada, 1928; Instructor in Physical Education for Women, *ibid.*, 1928-; Acting Head of Department, 1929-1930; Instructor, *ibid.*, 1930-.
- ARTHUR W. GAY<sup>2</sup>, B.S., Instructor in Engineering.  
B.S., in E.E., University of Nevada, 1928; Instructor in Engineering, *ibid.*, 1928-1931.
- ROBERT STUART GRIFFIN, B.S., Instructor in English.  
B.S., Oregon State College, 1928; Instructor in Public Speaking, Oregon State College, 1927; Instructor in English, University of Nevada, 1928-.
- GRANT H. HUSTTS, Sergeant, U. S. A., Instructor in Military Science and Tactics.  
Instructor in Military Science and Tactics, University of Nevada, 1928-.

<sup>1</sup>Order of seniority. <sup>2</sup>Resignation to be effective August 1, 1931.

WAYNE WALLACE BUERER, B.S., Instructor in Mechanical Engineering.

B.S., University of Nevada, 1928; Instructor in Mechanical Engineering, *ibid.*, 1928-.

IRVING JESSE SANDORF, B.S., Instructor in Electrical Engineering.

B.S. in E.E., University of Michigan, 1923; Research Engineer, Development and Research Department, American Telephone and Telegraph Company, 1923-1926, 1927-1928; Instructor in Electrical Engineering, University of Nevada, 1928-.

ERNEST SPARGUER BROWN, B.A., Instructor in Economics, Business and Sociology.

B.A., University of Nevada, 1926; Instructor in Economics, Business and Sociology, *ibid.*, 1928-1931.

MILAN J. WEBSTER, M.A., Instructor in Economics, Business and Sociology.

B.E., Nebraska Normal College, 1908; B.A., University of Nevada, 1929; M.A., *ibid.*, 1930; Assistant in Psychology, Nebraska Normal College, 1907-1908; Instructor in Education, *ibid.*, 1908-1909; Assistant in Economics, Business and Sociology, University of Nevada, 1928-1929; Instructor in Economics, Business and Sociology, 1929-.

LORETTA ROSE MILLER, B.S., Instructor in Biology.

B.S., University of Nevada, 1929; Instructor in Biology, *ibid.*, 1929-.

HERBERT B. WILCOX, First Lieutenant, U. S. A., Instructor in Military Science and Tactics.

Second Lieutenant, Forty-fourth Infantry, U. S. A., 1917; First Lieutenant, *ibid.*, 1918; Instructor in Military Science and Tactics, University of Nevada, 1929-.

ERNEST LOER INWOOD, B.A., Instructor in Economics, Business and Sociology.

B.A., University of Nevada, 1927; Instructor in Economics, Business and Sociology, *ibid.*, 1930-.

HAROLD CLARK AMENS, B.S., Instructor in Engineering.

B.S., University of Nevada, 1928; Instructor in Engineering, *ibid.*, 1930-.

LAWTON B. KLINE, M.A., Instructor in Modern Languages.

B.A., University of Nevada, 1926; M.A., *ibid.*, 1928; Assistant in Modern Languages, University of Nevada, 1928-1931; Instructor in Modern Languages, 1931-.

FRANCIS S. OAKBERG, A.B., Instructor in Chemistry.

A.B., Illinois College, 1929; Fellow in Chemistry, University of Nevada, 1929-1931; Instructor in Chemistry, 1931-.

#### Lecturers, Fellows, and Assistants

BENSON DILLON BILLINGHURST, B.S., LL.B., LL.D., Lecturer in Education.

B.S., Ohio Wesleyan University, 1897; LL.B., University of Washington, 1908; LL.D., University of Nevada, 1924; Superintendent of Schools, Prescott, Arizona, 1900-1907; Superintendent of Schools, Reno, Nevada, 1908-; Lecturer in Education, University of Nevada, 1920-.

CLYDE D. SOUTER, LL.B., Lecturer in Law in the Department of Economics, Business and Sociology.

A.B., Dartmouth College, 1906; LL.B., New Jersey Law School, 1911; Instructor, New Jersey Law School, 1914-1915; Assistant Professor, *ibid.*, 1916-1918; Professor of Law, *ibid.*, 1918-1922; Lecturer in Law, University of Nevada, 1926-.

RUTH ADELIN TALBOY, B.S., Lecturer in Vocational Home Economics.

B.S., Iowa State College, 1924; Nevada State Supervisor of Home Economics, 1926-; Lecturer in Vocational Home Economics, University of Nevada, 1927-.

ROBERT B. JEPSON, B.S., Lecturer in Education.

B.S., Utah Agricultural College, 1924; State Supervisor of Agricultural Education, 1926-; Lecturer in Education, University of Nevada, 1928-.

ALDA LAVENDER RUSSELL, Lecturer in Education.

Scout Executive, Youngstown, Ohio, 1916-1917; Camp Director, Texas and California, 1917-1926; Scout Executive, Sonoma and Lake Counties, California, 1926-1927; Nevada State Scout Executive, 1927-; Lecturer in Education, University of Nevada, 1928-.

HARRIET MAY WILSON, Fellow in English.

Fellow in English, University of Nevada, 1929-1931.

WILLIAM KELLY COLLONAN, B.A., Fellow in English.

B.A., University of Nevada, 1930; Fellow in English, *ibid.*, 1930-.

BARBARA SCHMITT, B.A., Fellow in English.

B.A., University of North Dakota, 1923; Fellow in English, University of Nevada, 1930-.

## UNIVERSITY STANDING COMMITTEES

The first-named member of each Committee is its Chairman, to whom all matters of business should be referred.

*Admission, Entrance Examinations, and Advanced Standing—*

G. W. SEARS, P. A. LEHENBAUER, S. G. PALMER.

*Assemblies and Lecturers—*

A. L. HIGGINBOTHAM, S. A. LOUGH, HAROLD N. BROWN.

*Athletics—*

J. E. MARTIE, R. C. THOMPSON, MISS SAMETH.

*Campus Employment—*

MISS MACK, C. HASEMAN, W. R. BLACKLER, J. B. LYNCH.

*Graduate—*

M. ADAMS, R. STEWART, J. C. JONES.

*Health—*

P. FRANDSEN, J. E. MARTIE, MISS SAMETH.

*High-School Relationships—*

F. W. TRANER, MISS RIEGELHUTH, MISS POPE.

*Library—*

A. E. HILL, MISS WIER, W. S. PALMER, B. F. CHAPPELLE, MISS THOMPSON.

*Registration and Scholarship—*

M. ADAMS, R. STEWART, F. H. SIBLEY, J. W. HALL, J. A. FULTON, MISS SISSA.

*Schedules—*

H. P. BOARDMAN, S. C. FEEMSTER, V. P. GIANELLI.

*Scholarships and Prizes—*

J. A. CARPENTER, MISS LEWIS, P. A. HARWOOD.

*Student Affairs—*

CHARLES HASEMAN, MISS MACK, J. C. JONES, W. R. BLACKLER.

*Teacher Appointment—*

F. W. TRANER, J. W. HALL.

*Vocational Guidance—*

J. R. YOUNG, A. L. HIGGINBOTHAM, J. A. CARPENTER.

*Campus Calendar—*

MISS MACK, C. HASEMAN, J. C. JONES, R. C. THOMPSON, T. H. POST, C. R. HICKS, R. S. GRIFFIN AND THE COACH OF DRAMATICS.

*Chief Marshal of Formal Assemblies—*

COLONEL JOHN PAUL RYAN, U. S. A.

## THE HISTORY AND DEVELOPMENT OF THE UNIVERSITY

1862—*The Morrill Land Grant.* By the terms of this grant the State of Nevada received a donation of 90,000 acres of land, in 1866, "for the endowment, support and maintenance of at least one college whose leading object shall be, without excluding other scientific and classical studies and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts." The land in this State is known as the "90,000-Acre Grant," and the sales of this land have amounted to \$116,144.51, upon which the United States Government requires an annual interest of 5%.

1864—*Foundation.* The Constitution of the State declares that the "Legislature shall encourage, by all suitable means, the promotion of intellectual, literary, scientific, mining, mechanical, agricultural, and moral improvement," and shall provide for "the establishment of a State University which shall embrace departments for agriculture, mechanic arts and mining." A further provision in the Constitution relates to the Normal School.

1866—By a special Act of Congress there were seventy-two sections in the State set aside for the purposes of endowment of the universities in the State. The fund from the sale of this land now amounts to \$54,550.34.

1873—*Location.* The University was first located at Elko by an Act of the Legislature approved March 7, 1873. By an Act of the Legislature approved March 7, 1885, it was moved to Reno, and formally reopened March 31, 1886.

1887—Administration of President LeRoy D. Brown began. Student enrollment in 1887-1888 was 50. The faculty consisted of 2 members, President Brown and Professor Hannah K. Clapp. During the first year 2 additional members were added, and by the end of the second year the faculty numbered 7.

During the first year 5 departments were recognized, although not fully organized. They were the Liberal Arts, the Mining, the Normal, the Agricultural, and the Business Schools.

- 1888—The School of Mines was organized, with Robert D. Jackson, Ph.B., as Director. The Normal School was organized, with Miss Kate N. T. Tupper as the head. The Military Department was organized, with Lieutenant Arthur C. Ducat, Jr., as commandant.
- 1889—*The Hatch Act*—The Agricultural Experiment Station was organized, President Brown acting as Director. By an Act of Congress passed March 2, 1887, known as the Hatch Act, which was accepted by this State, there was established, in connection with the colleges founded upon the Congressional Act of 1862, agricultural experiment stations, "to aid in the acquiring and diffusion among the people of the United States of useful and practical information on subjects connected with agriculture, and to promote scientific investigation and experiment respecting the principles and applications of agricultural science." The Hatch Act of 1887 appropriated \$15,000 annually for this support.
- 1889—Administration of President Brown ended.
- 1890—Administration of President Stephen A. Jones began on January 6.
- 1890—The second Morrill Act of Congress made further appropriations for endowments of institutions established under the Act of 1862. Under this endowment the University is now receiving \$25,000 per year.
- 1891—The first graduates from the School of Liberal Arts.
- 1892—The first graduates from the Schools of Mines and Agriculture.
- 1894—Administration of President Jones ended on June 30. Administration of President Joseph Edward Stubbs began July 1.
- 1895—The State Analytical Laboratory was organized under provisions of an Act of the Nevada Legislature of March 16, 1895.
- 1899—Washoe County presented to the University a farm of sixty acres, to be used in connection with the Agricultural Experiment Station. The cost of the farm was \$12,000.
- 1904—The tridecennial celebration of the establishment of the University was held.
- 1906—*The Adams Act*—Congress, under Act dated March 16, 1906, known as the Adams Act, provided for additional appropriation for the support of the Agricultural Experiment Station, limiting the money's use to necessary

- expenses of original research and experimental work in agriculture. This grant amounts to \$15,000 per year.
- 1907—*The Nelson Fund*—An Act of Congress of March 4, 1907, carried with it an appropriation for the further support of the universities established under the Morrill Act of 1862. The present appropriation under this fund amounts to \$25,000 per year.
- 1907—Mrs. John W. Mackay and Mr. Clarence H. Mackay began a donation to the University which founded the Mackay School of Mines, the Mackay Athletic Field, and the Mackay Training Quarters, and contributed \$25,000 toward the beautifying of the Campus. They also presented a statute in bronze by Gutzon Borglum of John W. Mackay, one of the pioneers of the Comstock.
- 1909—State Hygienic Laboratory was organized under provisions of the Act of the Nevada Legislature, approved March 25, 1909.
- 1910—Laboratory for Pure Foods and Drugs and Weights and Measures was established under provisions of Act of the Nevada Legislature of 1909, effective from January 1, 1910.
- 1911—Twenty-fifth anniversary of the establishment of the University at Reno, celebrated by Silver Jubilee and home-coming of former students and graduates.
- 1912—Mrs. John W. Mackay and Mr. Clarence H. Mackay presented to the University Board of Regents \$150,000 as an endowment for the Mackay School of Mines.
- 1914—Administration of President Stubbs closed with his death on May 27.
- 1914—By an Act of Congress known as the "Smith-Lever Act," there was established a fund for the purpose of agricultural extension. The fund, amounting to \$10,000 the first year, increased each year until it amounted in 1923 and thereafter, to \$15,699 per year.
- 1914—September 14, administration of President Archer B. Hendrick began.
- 1915—State Veterinary Control Service was organized under provisions of an Act of the Nevada Legislature, approved March 11, 1915.
- 1917—University Farm of 213 acres purchased.
- 1917—May 1, administration of President Hendrick ended.
- 1917—September 1, administration of President Walter Ernest Clark began.

- 1918—*The Smith-Hughes Act*—An Act of Congress passed early in 1917 for the promotion of vocational education. This Act provides for cooperation with the States in the promotion of such education as agriculture, home economics, trades, and industries, and in preparation of teachers of vocational subjects. Under the Nevada State Board of Vocational Education, the University of Nevada does the Nevada vocational-teacher training in accord with the Smith-Hughes Act, being granted special federal and state funds for this purpose. This work began at the University in January, 1918.
- 1918—First training detachment of 103 soldier students from June 15 to August 13; second training detachment of 103 soldier students from August 15 to October 12; Collegiate Section A—79 soldier students from October 1 to December 21; Vocational Section B—212 soldier students from October 15 to December 21.
- 1920—The School of Education was organized.
- 1920—The Rare and Precious Metals Federal Mining Experiment Station was assigned to the University July 8, 1920, by the Federal Bureau of Mines.
- 1920—A Federal Radio Station was established on the University Campus in September, 1920. The operant station and the government wireless laboratory were both housed in the smaller of the two Barracks buildings until 1924 when this station was transferred to the Federal Aviation Field south of Reno.
- 1920—The University of Nevada was placed on the approved list of the Association of American Universities in November, 1920.
- 1921—An Engineering Experiment Station was established.
- 1924—The Semicentennial of the University was celebrated in May with a home-coming of former students and graduates. Actual University work first began in Elko in 1874.
- 1924—The Robert Lardin Fulton Lecture Foundation was established.
- 1925—Mr. Clarence H. Mackay began his additional gift of \$18,000 per year for five years, to the Mackay School of Mines.
- 1925—*The Purnell Act*—An Act of Congress passed in February, 1925, under which the income of the University's Agricultural Experiment Station was increased to \$50,000 for the year beginning July, 1925, and is due

- for further increase of \$10,000 per year thereafter until the annual income reaches \$90,000.
- 1926—Mr. William A. Clark, Jr., began the construction of a Library Building in memory of his wife, Alice McManus Clark, a native of Virginia City, Nevada.
- 1926—Mr. Clarence H. Mackay gave the University \$100,000 to enlarge the Mackay School of Mines Building and to perfect its equipment.
- 1927—Presentation of Memorial Library to University by Mr. William Andrews Clark, Jr., October twenty-first.
- 1928—Mr. Clarence H. Mackay and his mother gave the University seven beautiful bound volumes of the *Virginia City Enterprise*—a nearly complete file of this rare newspaper for the years 1866 to 1872, inclusive.
- 1928—Mr. Clarence H. Mackay gave \$6,500 to aid in collecting historical Comstock Lode material for Mackay School of Mines Museum.
- 1928—Mr. George Wingfield financed the construction of a retaining wall back of the Engineering Buildings.
- 1928—Mr. Thomas F. Cole financed important improvements on the Lincoln Hall Men's Dormitory.
- 1928—*The Capper-Ketcham Act*—An Act of Congress was passed in May, 1928, under which the income of the University's Agricultural Extension Service was increased \$20,000 per year beginning with July, 1928.
- 1929—Construction begun on Mackay Science Hall. This \$415,000 building, gift of Mr. Clarence H. Mackay, will house the Departments of Chemistry, Physics and Mathematics.
- 1929—Under Act of March 29, 1929, the Nevada Legislature established a State Bureau of Mines, putting control under the Board of Regents of the University and making an annual grant for the first biennium of \$5,000.
- 1929—Mr. Clarence H. Mackay gave \$27,500 to enlarge the Stadium and refurbish the Training Quarters, presented the Walther Library of Desert Geology to the Mackay School of Mines and arranged to continue indefinitely the \$18,000 a year to this School.
- 1930—Dedication and Presentation of Mackay Science Hall to the University by Mr. Clarence H. Mackay, October 24.
- 1931—Under Act of March 25, 1931, the Nevada Legislature transferred to the University of Nevada the land and buildings formerly used by the Nevada Historical Society.

### THE UNIVERSITY ORGANIZATION

---

- A. College of Arts and Science.
  - School of Education and Nevada State Normal School.
- B. College of Engineering.
  - (a) Mackay School of Mines.
  - (b) School of Mechanical Engineering.
  - (c) School of Electrical Engineering.
  - (d) School of Civil Engineering.
  - (e) Engineering Experiment Station.
- C. College of Agriculture.
  - (a) School of Agriculture.
  - (b) School of Home Economics.
- D. Affiliated Organizations.
  - (a) Agricultural Experiment Station.
  - (b) Smith-Lever Extension in Agriculture and Home Economics.
  - (c) State Analytical Laboratory.
  - (d) State Bureau of Mines.
  - (e) State Hygienic Laboratory.
  - (f) Pure Food and Drugs Control and Weights and Measures.
  - (g) State Veterinary Control Service.
  - (h) United States Bureau of Mines Experiment Station.

### COLLEGES, SCHOOLS, AND PUBLIC SERVICE DEPARTMENTS

---

#### THE COLLEGE OF ARTS AND SCIENCE

The College of Arts and Science offers four-year courses leading to the degree of Bachelor of Arts. (Students who have majored in Mathematics and Science may, upon application to the faculty, receive the degree of Bachelor of Science if they prefer.)

Work in the following subjects is offered in the College of Arts and Science: Art, Biology, Business, Chemistry, Classics, Economics, Education, English, Geology, History, Mathematics, Mineralogy, Modern Languages and Literatures, Music, Philosophy, Physical Education, Physics, Political Science, Psychology, and Sociology.

#### SCHOOL OF EDUCATION AND STATE NORMAL SCHOOL

The training of teachers at the University of Nevada embraces the following courses and divisions:

1. The School of Education (included as a division of the College of Arts and Science, but with its own Dean and its direct affiliations with the Colleges of Agriculture and Engineering), which offers to prospective secondary-school teachers a liberal and professional course of study of four years leading to the bachelor's degree and a teacher's high-school diploma, giving title to a teacher's high-school first-grade certificate, and also a special training course for future school principals and superintendents.

2. The State Normal School, which offers to fully accredited students of college grade a two-year professional training leading to a teacher's elementary diploma giving title to a first-grade elementary certificate. Students who cannot immediately proceed after the first year to the second year of this course are granted credentials giving title to a second-grade elementary certificate.

3. The Summer Session, organized to benefit present and prospective teachers and conducted for six weeks in June and July, with a wide variety of liberal and professional courses which carry both University and State certificate credit. Due to financial stringency, Summer Sessions will not be conducted in 1931 and 1932.

## THE COLLEGE OF ENGINEERING

The Mackay School of Mines offers a four-year course in mining, leading to the degree of Bachelor of Science in Mining Engineering, which prepares students to become mining engineers, metallurgists, and mining geologists and a one-year graduate course leading to the degree of Master of Science in Mining. The school is provided with the equipment necessary to teach efficiently the courses in mining, metallurgy, and geology, which form the basis of a mining education. The professional degree of Engineer of Mines is conferred upon graduates who have held responsible mining positions for at least five years and who present satisfactory theses.

The Schools of Mechanical, of Electrical, and of Civil Engineering each offer four-year courses of instruction leading, respectively, to the degrees of Bachelor of Science in Mechanical, in Electrical, and in Civil Engineering. The shops are well equipped, and the laboratories offer most excellent facilities for practical work.

## ENGINEERING EXPERIMENT STATION

The Engineering Experiment Station was established by the Board of Regents, November 1, 1921. It cooperates with engineering experiment stations in other institutions and conducts useful investigations along engineering lines, publishing bulletins from time to time whenever the results justify such publication.

## THE COLLEGE OF AGRICULTURE

The College of Agriculture curriculum leads to the degree of Bachelor of Science in Agriculture. This is a four-year course including, in addition to the prescribed agricultural subjects, such subjects in the College of Arts and Science as are necessary to establish in the student's mind a thorough knowledge of agricultural problems.

The four-year degree course in the School of Home Economics gives to young women of the University a comprehensive understanding of the household sciences, including both domestic science and domestic arts.

## AGRICULTURAL EXPERIMENT STATION

The Agricultural Experiment Station receives its Federal support from the Hatch Fund (1887), from the Adams

Fund (1906), and from the Purnell Fund (1925). These funds are restricted by law to the scientific investigation of agricultural problems, including the problems arising from soil conditions, the duty of water, animal diseases, poisonous range plants, economical feeding of live stock, insect pests, plant diseases, and other problems of agricultural economics and practice.

## AGRICULTURAL EXTENSION DIVISION

Agricultural Extension, provided for by the Federal Smith-Lever Extension Bill, is under the immediate charge of a director.

Its specific purpose is "the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities, and imparting to such persons information on said subjects, through field demonstrations, publications, and otherwise." Further information concerning the work under this division, staff, etc., is given in this catalogue.

## PUBLIC SERVICE DEPARTMENTS

The Legislature of the State has placed the following five public service departments under the direction of the President and Board of Regents of the University:

## STATE ANALYTICAL LABORATORY

The State Analytical Laboratory, which was organized under an Act of the Legislature approved May 16, 1895, provides a means whereby citizens of Nevada may have ores and minerals, taken from within the boundaries of the State, assayed and analyzed free of charge.

## STATE HYGIENIC LABORATORY

The State Hygienic Laboratory was organized in 1909 to provide facilities for the diagnosis of infectious human diseases and to provide for the control of such diseases. The services of the laboratory are available to physicians, health officers, and health boards. The laboratory is located at the corner of Fifth and Sierra Streets, Reno.

## FOOD AND DRUGS CONTROL, AND WEIGHTS AND MEASURES

The Act of the Legislature in 1909 which established the Food and Drugs Control, and Weights and Measures

Departments, provides that all rules, regulations, definitions, and decisions proclaimed by the Secretary of Agriculture for the enforcement of the national law, shall be adopted by this department in the enforcement of the state law. The Department of Weights and Measures is also charged with the enforcement of the provisions of the Nevada Fruit and Vegetable Standardization Act (1923). The laboratory is located at the corner of Fifth and Sierra Streets, Reno.

#### STATE VETERINARY CONTROL SERVICE

The State Veterinary Control Service was organized in 1915, to provide facilities for the diagnosis of communicable diseases of domesticated animals, for research into the nature, cause, and methods of controlling the same, including the preparation and distribution of special sera and vaccines which cannot be purchased on the open market.

#### STATE BUREAU OF MINES

The State Bureau of Mines was created by the thirty-fourth session of the Legislature (approved March 29, 1929) to provide facilities for cooperation with the mineral industry of the State and to advance the development of the State's mineral deposits.

## ADMINISTRATION

### GOVERNMENT

The control of the University is vested by law in a Board of Regents consisting of five members elected by the people. By an Act of the Legislature, approved March 24, 1917, the tenure of office for University Regents is ten years. At each biennial election one Regent is to be elected.

The administration of the University is vested by the Board of Regents in the President of the University, the University Faculty, the Faculties of the several Colleges and the Deans and Directors of the Colleges and Schools and of the Public Service Division.

### THE PRESIDENT

The President of the University is the executive head of the University. It is his duty to secure efficiency in all the departments and orderly and economical administration and healthful development in all the affairs of the University. He is ex officio a member of each committee.

### THE VICE-PRESIDENT

In the absence of the President or in case of his inability to act, the Vice-President shall perform his functions.

### DEANS

The Dean of a college or school is the administrative officer of his college or school. Any matters in which the faculty of the college can legislate are within the administrative functions of the Dean. He is directly responsible to the President of the University.

### DEAN OF WOMEN

The academic and the social welfare of the women students is under the particular supervision of a Dean of Women. It is especially desirable that young women who are away from their home influences should have some one to whom they may look for advice in matters affecting their welfare as women and as students. The Dean of Women has jurisdiction over all social matters in which women students are concerned. For women students whose homes are

out of the city and who are not accommodated in Manzanita or Artemesia Halls, the Dean of Women has a list of suitable homes accommodating women exclusively and in which a parlor is provided for the reception of visitors. Women students are required to report to the Dean of Women in order that they may register their addresses. The Dean of Women invites correspondence with parents and guardians, and gladly cooperates with them regarding the welfare of students.

#### DEAN OF MEN

The academic and the social welfare of the men students is under the special supervision of the Dean of Men. Jurisdiction over all social matters and student organizations in which men students are concerned is given to the Dean of Men.

#### THE TREASURER AND COMPTROLLER

The Treasurer and Comptroller is authorized to receive all moneys arising from gifts or bounties in any form to the University or for its benefit; all fees from students or others; proceeds from all sales of farm products or any articles of personal property of whatever nature or kind; fees for services rendered in any manner, and funds from any sources whatsoever other than in cases by law required to be paid to the State Treasurer. He keeps the accounts of the moneys in his custody in such separate funds as are necessary for proper and systematic accounting.

#### THE UNIVERSITY FACULTY

The President, Vice-President, Deans, Librarian, Registrar, and all persons who give instruction, with the rank of instructor or above, in any of the regular college departments of the University, constitute the University Faculty.<sup>1</sup> Subject always to the approval of the President and the Board of Regents, the University Faculty has legislative jurisdiction in all matters of government, discipline and educational policy not delegated by it to the separate faculties, and has the right of review of all actions of the several colleges which relate to the educational welfare of the University as a whole.

<sup>1</sup>Exceptions to the above rule:

1. Any member of the faculty not teaching during any given college year shall not have the privilege of voting in faculty meetings during that year.
2. New appointees shall not have the right to vote until one year after appointment, except those who may be appointed to the rank of full professor, or as the head or acting head of a department.

The Standing Committees, through which much of the business of the University Faculty is done, are listed on page 22 of this Catalogue.

#### MEETINGS

The University Faculty meets at the call of the President.

#### COLLEGE FACULTIES

The faculty of each college directs the educational and internal life of the college, makes rules and regulations peculiar to that college; formulates the course of study, the entrance and graduation requirements, which, when approved by the University Faculty, the President and the Board of Regents, become the statutes in force in that college. It shall not have the authority to take away from a student any university privilege nor shall it trench upon the executive duties of the Deans. All matters which may require the action of the University Faculty shall be presented to that body by the Dean. The faculty of each college shall organize and carry out its functions as it deems wise. The Dean shall be chairman of the faculty and ex officio a member of all committees. The action of each faculty is subject to the approval of the President and of the Board of Regents. A copy of the minutes must be filed with the President immediately following each meeting.

#### DEPARTMENTS

The department is the educational unit in the University. The head of the department is responsible directly to the President for the efficiency and educational effectiveness of the department. For general administrative work the head of the department is in that college in which his major work appears.

The heads of departments make all department reports, prepare estimates for the expenses of their departments, and are responsible for the distribution and expenditure of the funds assigned to them.

## ADVANTAGES AND EQUIPMENT

Reno, the seat of the University, is a substantially built and steadily growing city, numbering in 1930 twenty thousand inhabitants. It is located, at an elevation of 4,500 feet, in the beautiful valley of the Truckee River at the junction of three railroads, the Southern Pacific, a transeontinental line, the Virginia and Truckee Railway, a short line with Reno and Virginia City as terminals, and the Western Pacific Railway, another trunk-line between the East and the West.

The scenery is magnificent. The University Campus, at the northern edge of the city of Reno, is a low plateau. On the west are the Sierra Nevada Mountains, pine clad, crowned with snow the year round, and towering to majestic heights, the white summit of Mount Rose, queen of the range, being over two miles above sea-level. On the east are the lower gray-brown Virginia Mountains, endlessly restful with their subdued lights and their velvet shadows. These two ranges unite in low hills to the north, while to the south a green and fertile valley crossed by the silver thread of the Truckee, stretches to the horizon mountains.

The air is clear and invigorating. The temperature is equable. Over three hundred days of the year the sun shines from a usually cloudless sky of wondrous blue. The nights are always cool and refreshing. There are few, if any, more healthful places in America.

The grade-and high-school system of the city has deserved repute throughout the Pacific States. The Reno Young Men's and Young Women's Christian Associations have well-equipped quarters which are centers of athletic and social activities. University students are welcomed by all of the churches of Reno.

## BUILDINGS AND GROUNDS

The University Campus has an area of sixty acres and is beautifully located on an eminence overlooking the city. The academic buildings center upon a turfed Quadrangle; broad walks and drives traverse the grounds. The natural advantages of the site respond well to landscape embellishment, and much has been done toward beautifying the grounds.

The following brief descriptions will give some idea of the principal buildings and the purposes for which they are used:

**AGRICULTURAL BUILDING**—The Agricultural Building is a three-story structure of brick, with stone facings and trimmings, situated directly east of the University lake. The first floor includes the administration offices, three classrooms, a large lecture room, the millinery laboratory, the offices of the Veterinary Control Service, and the nature study laboratory. The second floor is devoted to the School of Home Economics and the Department of Biology, and includes the sewing laboratory, the cooking laboratory, the model kitchen and dining room, and the biological laboratories. The basement includes laboratories for dairying, farm crops, soil physics, biology, Experiment Station chemistry, soils research and veterinary science. (1918\*)

**ARTEMISIA HALL**—The second residence hall for women students is a modern brick building, steam heated and electrically lighted. It is located north of and adjacent to the Dining Hall. Eighty women students and the matron can be accommodated. There are double rooms, living rooms, study, tub baths, showers, lavatories, kitchenette, laundry and other conveniences for comfortable living. (1926)

**BARRACKS**—The Barracks Building is a two-story frame building located directly north of Lincoln Hall. It is used by the Military Department and for special exhibition purposes. This building was erected in September, 1918, for the use of the Vocational Section of the Students' Army Training Corps. (1918)

**CHEMISTRY BUILDING**—The Chemistry Building is a two-story gray stone building standing on the west side of the Quadrangle. Fitted with laboratories and classrooms for Chemistry, it will continue to be used for Chemistry until the fall of 1930, after which, until it is razed, it will serve as a general reserve building. (1902)

**DINING HALL**—The University Dining Hall is a one-story brick building on the west side of the Campus. It is a conveniently equipped Dining Hall for the accommodation of two hundred and fifty students. (1905)

**EDUCATION BUILDING**—A two-story brick building, with stone facings and columns, situated north of the Agricultural

\*Figures given in parentheses at the end of paragraphs describing the buildings state the years in which the respective buildings were completed.

Building. The first floor has an auditorium seating 350, with stage and dressing room, the offices and three classrooms of the School of Education. The second floor is occupied by the Departments of Art, Economics, Business and Sociology, Philosophy and Psychology, and has the music room and other classrooms of Education. (1920)

**ELECTRICAL BUILDING**—The Electrical Building, situated on the east side of the campus, is a two-story brick building, 50x110 feet. The first floor contains classrooms and the mechanical, electrical and strength of materials laboratories. These laboratories are equipped with modern machinery for giving instruction in the several courses, such standard tests as are usually required being represented. The second floor contains the computing room, drafting room and the classrooms of the civil engineering department. (1912)

**EXTENSION BUILDING**—This is a two-story brick and stone building situated on the east side of the Campus directly east of the Mechanical Building. The entire second floor and a room of the basement houses the Department of Agricultural Extension. The basement is used by the Department of Building and Grounds. (1913)

**GREENHOUSE**—A working greenhouse is on the east side of the Campus. It is used by the Departments of Botany and Horticulture, and also for the study of plant industry. (1909)

**GYMNASIUM**—The Gymnasium is a brick building one hundred and fifty feet long and sixty feet wide. The assembly hall is one hundred feet by sixty feet, and is used for general University purposes. The building is devoted to the use of the men's and women's classes in Physical Education, and is equipped with shower baths, dressing rooms, and offices of the Physical Education departments. (1897; extension, 1922)

**HALL OF ENGLISH**—This one-story building is situated on the west side of the Quadrangle, is constructed of brick and stone in conformity with the architecture of other buildings. It formerly housed the Library. During the summer of 1929 its interior was changed to six classrooms and an office, all now used for the work of the Department of English. (1913)

**HATCH STATION**—Hatch Station, as enlarged in 1926, is occupied by the Agricultural Experiment Station. The first floor is occupied by the Department of Farm Development

and the Station Library. The second floor is occupied by the offices of the Station Director and by the Departments of Entomology and Range Management. The herbarium occupies the third floor. (1891; moved to Virginia Street, basement added, 1926)

**HEATING PLANT**—A central heating plant supplies most of the buildings on the Campus. It consists of four large boilers, pumps, engines, motors, etc., and is operated in connection with the mechanical engineering laboratories. (1908; enlarged, 1926)

**HOSPITAL**—The University Hospital is situated between the Gymnasium and Lincoln Hall. This is a one-story building and contains six rooms and a basement. There are four wards—two upon the west for men and two upon the east for women. There is a convenient kitchen where the food for the patients is prepared. A matron is in charge of the hospital. The physician engaged by the Hospital Association of the University has daily office hours in this building. (1902)

**LIBRARY—CLARK MEMORIAL**—A two story and basement fireproof brick building, the gift of Mr. William A. Clark, Jr., in memory of his wife, Alice McManus Clark. The main stackroom and a receiving room are in the basement. The first floor has workrooms and seminar rooms. The second floor includes the main reading room, a periodical room, a display room and the main offices of the librarian and staff. (1927)

**LINCOLN HALL**—Lincoln Hall, the men's dormitory, is a modern three-story brick building, built after the plan of such halls in use in the larger eastern colleges. It affords a comfortable home for ninety men. (1896)

**MACKAY SCHOOL OF MINES**—The Mackay School of Mines, the gift of Mrs. John W. Mackay and Mr. Clarence H. Mackay, houses the Departments of Mining, Metallurgy, Geology, and Mineralogy. It is a dignified and spacious structure in the colonial style, occupying a space 112x118 feet and is two stories throughout with basement, except for a light well over the library in the center of the building. In the basement are storerooms, the seismograph laboratory, geology department workroom, mining laboratory, lavatory, shower and locker rooms for the students, and the ore dressing laboratory or mill.

Upon the first floor are the chemical laboratory, electric furnace laboratory, first mezzanine mill floor of the mill, assay laboratory, museum, library, classrooms and offices of the Director, metallurgy department, and mining department.

Upon the second floor are the State Analytical Laboratory, mezzanine floor of the museum, drafting room, seminar room, instruments room, office of the Department of Geology, the mineralogy laboratory, maproom, petrography laboratory, petrography grinding and polishing room, classrooms and Mackay research room. (1908; enlarged, 1926)

**MACKAY SCIENCE HALL**—The Mackay Science Hall houses the departments of Chemistry, Physics and Mathematics. It is a reinforced concrete, fire-proof, brick and stone building, 170 by 80 feet in dimensions and having a full basement and a sub-basement of 1,600 square feet. The basement and sub-basement have laboratories and storerooms for Chemistry and for Physics. The two main floors have laboratories, classrooms, lecture rooms, storerooms and offices for Chemistry, Physics and Mathematics. Ventilating fans occupy the attic story. (1930)

**MANZANITA HALL**—Manzanita Hall, the first hall of residence for women students, is a brick building electrically lighted and steam heated. It provides accommodations for about eighty-five women. There are single rooms, double rooms, and two-room suites. Some rooms have running water and all have outside exposure. There is a large sleeping porch overlooking the lake. Complete arrangements for comfortable living are provided by the presence of adequate living rooms, study, tub baths, showers, laundry facilities, etc. A covered passageway connects the hall with the Dining Hall. (1896; annex 1909)

**MECHANICAL BUILDING**—The Mechanical Building which is on the east side of the Quadrangle adjoining the Electrical Building is of two story brick construction 80x80 feet. It contains a machine shop, forge shop, foundry and pattern shop. The machine shop is equipped with eight engine lathes, two Universal milling machines, power drill press, thirty-inch Gray planer, two whip crank shapers, benches, grinders, hack saws, and a full complement of small tools sufficient to handle a class of fifteen men at one time. The forge shop is equipped with twelve down-draft forges with

#### AGRICULTURAL EXPERIMENT STATION LIBRARY

The Agricultural Experiment Station Library, containing about twenty-eight hundred bound volumes and a large number of pamphlets is housed in Hatch Station. The volumes and pamphlets may be classified broadly as follows: Bulletins and Reports of the Experiment Stations of the various

**MINES EXPERIMENTING BUILDING**—This building has been erected north of the east wing of the School of Mines Building. It is a two-story and basement brick building, housing the storage rooms, laboratories, library, and offices of the Federal Rare and Precious Metals Mining Experiment Station. (1921)

**MORRILL HALL**—Morrill Hall is a three-story brick building with a large basement. On the first floor are the offices of the President, the Comptroller, and the Registrar. The Department of Classics occupies the second floor. The third floor is used for overflow classes. The office of the Superintendent of Buildings and Grounds and the University Post Office are in the basement. (1886)

**PRESIDENT'S HOUSE**—The President's house is situated on the southeast corner of the Campus. (1900)

**STEWART HALL**—Stewart Hall is a three-story brick building with a basement. The basement is used as an armory and contains also the offices of the Military Department. The Departments of History and Political Science and of Modern Languages occupy the first floor. The second floor is occupied by the Department of English. (1890)

**THE MACKAY FIELD AND TRAINING QUARTERS**—The natural amphitheater on the Campus, which had been leased to the University for a number of years by former Regent Evans, was purchased for the University by Mr. Clarence H. Mackay and provision made for its improvement. In order to make room for other branches of athletics, such as basket-ball and tennis, the Nevada Legislature of 1909 made provision for the purchase of additional land to the south of the old field, so that now about ten acres of land is being used for athletic purposes. The improvements donated by Mr. Mackay include a Training Quarters Building, situated on the east side of the field (1909). This building has showers, baths, locker and dressing rooms, a committee room, and a lounging room. Directly opposite to this on the west bank are the bleachers

Upon the first floor are the chemical laboratory, electric furnace laboratory, first mezzanine mill floor of the mill, assay laboratory, museum, library, classrooms and offices of the Director, metallurgy department, and mining department.

Upon the second floor are the State Analytical Laboratory, added gift from Mr. Mackay, this Stadium was enlarged to a seating capacity of more than five thousand.

Situated between these structures is a full-sized American football field, surrounded by a quarter-mile track which has an arm extended to make provision for the 220-yard events.

**THE EXPERIMENT STATION FARM**—East of the University Campus lies the 60-acre farm given by citizens of Washoe County to be used for agricultural experimentation. (1899)

**THE UNIVERSITY FARM**—Four miles south of Reno the State purchased, in 1917, a 213-acre farm primarily for use as a stock farm. (1917)

#### LIBRARIES

##### GENERAL LIBRARY

The University Library contains 53,367 bound volumes and several thousand pamphlets. The books have been selected with particular reference to the needs of the several departments of study; but, besides the works needed by special departments, there are many general works and reference volumes of various kinds. The books are catalogued according to the Dewey Decimal Classification System.

The reading room is supplied with daily and weekly newspapers and with many of the best periodicals. The list includes subscriptions to about two hundred of the leading cultural, scientific, and technical magazines and journals.

During the University year the Library is open from 7:30 a. m. to 9:30 p. m. every day except Sundays and holidays. During the Summer Session and vacations special hours are announced.

To the general public (not children) is extended the use of the Library under such restrictions of the time for which a book may be withdrawn as are necessary to prevent interference with the work of the students. Borrowers residing outside of Reno are asked to pay the necessary postage or expressage on the books loaned to them.

##### AGRICULTURAL EXPERIMENT STATION LIBRARY

The Agricultural Experiment Station Library, containing about twenty-eight hundred bound volumes and a large number of pamphlets is housed in Hatch Station. The volumes and pamphlets may be classified broadly as follows: Bulletins and Reports of the Experiment Stations of the various States, publications of the United States Department of Agriculture, and general works on agriculture and the related sciences. Many current agricultural periodicals are on the tables in the reading room. The library is catalogued and classified, and suited for ready reference. It is open daily, and, while intended primarily for the use of the Station Staff, it is also accessible to the public.

##### MINING LIBRARY

Reference books, textbooks, recent technical journals, and other works pertaining to geology, mineralogy, mining, and metallurgy are concentrated in one large study room which is conveniently located upon the ground floor of the Mackay School of Mines. The library consists of some 2,000 bound volumes, in addition to which is maintained a complete set of publications of the U. S. Geological Survey and the U. S. Bureau of Mines. The Consolidated California and Virginia Mining Company donated a complete set of records of the company operations during the period of the Big Bonanza. These records include correspondence, mine, bullion, and mill reports, etc., and are invaluable from a historical point of view. Frederic J. Siebert donated his mining library of about three hundred volumes. Many of these books are out of print. Thirty current periodicals are received. This library is open at all times during the sessions.

##### THE MACKAY RESEARCH LIBRARY

The Johannes Walther Library, comprising about 7,000 papers on desert geology, paleontology and ore deposits and being one of the most complete libraries in its field of desert geology in the entire world is housed in the Mackay Research Room of the Mackay School of Mines building. The cost of purchasing this Library in Germany, of bringing it to Nevada, and of furnishing and finishing the research room throughout in oak with built-in bookcases was borne by Mr. Clarence H. Mackay, and is an additional gift of his to the University. The research room is on the

second floor of the building, opposite the entrance portico. This room is well lighted by skylights and windows. Two large oak tables, chairs, world atlas stand, dictionary stand, map filing cabinet (capacity 1,000 maps), wall brackets for big maps on rollers, reference books, United States Geological Survey bulletins and monographs, reports of State geological departments and other literature necessary for geological reference are found in this Library.

#### MINING EXPERIMENT STATION LIBRARY

The library of the U. S. Bureau of Mines Station at the University consists of between 2,000 and 3,000 volumes and pamphlets. The important mining and research periodicals are received, together with the publications of the Bureau of Mines.

#### OTHER DEPARTMENTAL LIBRARIES

These libraries are maintained primarily for the use of students taking work in the respective departments. They cover animal husbandry, biology, chemistry, education, home economics, physics, and veterinary science.

#### CITY AND STATE LIBRARIES

Besides the University libraries, members of the University have the facilities of the Reno Free Library of 26,000 volumes and of the State Library at Carson City which has over 63,000 volumes, 40,000 of which make one of the best Law Libraries in the west.

#### LABORATORIES

##### ARTS AND SCIENCE LABORATORIES

*Biological*—The Biological Department occupies part of the basement, part of the main floor and the north half of the second floor of the Agricultural Building. There are seven laboratories consisting of the following: (1) The main laboratory, used for all the elementary courses, which will accommodate thirty-five students; (2) The advanced zoological laboratory; (3) The elementary and advanced botanical laboratories; (4) The plant physiology and pathology laboratory; and (5) The anatomy laboratory. The first three are located on the second floor, two are on the main floor and two are in the basement. In addition to these laboratories, there are small rooms for storage, an ice room, a dark room, a fireproof incubator room, and a small museum and exhibition room. In the basement there are arrangements for the keeping of running aquaria and supplies of living animals.

In the central part of each laboratory are stationary tables provided with gas, water, and sink connections, lockers and drawers—all adapted for the setting up of apparatus in physiological and other experimental work. Tables grouped in front of the windows are arranged for microscopic work. Each individual table is provided with a microscope, locker, and combination-lock drawers for the keeping of individual supplies and apparatus. Wall cabinets, reagent cases, and lockers are used for storing general equipment and supplies. The department possesses fifty-five compound microscopes, ten of which are provided with oil immersion lenses and all the accessories needed for the most delicate and precise microscopical work. Among the larger pieces of apparatus are an electrical incubator, a Freas electric oven, paraffin water bath, dry air and steam sterilizers, autoclave, centrifuges, and a full projection apparatus for microscopic lantern-slide and opaque demonstrations. Four complete sets of physiological apparatus will accommodate eight students in experimental animal physiology. Smaller apparatus and a greenhouse make possible a limited amount of work in plant physiology.

*Chemical*—The Mackay Chemical Laboratory occupies the north half of the new Mackay Science Hall. The large lecture room, department library, seminar and classrooms, occupying the central part of the building, give ample room for reference and other work connected with the laboratories. Four laboratories accommodating twenty-four students each and fitted with gas, water, electricity, individual desk hoods, etc., occupy the northeast portion of the basement and first floor for the use of general chemistry and qualitative analysis. In connection with these laboratories are two balance rooms and a hydrogen sulphide room. Above these laboratories, on the second floor, are situated the laboratories for quantitative analysis and organic chemistry. Each will accommodate twenty-four students working at the same time. They are fitted with gas, water, steam, vacuum, compressed air, alternating and direct current electricity, fume hoods, ovens, etc. A balance room and Kjeldahl digestion room are located close by.

In addition to these, smaller laboratories are provided for physical, physiological and advanced inorganic and organic chemistry. These are all equipped with gas, water, steam, compressed air, vacuum, electricity, fume hoods, etc., for advanced work and research in these fields. A dark room,

refrigerator room, and large storerooms for supplies are provided. The dispensing room is situated on the first floor and connected with the other two floors by an electrically driven dumb waiter so that students working on any floor may be served conveniently and with little delay.

A furnace room, equipped with both gas and electric furnaces of various types, a grinding room with various grinding machinery and a shop and glass blowing room are located in the basement.

*Geological and Mineralogical*—The Departments of Geology and Mineralogy are provided with reference collections illustrating the minerals, rocks, and fossils, and with class collections for study and determination. Also all folios and some 2,000 topographic maps published by the U. S. Geological Survey are provided for laboratory use. The Mineralogical Laboratory is arranged, for the present, for the accommodation of single sections of forty students. There is, in addition, a laboratory fitted up for microscopic work, and equipped with petrographical microscopes and the necessary accessories. It has also a set of mineral thin sections cut in definite direction, and a collection of rock sections with many representatives of each of the chief types, together with many sections illustrating special types. A separate grinding room is provided with apparatus for making thin sections of rocks and minerals. Blowpipe and other chemical work is also provided for. A lantern with a growing collection of slides furnishes additional illustrative material for lecture work.

*Physical*—The work of the Physical Laboratory is fully adapted to the needs of the students of arts, science, medicine, education, or engineering. The General Laboratory contains, besides a shop, a Freshman and Sophomore laboratory for work in sound, mechanics, heat, light, magnetism, and electricity. The equipment of these laboratories consists of modern apparatus of approved design and substantial construction, suited for accurate physical measurements. The apparatus for the more important experiments has been duplicated, so that at present individual work can be insisted upon in the laboratory. Aside from the main laboratories, there are a weighing room, containing four Becker balances mounted on piers; a dark room provided with standard photometric apparatus; and a battery room equipped with

sixty lead storage batteries and fifteen Edison storage batteries. The department shop contains a motor-driven lathe, with taper attachment, change gears for cutting metric threads, and all other accessories, hand tools for wood and metal work, including metric taps and dies, a small circular and linear dividing engine, and a direct current dynamo with two armatures, furnishing current at various voltages. All of the laboratories are supplied with water, gas, and electricity.

#### ENGINEERING LABORATORIES

*Civil Engineering*—The Civil Engineering equipment includes the following items:

A 200,000-lb. capacity Riehle general testing machine, electrically operated, equipped for testing materials in tension, compression, bending and shear.

A 100,000-lb. capacity Riehle hand operated, hydraulic compression testing machine.

A 1,000-lb. capacity Fairbanks and Morse tension testing machine for cement and various other necessary cement testing equipment.

A good assortment of surveying instruments.

A large accurate suspended pantograph.

A complete set of railroad curves and other important drafting room equipment.

A computing machine of Swiss manufacture.

A Burroughs adding machine.

This equipment is in the Electrical Building, second floor, except the strength of materials testing machines and other apparatus located on the first floor of the Mechanical Building.

Station are available for work on research problems.

#### MINING SCHOOL LABORATORIES

*Assay*—The Fire Assay Laboratory in the Mackay Building is equipped with five gas-fired muffle furnaces and gas-fired melting furnace, six Thompson pulp scales for weighing assay pulps, and suitable hood for parting. Adjoining the Laboratory is a storeroom for supplies and a grinding room for the preparation of samples. The grinding room is equipped with a Braun sample jaw crusher, Braun pulverizer, shaking screen, bucking board, and exhaust fan for removing dust.

A loading set consisting of one 15-kw. three-phase resistor, three 5-kva. reactors, three 2-kva. condensers, for testing the above machine.

Two identical motor generator sets consisting of 15-hp. induction motors directly coupled to 7-kw. direct current compound generators.

A laboratory type 10-kw. rotary converter with accessory apparatus consisting of three 5-kva. special testing transformers and a complete starting and regulating panel.

A motor generator set, consisting of a 25-hp. induction motor and a 3-wire type, 20-kw. direct current generator.

A 7½-kw. alternating current laboratory type generator with four interchangeable rotors and control equipment.

A 128 volt, 200 ampere hour storage battery.

A complete telephone demonstration plant with central office equipment and two subscriber sets.

A series direct current motor and a variable speed alternating current motor arranged with Prony brake equipment.

A one panel mercury arc rectifier set.

A two panel 4000-volt slate switchboard with oil circuit breaker, current and potential instrument transformers.

A seven panel slate switchboard complete with switches, meters, rheostats, automatic voltage regulator and synchronism indicator for the main laboratory machines.

A three panel slate transfer switchboard.

A small separate room in the laboratory is equipped with radio and telephone apparatus for experimental work and study in this branch of electrical engineering.

In addition to the apparatus described, there are available numerous smaller pieces of apparatus covering various types of motor, generator, transformer and controlling equipment, education, or engineering. The General Laboratory contains, besides a shop, a Freshman and Sophomore laboratory for work in sound, mechanics, heat, light, magnetism, and electricity. The equipment of these laboratories consists of modern apparatus of approved design and substantial construction, suited for accurate physical measurements. The apparatus for the more important experiments has been duplicated, so that at present individual work can be insisted upon in the laboratory. Aside from the main laboratories, there are a weighing room, containing four Becker balances mounted on piers; a dark room provided with standard photometric apparatus; and a battery room equipped with

A 12x24 Corliss engine belted to an alternator provided with grid rheostats for loading.

A 10x10 high speed, piston valve, automatic cut-off Buffalo Forge Co., steam engine with Prony brake.

A 5x5 vertical slide valve Ball engine.

A 7-kw. Curtis turbo-generator with control panel.

A 6-hp. DeLaval steam turbine geared to a centrifugal pump.

A Wheeler surface condenser connected so that it may be used with any of the steam units.

For gas-engine testing there are the following:

A 6-hp. vertical gas engine.

A 4-hp. gas engine geared to a displacement pump.

A Buick automobile engine.

One Studebaker automatic engine.

A complete 12 cylinder Liberty airplane engine and other small gas engines.

A 5-hp. motor-driven air compressor.

A Sprague dynamometer 100-hp. unit for testing any high speed internal combustion engine. The last-named unit will be provided with auxiliary equipment to convert it into an automobile chassis dynamometer when desired. Complete apparatus for fan testing and air flow measurements, for solid, liquid and gaseous fuel analysis; for calorimetry, including a Parr adiabatic oxygen bomb calorimeter, and a Sargent gas calorimeter for experimental crude oil distillations and for instrument testing. Standard instruments such as pyrometers, pressure indicating and recording gages, steam calorimeters, Orsat apparatus, engine indicators, etc., are included in the equipment.

The funds and facilities of the Engineering Experiment Station are available for work on research problems.

#### MINING SCHOOL LABORATORIES

*Assay*—The Fire Assay Laboratory in the Mackay Building is equipped with five gas-fired muffle furnaces and gas-fired melting furnace, six Thompson pulp scales for weighing assay pulps, and suitable hood for parting. Adjoining the Laboratory is a storeroom for supplies and a grinding room for the preparation of samples. The grinding room is equipped with a Braun sample jaw crusher, Braun pulverizer, shaking screen, bucking board, and exhaust fan for removing dust.

Connected with the fireroom is the weighing room. Both chemical and button balances for assaying work are placed in this room. The equipment consists of two analytical balances and eleven button balances. Different makes of balances are in use, including the Becker, Ainsworth, Keller, Oertling, and Staudinger.

*Chemical*—The Chemical Laboratory of the School of Mines is fully equipped with the usual desks, hoods, hot plates, and air baths. Electric air baths and drying pans are provided for overnight work. Four four-gallon slime agitators, driven by a small electric motor, are used for slime tests. A direct connected electric driven exhaust fan draws the air from the hood in this laboratory. A complete electrolytic outfit for lead, copper, and other determinations has been installed. The equipment also includes a Richlitz automatic water still, a Monroe hydraulic classifier, and a Spencer binocular microscope.

*Geological and Mineralogical*—The Departments of Geology and Mineralogy are provided with reference collections illustrating the minerals, rocks, and fossils, and with class collections for study and determination. Also all folios and some 2,000 topographic maps published by the U. S. Geological Survey are provided for laboratory use. The Mineralogical Laboratory is arranged, for the present, for the accommodation of single sections of forty students. There is, in addition, a laboratory fitted up for microscopic work, and equipped with petrographical microscopes and the necessary accessories. It has also a set of mineral thin sections cut in definite direction, and a collection of rock sections with many representatives of each of the chief types, together with many sections illustrating special types. A separate grinding room is provided with apparatus for making thin sections of rocks and minerals. Blowpipe and other chemical work is also provided for. Lanterns, with a growing collection of slides furnishes additional illustrative material for lecture work.

*Metallurgical and Ore Dressing*—The Metallurgical and Ore Dressing Laboratory equipment includes the following:

One 4 x 8 Sturtevant jaw crusher, one pair 10 x 12 crushing rolls; 2 ft. x 5 ft. Stearns-Rogers rod mill; 15-ft. Dorr classifier, one two-compartment bucket elevator and one Vezin automatic sampler. All of these machines are so arranged that ore passes mechanically through any desired

series after being fed to the jaw crusher. An exhaust fan prevents dust escaping from the dry crushing machines. The overflow from the Dorr classifier is pumped to two Devereux agitators which in turn are connected to either of two classifiers, a double cone or a Fahrenwald, thence to a Deister Plat-O table or a Deister slime table. Centrifugal pumps circulate the pulps or pump them to waste.

The smaller equipment consists of two Janney flotation machines, one Ruth and one Callow, with accessory equipment for preparing samples, a small General Engineering unit consisting of a small two-compartment jig and small Wilfley table.

A large roller agitator is provided for cyanide testing and also a small mechanical agitator for somewhat larger tests.

Special equipment consists of a two-compartment jig, Sperry filter press, suction filter leaves, vacuum pump, 150-lb. tube mill, Krupp ball mill, and platform scales.

Power is supplied by several motors varying in size up to 25 hp. All the machines are so arranged that they can work independently or in conjunction with one another. The following processes may be conducted on a working scale: The dry crushing and automatic sampling of an ore; the concentration of sands and slimes after crushing an ore either in stamp battery or rolls; the wet crushing, plate amalgamation, and concentration of a gold ore; the cyanide treatment of a gold or a silver ore, and the pan amalgamation of a silver ore. Fine grinding plant in enclosed circuit to prepare ores for cyanidation, concentration, flotation, or any other tests. A very representative collection of various types of ores for testing purposes is maintained.

*Metallographic*—The Metallographic Laboratory is equipped with the following:

One Sauveir & Boylston polishing machine; one Warner & Swasey polishing machine, and a Leitz grinding machine; two large Leitz metallurgical microscopes with photomicrographic cameras; one Heele-Berlin spectroscope; one Spencer metallurgical microscope; one electric hot plate; one set prepared specimens of the common and ferro alloys.

*Electro-Metallurgical*—The electro-metallurgical equipment consists of a Munning direct current generator operated by alternating current motor; one large General Electric automatically controlled heat treating furnace;

one small heat treating muffle furnace and a small arc melting furnace. Additional equipment is also available in the United States Bureau of Mines Building.

*Mining*—The Mining Laboratory consists of the following equipment:

One 8½-inch by 9-inch Laidlaw feather-valve compressor; one 25-hp. motor, direct connected to compressor; one Ingersoll-Sargeant piston drill; one Cochise piston drill; one jackhammer drill; one Waugh stopper; one butterfly stopper; one Obertop drill tester; one Tool-O-Meter; one Clark airmeter; one electric blasting machine; one breathing apparatus; hand and machine drill steels, mine lamps, shovels, hygrometers, anemometers, etc.

*Petrographic*—The Petrographic Laboratory includes the following equipment:

One Sauveir & Boylston polishing machine; apparatus for hand polishing; rock saws; five grinding laps; eight Bausch & Lomb petrographic microscopes; one Iver tint photometer; seven Lietz petrographic microscopes; one Warner & Swasey polishing and grinding machine; one reflecting goniometer; one Abbe refractometer; one microscope for the study of polished sections of opaque ores and minerals; 1,200 slides of rocks and minerals; 1,500 hand specimens of rocks and minerals.

*Seismograph*—The Seismograph Laboratory equipment consists of one Weichert inverted two-component seismograph, and a small Ewing duplex pendulum. These are kept in continuous operation throughout the year. The records are used chiefly for the study of earthquakes of local origin.

#### PUBLIC USE OF SCHOOL OF MINES LABORATORIES

As there are no public testing laboratories in the State of Nevada, the University Board of Regents has authorized the use of the laboratories of the Mackay School of Mines by properly qualified persons under certain restrictions. The conditions under which the laboratories may be used are as follows:

1. The laboratories may be used only during regular laboratory hours, which are from 8:40 to 12:15 a. m. and 1:15 to 3:45 p. m. from Monday to Friday, inclusive, and from 8:40 to 12:15 a. m. Saturday. The laboratories may not be used on Sunday. All work must be planned to conform to this requirement, and no motors must be left running at other times.

2. No person will be permitted to use the laboratories at times when his work will interfere with that of students, faculty, or other experimenters.

3. Any person desiring to use the laboratories must first satisfy the instructor in charge that he is thoroughly capable of undertaking the work he has in view.

4. He must then present to the instructor a written application setting forth the work he proposes to undertake and stating what machines he wishes to use and for what lengths of time. The use of the assay laboratory for routine assaying will not be permitted.

5. If the instructor approves this application, he will sign it and note thereon the fees and deposits which he considers necessary to reimburse the University for supplies used, power consumed, wear on machinery, breakage, etc.

6. The application must be presented to the Comptroller and the fees and deposits noted thereon paid before laboratory work may begin. Any unused portions of deposits may be recovered from the Comptroller upon presentation of a refund order signed by the instructor.

7. The laboratories must be kept in good order during the experiments, and at the conclusion of the experiments must be put in the same condition in which they were found.

#### LABORATORIES OF THE EXPERIMENT STATION OF THE UNITED STATES BUREAU OF MINES

The laboratories of the U. S. Bureau of Mines are equipped to carry on investigations in ore dressing, flotation, hydro- and electro-metallurgy, chemistry, and radioactivity. The usual facilities are provided for assaying and chemical analysis. The equipment for preliminary ore dressing includes a Case crusher, iron rolls, Braun and McCool pulverizers, coffee mill, Abbe silex-lined ball mill, Abbe pebble mills, Patterson iron ball mill, Sturtevant impact screen, Tyler automatic screen shaker with a complete set of screens, Wetherill and Dings magnetic separators, Richards pulsating classifier and jig, Wilfley table and a centrifugal concentrator of special design by the Station. Flotation equipment of various designs includes two Ruth, two mechanical, one Colburn, and one Janney machine. The hydrometallurgical equipment consists of earthenware leaching pots, redwood agitating and settling tanks, acid-proof distributing pumps, filter presses, and vacuum and pressure pumps. The electrical equipment consists of an electrical switchboard of 50-kva.

capacity, and electric vacuum, arc, and resistance furnaces. The laboratories for work in radio-activity are provided with a full electroscopic equipment for the measurement of radium ores and the various radio-active products, and includes alpha ray and emanation electroscopes, designed by the Bureau of Mines. Equipment for high-temperature measurements consists of a Brown pyrometer, platinum-rhodium and base metal thermocouples, and a Leeds and Northrop potentiometer, also a Caron-Clevenger reduction furnace for the treatment of refractory manganiferous silver and gold ores. In the pyrometallurgical department a specially designed furnace has been erected for the continuous reduction of zinc oxides, including the auxiliary mechanical parts, also a six-hearth, 2 foot diameter Herreschoff roasting furnace.

#### AGRICULTURAL LABORATORIES

*Dairy* (Room 12, Agricultural Building)—This laboratory contains machinery for the manufacture of butter, ice cream and cheese, and equipment for bottling milk and sterilizing utensils. It also has full equipment for making quantitative and qualitative tests of all dairy products. The present equipment can easily accommodate ten students in any one section.

*Experiment Station Chemical*—In this laboratory the students who are interested in agricultural work have an opportunity to pursue this work according to the methods adopted by the Association of American Agricultural Chemists.

*Farm Crops*—This laboratory includes a large display of samples of seeds and matured plants of the different varieties of cereal and forage crops. The equipment includes a large electric germinator for testing all kinds of farm seeds for germination; testers and cleaners; dockage machines; and other equipment used by the Federal Government for the commercial grading of grain and hay. Students will make germination and purity tests of commercial samples of farm seeds sent to the laboratory from the various farming districts of the State.

*Soil Physics*—The Soil Physics Laboratory contains tables fitted with gas and water, and holding the chemical reagents used in the work; soil screens; tubes for determining capillarity, water retention and effect of mulches. Various appliances for determining column weight, pore space, specific gravity, etc., are provided. Harvard balances for weighing, not demanding extreme accuracy, and

analytical balances for the more exact work are furnished. In connection with the soil-moisture work, there are provided balances for weighing, soil cans, an electric soil oven, and soil augers and tubes for taking samples. For the work in mechanical analysis, the laboratory is fitted with analytical balances, agitator, soil sieves and shaker, and a centrifuge. A part of the laboratory is used as a storeroom, where soil can be taken, dried, ground, mixed, and stored in suitable bins.

*Veterinary Science*—This laboratory is fitted up for research in pathology and bacteriology. It is used for the work of the Department of Veterinary Science in the Agricultural Experiment Station, and the State Veterinary Control Service.

#### HOME ECONOMICS LABORATORIES

*Cooking*—The Cooking laboratories, pantries and locker rooms are on the second floor of the south half of the Agricultural Building. The Cooking Laboratory is equipped with tables, four set-in white enamel sinks, and gas plates for twelve students, around a hollow square, with all the utensils for individual practice in cooking, and with full equipment for a large quantity of cooking, and catering. There is a wood-and-coal range, and oil and electric stoves, so that the students may learn the use of all common fuels. Adjoining the unit kitchens is a dining room suitably furnished for catering. The large built-in sideboards and side-wall lights make the room very attractive.

*Sewing*—The Sewing Laboratory, well lighted by south and west windows and the modern electric fixtures, is fitted with sewing and drafting tables and individual lockers for twenty students, with ironing boards, irons, and six sewing-machines. Adjoining this room is a large garment-fitting room equipped with full-length triplicate mirrors and space for hanging all garments in the process of making.

*Millinery*—The Millinery Laboratory, on the first floor, is equipped with low work tables and individual lockers for twenty students, with a white enamel sink for dampening and shaping hat foundations, and with a full equipment for steaming, renovating and pressing hat materials.

*Demonstration*—The Demonstration Laboratory and Lecture Room has raised seats for one hundred students, and a 16-foot demonstration table equipped with a white enamel sink, and a gas range. This lecture room is also provided with a lantern for illustration of demonstrations and lectures.

## SCIENTIFIC COLLECTIONS

## MACKAY MUSEUM

The Mackay Museum, located in the northwest wing of the Mackay School of Mines, contains the mining, metallurgical, geological, and mineralogical displays. The exhibits in this museum are arranged in such a manner as to give a good general idea of the mining industry of the State of Nevada, and to illustrate standard classifications of minerals and rocks. On the ground floor at the left of the entrance to the museum is a large map of Nevada, showing the location of all the mining districts of the State, while in the center of the museum at the rear there is a topographical relief map of the State on a scale 4 miles to the inch. The show cases on the left-hand side of the museum present a collection of minerals arranged scientifically according to Dana, followed by a systematic collection of rocks; the cases on the right-hand side of the museum are devoted to displays of Nevada ores of the precious and base metals and of Nevada economic minerals, arranged according to counties, while the cases on the center aisle contain collections of minerals arranged according to their economic uses.

On the Mezzanine floor, east side, are the exhibition cases containing fossil specimens, etc., relating to historical geology, illustrating the development of life from the earliest known to the present.

North Side—A collection of rock drills from the first Burleighs down to present day drills—an excellent working model of ore shaft, hoist, skip, and stamp mill presented by the Tonopah Mine Operators Association.

West Side—Display of Comstock Lode ores, relics, pictures, maps, etc.—display of mine models of various types.

South Side—Prehistoric footprints removed from sandstone in State Prison at Carson City, also pictures and plaster casts of prints not removed from sandstone beds.

Other special exhibits in the Museum include exhibits of metallurgical products of different minerals, various milling and mining processes and a collection of assay products.

Among the several collections included in the museum are the Nevada State Mining Exhibit from the Panama-Pacific

Exposition, the exhibit at the Goldfield session of the American Mining Congress in 1909, the loan collection of the United States Geological Survey of the rocks and minerals of Goldfield; ores and minerals of Nevada, presented by Colonel H. B. Maxson; the collection of rocks and minerals formerly in the State Capitol at Carson City; the Cole collection, purchased from Dr. Cole by Mr. Mackay and presented by him to the museum; the Malcolm McDonald collection, presented to the University after the death of Mr. McDonald; the C. W. West collection; the F. M. Fellows collection, and several other smaller collections received from various sources.

Many valuable gifts were made to the Mackay Museum during the past year, and its continued growth depends largely upon the generosity of those engaged in the development of the mining industry of Nevada. Contributions of specimens of country rocks, ores, minerals, and metallurgical products, and of photographs, maps, diagrams, and models are greatly desired.

The museum is open to the public during the school year, and as far as possible every facility will be placed at the disposal of any one who wishes to inspect or study the various collections.

## BIOLOGICAL MUSEUM AND COLLECTIONS

The Biological Museum is in the Agricultural Building. A portion of the biological collections, including economic insect life-histories and mounts of economic birds and mammals, is arranged here for public exhibition.

The biological collections include a set of some 400 skins and mounts of native birds; 100 sets of birds' eggs and about as many nests, donated by Mr. Steinmetz of Carson City; 250 insect life-histories and several miscellaneous groups; 75 stuffed mammal skins and mounts; 25 mounted skeletons of various vertebrates; nearly a thousand general museum preparations; about 10,000 prepared microscopic slides; some 200 zoological and physiological models, and about 60 botanical models, some 900 lantern slides, as well as much miscellaneous material.

## HERBARIUM

The Nevada Agricultural Experiment Station herbarium now contains 12,000 mounted sheets, nearly all of western species, and at least half of them from Nevada. Certain of

the forage plants, as grasses, clovers, and lupins, are especially well represented. Although as yet small, this collection is of considerable importance, as it contains a number of types and typical plants obtained from type localities.

Connected with this herbarium is a large number of negatives depicting various phases of plant life.

#### PATHOLOGICAL MUSEUM

The Department of Veterinary Science has a collection of several hundred permanently mounted gross pathological specimens covering practically all the common infectious diseases of animals and miscellaneous disease processes of particular interest. The collection also contains some material from human sources, mostly representing disease processes common to both man and the lower animals. This collection is available for teaching purposes and inspection.

#### CHEMICAL SPECIMENS

A number of substances representing the field of the chemical industries have been collected and placed in cases in Mackay Science Hall. Among these are samples purchased from chemical dealers; about 200 samples made and put up by students in the laboratory; about 80 samples of American-made dyes manufactured by the National Aniline and Chemical Company and donated by Professor Maxwell Adams; plastics, including artificial silk and leather; explosives; alloys; lubricating oils; and all the common minerals; samples of inorganic salts prepared by J. T. Baker Chemical Company; of distillation products obtained from crude petroleum prepared by the Standard Oil Company, and of zinc products prepared by the New Jersey Zinc Company.

## PUBLIC LECTURES

### GENERAL ASSEMBLY

A general assembly of University students and members of the faculty is under the special direction of the Standing Committee on Assemblies and Lecturers. Lectures are given by members of the faculty and by men and women of special eminence in particular fields of study, travel, and business enterprise. The 11-o'clock hour Fridays is kept free for assemblies and Student Body meetings.

The following is a list of lectures given in 1930-1931:

#### COMMENCEMENT, 1930

- May 10—Phi Kappa Phi address, "Glimpses of Shakespeare's Portrayal of Conscience," by Dr. Merle N. Smith of Pasadena.  
 May 11—Baccalaureate Sermon, "Pioneers," by Reverend Merle N. Smith, pastor of the First Methodist Episcopal Church of Pasadena.  
 May 12—Commencement Address, "Thoughtful America," by Dr. Edgar E. Robinson of Stanford University.

#### ASSEMBLY ADDRESSES

1930

- September 17—Constitution Day Address by Mr. Charles A. Cantwell of Reno.  
 October —"The History of the American Indian," by Dr. Paul Radin of New York City.  
 December 4—"Mark Twain as a Psychologist," by Sir John Adams of the University of California, Southern Branch.

1931

- February 26—"Eugene O'Neill, Dramatist Extraordinary," by Dr. A. F. Blanks of the University of California.  
 March 12—"The New China," by Miss Maude Russell of the Young Women's Christian Association Foreign Missionary Field.  
 April 9—"A Musical Journey through Spain," by Dr. C. E. Kany of the University of California.

#### THE ROBERT LARDIN FULTON FOUNDATION SERIES

- January 20—"India, Its People and Culture."  
 January 21—"The Philosophy of India."  
 January 22—"The Poetry of India."  
 January 23—"Architecture and Sculpture of India."

Dr. James H. Cousins, the Irish Poet, of Madras, India.

## FACULTY SCIENCE CLUB, 1930-1931

- September 25—"Animal Diseases Transmissible to Man," by Dr. K. W. Nieman of the University.
- October 9—"The Junior High School—Its Purpose," by Mr. Harold N. Brown of the University.
- November 13—"The University Grading System," by Vice President Adams and Director John A. Fulton of the University.
- December 10—"The Present Trend of the Sciences and Their Effect on Agriculture," by Mr. Cruz Venstrom of the Agricultural Experiment Station.
- February 12—"Can High Schools Be Rated by Scholarship Records of Their Graduates as Freshmen in the University?" by Professor F. W. Traner of the University.
- February 26—"The Necessity of the Boulder Dam for Flood Control of the Colorado River," by Mr. Alfred M. Smith of Reno.  
"The Geology of the Boulder Dam Area," by Dr. J. Claude Jones of the University.
- March 12—"The Civil Engineering Problems of the Hoover Dam," by Professor H. P. Boardman of the University.  
"The Electrical Problems of the Hoover Dam," by Professor S. G. Palmer of the University.
- March 26—"Nevada's Use of Water from the Hoover Dam," by Director Cecil W. Creel of the University Extension Department.  
"Nevada's Use of Power from the Hoover Dam," by Director John A. Fulton of the University.

## ORGANIZATIONS AND PUBLICATIONS

## THE ALUMNI ASSOCIATION

The Alumni Association was organized in June, 1894. Its object is to promote union and good fellowship among the Alumni, and to advance and protect the interests of the University of Nevada. The dues of the association are \$1 a year for ten years, or a life membership for \$10. The annual meeting is held during Commencement week.

## OFFICERS FOR 1930-1931

President.....	JOSEPH F. McDONALD,'15
Vice President.....	EARL T. ROSS,'14
Secretary.....	LOUISE BLUM LEWERS,'95

## EXECUTIVE COMMITTEE

LESLIE E. JOHNSON,'16	MELVIN E. JEPSON,'11
JAY A. CARPENTER,'07	F. N. DONDERO,'16
CHRIS SHEERIN,'24	PROCTOR HUG,'27

## THE ASSOCIATED STUDENTS

The student body is organized into an association called "The Associated Students of the University of Nevada." Through this association the students handle all matters relating to the student body as a whole, and control all athletic interests of the University subject to the approval of the Faculty Committee on Athletics. The officers of this association are elected by popular vote. By the payment of the student fee each semester a student receives the A. S. U. N. card which entitles him to a vote in the association and admission to all local games, contests, or other events under the Association's management, and subscriptions to the U. of N. Sagebrush, the Desert Wolf, and the Artemisia.

## THE UNIVERSITY HOSPITAL ASSOCIATION

In January, 1919, at the request of the student body, the Board of Regents approved the organization of a Student Hospital Association under the joint management of a student and faculty committee. From the experience gained in the four years of its successful operation and from a comparative study of the hospital organizations in other universities, the original plan was modified and expanded into

the University Hospital Association. This plan went into effect in September, 1923.

The Association is supported entirely by the fees received from its membership. These are used to pay the salaries of the College Physician and of the Hospital Matron, to purchase necessary furnishings, equipment, hospital supplies and to pay for laboratory examinations, X-rays, prescriptions and medicines, and for the repair and upkeep of the building. Any surplus above that required to provide for emergencies will be used to extend the services of the Association to its members.

The direct management of the Association is the responsibility of the University Committee on Health. The College Physician will hold regular daily consultation periods at the University hospital while the University is in session. The Matron, who is also an experienced nurse, is in charge of the hospital, keeps the records, and has the authority to make such regulations regarding visiting hours and the conduct of the hospital as may seem best in the interests of health and efficiency.

#### MEDICAL AND HOSPITAL FEES

1. *Health Service Fee.* A fee of \$1 per semester will be charged all students at the time of registration. This fee is to cover the cost of the medical examination required of all students taking physical education or engaging in athletics. It entitles the student to such follow up medical advice as may be desirable and to emergency medical attention while on the campus. It does not entitle him to continued free consultations or to hospitalization.

2. *Hospital Association Membership Fee.* This is an additional fee of \$3 per semester which is required of all students who do not live with their parents or guardians in Reno or Sparks, unless they present at the time of registration a written request from their parents or guardians that they shall not pay such fee. While primarily intended to safeguard the health of students away from home, the Association will receive into its membership any student living in Reno or Sparks who wishes to take advantage of its privileges by paying the membership fee. The fee must, however, be paid at the time of registration. It entitles the member to unlimited free consultations with the College Physician or hospital nurse at the regular scheduled hour but does not give him the right to call upon them at any time he chooses,

except in cases justified as emergencies. The chief object of these consultations is the detection of illness before it becomes serious. For the cost of a single medical call the member may receive a whole semester of medical advice. The privilege should not be abused by expecting unreasonable service at unreasonable times. Persons, not members, going to the hospital for advice or treatment will be charged a reasonable fee.

3. *Hospital Bed Rates.* When it is necessary for a member to be hospitalized he will be charged a rate of \$2 per day, which pays for meals, laundry, physician's visits, general nursing and other routine hospital expenses, but does not include night nursing or the other special services that may be required in serious illness.

#### UNIVERSITY HOSPITAL ASSOCIATION RULES

1. The University hospital is for the use only of those students who have paid the membership semester fee of \$3 and whose names are on the membership list.

2. Members are entitled to free consultations with the College Physician and nurse, at the hospital only during the regular consultation periods.

3. Members who prefer to see the College Physician at his downtown office may have the privilege of doing so by paying the special rate for Association members of \$1 per visit.

4. Any calls for medical or nursing service outside the hospital or at other than the regular consultation periods, or from other persons than those on the regular hospital staff, will have to be paid for by the individual making the request.

5. Students entering the University with some chronic ailment should not expect indefinitely to receive free treatment for it, nor does the Association guarantee free treatment for injuries or ailments contracted off the campus.

6. Members will be given free X-ray and other laboratory tests, free medicines and prescriptions *only* when such have been authorized by the College Physician.

7. When an operation is advised the patient must make his own arrangements for its performance and for the payment of medical, nursing and special hospital fees.

8. The University hospital has a small operating room, suitable for certain types of operation, for the use of which a special charge of \$5 is made.

9. The Association assumes no responsibility for the payment of beds in other hospitals or for sickness expenses incurred without special authorization of the College Physician and of the University Health Committee.

10. Contagious cases cannot ordinarily be cared for in the University hospital. Such patients must go to the city or county isolation hospital or be cared for in private homes.

#### THE ASSOCIATED WOMEN STUDENTS

The Associated Women Students is an organization made up of all the women students registered at the institution. Its purpose is to bring all the women together in order to obtain more effective action. The dues are 25 cents per semester, which is deducted from the amount paid into the A. S. U. N. treasury. The organization gives a \$25 scholarship each year to the woman student attaining the highest average grade for the year and who receives no other scholarship.

#### THE FACULTY SCIENCE CLUB

The Faculty Science Club is an organization of those members of the Faculty who are interested in scientific research. The purpose of the organization is to broaden the outlook and to come in touch with scientific progress outside of one's own sphere of activity. Biweekly meetings are held in the lecture room of the Agricultural Building. Reports are presented and discussed at each meeting. The subjects of the reports are either the result of individual research or articles of general interest that have recently appeared in scientific journals. The meetings are open to visitors.

Advanced students find the meetings of considerable value.

#### HONOR SOCIETIES

*The Phi Kappa Phi* is a national honor society composed of graduate and undergraduate members of all departments in American universities and colleges. Its prime object is to emphasize scholarship in the thought of college students, to hold fast to the original purpose for which institutions of learning were founded, and to stimulate mental achievement by the prize of membership. This society elects to membership a certain number from the graduating class, on the basis of high scholarship. Local chapter established in 1912.

*Sigma Gamma Epsilon*—A national organization of geologists, mining engineers, metallurgists, and ceramists. Upper-class students in these subjects are eligible to membership

in the local chapter. Biweekly meetings are held for the discussion of problems related to these professions.

*Nu Eta Epsilon*—A local honor society established at the University of Nevada in May, 1923, for the purpose of encouraging higher standards of scholarship among engineering students. The qualifications for membership are the same as for the National Honor Society of Tau Beta Pi. Elections are held twice a year, and selections of eligibles are based entirely upon scholarship.

*Sigma Sigma*—An honor organization whose membership is elected from the students majoring in Home Economics on the basis of scholarship, qualities of leadership and the application of principles taught in Home Economics.

*Kappa Kappa Psi*—This is an honorary musical fraternity for University men which promotes and encourages better band music, better musicianship, and good scholarship among college band men. Any man accepted as a permanent member of the band is eligible for election to the organization. (Established at Nevada in April, 1929.)

#### CLUBS AND ASSOCIATIONS

*Engineering Societies*—All engineering students and the engineering faculty are members of the Associated Engineers. This society meets from time to time during the college year for the consideration of social and scientific matters.

In addition to this general society there is a student branch of each of the four great national societies of Engineering. These groups hold monthly meetings for the discussion of scientific matters relating to their own branch of the profession.

*The Chemistry Club*—This organization includes all students, faculty and others on the campus interested in Chemistry. Its purpose is to keep its members in touch with present developments in the chemical field and to foster interest in the science of Chemistry. Meetings are held each Thursday evening in conjunction with Chemistry 95-96. Once each month a program of special interest to underclassmen is arranged.

*Sigma Sigma Kappa*—An honor organization whose membership is elected from the Chemistry Club on the basis of scholarship and ability shown in the field of Chemistry.

*The Crucible Club*—This is an organization of the upper-class mining, metallurgical, and geological students and faculty. The club meets every other Wednesday, and is addressed by prominent members of the mining profession, or papers are read by the various members. The Crucible Club is affiliated with the Society of the American Institute of Mining and Metallurgical Engineers.

*The Aggie Club*—Founded by the agricultural students in 1909. This organization has since been very active, now sponsoring the Aggie Show each year and having many other activities. Men students and faculty members of the College are members. The Club meets the last Wednesday of each month to carry on business and social activities.

*The Debating Society*—Membership in Clionia, the debating society of the University of Nevada, is open to all the students of the University. Its purpose is to encourage and support debating, both local and intercollegiate.

*Delta Alpha Epsilon*—The purpose of this society is not only to develop histrionic talent among the young women of the University, but to awaken an appreciative interest in dramatic interpretation by the presentation of standard plays.

*The Campus Players*—The aim of this society is to offer the men and women of the University a chance to develop their talents both in the appreciation of good plays and by furnishing the opportunity for presentation.

*Mu Alpha Nu*—This club was formerly known as the "Math" Club, and its aim is the furtherance of interest in the science of mathematics.

*Coffin and Keys*—A club organized for the purpose of securing and rendering efficient the complete cooperation of all students by combining in organized form the men of the University who are considered leaders in student life and activity.

*Home Economics Society*—The faculty of the Department of Home Economics and all students electing one or more courses in that department may be members of this association.

*Fraternities and Sororities*—The following fraternities and sororities have chapters, the figures in parentheses giving

the dates chapters were established in this University: National fraternities—Sigma Nu (1914), Sigma Alpha Epsilon (1917), Phi Sigma Kappa (1917), Alpha Tau Omega (1921), Sigma Phi Sigma (1922), Delta Sigma Lambda (1922), Beta Kappa (1925); Lambda Chi Alpha (1929). National sororities—Delta Delta Delta (1913), Pi Beta Phi (1915), Gamma Phi Beta (1921), Kappa Alpha Theta (1922), Beta Sigma Omicron (1931); local—Beta Delta (1923).

*Lincoln Hall Association*—The Lincoln Hall Association is an organization composed of the students of the University of Nevada who reside in Lincoln Hall. Its object is to deal with all matters of student concern in Lincoln Hall and to preserve its customs and traditions.

*Manzanita Hall Association*—Residents of this hall are organized into a body under the name of Manzanita Hall Association, with president, vice-president, secretary and treasurer elected for one year. The chairmen of standing committees, which include the phases of dormitory life (Red Cross work, laundry, room inspection, bell duty, quiet, and fire drill), are appointed by the president of the association. Meetings of the association are held monthly.

*Christian Associations*—The Young Women's Christian Association has a branch organization among the students with a membership of over one hundred girls in the University. The purpose of the association is the maintenance of high standards in all student relations, mutual helpfulness and pleasure, and the promotion of Christian ideals.

The Young Men's Christian Fellowship Association of the University of Nevada has for its purpose the encouragement and cultivation of religious interests among men on the Campus. Among other activities, it favors the formation of discussion groups which deal with problems of vital ethical and religious interest.

*Square and Compass*—This is a chapter of a National Fraternity of campus members of the Blue Lodge Masons.

*Musical Organizations*—Volunteer organizations for the promotion of both vocal and instrumental music are heartily encouraged. The organizations at present are the Men's and Women's Glee Clubs, the University Orchestra and the University Band.

*The Press Club*—This is an organization of those interested in writing, in the student publications of the University, and in the profession of journalism. They gather each fortnight to discuss common interests and to mingle socially.

*Mu Beta Sigma*—This is a club of students specializing in psychology and interested in research and experimentation in this subject.

*Cap and Scroll*—A club organized for the purpose of developing the highest ideals on Nevada's Campus by combining in organized form the women of the University who are leaders in student life and activity.

*The Caucus Debating Society*—This society is organized for the purpose of furthering speech on the Campus, through local contests in debating, declamation, and oratory. All students are eligible who have speaking ability.

*The Commercial Service Club*—This is an organization of students interested in a better understanding of the world of business and commerce.

*Omega Mu Iota*—A club organized in 1923 by premedical students to promote scholarship and common interests. Its membership is open to second semester freshmen who have made an acceptable scholarship record in the work of the first semester and are preparing themselves for the study of medicine, dentistry or nursing.

*Scabbard and Blade*—A national honorary military society, with active membership consisting of Cadet Officers in the Departments of Military Science and Tactics of various Universities and Colleges conferring baccalaureate degrees, organized to unite in closer relationship the military departments of American Universities and Colleges; to promote good fellowship among Cadet Officers; to preserve and develop the essential qualities of good and efficient officers; to prepare these Cadet Officers as educated men to take a more active and influential part in the military affairs of the communities in which they may reside and to disseminate intelligent information concerning the military requirements of our National Defense.

#### UNIVERSITY PUBLICATIONS

*The Bulletin*—The Bulletin is the official publication of the University and is issued quarterly or oftener. It gives

information concerning the University and such other matters as may be helpful to the cause of education in the State.

#### STUDENT PUBLICATIONS

*The U. of N. Sagebrush*—The U. of N. Sagebrush is issued weekly throughout the University year by the students of the University.

*The Desert Wolf*—The Desert Wolf is a quarterly published by the Associated Students of the University of Nevada. It was started in the fall of 1923.

*The Artemisia*—The Artemisia is an annual published by the Associated Students of the University of Nevada.

## PHYSICAL EDUCATION AND ATHLETICS

## MEN

The purpose of this department is to assist the men of the University to live to the best advantage, and so to aid them in the formation of hygienic habits that during their stay at the University they may make profitable physical preparation for life. There is urgent necessity that each student should have an intelligent appreciation of the means requisite for the preservation of his health, in order that he may be able to formulate wisely his own policy of health control.

## REQUIRED PHYSICAL EDUCATION

Physical Education is required of all Freshmen and Sophomores unless excused for disability by the University Physician. Credit counting toward the college degree is given. The individual's grade is largely based on attendance, punctuality, earnestness and application, but practical tests are also given.

## PHYSICAL EXAMINATIONS

Each student on entrance to this department is given a physical examination in order that his work may be directed to meet his individual requirements. Members of squads out for varsity teams, reporting regularly, are excused from the practical work during the regular season of that sport, and are entitled to full credit in that portion of their work.

## UNIFORM AND FEE

Each student must provide himself with a regulation uniform. These should not be procured until after arrival at the University.

*Tentative Cost of Uniform:*

White sleeveless gym shirt.....	\$0.75
White running pants, short leg.....	\$1.25 up
White rubber-soled shoes.....	\$2.00 up
Athletic supporter.....	\$0.75 up

A locker-and-laundry fee of \$1 is charged each semester.

## ATHLETICS

Excellent facilities are provided on the Mackay Athletic Field for all branches of athletics. American football, baseball, track, basket ball, and tennis are the sports of special

prominence at present. The main policy of the University is to foster the spirit of honor and manliness, to prevent the development of commercialism or professionalism in athletics, and to see to it that athletic sports do not encroach upon the claims of scholarship. Athletic activities in the University are supervised by the Directors of the Departments of Physical Training for Men and for Women, who are counseled by the Athletic Committee of the Faculty.

To represent the University of Nevada in a public contest, a student must conform to the following rules:

1. He must be an amateur.
2. He must have presented 15 Carnegie units for entrance.
3. He must be registered in at least 12 hours of University work.
4. He must have passed two-thirds the normal requirements of his course the preceding semester.
5. He must be successfully carrying two-thirds the normal requirements of his course one week preceding the first conference game. If declared scholastically eligible at this time, he shall be scholastically eligible for the remainder of the season.
6. No student on probation will be permitted to represent the University in any public contest.
7. All students must pass a physical examination satisfactory to the Committee on Athletics.
8. Schedules for all games must be submitted to the Committee on Athletics and approved by them.
9. Approval by the Committee on Athletics is required in the case of every individual intending to represent the University of Nevada in any single contest.

## WOMEN

The University gives its young women the opportunity for an all-around physical development by maintaining a Department of Physical Education. Physical training, properly applied, makes an important contribution to sense and motor training and to the development of physical judgment, presence of mind, self-reliance, courage, and strength of will. These ends are sought through systematic exercise, both out of doors and in the gymnasium, as well as through the various forms of athletics suited to women.

The women students of the University have organized an Athletic Section in conjunction with the Associated Women

Students for the purpose of fostering mass and interclass athletics. Every woman is eligible to membership by participating in any sport and through this organization may win recognition in many branches of athletic activity, *i. e.*, hockey, volley ball, basket ball, baseball, track, and tennis.

Work in Physical Education is required of all Freshman and Sophomore women. Upon entering a class, students are carefully examined and measured by the Physical Director to discover the individual needs of each. As far as possible the work of this department will be adapted to these needs. If necessary, upon the advice of a physician, Freshman and Sophomore work may be *postponed*.

During each semester of this required work instruction is given in personal and public hygiene.

Women taking these courses are required to provide themselves with a regulation gymnasium suit and shoes. Suits with guimpes cost from \$12 to \$15. Students must provide themselves with suits, but are advised not to make such purchase until they have counseled with the Physical Director for Women. A \$1 locker-and-laundry fee is charged each semester.

## MILITARY SCIENCE AND TACTICS

---

1. There is maintained at the University an Infantry Unit of the Reserve Officers' Training Corps.

This corps was established by the Act of Congress of June 3, 1916, for the purpose of preparing, by systematic and standard methods of training, students at civil educational institutions for reserve officers in the United States Army.

2. The corps consists of all physically fit male students in first and second years at the University and such additional students as may elect to continue with the advanced work in their third and fourth years.

3. When registering in Military for the first time at the University, students are required to take an examination to determine their *physical* fitness for enrollment in the Reserve Officers' Training Corps.

4. The United States Government furnishes service uniforms and all equipment necessary to carry on the instruction. In addition, those who elect to continue the work in their Junior and Senior years are paid commutation of rations and are required to attend a training camp at the end of the Junior year.

NOTE—At the present time, the amount paid to students enrolled in the advanced course approximates \$200 for the two years.

5. The arms, equipment, and uniforms issued to students for military training are the property of the United States for which the University is financially responsible. To protect the University against any charge for loss or damage to government property arising from misuse or neglect on the part of the student, a deposit of \$10 will be required from each student registered in Military.

6. Every male student who is a candidate for graduation in any of the schools of the college will be required to complete the prescribed two-year (Basic) course of Military Training unless excused therefrom by proper authority.

The following students may be excused from all or a part of the prescribed training:

- (a) Those over 27 years of age.

(b) Those who have had previous military training equivalent to all, or part, of the prescribed course.

(c) Aliens, and those physically unfit for military service. Students excused from Military Training receive no credit toward advanced standing in Military except in the case of those who have received training as members of an R. O. T. C. unit, or at an educational institution under the supervision of an officer of the Army regularly detailed as Professor of Military Science and Tactics.

Excused students not receiving advanced credit are required to take additional work aggregating the number of units allowed for that part of the military course from which they are excused.

7. Students who satisfactorily complete the basic and advanced military courses will be tendered commissions by the United States Government as Second Lieutenants of Infantry in the Reserve Corps of the Army.

8. Special Regulations for the Department of Military Science and Tactics are published in pamphlet form, a copy of which will be issued to each student registered in Military. The cadets will be held to a strict observance of all special regulations of the Military Department and to such orders and instruction as may be issued from time to time in connection with their military training.

9. All cadets are required to perform the prescribed military duties unless excused in advance by the President or the Commandant. In case of absence without previous excuse, a written explanation will be submitted upon resuming duty. In case of sickness or injury, such explanation must be authenticated by the signature of a parent or of a physician.

10. Cadets will be held strictly accountable for the care and proper use of the public property in their possession. They will use only such arms and equipments as are officially assigned (by number to each cadet) and must return them to their proper places in the armory immediately after drill.

11. Upon registration, each cadet will immediately take steps to familiarize himself with the Regulations for the Department of Military Science and Tactics.

## HONORS, COMPETITIONS, PRIZES, AND FOUNDATIONS

### UNIVERSITY SCHOLARSHIP HONORS

The University gives recognition to such students as attain a high grade of scholarship by announcing at Commencement time the students who have received honorable mention in each of the several colleges, or in their full four-year course. Honorable mention is won by attaining a standing of 90 per cent or better on the average in the full work of any one year or of the four years. At the end of each semester the Faculty Scholarship Committee issues a scholarship Honor List, which includes the upper five per cent of the entire Student Body.

#### GOLD MEDAL

A gold medal is awarded annually to that member of the graduating class who has attained the highest average grade of scholarship throughout his college course.

Beginning with Commencement of 1923, the firm of R. Herz & Brother, jewelers, of Reno, Nevada, generously makes an annual gift of this gold medal.

#### PHILO SHERMAN BENNETT PRIZE

(Established, 1909)

The Philo Sherman Bennett prize is the interest on a fund of four hundred dollars, given to the University by the Hon. Philo Sherman Bennett of New Haven, Connecticut. The prize is awarded for the best essay on "The Principles of Free Government." The income from this fund is allowed to accumulate until a prize of approximately fifty dollars can be given.

#### SENIOR PUBLIC-SERVICE PRIZE

(Established, 1924)

This prize, founded by Dr. Henry Albert, formerly Director of the State Hygienic Laboratory, carries an annual value of twenty-five dollars and is being perpetuated in his memory by Mrs. Albert.

This prize is to be awarded annually at Commencement to that member of the graduating class whose collegiate record shows the most satisfactory combination of good scholarship, good character, and worthy service in behalf of the University or the community, or both.

The winner of this prize shall be chosen by the Chairmen of the Faculty Committees on Scholarship and on Athletics, the Dean of Women, the Master of Lincoln Hall, and the President of the University.

THE ROBERT LARDIN FULTON LECTURE FOUNDATION  
(Established, 1924)

In memory of Robert Lardin Fulton, constructive citizen of Nevada for over half a century, Mrs. Mary Bragg Fulton has established a lecture foundation at the University. The income from this foundation is to be used to bring annually to the University some leader in the field of science, art, literature or public affairs, who will give a series of lectures upon his special themes. The foundation was initiated in April, 1925. The Committee chosen by the founder to select the lecturer under this foundation consists of the President of the University, the Deans of the Colleges of Arts and Science, of Agriculture, and of Engineering, and of the School of Education, and the Director of the Mackay School of Mines.

THE THEODORA STUBBS FULTON MEMORIAL FOUNDATION

In the spring of 1925 a friend of Mrs. Theodora Stubbs Fulton began an annual anonymous gift of \$50 per year in her honor, the gift to be invested in books in Biology and in Physical Education for Women.

RENO WOMAN'S CHRISTIAN TEMPERANCE UNION PRIZE

Beginning in the spring of 1927 the Reno Chapter of the Woman's Christian Temperance Union has annually offered a \$25 prize for the best essay, written by a student of the University, entered in competition and dealing with the subject set each year by the National Woman's Christian Temperance Union Committee on Essay Contests. The English Department of the University has charge of this contest and selects the winner whose name is announced at Commencement.

THE CLOVIS ALBERTA PRESTON MEMORIAL FOUNDATION  
(Established, 1929)

The above Foundation of \$50 to \$150 for books in the Departments of French (50%) and History (50%) was established in the spring of 1929 by Mrs. Blanche Preston in memory of her daughter, Clovis Alberta Preston.

## SCHOLARSHIPS AND FELLOWSHIPS

For 1931-1932 the following scholarships are available:

## 1. REGENTS' SCHOLARSHIPS

A. (Established, 1911)

Five Regents' Scholarships of \$50 each, to be awarded annually to regular students on the basis of scholarship, one to a Freshman, two to Sophomores, and two to Juniors. These scholarships will be announced at Commencement, and shall be paid to the winners the first of October following, provided these winners have enrolled for the subsequent year's work in this University, otherwise they shall be paid to alternates satisfying the conditions.

B. (Established, 1922-1923)

By formal action the Regents have exempted the following Federal groups from the payment of the nonresident tuition charge:

- (a) Officers and enlisted men in active service of the United States Army and Navy and their children.
- (b) Sons and daughters of officers, warrant officers and enlisted men in active service in the Coast Guard.

C. (Established, 1926)

At the request of the General Federation of Women's Clubs a total of not more than ten students in any one University year will be admissible without the payment of the nonresident tuition fee from Mexico, Central America and South America; provided, that not to exceed three such students from any nation in this area claim this exemption. It is understood that such students will be required to pay all other regular University charges.

## 2. THE ELLA S. STUBBS MEMORIAL SCHOLARSHIP

(Established, 1919)

The Women's Faculty Club offers the Ella S. Stubbs Memorial Scholarship of \$100 to a student entering the Junior or Senior class who is working his way, wholly or in part, through the University and who has received no other scholarship.

## 3. THE ALICE G. CLARK SCHOLARSHIP

(Established, 1917)

A yearly scholarship of \$250, established and maintained

by Mrs. W. A. Clark, Jr., in honor of her mother, Katherine Hays McManus, is being continued by Mr. W. A. Clark, Jr., in memory of Mrs. Clark, and is known as the Alice G. Clark Scholarship. It is to be awarded alternately to a man and then to a woman student who is closing the Junior year and is the worthiest Junior of individual ability and need. The Scholarships Committee shall choose an alternate for the scholarship, judging on the same conditions. The scholarship award shall be payable one-half on September 15 and one-half on January 15 following the Commencement announcement and shall be paid only if the winner is then duly enrolled for the Senior year's work in this University, otherwise it shall be paid to the chosen alternate, provided that alternate is duly enrolled for the Senior year's work in this University.

## 4. ASSOCIATED WOMEN STUDENTS' SCHOLARSHIP

(Established, 1918)

A yearly scholarship of \$25 is given by the Associated Women Students of the University of Nevada to the woman student attaining the highest average grade for the year and who receives no other scholarship.

## 5. THE LEWIS D. FOLSOM SCHOLARSHIP

(Established, 1920)

An annual scholarship of \$100, given by Mrs. Mary E. Folsom of Reno, in memory of her husband, Lewis D. Folsom.

This scholarship is to be awarded alternately to a man and then to a woman student of the Junior Class, who is deemed by the Scholarship Committee to be the worthiest member of that class of individual ability and need and who is not receiving another scholarship. The Scholarship Committee shall choose an alternate for this scholarship, judging on the same conditions. This scholarship award is payable on September 15 following the Commencement announcement and shall then be paid to the winner only if enrolled for regular Senior work at the University. Otherwise, it shall be paid to the chosen alternate, provided that the alternate is duly enrolled for Senior work in this University.

## 6. THE ROSE SIGLER MATHEWS SCHOLARSHIP FUND

(Established, 1920)

This scholarship fund was established by Mr. Isaac R. Mathews of Reno, Nevada, in memory of his wife, Rose

Sigler Mathews. The trust fund, given by Mr. Mathews for scholarship purposes, amounts to \$6,700, and yields an annual income above \$300. In 1931 Mr. Mathews presented to the University securities with face value of \$3,300 with understanding the income from these shall go to him during his life and afterwards be added to the annual value of his scholarship. By arrangement with the donor during the earlier years of this scholarship, the Board of Regents will grant scholarships from the income of this trust fund upon the recommendation of Mr. Mathews, and such scholarships may be, on Mr. Mathews's further recommendation, continued to his nominees, provided they make good scholarship records.

7. RENO BRANCH OF THE NATIONAL ASSOCIATION OF UNIVERSITY WOMEN SCHOLARSHIP

(Established, 1921)

The Reno branch of the National Association of University Women offers the Theodora Stubbs Fulton Memorial scholarship having annual value of \$200. This was discontinued for the year 1930-1931 but was renewed for the year 1931-1932 at an annual value of \$100. This scholarship is to be awarded to an upper-class woman student of the University of Nevada, who has taken all her work at the University of Nevada, provided that—

1. She shall have maintained a high average during the first two or three years of her college course in the University of Nevada, and shall have been active in college activities.
2. She shall not have received another scholarship for the period covered by this scholarship.

This scholarship shall be awarded on the recommendation of the University Committee on Scholarships with the approval of the Executive Committee of the National Association of University Women.

These same committees shall choose an alternate satisfying similar conditions.

The winner of this scholarship shall be announced at Commencement.

The scholarship shall be paid to the winner in two equal installments; one at the beginning of each semester in the following University year; provided, she be duly enrolled in the University of Nevada; otherwise it shall be paid to the chosen alternate provided she be enrolled.

8. THE MARYE WILLIAMS BUTLER SCHOLARSHIP FUND

(Established, 1921)

In the University year 1921-1922, Mrs. Sophie E. Williams of Nye County, Nevada, established a scholarship fund of \$1,000, to be known as the Marye Williams Butler Scholarship Fund, in memory of her daughter, Marye Williams, graduate of the Normal School of the University of Nevada, Class of 1899.

The income from this fund is to be awarded annually by the University Scholarship Committee, beginning with the Commencement of 1923, to the most worthy student who has completed University mathematics through calculus with an average grade of at least 2 in all these University mathematics courses, who has earned due credits in this minimum of mathematics, not later than the closing semester of the Junior year, and who receives no other scholarship.

This scholarship will be payable on or before October 1 following the Commencement of its award, provided the student winner is then enrolled for the new year's work in the University of Nevada, otherwise the scholarship will be payable to an alternate chosen under similar conditions by the University Scholarship Committee and duly enrolled for the new year's work in the University of Nevada.

9. THE ADOLPHUS LEIGH FITZGERALD SCHOLARSHIPS

(Established, 1921)

These two scholarships, each of an annual value of \$150, were established in the fall of 1921 by the Scottish Rite bodies of Masonry in Nevada, in memory of Adolphus Leigh Fitzgerald.

These scholarships are to be awarded at each Commencement, beginning with that of the year 1922, one to a man student, the other to a woman student, under the following conditions:

1. The student must be the worthiest man or woman completing a Freshman year's work in the University of Nevada who receives no other scholarship.
2. The student must be of a Nevada family or must be a graduate of a Nevada high school.
3. The scholarship sum will be paid to the winner on the 15th day of September following the Commencement award, provided that the winner is then enrolled for the regular work of the Sophomore year in his chosen course at the University of Nevada. Otherwise, this scholarship sum shall be paid to an alternate chosen under the same conditions and duly enrolled for the work of the Sophomore year in the University of Nevada.

10. THE AZRO E. CHENEY SCHOLARSHIP FUND  
(Established, 1922)

The Honorable Azro E. Cheney bequeathed to the University of Nevada \$5,000 in trust, to be controlled and invested by the Board of Regents. The income from this trust fund is to be awarded, by the University Scholarship Committee, at each annual Commencement of the University to that member of the Freshman or Sophomore class who is a bona fide resident of Nevada and whom the Head of the Department of English shall certify is justly entitled thereto as the best student in English, during that year, character and improvement both being considered. This scholarship sum shall be payable one-half on the 15th day of September and one-half on the 15th day of January following the award, provided the winner is then enrolled for a further year's work in the University of Nevada, otherwise to an alternate satisfying the conditions.

11. THE GENERAL O. M. MITCHELL WOMAN'S RELIEF  
CORPS SCHOLARSHIP  
(Established, 1922)

This yearly scholarship of \$50 was established by the General O. M. Mitchell Woman's Relief Corps No. 27. It is to be awarded to that student of the Sophomore class enrolled in the Reserve Officers Training Corps who has completed the basic course and who, in the opinion of the officers of the Army on duty at the University, best exemplifies the soldierly qualities of attention to duty, punctuality, neatness, and military bearing. This scholarship award is payable on October 1 following the Commencement announcement and shall be paid to the winner or a chosen alternate only if then enrolled in the Advance Course. Should neither the winner nor alternate qualify by enrolling in the Advanced Course, the award shall accumulate not to exceed \$100 and shall then be payable to the first winner or alternate who qualifies in a succeeding year.

12. THE ROBERT LEWERS SCHOLARSHIPS  
(Established, 1923)

These two scholarships, each of an annual value of \$150, were established in the spring of 1923 by the Scottish Rite bodies of Masonry in Nevada, as a memorial to Robert Lewers.

Since the year 1924 these scholarships have been awarded,

one to a man student, the other to a woman student, under the following conditions:

1. The student must be the worthiest man or woman having completed the first semester of a Freshman year's work in the University of Nevada, who receives no other scholarship.
2. The student must be of a Nevada family or must be a graduate of a Nevada High School.
3. The scholarship sum will be paid to the winner on the 10th day of January each year, provided that the winner is then enrolled for the work of the second semester of this Freshman year at the University of Nevada. Otherwise, this scholarship sum shall be paid to an alternate chosen under the same conditions and duly enrolled for the work of the second semester of the Freshman year at the University of Nevada.

13. WOMEN'S ATHLETIC ASSOCIATION SCHOLARSHIP  
(Established, 1923)

This scholarship, of \$75 annual value, was established in 1923 by the Women's Athletic Association of the University. It is annually to be awarded to a woman student of the Freshman, Sophomore, or Junior Class, in time for Commencement announcement, by a committee consisting of the Head of the Department of Physical Education for Women, the Athletic Instructor for Women, and the President and two Senior members of the Women's Athletic Association, in accordance with the following conditions:

1. The student, during the year then closing, must have participated in at least four interclass sports and must have been a member of at least three teams of her class.
2. The student must have been a leader in good sportsmanship.
3. The student, for her college course to date, must have earned a scholarship average of not less than 2.5.
4. This scholarship amount will be paid to the winner on the 1st of October following the award, provided the student is then duly enrolled for another year's work in the University of Nevada. Otherwise, the scholarship shall be paid to the alternate best satisfying the conditions.

14. ANONYMOUS SCHOLARSHIP  
(Established, Spring 1925)

A scholarship having annual value of \$500 and tenable for four years, granted to a Nevada man high school graduate adjudged by the President of the University to have the best record among all nominees named by High School Principals. This scholarship was renewed in the spring of 1929.

15. THE WASHOE COUNTY BAR ASSOCIATION  
SCHOLARSHIP

(Established, 1925)

This \$100 scholarship, given by the Nevada Bar Association and available for award for the first time at Commencement, 1925, and taken over by the Washoe County Bar Association in 1928, is to be awarded annually at Commencement by the University Scholarship Committee to a worthy student who has earned Sophomore standing during the first year's University work and who has made most marked progress in written and in spoken English during that year.

This scholarship sum shall be payable on the first of October following the award, provided the winner is then enrolled for a further year's work at the University of Nevada, otherwise to an alternate satisfying the conditions.

The Bar Association expects that each student to whom this scholarship shall be awarded will, after he is successfully established in business or profession, return the sum awarded to him to the University to be again awarded to a student who satisfies the conditions stated for this scholarship.

16. THE MRS. CARL OTTO HERZ SCHOLARSHIP

(Established, 1926)

This scholarship was established early in 1926 by Mrs. Carl Otto Herz of Reno and for 1929 and 1930 was continued by Mr. Carl Otto Herz. At the 1930 Commencement the heirs of Mrs. Herz presented to the University funds to perpetually endow this scholarship in her memory.

The scholarship carries an annual value of \$50 and is to be awarded at the end of each University year, beginning with May, 1926. The scholarship is to be awarded by the University Scholarship Committee to one of three Electrical Engineering students nominated to the Committee by the Head Professor of Electrical Engineering. The nominees must each be Electrical Engineering students who are self-supporting in whole or in part, are of good character and of good scholarship, and who have earned Senior standing in the University of Nevada. The scholarship sum will be payable to the winner on September 15 following the award, provided the winner is then enrolled in the University of Nevada for his Senior year in Electrical Engineering. Otherwise the sum is to be paid to a chosen alternate satisfying the same conditions.

17. THE CHARLES ELMER CLOUGH SCHOLARSHIPS  
IN ENGINEERING

(Established, 1926)

In the fall of 1926 Mr. Charles Elmer Clough of Reno established two scholarships in Engineering.

These two scholarships each carry an annual value of at least \$160, and are to be awarded at the end of each University year, beginning with the award in May, 1927. The scholarship winners are to be chosen by the head Professors of the Schools of Civil, Electrical, and Mechanical Engineering. The winners each year must be chosen from the students enrolled in Civil, Electrical, and Mechanical Engineering and must, in the judgment of the selecting Professors, be the best all-round students, who are self-supporting in whole or in part, are of good character and of good scholarship, and who have earned one, Senior standing, and the other Junior standing, in the University of Nevada.

The scholarship sums will be payable to the respective winners, one-half on September 15 and the other half on January 15, following the award, provided the winners are then enrolled in the Engineering College of the University of Nevada. In case any winner is not so enrolled, the scholarship sum will then be paid to a similarly chosen alternate satisfying the same conditions.

18. THE JAMES WARD GERMAN-KATHERINE MORRISON  
GERMAN SCHOLARSHIP

(Established, 1926)

This scholarship, carrying an annual value of \$500, was established in the fall of 1926 by Mr. and Mrs. James Ward German of Reno.

In the spring of each second year, beginning with the spring of 1927, the Principals of the four-year high schools of Nevada will be requested to nominate candidates for this scholarship to the President of the University of Nevada, who shall select the winning German scholar from these nominees.

The following conditions shall be observed:

- a. This scholarship is to be awarded alternately to a young man and to a young woman, beginning with an award to a young man for the two University of Nevada years beginning with August, 1927. Each winner shall hold this scholarship for two successive years, provided the conditions stated in d and e below are satisfied.

- b. Any nominee must have been graduated from a regular four-year Nevada high school, must have maintained a high scholarship record throughout the high school years, must be of good character and must have been helpfully active in the general life of the high school. The candidate must be one who, without aid of a scholarship would have to be self-supporting, in whole or in large part, if he came to college.
- c. The family of the candidate must have been resident in Nevada at least four years prior to the date of nomination or, if the candidate is an orphan, or has been wholly self-supporting, then the candidate must have been a bona fide resident of Nevada for at least four years prior to his nomination.
- d. The scholarship amount for each winner is to be \$500 for each of two consecutive University of Nevada years, except that whenever the award is made to a candidate recommended from the Reno or Sparks high schools, then the winner shall receive \$350 for each of two years, and a second award of the remaining \$150 shall be made for each of two consecutive years to the candidate of second highest record. In each University year one-half of the scholarship amount due shall be paid on September 15 and the other half on January 15, provided that the winner is duly enrolled in the University of Nevada on these dates.
- e. If within the two years of the scholarship any holder fails to maintain good standing in the University of Nevada, both in scholarship and in conduct, the President of the University is authorized to stop any further payments to this scholar. The sums accruing from such stoppage of payments or accruing because of any scholar's death or withdrawal from the University of Nevada shall be used to fund an added scholarship, or scholarships, in the discretion of the President of the University, to be awarded at the next regular time for choosing a new scholar. However, if any winner fails to take residence in the University of Nevada in the fall following his selection, the President of the University shall then award the scholarship to an available alternate who next best meets the conditions of the original award.

#### 19. THE RACHEL RAND SCHOLARSHIPS

(Established, 1928)

The anonymous donor of these two \$100 scholarships established them in honor of Miss Rachel Rand, a student in the University of Nevada School of Education in 1914. The scholarships are awarded at the end of each University year by the University Scholarship Committee, one to the most deserving man student and the other to the most deserving woman student of the University of Nevada during the year closing who satisfies the following conditions:

1. Must be working their way through the University.

2. Must have obtained passing grades in all subjects studied during the year.

3. Award is to be made, at the request of the donor, to *any* student meeting these requirements regardless of race, color, or religious creed.

The amount of the scholarship is to be payable to the students chosen by the Scholarship Committee on or after the 15th of September following the award, provided that the winners are then enrolled for another semester's work in this University of Nevada. Otherwise the scholarship shall, on recommendation of the Scholarship Committee, be paid to an alternate then enrolled who satisfies the requirements of the scholarships.

#### 20. THE CARRIE BROOKS LAYMAN SCHOLARSHIP

(Established, Spring 1929)

This scholarship, established in memory of Carrie Brooks Layman, provides for ten consecutive payments of \$30 each to a worthy, self-dependent Sophomore or upper class man or woman student who, while in college, is an abstainer from debt, intoxicants and tobacco. The recipient of this scholarship is to be chosen each spring by the University Committee on Scholarships and Prizes. If any of Mrs. Layman's sons or grandchildren should enter the University of Nevada, then such son or grandchildren shall have prior claim to this scholarship. During the earlier years of this scholarship payments will be made to the winner by the donor through the Comptroller's office. The initial \$30 payments of each semester shall be made on the winner's registration day, and shall be followed by similar payments on the 5th of each September, October, November, December, February, March, April and May, provided the winner is duly enrolled as a student at the University of Nevada.

#### 21. THE RHODES SCHOLARSHIPS

Special attention is called to the Rhodes Scholarships in Oxford University, England, to which one appointment from the State of Nevada was made for each of the years 1907, 1908, 1910, and so on, omitting every third year until 1930 when a new district system of selecting American Rhodes Scholars was put into effect. By latest ruling of the Rhodes Scholarship officials Nevada has been placed in a district including five other States, and four Rhodes Scholars are each year to be chosen from this whole district. This new

system went into operation in 1930. The scholarships are each of the value of approximately \$2,000 a year, and are tenable for three years.

Scholars will be selected on the basis of the following qualities:

1. Qualities of manhood, force of character, and leadership.
2. Literary and scholastic ability and attainments.
3. Physical vigor, as shown by interest in outdoor sports or in other ways.

The ideal Rhodes scholar should excel in all three of the qualities indicated, but in the absence of such an ideal combination, committees will prefer a man who shows distinction either of character and personality, or of intellect, over one who shows a lower degree of excellence in both. Participation and interest in open-air and athletic pursuits form an essential qualification for a Rhodes scholar, but exceptional athletic distinction is not to be treated as of equal importance with other requirements.

In addition to the above requirements, a candidate to be eligible for election from the State of Nevada must—

1. Be a citizen of the United States, with at least five years' domicile, and unmarried.
2. Be a student in or a graduate of the University of Nevada, or, if a student in some other university or college, a resident of Nevada.
3. By the 1st of October of the year for which he is elected have passed his nineteenth and not have passed his twenty-fifth birthday.
4. By the 1st of October of the year for which he is elected have completed at least his Sophomore year in the University of Nevada or in some other recognized degree-granting university or college of the United States.

The appointments thus far made to Rhodes Scholarships from the State of Nevada are as follows:

- 1907—ARTHUR LEONIDAS ST. CLAIR<sup>1</sup>, Deeth.  
 1908—WILLIAM SCOTT UNSWORTH, Reno.  
 1910—STANLEY MAYHEW WILTON<sup>2</sup>, Goldfield.  
 1911—CEDRIC HARDING BEEBE<sup>3</sup>, Reno.  
 1913—FLOYD SHERMAN BRYANT, Sparks.  
 1914—WALTER CLARENCE JEPSEN, Verdi.  
 1917—THOMAS HENRY EDSALL<sup>4</sup>, Reno.  
 1918—No appointment was made, owing to the war.  
 1919—STANLEY M. PARGELLIS, Reno.  
 1921—CHARLES M. CHATFIELD, Reno.  
 1922—LESLIE MALTBY BRUCE<sup>5</sup>, Reno.  
 1923—PAUL A. HARWOOD, Reno.  
 1925—JOHN OCHELTREE, Reno.  
 1926—FRED SIEBERT, Reno.<sup>6</sup>

<sup>1</sup>Died February 20, 1920.

<sup>2</sup>Withdrew before work completed.

<sup>3</sup>Died January 4, 1926.

<sup>4</sup>Died January 2, 1918.

<sup>5</sup>Died January 8, 1923.

<sup>6</sup>Died July 30, 1929.

1928—FRED ANDERSON, Carson City.

1929—FRANCIS DUBORG, Reno.

1930—The District Committee did not appoint the Nevada candidate.

The Rhodes Scholarships offer an unusual opportunity both for a university education in the Liberal Arts, the Sciences, Engineering, or the professions of Jurisprudence or Theology, and for travel among the chief centers of life and activity in foreign lands. These advantages, with the gift of financial means approximately ample for their enjoyment, have made these scholarships the most attractive ever established.

Further information about Oxford and the Rhodes Scholarships may be secured by addressing the President of the University of Nevada, or the Secretary of the Committee, Charles M. Chatfield, 621 Washington Street, Reno, Nevada.

## 22. THE JOHN ARMSTRONG CHALONER RESEARCH FELLOWSHIP\* AND WOMEN'S PRIZES

(Established, 1925)

A. Through the gift of John Armstrong Chaloner of Virginia, the University of Nevada, the United States Bureau of Mines cooperating, offers in the Mackay School of Mines an alternate year fellowship under the following conditions:

1. This fellowship is open to graduates of American mining colleges of recognized standing. Preference will be given to candidates who have had practical experience subsequent to graduation.

2. The income of the fellowship is \$750 per year, payable monthly. The only fees required will be regular laboratory fees in connection with courses in the School of Mines, and the diploma fee, the fellow being exempted from other fees approximating \$175 for the year.

3. The year runs from July 1 following each election to June 30 of the following year, with one month out for vacation.

4. The holder of the fellowship will be required to carry a minimum number of graduate courses in the Mackay School of Mines and, in lieu of the usual thesis, will be assigned to research service with the United States Bureau of Mines Rare and Precious Metals Station located on the Campus. In his research service, the holder of the fellowship will be subject to rules governing employees of the United States Bureau of Mines and he is to begin this research service July 1, 1931.

5. The holder of the fellowship, having satisfactorily completed the year's work, will receive the degree of Master of Science or other advanced mining degree for which he may be qualified.

This fellowship shall be awarded in alternate years, beginning with the University year 1925-1926. If in any year

\*Suspended for the year 1931-1932 at the request of the donor.

due for this fellowship a fellow satisfying the above conditions shall not have been chosen by September 15, then the \$750 for that year shall be given as prizes to women students in accord with B below.

B. Each alternate year, beginning with the University year 1926-1927, Mr. Chaloner's \$750 is, by his plan, to be awarded in five \$100 first prizes and five \$50 second prizes to women students to be chosen in the fall semester by the Associated Women Students of the University.

## BENEFICIARY AID

## LOAN FUNDS

*The Nevada State Federation Scholarship Fund*—The Nevada State Federation of Women's Clubs has established a scholarship fund for the University of Nevada to be loaned to students in amounts varying to suit individual needs. The money thus loaned is to be returned to the fund at the borrower's convenience without interest. The fund is available first to girls, high-school graduates, or girls who have completed one year of normal or university work, the latter to have the preference. Boys are eligible under like conditions, but only when the funds are ample and no applications from girls are on file. Students desiring to take advantage of this offer will apply to Mrs. E. E. Wardin, State Chairman of the Committee on Student Loan Fund, 130 West Liberty Street, Reno, Nevada.

*The David Russell Loan Fund*—By will, David Russell of Loyalton, California, bequeathed, in 1908, the income of his residual estate, amounting to a little above \$19,000, to be paid to the University of Nevada after a small payment had been made to another institution. The Board of Regents established the David Russell Fund to receive these annual payments after they became available in 1913. The Board has set aside \$5,000 of this fund as a revolving fund for loans to deserving students who satisfy the President of the University of their fitness to receive this aid. The money is loaned to students on the basis of 4 per cent interest until maturity.

*The Olin Ward Bequest*—Two scholarships of \$300 each, bequeathed by Mr. Olin W. Ward of Reno, Nevada. Under the terms of the will the beneficiaries of such scholarships must be earnest, industrious boys, of good moral character, financially unable to attend or continue their attendance at the University without the aid of such scholarships, and shall be chosen by the President of the University. Each beneficiary so chosen must, as a condition of his receiving such scholarship and before said sum or any part thereof is paid to him, enter into a written agreement with the Board of Regents that he will, within seven years after

receiving such scholarship, pay or cause to be paid to the Board of Regents the sum of \$300 for the purpose of providing a scholarship in the University for some boy having like qualifications and chosen as above specified.

#### OTHER AID FOR STUDENTS

It is the purpose of the officers of the University to aid meritorious students of limited means so far as it lies in their power. Some of the work in and about the University buildings and grounds is done by young men and young women. Students are favored whenever possible with such work as typewriting, copying, housework, dining-hall service, and janitorial service. A committee allots the open positions to students who apply, giving preference to those who have good scholarship records, who need the assistance, who do the work well, and who are upper-class applicants. During the year 1930-1931 the committee was able to place forty men and women students on the Campus, and through its direct efforts additional students were provided with positions in the city. Applications for campus employment should be made to Dean Margaret E. Mack, Chairman of the Campus Employment Committee. It is to be remembered that the power to favor students with self-help is limited by circumstances, and *therefore students cannot expect to earn enough to pay all their expenses while pursuing their studies.*

The *necessary campus* expenses for a University year are covered by about \$450, allowing only about \$75 for personal incidentals, for each Nevada student. Students from other States should add \$150 for tuition. (See page 96 for tabulation of expenses.)

It is clearly better, both for the individual student and for the common student life on the Campus, if students can do their necessary money-earning during the long summer vacation. If they can have all their time during their University year free for their studies and for their participation in general student activities, they will more surely develop themselves into fully rounded men and women than if they are compelled to inroad their time with many hours each week given to work for pay. *Particularly is it desirable that first-year students should, if possible, plan fully to finance their first year without necessity of working for pay during the University year.*

EVERY STUDENT FROM NEVADA SHOULD HAVE AT LEAST \$150 CASH IN HAND, AFTER REACHING THE CAMPUS, PROPERLY TO START ANY UNIVERSITY YEAR. OUTSIDE STUDENTS SHOULD HAVE \$250 IN HAND TO START THE YEAR. THE UNIVERSITY CANNOT DEFER FEES DUE TO THE UNIVERSITY.

## EXPENSES OF STUDENTS

## TUITION

The Board of Regents is empowered to charge tuition to students who come from outside of Nevada. The Board of Regents set this *tuition charge, payable by students from outside Nevada, at \$75 per semester, beginning with August, 1925. A four-fifths rebate is allowed on this nonresident tuition charge if the student formally withdraws within the first three weeks of any semester and a one-half rebate is allowed if the student withdraws between the end of the third week and the end of the eighth week. No rebate is allowed if the student withdraws after the end of the eighth week.*

There are two classes of applicants for enrollment entitled to exemption from this nonresident tuition:

## I

Those applicants whose parents live in Nevada.

## II

Those applicants who have themselves lived in Nevada continuously for at least six full months just prior to their matriculation in the University of Nevada.

The Board of Regents of the University has given instructions to the President concerning these two classes of applicants and has set the University penalty for false testimony in relation to residence as follows:

## CASE I

The President of the University of Nevada is authorized and directed to grant exemption from nonresident tuition to any applicant for matriculation whose parents have been continuously resident in Nevada for at least six full months just prior to such application for matriculation. "Parents" in this connection mean both father and mother if both are living and are not legally separated. In case one parent is dead or if parents have been legally separated, this residence requirement may be satisfied by residence in Nevada, in accord with the requirement, of the one parent with whom the applicant is living. In case both parents are dead, the applicant may be exempt from nonresident tuition on this

basis only if the applicant's legal guardian satisfies the Nevada family residence requirements above stated. In any case of doubt, the President is authorized and directed to require a sworn statement from a parent or guardian of the applicant testifying that the above residence requirements have been satisfied and further to require supporting sworn statements from at least two other established adult Nevada residents.

## CASE II

The burden of proof is upon any applicant whose parents do not reside in Nevada to show that said applicant has been a bona fide resident of Nevada continuously for at least six full months just preceding his matriculation in this University of Nevada. The President of the University is authorized and directed, before granting tuition exemption to any applicant whose parents do not reside in Nevada, to require: (a) Every such applicant to furnish a sworn statement that he has satisfied the above residence requirement and (b) every such applicant to furnish sworn statements testifying to the applicant's fulfillment of the above residence requirement from each of two established adult Nevada residents.

If in any case after the admission of a student receiving exemption from nonresident tuition in either of the above classifications the University receives clear evidence that materially false statements as to Nevada residence have been made in the sworn statements then the President of the University is authorized and directed to expel such student from the University of Nevada.

## LATE REGISTRATION FEES

A fee of \$3 is charged for registration later than the regular enrolling days of each semester. This fee is increased to \$5 for those registering later than the end of the week including enrollment days. *No exception is made to the rule.* Each student shall complete his registration by 4 p. m. of the second day after he begins registration, otherwise he shall pay to the Comptroller 75 cents for each day or fraction of a day thereafter until his registration is completed.

## MATRICULATION FEE

Each new student must pay a matriculation fee of \$5. This fee is paid once only by each student at the time of first enrollment in the University.

## UNIFORMS

Young women are required to provide themselves with a regulation gymnasium outfit costing about \$8 to \$10.

Students in cooking will provide themselves with two white aprons, costing about \$4.

Military students must make a deposit of \$10 to cover uniform and equipment.

## THE DORMITORIES

*Manzanita and Artemisia Halls*—Manzanita and Artemisia Halls furnish campus residence for women students. They are well ventilated, heated and lighted dormitory buildings, with all modern conveniences and comfortably furnished. They can accommodate one hundred and sixty-five residents.

Dean of Women Margaret E. Maek and Matrons Miss Irma Wilson and Mrs. Laura E. Akin live in these dormitories and have supervision over them. Miss Wilson is in charge of the University Dining Hall.

Unless women students have applied for residence in excess of the number that can be accommodated in the women's dormitories, all unmarried women students who are not residents of Reno or Sparks are required to live in one of the women's dormitories during their entire Freshman year. The only exceptions to this rule may be made by the Dean of Women when written request has been filed in advance with the Dean of Women by parents requesting that their daughter be permitted to live with relatives whose home is in Reno or Sparks. Residence privilege in this hall will not be granted to married women unless they were formerly students of the University. Women students not living in a dormitory are required to select accommodations approved by the Dean of Women. A list of approved places is on file in the office of the Dean of Women.

Application for residence privileges in the women's dormitories should be made to the Dean of Women who will consider such applications in the order of their receipt. Special application blanks for hall residence will be sent on request made either to the Registrar of the University or to the Dean of Women. All applications, to be honored, must (1) Be on file with the Dean of Women at least one week prior to the opening day of any semester; (2) *Be accompanied by a sum*

covering the room rent for the semester concerned. Room rent is as follows:

	1st Sem.	2d Sem.
Room with roommate.....	\$34.00	\$36.00
Single room .....	42.50	45.00
Suite with roommate.....	42.50	45.00
Double room used by one person.....	63.75	67.50

Checks for room rent should be made payable to the Board of Regents. Such sum will be returned in full to the one making the reservation if due notification is sent of desire to cancel reservation, on or before the end of the first enrollment day of the term, to Dean Margaret Maek. If cancelation or withdrawal is made after the end of the first enrollment day, but before the end of the third week of the semester, two-thirds of the room fee will be rebated. If withdrawal is made after the end of the third week and before the end of the eighth week one-half of room fee will be rebated, and no rebate will be made if withdrawal occurs after the end of the eighth week.

No one can be given room in a dormitory until room rent for the term has been paid.

All residents of women's dormitories are required to:

1. Register in and to carry throughout each semester at least fourteen credit hours of University work unless excused by the Dean of Women.

2. Conform to the regulations of the Hall as adopted by the Manzanita Hall Association in consultation with the Dean of Women and the Matron of the Hall.

3. Be provided with the following articles: Bedding for single bed; one mattress protector, 3x6 feet, six good towels, two dresser scarfs, and personal toilet articles. If window hangings and rugs are desired, they must be supplied by the students. White curtains are furnished by the University. Young women should also have two large aprons for work in the laboratories. All articles of room equipment and wearing apparel should be plainly marked with the name of the owner.

4. Take care of their own rooms and linen.

The women's dormitories will open Saturday, August 22, 1931, to receive student residents for the University year 1931-1932.

*Lincoln Hall*—Lincoln Hall is the University home for

men. The building has accommodations for 90 young men, and it is equal to the best of modern college halls. Men coming to Lincoln Hall must provide themselves with the following articles: Two white bedspreads; one pair blankets; one comfort, 72x90 inches; one mattress protector, 3x6 feet; six good towels, and personal toilet articles. All articles of room equipment and personal wearing apparel should be plainly marked with the name of the owner.

Application for residence privileges in Lincoln Hall should be made to Master of Lincoln Hall, who will consider such applications in the order of their receipt. Special application blanks will be sent upon request made either to the Master of Lincoln Hall or to the Registrar of the University.

In order to be honored, *reservations must be (1) accompanied by a sum covering the room rent for the semester concerned; and (2) be on file with the Master of Lincoln Hall at least one week prior to the opening day of any semester.* The room rent for the first semester of any university year is \$38, and for the second semester, \$40.50. Checks should be made payable to the Board of Regents. Such sum will be returned in full to the one making the reservation if due notification is sent of desire to cancel reservation, on or before the end of the first enrollment day of the term, to the Master of Lincoln Hall. If cancellation or withdrawal is made after the end of the first enrollment day, but before the end of the third week of the semester, two-thirds of the room fee will be rebated. If withdrawal is made after the end of the third week and before the end of the eighth week one-half of this room fee will be rebated. If withdrawal is made after the end of the eighth week, no rebate on the semester's room rent will be made. For an added payment of \$5 any regular roomer in Lincoln Hall may continue to occupy his room during Christmas holidays.

*No one can be given room in the dormitory until room rent for the term has been paid.*

Lincoln Hall will be open Saturday, August 22, 1931, to receive students for the University year 1931-1932, and will be closed to roomers the day after Commencement Day.

For men students whose homes are outside the Reno district and who are not living in Lincoln Hall, the Master of Lincoln Hall has a list of homes offering suitable accommodations for men. He invites correspondence with parents or guardians of men students of the University and will gladly

cooperate with them in matters making for the welfare of such students.

#### THE UNIVERSITY DINING HALL

For the accommodation of the students the University conducts a Dining Hall under the supervision of a trained dietitian. The service is maintained for the purpose of obtaining board and table service of the most acceptable character and at the most reasonable figure. Students boarding at the Dining Hall will be charged \$25 per month for board. At each student's first meal at the beginning of a University semester \$5 will be collected at the Dining Hall which will be credited toward the payment of the first month's board of the individual. Each student should therefore come prepared to pay this amount to the head waiter.

All women students residing in a University dormitory are required to board at the University Dining Hall. Men students may board at the University Dining Hall.

#### REGULATIONS GOVERNING THE UNIVERSITY DINING HALL

1. Board is payable in advance. When board is not paid by the fifth of the month, an additional 50 cents per day will be added until board is paid and receipt therefor from the Comptroller's Office is presented to the head waiter.

2. Students desiring to board regularly at the University Dining Hall will be required to register with the head waiter.

3. Registration at the Dining Hall will be made only on presentation of the Comptroller's receipt for board paid, or of a special permit issued by the President. In order to furnish board at the rate charged, it is imperative that all board bills be paid, and it is therefore ordered that no credit be extended. *Students who intend to board at the Dining Hall will be expected to come with sufficient money to keep their board paid one month in advance.* When board is not paid by the fifth of the month, an additional 50 cents per day will be added until board is paid and receipt therefor from the Comptroller's Office is presented to the head waiter.

4. Rebate at the rate of \$5 per week will be allowed for necessary absences, but no rebate will be made on board for less than one week's continuous absence. Due notice must be given and permission secured from Miss Mack in advance, or no rebate will be allowed.

#### PREFERENCES IN DINING HALL AND DORMITORIES GIVEN TO NEVADA STUDENTS

The Board of Regents adopted the following rule:

Whenever the requests for University of Nevada dormitory or dining-hall privileges exceed the number that can be accommodated, preference shall be given as follows:

- (1) To Nevada students.

- (2) To formerly enrolled students from outside Nevada.  
 (3) To new students from outside Nevada.

N. B. *Such preferences for Nevada students in the dormitories are open to all who apply not later than one week before the opening of any given semester. Nevadans making application later than such time will be accommodated if places are still open, but cannot be received otherwise.*

#### LABORATORY FEES

LABORATORY FEES—Departments giving laboratory courses must charge fees to cover special expenses incident to such courses. These fees are calculated to cover cost of materials used and the expense incurred for the individual student.

#### BLANKET DEPOSIT

At registration time a general deposit of \$10 is required from each student. Breakage or damage in all laboratory courses, in Library, in dormitories and in any other University connection is charged against this deposit. The remainder of this deposit, after all above charges, if any, are deducted, will be returned at the end of the University year only, unless a given student is not returning for the second semester. The military deposit is additional to this general deposit. If there are substantial first-semester charges reported against any given student, the Comptroller has authority to require that student to renew his deposit to the full \$10.

#### ASSOCIATED STUDENTS MEMBERSHIP FEE

At the request of the Associated Students of the University the Board of Regents voted to make the fee for membership in the Student Association a compulsory fee upon all students except visitors, members of the University staff, and Nevada school-teachers in active service. This fee of \$10 per semester includes subscriptions to the U. of N. Sagebrush, the Desert Wolf, and in the second semester the Artemisia, pays up each student's class dues and covers admittance to all regular varsity athletic events and must be paid to the Comptroller at the time of registration.

#### HEALTH SERVICE AND HOSPITAL FEES<sup>1</sup>

- Hospital Association membership, \$3.  
 Hospital bed rates, \$2 per day (see page 63).  
 Health Service Fee, \$1.

<sup>1</sup>See page 62 for explanation.

TABLE OF TUITION CHARGES, FEES AND DEPOSITS PER SEMESTER

	Fees
Agronomy 71, 72.....	\$1.00
Agronomy 1, 6.....	3.00
Animal Husbandry 4, 56.....	3.00
Animal Husbandry 59.....	1.50
Associated Students Fee.....	10.00

Botany 55.....	3.00
Botany 3, 52.....	2.00
Botany 1, 2, 5.....	4.00
Botany 64.....	5.00
Botany 91, 92 (fee determined by type of work).	
Change of registration per course (see page 113).....	1.00
Chemistry 9, 10.....	12.00
Chemistry 81, 82 (per semester).....	6.00
Chemistry 1, 2, 5, 6, 7, 8, 25, 51, 52, 53, 64, 67, 71, 72, 74, 99, 100.....	8.00
Chemistry 102.....	4.00
Chemistry 200 (fee per credit hour).....	4.00
Civil Engineering 52, 54, 64.....	3.00
Civil Engineering 58.....	5.00
<sup>1</sup> Civil Engineering 58 (Transportation).....	15.00
Civil Engineering 72.....	\$2.50
Civil Engineering 90.....	1.00
Dairy Husbandry 1, 53, 54, 56, 61, 62.....	3.00
Dairy Husbandry 59.....	1.50
Dairy Husbandry, 5, 55.....	2.00
Deposit, General.....	10.00
Deposit, Military.....	10.00
<sup>2</sup> Diploma (Degree or Certificate).....	5.00
<sup>3</sup> Drawing Outfits.....	\$20 to 30.00
Education 20, 41, 48.....	1.00
Electrical Engineering 61, 62, 63, 64.....	5.00
Electrical Engineering 67, 76, 77, 78, 79, 85, 86.....	2.50 per credit
Electrical Engineering 80, fee determined by work taken, maximum.....	10.00
Health Service.....	1.00
<sup>4</sup> History Syllabus.....	25¢ to 1.00
Home Economics 31, 32, 55, 83, 85.....	5.00
Home Economics 33.....	3.00
Home Economics 34.....	.50
Home Economics 9, 15, 16, 18, 45, 49, 66, 67, 68, 87, 95.....	2.00
Home Economics 42, 88.....	1.00
Home Economics 92.....	2.50
Hospital Association Membership.....	3.00
Matriculation (new students only).....	5.00
Mechanic Arts 1, 2, 3, 4, 5, 6, 7a, 7b.....	4.00 per credit
Mechanical Engineering 64, 65, 66, 80.....	5.00
Metallurgy 51.....	15.00

<sup>1</sup>If a student supplies his own transportation in a satisfactory manner, this fee will not be required.

<sup>2</sup>If two diplomas are granted in one year, the charge will be \$5 for the first and \$4 for the second; if three diplomas are granted in any one year, the charge will be \$5 for the first, and \$4 each for the second and the third.

<sup>3</sup>See footnote 5, page 102. <sup>4</sup>According to work being done.

	<i>Fees</i>
Metallurgy 52, 67, 70.....	\$5.00
Metallurgy 56.....	2.50
Metallurgy 79, 80, 180 (deposit according to work).	
Mineralogy 1.....	2.00
Mineralogy 2.....	3.00
Nature Study 1, 2.....	1.00
Physical Education (locker deposit).....	.50
Physical Education (laundry).....	1.00
Physics 1b, 2b, 5, 6, 19, 20, 55, 56, 57, 58, 63, 77, 78.....	3.00
Physics 75, 76.....	5.00
Poultry 4, 6, 8.....	2.00
<sup>1</sup> Transcript of student record.....	1.00
Tuition to non-Nevadans.....	75.00
Zoology 53.....	1.00
Zoology 2, 4, 66.....	4.00
Zoology 7, 8.....	2.50
Zoology 51, 64.....	2.00
Zoology 91, 92, 201 (fee determined by type of work).	
Zoology 9.....	5.00

*Students must be prepared to pay all of above charges due from them to the University at the time of completing their enrollments. These payments due cannot be deferred.*

*No rebate is allowed on any of the above charges, except upon nonresident tuition payments, after the end of the third week of any semester. (See page 94.)*

TABULAR ESTIMATE OF NECESSARY ANNUAL EXPENSES OF STUDENTS  
EXCLUSIVE OF PERSONAL INCIDENTALS, CLOTHING AND TRAVELING<sup>2</sup>

	<i>Low</i>	<i>Moderate</i>	<i>Liberal</i>
<sup>1</sup> Tuition.....	None	None	None
Board, 8½ months.....	\$215.00	\$225.00	\$325.00
Room.....	80.00	90.00	125.00
<sup>4</sup> Laundry.....	25.00	35.00	50.00
<sup>5</sup> Books, stationery, etc.....	30.00	35.00	45.00
Fees (laboratory, athletic, medical, etc.)	30.00	35.00	50.00
<sup>6</sup> Totals.....	\$380.00	\$420.00	\$595.00

<sup>1</sup>When two or more transcripts of record are asked for at the same time, each additional transcript will be 50 cents. *Request for transcript or transcripts, MUST BE accompanied by the stipulated fee. No student may be graduated or be furnished with a transcript of record unless and until all accounts with the University have been fully paid.*

<sup>2</sup>The low and moderate estimates apply to residents of dormitories. The liberal estimate, with the exception of books and fees, applies to students living elsewhere.

<sup>3</sup>Students from outside the State of Nevada must add a tuition of \$75 each semester.

<sup>4</sup>This item may be greatly reduced by residents of Manzanita Hall who choose to take advantage of the house-laundry facilities.

<sup>5</sup>All engineering students will require complete drawing outfits. These cost from \$20 to \$30. Students having this equipment should bring it with them.

<sup>6</sup>These amounts do not include the deposit of \$10 required of all students at the beginning of each semester, the required military deposit, nor the cost of drawing outfits needed by all engineering students, nor do they include the cost of special uniforms needed in some departments, such as the gymnasium uniforms.

## GOVERNMENT OF THE STUDENTS

In the government of the University the largest liberty consistent with good work, good order, and good character is given the students. Their habits of life are expected to be such as to promote daily cultivation of high moral character. They are expected in all their relations to each other and to the University to observe the usages of good society without requiring special regulations for that purpose. They are expected to be punctual and regular in their attendance upon all University exercises. The State provides its bounty for the earnest and industrious student. The indolent or the unworthy will not be retained in the University. Young men and young women who do not intend to give themselves up to the very highest demand of university life are advised to remain at home or to go elsewhere.

### OFFICIAL NOTICES

Students should watch the bulletin-board for notices.  
AN OFFICIAL NOTICE PROPERLY POSTED IS DEEMED SUFFICIENT  
INFORMATION TO ALL STUDENTS.

## ADMISSION AND DEGREES

Applicants for admission to first-year standing in the University of Nevada should present satisfactory evidence of having completed fifteen units of acceptable high-school or preparatory work. A "unit" represents a year's study in any subject in a secondary school, constituting approximately one-quarter of a full year's work. Two periods of laboratory work, or shop work, count as the equivalent of one recitation.

Applicants for entrance who are Nevada residents but who cannot qualify for regular Freshman standing may be admitted as Limited Freshmen<sup>1</sup> or as Specials.<sup>2</sup>

## SCHOLARSHIP REQUIREMENTS FOR NON-NEVADANS

## 1. COLLEGE OF ARTS AND SCIENCE

Applicants for admission to first-year standing in the University of Nevada from States of the Union other than Nevada must have a grade above 3<sup>3</sup> in at least 10 of their 15 acceptable high school units presented for entrance. Of these, 6 units must be in nonvocational subjects.

## 2. COLLEGES OF AGRICULTURE AND OF ENGINEERING

Applicants for admission to first-year standing in the College of Agriculture or in the College of Engineering of the University of Nevada from States of the Union other than Nevada must have a grade above 3<sup>3</sup> in at least 6 of their acceptable high school units presented for entrance. Of these 6 units, 4 must be in nonvocational subjects. "Special" students from outside Nevada will be received by both of these colleges.

*No new students from outside Nevada will be received as (a) "Limited Freshmen" in any University of Nevada College; (b) as "Specials" in the College of Arts and Science.*

<sup>1</sup>See footnote, p. 106.

<sup>2</sup>See p. 110.

<sup>3</sup>Grades equivalent to this University's "above 3" in the usual A, B, C, etc., system are grades of B or better, and in the percentage grading system are grades of 80 per cent or better.

## SCHOLARSHIP REQUIREMENTS FOR NEVADA APPLICANTS

All applicants for regular Freshman standing or for limited Freshman standing who present credentials from Nevada high schools or are from Nevada families, must present at least 6 of their acceptable high school units with a grade better than 3. Of these 6 units, 4 must be in nonvocational subjects.

All high school and other certificates which are to be presented for admission should be forwarded to the Registrar of the University prior to the time the student expects to enter. Applications not received in time for an examination by the Admission Committee prior to the opening day will not be considered until after the regular matriculation days.

Applicants, who for any reason have been unable to secure their credentials, may file a petition with the Registrar for temporary admission. Such petition should contain the name and location of the preparatory school, the reason of the absence of credentials, a list of the subjects taken in the preparatory school, and the College of the University which the applicant desires to enter. These petitions will be acted on by the Admission Committee, and meritorious cases will be permitted to register temporarily, pending the receipt of credentials.

## LIMITATION OF ENROLLMENT

The Board of Regents at its Commencement session, held May 11, 1920, unanimously adopted the following rules for limitation of enrollment in the University of Nevada, to be applicable from and after September 1, 1920:

That the University of Nevada shall not, during either semester of any University year, receive students whose families or whose guardians reside outside the State of Nevada or who, if they have been living independently of family or guardian, have themselves been residing outside the State of Nevada, to a number exceeding 50% of the total number of students from Nevada enrolled during the preceding University year, September to May, inclusive; *provided*—

(a) That the above limitation shall not be put into effect until the total enrollment of the University has reached 600 for a given semester, or when it will reduce the enrollment below 600; and

(b) That the above limitation policy shall not operate to exclude any students from outside the State of Nevada who desire to enroll in the regular courses for mining engineers, metallurgists or mining geologists, and who are fully qualified for entrance or advanced standing in the Mackay School of Mines.

## REQUIREMENTS FOR ADMISSIONS TO THE SEVERAL COLLEGES AND SCHOOLS

## ADMISSION OF CANDIDATES FOR DEGREES

The privileges of the University, while open to all qualified persons of good character and serious purposes, are designed primarily for those who satisfy the requirements for admission and become candidates for degrees. In order to insure some breadth of view on the part of students as well as some degree of achievement, curricula have been established in the several colleges, each intended to meet the needs of a considerable body of students. So far as is consistent with the purposes the curricula are intended to fulfill, students are left free to choose their work according to their individual needs and tastes. For most persons it is believed that the pursuit and completion of a regular curriculum is of much higher value than any unrestricted selection of courses. The University wishes, therefore, to impress upon parents and students its firm belief that, under all ordinary circumstances, students should satisfy the requirements for admission and pursue the regular curricula.

## TO THE COLLEGE OF ARTS AND SCIENCE; AND TO THE NEVADA STATE NORMAL SCHOOL

For unconditional<sup>1</sup> admission, 15 units.

- I. *Required*: English, 3 units.  
Mathematics, 2 units.
- II. Ten of the fifteen required units must be from subjects 1 to 20, inclusive.
- III. Not more than 5 units may be taken from subjects 21 to 32, and not more than the highest number indicated in any one of these subjects.

TO THE COLLEGE OF ENGINEERING  
ALL SCHOOLS

I. <i>Required</i> :	English .....	3 units
	Mathematics .....	3 units
	Algebra .....	1½ units
	Plane Geometry.....	1 unit
	Solid Geometry.....	½ unit
	History .....	1 unit
	<sup>2</sup> Science .....	2 units
II. <sup>3</sup> <i>Elective</i> .....		6 units
	Total .....	15 units

<sup>1</sup>Students from Nevada presenting 14 or 13 accredited units may be admitted as "limited Freshmen." Nonresidents may not have this classification.

<sup>2</sup>Sciences recommended are Physics and Chemistry.

<sup>3</sup>The electives may be chosen from recognized high school subjects, but in no case may more than 5 units be elected in subjects 22 to 32, inclusive, and not more in any one of these subjects than the highest number which is indicated. It is advised that the electives include 2 units of foreign language, preferably modern language. In certain meritorious cases some entrance credit, not exceeding 1 unit, may be granted for practical experience.

## TO THE COLLEGE OF AGRICULTURE AND THE SCHOOL OF HOME ECONOMICS

I. <i>Required</i> :	English .....	3 units
	Social Science .....	1 or 2 units
	Mathematics .....	2 units
	Natural Science .....	1 or 2 units
II. <i>Elective</i> :	Academic or vocational subjects.....	7 units
	Total .....	15 units

## SUBJECTS ACCREDITED FOR ADMISSION

<sup>1</sup>A unit represents a year's study in any subject in a secondary school, constituting approximately a quarter of a full year's work. Two hours of laboratory work are regarded as the equivalent of one hour of prepared work.

Additional units for subjects listed above or additional subjects will be accepted if approved by the Committee on Admission and Advanced Standing.

#### METHODS OF ADMISSION

The credits required for admission to the undergraduate department, as detailed above, may be secured:

- By examination;
- By certificate from an accredited high school or other secondary school;
- By transfer from any university or college of recognized standing.

#### ADMISSION BY EXAMINATION

Examinations for admission are held at the University immediately preceding the opening of the fall semester. Application for examination should be in the hands of the Committee on Admission and Advanced Standing at least one week in advance. These examinations cover all subjects required or accepted for admission, but cannot be taken for the purpose of raising grades obtained in preparatory schools.

#### ADMISSION BY CERTIFICATE FROM AN ACCREDITED PREPARATORY SCHOOL

On application to the Registrar blank certificates may be obtained by students who wish to enter the University by this method. Students should obtain blanks early and should

have them filled out and sent to the Registrar for approval as soon as possible after the closing of the high school year in June. Applications not received in time for an examination by the Admission Committee prior to the opening day will not be considered until after the regular matriculation days.

Applicants for admission to first-year standing in the College of Arts and Science in the University of Nevada from States of the Union other than Nevada must have a grade above 3<sup>1</sup> in at least 10 of their 15 acceptable high school units.

Applicants for admission to first-year standing in the College of Agriculture or in the Engineering Colleges of the University of Nevada from States of the Union other than Nevada must have (a) for the fall of 1927, a grade above 3 in at least 4 of their 15 acceptable high school units; (b) for the fall of 1928, and thereafter, a grade above 3 in at least 6 of their 15 acceptable high school units. "Special" students from outside Nevada will be received in both the Colleges of Agriculture and of Engineering.

Applicants for regular Freshman standing or for limited Freshman standing who come from Nevada high schools or from Nevada families must, beginning with August, 1927, have presented at least 4 of their high school units with grades above 3, and since August, 1928, such students must present at least 6 high school units with grades above 3.

Applicants, who for any reason have been unable to secure their credentials, may file a petition with the Registrar for temporary admission. Such petition should contain the name and location of the preparatory school, the reason of the absence of credentials, a list of the subjects taken in the preparatory school, and the College of the University which the applicant desires to enter. These petitions will be acted on by the Admission Committee, and meritorious cases will be permitted to register temporarily, pending receipt of credentials.

#### ADMISSION BY TRANSFER

Admission is granted by transfer from any university or college of recognized standing on presentation of the proper credentials, but such credit is provisional until the first year's work is completed.

<sup>1</sup>Grades equivalent to this University's "above 3" in the usual A, B, C, etc., system are grades of B or better, and in the percentage grading system are grades of 80 per cent or better.

Students who are disqualified at other colleges will not be admitted during the semester immediately following their disqualification.

Students transferring from other colleges must present certificates of honorable dismissal unless one or more full semesters have elapsed since they left their other college. In all cases of transferred students, at least one-half of the credits from other institutions accepted for such transferring students must be of grade above 3.

#### ADMISSION OF PERSONS WHO ARE NOT CANDIDATES FOR DEGREES

##### UNCLASSIFIED STUDENTS

An "unclassified" student is one who has satisfied the regular requirements for admission, but who, for reasons satisfactory to the Dean of his college, does not desire to pursue any regular curriculum. He shall present to his Dean a written application for permission to register as an unclassified student, stating why he does not wish to take a regular curriculum, and specifying the courses of instruction he wishes to elect, the prerequisites to which he must already have satisfied. Unless he is over 21 years of age or is self-supporting, his application must bear the approval of his parents or guardian.

Unclassified students are subject to all rules relating to registration and scholarship. By satisfying the requirements in any curriculum for which they have full admission, they may become candidates for degrees.

##### SPECIAL STUDENTS<sup>1</sup>

A special student is one who *cannot* satisfy the requirements for admission to the college in which he wishes to study. Any person who can satisfy such requirements will be permitted to register only as a regular or as an unclassified student.

Special students must be at least 21 years of age. Except upon the specific recommendation of the principals of their high schools, students who in the previous semester were in high schools will not be admitted to special standing. All applicants must present certificates of good character from reliable persons, credentials covering such academic work as

<sup>1</sup>No new special students from outside Nevada will be received in the College of Arts and Science.

they may have done, or other evidence of their ability and disposition to do satisfactory work in the University. Persons who have shown no serious purposes either in school or in employment will be refused admission. Those admitted will usually be expected to register in not fewer than ten hours in courses of elementary character which may be counted for admission. They will be permitted to register in advanced courses only upon the approval of their Dean and the head of the department concerned. They are expected to meet all requirements for regular admission within two years after entering the University. Except by action of the University Faculty, no person will be permitted to register as a special student for more than four semesters.

A special student may obtain status as a regular student by fulfilling any one of the following requirements:

1. College credit may be cancelled at the rate of four college credits for each high school unit necessary to fulfill the requirements of the college in which the student is registered.

2. Examinations may be taken within the first two years of residence at the University in sufficient of the subjects (1-32) listed as accredited for admission to fulfill the requirements of the college in which the student is registered.

3. A special student who has successfully carried the regular prescribed work of his college during four semesters and who has made a grade of 2.5 or better in 50% of his work and has no unremoved conditions or failures will be allowed to matriculate as a regular Sophomore student. If he has made a grade of 2.5 or better in 90% of his work and has no unremoved conditions or failures, he will be allowed to matriculate as a regular Junior student.

For any person who can present satisfactory reasons for such action, the rules relating to the minimum age limit and the minimum number of hours of registration may be waived by vote of the University Faculty.

Special students are subject to all the rules relating to registration and scholarship. By satisfying the requirements for admission to any college they may gain regular standing and become candidates for degrees.

##### PUBLIC SCHOOL TEACHERS

Public School Teachers in actual service in Nevada may

be permitted to enroll in a University course or courses during the University year and without payment of fees other than those required of all who enroll in laboratory courses.

#### WORLD-WAR SERVICE MEN SPECIALS

Any special student who is a World-War veteran and holds an honorable discharge from the United States Army, Navy, or Marine Corps will be permitted to graduate without regard to entrance deficiencies if he meets all the other requirements for a degree; provided, that if such student should fail in any college subject having entrance prerequisites for which he has no credit, these prerequisites must be made up before the student will be permitted to repeat the college subject.

#### VISITORS

With the consent of the President and the instructors concerned, regular visitors may be enrolled as such, during the first three weeks of the term, provided they are above 21 years of age or present credentials of graduation from a standard high school. They shall be governed by the regular University rules and are due, if nonresident, to pay regular fees including tuition. Casual visitors may not have the privilege of attending a class in excess of four times during any given semester except with permission from the President. No official record of these visits need be made. Regularly enrolled students of the University, who are registered for the full number of hours, may be allowed only the privilege of the casual visitor. Under no circumstances will visitors be allowed to do laboratory work, engage in class discussion, take the time of the instructor from regular class-work, or receive credit toward a degree. Any eligible visitor who has been a bona fide resident of Nevada for a year or more is exempt from the payment of any fees.

#### ADMISSION TO ADVANCED STANDING

Students who have graduated from a full four-year high school course and who have also graduated from a one-year professional course in an accredited normal school are allowed one year's credit on advanced standing.

Graduates from a two-year normal school, who are also graduates from a full four-year approved high school course, will be allowed two years' credit on advanced standing, if they have completed all of the prescribed requirements as

outlined under Requirements for Admission to Junior Standing, paragraph 2.

The preceding statements refer to advanced standing granted by the College of Arts and Science and the State Normal School. All other applicants for advanced standing from reputable universities and colleges will receive, upon presentation of their credentials, such credit as the Committee on Admission and Advanced Standing may deem fair. In all doubtful cases the claims will be referred to the heads of the departments. All credit for advanced standing, however, is provisional and subject to revision at the end of the first year following the enrollment of the student. No such student, however, will be granted a Bachelor's Degree or a diploma without at least one full year of work in residence.

High school graduates who have completed more than the full requirements for entrance may be granted college credit by the Advanced Standing Committee, but not after the end of the Sophomore year. No advanced standing will be given for history or natural science, or for the first two years of a foreign language, or for algebra or plane geometry.

A student who desires to take an examination for advanced credit must present to the instructor by whom the examination is to be given a statement from the Registrar certifying that he is eligible to enter the examination.

#### UNIVERSITY RULES GOVERNING REGISTRATION

The following rules govern matters of registration, classification of students, conditions and failures, late registration, absences, hours of registration, withdrawals, transfer of students from one college to another, and honorable dismissal:

##### I. METHOD OF REGISTERING

1. On registration day the student will secure a registration blank from the Registrar's representatives. This card will be filled out by the student in accordance with the directions thereon.

2. In registering, the student will observe carefully the rules governing conditions, failures, maximum number of hours, status, and prerequisites.

3. All students having required courses must give preference to such courses in regular sequence; no required course may be deferred beyond one year.

4. Students under twenty-one years of age are expected to remove entrance deficiencies in their Freshman year. At the close of the second semester of each year the Committee on Admission and Advanced Standing will send to the Registration Committee a list of all Freshmen who have not registered for or who have failed in entrance subjects in which they were deficient. The Registration Committee shall then hold up the registration of such students in their Sophomore year until they register for the subjects in which they are deficient.

5. Any "regular" student who is twenty-one years of age and has carried the regular prescribed work of four semesters with 90% of it in grade 2.5 or better, and who has no unremoved conditions or failures, may have any entrance deficiencies canceled.

6. The signature of the instructor must be obtained for courses in which there are sections.

7. The card must then be approved and signed by the Dean of the College in which the student has registered.

8. After having obtained the Dean's approval, fees will be paid to the Comptroller, who will issue receipts for the same. These receipts must be presented to the Registrar.

9. The registration card shall finally be deposited with the Registrar.

10. Any change of residence occurring after the completion of the student's registration should be reported to the Registrar immediately.

## II. CLASSIFICATION OF STUDENTS

1. Three classes of students, seeking college credit, are recognized—regular, unclassified, and special.

2. A "regular" student is one who has satisfied the requirements for admission to a college and is pursuing a curriculum leading to a diploma or degree.

3. An "unclassified" student is one who has satisfied the requirements for admission to a college, but, for reasons satisfactory to his Dean, is not pursuing a regular curriculum.

4. A "special" student<sup>1</sup> is one who, though unable to satisfy the requirements for admission to the college in which he wishes to study, is permitted to register in courses for which he has satisfactory preparation.

5. For regular Sophomore, Junior, or Senior standing, a

<sup>1</sup>Special students are not admitted from outside Nevada to the College of Arts and Science.

student's deficiencies must not exceed 6 college units from the requirements of his college.

## III. REQUIREMENTS FOR ADMISSION TO JUNIOR STANDING

Only those students who have fulfilled one of the following conditions may register as Juniors:

1. Students who have no entrance deficiencies and who have fulfilled all Freshman requirements and have satisfactorily completed within six units of half the number required for graduation in the course for which they are registered. At least one-third of the units presented must have been carried with grades above 3.

2. Students transferring to the College of Arts and Science, who are graduates of recognized junior colleges or two-year normal schools, requiring at least 60 units for graduation, and who have carried at least one-half of the work with grades above 3. In no case will more than 64 units be accepted from these institutions. Such students will not be required to fulfill the specific entrance Freshman and Sophomore requirements prescribed by the University, but will be expected to fulfill all other requirements for graduation including that of carrying at least one-half of the work done at the University of Nevada with grades above 3.

3. Students transferring to the College of Arts and Science from other colleges or universities of recognized standing who present at least 60 acceptable<sup>1</sup> units, of which 10 units are in each of the following branches: English, a foreign language, social science, and natural science or mathematics. Such students will not be required to fulfill the specific entrance Freshman and Sophomore requirements prescribed by the University but will be expected to fulfill all other requirements for graduation, including that of carrying at least one-half of the work done at the University of Nevada with grades above 3.

## IV. CONDITIONS AND FAILURES

1. Each instructor will determine the final grade of his students by any method he may consider best adapted to his course.

2. Any student who receives a final grade of 5 in any subject shall be considered as "failed" in that subject.

<sup>1</sup>NOTE—The term "acceptable" is intended to mean work of a distinctly college character, one-half of which shall carry grades above 3. Also see Section IX under University Rules Governing Registration.

3. Any student who receives a grade of 4 shall be conditioned. A condition may be removed by satisfying the requirements of the department. A student who desires to remove a term condition must present to the instructor by whom the examination is to be given a statement from the Registrar certifying that he is eligible to enter the examination.

4. A failure in a required subject shall be removed by repeating the subject in class. This must be done as soon as the study is repeated in the University program, and any required subject in which a student has failed takes precedence over all other subjects in the arrangement of his program.

5. If a condition in any course is not removed within the next year of the student's residence after it is incurred, the course must be repeated in class.

6. A student may be dropped from class at any time for negligence or misconduct upon recommendation by the instructor and with the approval of the committee concerned.

7. A student may be placed on probation or suspended from the University at any time his scholarship or conduct warrants such action. Unless a student is passing in two-thirds of his work, he is liable to be placed on probation or to be suspended from the University. Each individual case will be considered by the Committee on Registration and Scholarship.

8. Students who have twice been suspended for unsatisfactory work are not permitted to register again.

9. No student while on scholarship or conduct probation may represent the University in any public contest.

10. By a vote of the Faculty Committee on Registration, the rules stated above may be waived for any student who can show that his unsatisfactory record is due to reasons for which he is not personally responsible.

11. Instructors will report on delinquent students at mid-semester. The time for dropping subjects without failure is at the end of six weeks. A student whose work is of passing grade may drop a subject, without failure, at any time with the consent of his Dean.

#### V. LATE REGISTRATION

1. A fee of \$3, to be increased to \$5 for those registering later than the end of the week including enrollment days, shall be charged for belated registration, and there shall be no exception to this rule.

2. A student who begins to register after the regular registration days shall not be permitted to enroll in the number of hours to which he would otherwise be regularly entitled; for every week or fraction thereof of delay in registering one hour will be deducted.

3. No person will be permitted to register as a student after the close of the third week of either semester. This rule applies also to changes in registration.

4. Each student shall complete his registration by 4 o'clock p. m. of the third day after he begins registration, otherwise he shall pay to the Comptroller 75 cents for each day or fraction of a day thereafter until his registration is completed.

5. After the registration coupon has been filed with the Registrar, a student may add a subject or change a subject in which he is registered in accordance with the regular rules, when he has secured the approval of his Dean and the instructor concerned, upon the payment of a fee of \$1 for each course which he adds. The fee will be omitted when the change is caused by Faculty action or at the request of the Registration Committee.

#### VI. HOURS OF REGISTRATION

1. Including required Military Science and Physical Education, regular students in the College of Engineering shall register for eighteen hours. In the Normal School, in the College of Arts and Science, and in the College of Agriculture, including the School of Home Economics, beginning with the class which was the Freshman class in the fall of 1924, students shall register for fifteen hours in addition to required Military Science and Physical Education.

2. No Freshman during the first semester shall be allowed to enroll in more credits than his regular course requires.

3. Any student may at any time enroll in as low as three credits less than his course requires, but to take less than this amount the student must have the Dean's permission.

4. In case a student during the previous semester<sup>1</sup> receives above 3 in three-fourths of all of his work, and has no 4 or 5, he may enroll in a maximum of three hours above the normal requirement of his course. No other student shall be allowed any extra work.

Two exceptions may be allowed to this rule:

(1) A Senior, who, during the previous semester, carried the allowed three extra hours, received above 3 in three-fourths of his work, received no 4 or 5 in any work, and who needs one to four hours for graduation above that allowed by the rule, may be allowed to register, each semester, in one or two hours above the extra three allowed by the rule.

(2) A Senior, who, during the previous semester, received above 3 in two-thirds of his work, received no 4 or 5 in any work, and who lacks for graduation a few more hours than the rule allows, may be allowed three hours above his regular course. The Registration Committee shall enforce this rule.

5. In case a student failed to pass in some of his work during the previous semester, the Dean may restrict his registration to fewer hours than his course regularly requires.

6. The Registrar shall check up these regulations for each student when he finishes registering.

7. At the beginning of any semester, with the approval of the Deans concerned, a student may change his registration from one college to another. In so transferring, the student shall satisfy the admission requirements of the college to which he transfers, effective at the time he is admitted to the University, and he shall satisfy the course of study of the college to which he transfers,<sup>2</sup> effective at the time the transfer is made, the details of the transfer to be handled by the Committee on Admission and Advanced Standing.

8. Special students must enroll in at least ten hours of work. Exception to this rule can only be made by action of the University Faculty.

#### VII. WITHDRAWALS

1. A student who wishes to withdraw from any course shall first secure from the Registrar a withdrawal slip. He shall

<sup>1</sup>Previous semester, when used to determine the maximum number of hours, shall be construed to mean the last semester in which a student was registered.

<sup>2</sup>Students entering from another school with advanced standing who wish to take extra hours must furnish records to the Registration Committee showing that the work previously done was of grade corresponding to that required of our own students who are eligible for extra hours.

<sup>3</sup>See page 128 for Arts and Science requirements.

take this to the instructor in the course in question for his signature. He will then report to the Dean of his College, who may grant a withdrawal from the class. The withdrawal slip must be filed by the student with the Registrar, who shall notify the instructors concerned. The date of withdrawal shall be the date on which the slip is filed with the Registrar.

2. After the end of the sixth week of the semester a student desiring to withdraw from a course must present to the Dean a written statement from the instructor stating that his work done to date is of passing grade, otherwise the record will be "withdrawal with failure."

3. In courses in which fees are charged no fees will be returned to the student upon withdrawal from class after the end of the third week of any given semester.

#### VIII. TRANSFER OF STUDENTS TO ONE COLLEGE FROM ANOTHER

1. When a student transfers from one college within this University to another, he shall have the same standing in the college to which he transfers as he had in the college from which he transferred, except that he shall satisfy the specific requirements of the college to which he transfers.

#### IX. HONORABLE DISMISSAL

1. Upon the request of a student in good standing, the Registrar will issue a letter of honorable dismissal. If the student desires to enter another university, a copy of his or her university credentials, including entrance, and stating thereon whether or not this University recommends such transferee, will accompany the letter. A fee of \$1 must be paid for each transcript of record furnished to students by the University Registrar.

#### THE GRADING SYSTEM

1. The following grading system became effective in May, 1921:

1	equals 95% to 100%	} (passing)
1.5	equals 90% to 94%	
2	equals 85% to 89%	
2.5	equals 80% to 84%	
3	equals 75% to 79%	
3.5	equals 70% to 74%	} (condition)
4	equals 60% to 69%	
5	equals Below 60%	

2. In determining honors, the average of the figures representing the grades per credit shall be taken.

3. Except when a clerical error has been made, the passing grade of a student may not be changed after the class records have been filed with the Registrar, unless the subject has been repeated in a regular college class.

#### REQUIREMENTS FOR GRADUATION

A candidate for a Bachelor's Degree must pass in all the subjects both prescribed and elective in his chosen course, and he must conform to all directions given in connection with that course in regard to electives.

In order to graduate, a student shall have at least 63 of his credit hours above a grade of 3.

In the College of Arts and Science 126 credits are required for graduation.

In the College of Agriculture 130 credits must be presented by candidates who entered in August of 1924, 1925, and 1926. Candidates entering in August, 1927, and thereafter, will be required to present but 128 credits.

In the School of Home Economics 128 credits are required of entrants of 1924, 1925, and 1926. Beginning with the fall of 1927, and thereafter, 126 credits will be required.

In the College of Engineering 150 credits will be required for graduation of the Class of 1928, 148 of the Class of 1929, 146 of the Class of 1930, 144 of the Class of 1931, and thereafter.

In the State Normal School a candidate must complete the courses of study as laid down.

The value of a *credit* is defined as three hours of work per week for one semester.

#### DEGREES\*

The College of Arts and Science confers upon its graduates the Degree of Bachelor of Arts. Any student, however, who pursues a course in which the natural sciences or mathematics have received particular emphasis may, upon petition to the faculty of the College of Arts and Science, be granted the Degree of Bachelor of Science.

Upon graduates of the College of Engineering are conferred degrees as follows: Graduates of the Mackay School of Mines receive the degree of Bachelor of Science in Mining Engineering, Metallurgical Engineering or Geological Engineering. Graduates of the Schools of Mechanical Engineering, of Electrical Engineering, or of Civil Engineering receive, respectively, the Degree of Bachelor of Science in Mechanical Engineering, Bachelor of Science in Electrical

\*No student may be graduated or be furnished with a transcript of record unless and until all accounts with the University have been fully paid.

Engineering, and Bachelor of Science in Civil Engineering.

Graduates of the College of Agriculture receive the Degree of Bachelor of Science in Agriculture. Graduates from the School of Home Economics receive the Degree of Bachelor of Science in Home Economics.

Combination curricula leading to the Bachelor's Degree in each of two schools or colleges in the University may be arranged. The minimum requirements shall be one extra year in residence and 30 credit hours of extra work. More work may be necessary if the specific requirements of the department in which the degree is sought have not been met.

A charge of \$5 is made for all baccalaureate diplomas. If, however, a student in addition to receiving the baccalaureate degree receives a diploma for a teacher's certificate, the arrangement of the charge is as follows: If two diplomas are granted in any one year, the charge will be \$5 for the first, and \$4 for the second; if three are granted in one year, the charge will be \$5 for the first, and \$4 each for the second and for the third.

#### DIPLOMAS

For information concerning teachers' diplomas, see The School of Education.

#### RESIDENCE REQUIREMENT

If a student is in residence at the University for one year only, that year's work must be done in the college from which the degree is expected. No college faculty in the University will recommend a student for a degree unless he has been a regularly registered student in that college for at least one year. Attendance at the summer session is construed as resident study.

#### THESES

A thesis, if satisfactory, may be offered by each candidate for graduation from any school of the University.

The thesis is intended to give the student an opportunity to make a comparatively independent effort in some chosen field while still under the guidance of some department, and to test his ability for such independent work in a way that cannot be done in connection with ordinary classwork.

It is expected, therefore, that the thesis will show scientific and literary knowledge and good arrangement and presentation of subject.

In order to insure time for the satisfactory preparation of his thesis, the student will elect and pursue thesis work in some department as he would any regular elective course.

The thesis should be typewritten upon 8½x11 paper and bound in a 9x11¼ flexible backed cover. All maps and drawings or other illustrations should be so arranged that they can be bound within the same cover. Two copies of each thesis accepted for graduation must be placed in the library.

The title-page should conform to the style of the following sample title-page:

*The Origin of the English Gilds*

A THESIS

SUBMITTED TO THE FACULTY OF THE COLLEGE OF ARTS AND  
SCIENCE IN CANDIDACY FOR THE DEGREE  
OF BACHELOR OF ARTS  
(Department of History)

By

JOHN EDWARDS SMITH

RENO, NEVADA

1920

GRADUATE COURSES

*Admission*—Graduates of this University or of other colleges or universities of equal rank are admitted to graduate standing in this University without examination. Admission to graduate study should not be understood as implying admission to candidacy.

*Registration*—Students wishing to register should present their credentials to the Committee on Admission and Advanced Standing, and if approved a card of admission will be issued to the applicant. When the student has decided in what department he desires to do his major work, he will confer with the head of that department, who, in consultation with the student, will outline the work to be done. The student will then submit the major and minor courses chosen to the Graduate Committee for approval.

*Fees*—Graduate students pay the same fees as the undergraduates in the various departments of the University.

*Degrees Offered*—The University offers the following advanced degrees in residence: Master of Arts and Master of Science.

*Residence and Candidacy*—The student desiring to become a candidate for an advanced degree should file a petition, approved by his major professor, with the Chairman of the Graduate Committee, stating the graduate work already done, and setting forth the proposed work to be offered in candidacy for the degree. No graduate student is considered a candidate for any advanced degree unless he has been definitely advanced to candidacy by his major professor and the Graduate Committee. At least one semester must elapse between the formal advancement to candidacy for any degree and the conferring of that degree. Actual residence and study, except for graduates of this University, must precede formal advancement. Graduate work done in other universities may be accredited toward an advanced degree at the University of Nevada, but such allowance of credit will not reduce the period of residence. The time of residence for students of this University shall not be less than one semester and for graduates of other universities not less than one year.

*Outside Work*—Work which has been accepted for the Bachelor's Degree may not be used to meet any of the requirements for the Master's Degree. In general one year of the student's full time will be necessary to complete the work for a Master's Degree. Candidates for advanced degrees who do not wish to spend more than one year in residence may be allowed to give only a limited amount of time to instruction, laboratory assistance, or other outside work. The amount and nature of this work must be definitely set forth by the student and officially allowed by the Graduate Committee. Students doing outside work in excess of the equivalent of two or three units per week will require more than one year to complete the work for a Master's Degree.

*Courses of Study*—The courses of study shall represent 30 units of work distributed between a major and at least one minor department not less than one-half of which, nor more than three-fourths, shall be done in one department in the College of Arts and Science, or in one school in the College of Agriculture or the Engineering College. With the permission of the Graduate Committee, however, upon the recommendation of the major department and approval of the University Faculty, less than one-half or more than three-fourths of the work may be done in one department or

school. The major work should be distributed among two or more instructors where this is possible. At least 7 units of graduate work must be done in the minor department. The remainder of the 30 units may be elected by the student from advanced courses in any department of the University. Graduate credit will be given only for courses accepted by the major professor, authorized by the Graduate Committee, and approved by the University Faculty. So far as possible these courses should be listed in the catalogue as available for such credit. Courses numbered below 50 will not be accepted for graduate credit.

A thesis shall constitute a part of the prescribed course of study. It should, ordinarily, represent an equivalent of six to ten units, and shall have the general form prescribed for the Bachelor's thesis, or shall be a reprint of an article appearing in a reputable periodical. It must be presented to the Graduate Committee for their final approval at least two weeks before the date set for the conferring of the degree.

The Master's degree will be conferred only after the candidate has passed an examination in the general field offered for the degree in the major and minor subjects and the thesis. The examiners shall consist of the major professor, the minor professor, and one or two additional professors appointed by the Graduate Committee.

When semester examinations are taken, the grades received will be averaged with the oral examinations and the thesis. An average grade of at least 2 must be attained in all the work offered for the Master's degree, and no credit be allowed for any course where the grade falls below 3.

The Degree of Master of Arts is conferred upon students who have received the Degree of Bachelor of Arts; and the Degree of Master of Science upon those who have received the Degree of Bachelor of Science or the Degree of Bachelor of Arts in science groups. The diploma fee for a Master's degree is \$5.

#### ENGINEERING DEGREES

The engineering degrees—Engineer of Mines (E.M.), Metallurgical Engineer (Met. E.), Mechanical Engineer (M.E.), Civil Engineer (C.E.), and Electrical Engineer (E.E.)—may be conferred upon graduates who have taken corresponding courses in the College of Engineering of the University of Nevada, or upon graduates of other institutions who have obtained the Master of Science degree in

engineering from the University of Nevada; who have been engaged in honorable and successful engineering work in positions of responsibility for a period of at least five years in the case of holders of the B.S. degree, or four years in that of holders of the M.S. degree; and who submit theses showing ability to conduct advanced engineering work. Theses will not be considered when they are merely investigations in literature, compilations of routine laboratory tests, or presentations of the work of others.

The engineering degrees may also be conferred upon graduates of the College of Engineering of the University of Nevada and upon graduates of other engineering colleges of equal standing, who, after graduation, have been engaged for a period of at least one year in honorable and successful engineering work in a position of responsibility, and who subsequently complete successfully one year of graduate work in engineering, including thesis, at the University of Nevada. Graduates of other institutions must include in their graduate work any subjects in the corresponding undergraduate curricula which are required by the College of Engineering of the University of Nevada, but whose equivalents were lacking in their undergraduate courses.

Formal application for an engineering degree must be filed with the Registrar not later than the beginning of the second semester of the year in which the degree is sought, and approved in turn by the Engineering Faculty and the Graduate Committee. The application must be accompanied by detailed and satisfactory evidence as to the extent and character of the applicant's professional work. The thesis shall have the general form prescribed for the Bachelor's thesis, or shall be a reprint of an article appearing in a reputable magazine. In the case of a nonresident applicant, it shall be presented to the Engineering Faculty and to the Graduate Committee at least eight weeks before the date set for conferring the degree. The diploma fee for an engineering degree is \$5.

## THE COLLEGE OF ARTS AND SCIENCE

## THE COLLEGE OF ARTS AND SCIENCE

## FACULTY

- WALTER E. CLARK, Ph.D., LL.D., President of the University.  
 MAXWELL ADAMS, Ph.D., Vice-President of the University; Dean of the College of Arts and Science; Professor of Chemistry.  
 JAMES EDWARD CHURCH, JR., Ph.D., Professor of the Classics.  
 JEANNE ELIZABETH WIER, A.B., LL.D., Professor of History and Political Science.  
 PETER FRANDSEN, A.M., LL.D., Professor of Biology.  
 LEON WILSON HARTMAN, Ph.D., Professor of Physics.  
 CHARLES HASEMAN, Ph.D., Professor of Mathematics and Mechanics.  
 REUBEN CYRIL THOMPSON, A.M., Professor of Philosophy.  
 J CLAUDE JONES, Ph.D., Professor of Geology and Mineralogy.  
 ALBERT ELLSWORTH HILL, A.B., Professor of English.  
 JAMES REED YOUNG, Ph.D., Professor of Psychology.  
 Colonel JOHN PAUL RYAN, Professor Emeritus of Military Science and Tactics.  
 JOHN WILLIAM HALL, A.M., Professor of Education.  
 SARAH LOUISE LEWIS, M.A., Professor of Home Economics.  
 BENJAMIN F. CHAPPELLE, Ph.D., Professor of Modern Languages.  
 GEORGE WALLACE SEARS, Ph.D., Professor of Chemistry.  
 FRED W. TRANER, Ph.D., Professor of Education.  
 PHILIP A. LEHENBAUER, Ph.D., Professor of Biology.  
 FRANCIS CLARK MURGOTTEN, Ph.D., Professor of Modern Languages.  
 THEODORE H. POST, M.A., Professor and Director of Music.  
 JOHN EDWARD MARTIE, M.P.E., Professor of Physical Education for Men.  
 ELSA SAMETH, M.S., Professor of Physical Education for Women.  
 ALFRED LESLIE HIGGINBOTHAM, M.A., Professor of English.  
 Colonel ROBERT M. BRAMBILA, M.A., Professor of Military Science and Tactics.  
 KATHERINE LEWERS, Associate Professor of Freehand Drawing and Art.  
 KATHARINE RIEGELHUTH, A.M., Associate Professor of English.  
 MARGARET ELIZABETH MACK, A.M., Associate Professor of Biology.  
 SILAS CALVIN FEEMSTER, A.M., Associate Professor of History and Political Science.  
 GILBERT BRUCE BLAIR, A.M., Associate Professor of Physics.  
 EDWARD G. SUTHERLAND, A.B., Associate Professor of Economics, Business and Sociology.  
 JESSIE P. POPE, M.A., Associate Professor of Home Economics.  
 CHARLES ROGER HICKS, A.M., Associate Professor of History and Political Science.  
 SIGMUND W. LEIFSON, Ph.D., Associate Professor of Physics.  
 JOHN R. GOTTARDI, M.A., Associate Professor of Modern Languages.  
 PAUL A. HARWOOD, M.A., Associate Professor of English.  
 Mrs. LOUISE KERR SPRINGER, B.S., Assistant Professor of Home Economics.  
 EDITH RUEBSAM, B.A., Assistant Professor of Education.

- CHARLES L. SEARCY, A.M., Assistant Professor of Mathematics.  
 WILLIAM R. BLACKLER, M.S., Assistant Professor of Economics,  
 Business and Sociology.  
 S. ALLEN LOUGH, M.S., Assistant Professor of Chemistry.  
 CHESTER M. SCRANTON, M.A., Assistant Professor of Physical Edu-  
 cation for Men.  
 CHARLES LEROY BROWN, M.A., Assistant Professor of Biology.  
 CLAUDE CARSON SMITH, M.A., Assistant Professor of History.  
 RALPH A. IRWIN, M.S., Assistant Professor of Psychology.  
 MERYL WILLIAM DEMING, Ph.D., Assistant Professor of Chemistry.  
 HAROLD N. BROWN, A.M., Assistant Professor of Education.  
 MAE SIMAS, B.A., Instructor in Physical Education for Women.  
 ROBERT STUART GRIFFIN, B.S., Instructor in English.  
 GRANT H. HUSTIS, Sergeant, U. S. A., Instructor in Military Science  
 and Tactics.  
 MILAN J. WEBSTER, B.A., Instructor in Economics, Business and  
 Sociology.  
 LORETTA ROSE MILLER, B.S., Instructor in Biology.  
 HERBERT B. WILCOX, 1st Lt., U. S. A., Instructor in Military Science  
 and Tactics.  
 ERNEST L. INWOOD, B.A., Instructor in Economics, Business and  
 Sociology.  
 FRANCIS S. OAKBERG, A.B., Instructor in Chemistry.  
 LAWTON B. KLINE, M.A., Instructor in Modern Languages.  
 WILLIAM KELLY COLLONAN, B.A., Fellow in English.  
 BARBARA SCHMITT, B.A., Fellow in English.  
 B. D. BILLINGHURST, LL.B., LL.D., Lecturer in Education.  
 CLYDE D. SOUTER, LL.B., Lecturer in Law.  
 RUTH A. TALBOY, B.S., Lecturer in Vocational Home Economics.  
 ROBERT B. JEPSON, B.S., Lecturer in Education.  
 ALDA LAVENDER RUSSELL, Lecturer in Education.  
 MARY TORNEY RYAN, B.A., Secretary of the College.

#### AIM

The aim of the College of Arts and Science is twofold:

1. To lay a foundation for the professions, both learned and technical, and
2. To increase knowledge in and sympathy with the broader and cultural aspects of life.

#### ADMISSION REQUIREMENTS

For admission requirements, entrance subjects and the number of credits belonging to each, see pages 104-113.

#### REQUIREMENTS FOR A BACCALAUREATE DEGREE IN ARTS AND SCIENCE

In order to be recommended for the Degree of Bachelor of Arts<sup>2</sup> a candidate must, first, have satisfied the requirements

<sup>1</sup>Absent on leave 1931-1932.  
<sup>2</sup>Students who have majored in Mathematics or Science may, on petition to the Faculty, be granted the Degree of Bachelor of Science.

for admission; and, second, have gained credits in prescribed and elective courses aggregating 126 semester units. These units are to be distributed as follows:

#### FRESHMAN AND SOPHOMORE REQUIREMENTS

##### Freshman Year

First Semester	Units	Second Semester	Units
English 1 (Composition and Rhetoric) ..	3	English 2 (Composition and Rhetoric) ..	3
Foreign Language .....	3 or 4	Foreign Language .....	3 or 4
History 1 .....	3	History 2 .....	3
Physics, Chemistry, Biology, or Mathematics .....	3 or 4	Physics, Chemistry, Biology, or Mathematics .....	3 or 4
Military and Physical Education .....	1-2	Hygiene 1 .....	1
Orientation 2 .....	1	Military and Physical Education .....	1-2
Elective .....	2	Elective .....	0-2

##### Sophomore Year

First Semester	Units	Second Semester	Units
English 41 or 44 (Literature) .....	2 or 3	English 42 or 45 (Literature) .....	2 or 3
Foreign Language .....	3	Foreign Language .....	3
Economics, Philosophy or Psychology ..	3	Economics, Philosophy or Psychology ..	3
Natural Science or Mathematics .....	2 to 4	Natural Science or Mathematics .....	2 to 4
Military and Physical Education .....	3-1½	Military and Physical Education .....	3-1½
Elective .....	3 to 5	Elective .....	3 to 5

In case of 4 units entrance in one foreign language, 2 units in each of two, or 3 units in one and 1 in another, one year in college in advanced work in one of these languages will suffice. Otherwise two years in college shall be in the same language.

History 1-2 is required of all Freshmen. However, the History requirement in the Freshman year may, in the case of premedical students, with the consent of the Dean, be deferred until the Sophomore or Junior year.

English 41-42, or 44-45, in the case of premedical students, may be deferred until the Junior year.

In Science a total of 12 units in Freshman and Sophomore work is required, at least 6 of which must be laboratory Science or Mathematics.

The Sophomore requirement in Social Science may be satisfied by six units chosen from the departments of Economics, Philosophy, or Psychology.

A variation of one or two units in the above requirements in Language, Social Science, or Natural Science may be made by the Registration Committee upon recommendation of the Major Professor of the Department concerned.

No subject with the number of 50 or more will be open to Freshmen or Sophomores without the permission of the Dean.

Students transferring to Arts and Science from other institutions and from other colleges in the University of

Nevada must meet the above Freshman and Sophomore requirements.

When students transfer to the College of Arts and Science from other colleges, they will be considered deficient in as many hours in Arts and Science as they are deficient in the college from which they transferred.

No student may transfer from the College of Agriculture or the College of Engineering to the College of Arts and Science unless he be a regular student in the college from which he transfers. Any regular student not eligible for entrance to the College of Arts and Science at the time of his admission to the University may transfer when he has met the following conditions:

1. He shall have attended the University at least two full semesters.
2. He shall have completed more than one-half of the regular course required by his college with a grade above 3.
3. He shall have no conditions or failures at the time of his transfer.

Courses given primarily in other colleges of the University may be taken by Arts and Science students, but not to exceed twenty units of such work shall be counted for Arts and Science Degrees.

#### JUNIOR AND SENIOR REQUIREMENTS

Candidates for a Baccalaureate Degree must select courses in a group of departments consisting of a major and one or two correlated minors, the total aggregating not fewer than thirty hours of work designed primarily for Juniors and Seniors. Subject to the requirement of correlation, the group may be chosen from any department in the College of Arts and Science. The combined work of the two or three departments should represent a unity of aim. The particular grouping, however, will depend upon the particular aim of the student. For example, a student making some one language his major may find it desirable to elect a considerable amount of History. A student planning to study medicine should elect a major in Biology or Chemistry, but may find it desirable to take additional work in Physics. Those intending to study law, should elect a major in Political Science or Economics, but may find it desirable to take advanced work in English. Students taking a Science major will generally find it profitable to have a good reading knowledge of French and German.

The foregoing directions must be regarded as general in nature; any grouping of major and minor subjects showing an intelligent purpose will be approved.

The specific requirements for majors and minors in the different departments will be found in the description of courses of study under their respective heads in the courses of instruction.

It is advisable that students should plan their work for the Junior and Senior years as early as the Sophomore year, in order that the studies then elected may fit in with their later work. At the beginning of the Junior year, each student must give the Dean written notice of his selection of major and minor departments; such selection should bear the approval of the instructors concerned.

Any student after electing his major and minor departments may, with the consent of the department concerned and of the Dean, change his major department or major and minor departments, as the case may be, provided he complies with all the requirements in the case of the new major and minor departments.

The remaining units necessary to make a total of 128 may be freely elected from any department, or, subject to the limit of twenty units named above, from the other colleges of the University.

#### REQUIREMENTS FOR THE DEGREE OF BACHELOR OF SCIENCE IN CHEMISTRY

The following course of study is designed for students looking toward the field of chemistry as a profession. It is intended to fit students to enter directly into industrial work or to prepare them for more advanced study. Certain electives are provided in order to fill the needs of students interested in the different branches of chemistry. These electives, therefore, are subject to the approval of the head of the department, and should be chosen in consultation with him.

<i>Freshman Year</i>			
<i>First Semester</i>	<i>Units</i>	<i>Second Semester</i>	<i>Units</i>
Chemistry 7 .....	4	Chemistry 8 .....	4
English 1 .....	3	English 2 .....	3
Mathematics 9 .....	4	Mathematics 10 .....	4
German 1 .....	3	German 2 .....	3
Orientation 2 .....	1	Hygiene 2 .....	1
Elective .....	1	Elective .....	1
	16		16

## Sophomore Year

First Semester		Second Semester	
Units	Units	Units	Units
Chemistry 9	4	Chemistry 10	4
Physics 1a	3	Physics 2a	3
Physics 1b	1	Physics 2b	1
English 41	2	English 42	2
German 3	3	German 60 or 60a	3
History 1	3	History 2	3
	16		16

## Junior Year

First Semester		Second Semester	
Units	Units	Units	Units
Chemistry 51	4	Chemistry 52	4
Chemistry 71	3	Chemistry 72	3
Chemistry 95	0	Chemistry 96	1
Mathematics 25	3	Mathematics 26	3
Bus. Adm. 41 or Economics 1	3	Psychology 5 or Economics 2	3
Elective	3	Elective	2
	16		16

## Senior Year

First Semester		Second Semester	
Units	Units	Units	Units
Chemistry 81	4	Chemistry 82	4
Chemistry 75	2	Chemistry 92	2
Chemistry 95	0	Chemistry 96	1
Chemistry 99	2	Chemistry 100	2
Elective	8	Elective	7
	16		16

In addition to the above course of study, students will be required to fulfill the regular University requirements in Military and Physical Education.

Students primarily interested in the engineering aspects of chemistry may enroll in the course leading to the degree of Bachelor of Science in Metallurgical Chemistry outlined on page 142 under the announcement of the School of Mines.

## PRELEGAL COURSES

Students who intend to study law will find it advantageous to plan their college work in such a way as to comply with the requirements of the better law schools. Before registering, they should consult with Professor E. G. Sutherland, who is designated advisor for prelegal students. The requirements of the leading law schools usually embrace: (1) Fundamental courses in English; (2) logic; (3) a good general background in the social sciences; and (4) French, Latin or German. The following *recommended course* is based upon the above requirements:

## Freshman Year

First Semester		Second Semester	
Units	Units	Units	Units
English 1	3	English 2	3
French 1 or German 1	3	French 2 or German 2	3
History 1	3	History 2	3
Math. Chemistry, Physics or Biology	3-4	Math. Chemistry, Physics or Biology	3-4
Military and Phys. Ed.	1-2	Hygiene 2	1
Orientation 2	1	Military and Phys. Ed.	1-2
Elective	1	Elective	1

## Sophomore Year

First Semester		Second Semester	
Units	Units	Units	Units
English 41 or 44	2-3	English 42 or 45	2-3
French 3 or German 3	3	French 4 or German 4	3
Economics 1	3	Economics 2	3
Natural Science or Math.	2-4	Natural Science or Math.	2-4
Military and P. E.	1-1½	Military and P. E.	1-1½
Political Science 1	3	Political Science 2	3

For Junior and Senior work is recommended the following: General Psychology, Social Psychology, Logic, Constitutional History, Sociology, and basic courses in Political Science and Economics.

The leading law schools prefer that their students shall have completed four years of college work before entrance. Some, however, admit students upon the completion of three years of college work. The University will confer the degree of Bachelor of Arts upon any student of high rank who, after completing three years of approved work in this University, shall enter a law school of approved standing and shall complete worthily one year's work in such law school. (A student of high rank is one who stands above the average of his class.) In order to receive the degree in this way the student must, at the end of his first year in the law school, present a signed testimonial from the Dean of the Law School to the Dean of the College of Arts and Science, such testimonial to include a statement of courses taken, grades achieved, and a recommendation that the degree be granted.

## PREMEDICAL COURSES

The requirements for admission to Class A medical colleges vary from a minimum of two years of standard college work to the possession of a Bachelor's Degree. Students contemplating studying medicine should communicate early in their undergraduate course with the Dean of the particular medical college they may wish to enter in order to learn the exact entrance requirements at the time they expect to enter. Practically all medical colleges prescribe the same minimum

of subject matter which includes general zoology, vertebrate anatomy, embryology, general inorganic chemistry, qualitative analysis, organic chemistry, general physics, and a reading knowledge of French or German. Quantitative analysis is also required by some and advised by others.

#### PREMEDICAL COURSE

To permit the conclusion of all the premedical requirements and to satisfy the University requirements for the A.B. Degree, the following arrangement of the course of study will be found a desirable one.

##### Freshman Year

First Semester		Second Semester	
Units		Units	
English 1.....	3	English 2.....	3
French or German.....	3	French or German.....	3
General Chemistry.....	3 or 4	General Chemistry.....	3 or 4
Botany 1.....	3 or 4	Zoology 2.....	3 or 4
Military and Physical Education.....	1-2	Hygiene 2.....	1
Orientation 2.....	1	Military and Physical Education.....	1-2
Elective.....	1-2	Elective.....	0-2

##### Sophomore Year

First Semester		Second Semester	
Units		Units	
English 41.....	2	English 42.....	2

Quantitative Analysis or Organic Chemistry.....	5	Quantitative Analysis or Organic Chemistry.....	5
Comparative Anatomy.....	5	Embryology.....	5
Military and Physical Education.....	1-1½	Military and Physical Education.....	1-1½

##### Junior Year

First Semester		Second Semester	
Units		Units	
Psychology or other Social Science.....	3	Psychology or other Social Science.....	3
General Physics.....	4	General Physics.....	4
Chemistry or Biology.....	4	Chemistry or Biology.....	4
History 1.....	3	History 2.....	3
Elective.....	2	Elective.....	2

The University will confer the degree of Bachelor of Arts upon any student of high rank who, after completing three years of approved work in this University, shall enter a medical school rated Class A by the American Medical Association, and shall complete worthily one year's work in such medical school. In order to receive the degree in this way, the student must, at the end of his first year in the medical school, present a signed testimonial from the Dean of the Medical School to the Dean of the College of Arts and Science, such testimonial to include a statement of courses taken, grades achieved, and a recommendation that the degree be granted.

For further advice relative to this work, the student is referred to Professor Frandsen, who is designated adviser of premedical students.

#### PRENURSING COURSE

Beginning with the University year 1923-1924, an affiliation with the Stanford School of Nursing was established similar to that existing within Stanford University. The Prenursing curriculum is designed primarily for those who wish to prepare themselves for administrative, teaching, social service or public health work. It consists of three years' work at the University of Nevada and two years at the Stanford School of Nursing, Lane Hospital, San Francisco, the Degree of Bachelor of Arts being conferred by the University of Nevada and the Degree of Graduate Nurse by the Stanford School of Nursing at the end of five years. The completion of 98 semester units with 50 per cent of the grades above a 3 are necessary before the student may enter the School of Nursing. The following course is advised for those who wish to satisfy these requirements:

##### Freshman Year

First Semester		Second Semester	
Units		Units	
Botany 1.....	4	Zoology 2.....	4
English 1.....	3	English 2.....	3
History 1.....	3	History 2.....	3
German or French.....	3	German or French.....	3
Physical Education.....	1	Hygiene 2.....	1
Orientation 2.....	1	Physical Education.....	1
Elective.....	1	Elective.....	1

##### Sophomore Year

First Semester		Second Semester	
Units		Units	
Physiology (Hygiene 7).....	3	Physiology (Hygiene 8).....	3
English 41.....	2	English 42.....	2
Economics 1.....	3	Economics 2.....	3
French or German.....	3	French or German.....	3
Chemistry 5.....	3	Chemistry 6.....	3
Physical Education.....	1	Physical Education.....	1
Elective.....	2	Elective.....	2

##### Junior Year

First Semester		Second Semester	
Units		Units	
Zoology 9.....	4	Zoology 64.....	4
Bacteriology 51.....	4	Zoology 66.....	4
Elective.....	8	Elective.....	8

The fourth and fifth years consist of a course of instruction in Nursing, Theory and Practice in Lane and Stanford University Hospitals, in residence at Stanford School of Nursing.

#### TEACHERS' DIPLOMAS

For the requirements for a Teacher's Diploma see School of Education pages 140-141.

#### THE MASTER'S DEGREE IN ARTS AND SCIENCE

For requirements for the Master's Degree, see pages 122-125.

THE SCHOOL OF EDUCATION AND THE NEVADA  
STATE NORMAL SCHOOL

FACULTY

WALTER E. CLARK, Ph.D., LL.D., President of the University.

MABEL FLOURNOY, Second Grade.  
MARGARET HINCH, Sixth Grade.  
RUBEL HANSEN, Second Grade.  
ALICE LUNSFORD, Second Grade.  
EDITH PEDDICORD, Fifth Grade.

The Nevada State Normal School was established as an integral part of the University of Nevada by an Act of the Legislature approved February 7, 1887. The first session was in the academic year 1887-1888. In the fall of 1920 it took up its work in the finely equipped new Education Building. The connection of the Normal School with the other departments of the University gives it certain advantages. Its students enjoy the same rights and privileges as those enrolled in any other school or college of the University. Their association with those students who are pursuing four-year courses gives them greater breadth of view and higher

academic ideals. Its students and graduates, if they satisfy the requirements for admission to any other school or college of the University, may become candidates for the University degrees. Subject only to the provision that they meet the specific requirements of the college which they enter, they are given full credit in all of the Colleges of the University for the work they have done in the Normal School.

## AIM

The aim of the Normal School is to give adequate preparation and training to those students of the University who wish to teach in the public schools of the State. To achieve this purpose, thoroughgoing courses in the theory and practice of teaching and in academic subjects are offered for those who are preparing to teach in the elementary schools. The School of Education will recommend no student or graduate for any teaching position who is seriously deficient in the subject matter to be taught.

## ADMISSION REQUIREMENTS

For admission requirements, entrance subjects, and the number of units belonging to each, see pages 104-113.

## TEACHERS' ELEMENTARY CERTIFICATE

## FIRST-GRADE CERTIFICATES

Students who satisfy the admission requirements and complete both years of the curriculum outlined following will be granted diplomas entitling them to first-grade elementary certificates from the State Board of Education. These give the holders the right to teach, without examination, for five years in any of the elementary schools of the State. On evidence of successful teaching for not less than forty-five months, the State Board of Education will grant the holders first-grade elementary certificates valid for life.

## SECOND-GRADE CERTIFICATES

Students who, for financial or other reasons, cannot continue their studies for two years, may, upon satisfying the requirements for admission, and completing one year of the two-year course, be granted second-grade elementary certificates by the State Board of Education. These give the holders the right to teach, without examination, for three years in any of the elementary schools of the State. At

the expiration of the time for which they are valid, these certificates cannot be renewed. If holders wish to continue teaching, they must either complete the requirements of the two-year course of study, or pass the State examination for a first-grade certificate.

Graduates of the Nevada County Normal Training Schools are admitted to the second year of the course, and can ordinarily complete their work in one year.

## SCHOOL OF EDUCATION

The School of Education is included as a division of the College of Arts and Science, but with its own Dean, and direct affiliations with the other colleges in cooperative work in the training of teachers. It offers a liberal and professional course of study of four years to prospective secondary-school teachers and to those students looking forward to supervisory and administrative positions in the schools of

Nevada. At the end of this time successful candidates are granted a Bachelor's Degree and a teacher's diploma, the latter giving title to a teacher's first-grade high school certificate. On evidence later of at least forty-five months of successful teaching, this certificate is exchangeable by the State Board of Education for a life diploma.

## THE HIGH SCHOOL TEACHER'S CERTIFICATE

The high school teacher's certificate is granted by the State Board of Education to any graduate of the four-year course who has met the requirements. This requirement consists of the following prescribed courses:

In the regular academic departments 18 hours of professional work are required, distributed as follows: Psychology 5 (3 hours) prerequisite; Psychology 6 (3 hours), Education 60 (3 hours), Education 63 (1 hour), Education 66 (2 hours) elective; Education 71 (3 hours), Education 75 (2 hours), Education 76 (2 hours), Education 82 (2 hours).

NOTICE—Unless candidates have a major or a minor in at least two high school subjects they will have great difficulty in making satisfactory arrangements for Supervised Teaching and in securing a high school position.

For teachers of the following subjects, special certificates are required: Art, Commercial Subjects, Home Economics, Languages, Manual Training, Music, and other vocational subjects.

In addition to the work in Education:

Graduation from the School of Home Economics is necessary for the teacher's certificate in Home Economics;

Graduation from the College of Agriculture is necessary for the teacher's certificate in Agriculture.

At least a minor in any of the other special subjects is necessary for a teacher's certificate in that subject, except Commercial subjects, for which the academic requirement follows:

(1) Eighteen credits in the department, namely, Economics 1-2, Business Administration 43-44, and Business Administration 68, and additional three units chosen according to the needs of the student. Business Administration 53-54 and Business Administration 41-42 are recommended.

(2) Proficiency in stenography and typewriting, to be secured outside the University and before the end of the Junior year. Students should consult the instructor in

Business Administration about this requirement at some time during their Sophomore year.

#### SUPERVISED TEACHING

Arrangements have been made with the Reno and Sparks public schools whereby prospective teachers may have adequate teaching under normal conditions. Teachers in the public schools and the School of Education will cooperate in the supervision of this work.

#### IMPORTANT

All candidates for the high-school teacher's diploma should confer with the Dean of the School of Education at the beginning of the Sophomore year, as it is highly desirable that they begin their professional studies at that time. Failure to do this will limit the opportunity for choice in the advanced academic courses.

#### CALIFORNIA CERTIFICATION

*Elementary*—Among other things "the completion of a minimum of 24 semester hours of work approved by the Department of Education in the institution concerned, as affording adequate preparation for teaching statutory school subjects, including not less than 8 semester hours of directed teaching."

### THE COLLEGE OF ENGINEERING

1. THE MACKAY SCHOOL OF MINES
2. THE SCHOOL OF MECHANICAL ENGINEERING
3. THE SCHOOL OF ELECTRICAL ENGINEERING
4. THE SCHOOL OF CIVIL ENGINEERING
5. THE ENGINEERING EXPERIMENT STATION

## THE COLLEGE OF ENGINEERING

## FACULTY

- WALTER E. CLARK, Ph.D., LL.D., President of the University.  
 MAXWELL ADAMS, Ph.D., Vice-President and Professor of Chemistry.  
 FREDERICK H. SIBLEY, M.E., Dean of the College of Engineering;  
 Professor of Mechanical Engineering.  
 JOHN ALLEN FULTON, E.M., Director Mackay School of Mines and  
 Professor of Mining.  
 PETER FRANSEN, A.M., LL.D., Professor of Biology.  
 HORACE PRENTISS BOARDMAN, C.E., Professor of Civil Engineering.  
 LEON WILSON HARTMAN, Ph.D., Professor of Physics.  
 CHARLES HASEMAN, Ph.D., Professor of Mathematics and Mechanics.  
 J CLAUDE JONES, Ph.D., Professor of Geology and Mineralogy.  
 WALTER S. PALMER, E.M., Professor of Metallurgy.  
 ALBERT ELLSWORTH HILL, A.B., Professor of English.  
 Colonel JOHN PAUL RYAN, Professor Emeritus of Military Science  
 and Tactics.  
 STANLEY G. PALMER, M.E., Professor of Electrical Engineering.  
 GEORGE WALLACE SEARS, Ph.D., Professor of Chemistry.  
 FREDERICK L. BIXBY, C.E., Professor of Civil Engineering.  
 JAY ARNOLD CARPENTER, E.M., Professor of Mining.  
 JOHN EDWARD MARTIE, M.P.E., Professor of Physical Education for  
 Men.  
 ALFRED LESLIE HIGGINBOTHAM, M.A., Professor of English.  
 Colonel ROBERT M. BRAMBILA, M.A., Professor of Military Science  
 and Tactics.  
 KATHERINE LEWERS, Associate Professor of Freehand Drawing.  
 KATHARINE RIEGELHUTH, A.M., Associate Professor of English.  
 GILBERT BRUCE BLAIR, A.M., Associate Professor of Physics.  
 SILAS CALVIN FEEMSTER, A.M., Associate Professor of History and  
 Political Science.  
 EDWARD G. SUTHERLAND, A.B., Associate Professor of Economics,  
 Business and Sociology.  
 SIGMUND W. LEIFSON, Ph.D., Associate Professor of Physics.  
 VINCENT P. GIANELLA, M.S., Associate Professor of Geology and  
 Mineralogy.  
 PAUL A. HARWOOD, M.A., Associate Professor of English.  
 CHARLES L. SEARCY, M.A., Assistant Professor of Mathematics.  
 WILLIAM R. BLACKLER, M.S., Assistant Professor of Economics, Busi-  
 ness and Sociology.  
 WILLIAM I. SMYTH, E.M., Assistant Professor of Metallurgy.  
 S. ALLAN LOUGH, M.S., Assistant Professor of Chemistry.  
 CHESTER M. SCRANTON, M.A., Assistant Professor of Physical Edu-  
 cation for Men.  
 MERYL WILLIAM DEMING, Ph.D., Assistant Professor of Chemistry.  
 OSCAR T. ROCKLUND, Instructor in Shop Practice.  
 BERTRAND F. COUCH, Instructor in Mine Accounting.  
 ROBERT STUART GRIFFIN, B.S., Instructor in English.  
 GRANT H. HUSTIS, Sgt., U. S. A., Instructor in Military Science and  
 Tactics.  
 WAYNE W. BUERER, B.S., Instructor in Mechanical Engineering.

 WILLIAM R. BLACKLER, M.S., Assistant Professor of Economics, Business and Sociology.  
 CHESTER M. SCRANTON, M.A., Assistant Professor of Physical Education for Men.  
 CHARLES LeROY BROWN, M.A., Assistant Professor of Biology.  
 MERYL WILLIAM DEMING, Ph.D., Assistant Professor of Chemistry.  
 OSCAR T. ROCKLUND, Instructor in Shop Practice.  
 MAE SIMAS, B.A., Instructor in Physical Education for Women.

- ROBERT STUART GRIFFIN, B.S., Instructor in English.  
 GRANT H. HUSTIS, Sgt., U. S. A., Instructor in Military Science and Tactics.  
 MILAN J. WEBSTER, B.A., Instructor in Economics, Business and Sociology.  
 LORETTA ROSE MILLER, B.S., Instructor in Biology.  
 HERBERT B. WILCOX, 1st Lt., U. S. A., Instructor in Military Science and Tactics.  
 ERNEST L. INWOOD, B.A., Instructor in Economics, Business and Sociology.  
 FRANCIS S. OAKBERG, A.B., Instructor in Chemistry.  
 MARGARET REGAN, Secretary to the Dean.

## AIM

The aim of the School of Agriculture is to give such training in farming, gardening, and stock raising, and in the sciences and other related subjects as will furnish a well-rounded education.

## EQUIPMENT

AGRICULTURAL BUILDING—For description of Agricultural Building, see p. 37.

UNIVERSITY FARM—The University Farm, comprising 213 acres formerly owned by the D. C. Wheeler Company, Incorporated, is located three miles south of Reno along the Virginia road.

DAIRY—The laboratory in the Agricultural Building, equipped with up-to-date machinery and apparatus, furnishes the best opportunity for instruction in methods of handling milk and dairy products, as milk testing, butter making, cheese manufacture, and the marketing of milk.

EXPERIMENT STATION FARM—This is a farm of sixty acres lying east of the Campus and devoted to research projects of the University Agricultural Experiment Station.

SHOPS—The shops for teaching of wood-work and blacksmithing are equipped for the best of work. Arrangements have been made for the housing and use of the representative types of farm machinery used in the various field operations.

## ADMISSION REQUIREMENTS

For admission requirements, entrance subjects, and the number of credits belonging to each, see pages 100-109.

## REQUIREMENTS FOR A BACCALAUREATE DEGREE IN AGRICULTURE

The Degree of Bachelor of Science in Agriculture will be conferred upon students who satisfactorily complete the full

course of study in the School of Agriculture, aggregating 128 semester units.

### SCHOOL OF HOME ECONOMICS

#### REQUIREMENTS FOR A BACCALAUREATE DEGREE IN HOME ECONOMICS

The degree of Bachelor of Science in Home Economics is conferred upon students who have satisfactorily completed the full course of study aggregating 128 semester units (including 3 units in Physical Education and 1 unit in Hygiene in the Freshman and Sophomore years) in the School of Home Economics as given on the following pages.

#### AIM

The aim of the School of Home Economics is to raise the ideals of home-making, to prepare young women for the successful management of a home, and to impart to them scientific and technical knowledge, coupled with sufficient practice to fit them to become, either thoughtful home-makers, teachers of home economics, or workers in any field where this knowledge is needed.

Experience in actual home-making, either as a daughter working in the family or as a manager of a house, is a great

aid to the successful work of the Home Economics course. Home problems are required after completing beginning courses in Home Economics to give students this experience.

#### EQUIPMENT

The Department of Home Economics has six large rooms and two offices in the Agricultural Building. For detailed description, see Agricultural Building and Laboratories.

The library of the Home Economics Department, covering dietetics, household sciences, house decoration, and textiles, is kept in the main University Library Building. Special fashion magazines are on a reference table in the sewing laboratory.

#### RECOMMENDED ELECTIVES

*Group I—Related Subjects:*

Zoology 2, Bacteriology 51, History 53, English 25-26, Latin 41 (Greek Art), and Latin 42 (Roman to Modern Art), Philosophy 7, 8, 61, 62, Business Administration 41, 65, Sociology 71-72; Art 3-4, 51-52.

*Group II—Home Economics Electives:*

Home Economics 33, 34, 42, 45, 49-50, 52, 54, 67, 68, 85, 92, 95; Vocational Education 88.

*Group III—For a Minor in Education, Electives Should Be Chosen as follows:*

Sophomore year, second semester, Psychology, 10; Junior year, first semester, Education 63; second semester, Education 60; Senior year, first semester, Education 71, 75; second semester, Education 76, Vocational Education 88.

*Group IV—For Student Dietitians, Electives Should Be Chosen from the following:*

Bacteriology 51; Chemistry 9 instead of Chemistry 26, and Chemistry 51, 52, 67; Sociology 71 and 72; Business Administration 65; Home Economics 42.

## COURSES OF INSTRUCTION

## COURSES OF INSTRUCTION

On the following pages, listed under their respective headings, are given all the courses in which instruction is offered by the University. These are arranged in alphabetical order, as in the table below. If all the instruction given by a department is intended for a particular College, this fact is indicated by the name of the College below the name of the Department. If certain courses offered by a Department are intended for a particular College, this fact is indicated by the name of the College following the number of the course. In all cases where no limitations of this character are found, it may be assumed that, so far as the curricula and regulations of the several colleges permit election, the instruction offered is open to all qualified students of the University.

The numbers prefixed to the courses ordinarily denote the classes of students for whom the work is intended, courses numbered from 1 to 50 being designated primarily for Freshmen and Sophomores, 51 to 100 for Juniors and Seniors, and 101 to 200 for graduate students.

## COURSE OFFERINGS

Agronomy	Geology
Animal Husbandry	History and Political Science
Animal Hygiene	Home Economics
Art	Mathematics
Biology	Mechanic Arts
Bacteriology	Mechanical Engineering
Botany	Metallurgy
Horticulture	Military Science and Tactics
Hygiene	Mineralogy
Nature Study	Mining
Zoology	Modern Languages
Business (See Economics, Business, and Sociology)	Arabic
Chemistry	French
Civil Engineering	German
Classics	Italian
Greek	Portuguese
Latin	Spanish
Dairy	Music
Drawing (See Mechanical Engineering)	Philosophy
Economics, Business, and Sociology	Physical Education
Education	Men
Vocational Education	Women
Agriculture and Home Economics	Physics
Courses Primarily for Teachers	Political Science (See History and Political Science)
Electrical Engineering	Poultry Husbandry
English Language and Literature	Psychology
General Engineering	Sociology (See Economics, Business, and Sociology)

## AGRONOMY

College of Agriculture

PROFESSOR STEWART, HEAD OF DEPARTMENT

1. ELEMENTARY AGRICULTURE. Introduction to general agriculture. The soil—its formation, texture, plant food requirements, moisture, tillage, and fertility; the plant—its relation to soil and climate, its propagation, growth, and cultivation, and the kinds of crops and their culture. *Second semester. Lectures, three hours; laboratory, one period. Four credits.* Stewart. Fee, \$3.

4. FIELD CROPS. An advanced study of the principal cereal crops—corn, wheat, oats, barley, rye, rice, sorghum, etc. *First semester. Lectures, three hours. Three credits.* Stewart.

6. SOIL MANAGEMENT. A general lecture and laboratory course in geology of soils, origin, formation, physical composition, soil moisture, moisture movements and conservation, physical processes, surface tension, osmosis, capillarity, aeration and temperature. Influence of washing, drainage, and irrigation. Laboratory—comparison of the physical properties of different soil types as—specific gravity, water retention, capillarity, organic matter, alkalies, etc. Effect of mulches; soil sampling; mechanical analysis. *First semester. Lectures, three hours; laboratory, one period. Four credits.* Stewart. Fee, \$3.

53. FORAGE CROPS. Legumes and grasses, the special use of these crops as hay, soiling, silage, pasture, green manure, cover crops, etc.; the care and management of pastures; plans for the rotation of soiling crops; adaptation of grasses and other crops for growing under different climatic and soil conditions. *Second semester. Lectures, three hours. Three credits.* Stewart.

57. FARM MANAGEMENT. The evolution of farming; the relation of capital and labor to farm management; the general management of implements and equipment; ownership versus rental of land; the choice of a farm; systems of farming; farming compared with other lines of business; marketing problems; advertising; farm records and farm accounts; the management of fields, crops, and manures. *Adams: Farm Management. Second semester. Lectures, three hours. Three credits.* Stewart.

58. IRRIGATION AND DRAINAGE. A study of the principles of irrigation as follows: Sources of water supply; measurement of water; water requirements of crops; duty of water; losses in use of irrigation water; preparation of land and methods of irrigation; farm ditches and structures; drainage of farm lands and reclamation of alkali lands. *Second semester. Lectures, three hours. Three credits.* Stewart.

62. SOIL FERTILITY. Composition and value of fertilizers, barn-yard and green manures; maintenance and improvement of fertility; effect of various crops and different systems of farming on the fertility of the soil. Studies of crop rotation and fertility. Study of the productivity, best uses of Nevada soils and their improvement. *Prerequisite: Agronomy 6. Second semester. Lectures, two hours. Two credits.* Stewart.

64. PRINCIPLES OF EXTENSION WORK. This course is designed to acquaint students with the operation of the Agricultural Extension Service of the United States Department of Agriculture and agricultural colleges and relationships of different Bureaus of the United States Department of Agriculture to the Extension Service and agriculture of Nevada.

A history of the development of the land grant colleges and agricultural extension work will be given, and particular emphasis placed on the organization of this work in Nevada. *Second semester. Lectures, two periods. Two credits.* Buckman.

71. GENERAL FARM MECHANICS. A full line of farm machinery in use at the University Farm offers facilities for a full course of instruction and practice in the machinery and equipment of the farm, including concrete mixing and forms for concrete; construction and use of modern field machinery for tillage, seeding and harvesting; general labor saving machinery for the farm; farm pumps, windmills, pressure systems and gasoline engines. *First semester. Lecture, one hour; laboratory, two periods. Three credits.* Fee, \$1.

72. FARM STRUCTURES. A course in the methods of construction and designs of ordinary farm buildings, including houses, barns, sheds, granaries, silos, etc. Various small farm implements and appliances as road drags, levelers, irrigation boxes and forms for concrete work will be designed

and built. Field trips will be taken to observe buildings under construction; sketches and complete cost estimates will be made of these buildings. Principles of rural sanitation including heating, lighting, water supply, and sewage disposal. *First semester. Laboratory, two periods. Two credits.* Fee, \$1.

76. HISTORY OF AGRICULTURE. A review of the history of organized agriculture together with a consideration of the various agrarian movements, their causes and effect. Review of the history of reclamation, of irrigation institutions, economics, water rights, etc. *Either semester. Three credits.* Stewart.

157. ADVANCED FARM MANAGEMENT. A course for graduate students consisting of assigned special problems in farm management. *Either semester. Three to five credits.* Stewart.

200. THESIS COURSE IN AGRONOMY. *Either semester. Credit to be arranged.* Stewart.

#### ANIMAL HUSBANDRY

College of Agriculture

PROFESSOR WILSON, HEAD OF DEPARTMENT

1. BREEDS OF LIVE STOCK. The origin, development, characteristics, and uses of types and breeds of farm animals. For illustration, the animals owned by the department and other stock farms in the vicinity will be used, also lantern slides of typical animals of the various types and breeds. *Plumb: Types and Breeds of Farm Animals. First semester. Three credits.* 105 Agricultural Building. Wilson.

4. LIVESTOCK JUDGING. Practice in judging live stock to gain familiarity with the points of excellence in the various breeds of farm animals. *Plumb: Judging Farm Animals. Prerequisite: Animal Husbandry 1. First semester. Lectures, two hours; laboratory, two periods. Four credits.* 105 Agricultural Building, and University Farm. Wilson. Fee, \$3.

30. LIVESTOCK FEEDING. The principles underlying and problems connected with the feeding of farm animals. *Henry and Morrison: Feeds and Feeding. Savage and Morrison: Manual. Prerequisite: Animal Husbandry 1 and 4, Chemistry, 5, 6. Second semester. Lectures, three hours. Three credits.* 105 Agricultural Building. Wilson.

51. GENETICS. A discussion of the principles underlying the science of breeding, the aim of which is to develop, maintain, and improve the various types and breeds of farm animals and farm crops, studied with special reference to their application to breeding of farm animals. *Winters: Animal Breeding. Prerequisite: Zoology 2. Second semester. Lectures, three hours. Three credits.* 105 Agricultural Building. Wilson.

54. LIVESTOCK REGISTRATION. The details of registering pure bred animals, requiring the use of blanks for making application for registry; the use of herd books. A study of the history of the recognized registry associations and the rules governing them; a study of the value of pedigrees and how to keep the herd records. *Prerequisite: Animal Husbandry 1 and 4. First semester. One credit.* 105 Agricultural Building. Wilson.

55. ADVANCED LIVESTOCK FEEDING. *Prerequisite: Animal Husbandry 30. First semester. Lectures, three hours. Three credits.* 105 Agricultural Building. Wilson.

56. ADVANCED STOCK JUDGING. Comparative scoring and judging. The judging of animals in classes, as at fairs and stock shows. *Prerequisite: Animal Husbandry 4. First semester. Three credits.* 105 Agricultural Building. Wilson. Fee, \$3.

57. LIVESTOCK MANAGEMENT. A study of the problems confronting the livestock farmer; calculating profits under various conditions; systematic keeping of records of farming operations; selection of animals for the feed yard, show ring, market, and butcher. *Prerequisite: Animal Husbandry 1, 4, 30. Second semester. Three credits.* 105 Agricultural Building. Wilson.

58. RANGE MANAGEMENT. Lectures covering the following subjects in Animal Husbandry: Development and proper distribution of stock salting grounds; rotation and proper location of drift fences; estimation of carrying capacity; methods of mapping in range lands; range destroying rodents; grazing administration within the National forests; various systems of handling range lands within the United States and foreign countries; general range problems. *Prerequisite: Animal Husbandry 1, 4, 30; Botany 1, 52. Second semester. Two credits.* Course must be taken simultaneously with Botany 58. Given in alternate years. To be given in

1930. Room 105, Agricultural Building. Wilson and Lehenbauer.

59. PROFESSIONAL JUDGING. *First semester. Laboratory, one period. One credit.* Wilson. Fee, \$1.50.

Ed. 86. TEACHER TRAINING IN AGRICULTURE. *See Education.*

#### ANIMAL HYGIENE

College of Agriculture

ASSISTANT PROFESSOR VAWTER

50. ANIMAL HYGIENE. A lecture course covering the principles of livestock sanitation and first aid. *Prerequisite: Zoology 51 and Bacteriology 51. Second semester. Three credits.* Agricultural Building. Vawter.

#### ART

ASSOCIATE PROFESSOR LEWERS, HEAD OF DEPARTMENT

Requirements for a minor in Art; Art 1-2 (2 units), 3-4 (2 units), 51-52 (3 units), and 53-54 (3 units), and additional Junior-Senior work to make 18 units.

Requirements for a major in Art: Art 1-2 (2 units), 3-4 (2 units), 51-52 (6 units), and 53-54 (6 units), and additional Junior-Senior work to make 24 units.

Requirements for a special art teacher's certificate are listed elsewhere.

1-2. ELEMENTARY ART. The fundamental principles of form, color, and light and shade. Application of principles in drawing and painting in all mediums, pencil, charcoal, oil color, water color, and pastel. Drawing and painting from nature in landscape and still life. Fundamental principles of design. Applied design in manual arts. *Both semesters. One credit required each semester.* More credits may be elected. Education Building. Lewers.

3-4. INTERMEDIATE ART. A continuation of the work of Art 1-2, with addition of clay modeling, drawing, and painting from life. *Both semesters. Credits to be arranged.* Education Building. Lewers.

5-6. ART APPLIED TO THE HOME. (School of Home Economics.) The fundamental principles of form, color, and light and shade. Color and form studied from nature in landscape and still life. Color and line harmony as applied to dress, millinery, and house furnishing. Fundamental principles of design. Original designing and its application in all ways relating to the home. *Two credits required each semester.* Education Building. Lewers.

7-8. TEACHERS' COURSE. A continuation of the first year's course (Art 1-2) in all branches and its application to each grade in public school work. *Second semester. One credit.* Education Building. Lewers.

51-52. ADVANCED ART. The continuation of Art 3-4 in more advanced work. *Both semesters.* Education Building. Lewers.

53-54. ADVANCED ART. Continuation of Art 51-52 in more advanced work. *Both semesters. Credits to be arranged.* Education Building. Lewers.

For the history of Art, see Latin 41, 42, 43 and 44.

### BIOLOGY

PROFESSOR FRANDSEN, HEAD OF DEPARTMENT  
PROFESSOR LEHENBAUER  
ASSOCIATE PROFESSOR MACK  
ASSISTANT PROFESSOR BROWN  
MISS MILLER

The Department of Biology includes the following divisions: Bacteriology, Botany, Horticulture, Hygiene, Nature Study, and Zoology.

#### Bacteriology

51. GENERAL BACTERIOLOGY. A course of lectures and laboratory exercises on the morphology and life processes of the bacteria, with some references to allied organisms. The relationship of microorganisms to soil fertility, dairy products, water purity, sewage, and the production of disease will be considered. *Prerequisite:* Zoology 2, Botany 2, or Hygiene 7-8. *First semester. Lectures, two hours; laboratory, two periods. Four credits.* 212 Agricultural Building. Frandsen. Fee, \$5.

52-53. SPECIAL BACTERIOLOGY. *Two to four credits.* Given in alternate years for four or more students. 212 Agricultural Building. Frandsen. Fee, \$5.

#### Botany

Requirements for a minor in Botany: Botany 1 and 2, Zoology 2 and six hours of Junior-Senior work.

Requirements for a major in Botany: Botany 1 and 2, Zoology 2 and twelve hours of Junior-Senior work.

Students in the College of Agriculture are advised to take Botany 1, 52, 55, 61, and 64.

Students intending to take up Forestry should take Botany 1, 21, 52, 55, and 64.

1. MORPHOLOGY AND PHYSIOLOGY OF THE FLOWERING PLANTS. A study of the principles of botany. The laboratory work consists in the study of the structure, physiology, and adaptations of plants. For students who have not presented laboratory entrance Botany. *Both semesters. Two lectures; two laboratory periods. Four credits.* 109 and 103 Agricultural Building. Lehenbauer and Miller. Fee, \$4.

2. MORPHOLOGY AND PHYSIOLOGY OF THE NONFLOWERING PLANTS. A study of representative types of algæ, liverworts, fungi, mosses, ferns, and gymnosperms. The evolution of the plant kingdom. *Both semesters. Two lectures; two laboratory periods. Four credits.* 109 and 103 Agricultural Building. Lehenbauer and Miller. Fee, \$4.

3. GENERAL BOTANY. (For students in the School of Home Economics.) A study of the structure and physiology of the higher plants and of selected types of the lower plants, such as bacteria, molds, mushrooms, and yeast. *First semester. Two lectures; one laboratory period. Three credits.* 103 Agricultural Building. Lehenbauer and Miller. Fee, \$2.

5. BOTANY. For students who have presented one year of Botany with laboratory for matriculation. Content of course same as Botany 1. *One lecture; two laboratory periods. Three credits.* 109 and 103 Agricultural Building. Lehenbauer and Miller. Fee, \$4.

21. ECOLOGY. The geographical distribution of plants and plant structure in relation to environment. *Prerequisite:* Botany 1. *First semester. Two lectures. Assigned readings and reports on field trips. Two credits.* 109 Agricultural Building. Lehenbauer.

52. TAXONOMY. A systematic and comparative study of the principal families of flowering plants represented in the local flora with special reference to their field recognition Characters. *Prerequisite:* Botany 1. *Second semester. Three lectures. Three credits.* 103 Agricultural Building. Lehenbauer.

55. PLANT PHYSIOLOGY. A more advanced study of plant nutrition, photosynthesis, transpiration and the environmental factors as they affect plant growth. *First semester. Two lectures; two laboratory periods. Four credits.* Alternates with Botany 61. 209 Agricultural Building. Lehenbauer. Fee, \$3.

58. **BOTANY OF THE RANGE.** A study of the plants of the range, their distribution, requirements, methods of reproduction and limiting factors. Poisonous plants, their identification and distribution. This course must be taken simultaneously with Animal Husbandry 58. *Prerequisite:* Botany 1 and 52; Animal Husbandry 1, 4, 30. *Second semester. Two credits.* Given in alternate years. To be given in 1930. Room 9, Agricultural Building. Lehenbauer and Wilson.

64. **PLANT PATHOLOGY.** A study of the important diseases of economic plants, their causes, identification, and control. *Second semester. Two lectures; one laboratory period. Three credits.* Alternates with Horticulture 2. 209 Agricultural Building. Lehenbauer. Fee, \$5.

91-92. **ADVANCED BOTANY.** Special problems in some field of botany, physiology, pathology, histology, or taxonomy. Laboratory, assigned readings and reports. *Prerequisite:* Three years of botany. *Either semester. Credits to be arranged.* 103 Agricultural Building. Lehenbauer. Fee determined by type of laboratory work.

201-202. Thesis course for graduates.

### Horticulture

2. **ELEMENTS OF HORTICULTURE.** A general survey of the principles of fruit growing, vegetable and ornamental gardening. *Prerequisite:* Botany 1. *Second semester. Lectures, three hours. Three credits.* 103 Agricultural Building. Lehenbauer.

### Hygiene

Requirements for a minor in Hygiene: Hygiene 2, Zoology 2, 7-8, Bacteriology 51. Requirements for a major in Hygiene: the above and six additional units of advanced work in Zoology or Bacteriology.

2. **GENERAL HYGIENE.** Two lectures per week. Required of all Freshmen. *Second semester. One credit. Men, Martie; women, Mack.*

4. **TEACHERS' HYGIENE.** This course consists of lectures, assigned readings, and demonstrations covering the elementary principles of human anatomy and physiology, and paying particular attention to the hygienic applications. The problems of sex hygiene, including the control, the suppression and the prevention of venereal diseases, are discussed both in their individual and in their public bearings.

Special attention is placed upon that phase of the subject pertaining to school life, as ventilation, cleanliness, etc. *Second semester. Two lectures. Two credits.* 210 Agricultural Building. Mack.

### Nature Study

1-2. **GENERAL NATURE STUDY.** The object of this course is two-fold: (1) To cultivate a better understanding and appreciation of natural phenomena with emphasis on the biological features; and (2) to prepare for the teaching of nature study in the public schools. It comprises the study of life histories, pond life, native birds, etc., and includes the making and care of aquaria, terraria, school garden, etc. *Both semesters. Two credits each semester.* 110 and 210 Agricultural Building. Mack. Fee, \$1.

### Zoology

Requirements for a minor in Zoology: Zoology 2 or 4, Zoology 7-8 (Physiology) or 9, Botany 1, and six units of Junior-Senior work.

Requirements for a major in Zoology: Zoology 2, 7-8 or 9, Botany 1 or 2, and twelve units of Junior-Senior work.

Additional courses advised: Physics 1-2 (or admission credit), general chemistry, qualitative and quantitative analysis and organic chemistry; German 1-2 and 3-4.

2. **GENERAL ZOOLOGY.** An introductory course dealing with the general principles of the science. The laboratory work consists of the study of the structure, activities, and habits of a number of types representative of the principal animal groups, and chosen as much as possible from local forms. For students who have not presented laboratory Zoology for matriculation. *Either semester. Lectures, two hours; laboratory, two periods. Four credits.* 110 and 211 Agricultural Building. Frandsen and Brown. Fee, \$4.

4. For students who have presented one year of Zoology with laboratory for matriculation. Content of course similar to Zoology 2. *Second semester. One lecture; two laboratory periods. Three credits.* Frandsen and Brown and ..... Fee, \$4.

7-8. **PHYSIOLOGY.** The general principles of animal physiology, with special reference to the human being. The laboratory work consists of the dissection of some vertebrate, microscopic study of tissues and organs, physiological experiments and demonstrations, and the study of anatomical and physiological models. Some work on microorganisms is

included. *Both semesters. Lectures, two hours; laboratory, one period. Three credits each semester.* 110 and 210 Agricultural Building. Brown. Fee, \$2.50 each semester.

9. COMPARATIVE ANATOMY OF VERTEBRATES. Lectures on the progressive development of structures and functions from the lower to the higher vertebrates, leading up to human anatomy. Laboratory dissection of the dog-fish, salamander, and a mammal. *Prerequisite: Zoology 2, or 7-8. First semester. Lectures, three hours; laboratory, two periods. Five credits.* 5 Agricultural Building. Frandsen. Fee, \$5.

51. ANATOMY OF DOMESTIC ANIMALS. Lectures, textbook and reference assignments. Laboratory study of skeletons of domestic animals, and the dissection of a cat, dog, or sheep. *Prerequisite: Zoology 2, or 7-8, or 53. First semester. Lectures, three hours; laboratory, one period. Four credits.* 5 Agricultural Building. Brown. Fee, \$2.

53. ECONOMIC ZOOLOGY. Lectures dealing with the habits and life histories of the more important economic vertebrates, insects, worms, etc., in their relations to agriculture. *First semester. Lectures, two hours; laboratory, one period. Three credits.* 110 and 210 Agricultural Building. Brown. Fee, \$1.

55. EVOLUTION. Lectures illustrated by lantern slides on the evidence and factors of organic evolution, with a discussion of the bearing of evolutionary principles upon science and life in general. No prerequisite for Juniors or Seniors. Open to Sophomores who have had one year of college biology. *First semester. Two credits.* 110 Agricultural Building. Frandsen.

64. EMBRYOLOGY. Lectures on comparative embryology of vertebrates. The laboratory work consists of the study of preparations of the frog, chick, pig, and human embryos at various stages of development. Some training in the preparation of embryological material will be given. *Prerequisite: Zoology 2 and 9, or 7-8. Second semester. Lectures, three hours; laboratory, two periods. Five credits.* 212 Agricultural Building. Frandsen. (Alternates with Zoology 66.) Fee, \$2.

66. HISTOLOGY. The microscope and accessory apparatus, histological methods, and technique. Comparative cytology of animal tissues. *Prerequisite: Zoology 1 and 9, or 7-8.*

*Second semester. Lectures, three hours; laboratory, two periods. Four credits.* 212 Agricultural Building. Frandsen. (Alternates with Zoology 64.) Fee, \$4.

91-93. ADVANCED ZOOLOGY. Special zoological problems. Major students may select some problem for investigation under the direction of the instructor. Library reading, laboratory work, and reports, with final results embodied in the form of a thesis. *First semester. Credits to be arranged.* 212 Agricultural Building. Frandsen. Fee determined by type of work.

92-94. ADVANCED ZOOLOGY. Continuation of course 91-93.

201. Thesis course for graduates.

#### CHEMISTRY

PROFESSOR SEARS, HEAD OF DEPARTMENT  
PROFESSOR ADAMS  
ASSISTANT PROFESSOR LOUGH  
DR. DEMING  
MR. OAKBERG

Requirements for a minor in Chemistry: Either (for students without admission credit) courses 1-2, or (for students with one admission credit) courses 5, 6, and, in either case, courses 9, 10 and three additional units of Junior-Senior work.

Requirements for a major in Chemistry: Mathematics 9, and Physics 1a-b (or admission credit), and either (for students without admission credit in Chemistry) courses 1-2, or (for students with one admission credit) courses 5-6, and, in either case, courses 9, 10, 51-52, and 95-96, and three additional units of Junior-Senior work.

Requirements for the degree, Bachelor of Science in Chemistry: See outline for Course of Study, page 131.

1-2. ELEMENTARY INORGANIC CHEMISTRY. Lectures, recitations, and laboratory work covering the elementary principles of Chemistry. This course will cover all of the more common elements and their most important compounds, including their relation to each other and to the different industries. Its purpose is to give the student sufficient acquaintance with the field of Chemistry so that he will be able to understand and appreciate its numerous applications to industry and to everyday life and at the same time prepare him for Chemistry 9. Designed for students who have not presented matriculation Chemistry. *Both semesters. Two lectures and two laboratory periods. Four credits each semester.* Mackay Science Hall. Sears and Staff. Fee, \$8.

5-6. GENERAL INORGANIC CHEMISTRY. A course in general Chemistry covering all of the more common elements and their relation to each other. Use is made of the periodic table to correlate the facts and to show their relation to industry and to everyday life. Open to students who have presented matriculation Chemistry. *Both semesters. One lecture and two laboratory periods. Three credits each semester.* Mackay Science Hall. Sears and Staff. Fee, \$8.

7-8. GENERAL INORGANIC CHEMISTRY. A course in general chemistry similar to Chemistry 5-6, except that more time is given to problems and equations as a preparation for more advanced work in chemistry. Designed primarily for students registered in the course leading to the degree of Bachelor of Science in Chemistry. *Both semesters. Two lectures and two laboratory periods. Four credits each semester.* Mackay Science Hall. Sears. Fee, \$8.

9. PRINCIPLES OF INORGANIC AND ANALYTICAL CHEMISTRY. A lecture and laboratory course designed to give the student a knowledge of the fundamental principles underlying chemical change and to give him training in the methods of qualitative and a few of the more fundamental and simpler processes of gravimetric analysis. Numerous equations and problems involving chemical manufacture and the mass law will be assigned. *One lecture and three laboratory periods each week. Prerequisite: Chemistry 2 or 6. Either semester. Four credits.* Mackay Science Hall. Sears. Fee, \$12.

10. QUANTITATIVE ANALYSIS. A lecture and laboratory course covering the more important methods used in both gravimetric and volumetric analysis. Designed to train the student in the technique of quantitative analysis and to give him a knowledge of the principles and problems involved. *One lecture and three laboratory periods each week. Prerequisite: Chemistry 9. Second semester. Four credits.* Mackay Science Hall. Sears. Fee, \$12.

25. HOUSEHOLD CHEMISTRY. (College of Agriculture.) A laboratory and lecture course open only to students in Home Economics. Deals primarily with the practical applications of chemistry to problems of the household. *Prerequisite: Chemistry 5. First semester. Two lectures and two laboratory periods. Four credits.* Mackay Science Hall. Lough. Fee, \$6.

51-52. ORGANIC CHEMISTRY. A lecture and laboratory course dealing with the compounds of carbon. *Prerequisite: Chemistry 10 or Junior standing. Both semesters. Two lectures; two laboratory periods. Four credits each semester.* Mackay Science Hall. Adams. Fee, \$8.

53. ADVANCED ORGANIC CHEMISTRY. (Graduate credit given with consent of instructor.) A lecture and laboratory course on special chapters in organic Chemistry. *Prerequisite: Chemistry 51-52. First semester. Two lectures and two laboratory periods. Four credits.* Mackay Science Hall. Adams. Fee, \$8.

64. SPECIAL ANALYTICAL PROBLEMS. A laboratory course designed to give the student training in commercial methods of analysis. Such substances as food, water, fuel, fertilizer, soil, insecticides, minerals, etc., may be taken up. *Prerequisite: Two years of college Chemistry. Second semester. Two credits.* Mackay Science Hall. Sears, Adams, Lough and Deming. Fee, \$8.

67. PHYSIOLOGICAL CHEMISTRY. (Graduate credit given with consent of instructor.) For students of chemistry, medicine, biology, bacteriology and nutrition. Lectures and recitations on the chemistry of carbohydrates, fats, proteins, body tissues, blood, secretions, putrefaction and the physiological processes such as digestion, absorption and assimilation of food, general enzyme action, metabolism and the fundamental principles of nutrition. The laboratory work consists of qualitative and quantitative experiments on the lecture material. *Prerequisite: Chemistry 10 and 52. First semester. Two lectures, two laboratory periods. Four credits.* Mackay Science Hall. Lough. Fee, \$8.

71. ADVANCED ANALYTICAL CHEMISTRY. A lecture and laboratory course designed particularly for chemistry and mining students but open to all students desiring a more complete knowledge of analytical methods. *Prerequisite: Chemistry 10. First semester. One recitation and two laboratory periods. Three credits.* Mackay Science Hall. Sears. Fee, \$8.

72. ADVANCED INORGANIC PREPARATIONS. (Graduate credit given with consent of instructor.) A laboratory and discussion course. The student will be expected to prepare a number of inorganic substances involving some of the more

difficult reactions and technique. Special emphasis will be given to method, technique, and equations involved. *Prerequisites.* Chemistry 51. *Second semester. One recitation and two laboratory periods. Three credits.* Mackay Science Hall. Adams. Fee, \$8.

74. CHEMISTRY OF THE RARER METALS. (Graduate credit given with consent of instructor.) A lecture and laboratory course designed to give a more intimate knowledge of the elements. Emphasis will be given to the preparation and properties of the metals and their more important compounds. *Prerequisite:* Chemistry 10. *Second semester. One lecture and two laboratory periods. Three credits.* Mackay Science Hall. Sears. Fee, \$8.

75. THE PERIODIC LAW. (Graduate credit given with consent of instructor.) A lecture and seminar course designed to give the student a rather intimate knowledge of the less common elements and their relation to the more common elements. A critical study is made of the more important periodic tables in the light of recent developments in atomic structure and the known properties of the elements. Practical use is made of the periodic law to correlate the facts of Chemistry. *Prerequisite:* Three years of college Chemistry. *First semester. Two credits.* Mackay Science Hall. Sears.

81-82. PHYSICAL CHEMISTRY. (Graduate credit given with consent of instructor.) A lecture and laboratory course correlating facts and theories concerning chemical reactions, solutions, the structure of matter; gases, liquids and solids; energy; solutions; rate of reactions; vapor tension; osmotic pressure; conductance; ionization; thermochemistry; applications to problems of Chemistry and related sciences. Open to Juniors and Seniors who have completed two years of Chemistry and Mathematics 10. A knowledge of calculus is desirable. *Both semesters. Two lectures and two laboratory periods. Four credits each semester.* Mackay Science Hall. Deming. Fee, \$6 each semester.

92. HISTORY OF CHEMISTRY. (Graduate credit given with the consent of the instructor.) A lecture course on the history and development of the science of Chemistry. *Prerequisite:* Two years of College Chemistry. *Second semester. Two credits.* Adams.

95-96. CURRENT CHEMICAL LITERATURE. (Graduate credit

entering without high school credit in Latin, five credits each semester.

For students entering with one year credit in high school Latin, three credits first semester and five credits second semester.

For students entering with two years' credit in high school Latin, three credits second semester only. 203 Morrill Hall. Church.

NOTE—This course may also be taken at three credits per semester but with the exclusion of Medical and Law Latin.

3-4. VERGIL. *Aeneid.* This course is intended for such students as present one or two years of Latin at entrance, but wish to continue the study in college. *Both semesters. Three credits each semester.* 203 Morrill Hall. Church.

5. CICERO. *De Senectute.* *First Semester. Three credits.* 203 Morrill Hall. Church.

6. HORACE AND CATULLUS. Latin Lyric Poetry. *Second semester. Three credits.* 203 Morrill Hall. Church.

Courses 5-6 given alternate years, alternating with 51-52. (Not given 1931-1932.)

7-8. LATIN PROSE COMPOSITION. Required of all students who have elected Latin as their major department, or who enter second semester. *Lectures, three credits.* Electrical Building. Bixby.

94. IRRIGATION ENGINEERING. A study is made of the collection, storage, and distribution of water for irrigation, with special reference to the structures involved. *Prerequisite:* C. E. 90. *First semester. Lectures. Three credits.* Electrical Building. Bixby.

96. WATER-POWER ENGINEERING. A study is made of the more important problems of water-power development, including the characteristics of hydraulic motors affecting selection and installation. A study is also made of the costs and the feasibility of water-power projects. *Prerequisite:* C. E. 90. *First semester. Lectures, three hours. Three credits.* Electrical Building. Amens.

97-98. HYDROLOGY. The occurrence of water in the atmosphere, on the earth's surface and beneath the surface. The understanding of some of the many divisions of this subject is essential to a proper planning for any utilization or control of water by man. *Prerequisite:* Junior standing. *Two credits each semester.* Electrical Building. Boardman.

difficult reactions and technique. Special emphasis will be given to method, technique, and equations involved. *Prerequisites.* Chemistry 51. *Second semester. One recitation and two laboratory periods. Three credits.* Mackay Science Hall. Adams. Fee, \$8.

74. CHEMISTRY OF THE RARER METALS. (Graduate credit given with consent of instructor.) A lecture and laboratory course designed to give a more intimate knowledge of the elements. Emphasis will be given to the preparation and properties of the metals and their more important compounds. *Prerequisite:* Chemistry 10. *Second semester. One lecture and two laboratory periods. Three credits.* Mackay Science Hall. Sears. Fee, \$8.

75. THE PERIODIC LAW. (Graduate credit given with consent of instructor.) A lecture and seminar course designed to give the student a rather intimate knowledge of the less common elements and their relation to the more common elements. A critical study is made of the more important periodic tables in the light of recent developments in atomic structure and the known properties of the elements. Practical use is made of the periodic law to correlate the facts of Chemistry. *Prerequisite:* Three years of college Chemistry.

Mackay Science Hall. Sears.

PROFESSOR CHURCH  
PROFESSOR THOMPSON

Requirements for a minor in Classics: With no admission credits in Latin, Classics 1-2, 3-4, and six units; with two admission credits, Classics 3-4, and six units.

Requirements for a major in Classics: With no admission credits, Classics 1-2, 3-4, 7-8, and ten units; with two admission credits, 3-4, 7-8, and ten units.

Entrance credits in Latin above two, especially if they include Vergil's *Æneid*, will be accepted in meeting major and minor requirements.

The substitution of courses in Greek for equivalent courses in Latin will be permitted.

#### I. LANGUAGE

Only the courses in Language can be used to satisfy the general language requirement in the University.

#### 1. LATIN

1-2. BEGINNING LATIN. This course is designed to prepare for the reading of Vergil and also for admission to the professional schools. Comparative Language, Medical Latin and Law Latin are stressed. *Both semesters. For students*

*entering without high school credit in Latin, five credits each semester.*

*For students entering with one year credit in high school Latin, three credits first semester and five credits second semester.*

*For students entering with two years' credit in high school Latin, three credits second semester only.* 203 Morrill Hall. Church.

NOTE—This course may also be taken at three credits per semester but with the exclusion of Medical and Law Latin.

3-4. VERGIL. *Æneid*. This course is intended for such students as present one or two years of Latin at entrance, but wish to continue the study in college. *Both semesters. Three credits each semester.* 203 Morrill Hall. Church.

5. CICERO. *De Senectute*. *First Semester. Three credits.* 203 Morrill Hall. Church.

6. HORACE AND CATULLUS. Latin Lyric Poetry. *Second semester. Three credits.* 203 Morrill Hall. Church.

Courses 5-6 given alternate years, alternating with 51-52. (Not given 1931-1932.)

7-8. LATIN PROSE COMPOSITION. Required of all students who have elected Latin as their major department, or who seek to be recommended as teachers of Latin. *Both semesters. One credit each semester.* 203 Morrill Hall. Church.

101. SEMINAR FOR GRADUATES. (a) The study of the Roman burial formulæ, their development, and religious significance. (b) Comparative Mythology. Its religious, art, and literary forms. (c) Comparative Classical Literature.

#### 2. GREEK

11-12. ELEMENTARY GREEK. Grammar, exercises, and Xenophon's *Anabasis*, Book I. An introductory course for all students who wish by somewhat concentrated effort to acquire in one year the ability to read ordinary Attic prose. *Both semesters. Six credits for the year.* (Given only if elected by five or more students.) 5 Library Seminar. Thompson.

13-14. PLATO AND HOMER. In the first semester, Plato's *Apology* and *Crito*, with selections from the other writings, will be read. In the second semester, Homer's *Iliad*, Books I-VI, will be read as an introduction to epic poetry, with as much attention as is necessary to the grammar and prosody

of Homer, and to the Ionic dialect. *Both semesters. Three credits each semester.* (Given only if elected by five or more students.) 5 Library Seminar. Thompson.

15. GREEK TESTAMENT. Selections from the Gospels and Epistles. *First semester. Two credits.* (Given only if elected by five or more students.) 5 Library Seminar. Thompson.

16. GREEK LITERATURE—PHILOSOPHY. Reading of Plato's Phædo, with a brief study of the history of ancient philosophy. *Prerequisite:* Greek 1-2, and 3-4. *Second semester.*

NOTE—A knowledge of Latin or Greek is not required for courses in Art and Literature.

#### II. ART

41. GREEK ART. Illustrated by lantern slides and reproductions. *First semester. Two credits.* 203 Morrill Hall. Church.

42. ROMAN TO MODERN ART. Illustrated by lantern slides and reproductions in color. *Second semester. Two credits.* 203 Morrill Hall. Church.

43-44. SUPPLEMENTARY COURSE IN APPRECIATION OF ART. Readings and reports. Open only to those who are taking or have taken the corresponding semester of Classics 41-42 or its equivalent. Particularly for students who desire to increase their credit hours in 41-42. *Both semesters. One credit each semester.* 203 Morrill Hall. Church.

#### III. LITERATURE

51-52. COMPARATIVE CLASSICAL POETRY IN ENGLISH. The Epic, Lyric, Drama, and Pastoral, with supplemental reference to Classical and Teutonic Mythology and Modern Literature and Opera. *Both semesters. Two credits each semester.* (Alternate years; alternating with 5-6.) 203 Morrill Hall. Church.

61-62. ADVANCED ART APPRECIATION. Readings and discussions in architecture, sculpture or painting. Open only to those who are taking or have taken 41-42 or their equivalent. *Both semesters. One credit each semester.* 203 Morrill Hall. Church.

#### DAIRY HUSBANDRY

College of Agriculture

1. DAIRYING. The composition and secretion of milk and causes of variation in its composition; the operation of the

Babcock test as applied to milk and milk products; the various methods of cream-raising, including the study of the construction and operation of centrifugal separators; methods of making and marketing butter, with special reference to farm conditions, and the proper handling of milk on the farm will be discussed in the lectures. The laboratory work includes the testing of milk and other dairy products, operation of centrifugal cream separators, and the making and scoring of butter, and an observation of the essential points of the sanitary production and handling of dairy products as shown in the college barn and dairy. *Second semester. Lectures, two hours; laboratory, one period. Three credits.* 105 Agricultural Building. Scott. Fee, \$3.

5. MILKING MACHINES. Laboratory practice in milking with mechanical milkers. Practical work at the University Farm and observation of about six different types of machines operating near Reno. *Open to all students. Fall semester. Laboratory, one period. One credit.* Scott. Fee, \$2.

53. MILK PRODUCTION. Dairy husbandry in its relation to the producer of dairy products rather than the manufacturer. The lectures deal with the problems of the dairy farmer, such as adaptations of the dairy breeds, selection, management, feeding of dairy cattle, dairy barns, and calf-raising. The laboratory includes the judging of dairy cattle, visits to the local dairy farms and the observation of systems of dairy management followed by them. *Prerequisite:* Dairying 1. *First semester. Lectures, two hours; laboratory, one period. Three credits.* 105 Agricultural Building. Scott. Fee, \$3.

54. BUTTER-MAKING. Laboratory practice in the manufacture of creamery butter and ice cream. Instruction will cover sampling and testing of cream; pasteurizing and ripening of cream for butter-making, churning, with special attention to the factors that control the composition of butter; preparing butter for the market; the preparation and use of home-made and commercial starters; creamery accounts; determining the amount of water in butter; testing for oleomargarine; manufacture of ice cream, sherbets; ices, lacto. *Prerequisite:* Dairying 1. *Second semester. Lecture, one hour; laboratory, two periods. Three credits.* 12 Agricultural Building. Scott. Fee, \$3. (This course will not be given unless elected by five or more students.)

55. DAIRY SANITATION. This course is the application of bacteriology to the problems of the producer and consumer of milk. It deals with the fundamental principles upon which are based sanitary production and handling of milk, cream-ripening and curing of cheese, the market milk industry; the relations of milk to the public health and the important relations of butter- and cheese-making. *Prerequisite:* Dairying 1 and Zoology 2. *First semester. Lecture, one hour; laboratory, one period. Two credits.* 12 Agricultural Building. Scott. Fee, \$2.

56. CHEESE-MAKING. A study of the comparative and characteristics of common American and European cheese. The laboratory work consists of manufacturing the common types of hard and soft cheese. *Van Slyke: Cheese-Making. Prerequisite:* Dairying 1. *Second semester. Lecture, one hour; laboratory, two periods. Three credits.* 12 Agricultural Building. Scott. Fee, \$3. (This course will not be given unless elected by five or more students.)

57. ADVANCED MILK PRODUCTION. Use of Dairy herd books; special feeding for high records; interpretation of official tests. *Prerequisite:* Dairying 1. *First semester. Lectures, two hours. Two credits.* 105 Agricultural Building. Scott.

59. PROFESSIONAL JUDGING. *First semester. Laboratory, one period. One credit.* University Farm. Scott. Fee, \$1.50.

61. THESIS COURSE. Special problems in production or sanitation and city milk supply. Laboratory material is available through the University dairy herd and the dairies furnishing milk for the city of Reno. *Prerequisite:* Dairying 1 and 53 or 55. *Either semester. Two to six credits, depending on work done.* Scott.

62. THESIS COURSE. Continuation of 61.

#### ECONOMICS, BUSINESS, AND SOCIOLOGY

ASSOCIATE PROFESSOR SUTHERLAND, ACTING HEAD OF DEPARTMENT

ASSISTANT PROFESSOR BLACKLER

MR. WEBSTER

MR. INWOOD

JUDGE SOUTER

*Requirements for a minor:* Six credits in Economics 1-2; twelve additional credits in the department, not less than six of which shall be in courses numbered above 50.

*Requirements for a major:* Twelve credits in Economics 1-2, and Economics 91-92. Eighteen additional credits in the department, not less than twelve of which shall be in courses numbered above 50.

*Recommended for a major:* Philosophy 7-8, Psychology 5-51, Mathematics 2S, French and German.

#### Economics

1. PRINCIPLES OF ECONOMICS. An introduction to the economics of production, value and exchange, money and credit, business cycles, international trade, distribution of wealth, labor, transportation, agricultural credit and marketing, public finance and taxation. *Prerequisite:* Sophomore standing. *First semester. Three credits.* Education Building. The Staff.

2. PRINCIPLES OF ECONOMICS. A continuation of 1. *Second semester. Three credits.* Education Building. The Staff.

3. INDUSTRIAL HISTORY OF EUROPE. The economic history of Europe in modern times, agricultural, industrial, and commercial development, rise of economic organization. *First semester. Two credits.* Open to Freshmen. Education Building. Webster.

5. ECONOMIC HISTORY OF THE UNITED STATES. Introductory historical treatment of the economic development of America, the industrial revolution, agricultural, commercial, and industrial development, immigration, geographical determinism, land policy, the labor movement, taxation, railroads and government regulation, etc. Open to Freshmen. *Second semester. Two credits.* Education Building. Webster.

51. PUBLIC FINANCE. Public expenditure, classification of revenues, principles of taxation, growth of indebtedness, financial administration in peace and war, the connection between public finance and social reform. *Prerequisite:* Economics 1-2. *First semester. Two credits.* Education Building. Sutherland.

52. MONEY AND BANKING. Economic and governmental problems centering in the use of money and credit, the inflation vs. stabilization movements and their connection with business and labor conditions. *Prerequisite:* Economics 1-2. *First semester. Three credits.* Education Building. Sutherland.

53. INTERNATIONAL TRADE. Theory of international trade, history of the controversy between free trade and protection,

the new interest in foreign trade. *Prerequisite:* Economics 1-2. *First semester. Three credits.* Education Building. Webster.

54. PUBLIC UTILITIES. The development, organization, characteristics, and legal status of public service industries; regulation; labor relationships; taxation; valuation; capitalization; ownership; returns; cost and price of service. *Prerequisite:* Economics 1-2. *Second semester. Two credits.* Education Building. Sutherland.

55. TRANSPORTATION. The growth and development of railway transportation in the United States; the organization, construction, and management of modern railway systems; the theory of rates; the relation of the railroads to the public; the general scope and importance of the railway problem at the present time. *Prerequisite:* Economics 1-2 and Business 41. *Second semester. Three credits.* Education Building. Webster.

56. INSURANCE. A study of insurance institutions, and of the various kinds of property and life insurance. *Prerequisite:* Economics 1-2, Business 41. *Second semester. Three credits.* Education Building. Inwood. (Not given in 1931-1932.)

61. STATISTICAL METHODS. Elementary statistical methods as used in business and in the social sciences. Scrutiny of data, defining of units, tabulation, index numbers, correlation, law of averages, graphical methods of presenting facts. *Second semester. Three credits.* Education Building. Inwood.

64. LABOR PROBLEMS. Modern issues concerning the wage-earning classes considered in the light of English and American history. A study of labor organizations with regard to wages, hours, conditions, control, labor of women and children, immigration, economic insecurity, unemployment, turnover, social insurance, employer's associations, government agencies, personnel administration, motives in industry. *Prerequisite:* Economics 1-2. *Second semester. Three credits.* Education Building. Sutherland.

65. INTRODUCTION TO ECONOMICS AND BUSINESS ADMINISTRATION. (College of Engineering.) *Prerequisite:* Junior standing. *First semester. Three credits.* Education Building. Inwood.

66. INDUSTRIAL AND FINANCIAL ORGANIZATION. (College of Engineering.) *Prerequisite:* Economics 65. *Second semester. Three credits.* Education Building. Inwood.

91. ADVANCED ECONOMIC THEORY. Advanced study of the principles of demand and supply including costs; of the functions of the different agents of production; of wages, interest, rent, and profits; and of the means for the promotion of welfare. *First semester. Three credits.* Education Building. Sutherland.

92. HISTORY OF ECONOMIC THOUGHT. A study of the development and trend of economic thought in its historical setting. *Second semester. Three credits.* Education Building. Sutherland.

95. SEMINAR. Hours to be arranged with individual students. *First semester. One credit.* Education Building. The Staff.

96. SEMINAR. Hours to be arranged with individual students. *Second semester. One credit.* Education Building. The Staff.

#### Business

41. FUNDAMENTALS OF BUSINESS ORGANIZATION. An introductory survey course in business, covering: The business structure; the business executive; internal and external factors in management; personnel administration; finance; accounting as an aid to management; production; marketing; administration of risk; business management and the business cycle; law and its relationship to business management. Functionalized management will also be studied. Principles and problems. *Prerequisite:* At least Sophomore standing. *First semester. Three credits.* Education Building. Inwood.

46. ADMINISTRATION OF DISTRIBUTION. A study of the distribution of goods from the producer to the consumer. Study of demand and demand creation. Correlated material of markets and marketing; advertising; salesmanship and the economics of retailing will also be studied. Assigned case problems and research. *Prerequisite:* Business 41. *Second semester. Three credits.* Education Building. Inwood.

43-44. ELEMENTARY ACCOUNTING. Accounting theory and practice for single proprietorships, partnerships and

corporations. Problems and practice sets. *Prerequisite:* At least Sophomore standing. *Two lecture periods and one laboratory period. Both semesters. Three credits each semester.* 202 Education Building. Blackler.

55-56. ADVANCED ACCOUNTING. Intensive study of the advanced theory of accounts and its application. Selected problems and readings. *Prerequisite:* Business 43-44. *Both semesters. Three credits each semester.* Education Building. Blackler.

65. ADMINISTRATION OF FINANCE. Principles and problems of financing business enterprises of various sizes and character. The course will also consider the principles of investment from the standpoint of the individual as to how and when to make investments; how to read the financial page; the principles of sound investments. Assigned case problems and research. *Prerequisite:* Business 41. *First semester. Three credits.* Education Building. Blackler.

66. ADMINISTRATION OF PRODUCTION. Internal organization and control for different forms of business enterprise. Principles of purchasing. Budgetary control; forecasting and planning in management; financial and operating ratios in business control; systems of internal check. Public relations. *Prerequisite:* Business 41. *Second semester. Three credits.* Education Building. Blackler.

68. FUNDAMENTAL PRINCIPLES OF THE LAW PRACTICALLY APPLIED TO THE PROFESSIONS, BUSINESS AND CITIZENSHIP. A comprehensive investigation of the fundamental principles of the law, designed to provide the prospective engineer, architect, physician, or other professional or business man with an intelligent understanding of the legal problems which constantly arise in the practice of any profession or business; to inculcate a deeper respect and reverence for the law by developing an appreciation of its sources, its growth, its importance, and its administration; and finally, by so doing, to elevate and vitalize citizenship. *Second semester. Three credits.* 109 Agricultural Building. Souter.

74. ADVANCED BUSINESS LAW. A course in advanced business law designed for those students who are specializing in a preparation for business, including an intensive study of

the law of contracts, negotiable instruments and banking practice in reference thereto, sales of personal property, industrial law, suretyship and guaranty, bankruptcy, agency, partnership, corporations, public utilities, common carriers, warehouse men, and related subjects. Open only to those students who have attained an average of at least 2.5 in B. A. No. 68. *Second semester. Three credits.* 109 Agricultural Building. Souter. (Not given until 1932-1933.)

85. COST ACCOUNTING. A comprehensive study of all elements of manufacturing cost accounting; actual practice in recording, presenting and interpreting all elements involved in the computation of manufacturing costs; practice in design and preparation of cost accounting forms. *Prerequisite:* Business 43-44. *First semester. Two credits.* Education Building. Blackler. (Not given unless elected by six or more students.)

86. INCOME TAX ACCOUNTING. Study of the history of the federal income tax; the federal revenue acts and their interpretation; actual preparation of individual, partnership and corporation income tax returns; the important federal treasury department decisions on income tax problems. *Prerequisite:* Business 43-44. *Second semester. Two credits.* Education Building. Blackler. (Not given unless elected by six or more students.)

95. SEMINAR IN BUSINESS. *One hour. First semester.* Education Building. The Staff.

96. SEMINAR IN BUSINESS. *One hour. Second semester.* Education Building. The Staff.

#### Sociology

1-2. PRINCIPLES OF SOCIOLOGY. A general course in the principles of sociology. An examination of social institutions, activities, and problems. Origin and development of societies, institutions, cultures, the state, civilizations. Racial, cultural, and social evolution. Conditions of modern society. *Prerequisite:* Sophomore standing. *Both semesters. Three credits each semester.* Education Building. Webster.

71. INTRODUCTION TO SOCIOLOGY. The social nature of man; climatic, geographic, and economic environment; group relations; contacts, primary and secondary; moral-

ity and social control; population, its quantity and quality; heredity; the differential birth rate; culture and social progress; race. *First semester. Three credits.* Education Building. Webster.

72. SOCIAL INSTITUTIONS. A detailed study of the more important institutions of our social organization; the family, religious institutions and origins, educational institutions, the state, private property, legal and political organizations, charity and charitable organizations, stratification, etc. *Second semester. Three credits.* Education Building. Webster.

95. SEMINAR. Hours to be arranged with individual students. *First semester. One credit.* Education Building. The Staff.

96. SEMINAR. Hours to be arranged with individual students. *Second semester. One credit.* Education Building. The Staff.

#### EDUCATION

PROFESSOR HALL, HEAD OF DEPARTMENT

PROFESSOR TRAINER

ASSISTANT PROFESSOR RUEBSAM

ASSISTANT PROFESSOR BROWN

MRS. LOUGH

MR. BILLINGHURST

MISS TALBOY

MR. JEPSON

MR. RUSSELL

COOPERATING TEACHERS

Requirements for a minor in Education: Psychology 5 (prerequisite) and 6; Education 60, 63, 66 (elective), 71, 75, 76 and 82.

Requirements for a major in Education: Psychology 5 (prerequisite) and 6; Education 60, 63, 66 (elective), 71, 75, 76, 82 and ten to twelve Normal School credits, depending upon the aim in view.

#### *Elementary Education*

20. PRINCIPLES OF TEACHING. For teachers in elementary schools. A study of the various types of classroom teaching to discover the principles of selection, organization and presentation of subject matter to children of the first six grades. *First year, second semester. Three credits.* 104 Education Building. Hall. Fee, \$2.

23. PROBLEMS IN RURAL EDUCATION. A study of opportunities, responsibilities for leadership, school problems and

their solution in relation to teaching in Nevada rural communities. *Second year. First semester. Two credits.* 105 Education Building. Brown.

24. SCHOOL LAW. A consideration of the fundamental facts of school law and the fundamental problems of school organization from the point of view of the teacher in the elementary school. *Second year, second semester. One credit.* 103 Education Building. Billinghamurst.

25. OBSERVATION OF TEACHING. Observation and discussion of specific classroom work as a preparation for practice teaching. *First year, first semester. One credit.* Public Schools. Ruebsam.

28. SUPERVISED TEACHING AND GROUP CONFERENCES. The selection and organization of subject matter and the technique of teaching. *One hour a day, five days a week. Second year, first semester. Five credits.* 209 Education Building and Public Schools. Ruebsam, Hall, Brown and Cooperating Teachers.

29. SUPERVISED TEACHING AND GROUP CONFERENCES. Continuation of Education 28. *One hour a day, five days a week. Second year, second semester. Five credits.* 209 Education Building and Public Schools. Ruebsam, Hall, Brown and Cooperating Teachers.

31. THE TEACHING OF ARITHMETIC. A study of the modern aims in teaching arithmetic; of the effect of these aims on the selection and organization of arithmetic material for the different grades; and of the presentation of this material. *First semester, first year. Two credits.* 209 Education Building. Ruebsam.

33. THE COMMUNITY AND THE SCHOOL. A study of rural, social institutions affecting the school, and the part the school may play in the efforts of the community to improve itself. A continuation of Education 23. *Two credits. First semester, second year.* 105 Education Building. Brown.

34. THE TEACHING OF ENGLISH. Principles underlying the selection, organization and presentation of subject matter for the first four grades and the study of children's literature for these grades. *First semester, first year. Three credits.* 209 Education Building. Ruebsam.

35. THE TEACHING OF ENGLISH. Principles underlying the selection, organization and presentation of subject matter for grades 5 to 8 and the study of children's literature for these grades. *Second semester, second year. Three credits.* 209 Education Building. Ruebsam.

41. CONSTRUCTIVE ACTIVITIES FOR PRIMARY GRADES. This course is devoted to a consideration of the materials by means of which the child organizes and expresses his ideas and establishes desirable attitudes and habits. *Second semester, first year. One credit.* 209 Education Building. Fee, \$1. Ruebsam.

46. THE MANAGEMENT AND ORGANIZATION OF RURAL SCHOOLS. A study of the classroom problems of the rural school; organization, course of study, daily program, use of projects, classification, equipment, and discipline. A continuation of Education 20. *Second semester, second year. Two credits.* 104 Education Building. Hall.

48. EDUCATIONAL TESTS AND MEASUREMENTS. This course will consider the most serviceable tests and scales for measuring the elementary subjects. It is designed to assist teachers in judging and improving their instruction. The course will involve giving the tests, scoring, and interpreting the results. *First semester, second year. One credit.* 104 Education Building. Brown. Fee, \$1.

56. SCOUTCRAFT. This course will deal with the theory and practice of Scoutcraft as presented by Boy Scouts of America, Girl Scouts, Camp Fire Girls, Girl Reserves, and similar organizations. Section 1, for women, Mrs. Lough. Section 2, for men, Russell. *One credit. Section 1 given first semester only. Section 2 given each semester.* 103 Education Building.

#### Secondary Education

NOTE—Since the candidates for high school positions greatly exceed the number of vacancies open to inexperienced teachers, it is highly desirable that students qualify to do effective service in elementary schools. This would necessitate taking ten to twelve Normal School units including one semester of practice teaching. This work may be taken as early as the Sophomore year.

60. PROBLEMS OF SECONDARY EDUCATION. This course involves the study of some of the major problems that confront the high school classroom teacher, as: the problem of evaluating student ability and achievement, adapting instruction to individual differences, the function and place

of the high school in our educational system, and the educational values of high school subjects. *First semester. Three credits.* Open to Juniors only. 103 Education Building. Traner. *Second semester.* 105 Education Building. Brown.

63. SCHOOL MANAGEMENT AND SCHOOL LAW. A consideration of the fundamental facts of school law and the fundamental problems of school organization and school hygiene from the point of view of the teacher in the secondary school. *First semester. One credit.* 104 Education Building. Billinghurst.

66. SUBJECT MATTER AND METHODS. A study of the most suitable subject matter for the different high school subjects and of the methods of teaching specific subjects. General class discussion and special study and reports and observation by individuals in their major and minor subjects. *Second semester. Two credits.* 103 Education Building. Traner.

71. PRINCIPLES OF TEACHING. For teachers in secondary schools. A study of the various types of classroom teaching to discover the principles of selection, organization and presentation of subject matter in secondary schools. To be taken in the Senior year. *First semester. Three credits.* 105 Education Building. Hall.

75-76. PRACTICE TEACHING<sup>1</sup>. Required for candidates for the high-school teacher's certificate. This work will be done in Grades 7 to 12 of the Reno Public Schools under the direction of the Professor of Secondary Education, the teachers of Vocational Education, with the immediate supervision of the cooperating teacher in charge. Students must take particular care that they reserve ample time either in the forenoon or afternoon for the course. *Failure to do so may make the assignment for practice teaching impossible. Both semesters. Two credits each semester.* Traner and Cooperating Teachers.

82. ADMINISTRATIVE ASPECTS OF HIGH SCHOOL TEACHING. A study of the general phases of administration to give teachers an appreciation of administrative problems and of those specific phases of administration with which the teachers must come in contact. The course includes a consideration of the teacher's relations to the profession, to the

<sup>1</sup>Practice Teaching may not be taken unless Education 71 has been taken or is taken at the same time.

school authorities, and to the state and community. *Second semester. Two credits.* 103 Education Building. Traner.

#### AGRICULTURE AND HOME ECONOMICS

75-76. SUPERVISED TEACHING. For candidates for the high school teacher's diploma in Home Economics, and to meet in part the requirements of the Smith-Hughes Act. Students must reserve ample time for this work. *Both semesters. Two credits each semester.* Traner, Talboy, and Cooperating Teachers.

86. PROBLEMS IN AGRICULTURAL EDUCATION. This course is a study of the most important problems that an agriculture teacher must meet: Selecting the subject matter for high school courses in agriculture and for farmer's short courses; preparing plans for teaching this subject matter; and making contact with the adult farmer. Open to Juniors and Seniors in the College of Agriculture to meet in part the requirements of the Smith-Hughes Act. *Second semester. Two credits.* 103 Education Building. Jeppson.

88. PROBLEMS IN HOME-MAKING EDUCATION. A study of the curricula, methods of teaching, and making home contacts; use of texts, references and selection of equipment; and determination of aims and goals to be reached in public school home-making courses. Discussion of courses of study to meet various needs. Open to Juniors and Seniors in the School of Home Economics to meet in part the requirements of the Smith-Hughes Act. *Second semester. Two credits.* Talboy.

#### COURSES OFFERED PRIMARILY FOR TEACHERS IN SERVICE WORKING FOR A MASTER'S DEGREE

Time and place according to the convenience of the teachers.  
No fees for teachers in service.

101-102. RESEARCH COURSE IN THE PROBLEMS OF SECONDARY EDUCATION. A course for teachers who wish to study intensively some problem in secondary education. *Both semesters. Two credits each semester.* 103 Education Building. Traner.

105-106. EDUCATIONAL FINANCE. A seminar. *Both semesters. Two credits each semester.* 104 Education Building. Traner.

109-110. STUDIES IN ELEMENTARY SCHOOL PROBLEMS. A course for teachers who wish to study the technique of the

of literature with special attention directed to diction, gesture, the voice, and platform poise. The course is recommended to beginning students in public speaking, teaching, and dramatic work. *Both semesters. Three credits each semester.* 106 Hall of English. Collonan.

25-26. NEWS-GATHERING AND WRITING. Study of news values, the elements of the news story and the gathering of news. Practical application of these principles in the reporting and writing of all types of news for Reno newspapers and those of surrounding cities. Discussions and laboratory work. Year course. Upon consent of the instructor, students may repeat the second semester of this course for credit, in which case the course will be designated English 26A, 26B, and so on. *Prerequisite: English 1-2. Both semesters. Three credits each semester.* 105 Hall of English. Higginbotham.

41-42. APPRECIATION OF LITERATURE. The reading and study of the more important types of literature, English and American. Lectures, assigned readings, and written reports. *Prerequisite: English 1-2. Both semesters. Two credits each semester.* Hall of English. Riegelhuth and Harwood.

44-45. GENERAL HISTORY OF ENGLISH LITERATURE. The study of literary movements and the interpretation of representative authors. Lectures, assigned readings, and weekly themes. This is a prerequisite for courses in Literature numbered above 50. *Prerequisite: English 1-2. Both semesters. Three credits each semester.* Hall of English. Hill, Riegelhuth, and Harwood.

51-56. NEWS EDITING. Study of the principles of editing copy of all types and the duties of the editor in preparing material for publication, including application of the laws relating to newspapers and magazines. Practice in copy-reading, headline writing, the art of make-up, rewriting, news evaluation and similar editorial duties. Discussions and laboratory. *Prerequisite: English 25-26. Both semesters. Two credits each semester.* 105 Hall of English. Higginbotham.

52. ADVANCED REPORTING. Intensive work in collecting and writing news under actual newspaper office conditions. Designed to promote professional skill and speed. News of the city will be covered for Reno newspapers. *Prerequisite: English 25-26. Second semester. Three credits.* 105 Hall of English. Higginbotham.

53. THE COMMUNITY NEWSPAPER. Study of the problems of journalism peculiar to the country weekly and the small city daily, especially as found in Nevada. *Prerequisite:* English 25-26. *First semester. Three credits.* 105 Hall of English. Higginbotham. (Not offered in 1931-1932.)

54. PROBLEMS IN JOURNALISM. Members of the class will outline and carry through a program of study in one or more of the special phases of journalism in which they may be interested. *Prerequisite:* English 25-26 or consent of instructor. *Second semester. Three credits.* 105 Hall of English. Higginbotham. (Not offered in 1931-1932.)

55. THE AMERICAN NEWSPAPER. Lectures and discussions on the history, functions, future, principles, problems and opportunities of the newspaper in the United States, and study of the profession of journalism. Open to Juniors and Seniors. *First semester. Three credits.* 105 Hall of English. Higginbotham.

57. EDITORIAL WRITING. The study of the interpretation of news and the writing of the newspaper and magazine editorial. Analysis of the responsibilities of the editorial writer to the publication, the community and the profession. *Prerequisite:* English 25-26. *First semester. Two credits.* 105 Hall of English. Higginbotham. (Not offered in 1931-1932.)

58. THE FEATURE ARTICLE. The study and writing of the special feature articles for newspapers and magazines. *Prerequisite:* English 25-26. *Second semester. Two credits.* 105 Hall of English. Higginbotham. (Not offered in 1931-1932.)

59. ADVANCED COMPOSITION. Intensive work in exposition, description and narration to develop familiarity with these types. *First semester. Two credits.* 101 Hall of English. Hill. (Not offered in 1931-1932.)

60. ADVANCED COMPOSITION. The development of the higher types of writing. The course will be planned to bring out the special capabilities of the individual student, especially in narrative. *Second semester. Two credits.* 101 Hall of English. Hill. (Not offered in 1931-1932.)

61-62. ADVANCED SPEECH COMPOSITION. Formal oral discussions, and occasional addresses, based upon the study of contemporary literary, political, and sociological questions.

Open to a limited number of students who have the consent of the instructor. *Prerequisite:* English 11-12 or 16-17. *Both semesters. Two credits each semester.* 107 Hall of English. Griffin. (Not offered in 1931-1932.)

63-64. ORATORY. Individual research work based upon the examination of backgrounds, methods, and ideals of modern oratory. British eloquence is studied the first semester and American eloquence the second. *Prerequisite:* English 11-12 or 16-17. *Both semesters. Two credits each semester.* 107 Hall of English. Griffin.

66. THE ENGLISH ESSAY. A study of the development of the essay as a literary form from Bacon to the present day. Reports and informal essays based on the study of representative British and American essayists and essay types. *Second semester. Three credits.* 103 Hall of English. Riegelhuth.

68-69. THE ENGLISH NOVEL. The study of the development of the novel from the early Nineteenth Century to the present day. *Both semesters. Three credits each semester.* 101 Hall of English. Hill.

70-71. AMERICAN LITERATURE. The study of American prose and poetry from the beginning of the Nineteenth Century to the present time. *Both semesters. Three credits each semester.* 101 Hall of English. Hill. (Not offered in 1931-1932.)

72-73. THE MODERN DRAMA. Representative modern European and American dramatists. *Both semesters. Three credits each semester.* 101 Hall of English. Hill. (Not offered in 1931-1932.)

75-76. SHAKESPEARE. The interpretation of representative plays. *Both semesters. Three credits each semester.* 101 Hall of English. Hill.

77. THE BIBLE AS LITERATURE. The study of the representative literary types found in the Old Testament. *Prerequisite:* English 1-2 and 41-42 or 44-45. *Second semester. Three credits.* 101 Hall of English. Hill.

78. MILTON. Minor poems, dramas, and Paradise Lost. *First semester. Three credits.* 101 Hall of English. Hill.

79. THE POETRY OF THE ROMANTIC PERIOD, with emphasis on Wordsworth and Coleridge. *First semester. Three credits.* 103 Hall of English. Riegelhuth.

80. TENNYSON AND BROWNING. The study of the chief writings of Tennyson and Browning, with special emphasis of the "Idylls of the King," and "The Ring and the Book." *First semester. Three credits.* 103 Hall of English. Riegelhuth. (Not offered in 1931-1932.)

81-82. PLAY PRODUCTION. The reading, study, and production of representative modern plays, one-act and longer, with lectures, readings, and reports. Practice work is offered in all the aspects of play production: management, lighting, scenery and costumes, directing, acting etc. Special work is given for prospective high school teachers. *Prerequisite:* Junior standing, or the permission of the instructor for Sophomores. *Both semesters. Three credits each semester.* Education Auditorium. (Not offered in 1931-1932.)

85-86. THE ENGLISH DRAMA. A comprehensive survey of English drama, other than Shakespearean, from its beginnings to the Nineteenth Century. Assigned readings and written reports. *Both semesters. Three credits each semester.* 102 Hall of English. Harwood.

87-88. THE EIGHTEENTH CENTURY. Representative prose and poetry of the Age of Classicism. *Both semesters. Two credits each semester.* 102 Hall of English. Harwood.

89-90. THE THEORY AND TECHNIQUE OF ACTING. An introduction to the theory of acting and the application of its technique, with special emphasis on the problems of stage direction. *Both semesters. Three credits each semester.* 106 Hall of English. Collonan.

94. CHAUCER. The Canterbury Tales. *Prerequisite:* English 44-45. *Second semester. Three credits.* 102 Hall of English. Harwood. (Not offered in 1931-1932.)

97-98, 99-100. HONORS FOR UNDERGRADUATES. Open only to Juniors and Seniors majoring in English who have attained an average grade of 2.0 in all their work. *One group each semester. One credit a semester.* Hill.

101-102. SEMINAR. Open only to graduate students. *Both semesters.* Hours to be arranged with individual students. *Three credits each semester.* Hill.

200. THESIS COURSE. Open only to candidates for a Master's Degree. Hill.

## GENERAL ENGINEERING

1. ENGINEERING ORIENTATION. See page 234 for description of this course.

2. FREEHAND DRAWING. Perspective drawings of machines and buildings. Perspective drawings from mechanical drawings. Memory drawings of machines. Isometric drawing. *First semester. One credit.* Education Building. Lewers.

3-4. ARCHITECTURAL DRAWING. Perspective drawing, building plans, historical basis of architectural design. The five orders of classical architecture; influence of Roman, Medieval and Renaissance architecture on modern design. *Both semesters. Two credits per semester.* Education Building. Lewers.

## GEOLOGY

PROFESSOR JONES, HEAD OF DEPARTMENT

PROFESSOR CARPENTER

ASSOCIATE PROFESSOR GIANELLA

Requirements for a minor in Geology: Physics 1-2 (unless Physics is offered for admission), Chemistry 1 (unless Chemistry is offered for admission), Mineralogy 1 and 2, Geology 8-9, and six additional units in Junior-Senior courses.

Requirements for a major in Geology: Physics 1-2, or 3-4 and 5-6, Chemistry 5 and 6, Mineralogy 1-2, Geology 8-9, and twelve additional units in Junior-Senior courses.

Students expecting to follow Geology as their life work should consult with the head of the department as early as possible in their course and plan their work so as to lay an adequate foundation for further work in their specialty in a graduate school.

1. PHYSIOGRAPHY. (Not open to Arts and Science students for credit.) A study of the forces active on the surface of the earth, including a brief discussion of the factors governing the movements of the atmosphere. *First semester. Two credits.* Mackay School of Mines. Jones.

8. GENERAL GEOLOGY. A general discussion of geologic forces and their results, dealing chiefly with the dynamic and structural aspect of the subject. The interpretation of topographic maps. *Prerequisite:* At least Sophomore standing. *Either semester. Three credits.* Mackay School of Mines. Jones and Gianella.

9. HISTORICAL GEOLOGY. An outline of the origin and history of the earth, including the diastrophic changes, stratigraphic relationships, and the description of the physical geography and life of the successive geological periods,

with especial reference to the North American Continent. *Prerequisite:* Geology 8 or 10. *Either semester. Three credits.* Mackay School of Mines. Jones.

10. ENGINEERING GEOLOGY. (College of Engineering.) A study of the forces active on and within the earth, and their results, with especial emphasis on their effects on engineering problems. The recognition of common rocks and minerals and the interpretation of topographic maps. *Second semester. Three credits.* Mackay School of Mines. Jones and Gianella.

11. HISTORICAL GEOLOGY. (College of Engineering.) A brief summary of the origin and history of the earth. *Prerequisite:* Geology 8 or 10. *Second semester. Three credits.* Mackay School of Mines. Jones.

51. PETROLOGY. The study of rock-forming minerals and rocks in the hand specimen. Lectures on the characters, origin, and classification of rocks. *Prerequisite:* Geology 8 or 10, Mineralogy 1 and 2. *First semester. Two credits.* Mackay School of Mines. Gianella.

52. PETROGRAPHY. The study of rock-forming minerals and rocks under the microscope. *Prerequisite:* Geology 8 or 10, Mineralogy 1 and 2, Physics 1A-2A or 3-4. *Second semester. Three credits.* Mackay School of Mines. Gianella.

60. ECONOMIC GEOLOGY OF THE NONMETALS. A study of the occurrence, distribution, origin, and distinctive features of fuels and other nonmetallic rocks and minerals utilized commercially. *Prerequisite:* Geology 8, 9 or 10, Mineralogy 1-2. *Second semester. Three credits.* Mackay School of Mines. Jones and Carpenter.

61. ECONOMIC GEOLOGY OF THE METALS. The geology of ore deposits treating of their origin, mode of occurrence, alteration, and distribution; with a study of the more important mining camps in North America. *Prerequisite:* Geology 1-2 or 3, Mineralogy 1-2. *First semester. Three credits.* Mackay School of Mines. Jones.

70. FIELD GEOLOGY. Instruction in field methods, with practice in the investigation of a selected area in the vicinity of the University. *Prerequisite:* Geology 8 or 10; Mineralogy 1. *Second semester. One credit.* Jones and Gianella.

71. SUMMER FIELD GEOLOGY. Two or more weeks are spent during the summer vacation in the mapping and study

of one or more mining camps where both the surface and underground geology may be investigated. A concise report of the work, together with well-kept field notes and finished geological maps is required of each member of the class. *Prerequisite:* Geology 51 and 60 or 61. *Credits to be arranged.* Jones and Gianella.

79. GEOLOGICAL INVESTIGATION. Original investigation of some geological problem. *Prerequisite:* Geology 8-9, or 10-11, 51, 52, and 60, or equivalent training. *First semester. Credits to be arranged.* Mackay School of Mines. Jones and Gianella.

80. GEOLOGICAL INVESTIGATION. Continuation of Geology 79. *Second semester. Credits to be arranged.* Mackay School of Mines. Jones and Gianella.

101. GRADUATE COURSE. The original investigation of geologic problems, with seminar for discussion of current geologic literature and special topics. *Credits to be arranged.* Mackay School of Mines. Jones and Gianella.

#### HISTORY AND POLITICAL SCIENCE

PROFESSOR WIER, HEAD OF DEPARTMENT  
ASSOCIATE PROFESSOR FEEMSTER  
ASSOCIATE PROFESSOR HICKS  
ASSISTANT PROFESSOR SMITH

Requirements for a minor in History: History 5-6 and ten additional units in courses 51-100.

Requirements for a major in History: History 5-6 and sixteen additional units in courses 51-100.

Requirements for a minor in Political Science: Either History 79-80 or History 91-92; Political Science 1-2, and eight additional units in Political Science 51-100, or in History 73-74, 87-90, or in both.

Requirements for a major in Political Science: History 5-6 and either History 79-80 or History 91-92; Political Science 1-2, and fourteen additional units from Political Science 51-100, or History 73-74, 87-90, or in both, but not more than six of these fourteen may be in History.

For both majors and minors in History and Political Science choice is to be made according to aim in view and is to be approved by the head of the department.

Requirement for the department's recommendation for the teaching of History in high schools: A major or minor, including History 51, History 55-56, and History 71-72.

History 1-2 and 5-6 are designed to lay a foundation for the advanced courses in History and Political Science. History 1-2 is prerequisite to all other courses in History. Political Science 1-2 is prerequisite to all other courses in Political Science except 79-80.

*History*

1-2. HISTORY OF THE AMERICAS. - Against a broad European background the spread of civilization in America will be traced. The development of each geographical section will be presented and the relation shown of each section to America as a whole. Culmination of the study will be found in a survey of the Great Basin and the place of Nevada in that basin. The course will deal in a comprehensive way with the large movements of a political, economic, and social nature in the New World. It is intended to give a new and large American perspective. The Constitutions of the United States and of Nevada will be studied in fulfillment of the state legal requirement. *Either semester. Three credits each semester.* Regular Freshman History Course. 101 Stewart Hall. Wier, Hicks, and Smith.

5-6. EUROPEAN CIVILIZATION. The development of western civilization in Europe from the Roman Empire to the present time. Designed to furnish perspective for the understanding of the present-day world. *Both semesters. Three credits each semester.* 203 Stewart Hall. Smith.

51. THE TEACHING OF HISTORY. A study of the aims, methods, and materials for history teaching in secondary schools and colleges. Required for departmental recommendation for high school teaching of history. *First semester. Two credits.* 101 Stewart Hall. Wier.

53. INSTITUTIONAL RELATIONS OF WOMAN IN HISTORY. A study of woman's characteristics in relation to social and industrial life both in past centuries and at the present time. Especial emphasis on the vocations now open to women and the significance of college education in preparation for the same. Lectures on various vocations will be given by representatives of these professions and industries. Open to Freshmen women, as well as to all other women students. *First semester. Two credits.* 101 Stewart Hall. Wier. (Not given in 1931-1932.)

54. HISTORICAL GEOGRAPHY. The movements of population as influenced by geographical factors. Traces political development, particularly of Eurasia, and familiarizes the student with the map. Adapted to the needs of Normal students. *Second semester. Two credits.* 101 Stewart Hall. Wier. (Not given in 1931-1932.)

55-56. WESTWARD EXPANSION OF THE UNITED STATES. A study of the westward movement from the Atlantic to the Pacific and of the continuous influence of the West upon national and international affairs. Particular attention will be given to the political, economic, and social aspects of the occupation of the various sections. Required for departmental recommendation for high school teaching of history. *Both semesters. Two credits each semester.* 101 Stewart Hall. Wier.

57-58. HISTORY OF WESTERN AMERICA. The study of the development of the Pacific Slope during the Spanish, Mexican, and early American periods. Comparison made with Atlantic Coast development. Study of legal and other institutions. Important as introduction to history of Nevada. *Both semesters. Two credits each semester.* 101 Stewart Hall. Wier. (Given on sufficient demand.)

59-60. LATIN AMERICA. This course will comprise an examination of representative States of South and Central America; their struggle for stability, their relations to each other and to the United States. Library readings will be assigned in the industrial development of Latin America and in the social and cultural character of Spanish-American civilization. Recommended for students of Spanish. *Both semesters. Two credits each semester.* Hicks.

62. PRE-HISTORY. A study of human civilization before the time of written records. (To alternate with History 54.) *Second semester. Two credits.* 101 Stewart Hall. Wier.

63. THE RENAISSANCE. This course deals with the development of the modern spirit beginning with the last quarter of the Thirteenth Century. The topics stressed are the rise of nationalism, the revival of the individual, of art, of science, of conscience, and the age of discovery. Lectures are given and reports made by students on assigned topics. Given on sufficient demand. *First semester. One credit.* (Not given in 1931-1932.)

64. THE REFORMATION. A continuation of History 63. This course deals with the Catholic Reformation and the Protestant Revolution. Some of the topics considered are humanism and heresy, the Elizabethan Age, the revolt from Rome of the several European countries, the social revolution, and the results of the Protestant Revolt. Lectures are

given and reports made by students on assigned topics. Given on sufficient demand. *Second semester. One credit.* (Not given in 1931-1932.)

65-66. RESEARCH COURSE IN NEVADA HISTORY. A course designed to train students in research methods and at the same time give knowledge of Nevada history. *Both semesters. Credit to be arranged.* 101 Stewart Hall. Wier. (Indefinitely postponed until library materials are again available.)

67-68. HISTORY OF THE FAR EAST. This course includes a consideration of the more significant phases of internal developments in China and Japan, with special emphasis on the international relations of these states one with the other and with European states. *Both semesters. One credit.* Room 104. Hicks. (Not given in 1931-1932.)

71-72. ANCIENT CIVILIZATION. A study of the rise of the institutions of civilization, of nationality, and of empire, culminating in Imperial Rome. This course is designed for those preparing to teach History or Latin, for classical students, and for all who desire a collegiate course in ancient civilization. *Both semesters. Two credits each semester.* 105 Stewart Hall. Feemster. (Not given in 1931-1932.)

73-74. ANCIENT INSTITUTIONS AND ROMAN LAW. An introduction to historical jurisprudence in the survey of the chief legal codes in force in early history as the background of the modern world, Hebrew, Greek, Roman to the codification of Justinian, with major emphasis on Roman Law. Library references to Maine, Lee, Kocourek and Wigmore, and Vinogradoff will be available. The course coordinates with English Constitutional History. *Both semesters. One, two or three credits per semester.* 105 Stewart Hall. Feemster.

76. MEDIEVAL CIVILIZATION AND INSTITUTIONS. A study of the feudal system, the system of universal monarchy as embodied in the Holy Roman Empire, of the Church as the controlling force, etc. *Second semester. Three credits.* 101 Stewart Hall. Wier. (Given on sufficient demand.)

79-80. THE FRENCH REVOLUTION. Its causes and constitutional experiments. Studied from the European and American standpoint rather than as a French local crisis. *Both semesters. Two credits each semester.* 101 Stewart Hall. Wier. (Not given in 1931-1932.)

81-82. THE FAR EAST. The aim of this course is to give students a better understanding of the peoples of the Orient.

The history of China and Japan is dealt with, stress being laid upon the relations of the western nations and the peoples of the two leading oriental countries especially since the middle of the Nineteenth Century. *Both semesters. Two credits each semester.* Hicks.

83. RUSSIA AND HER NEIGHBORS. The course is essentially a study of modern Russia in the light of historical development. A standard work like Wallace is read and applied to Russia of today as a method of approaching the present Russian enigma. *First semester. Two credits.* 105 Stewart Hall. Feemster. (Not given in 1931-1932.)

85-86. THE MIDDLE PERIOD: United States History from the Second War with Britain to the Rebellion of the Cotton States. A more intensive study from the standard historians and sources of the formative period of American political character as distinct from inherited Anglo-Saxon institutions. The rise of the protective tariff system, and fall of the national banking system and currency. Jacksonian democracy and the rise of the National Party system, United States hegemony in the rising group of western republics, expansion and territorial imperialism, the losing struggle of the Slave States to control Congress, political constitutional philosophy on the nature of the Union, nullification, the rise of the New Republican Party, the breakdown of Constitutional Federal Government and the appeal to the sword. *Both semesters. Two credits each semester.* 105 Stewart Hall. Feemster. (Not given in 1931-1932.)

87-88. ENGLISH CONSTITUTIONAL HISTORY. A study of the rise of the English constitution out of the institutions of the medieval world. Comparison will be made with the contemporary institutions of the church, the Holy Roman Empire and the early French Monarchy. *Both semesters. Three credits each semester.* 105 Stewart Hall. Feemster.

89-90. MODERN CONSTITUTIONAL HISTORY. A detailed examination of the founding of the United States of America. The movement will be compared with the contemporary constitutional efforts in Poland and the first French Republic. *Both semesters. Three credits each semester.* 105 Stewart Hall. Feemster. (Not given in 1931-1932.)

91. THE TWENTIETH CENTURY: THE RIVALRY OF THE NATIONS. An intensive prewar study. Not given for less than five students. Open to History majors and minors and

those specially qualified. The course will trace world movements from the Spanish-American War to the outbreak of the War of 1914. *First semester. Two credits.* 105 Stewart Hall. Feemster.

92. THE TWENTIETH CENTURY: THE STRUGGLE OF THE NATIONS. A continuation of course 91. A critical study of war history and war historians, with source studies on selected topics. *Second semester. Two credits.* Feemster.

99-100. HISTORY THESIS WORK. *Both semesters. Credits to be arranged.* 101 Stewart Hall. Wier.

199-200. GRADUATE THESIS. *Both semesters. Credits to be arranged.*

#### Political Science

1-2. COMPARATIVE GOVERNMENT. This course is to be regarded as introductory to the other courses in the department. A survey is made of the structure and chief features of the practical operation of the governmental systems of the United States, England, the leading countries of Europe, and certain typical countries of South America. *Both semesters. Two credits each semester.* 105 Stewart Hall. Feemster and Hicks.

51. STATE GOVERNMENT. A survey of the structure and workings of the state governments in the United States of America. The Governor, the Legislature, the Courts; constitutional changes as shown by the experience of other States. Attention will be given to the organization and function of state parties; also to the new movements in county organization. *First semester. Three credits.* 105 Stewart Hall. Feemster.

53. MUNICIPAL GOVERNMENT. An introduction to the problems, both of government and administration, which confront the municipalities of the United States. Reference is also made throughout to European experience. *First semester. Three credits.* 105 Stewart Hall. Feemster. (Not given in 1931-1932.)

64. INTERNATIONAL LAW. An elementary study of the principal topics, accompanied by examination of leading cases. *Second semester. Three credits.* 105 Stewart Hall. Feemster. (Not given in 1931-1932.)

66. INTERNATIONAL GOVERNMENT AND INSTITUTIONS. The course correlates with the course in International Law and

will examine in the order of their rise, the Monroe Doctrine and the Pan-American System, the Hague Conferences and Court, The League of Nations and its organs and activities. *Second semester. Two credits.* Feemster. (Not given in 1931-1932.)

79-80. THE CONSTITUTIONS OF THE UNITED STATES AND NEVADA. For Seniors of all colleges. *Both semesters. One credit.* Feemster.

85-86. COLONIAL EXPANSION. The history of the colonial acquisitions of the great nations and a comparative study of institutions developed therein, with special emphasis upon the United States. *Both semesters. Two credits each semester.* 101 Stewart Hall. Wier. (Given on sufficient demand.)

93-94. POLITICAL PROBLEMS. Open to accredited students in the department and by permission to intercollegiate debaters. Current controversial issues will be selected each semester for analysis and investigation in the best current departmental periodicals. *One-half to two credits per semester according to work done.* 105 Stewart Hall. Feemster.

99-100. THESIS.

199-200. GRADUATE THESIS. Library facilities are available in two subjects. The Constitutional Convention of 1787, and the diplomacy of the outbreak of the war of 1914. *Both semesters. Credits to be arranged.* Library. Feemster.

#### HOME ECONOMICS

College of Agriculture

PROFESSOR LEWIS, HEAD OF DEPARTMENT

ASSOCIATE PROFESSOR POPE

ASSISTANT PROFESSOR SPRINGER

3. INTRODUCTORY COURSE. This course is designed to give students a knowledge of the aims, ideals and accomplishments of Home Economics and to assist them in forming correct habits of right living. *First semester. Lecture, one period. One credit.* 204 Agricultural Building. Lewis.

9. GENERAL HOME ECONOMICS. This course, offered for Normal School students, deals with the following units: Selection and care of clothing; rural home improvement; hot school lunch; and school hygiene. *First semester. Lecture, two hours; laboratory, one period. Three credits.* 203 Agricultural Building. Lewis, Pope, Springer. Fee, \$2.

15-18. CLOTHING. A course dealing with the adaptation and modifications of commercial patterns. Study and working out of individual clothing budgets; selection and construction of underwear and dresses suitable for the University girl. *Both semesters. Lecture, one hour. Laboratory, two periods. Three credits each semester.* 204 Agricultural Building. Pope. Fee, \$2.

16. TEXTILES. A study of the chief textile fibers and analysis of fabrics. The aim of the work with fibers is to form a basis for an understanding of fabrics. It includes the study of methods of production of raw materials and of manufacturing processes as related to quality of fabrics. The study of fabrics is based upon the analysis of different materials to find the relation between quality and the fiber, weave, adulteration, finish and cost. *Second semester. Lecture, one hour; laboratory, one period. Two credits.* 108 Agricultural Building. Pope. Fee, \$2.

31-32. FOODS AND COOKERY. A study of foods from the standpoint of their composition, economy, selection, preparation and use. *Both semesters. Laboratory, two periods; lecture, one hour. Three credits each semester.* 203 Agricultural Building. Springer. Fee, \$5.

33. FOODS AND NUTRITION. This course is planned for any student who desires to be informed on the problem of human nutrition. The source, composition and preparation of foods; the energy, protein, mineral and vitamin requirements of the individual are considered. Dietary corrections of under and over weight and the general application of diet to health is emphasized. Not open to Freshmen. *First semester. Lecture, two periods. Laboratory, one period. Three credits.* 204 Agricultural Building. Lewis. Fee, \$3.

34. CLOTHING AND TEXTILES. This course deals with the study of textile fibers and fabrics; the selection, construction and care of clothing. Not open to Home Economics majors. *Second semester. Laboratory, two periods. Lecture, one period. Three credits.* 204 Agricultural Building. Pope. Fee, \$0.50.

42. FOOD ECONOMICS. Household marketing; a study of grades, brands and qualities of food products as found on the market. *Laboratory, one period. One credit. First semester.* 203 Agricultural Building. Springer. Fee, \$1.

45. RELATED ART. This course includes a study of color and design with applications. Problems include block-printing, tie-dyeing, batik, woven problems on the looms and construction of these into finished articles. *Either semester. Laboratory, two periods. Two credits.* 108 Agricultural Building. Pope. Fee, \$2.

49. ELEMENTARY MILLINERY. This course is designed to teach selection, making, care, and renovation of hats and trimmings. *First semester. Laboratory, two periods. Two credits.* 108 Agricultural Building. Pope. Fee, \$2.

52. PRINCIPLES OF EXTENSION WORK. This course is designed to give a survey of rural conditions as they exist in the country today, with particular emphasis on Nevada. The importance of farmer movements and their relation to national development will be touched upon. A history of the development of the land-grant colleges and agricultural extension work will be given, and particular emphasis placed on the organization of this work in Nevada. The farm, the farm home and rural community will be the basis for discussion, and short field trips will be made to observe the work of agricultural extension agents in near-by counties. The purpose of this course is to assist students to qualify for positions as county extension agents, boys and girls club leaders, local community leaders, etc. *To be given on sufficient demand. Second semester. Lecture, two periods. Two credits.* Springer.

54. HOME NURSING. This course aims to give the students a knowledge of the general home care of the sick; the sick room, its equipment and care; various types of diseases, their symptoms and treatment; and the immediate care in accidents and emergencies. *Second semester. Lecture, one period. Two credits.* 208 Artemisia Hall. Springer.

55. FOODS AND COOKERY. This course includes a consideration of food from the standpoint of meal planning, marketing, cost, preparation, service, and field trips. The project work consists of an intensive study of types of food in which the individual is particularly interested. The lectures include a study of kinds, selection and care of linen, china and silver. *Prerequisite: Home Economics 31-32, and Home Problems. Lecture, one period; laboratory, three periods. Four credits. First semester.* 203 Agricultural Building. Springer. Fee, \$5.

66. **ADVANCED CLOTHING.** Costume design and tailoring. A study of line and proportion of the average human figure, together with a study of the principles of design, color and materials, forms the basis for designing garments for various types. The selection of a complete outfit including accessories, and the construction of the outer garments constitute the major part of the laboratory work. The history of costume and the stages in its development is presented. *Prerequisite:* Home Economics 15, 18, and Home Problems. *Lecture, one period. Laboratory, two periods. Three credits. Second semester.* 204 Agricultural Building. Springer. Fee, \$2.

67. **CLOTHING.** Planning and selection of children's garments emphasizing speed, labor saving methods and relative costs in their construction. May register with the consent of the instructor. *First semester. Laboratory, two periods. Two credits.* 204 Agricultural Building. Pope. Fee, \$2.

68. **COSTUMES.** This course includes a study of color, effects of color on different types of individuals and the effect of light on colors. It deals with design and becoming and unbecoming lines as illustrated in costumes. Laboratory work takes up the making of costumes. *Second semester. Laboratory, two periods. Two credits.* 204 Agricultural Building. Pope. Fee, \$2.

76. **CHILD CARE.** A study of the development of the child from the beginning of life through adolescence. Habit formation; proper feeding, nursing of simple ailments. Open to Juniors and Seniors only. *Second semester. Lectures, two periods. Two credits.* 109 Agricultural Building. Springer.

81. **DIETETICS.** Lectures on the function and nutritive value of foods; feeding of families, typical dietaries; comparative cost and nutritive value of foods; requirements according to age, health, and activity. *Prerequisite:* Home Economics 31-32, 55; Chemistry 26; Zoology 7-8. *First semester. Two credits.* 206 Agricultural Building. Lewis.

83. **DIETETICS LABORATORY.** Practice in the computing and measuring of 100 calorie portions of common foods, and preparation of meals according to definite dietetic requirements. *Prerequisite:* Home Economics 31-32, 55; Home Problems; Chemistry 26; Zoology 7-8. *Parallel:* Home

Economics 81-83. *First semester. Laboratory, three periods. Three credits.* 203 Agricultural Building. Lewis. Fee, \$5.

85. **SPECIAL PROBLEMS IN FOODS.** A course intended for advanced students capable of experimental and research work. *Prerequisite:* Home Economics 31-32, 55. *Either semester. Laboratory, two periods. Two credits.* 203 Agricultural Building. Lewis. Fee, \$5.

86. **HOUSEHOLD ADMINISTRATION.** The following units are discussed: The social relationship of the family and community; the modern home, its equipment and scientific management; household budgets. Open to Juniors and Seniors only. *Second semester. Lectures, two periods. Two credits.* 204 Agricultural Building. Lewis.

87. **HOUSE DECORATION.** Planning, decorating, and furnishing of homes, considering art, convenience, sanitation, and economy. *Prerequisite:* Art 5, Home Economics 16, 45. *Second semester. Lecture, one period; laboratory, two periods. Three credits.* 108 Agricultural Building. Lewis. Fee, \$1.50.

88. **CARE OF THE HOUSE.** A study of care of the house and its furnishings, making practical application of facts learned in Chemistry and Physics. *Prerequisite:* Physics 19; Chemistry 5. *Second semester. Lecture, one period; laboratory, one period. Two credits.* 109 Agricultural Building. Pope. Fee, \$1.

92. **DIET IN DISEASE.** This course considers the adaptation of diet to different pathological conditions, such as diabetes, nephritis, gastric disturbances, etc. (For students who expect to qualify as professional dietitians.) *Prerequisite:* Home Economics 81-83. *Second semester. Lecture, one period. Laboratory, one period. Two credits.* 203 Agricultural Building. Lewis. Fee, \$2.50.

95. **SPECIAL PROBLEMS IN CLOTHING.** A course designed for advanced students who wish to carry further the study of some problems suggested or touched upon previously in Home Economics work. This course is elective at discretion of the Instructors. *Either semester. Lecture, one period; laboratory, one period. Two to four credits.* 108 Agricultural Building. Fee, \$2.

Ed. 88. **TEACHER-TRAINING COURSES IN HOME ECONOMICS.** See Education.

## MATHEMATICS AND MECHANICS

PROFESSOR HASEMAN, HEAD OF DEPARTMENT  
ASSISTANT PROFESSOR SEARCY

Requirements for a minor in Mathematics: Mathematics 11, 13, 14, 25, 26, or their equivalent, and two additional units approved by the department.

Requirements for a major in Mathematics: Mathematics 11, 13, 14, 25, 26, 85, or their equivalent, and nine additional units approved by the department.

Mathematics 9 and 10 may be substituted for 11, 13 and 14 in the major and minor requirements.

5. ELEMENTARY ALGEBRA. A thorough study of elementary algebra including quadratic equations. The course is designed to suit a variety of students, those having had practically no algebra and those having had as much as one year in the high school. This course will be required of students whose credentials permit them to take Mathematics 11, but who are unable to carry it. Students entering the University with more than one year of high school algebra will receive no credit for this course. *First semester. Two credits.* Mackay Science Hall. Searcy.

7. SOLID GEOMETRY. The geometry of the plane, the cone, the prism, the pyramid, and the sphere. *Second semester. Two credits.* Mackay Science Hall. Searcy.

9-10. ELEMENTARY ANALYSIS. This course will cover algebra, trigonometry, and analytic geometry. It is designed for Freshmen who choose mathematics for their science requirement and students who expect to take a major or minor in mathematics. Students who enter with but two years high school mathematics will take four hours each semester. Students who enter with three or more years of high school mathematics will take three hours the first semester and four hours the second. Mackay Science Hall. Haseman.

11. ADVANCED ALGEBRA. A thorough review and drill in algebra, with special emphasis on the topics that will be most helpful in the higher courses in mathematics. This course is required of all engineering students. *First semester. Two credits.* Mackay Science Hall. Haseman and Searcy.

13. PLANE TRIGONOMETRY. A study of the trigonometric functions and identities. Considerable time is devoted to the solution of triangles. This course is required of all Engineering students. *First semester. Three credits.* Mackay Science Hall. Haseman and Searcy.

14. ANALYTIC GEOMETRY. An analytical treatment of the properties of the straight line, circle, parabola, ellipse, and hyperbola. Polar coordinates, the transformation of coordinates, and the general second-degree equation in two variables will also be studied. *Second semester. Three credits.* Mackay Science Hall. Haseman and Searcy.

25. DIFFERENTIAL CALCULUS. A thorough study of the fundamental principles of differential calculus with application to expansion in series, tangents and normals, curvature, indeterminate forms, maxima and minima. Illustrative examples of a practical nature are emphasized. *First semester. Three credits.* Mackay Science Hall. Haseman and Searcy.

26. INTEGRAL CALCULUS. The elements of integral calculus are first taken up in conjunction with certain topics in differential calculus not completed in the previous course. This is followed by the application of integration to areas of curves, areas of surfaces, volumes, moments of inertia, centers of gravity, etc. *Second semester. Three credits.* Mackay Science Hall. Haseman and Searcy.

28. MATHEMATICAL THEORY OF INVESTMENTS. Trigonometry is a prerequisite for this course. *Either semester. Three credits.* Mackay Science Hall. Haseman.

32. The application of mathematics, including integral calculus to the solution of practical problems arising in the various engineering departments. Required of all regular engineering students who have had integral calculus. (College of Engineering.) *Second semester. Two credits.* Mackay Science Hall. Haseman and Searcy.

35. SPHERICAL TRIGONOMETRY AND PRACTICAL ASTRONOMY. The solution of spherical triangles and the application of trigonometry to certain problems of practical astronomy. The theory and the use of the transit instrument. The determination of time, latitude and longitude. *Second semester. Two credits.* Mackay Science Hall. Searcy.

40. DETERMINANTS AND THE THEORY OF EQUATIONS. The study of determinants and their applications. The theory of the quadratic, cubic, biquadratic, and the general algebraic equation. Approximation methods of solving equations of higher degree than the second. *Second semester. Two credits.* Mackay Science Hall. Haseman and Searcy.

55-56. ANALYTIC MECHANICS. Work in the resolution of forces, moment inertia, laws of motion, friction, dynamics of machinery, work and energy, and impulse. Special emphasis is given to practical problems. *First semester, three credits. Second semester, two credits.* Mackay Science Hall. Haseman.

62. ENGINEERING MATHEMATICS. A general course in mathematics especially designed for electrical engineering students. *Steinmetz: Engineering Mathematics. Second semester. Two credits.* Mackay Science Hall. Haseman.

70. SOLID ANALYTICAL GEOMETRY. A study of the plane, ellipsoid, paraboloid, hyperboloid, and the general equation of the second degree in three dimensional spaces. *First semester. Two credits.* Mackay Science Hall. Searcy.

73. PROJECTIVE GEOMETRY. A synthetic development of the more fundamental projective properties of conic sections, including also an elementary treatment of homographic systems, involutions, anharmonic ratios, and the principle of duality. *First semester. Two credits.* Mackay Science Hall. Searcy.

75. HISTORY OF ELEMENTARY MATHEMATICS. Lectures and assigned readings on the history of the mathematical science. *First semester. Two credits.* Mackay Science Hall. Haseman.

85. DIFFERENTIAL EQUATIONS. Study of the ordinary and partial differential equations of the first and second orders with special attention to geometrical and physical applications. *First semester. Three credits.* Mackay Science Hall. Haseman.

105. THEORY OF FUNCTIONS OF THE COMPLEX VARIABLE. The fundamental operations applied to the complex number, the series, Riemann surfaces, etc. *Both semesters. Five credits for the year.* Mackay Science Hall. Haseman.

110. THEORY OF NUMBERS. Lectures and reports. *Second semester. Three credits.* Mackay Science Hall. Searcy.

115. VECTOR ANALYSIS. A study of the Vector notation applied to problems of physics. *Second semester. Three credits.* Mackay Science Hall. Haseman.

125-126. ADVANCED CALCULUS. A more rigorous study of the differential and integral calculus, with extensive applications to geometrical and physical problems. *Three credits, first semester, two credits, second semester.* Mackay Science Hall. Haseman.

preceded or accompanied by Economics 66. *Second semester. Two laboratory and one recitation period. Three credits.* Electrical Building. (Not offered in 1931-1932.)

\*75. POWER-PLANT ENGINEERING. A study of the principles involved in the design, construction, and operation of steam- and gas-power plants for mills, factories, and electric generating stations. A lay-out of a plant to meet specified conditions is made in the drawing room. *Prerequisite: E. E. 51 and 52, M. E. 54 and 64. First semester. Two recitations and one laboratory period. Three credits.* Amens.

76. AUTOMOTIVE AND AIRPLANE ENGINES. A brief course in the principles of the design and operation of gas engines as applied to motor vehicles. Carburetors, governing, ignition, lubricating systems. *Prerequisite: M. E. 54. Elective for Juniors and Seniors. Second semester. Two recitations and one laboratory period. Three credits.* Buerer.

78. AERODYNAMICS. An elementary course in the theoretical aspects of aeronautics. Study of aerodynamics, theory of flight, history and development of the art. Laboratory work so far as available equipment permits. *Prerequisite: Mathematics, Physics, and Mechanics. First semester. Three credits.* Buerer.

80. THESIS. An original design or an investigation intended to give the student a knowledge of research methods in engineering. This course is elective at the discretion of the instructors in the department. *Second semester. Three credits.* Sibley or Assistants. Laboratory fee of \$5 may be required.

#### METALLURGY

College of Engineering

PROFESSOR PALMER, HEAD OF DEPARTMENT

PROFESSOR CARPENTER

ASSISTANT PROFESSOR SMYTH

51. FIRE ASSAYING. Lectures, recitations, and laboratory work in assaying. Methods of assaying, systems of weights used, calculations and problems, equipment of assay laboratories, sampling, chemistry of assaying. The assay of gold and silver ores of the simpler types followed by the assay of difficult ores and metallurgical products. *Prerequisite: Mineralogy 2, Chemistry 9 and 10. First semester. Laboratory, non, and management of metallurgical plants, and a discussion of articles upon metallurgical subjects. Open only*

three periods. Three credits. Mackay School of Mines. Smyth. Fee, \$15. Students who do not complete their laboratory work during the regular periods are required to pay an additional fee to cover the extra cost of such work. This fee will be \$1 per laboratory period for each period the furnaces are used plus the cost of any chemicals, etc., used.

52. ADVANCED FIRE ASSAYING. A laboratory course designed to give the student routine practice in the work met in a commercial assay office. It will include practice in both wet and fire assaying and determination of minerals. Not given for less than three students. *Prerequisite:* Chemistry 10; Metallurgy 51. *First semester. One credit.* Mackay School of Mines. Smyth. Fee, \$5.

53. GENERAL METALLURGY. Lectures and recitations on the history of metals, chemical and physical properties of metals, the adaption of metals to industry, fuels, refractories, and pyrometry. *Prerequisite:* Chemistry 1 or 5. *First semester. One credit.* Mackay School of Mines. Smyth.

54. ENGINEERING METALLURGY. Lectures and recitations for students registered in engineering schools other than the School of Mines. The course will cover the properties and uses of industrial metals and alloys, an outline of metallurgical processes, and the metallurgy of iron and steel. *Prerequisite:* Chemistry 6 and Physics 1a or 3. *Second semester. Two credits.* Mackay School of Mines. Smyth.

56. METALLOGRAPHY. This course is designed to cover the methods of preparation and microscopic examination of specimens of some of the common metals and alloys, illustrating the microstructure of pure metals and alloys, the effect of heat treatment in tempering and annealing, cooling curves, the detection of the presence of flaws and defects in metals, a study of welds, and the effects of strain and mechanical treatment. *Prerequisite, or taken with:* Metallurgy 53 and 58 or 54. Junior standing. *Second semester. Lecture, one hour; laboratory, two periods. Three credits.* Mackay School of Mines. Palmer. Fee, \$2.50.

57. METALLURGY OF THE MINOR AND RARE METALS. Lectures and recitations on the metallurgy of minor and rare metals including the following: Antimony, arsenic, aluminum, bismuth, molybdenum, platinum, tin, and tungsten. *Prerequisite:* Chemistry 10 and Physics 1a or 3. *Three credits, first semester. Two credits, second semester.* Mackay Science Hall. Haseman.

58. FERROUS METALLURGY. Lectures and recitations on the methods of producing iron and steel, the properties and uses of iron and steel, mechanical and heat treatment of steel, alloy steels, and the corrosion of metals. *Prerequisite:* Metallurgy 53. *Second semester. Two credits.* Mackay School of Mines. Smyth.

60. PYRO-METALLURGY NONFERROUS METALS. Lectures and recitations on the smelting or fire methods of extracting the common metals from their ores and refining processes for these metals by fire methods. The principal metals covered will be copper, lead, zinc, mercury and nickel. *Prerequisite:* Mineralogy 1 and Metallurgy 53 and 58. *First semester. Three credits.* Mackay School of Mines. Palmer.

65. ORE DRESSING. Lectures and recitations in ore dressing. Laws of crushing, sizing, and concentration of ores, including flotation. *Prerequisite:* Metallurgy 51 and 58. *Second semester. Lectures, two hours. Two credits.* Mackay School of Mines. Palmer.

67. ORE DRESSING LABORATORY. A laboratory course to accompany Metallurgy 65. This course covers general practice in the use of the various machines used in ore dressing. *Prerequisite:* Chemistry 9 and 10. *Second semester. Laboratory, two periods. Two credits.* Mackay School of Mines. Palmer and Smyth. Fee, \$5.

70. HYDRO-METALLURGY. Lectures, recitations, and laboratory exercises on the various hydro-metallurgical methods used in the recovery and refining of the metals gold, silver, copper, lead and zinc. *Prerequisite:* Metallurgy 51 and 65; Chemistry 10. *First semester. Lectures, two hours; laboratory, one period. Three credits.* Mackay School of Mines. Palmer. Fee, \$5.

72. ELECTROMETALLURGY. Lectures and recitations on electric smelting and the electrolytic processes involved in the metallurgy of the common and precious metals. To be taken at the same time or after completing Metallurgy 60 and 70. *Second semester. Two credits.* Mackay School of Mines. Palmer.

73. PROBLEMS AND SEMINARS. This course covers common technical and economic problems related to the design, operation, and management of metallurgical plants, and a discussion of articles upon metallurgical subjects. Open only

to students after they have completed metallurgical subjects to the second semester of the senior year. *Second semester. Two credits.* Mackay School of Mines. Palmer.

74. NONMETALLICS. A lecture course on the preparation for market and the marketing of their products of such non-metallies as cement materials, gypsum, limestone, magnesite, diatomaceous earth, borates, and others that are of importance in Nevada and the Pacific Coast States. *First semester. Two credits.* Mackay School of Mines. Carpenter.

79-80. PROJECT. This course will cover special work of a research nature in connection with some problem in ore treatment or metallurgical plant design. *Both semesters. Two credits.* Mackay School of Mines. Palmer. Deposit to be arranged according to work undertaken.

180. THESIS. Advanced research work in metallurgy. A graduate course. *Credits to be arranged.* Mackay School of Mines. Palmer. Deposit to be arranged according to work undertaken.

#### MILITARY SCIENCE AND TACTICS

COLONEL ROBERT M. BRAMBILA, U. S. ARMY, COMMANDANT  
FIRST LIEUTENANT HERBERT B. WILCOX, U. S. ARMY, INSTRUCTOR  
SERGEANT GRANT H. HUSTIS, U. S. ARMY, INSTRUCTOR

The following courses of instruction are prescribed by the War Department for Infantry Units of the Reserve Officers Training Corps:

MILITARY 1-2. Basic Course, First Year—Practical and Theoretical. The National Defense Act and the R. O. T. C.; military courtesy and discipline; military hygiene and first aid; drill and command; rifle marksmanship; scouting and patrolling. Required of all first-year men students. *Three hours per week. Both semesters. One credit each semester.*

MILITARY 3-4. Basic Course, Second Year—Practical and Theoretical. Drill and command; musketry; automatic rifle; scouting and patrolling; combat principles (rifle squad). Required of all second-year students. *Three hours per week. Both semesters. One credit each semester.*

MILITARY 51-52. First Year Advanced Course (elective)—Practical and Theoretical. Map reading and military sketching; drill and command; machine gun; 37mm and 3" mortar; combat principles (rifle section and platoon). *Five hours per week. Both semesters. First semester, two credits; second semester, three credits.*

MILITARY 53A. Advanced Camp Course. *Two credits.*

NOTE—Students taking advanced military and receiving a daily money allowance from the Government are required to attend a camp of instruction for a period of six weeks at the end of the third year. Under exceptional circumstances attendance at the camp may be deferred until the end of the fourth year. Students attending the advanced camp course receive pay at the rate of \$21 per month from the United States Government.

MILITARY 53-54. Second Year Advanced Course (elective)—Practical and Theoretical. Military law and officers' reserve corps regulations; military history of United States and policy; administration (company); military field engineering; drill and command; combat principles (rifle and machine-gun company and howitzer-company platoon). *Five hours per week. Both semesters. Two credits, first semester; three credits, second semester.*

MILITARY BAND. Students enrolled in Military and assigned to the band will receive credit for required Military at the rate of one credit for each semester. Such students will be required to attend at least two periods of band practice and one military formation per week, and will attend military formations when the band is required for parades and other military ceremonies.

#### MINERALOGY

PROFESSOR JONES, HEAD OF DEPARTMENT  
ASSOCIATE PROFESSOR GIANELLA

1. DETERMINATIVE MINERALOGY. The first few weeks are devoted to an elementary course in crystallography, followed by the determination of the more common minerals, chiefly by means of their physical properties, using such simple tests as are of easy application in the field. *Prerequisite:* Chemistry 5 and 6, or the equivalent. *First semester. Two credits.* Mackay School of Mines. Gianella. Fee, \$2.

2. BLOWPIPE ANALYSIS. The determination of minerals by blowpipe analysis. *Prerequisite:* Chemistry 5 and 6, or the equivalent. *Second semester. Two credits.* Mackay School of Mines. Gianella. Fee, \$3.

3. DESCRIPTIVE MINERALOGY. Lectures and recitations on the classification, salient properties, occurrence, genesis, and uses of the more important minerals, illustrated by typical specimens. *Prerequisite:* Mineralogy 1. *Second semester. Two credits.* Mackay School of Mines. Gianella.

51. **ADVANCED MINERALOGY.** Advanced work in either blowpipe analysis, crystallography, or the determination of minerals under the microscope. *Prerequisite:* Mineralogy 1, 2 and 3. *Either semester. One or two credits.* Mackay School of Mines. Jones and Gianella.

#### MINING

College of Engineering

DIRECTOR FULTON, HEAD OF DEPARTMENT  
PROFESSOR CARPENTER  
MR. COUCH

5. **PRACTICAL MINING.** Practical work in mining or metallurgy during the summer vacation. Such work must extend over a period of at least one month, and a satisfactory report must be prepared upon it. *Freshman, Sophomore, or Junior vacation. Required for graduation. No credit.*

45. **MINING.** Elementary mining lectures and recitations on the general principles and practice of mining. The course is designed to give others than mining students a brief insight into general mining practice. *Prerequisite:* Sophomore standing. *First semester, three credits.* Mackay School of Mines. Fulton and Carpenter.

51. **EXCAVATION.** Lectures and recitations on the principles and practice of excavation, including earth excavation, rock drills and drilling practice, explosives and blasting practice, quarrying, tunneling, shaft sinking and boring. Stress is placed upon the underlying principles of physics and chemistry. *Prerequisite:* Physics 3 and 4; Chemistry 5 and 6. *Junior year. First semester. Three credits.* 101 Mackay School of Mines. Carpenter.

52. **MINE PLANT.** Lectures on the principles and practice of underground and surface haulage, hoisting, air compression, mine drainage, ventilation and illumination. Stress is placed upon the underlying principles of physics and mechanics. *Prerequisite:* Physics 3 and 4; Mathematics 55A. *Junior year. Second semester. Three credits.* 101 Mackay School of Mines. Carpenter.

61. **MINING METHODS.** Lectures and recitations on the prospecting, development, and exploitation of mineral deposits, including underground metal mining methods in detail, with quarrying, coal mining, and placer mining methods in brief. *Prerequisite:* Mining 51 and 52. *Senior*

*year. First semester. Three credits.* 101 Mackay School of Mines. Carpenter.

72. **MINE ADMINISTRATION.** Lectures and recitations on the business, sociology, and laws of mining, including organization of staff, problems concerning power, labor and supplies, purchase and sale of ores and metallurgical products, compensation and accident insurance, welfare work, accidents and their prevention, Federal and State mining laws with mine maps and models. *Prerequisite:* Mining 61. *Senior year. Second semester. Three credits.* Carpenter.

74. **MINERAL INDUSTRY ECONOMICS.** Lectures and recitations on economic problems of mining and metallurgy and mine accounting, including incorporations and securities, depreciation, depletion, amortization, taxes, assessments and dividends, and laws governing the same, the costs of mining, milling, and marketing, and cost accounting methods. *Prerequisite:* Mining 61. *Senior year. Second semester. Three credits.* Carpenter and Couch.

89-90. **MINING PROJECT.** Two laboratory periods weekly devoted to individual problems in mining, progressing from those of small properties to specific problems concerning shaft sinking, tunneling, or the like on a large scale, and finally to working of mines based upon those in actual operation in important mining camps. Stress is placed upon amplifying the subject matter of previous mining courses and in the methods of searching for, correlating, and presenting the data gathered and worked out. *Prerequisite:* Mining 51-52. *Both semesters. Two credits each semester.* Carpenter.

99-100. **MINING RESEARCH.** Research work in mining or some allied subject. An elective course for students who, in the opinion of the instructor, are capable of undertaking research. *Both semesters. Two credits each semester.* Mackay School of Mines. Fulton and Carpenter.

101. **MINE EXAMINATION.** Lectures on the examination of metal mines and prospects. Sampling, estimation of ore, valuation of properties, forms of reports. A graduate course open as an elective to undergraduates who are suitably prepared. *Either semester. Two credits.* 102 Mackay School of Mines. Fulton and Carpenter.

199-200. THESIS. Advanced research work in mining, metallurgy, geology, or some allied science. A graduate course. *Both semesters. Four credits each semester. Total course only accepted toward degree.* Mackay School of Mines. Fulton and Carpenter.

## MODERN LANGUAGES

PROFESSOR CHAPPELLE, HEAD OF DEPARTMENT

PROFESSOR MURGOTTEN

ASSOCIATE PROFESSOR GOTTARDI

MR. KLINE

Requirements for a minor in a modern language: With no admission credit, 6 units. With two admission credits, 10 units. With four admission credits, 12 units.

Requirements for a major in modern language: With no admission credit, 12 units. With two admission credits, 16 units. With four admission credits, 18 units.

Requirements for a combined minor in Modern Languages (units in any *two* modern languages may be counted towards a combined minor): With no admission credit, 8 units. With two admission credits, 12 units. With four admission credits, 14 units.

Requirements for a combined major in Modern Languages (units in any *two* modern languages may be counted towards a combined major): With no admission credit, 14 units. With two admission credits, 18 units. With four admission credits, 20 units.

(The term "units," as used above applies only to units in courses numbered above 50.)

Students planning to present for graduation a combined major or minor in Modern Languages may be allowed to register for an extra hour of academic work in the Freshman year.

Students intending later to teach Modern Languages are urged not to restrict their courses to the minimum requirements for a major or a minor in the particular subjects. All such candidates are to confer with the head of the department.

Courses numbered above 50 and announced as offered in any year may not be given in that year unless there are at least seven candidates for the class. Some courses numbered above 50 are given only in alternate years. Consult the printed schedule of classes for the definite offerings any given semester.

In certain instances and by special permission of the head of the department, a given course numbered above 50 may be repeated for credit, provided that the entire content of the course differs from the one given previously under the same number. In such cases the course will be recorded with the catalogue number *plus A* (e. g. French 59-A).

*Arabic*

61-62. INTRODUCTION TO ARABIC. A study of the grammar of the written language. Lectures, assigned reading and reports on Mohammedan literature, history, and institutions. Open to advanced students of languages. *Both*

*semesters. Two credits each semester.* 206 Stewart Hall. Murgotten.

101-102. SECOND-YEAR ARABIC. Grammar continued. Translation of selections from the Quran and Arat historians. *Prerequisite: Arabic 61-62. Both semesters. Two credits each semester.*

*French*

1. FIRST YEAR FRENCH. Drill in the essentials of grammar. Elementary composition and conversation. *Either semester. Three credits.* Gottardi and Murgotten.

2. FIRST YEAR FRENCH (Continued). Grammar, composition and conversation. Translation of simple prose texts. *Prerequisite: French 1 or one year of high school French. Either semester. Three credits.* Gottardi and Murgotten.

3-4. SECOND YEAR FRENCH. Readings from modern French prose writers. A review of grammar. Conversation and composition. *Prerequisite: French 1-2 or two years of high school French. Both semesters. Three credits each semester.* Chappelle and Murgotten.

3A-4A. The same as French 3-4 with the exception that this class meets only once a week. Intended primarily for teachers in active service in the public schools. *Both semesters. One credit each semester.* Chappelle and Murgotten.

51-52. THE FRENCH NOVEL. Rapid reading of masterpieces of French fiction: Balzac, Sand, Mérimée, Zola, Daudet, etc. *Prerequisite: French 3-4. Both semesters. Two credits each semester.* 203 Stewart Hall.

53-54. FRENCH POETRY. A study of the French lyric poets from Villon to contemporary writers. *Prerequisite: French 3-4. Both semesters. Two credits each semester.* 204 Stewart Hall. Murgotten.

55-56. INTERMEDIATE FRENCH COMPOSITION AND CONVERSATION. This course should be taken simultaneously with the first year of Junior-Senior reading courses in French. *Prerequisite: French 3-4. Both semesters. One credit each semester.* 203 Stewart Hall.

57-58. GENERAL SURVEY OF FRENCH LITERATURE. The history of French literature with detailed study of special periods. Assigned outside readings and reports on works read. *Prerequisite: Four credits of Junior-Senior work. Both semesters. Two credits each semester.* 204 Stewart Hall. Chappelle.

59-60. SCIENTIFIC FRENCH. Readings from standard French works on science and from recent numbers of French scientific magazines. This course is particularly recommended to premedical students and to those who intend to specialize in any one of the scientific fields. *Prerequisite:* French 3-4. *Both semesters. Two credits each semester.* 204 Stewart Hall. Chappelle.

69. FRENCH CLASSIC DRAMA. A special study of the works of Corneille, Racine and Molière. *Prerequisite:* French 3-4. *First semester. Two credits.* 206 Stewart Hall. Murgotten.

70. FRENCH ROMANTIC DRAMA. A study of the drama of the romantic school with special reference to the works of Victor Hugo. *Prerequisite:* French 3-4. (It is advised that students take French 69 before electing French 70.) *Second semester. Two credits.* 206 Stewart Hall. Murgotten.

73-74. ADVANCED FRENCH COMPOSITION AND CONVERSATION. Includes a study of French epistolary style and commercial correspondence. This course should be taken simultaneously with the second year of Junior-Senior reading courses in French. *Prerequisite:* French 3-4. *Both semesters. One credit each semester.* 203 Stewart Hall.

81-82. THE EIGHTEENTH CENTURY IN FRENCH LITERATURE. A study of the works of Montesquieu, Voltaire, Rousseau, etc. *Prerequisite:* Four credits of Junior-Senior work. *Both semesters. Two credits each semester.* 204 Stewart Hall. Chappelle.

89-90. FRENCH PHONETICS. A study of pronunciation on the basis of practical phonetics. This course is especially arranged for prospective teachers of French. *Prerequisite:* Two units of Junior-Senior work. *Both semesters. Two credits each semester.* 206 Stewart Hall. Gottardi.

#### German

1. FIRST YEAR GERMAN. A systematic study of grammar. *First semester. Three credits.* 206 Stewart Hall. Chappelle and Murgotten.

2. FIRST YEAR GERMAN (Continued). Grammar and composition. Reading of easy prose and poetry. *Prerequisite:* German 1, or one year of high school German. *Second semester. Three credits.* 206 Stewart Hall. Chappelle and Murgotten.

3-4. INTERMEDIATE GERMAN. Grammar review. Reading of German short stories, with exercises in conversation and composition. *Prerequisite:* German 1-2, or two years of high school German. *Both semesters. Three credits each semester.* 206 Stewart Hall. Chappelle.

3A-4A. The same as German 3-4, except that this class meets only once a week. Intended primarily for teachers in active service in the public schools and for students from other departments who need this course to help fulfill their language requirements. *Both semesters. One credit each semester.* 204 Stewart Hall. Chappelle.

51-52. THE GERMAN NOVEL. Rapid reading of masterpieces of German fiction: Scheffel, Baumbach, Sudermann, Thomas Mann. *Prerequisite:* German 3-4. *Both semesters. Two credits each semester.* 206 Stewart Hall. Chappelle.

57-58. GENERAL SURVEY OF GERMAN LITERATURE. The history of German literature with detailed study of special periods. Assigned readings and reports on works read. *Prerequisite:* Four credits of Junior-Senior work. *Both semesters. Two credits each semester.* 204 Stewart Hall. Chappelle.

59-60. SCIENTIFIC GERMAN. Readings from German scientific works, with special emphasis on Chemistry and Physics. This course is particularly recommended to premedical students and to those who intend to specialize in any one of the scientific fields. *Prerequisite:* German 3. *Both semesters. Two credits each semester.* 204 Stewart Hall. Chappelle.

69-70. GERMAN CLASSICS. Reading and technical study of representative works of Lessing, Schiller, and Goethe. *Prerequisite:* German 3-4. *Both semesters. Two credits each semester.* 206 Stewart Hall. Chappelle.

79-80. ADVANCED COMPOSITION. A study of German epistolary style, business correspondence, free composition. This course should be taken simultaneously with the Junior-Senior reading courses. *Both semesters. One credit each semester.* 206 Stewart Hall.

#### Italian

1-2. FIRST YEAR ITALIAN. Grammar, composition, and conversation. Reading of modern Italian prose. *Both semesters. Three credits each semester.* 204 Stewart Hall. Gottardi.

51-52. THE ITALIAN NOVEL. Rapid reading of masterpieces of modern Italian fiction: Manzoni, Fogazzaro, Verga, etc. *Prerequisite:* Italian 1-2. *Both semesters. Two credits each semester.* 206 Stewart Hall. Gottardi.

53-54. ITALIAN LITERATURE OF THE EIGHTEENTH AND NINETEENTH CENTURIES. Reading of important works of prose and poetry of the period, with a study of literary movements. *Prerequisite:* Italian 1-2. *Both semesters. Two credits each semester.* 203 Stewart Hall.

55-56. INTERMEDIATE COMPOSITION. *Prerequisite:* Italian 1-2. *Both semesters. One credit each semester.* 203 Stewart Hall.

#### Portuguese

61-62. INTRODUCTION TO PORTUGUESE. A study of grammar. Reading of texts on Brazilian subjects. Conversation based on the Brazilian norm. *Prerequisite:* Four units of Junior-Senior work in any one other Romanic language. *Both semesters. Two credits each semester.* 204 Stewart Hall.

#### Spanish

1. FIRST YEAR SPANISH. Drill in the essentials of grammar. Elementary composition and conversation. *Either semester. Three credits.* Kline.

2. FIRST YEAR SPANISH (Continued). Grammar, composition and conversation. Translation of simple prose and poetry. *Prerequisite:* Spanish 1 or one year of high school Spanish. *Either semester. Three credits.* Kline.

3-4. SECOND YEAR SPANISH. Readings from modern Spanish writers. A review of grammar. Conversation and composition. *Prerequisite:* Spanish 1-2 or two years of high school Spanish. *Both semesters. Three credits each semester.* Chappelle and Kline.

3A-4A. The same as Spanish 3-4 with the exception that this class meets only once a week. Intended primarily for teachers in active service in the public schools. *Both semesters. One credit each semester.* Chappelle and Kline.

Spanish 11-12. Intermediate Spanish. *Prerequisite:* Spanish 3-4. Intended for students who wish to complete their language requirement in this subject, but who are not planning to offer Spanish as a major or a minor. *Both semesters. Three credits each semester.*

51-52. THE MODERN SPANISH NOVEL. Rapid reading of masterpieces of Spanish fiction: Galdós; Valdés; Ibáñez; etc. *Prerequisite:* Spanish 3-4. *Both semesters. Two credits each semester.* 201 Stewart Hall.

53. COMMERCIAL AND JOURNALISTIC SPANISH. Readings dealing primarily with Spanish-American social and economic conditions. *Prerequisite:* Spanish 3-4. *First semester. Two credits.* 201 Stewart Hall.

55. COMMERCIAL CORRESPONDENCE. A composition course to accompany Spanish 53. *Prerequisite:* Spanish 3-4. *First semester. One credit.* 201 Stewart Hall.

56. INTERMEDIATE SPANISH COMPOSITION AND CONVERSATION. This course should be taken with the first year of Junior-Senior reading courses in Spanish. *Prerequisite:* Spanish 3-4. *Second semester. One credit.* 201 Stewart Hall.

57-58. GENERAL SURVEY OF SPANISH LITERATURE. The history of Spanish literature with detailed study of special periods. Assigned outside readings and reports on works read. *Prerequisite:* Four credits of Junior-Senior work. *Both semesters. Two credits each semester.* 201 Stewart Hall.

67-68. EARLY SPANISH NOVEL. Reading of Spanish prose of the Sixteenth, Seventeenth and Eighteenth Centuries. A study of novelistic movements. Montalvo, Montemayor, Cervantes, Inevado. Collateral reading. *Both semesters. Two credits each semester.* 201 Stewart Hall.

70. MODERN SPANISH DRAMA. A study of Spanish dramatic literature from the Golden Age to the Twentieth Century. *Prerequisite:* Spanish 3-4. *Second semester. Two credits.* 201 Stewart Hall.

79-80. ADVANCED SPANISH PROSE COMPOSITION AND CONVERSATION. This course should be taken simultaneously with the second year of Junior-Senior reading courses in Spanish. *Prerequisite:* Spanish 3-4. *Both semesters. One credit each semester.* Murgotten.

81-82. SPANISH CLASSICS. Literature of the Sixteenth and Seventeenth Centuries—Cervantes; Lope de Vega; Tirso de Molina; etc. *Prerequisite:* Four credits Junior-Senior work. *Both semesters. Two credits each semester.* 201 Stewart Hall.

## MUSIC

PROFESSOR POST, HEAD OF DEPARTMENT

Requirements for a minor in Music: 1-2, 5, 10, 11-12, 50-51, 54-55, 57.

1-2. MUSIC READING AND EAR TRAINING (for elementary teachers and students preparing for Harmony). Learning to read by "sol-fa" system of simple unison and two-part folk songs in all keys and common rhythms. Notation, terminology, intervals, scales. *Both semesters. One credit each semester.* 204 Education Building. Post.

5. PUBLIC SCHOOL MUSIC METHODS (for teachers who have had Music 1 and 2, or its equivalent). The aims and principles of music teaching in the kindergarten, elementary and upper grades, and high school. Rote songs, folk songs, part songs, care of child voice, song leading, music appreciation, and music problems confronting the teacher generally. *First semester. Two credits.* 204 Education Building. Post.

10. APPRECIATION OF MUSIC (open to all University students. No previous training necessary). Content of music as found in some representative masterpieces from the point of view of the listener. Limited lectures, recitals in the classroom and the phonograph provide material for study. *First semester. Two credits.* 204 Education Building. Post.

11-12A. WOMEN'S GLEE CLUB. Open to all women students. Membership limited to those who have been examined and approved by the Director. Representative selections from the best musical literature for women's voices will be studied and produced in one or more public concerts. *Two semesters. One credit each semester.* 204 Education Building. Post.

11-12A. MEN'S GLEE CLUB. Open to all men students. Membership limited to those who have been examined and approved by the Director. Representative selections from the best musical literature for men's voices will be studied and produced in one or more public concerts. *Two semesters. One credit each semester.* 204 Education Building. Post.

15-16A. UNIVERSITY AND COMMUNITY LITTLE SYMPHONY ORCHESTRA. Open to all men and women students who play

orchestral instruments, subject to examination and approval of the Director. Regular rehearsal is held each week and several public concerts are given during the year. Programs are made up of representative classical works of great composers of all periods. *Two semesters. One-half credit each.* 204 Education Building. Post.

17-18. BAND. See under Military for a description of the requirements and credits for this work. Civilian members of the Band may receive corresponding credit in the Music Department if they meet those requirements. Post.

50-51. HARMONY (open to all students who have had Music 1 and 2 or the equivalent). Study of scales, intervals, fundamental triads, seventh chords, in the major and minor modes. Ear training, keyboard drill, simple analysis, harmonization of melodies. Some original work. *Two semesters. Three credits each.* 204 Education Building. Post.

52-53. ADVANCED HARMONY. Study of secondary sevenths, ninth chords, altered chords, modulation, suspensions and passing tones, analysis, original work. Continued ear training. Open to all students who have had Music 50-51, or the equivalent. *Two semesters. Three credits each.* 204 Education Building. Post.

54-55(A and B). GLEE CLUBS. For description, see Music 11 and 12, A and B. *Prerequisite:* Music 11-12. *Two semesters. One credit each semester.* 204 Education Building. Post.

57. HISTORY OF MUSIC (open to all students. No technical knowledge required). The general history of music, considered from the standpoint of its evolution as a part of the development of civilization. Lecture course with collateral reading. Limited illustrations from representative works. *Second semester. Two credits.* 204 Education Building. Post.

59-60A. UNIVERSITY AND COMMUNITY LITTLE SYMPHONY ORCHESTRA. For description see Music 15-16A. *Prerequisite:* Music 15-16A. *Two semesters. One-half credit each.* 204 Education Building. Post.

63-64. BAND. For general description, see Music 17-18. *Prerequisite:* Music 17-18. Post.

## ORIENTATION

1. ENGINEERING ORIENTATION. The course is designed to lay before the Freshmen engineering students upon entering the University the difficulties and rewards of college life and of engineering as a life profession.

One period a week deals with the University requirements for entrance, for residence, for graduation and for advanced degrees, stressing the need of and best methods of acquiring a good scholarship record, bringing out the benefits thereof, and kindred subjects.

One period a week is given to lectures by the engineering faculty on the course of study of each engineering school, the nature of work its graduates enter, and the drawbacks and possibilities of that branch of engineering, with the purpose of the lectures being to aid or confirm the student in his choice of engineering school. *First semester. Two lectures a week. One credit. Required of all Engineering Freshmen.* Carpenter and Engineering Faculty.

2. GENERAL ORIENTATION. A course designed to acquaint the students entering the University with the rules and customs of the college community and the opportunities for study offered by the different schools and departments of the University. During the first part of the semester, student body rules and University requirements will be explained; methods for study, use of library, and various University facilities will be discussed. Later in the semester, some elementary outlines of the content of the several fields of knowledge will be offered, and finally, aid will be given in the methods of vocational self guidance.

## PHILOSOPHY

PROFESSOR THOMPSON, HEAD OF DEPARTMENT

Requirements for a major in Philosophy: Psychology 5, Philosophy 7 or 8 and 21, and 12 units in courses 51 to 100.

Requirements for a minor in Philosophy: Psychology 5, Philosophy 7 or 8 and 21, and 6 units in courses 51 to 100.

1. INTRODUCTION TO PHILOSOPHY. A brief study of the problems of philosophy with the solutions suggested by the various schools. Designed both for the student who wishes a perspective for further work in philosophy, and for the student who desires a general knowledge of the scope and methods of philosophy. *No prerequisite. Either semester. Two credits.* 5 Library Seminar. Thompson.

7. DEDUCTIVE LOGIC. Terms, definition, division, syllogism and fallacies. Text, lectures and exercises. *No prerequisite. First semester. Three credits.* 5 Library Seminar. Thompson.

8. INDUCTIVE LOGIC. The assumptions of induction methods of scientific investigation, fallacies, the tests of truth. Text, lectures and exercises. *No prerequisite. Second semester. Three credits.* 5 Library Seminar. Thompson.

21. ETHICAL THEORIES. A study of the leading theories of moral principles and ideals. Among the topics discussed will be the concept of the good, duty, egoism, altruism, freedom, responsibility, and the doctrine of virtues. Open to Sophomores. *First semester. Three credits.* 5 Library Seminar. Thompson.

22. APPLIED ETHICS. The application of ethical theory to typical problems of institutional life, property, and the family. Open to Sophomores. *Second semester. Three credits.* 5 Library Seminar. Thompson.

28. SOCIAL ETHICS. A brief study of the fundamental ethical principles based upon concrete social problems. Required of Sophomores in the two-year Normal course. *Second semester. Two credits.* 5 Library Seminar. Thompson.

51. HISTORY OF ANCIENT PHILOSOPHY. A study of Greek and Roman Philosophy, and of Medieval Philosophy to the decline of scholasticism. *Prerequisite:* One course in Philosophy. *First semester. Two or three credits according to the work done.* 5 Library Seminar. Thompson.

52. HISTORY OF MODERN PHILOSOPHY. A study of the problems and concepts of philosophy from Descartes to the present time. *Prerequisite:* One course in Philosophy. *Second semester. Two or three credits according to the work done.* 5 Library Seminar. Thompson.

53-54. PHILOSOPHICAL TENDENCIES OF THE PRESENT. A review and criticism of the main tendencies in present philosophical thought with reference to concrete social problems. Special attention will be given to absolutism, pragmatism, pluralism, and the philosophy of James. *Prerequisite:* One course in Philosophy. *Both semesters. Two credits each semester.* Alternates with Philosophy 51 and 52. 5 Library Seminar. Thompson.

61. INTRODUCTION TO RELIGION. A study of the forms and psychological aspects of religious experience with special reference to typical historic religions. *Prerequisite:* One course in Philosophy or Education 5. *First semester. Two to three credits according to work done.* 5 Library Seminar. Thompson.

62. PHILOSOPHY OF RELIGION. The meaning and validity of religious experience. Among the topics discussed will be the religious conception of God, the world, revelation, faith, prayer, evil, immortality. *Prerequisite:* One course in Philosophy and Psychology 5. *Second semester. Two or three credits according to the work done.* 5 Library Seminar. Thompson.

83-84. METAPHYSICS. A constructive study of the problems of being, unity, order, and individuality, with practical applications of the theory developed. *Prerequisite:* Two courses in Philosophy and Psychology 5. *Both semesters. Two credits each semester.* 5 Library Seminar. Thompson.

100. RESEARCH COURSE. The thesis may be selected in any field of Philosophy. For Seniors only. *Prerequisite:* The equivalent of a minor in Philosophy. *Either semester. Two credits.* 5 Library Seminar. Thompson.

#### PHYSICAL EDUCATION

##### Men

PROFESSOR MARTIE

ASSISTANT PROFESSOR SCRANTON

Requirements for a minor in Physical Education: Courses 1, 2, 3, 4, or equivalent, 9, 10, and ten units in courses above 50. Participation in at least one major sport. In meeting the College requirement in Science and Mathematics, Zoology 7 and 8 is strongly recommended.

1. DEVELOPMENTAL EXERCISES. Physical examinations are required at the beginning of the semester. Strength tests are given at beginning and again at end of semester. Practical work consists in Mass Athletics; games selected with a view of developing alertness, coordination, muscular control, vigor and rythm. When the weather permits, the work is done out of doors. *Freshman year. (Required.) First semester. Two hours per week. One-half credit.*

2. DEVELOPMENTAL EXERCISES. Continuation of course 1

with addition of calisthenics and light apparatus. *Second semester. One-half credit.*

3. ADVANCED EXERCISES. Strength tests will be continued as in Freshman year. Practical work consists in mat work, rumbling, heavy apparatus using long and short horse and buck. *Sophomore year. (Required.) First semester. Two hours per week. One-half credit.*

4. ADVANCED EXERCISES. Continuation of course 3. Heavy apparatus consisting of work with parallel bar, low and high horizontal bars, ladder and stall bar. *Second semester. One-half credit.*

By obtaining consent of the Director of the Department a student may elect any of the following sports as a substitute for the practical work in courses 1, 2, 3, and 4: Football, basket ball, track, tennis, volley ball, cross country and hand ball. *First semester. Two hours per week. One-half credit.*

5-8. SPECIAL CORRECTIVE EXERCISES. This course is designed for all Freshmen and Sophomores whose physical examinations show they are unfitted to take courses 1, 2, 3, and 4. *One-half credit for each semester's work up to and including four semesters.* Martie.

9. ADVANCED WORK (paralleling courses 3 and 4.) *Aim:* To develop squad leaders and to assist men to qualify for a state certificate to teach physical education in high schools. *First semester. Three hours per week. One hour credit.* Martie.

10. CONTINUATION OF COURSE 9. *Second semester. Three hours per week. One hour credit.* Martie.

51. FOOTBALL IN THEORY AND PRACTICE. A course of lectures and practical demonstrations for those who may wish to coach, or for players who are out for the varsity or for those who are interested in and wish a more intimate knowledge of America's greatest game. Open only to Juniors or Seniors who have had two or more years' college experience in this sport. *First semester. One lecture per week and one hour laboratory. Two credits.* Not given unless eight or more are enrolled. Scranton.

52. BASKET BALL IN THEORY AND PRACTICE. A course of lectures and practical demonstrations in America's leading winter indoor sport. *Second semester. One lecture and one hour laboratory per week. Two credits.* The same conditions for enrollment must be met as in course 51. Martie.

53. TREATMENT OF ATHLETIC INJURIES. This is a course in first aid with special emphasis on common athletic injuries. It will include the various uses of tape, bandages, splints, etc. Time will be given to the study of the prevention of injuries such as sprains, charley horse, tackle shoulder, blood poison, blisters, etc., as well as treatment for same. *Three periods per week. Two credits. First semester.*

54. TRACK AND FIELD ATHLETICS. Lectures and demonstrations on each track and field event. *Second semester. One lecture and one hour laboratory per week. Two credits.* The same conditions for enrollment must be met as in course 51. Martie.

55. PLAYGROUND. *Prerequisite:* Physical Education 53. A study of playground methods, apparatus, and organization. Special attention is given to group games for all ages. Also to the "Gang" problem as related to playground. *Three periods per week. Two credits. First semester.* Martie.

56. ANTHROPOMETRY. This is a course in physical measurements and methods of detecting physical defects. It will include practical use of charts in connection with physical development. *Three periods per week. Two credits. Second semester.* Martie.

57. OFFICIATING MAJOR SPORTS. A careful study of the rules of football, basket ball, and track, with interpretations, methods of officiating, and characteristics of officials. *Three periods per week. Two credits. First semester.* Scranton.

58. ADMINISTRATION AND ORGANIZATION OF HIGH SCHOOL ATHLETICS. A course covering high school competition in general, methods of organizing athletic associations and administration of same. *Three periods per week. Two credits. Second semester.* Martie.

59. CORRECTIVE GYMNASTICS. The work will consist of lectures covering the biological, sociological, and physiological aspects of the causes of functional and structural defects. Practical work will include the use of apparatus and the adaptation of various forms of exercise to the needs of the individual.

- (a) Improving functional organic capacity.
- (b) Correction of physical defects.
- (c) Measurements of motor ability.

*Three periods per week. Two credits. First semester.* Martie.

## PHYSICAL EDUCATION

## Women

PROFESSOR SAMETH, HEAD OF DEPARTMENT  
MRS. SIMAS, INSTRUCTOR

Requirements for a minor in Physical Education: It is recommended that students desiring a minor in Physical Education fulfill their science requirement in Biology. It is also recommended that students interested in taking advanced dancing take Music 10 or its equivalent. Courses—Physical Education 1, 2, 3, 4, 10, 23, 24, 31, 32, 55, 56, 59, 60, and two years of participation in Athletics.

1, 2, 3, 4. COURSES REQUIRED FOR GRADUATION. Numbered in the order in which they are taken. One and two have each one unit of credit (3 periods); three and four each have one-half unit of credit (2 periods).

A—DANCING (including clogging, interpretation, etc.).

B—GYMNASTICS (including marching, general posture training, etc.).

C—ORGANIZED GAMES (relays and simple games leading up to field ball, soccer, indoor baseball, etc.).

D—STUNTS AND TUMBLING.

E—GENERAL WORK (required of students in Education, consisting of a combination of the preceding).

5-6. INDIVIDUAL OR ADAPTED GROUP GYMNASTICS. Individual or adapted group gymnastics, planned to meet specific needs such as correction for feet, abdomen, spine, etc. Recommended for all first and second semester students who, upon examination, show a need of it. *Four 20-minute periods a week. One credit each semester.*

7-8. Continuation of P. E. 5-6.

10. MATERIAL COURSE. Required of students in Education and of Physical Education minors. The object of this course is to give those who intend to teach, singing games and folk dances suitable for use in the grades. Most of the semester will be used for practical work. *Prerequisite:* Physical Education 1-2 or the equivalent. *Two periods. One semester. One credit.* Gymnasium.

23. PRINCIPALS OF PHYSICAL EDUCATION. Their development in relation to general education, health education, play, and recreation. *Prerequisite:* Home Economics 33, or its equivalent. *First semester. One period. One credit.*

24. Organization and leadership of recreational activities as applied to after-school programs, play days, camping, clubs, etc. *Second semester. Two periods. Two credits.*

31-32. DANCING. Dancing, including clog, folk and interpretation. Open to all who have had the equivalent of Physical Education 1-2. *Three periods. Both semesters. One credit each semester.*

53-54. ADVANCED DANCING. A continuation of Physical Education 31-32. This course will include the construction of at least one festival or pageant, as well as at least two dances. *Three periods. Both semesters. One credit each semester.*

55. KINESIOLOGY. *Prerequisite:* Physical Education 1-2 and 3. The chief object of this course is to familiarize the student with the mechanism of the human body, dealing particularly with the shoulder, girdle, spine, pelvis, and feet, so that the student will be prepared to study intelligently cases of round shoulders, spinal curvature, and flat feet. *Three periods. First semester. Three credits. Gymnasium.*

56. CORRECTIVE GYMNASTICS. Anthropometry and corrective gymnastics. *Prerequisite:* Physical Education 55. The course is intended to be a practical application of Physical Education 55. Students will be given the opportunity to prescribe exercises for students taking Physical Education 5-6, 7-8. Each student will be expected to measure at least two adults and three children. *Three periods. Second semester. Two credits. Gymnasium.*

59-60. THEORY AND PRACTICE OF DIRECTING TEAM AND INDIVIDUAL SPORTS. This course includes a study of the essentials of the technic and game forms leading up to soccer, hockey, volley ball, basket ball, baseball, swimming, archery and tennis. Opportunity will be given for actual practice in teaching and officiating. *Prerequisite:* At least two years' participation in college athletics. *Two lecture periods per week; two laboratory periods per week. Both semesters. Two credits each semester.*

101-102. PROBLEMS IN PHYSICAL EDUCATION. Experimental study of problems in this field. Open only to seniors or graduate students who have had the equivalent of a minor in Physical Education. *Two to five credits.*

103-104. PROBLEMS IN HEALTH EDUCATION. Experimental study of problems in this field. Open only to seniors or graduate students who have had the equivalent of a minor in Physical Education and the equivalent of a minor in Hygiene or Zoology. *Two to five credits.*

RECREATION. All women, whether registered for Physical Education courses or not, are given an opportunity to receive instruction and to participate in soccer, hockey, tennis, swimming (\$5.25 per semester; twice each week), archery, rifle, volley ball, basket ball, and baseball or track. In addition to these activities all classes in floor work or dancing are open to any who wish to attend without University credit. The only requirements for these activities are physical fitness and regular attendance.

#### PHYSICS

PROFESSOR HARTMAN, HEAD OF DEPARTMENT

ASSOCIATE PROFESSOR BLAIR

ASSOCIATE PROFESSOR LEIFSON

Requirements for a minor in Physics: Physics 53-54 and 55-56.

Requirements for a major in Physics: 53-54, 55-56, and four additional units approved by the department.

Requirement for a teacher's recommendation in Physics: a major or a minor in the department.

1A-2A. GENERAL PHYSICS. A course in general physics primarily for students in arts and science, medicine and agriculture. Lectures and recitations with experimental demonstrations and problem work. No credit for either semester of this course will be given unless accompanied by the corresponding course in Physics 1b-2b. *Prerequisite:* Plane Geometry. A knowledge of trigonometry is desirable. *Both semesters. Three credits each semester.* Mackay Science Hall. Blair and Leifson.

1B-2B. GENERAL PHYSICS LABORATORY. A laboratory course to make the student an intelligent observer of medicine and agriculture. To accompany Physics 1a-2a. Experimental work, largely quantitative in character and designed to illustrate fundamental physical principles and to develop skill and accuracy in the methods of physical measurement. No credit for either semester will be given unless accompanied by the corresponding course in Physics 1a-2a. *Prerequisite:* Plane Geometry. A knowledge of trigonometry is desirable. *Both semesters. One credit each semester.* Mackay Science Hall. Blair and Leifson. Fee, \$3.

3-4. GENERAL PHYSICS FOR ENGINEERS. Mechanics and heat, sound and light, and electricity and magnetism. Lectures and recitations are fully illustrated by experimental demonstrations at the lecture table and by problems. *Prerequisite:* Mathematics 7, 11, 13, and 14. *Both semesters. Five credits each semester.* Mackay Science Hall. Hartman.

5-6. **PHYSICAL MEASUREMENTS.** Experimental work of distinctly quantitative character is done in mechanics and heat, sound and light, and electricity and magnetism. The methods selected involve fundamental physical principles, and illustrate their most important applications. *Prerequisite:* Mathematics 7, 11, 13, and 14. *Both semesters. Credits to be arranged, with a maximum of six credits for the course.* Mackay Science Hall. Blair and Leifson. Fee, \$3.

7. **DESCRIPTIVE ASTRONOMY.** A brief course in astronomy designed to acquaint the student with the most important facts relating to the heavenly bodies. The object of the course is to make the student an intelligent observer of the more common astronomical phenomena. Descriptive rather than mathematical in character. Not open to Freshmen and not accepted as part of Freshman science requirement. *Second semester. Three credits. Two scheduled periods and one evening hour per week to be arranged.* Mackay Science Hall. Blair.

19-20. **HOUSEHOLD PHYSICS.** A course in general physics for students in home economics. The practical applications of physics in the home will be emphasized. *Prerequisite:* A thorough knowledge of elementary algebra and plane geometry. *Both semesters. Lecture, recitation and quiz, two hours; laboratory, one period. Three credits each semester.* Mackay Science Hall. Blair. Fee, \$3.

24. **PRACTICAL CALCULATION.** Graphical methods of determining the relationship between physical quantities. The adjustment of graphs to increase the accuracy of computed results. Practice in the arrangement of logarithmic calculation so that the minimum amount of labor is involved in the solution of complicated equations. Differential correction of results. Interpolation and the use of interpolation formula. Computation of probable error and estimation of accuracy of data and results. *Prerequisite:* Differential Calculus. *Second semester. One credit. One three-hour computing period per week.* Mackay Science Hall. Blair.

53-54. **GENERAL PHYSICS FOR ARTS AND SCIENCE STUDENTS OF THE SENIOR COLLEGE.** Mechanics and heat, sound and light, and electricity and magnetism. Lectures and recitations are fully illustrated by experimental demonstrations at

the lecture table and by problems. *Prerequisite:* Mathematics 7, 13, and 14. *Both semesters. Five credits each semester.* Mackay Science Hall. Hartman.

55-56. **PHYSICAL MEASUREMENTS.** Experimental work of distinctly quantitative character is done in mechanics and heat, sound and light, and electricity and magnetism. The methods selected involve fundamental physical principles, and illustrate their most important application. *Prerequisite:* Mathematics 7, 13, and 14. *Both semesters. Credits to be arranged, with six credits as maximum for the course.* Mackay Science Hall. Blair and Leifson. Fee, \$3.

57-58. **ELECTRICAL MEASUREMENTS.** Precise measurements of current electromotive force and power, with both alternating and direct current. Calibration of instruments, determination of resistance, capacity, mutual inductance, and self-inductance. Hysteresis. Photometry. Illumination. One hour each week will be devoted to discussion and reports. *Prerequisite:* Physics 53-54 and 55-56. *Either semester. One or two credits per semester.* Mackay Science Hall. Hartman and Leifson. Fee, \$3.

59-60. **HEAT AND THERMODYNAMICS.** Lectures and recitations accompanied by experimental work of a quantitative character. This course, together with Physics 61-62, is introductory to Mathematical Physics. Many of the more difficult subjects merely touched upon in Physics 1a-2a, 1b-2b, or 3-4, will be fully treated. (Alternates with Physics 61-62.) *Prerequisite:* Physics 1a-2a, 1b-2b, or 53-54 and 55-56, and Mathematics 14, 25, and 26. *Both semesters. Two credits each semester.* Mackay Science Hall. Hartman.

61-62. **LIGHT AND PHYSICAL OPTICS.** Lectures; experimental illustration on selected topics in light, including discussion of wave theory, diffraction, interference, resolving power of optical instruments, dispersion and absorption, spectrum analysis, double refraction, and polarization. (Alternates with Physics 59-60.) *Prerequisite:* Physics 53-54 and 55-56; Mathematics 14, 25, and 26. *Both semesters. Two credits each semester.* Mackay Science Hall. Hartman, Blair and Leifson.

63. **PHYSICAL OPTICS.** Laboratory exercises in connection with course 61-62. *First semester. Two credits.* Mackay Science Hall. Hartman, Blair and Leifson. Fee, \$3.

65-66. HISTORY OF PHYSICS. Lectures and recitations. Preparation of reports and discussion of assigned topics by members of the class. *Prerequisite:* Physics 1a-2a, 1b-2b, or 53-54, and 55-56. *Both semesters. One credit.* Mackay Science Hall. Hartman.

68. ELECTRIC LIGHTING. The application of physical principles to the various problems of electric lighting, photometry, and miscellaneous applications of electricity. *Prerequisite:* Physics 53-54 and 55-56, and Mathematics 14, 25, and 26. *Second semester. Two credits.* Mackay Science Hall. Hartman.

71-72. ELECTRICAL THEORY OF MATTER. Lectures and experimental illustrations. Discussion of important topics in the fields of radiation and the structure of atoms and molecules. Introduction to quantum mechanics. *Prerequisite:* General Physics, Integral and Differential Calculus. *Two credits each semester.* Mackay Science Hall. Leifson.

73-74. ELECTROMAGNETIC THEORY. Introduction to the mathematical theory of electricity and magnetism. Solution of problems by exact reasoning from fundamental principles. *Prerequisite:* General Physics, Differential and Integral Calculus. *Either semester. Two credits.* Mackay Science Hall. Leifson.

75-76. GLASSBLOWING. A laboratory course of instruction in methods of making simple glass apparatus. *Either semester. One credit.* Mackay Science Hall. Leifson. Fee, \$5.

77-78. THERMIONIC VACUUM TUBES. A laboratory course of selected problems involving the determination of constants of vacuum tubes and vacuum tube circuits. One hour each week will be devoted to discussion and reports. *Prerequisite:* Physics 3-4-5-6 (or the equivalent), Differential and Integral Calculus. *Either semester. Two credits per semester.* Mackay Science Hall. Leifson. Fee, \$3.

101-102. MATHEMATICAL PHYSICS. An introduction to the more advanced mathematical analysis as applied to general physical problems. *Prerequisite:* Physics 53-54, 55-56, 57-58, and 59-60, and Mathematics 14, 25, 26, and 85. *Both semesters. One credit each semester.* Mackay Science Hall. Hartman.

103-104. THESIS WORK, and all special laboratory work not in the courses announced above. *Both semesters. Credits to be arranged.* Mackay Science Hall. Hartman.

## POULTRY HUSBANDRY

College of Agriculture

HEAD OF DEPARTMENT

2. FARM POULTRY MANAGEMENT. Raising poultry under farm conditions. This course deals with the housing, raising of poultry, handling of stock for the market, and egg production, killing, dressing, diseases, hatching, and rearing of young chicks. Trips to local poultry farms. It is taught with special reference to farm conditions. *First semester. Two lectures. Two credits.* 105 Agricultural Building.

4. JUDGING AND CULLING. This course deals with all the principal breeds of poultry as given in the American Standard of Perfection, which is used as a text. The laboratory work consists of judging such poultry as can be obtained in Reno and vicinity, examination of hens to estimate production, demonstrations in marketing and caponizing. *Second semester. One lecture, one laboratory. Two credits.* 105 Agricultural Building. Fee, \$2.

6. INCUBATION AND BROODING. Practical work with incubators and brooders. *Laboratory, one period. One credit. Second semester.* Fee, \$2.

8. TURKEY PRODUCTION AND MANAGEMENT. This course deals with the practical management of turkeys, primarily for meat production. No laboratory period is arranged for, but about two trips are planned each year, one at marketing time and one at hatching and breeding time. *Second semester. Two credits.* Text: Turkey Production and Management, by L. E. Cline. Fee, \$2.

## PSYCHOLOGY

PROFESSOR YOUNG, HEAD OF DEPARTMENT  
MR. IRWIN

Requirements for a major: Philosophy 1 or 2, Zoology 55, Sociology 71, Psychology 5, 51, 60, 62, 63, and six additional hours in the department.

Requirements for a minor: Psychology 5, 6 or 10, 62, and ten additional hours in the department.

2. HUMAN NATURE. A birdseye view of man's instincts, capacities and mental traits. The laws of learning and habit-formation are emphasized. The principal aims of the course are: (1) To furnish a basis for the development of an effective method of study; (2) to present the principles that should be recognized in the conscious building of character;

and (3) to develop greater social sympathy and understanding. This course is open to Freshmen. *Second semester. Two credits.* Education Building.

5. GENERAL PSYCHOLOGY. An introductory course dealing with forms and laws of consciousness. Lectures, prescribed readings, term paper. Not open to Freshmen. Required for two-year Normal and high-school teacher's diplomas. *Either semester. Three credits.* Education Building.

6. ELEMENTARY EDUCATIONAL PSYCHOLOGY. A consideration of the applications of psychology to educational problems. Required of normal students and four-year students seeking the high school teacher's diploma. *Prerequisite: Psychology 5. Second semester. Three credits.* Education Building.

10. PSYCHOLOGY OF ADOLESCENCE. An intensive study of the characteristics dominant in the adolescent, with special emphasis upon applications to the work of the high-school teacher. Required for high-school teacher's diploma. *Second semester. Two credits.* Education Building.

12. PSYCHOLOGY OF OCCUPATIONS. A brief review of the fundamental principles of psychology, and a study of their applications in the chief industries and occupations of mankind. *Second semester. Two credits.* Education Building.

40. MENTAL HYGIENE. A consideration of the principles of psychology in their relationship to mental health and efficiency. *Second semester. Three credits.*

51. SOCIAL PSYCHOLOGY. A study of the applications of psychology to the group-life of society: Communities, parties, nations, mobs, amusements, etc. *Prerequisite: Psychology 5, or its equivalent. First semester. Three credits.* Education Building.

55. ABNORMAL PSYCHOLOGY. A study of the abnormal mind in its relation to behavior. The theory of the unconscious mind, sleep, dreams, hypnotism, and obsessions are major topics in the course. *Prerequisite: Psychology 5, or its equivalent. First semester. Three credits.* Education Building.

57. PSYCHOLOGY OF ADVERTISING. An intensive study of the psychological laws which are basic in all effective advertising. *First semester. Two credits.*

59. MENTAL MEASUREMENTS. Lectures, practice, readings. Description of the more important tests of general intelligence and special ability, with some practice in testing, grading and interpreting results. Special attention will be given to the testing of school children, tests as a means of classifying employees, army personnel, etc. *First semester. Two credits.* Education Building. (Offered in alternate years).

60. COMPARATIVE PSYCHOLOGY. The genetic history of consciousness in animals, savages and civilized human beings. *Second semester. Two credits.* Education Building.

61. BUSINESS PSYCHOLOGY. A discussion and illustration of the mental laws upon which efficient buying, selling, advertising and management of men are based. *First semester. Two credits.* Education Building.

62. EXPERIMENTAL PSYCHOLOGY. A laboratory course in the application of scientific methods to the study of mental processes. Lectures, assigned readings, and laboratory. *Second semester. Three credits.* Education Building.

63. ADVANCED PSYCHOLOGY. An intensive study of selected problems. Lectures, readings and a term paper. *Prerequisite: Psychology 5. First semester. Two credits.* Education Building.

102. RESEARCH IN PSYCHOLOGY. The thesis subject may be chosen from the field of child study, social or experimental psychology. For graduate students and Seniors. *Prerequisite: Psychology 5, and at least one course in the field in which the work is to be done. Either semester. Two credits.* Education Building.

 KARL W. NIEMANN, D.V.M., Assistant in Veterinary Science.  
 MARTHA HUBER, B.S., Technician in Veterinary Science.  
 M. R. MILLER, M.S., Chemistry.  
 G. R. ADAMS, B.S., Fellow in Chemistry.  
 ROBERT STEWART, Ph.D., Soils Research.  
 V. E. SPENCER, M.S., Associate in Soils Research.  
 GEORGE HARDMAN, M.S., Irrigation.  
 F. L. BIXBY, C.E., Collaborator in Irrigation Engineering,  
 (Bureau of Public Roads, Irrigation Division U. S. D. A.)  
 F. B. HEADLEY, Farm Development.  
 CRUZ VENSTROM, B.S., Assistant in Farm Development.  
 MILTON HOWARD, Route Statistician in Farm Development.  
 LEAH REGAN, Clerk in Farm Cost Studies.  
 MAXINE DUNCAN, Clerk in Farm Development.

Under provisions of the Hatch Act, approved March 2, 1887, the Agricultural Experiment Station was organized in December of that year. From the Hatch Fund the Experiment Station receives \$15,000 annually, from the Adams Fund, created by the Adams Act of 1906, it receives a like amount and from the Purnell Fund, created by the Purnell Act, approved February 25, 1925, it received \$20,000 during the fiscal year 1925-1926, and received \$10,000 additional for each fiscal year thereafter until the total reached \$60,000 in 1929. None of these funds can be applied to teaching or to the work of Agricultural Extension, because the object of all three funds is the investigation by scientific methods of problems in the agricultural industry.

The Nevada Experiment Station has chosen problems for study in four fields:

I. The problems of the most effective use of a limited water supply in crop production.

<sup>1</sup>U. S. Department of Agriculture cooperating.

II. The problems of animal disease in the livestock industry of the State.

III. The problems arising from the depleted condition of Nevada ranges for sheep and cattle.

IV. The problems of small farm development in Nevada.

V. Economic problems in the Nevada cattle industry.

For 1929-1930 the active project list of the Station is as follows:

#### HATCH FUND

##### ENTOMOLOGY—

5. *Insects Injurious to Alfalfa*. 1916-Continuous. Project Leader, S. B. Doten.

##### RANGE MANAGEMENT—

24. *Methods of Producing More and Better Lambs in Nevada Range Flocks*. 1919-Continuous. Project Leader, C. E. Fleming.
26. *Feeding and Finishing Range Ewes and Lambs*. 1920-Continuous. Project Leader, C. E. Fleming.
27. *Pasturage and Silage Production for Sheep*. 1920-Continuous. Project Leader, C. E. Fleming. Assisted by M. R. Miller and Andrew Young.

#### ADAMS FUND

##### VETERINARY SCIENCE—

16. *Hemorrhagic Disease in Cattle*. 1914-Continuous. Project Leader, Dr. Edward Records. Assisted by Dr. L. R. Vawter.
36. *Lymphangitis in Cattle*. 1928-Continuous. Project Leader, Dr. Edward Records. Assisted by Dr. L. R. Vawter.

##### RANGE MANAGEMENT—

22. *Poisonous Range Plants*. 1916-Continuous. Project Leader, C. E. Fleming. Assisted by M. R. Miller, Dr. L. R. Vawter and Andrew Young.

#### PURNELL FUND

##### VETERINARY SCIENCE—

39. *A Study of Types of Malnutrition, Diminished Reproductive Activity, and Lowered Resistance to Disease in Cattle which Appear To Be Due to Deficiencies in the Content of Certain Forms of Mineral Matter in Soil, Water and Forage*. 1929-Continuous. Project Leader, Dr. Edward Records. Assisted by Dr. L. R. Vawter, Dr. K. W. Niemann, V. E. Spencer and M. R. Miller.

##### IRRIGATION—

29. *Studies in the Reclamation of Certain Desert Soils Under Irrigation from Artesian Wells in the Las Vegas Valley of Southern Nevada*. 1922-Continuous. Project Leader, George Hardman. Assisted by F. L. Bixby and Dean Robert Stewart.

##### FARM DEVELOPMENT—

30. *Land Utilization and Farm Development Studies*. 1925-Continuous. Project Leader, F. B. Headley. Assisted by Cruz Venstrom.
32. *A Test of the Economic Efficiency of Alfalfa Hay as a Sole Ration for Dairy Cattle and Its Relation to Sterility*. 1925-Continuous. Project Leader, F. B. Headley.

##### SOIL FERTILITY—

34. *An Attempt to Determine the Value of Nitrogen in the Unhumified Soil Organic Matter of Gypsum and Allied Desert Soils of the Las Vegas Valley of Southern Nevada*. 1926-Continuous. Project Leader, Dean Robert Stewart. Assisted by V. E. Spencer and George Hardman.
35. *A Study of the Chemical and Physical Phenomena of the So-Called "Slick Spots," Impermeable Areas in the Gypsum Soils and Allied Soils of the Moapa and Las Vegas Valleys of Southern Nevada*. 1926-Continuous. Project Leader, Dean Robert Stewart. Assisted by V. E. Spencer and George Hardman.

#### NEVADA AGRICULTURAL EXTENSION DIVISION

##### Cooperating Parties

THE PRESIDENT AND THE BOARD OF REGENTS OF THE UNIVERSITY OF NEVADA.

THE EXTENSION SERVICE OF THE UNITED STATES DEPARTMENT OF AGRICULTURE.

THE STATE AND COUNTY FARM BUREAUS.

A. J. REED, B.S., Extension Agent, Humboldt, Lander and Pershing Counties.

C. R. TOWNSEND, Extension Agent, Southern Eureka, Southern Lander, Northern Nye and White Pine Counties.

E. C. REED, B.S., Extension Agent, Washoe County.

OTTO R. SCHULZ, B.S., Extension Agent, Lyon County.

PAUL L. MALONEY, B.S., Extension Agent, Humboldt, Northern Lander and Pershing Counties.

MARK W. MENKE, B.S., Extension Agent, Elko County.

ROYAL D. CROOK, M.S., Extension Agent, Southern Eureka, Southern Lander, Nye and White Pine Counties.

W. H. STODIECK, B.S., Extension Agent, Douglas and Ormsby Counties.

ORPHA A. MILLER, B.A., Extension Agent, Clark and Lincoln Counties.

LENA HAUKE, B.S., Extension Agent, Churchill and Lyon Counties.

M. GERTRUDE HAYES, B.S., Extension Agent, Washoe County.

GRACE HERR, B.S., Extension Agent, Eureka, Lander and White Pine Counties.

MARGARET BRENNER, M.S., Extension Agent, Elko County.

C. W. STARK, B.S., Administrative Assistant.

JUANITA LOVELOCK, Financial Clerk.

Cooperative Extension Work in Agriculture and Home Economics is organized and conducted in Nevada under the provisions of the Smith-Lever Act of Congress, approved March 8, 1914, and the Capper-Ketcham Act of Congress, approved May 22, 1928. The Agricultural Extension Division, as established under the Memorandum of Understanding with the United States Department of Agriculture, dated September 8, 1914, is a "definite and distinct administrative division" of the University of Nevada, coordinate in rank and affiliating with the College of Agriculture and the Agricultural Experiment Station. All the extension activities of the College of Agriculture and the United States Department of Agriculture in Nevada are conducted through this division.

The nature of the work is defined in general terms by law as "the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities, and imparting to such persons information on said subjects through field demonstrations, publications and otherwise."

The work is usually outlined in written projects and budgets entered into by the cooperating parties. The major projects are Crops, Dairying, Range Live Stock, Poultry, Cooperative Marketing, Farm Management, Home Management, Child Training, Human Nutrition, Clothing and Boys and Girls Club Work.

The organization for Extension work in Nevada comprises an administrative and specialist staff resident at the University, and sixteen County and District Agents. Twelve Nevada counties have organized Farm Bureaus pursuant to Acts of the Legislature, approved April 1, 1919, and March 4, 1921. All extension work in these counties is conducted in cooperation with the Farm Bureaus.

## THE STATE ANALYTICAL LABORATORY

### Staff

WALTER E. CLARK, Ph.D., LL.D., President of the University

WALTER S. PALMER, E.M., Director.

J CLAUDE JONES, Ph.D., Geologist.

WILLIAM I. SMYTH, E.M., Chemist.

VINCENT P. GIANELLA, M.S., Mineralogist.

The State Analytical Laboratory was organized at the University of Nevada in 1895 under the provisions of an Act approved on March 16 of that year. Its object is to assist the mining industry of Nevada by making free analyses of minerals and ores taken from within the boundaries of Nevada by its citizens, and by reporting to the senders the results of such analyses, together with the uses and market values of the substances submitted.

The routine assays and analyses are made by the chemist. The routine rock and mineral determinations are made by the mineralogist, with the geologist assisting with the unusual rocks and minerals. The director exercises general supervision over the work of the laboratory.

Samples and specimens are listed and distributed in the order in which they are received at the laboratory, and are analyzed essentially in this order, but reports do not go out in the same order since some assays take much longer than others. The results obtained by analysis are given upon the reports for all substances.

The records of the laboratory are open to inspection, but visitors will not be permitted to see copies of reports until sufficient time has elapsed for the original reports to reach the hands of the senders.

## THE STATE BUREAU OF MINES

 WILLIAM I. SMYTH, E.M., Analyst.  
 B. F. COUCH, Secretary.  
 ALFRED M. SMITH, Mining Engineer.  
 CARL STODDARD, Field Engineer.

The Bureau of Mines of the State of Nevada was established by the 34th Legislature. The Act lodges the supervision of the Bureau with the Board of Regents of the University of Nevada. Under this Act it is the duty of the Board of Regents to select a Director and, upon the Director's nomination, such assistants and employees as necessary and to fix the compensation of these employees. The purposes of this Bureau are to conduct a mineralogical survey of the State, to catalogue both metallic and nonmetallic deposits, with addresses of the discoverer, owner or agent; to serve as a bureau of information and exchange in Nevada mining; to collect and publish statistics relative to Nevada mining; to prepare a bibliography of literature pertaining to Nevada mining and geology; to experiment in problems of Nevada concentration, dry placer, flotation methods, etc., and to publish the results; to collect geological and mineralogical specimens; to educate miners and prospectors through lectures and publications; to collect models, drawings and descriptions of appliances used in mining and metallurgical work; and to give consideration to such other kindred scientific and economic questions as in the judgment of the board shall be deemed of value to the people of the State.

The 35th Session of the Legislature appropriated \$5,000 for the period January 1, 1931, to July 1, 1931, and \$20,000 for the period July 1, 1931, to July 1, 1933, to carry on the activities of the Bureau.

## THE STATE HYGIENIC LABORATORY

(Sierra and Fifth Streets)

*Staff*

WALTER E. CLARK, Ph.D., LL.D., President of the University.  
 VERA LAUTENSCHLAGER, M.A., Acting Director.  
 WARREN CHESTER EVELAND, A.B., Bacteriologist.  
 ANNA HARGROVE, Part-Time Assistant.

The State Hygienic Laboratory was organized in 1909, under the provisions of an Act of the Legislature approved March 25 of that year. The object of the laboratory is to provide facilities for the laboratory diagnosis of infectious diseases and for research into the nature, cause, diagnosis, and methods for the control of such diseases. The services of the laboratory staff are rendered chiefly through the physicians, health officers, and health boards of the State.

The routine work of the laboratory consists chiefly of the examination of specimens for the diagnosis of tuberculosis, typhoid fever, diphtheria, malaria, gonorrhoea, and syphilis. Outfits for the collection of specimens for the diagnosis of these diseases may be obtained by any physician without charge.

Examinations are also made for meningitis, sore throat, and other infectious diseases.

Bacteriological examinations of water are made for cities, schools, mining camps, railway companies, and other organizations. The laboratory has available a small number of containers for sending water samples. Officials desiring water examinations to determine whether or not the water is polluted with sewage material or is the source of disease should write to the Director of the laboratory for instructions. Samples of water to be examined for industrial purposes should be sent to the Laboratory for Pure Food and Drugs.

Advice and assistance will, on request, be rendered health officials in the control of outbreaks of infectious diseases and in securing a sanitary water supply.

LABORATORY FOR PURE FOOD AND DRUGS AND WEIGHTS  
AND MEASURES

(Sierra and Fifth Streets)

*Staff*

WALTER E. CLARK, Ph.D., LL.D., President of the University.

SANFORD C. DINSMORE, B.S., Commissioner.

WAYNE B. ADAMS, B.S., Chemist.

VICTOR COKEFAIR, Inspector.

RUTH SHIPAUGH, Clerk.

An Act providing for the inspection and analysis of foods, drugs, and liquors, manufactured or offered for sale within the State, was passed by the 1909 session of the Legislature, and became effective on January 1, 1910. The state law is modeled after the National Food and Drugs Act of June 30, 1906, and provides that all rules, regulations, definitions, and decisions proclaimed by the Secretary of Agriculture for the enforcement of the national law shall be adopted by this department in the enforcement of the state law.

With such provisions Nevada receives valuable aid through the federal regulations, and avoids conflict with neighboring States having laws also modeled closely after the national Act. Uniformity in state and national laws, and cooperation among officials is much to be desired, and more can be accomplished under such conditions than by working under laws that are dissimilar or antagonistic to established regulations that have been in vogue in States maintaining food laws for a number of years.

The laws of this State, being similar to the national law, obviate the necessity of manufacturers providing special labels to meet any special requirements that otherwise might exist in this State. Often labels are submitted to this department for approval or correction so that they will comply with the Nevada food law.

An Act concerning and fixing standard weights and measures, and to regulate the sale of commodities or articles of merchandise according to such standards, was passed by the 1911 session of the Nevada Legislature and became effective January 1, 1912.

The standard weights and measures adopted by the Government of the United States have been adopted as the legal

standard of weights and measures throughout the State of Nevada. With this adoption Nevada receives aid through the federal regulations and promotes uniformity in state and national standards.

The 1923 session of the State Legislature passed what is known as the Fruit and Vegetable Standardization Act. The enforcement of the provisions of this Act was entrusted to the Department of Weights and Measures.

The measure was promulgated to promote, protect, further, and develop the agricultural interests of the State. It provides for the grading and standardization of all farm products and the issuing of federal-state certificates to any shipper desiring the service. A nominal fee is charged to cover actual expenses incident to shipping-point inspection and issuing certificates. The certificates issued, covering shipments of agricultural products, are absolute guarantees against loss by unscrupulous manipulation of the market, or damage caused by neglect of carrying companies. Complete information regarding this particular work may be obtained by addressing the Department.

## THE STATE VETERINARY CONTROL SERVICE

*Staff*

WALTER E. CLARK, Ph.D., LL.D., President of the University.  
 EDWARD RECORDS, V.M.D., Director.  
 VERDIE FANT, B.S., Technician.  
 JEAN HUGHES, B.A., Stenographer.

The State Veterinary Control Service was organized during 1915, under the provisions of an Act of the Legislature approved March 11, 1915. The object of this Department is to provide facilities for the routine diagnosis of communicable diseases of domesticated animals in the laboratory and the field, and to conduct research into the nature, cause, and means of control of such diseases, including the manufacture and distribution of special sera and vaccines for their control when these cannot be procured in the open market. This is intended to supplement the more elaborate research projects of the Department of Veterinary Science of the Agricultural Experiment Station and aid in the field work carried on by the State Board of Stock Commissioners and the State Board of Sheep Commissioners. From time to time bulletins and circulars dealing with the communicable diseases of domesticated animals and the most modern means of controlling the same are prepared and distributed.

The services of the staff are available to the veterinarians, livestock owners and ranchers of the State in connection with any problem coming within the scope of the work of this department.

## DEPARTMENT OF COMMERCE

UNITED STATES BUREAU OF MINES RARE AND PRECIOUS  
METALS EXPERIMENT STATION*Staff*

EDMUND S. LEAVER, Met.E. Supervising Engineer and Metallurgist.  
 HENRY A. DOERNER, B.S., Associate Chemist.  
 CHARLES W. DAVIS, M.S., Associate Chemist.  
 JESSE A. WOOLF, M.S., Assistant Metallurgist.  
 WILLIAM O. VANDERBURG, E.M., Mining Engineer.  
 GEORGE E. MCELROY, E.M., Mining Engineer.  
 PIERCE R. PERRY, B.A., Junior Analytical Chemist.  
 ALFRED P. TOWNE, Mechanic.  
 HARRY F. MCCRAY, Chief Clerk.

The Legislature of Nevada passed an Act in March, 1919, providing funds to house an experiment station of the United States Bureau of Mines at the University of Nevada. In June, 1920, the Bureau of Mines accepted the offer and agreed to establish one of its twelve field stations in the quarters provided by a building adjoining the Mackay School of Mines. This building provides office and laboratory facilities for the present staff of the Station, and allows for some future expansion of the work. The building was ready for occupancy in July, 1921, and was equipped during the succeeding three months.

The Nevada Station is known as the Rare and Precious Metals Experiment Station. The scope of the work embraces investigations on gold, silver, platinum, and the rare metals for the entire United States, and of other problems having especial importance for the mining and metallurgical industries of Nevada.

The laboratories and library of the Station will be found described elsewhere in this catalogue.

**THE SUMMER SCHOOL**

Discontinued for the Years 1931 and 1932

**WINNERS OF SCHOLARSHIPS AND HONORS, 1930**

**ROLL OF DEGREES GRANTED, 1930**

**ROSTER OF STUDENTS—August, 1930-May, 1931**

## RECIPIENTS OF SCHOLARSHIPS AND HONORS

1930

The five REGENTS' SCHOLARSHIPS of \$50 each for excellence in scholarship, awarded to

Walter V. T. Clark            Fred Weeks  
Robert W. Prince            Bruce R. Thompson  
Marjorie P. Myles

The ELLA SPRENGLE STUBBS SCHOLARSHIP of \$100, awarded to  
Claude Winder

The ALICE G. CLARK SCHOLARSHIP of \$250, given by W. A. Clark, Jr., of Los Angeles, awarded to  
Elizabeth Johnstone

The UNIVERSITY ASSOCIATED WOMEN STUDENT'S SCHOLARSHIP of \$25, awarded to

Margaret Rawson

The LEWIS D. FOLSOM SCHOLARSHIP of \$100, awarded to  
Gwendolyn Pierson

The ROSE SIGLER MATHEWS SCHOLARSHIP of \$300, awarded to  
Ione Smith

The THEODORA STUBBS FULTON MEMORIAL SCHOLARSHIP of \$200.  
(Not offered this year)

The ADOLPHUS LEIGH FITZGERALD SCHOLARSHIPS of \$150 each, awarded to

Katherine Wright            Carl E. Dunn

The MARYE WILLIAMS BUTLER SCHOLARSHIP of \$50, awarded to  
Faralie Smithson

The WOMEN'S ATHLETIC SCHOLARSHIP of \$100, awarded to  
Irma Parker

The AZRO E. CHENEY SCHOLARSHIP of \$300, awarded to  
Marion Stone

The GENERAL O. M. MITCHELL WOMAN'S RELIEF CORPS MILITARY SCHOLARSHIP of \$50, awarded to

Arvin E. Boerlin

The ROBERT LEWERS SCHOLARSHIPS of \$150 each, awarded to  
John E. Chism            Beatrice Bollschweiler

The NEVADA BAR ASSOCIATION SCHOLARSHIP of \$100, awarded to  
Blanche Lucas

The MRS. CARL OTTO HERZ ELECTRICAL ENGINEERING SCHOLARSHIP of \$50, awarded to

Francis B. Headley

The CHARLES ELMER CLOUGH SCHOLARSHIPS of \$160 each, awarded to

G. Gordon Burner            Glenn Maxwell Thompson

The JAMES WARD GERMAN-KATHERINE MORRISON GERMAN \$500 SCHOLARSHIP, awarded to

Mona Kay, \$250            Mary Trudelle, \$250

The RACHEL RAND SCHOLARSHIPS of \$100 each, awarded to  
Clarence Jones            Richmond Mann

The CARRIE BROOKS LAYMAN MEMORIAL SCHOLARSHIP of \$300 awarded to

Theodore Layman

The RENO CHAPTER WOMAN'S CHRISTIAN TEMPERANCE UNION ESSAY PRIZE of \$20, awarded to

Lenard W. Sledge

The PHILO S. BENNETT PRIZE of \$50 for the best essay on "The Principles of Free Government."

(No 1930 award)

The HENRY ALBERT SENIOR PUBLIC SERVICE PRIZE of \$25, awarded to

Verdie Fant

GOLD MEDAL

Awarded annually to that member of the graduating class who has maintained the highest average grade in scholarship throughout his or college course, awarded to

Verdie Fant

Commissions as Second Lieutenants of Infantry, United States Army—Officers Reserve Corps:

John B. Albin            Herbert E. Hoover  
Raymond R. Germain            Stanley A. Leahigh

Seniors elected to the National Honor Fraternity of the Phi Kappa Phi, election being based upon scholarship:

Evelyn Marguerite Anderson	Evelyn H. Gault
Walter Ballerstein	Paul Gemmill
Sarah Green Bell	Neil William Lamb
Aurora Fortuna Belmonte	Precious D. P. Nash
Alan Bible	Esther Lillian Sauer
Alpha Rulison Clark	Edwin Seward Semenza
Verdie Lorena Fant	Daniel H. Senseney
Lenard W. Sledge	

HONOR ROLL OF THE SENIOR CLASS whose average for the four years is 1.5 or higher:

Verdie L. Fant	Neil W. Lamb
Lenard W. Sledge	Daniel H. Senseney
Alan Bible	Evelyn M. Anderson

List of those students whose names appeared on the HONOR SCHOLARSHIP ROLL both semesters of the year 1929-1930:

## SENIORS

Verdie L. Fant	Paul Gemmill
Lenard W. Sledge	Evelyn M. Anderson
Alan Bible	Walter Ballerstein
Neil W. Lamb	Esther Sauer
Lois Nicolaides	Mary Torney Ryan

## JUNIORS

Walter V. T. Clark	Margaret G. Hart
Claude Winder	Euphemia M. Clark
Faralie Smithson	

## SOPHOMORES

Fred Weeks	Edwin Force
Robert W. Prince	Francis B. Headley
Bruce Thompson	Margaret Fuller

## FRESHMEN

Marjorie Myles	Rose Sala
Margaret Rawson	Elsie Seaborn
Vernon Loveridge	Helen Peterson
Ruth Sauer	Carl Dunn

## GRADUATES

Diplomas and Degrees were awarded on Commencement Day, May 12, 1930, as follows:

## ENGINEER OF MINES

Dudley D. Homer  
(December 21, 1929)

## MECHANICAL ENGINEER

Harold B. Keating

## CIVIL ENGINEER

Ashton R. Codd

## MASTER OF SCIENCE IN CHEMISTRY

Lewis E. Kehoe

## MASTER OF ARTS IN MODERN LANGUAGES

Frank A. Bonasi

## MASTER OF ARTS IN HISTORY

Erastus A. Hansen	Mary N. Wilkinson
	(December 21, 1929)

## BACHELOR OF ARTS

Albert W. Alegre	William Kelly Collonan
(December 21, 1929)	Helen C. Coverston
Evelyn Marguerite Anderson	Lucy E. Crescenzo
Idel Anderson	Carol W. Cross
Margaret G. Baird	Sylvia Crowell
Beth Beemer	Edward C. Cupit
Sarah Green Bell	Donald S. Dakin
(December 21, 1929)	Ben J. Dieringer
Aurora Fortuna Belmonte	Helen Nevada Dunseath
Alan Bible	Adeline Miramon Duque
George S. Blum	Renee Marie Duque
(December 21, 1929)	(July 26, 1929)
Grant L. Bowen	Herman W. Eaton
Charles A. Browne	(December 21, 1929)
Edward Donald Budge	Elbert B. Edwards
Bertrand Burkham	(December 21, 1929)
Alpha Rulison Clark	Ernest C. Feland
(December 21, 1929)	Harvey Fisk Flint
Saralee Clark	Annie Mary Fowler

## BACHELOR OF ARTS—Continued

Russell C. Garcia (December 21, 1929)	Mary A. O'Neill
June M. Grantley	Louise A. Oppio
Marshall A. Guisti	Harold Frederick Overlin
James David Hammond	Ernest F. Panelli
Melville D. Hancock	Florence Enid Porter
Gerda Marie Hexam	Helen Mahonney Prendiville (December 21, 1929)
Inez Anna Holmstrom	Paul Darrow Richards
Barbara Freeman Horton	Kathryn M. Robison
Wilfred Dole Jones	Colin E. Ross
Walden G. Kline (December 21, 1929)	Mary Torney Ryan
Glenn J. Lawlor	Clara M. Samaniego
Alice A. LeMaire	Anna Lorna Sauber
Genevieve Leonard (December 21, 1929)	Edwin Seward Semenza
Jessie Leonard	Daniel H. Senseney
Duane Emory Mack	Lenard W. Sledge
Helen Mann	Margaret Sue Lees Smith
*Daniel William McKnight	Katheleen Regina Sullivan
Frank A. Metcalf (December 21, 1929)	Arthur Theodore Sutherland
Helen E. Morris	Leonard W. Sutherland
Barbara F. Morse (December 21, 1929)	Maryemma Taylor
Carol Norton Newell	Thomas O. Towle (December 21, 1929)
Albert W. Nichols	Helene Roberta Turner (December 21, 1929)
Lois Nicolaides	Marcellyn Emily Wells
Richard Mitchell Oliver	Edwin Francis Whitehead
Valborg Olsen	Thomas Cave Wilson
	Nelle E. Wilkinson (December 21, 1929)

## BACHELOR OF SCIENCE

Alice Elizabeth Beninghoff	Orville W. Moyes
Robert L. Blackmun	Precious D. P. Nash
Carl Clifford Carlson	Valborg Nelson
Edith Small Carlson	Katherine M. Priest
Verdie Lorena Fant	William Augustus Regentz, Jr.
Evelyn H. Gault	Esther Lillian Sauer
Geraldine Green	Ione Annie Smith
Inez Loomis Johnson	Chris B. Stockton
George W. Lang, Jr.	John Barr Tompkins
Rudolph H. Larsen	Walter Whayne Webb
Mervyn O. Little	Mary E. C. Weeks

\*Died June 28, 1930.

## BACHELOR OF SCIENCE IN CHEMISTRY

Henry Albert Francis      Fred Lohse

## BACHELOR OF SCIENCE IN MINING ENGINEERING

Robert W. Adamson      Norman John Ericson  
Frank Leslie Bristol      Paul Gemmill  
(December 21, 1929)      Harold Dart Vaughan

## BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING

Ralph T. Adamson      Walter H. Jensen  
Derrill Clarence Angst      Dale D. Lamb  
Walter Ballerstein      Neil William Lamb  
Lucas Thurber Brockbank, Jr.      Theodore Harry Miller  
John Alexander Walsh

## BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING

Jose Abella Cavan      J. Brainerd Plehn  
George Maxwell Wright

## BACHELOR OF SCIENCE IN CIVIL ENGINEERING

Lincoln B. Grayson      Wilfred Alan Odell

## BACHELOR OF SCIENCE IN AGRICULTURE

Ted DeVinne Beach      Herold H. Newton  
(December 21, 1929)      (December 21, 1929)  
Whiting Fisk Martin      Alfred Lee Weger  
(September 12, 1929)      (December 21, 1929)  
Frank E. Wittenberg

## BACHELOR OF SCIENCE IN HOME ECONOMICS

Anna Frances Frey      Ruth Ann Gooding  
Norma Gardella      Patricia Harding McCollum  
Florence Ann Mitchell

## TEACHER'S DIPLOMA OF HIGH SCHOOL GRADE

Albert W. Alegre      Ben J. Dieringer  
(December 21, 1929)      Anna Frances Frey  
Idel Anderson      Norma Gardella  
Margaret G. Baird      Evelyn H. Gault  
Beth Beemer      Ruth Ann Gooding  
Aurora Fortuna Belmonte      Geraldine Green  
Alice Elizabeth Beninghoff      Gerda Marie Hexam  
Bertrand Burkham      Inez Anna Holmstrom  
Gladys Cafferata      Inez Loomis Johnson  
William Kelly Collonan      George W. Lang, Jr.  
Helen C. Coverston      Rudolph H. Larsen  
Lucy E. Crescenzo      Glenn J. Lawlor  
Sylvia Crowell      Alice A. LeMaire

## TEACHER'S DIPLOMA OF HIGH SCHOOL GRADE—Continued

Ainsley H. Mabson	Katherine M. Priest
Helen Mann	Kathryn M. Robison
Frank A. Metcalf	Clara M. Samaniego
(December 21, 1929)	Anna Lorna Sauber
Helen E. Morris	Esther Lillian Sauer
Precious D. P. Nash	Edwin Seward Semenza
Valborg Nelson	Lenard W. Sledge
Richard Mitchell Oliver	Ione Annie Smith
Valborg Olsen	Kathleen Regina Sullivan
Mary A. O'Neill	Maryemma Taylor
Janet Shirley Pardee	Mary E. C. Weeks
Florence Enid Porter	Edwin Francis Whitehead
	Ina May Winters

## TEACHER'S DIPLOMA OF GRAMMAR GRADE

Roxcena M. Bonham	Melba Irene Geraghty
Emma N. Boyd	Frances V. Hewitt
Grace Dalby Brown	Florence L. Huffman
Ethelyn E. Coverston	Golamae Johnson
Ruby Danvers	Eleanor P. Keema
Mary Belle Douglass	Myrtle L. Keema
(December 21, 1929)	Irene D. Kitch
Mabel Dowling	Maxine Roudebush
Elaine Fairchild	Odetta Thornton
Leonora Gardner	
(December 21, 1929)

**DIRECTORY OF OFFICERS AND EMPLOYEES**

DIRECTORY

OFFICERS, FACULTY, PUBLIC-SERVICE WORKERS, AND OTHER  
EMPLOYEES CONNECTED WITH THE UNIVERSITY

All addresses are Reno, unless otherwise specified. Phone numbers given  
at end of each address.

- Adams, Gregory, Assistant Chemist, Agricultural Experiment Station, 29 West Ninth St. 4049.
- Adams, Maxwell, Vice President, Dean of the College of Arts and Science, Professor of Chemistry, 29 W. Ninth St. 4049.
- Adams, Wayne B., Assistant Chemist, Food and Drug Laboratory, 354 W. Liberty St. 7732.
- Akin, Mrs. Laura E., Matron, Artemisia Hall, Campus. 6473.
- Amens, Clark, Instructor in Engineering.
- Armstrong, Rhandena, Extension Agent, Ely.
- Beckwith, Carolyn M., Secretary to President and Board of Regents, 638 Washington St. 6639.
- Billinghurst, Benson D., Lecturer in Education, 729 Evans Ave. 3039.
- Bixby, F. L., Professor of Civil Engineering, 1015 Sierra St. 3994.
- Blackler, William R., Assistant Professor of Economics, Business and Sociology and Master of Lincoln Hall, University Campus. 4892.
- Blair, G. B., Associate Professor of Physics, 1059 Sierra St. 6032.
- Blake, James T., Janitor, U. S. Bureau of Mines, 427 Toana St. 3683.
- Boardman, Horace P., Professor of Civil Engineering and Director of Engineering Experiment Station, 735 West St. 5466.
- Brambila, Robert M., Colonel U. S. A., Professor of Military Science and Tactics. ....
- Brennen, Chester, Range Economist, Agricultural Experiment Station, Elko.
- Brenner, Margaret, Extension Agent, Elko.
- Brown, Charles L., Assistant Professor of Biology, 445 E. Eighth St. 5748.
- Brown, Judge George S., Chairman of the Board of Regents, 737 Humboldt St. 3129.
- Brown, Harold N., Assistant Professor of Education, 740 Sierra St. 8566.
- Bruce, Mrs. Martha, Illustrator and Secretary, Agricultural Experiment Station, Elko.
- Buckman, Thomas E., Assistant Director, Agricultural Extension Division, 722 Arlington Ave. 5028.
- Buerer, Wayne, Instructor Mechanical Engineering, 33 W. Sixth St. 7093.
- Buol, Mrs. Mary E., Assistant Director, Agricultural Extension Division, 437 Granite St. 3433.

- Carroll, T. W., Heating Plant, 619½ Evans Ave.  
 Carlson, Mrs. Eda L., Chief Clerk, Agricultural Extension Division, 544 Roberts St. 3866.  
 Carpenter, Jay A., Professor of Mining, 245 University Terrace. 6334.  
 Chappelle, B. F., Professor of Modern Languages, 576 Ridge St. 5645.  
 Church, J. E., Jr., Professor of the Classics, 358 Washington St. 6082.  
 Clark, Walter E., President, University Campus. 3446.  
 Cline, L. E., Extension Agent, Fallon.  
 Cokefair, V. E., Assistant, Food and Drug Laboratory, P. O. Box 801.  
 Collonan, William Kelly, Fellow in English, Frandsen Apts. 4741.  
 Costello, Grace, Librarian and Secretary to Director, Agricultural Experiment Station, 620 Humboldt St. 6236.  
 Crook, Royal D., Extension Agent, Ely.  
 Couch, B. F., Instructor in Mines Accounting, 1410 N. Virginia St. 5305.  
 Creel, Cecil W., Director, Agricultural Extension Division, 35 W. Taylor St. 5354.  
 Daniel, James, Janitor, 619 S. Center St. 3479.  
 Davis, C. W., Associate Chemist, Bureau of Mines, 1045 Evans Ave., or University Station, Box 9230. 6316.  
 Deming, Meryl W., Assistant Professor of Chemistry, 235 College Drive. 4956.  
 Dietz, Dorothy D., Assistant, Buildings and Grounds, 1743 D. St., Sparks.  
 Dinsmore, Sanford C., Commissioner, Food and Drugs, 208 University Terrace. 7784.  
 Doerner, Henry A., Associate Chemist, Bureau of Mines, 428 Maple St. 4846.  
 Doten, S. B., Director, Agricultural Experiment Station, 129 Elm St. 3048.  
 Duncan, Maxine, Clerk, Farm Development, Agricultural Experiment Station, 512 Holcomb St. 4880.  
 Earl, Warren B., Field Veterinarian, Frandsen Apts. 4741.  
 Eder, Martha, District Extension Agent, Eureka, Lander and White Pine Counties, Ely.  
 Eveland, Warren Chester, Technician, Hygienic Laboratory, 33 W. Eighth St. 3552.  
 Fant, Verdie, Technician, Veterinary Control.  
 Feemster, S. C., Associate Professor of History, 1400 N. Virginia St. 4320.  
 Fleming, Charles E., In Charge of Range Management, Agricultural Experiment Station, 833 Ralston St. 4246.  
 Frandsen, Peter, Professor of Biology, 210 Maple St. 5567.  
 Fulton, John Allen, Director, Mackay School of Mines, 146 W. First St. 3523.  
 Gadda, Charles, Assistant, Buildings and Grounds, 412 Laurel St. 8430.

- Gallagher, Mrs. Gladys, Clerk in Extension Division, 315 Clay St. 8286.  
 Giannella, Vincent P., Associate Professor of Geology, 300 Nixon Ave. 7505.  
 Gorman, Charles H., Comptroller, 430 Moran St. 7093.  
 Gottardi, John R., Associate Professor of Modern Languages, 820 H St., Sparks. Sparks 407.  
 Griffin, Robert Stuart, Instructor in English, 128 Maple St. 3070.  
 Hall, John Wm., Dean of the School of Education, 424 University Terrace. 3747.  
 Hancock, E., Foreman, University Farm. 4807.  
 Hardman, George, Chief in Irrigation and Agronomy, Agricultural Experiment Station, Las Vegas.  
 Hargrove, Anna, Attendant, State Hygienic Laboratory, 904 W. Seventh St. 4290.  
 Hartman, L. W., Professor of Physics, 215 Maple St. 4901.  
 Harwood, Paul A., Associate Professor of English, 1009 N. Virginia St., Apt. 4. 5630.  
 Haseman, Charles, Professor of Mathematics, 847 University Ave. 3306.  
 Hauke, Lena, District Extension Agent, Fallon.  
 Hayes, M. Gertrude, Extension Agent, 1405 S. Virginia St. 6002.  
 Headley, B. F., Chief, Department of Farm Development, Agricultural Experiment Station, 432 Court St. 8397.  
 Herr, Grace, Extension Agent, Ely.  
 Hicks, Charles R., Associate Professor of History and Political Science, 834 Bell St. 7613.  
 Higginbotham, Alfred L., Professor of English, 831 Ralston St. 3278.  
 Hill, A. E., Professor of English, 343 Maple St. 7370.  
 Hilts, W. H., Field Veterinarian, Elko.  
 Hood, Dr. A. J., University Physician, 225 Mark Twain Drive. 3204.  
 Horn, Carl, Plumber and Electrician, 1041 Sierra St. 5006.  
 Howard, Milton, Statistician for Agricultural Experiment Station, 424 W. Tenth St. 21230.  
 Hoskins, N. E., Chemistry Storekeeper, 150 W. Tenth St. 8596.  
 Huber, Martha, Technician, Veterinary Control Service, Artemisia Hall.  
 Hughes, Jean, Secretary, Veterinary Control Service, 136 S. Virginia St. 3668.  
 Hustis, Grant H., Sergeant, 695 Sutro St. 6987.  
 Inwood, Ernest L., Instructor in Economics.  
 Irwin, Ralph A., Assistant Professor of Psychology, 304 W. Sixth St. 4078.  
 Jeppson, Robert B., Lecturer in Education, State Capitol, Carson City.  
 Johnson, Clare Louise, Cataloguer, 740 Sierra St. 8566.  
 Jones, J. Claude, Professor of Geology, 825 Lake St. 7725.

- Kline, Lawton B., Instructor in Modern Languages, 616 Wells Ave. 3206.
- Kingdon, J., Herdsman, University Farm.
- Lamerton, Lois, Clerk in President's Office, 721 Evans Ave. 3038.
- Lane, Lassie, Extension Agent, Panaca.
- Lautenschlager, Vera E., Acting Director, State Hygienic Laboratory, 604 Lander St. 7536.
- Layman, Joseph D., Emeritus Librarian, 4260 Terrace St., Oakland, Calif. Piedmont 6180-W (Oakland).
- Leaver, Edmund S., Superintendent Rare and Precious Metals Station, U. S. Bureau of Mines, 801 Lake St. 5607.
- Lee, Ora, Clerk, Agricultural Experiment Station, University Campus.
- Lehenbauer, Phillip A., Professor of Biology, 539 Humboldt St. 8323.
- Leifson, Sigmund W., Associate Professor of Physics, 621 N. Virginia St.
- Lewers, Katherine, Associate Professor of Freehand Drawing and Art, R. F. D., Carson City.
- Lewers, Mrs. Louise B., Secretary, Alumni Association, Room 7, Cladianos Bldg. 6342.
- Lewis, Sarah Louise, Professor of Home Economics, 942 Sierra St. 6580.
- Little, William, Assistant, Buildings and Grounds, 120 Vine St. 7913.
- Lough, S. Allen, Assistant Professor of Chemistry.
- Lovelock, Juanita, Stenographer, Extension Division, 104 Maple St. 3965.
- Lynch, J. B., Superintendent of Buildings and Grounds, Experiment Station Farm. 6578.
- Mack, Margaret E., Dean of Women, Associate Professor of Biology, Manzanita Hall, University Campus. 3543.
- Maloney, Paul, Extension Agent, Winnemucca.
- Martie, John Edward, Professor of Physical Education for Men, 762 W. Sixth St. 5623.
- McCray, H. F., Chief Clerk, U. S. Bureau of Mines, Arlington Heights. 5062.
- McElhinney, Flora, Agricultural Extension Agent, Elko.
- McElroy, George E., U. S. Bureau of Mines, 447 Ralston St. 3703.
- McFadden, A. E., Assistant on Grounds, 929 Sierra St. 5718.
- Menke, Mark W., Extension Agent, Elko.
- Metcalf, Freda, Clerk, Comptroller's Office, 104 Maple St. 3238.
- Miller, Loretta, Instructor in Biology, 710 Sierra St. 8522.
- Miller, M. R., Chemist, Agricultural Experiment Station, 265 College Drive. 7706.
- Miller, Orpha, Extension Agent, Las Vegas.
- Mischon, J., Gardener, University Campus.
- Mullen, James, Night Watchman, 639 Washington St. 6780.
- Murgotten, F. C., Professor of Modern Languages, 42 W. Eighth St.

- Nash, Precious D. P., Library Loan Desk Assistant, R. F. D. No. 2. Call operator and ask for 21-F-23.
- Nash, Ruth, Assistant Librarian, 1212 Plumas St. 8496.
- Niemann, Karl William, Assistant Research Professor of Veterinary Science, 31 W. Ninth St.
- Oakberg, Francis S., Instructor in Chemistry, 841 N. Virginia St. 6053.
- Olmsted, Dr. A. C., Member Board of Regents, Wells.
- Palmer, S. G., Professor of Electrical Engineering, 533 University Terrace. 4427.
- Palmer, W. S., Professor of Metallurgy, 201 State St. 5609.
- Parmeter, Alexander, Chef, University Dining Hall. Campus.
- Perry, Peirce R., Bureau of Mines, 810 University Ave. 4828.
- Phillbrook, George, Coach. 760 N. Virginia St. 7320.
- Pohl, William, Assistant, Buildings and Grounds.
- Pope, Jessie P., Associate Professor Home Economics, 439 Marsh Ave. 6227.
- Post, Theodore H., Professor and Director of Music, 930 Nixon Ave. 7955.
- Pratt, Walter E., Member, Board of Regents, 1248 W. Elm St., Stockton, Calif.
- Propps, D. H., Extension Agent. Fallon.
- Ralph, Edward W., Carpenter, 817 Plumas St. 6905.
- Rayercraft, Thomas, Extension Agent, 649 S. Virginia St. 3385.
- Records, Edward, Director, Veterinary Control Service, 323 Elm St. 3956.
- Reed, Albert J., Extension Agent, Lovelock.
- Reed, Edward C., Extension Agent, 915 Gordon Ave. 7044.
- Regan, Leah, Clerk, Farm Cost Studies, Agricultural Experiment Station, 422 E. Taylor St. 8679.
- Regan, Margaret, Secretary College of Agriculture, 422 E. Taylor St. 8679.
- Riegelhuth, Katherine, Associate Professor of English, 543 Lake St. 4081.
- Rocklund, Oscar T., Shop Superintendent and Instructor in Shop Practice, 634 W. Fifth St. 6536.
- Rosasco, J., Assistant, Buildings and Grounds, 930 Bell St. 8592.
- Ruebsam, Edith, Assistant Professor of Education, Colonial Hotel. 3181.
- Russell, A. L., Lecturer in Education, 781 Mill St. 4724.
- Ryan, Colonel J. P., Professor Emeritus of Military Science and Tactics, 30 W. Tenth St. 3756.
- Ryan, Mary T., Secretary to the Dean of the College of Arts and Science, 30 W. Tenth St. 3756.
- Sameth, Elsa, Professor of Physical Education for Women, 942 Sierra St. 6580.
- Sandorf, Irving J., Instructor in Electrical Engineering, 1351 Terrace Drive. 6920.

- Schmitt, Barbara, Fellow in English, 710 Sierra St. 8522.  
 Schulz, Otto R., Extension Agent, Yerington.  
 Scott, V. E., Professor of Dairying and Poultry, 1405 S. Virginia St. 6002.  
 Scranton, Chester M., Assistant Professor of Physical Education for Men, 1061 Evans Ave. 3840.  
 Searcy, Charles L., Assistant Professor of Mathematics, 801 University Ave. 7708.  
 Sears, George W., Professor of Chemistry, 917 N. Virginia St. 4308.  
 Shipaugh, Ruth, Clerk, Pure Food and Drugs Laboratory, 620 Nixon Ave. 6363.  
 Shurtleff, Mrs. Ethel, Matron, University Hospital. 5202.  
 Sibley, Frederick H., Dean of the College of Engineering and Professor of Mechanical Engineering, 307 W. Sixth St. 4096.  
 Simas, Mrs. Mae, Instructor in Physical Education for Women, 503 Lake St. 4239.  
 Sissa, Louise M., Registrar, 1033 Ralston St. 8334.  
 Smith, Alfred Merritt, Mining Engineer, State Mining Bureau, 229 Maple St. 6926.  
 Smith, C. C., Associate Professor of History and Political Science. 4535.  
 Smith, Grant H., Assistant Range Economist, Agricultural Experiment Station, Elko.  
 Smyth, William I., Assistant Professor of Metallurgy, 1406, Tonopah St. 7389.  
 Souter, Clyde D., Lecturer in Law, 705 Humboldt St. 7694.  
 Spencer, V. E., Associate Professor of Soil Research, Agricultural Experiment Station, 1325 Terrace Drive. 7755.  
 Springer, Mrs. Louise K., Assistant Professor of Home Economics, 320 Maple St. 3906.  
 Stimson, Helen, Extension Agent, Elko.  
 Stewart, Robert, Dean of the College of Agriculture and Professor of Agronomy, 792 West St. 5674.  
 Stoddard, Carl, Curator, Mackay Museum and Field Engineer, State Mining Bureau, 817 N. Virginia St. 7736.  
 Stodieck, Wilbur H., Extension Agent, Ely.  
 Sutherland, Edward G., Associate Professor of Economics, Business and Sociology, 918 Nixon Ave. 7958.  
 Talbot, Ruth A., State Supervisor of Home Economics, Carson City.  
 Terry, Alice, Clerk in Comptroller's Office, 215 Rock St. 6975.  
 Thompson, R. C., Professor of Philosophy, 1101 Riverside Ave. 6256.  
 Thompson, Thea C., Acting Librarian, 455 E. Eighth St. 5748.  
 Towne, Alfred P., U. S. Bureau of Mines, 907 Surprise Valley Road.  
 Townsend, Claude R., Agricultural Extension Agent, Ely.  
 Trainer, F. W., Professor of Education, 210 Wonder St. 7470.  
 Turner, M., Buildings and Grounds, 1457 N. Virginia St. 5596.

- Vandenburg, William O., Mining Engineer, Bureau of Mines, 56 Boyd Place. 8493.  
 Vawter, Lyman R., Pathologist, Veterinary Control Service, 701 Arlington Ave. 7497.  
 Venstrom, Cruz, Assistant in Farm Development, 853 University Ave. 3515.  
 Webster, Milan J., Instructor in Economics, Business and Sociology, 674 Chestnut St. 5064.  
 Wier, Jeanne E., Professor of History and Political Science, 120 E. Ninth St. 3284.  
 Wilcox, Herbert B., First Lieutenant U. S. Infantry, Instructor in Military Science and Tactics. 729 Arlington Ave. 5239.  
 Williams, Frank, Member of the Board of Regents, Goodsprings.  
 Williams, J., Heating Plant, 360 East St.  
 Wilson, F. W., Professor of Animal Husbandry, 155 University Terrace. 5744.  
 Wilson, Irma Mae, Matron, Manzanita Hall, University Campus. 5612.  
 Wilson, Joseph W., Extension Agent, Elko.  
 Wilson, Mrs. Maude A., Assistant, Buildings and Grounds, 420 University Ave. 4678.  
 Wingfield, George, Member of the Board of Regents, P. O. Box 2012.  
 Wittwer, John H., Extension Agent, Las Vegas.  
 Woolcock, Fred E., Janitor, Mackay School of Mines, 363 West St. 4587.  
 Woolf, Jesse A., Assistant Metallurgist, U. S. Bureau of Mines, 318 W. Fifth St.  
 Young, Andrew, Assistant, Range Management, Agricultural Experiment Station, 527 Ralston St. 3993.  
 Young, J. R., Professor of Psychology, 122 Maple St. 8306.

GENERAL INDEX

## GENERAL INDEX

Figures at end of lines refer to pages.

- Accounting. *See Economics, Business and Sociology.*  
 Adams Act, 24.  
 Administration of the University, 33.  
 Administrative Officers of the University, 9.  
 Admission and Advanced Standing, Committee on, 22.  
 Admission and Degrees, 104.  
 Admission by Certificate from Accredited Preparatory School, 108.  
 Admission by Examination, 108.  
 Admission by Transfer, 109.  
 Admission of Persons Not Candidates for Degrees, 110.  
 Admission Requirements—  
   Table of, 106.  
   To College of Agriculture, 107.  
   To College of Arts and Science, 106.  
   To College of Engineering, 106.  
   To Nevada State Normal School, 106.  
   To School of Home Economics, 107.  
 Admission to Advanced Standing, 112.  
 Admission to Junior Standing, 115.  
 Adolphus Leigh Fitzgerald Scholarships, The, 81.  
 Advantages and Equipment, 36.  
 Affairs, Student, Committee on, 22.  
 Affiliated Organizations, 253.  
 Aggie Club, 66.  
 Agricultural Building, The, 37.  
 Agricultural Experiment Station Library, 43.  
 Agricultural Experiment Station, Organization of (The Hatch Act), 24.  
 Agricultural Experiment Station, The, 30, 253.  
 Agricultural Extension Division, 255.  
 Agricultural Laboratories, 54.  
 Agriculture, The College of, 154.  
 Agronomy, Courses in, 161.  
 Aid, Beneficiary, 91.  
 Aid for Students, 92.  
 Algebra. *See Mathematics.*  
 Alice G. Clark Scholarship, The, 78.  
 Alpha Tau Omega, 67.  
 Alumni Association, The, 61.  
   Officers of the, 61.  
 Analytical Laboratory, 24, 31, 257.  
 Animal Husbandry, Courses in, 163.  
 Animal Hygiene, 165.  
 Anonymous Scholarship, 83.  
 Appointment, Teacher, Committee on, 22.  
 Arabic, Courses in, 230.

- Art, Courses in, 165.  
 Artemisia, The (Student Annual), 69.  
 Artemisia Hall, 37, 96.  
 Arts and Science Laboratories, 44.  
 Assay Laboratory, 49.  
 Assemblies and Lecturers, Committee on, 22.  
 Assembly Addresses, 59.  
 Assistant Professors, 17.  
 Assistants, Lecturers and Fellows, 20.  
 Associated Students Membership, Fee, 100.  
 Associated Students of the University of Nevada, The, 61.  
 Associated Women Students' Scholarship, The, 79.  
 Associated Women Students, The, 64.  
 Associate Professors, 16.  
 Association of American Universities, University on Approved List of, 26.  
 Associations. *See Organizations and Publications.*  
 A. S. U. N. Card, 61.  
 Athletics, Committee on, 22.  
 Athletics, Rules Governing, 70.  
 Athletics. *See Physical Education.*  
 Azro E. Cheney Scholarships, The, 82.
- Baccalaureate Sermon, 59.  
 Bacteriology, Courses in, 166.  
 Band, The University, 67.  
 Barracks, 37.  
 Basket Ball and Tennis Courts, 41.  
 Beneficiary Aid, 91.  
 Beta Delta, 67.  
 Beta Kappa, 67.  
 Beta Sigma Omicron, 67.  
 Biology, Courses in, 166.  
 Biological Laboratory, 44.  
 Biological Museum and Collections, 57.  
 Blanket Deposit, 100.  
 Board in University Dining Hall, Rates and Regulations, 99.  
 Preference Given Certain Students, 99.  
 Board of Regents of the University, 8.  
 Botany, Courses in, 166.
- Buildings—  
 Agricultural, 37.  
 Artemisia Hall, 37.  
 Barracks, 37.  
 Chemistry, 37.  
 Clark Memorial Library, 39.  
 Dining Hall, 37.  
 Education, 37.

 Extension, 38.  
 Federal Mining Experiment Station, 41.  
 Greenhouse, 38.  
 Gymnasium, 38.

Buildings (*Continued*)—

- Hall of English, 38.  
 Hatch Station, 38.  
 Heating Plant, 39.  
 Hospital, 39.  
 Lincoln Hall, 39.  
 Mackay School of Mines, 39.  
 Manzanita Hall, 40.  
 Mechanical, 40.  
 Mines Experiment Station, 41.  
 Morrill Hall, 41.  
 President's House, 41.  
 Stewart Hall, 41.  
 Training Quarters, 41.  
 Buildings and Grounds, 36.  
 Bulletin Board, 103.  
 Bulletin, The University (Official Quarterly), 68.  
 Bureau of Mines Experiment Station, 258.  
 Business Administration, Courses in, 187.
- Cadets—  
 Discipline, 74.  
 Officers Commissioned by U. S. Government, 74.  
 Regulations Concerning, 73.  
 Summer Training Camps, 73.  
 Uniform, Service, Furnished by U. S. Government, 73.
- Calendar, 1930-1931, 6.  
 Calendar of the University, 7.  
 Campus Calendar, Committee on, 22.  
 Campus Employment, Committee on, 22.  
 Campus Employment for Students, 92.  
 Campus Players, The (Dramatic Club), 66.  
 Campus, The University, 36.  
 Cap and Scroll, 68.  
 Capper-Ketcham Act, 27.  
 Carl Otto Herz, Mrs., Scholarship, 84.  
 Carrie Brooks Layman Scholarship, 87.  
 Carson City, State Library at, 44.  
 Caucus Debating Society, 68.  
 Central American Tuition Exemptions, 78.  
 Charles Elmer Clough Scholarship in Engineering, 85.  
 Chemical Laboratory, 45.  
 Chemical Laboratory of the School of Mines, 50.  
 Chemical Specimens, 58.  
 Chemistry Club, 65. *See Sigma Sigma Kappa.*  
 Chemistry, Courses in, 171.  
 Chemistry, Degree of Bachelor of Science in, 131.  
 Chief Marshal of Formal Assemblies, 22.  
 Christian Associations—  
 Y. M. C. A., 36.  
 Young Men's Christian Fellowship Association, 67.  
 Y. W. C. A., 36, 67.

**THE  
AGRICULTURAL EXTENSION SERVICE  
OF THE UNIVERSITY**

Is striving to meet the demands of the people of Nevada for the best scientific and practical information along agricultural lines. This is placed before the public by means of such agencies as

COUNTY AGRICULTURAL AGENTS

AGRICULTURAL CLUBS

PERSONAL INTERVIEWS

HOME DEMONSTRATION AGENTS

Any One Desiring Information Regarding  
Any of These Should Address

**AGRICULTURAL EXTENSION SERVICE**

University of Nevada

Reno, Nevada
