

Harry Reid is a planner. Many feel he has vision beyond his years.

Harry Reid worked his way through law school in Washington, D.C. as a capitol policeman. He knows his way around Washington and enjoys renewing old acquaintances with friends such as former Vice-President Hubert Humphrey.

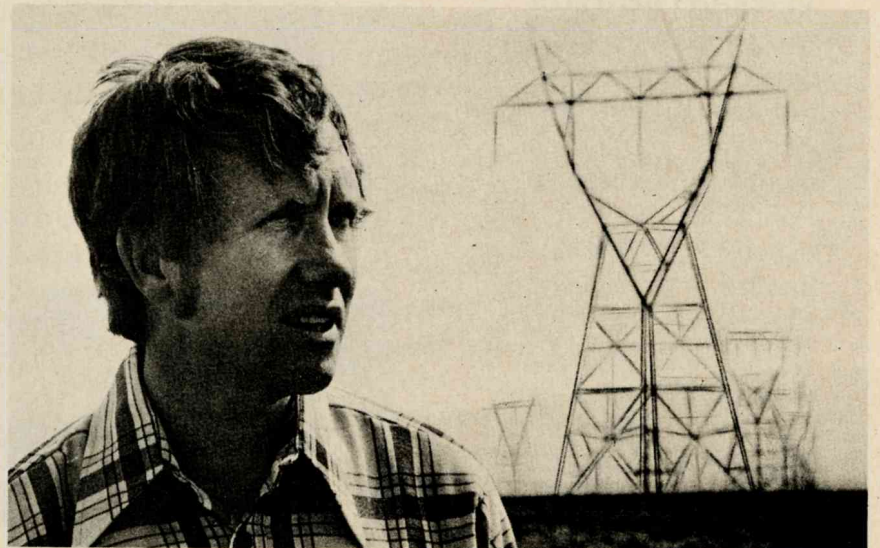

Harry Reid is the hardest working, most effective Lt. Governor in Nevada history.

Consider these facts.

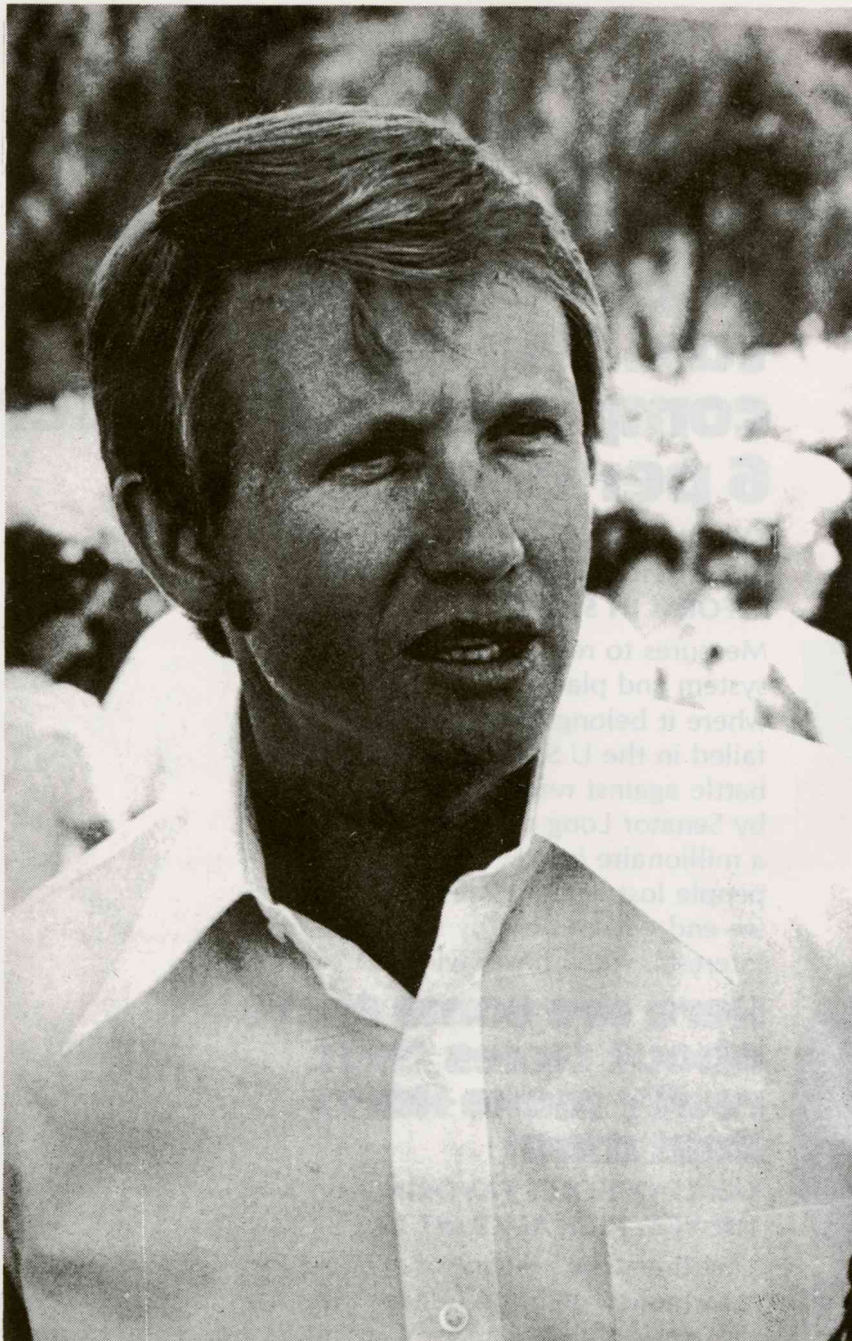

- Harry Reid championed the cause of Nevada consumers...before it was popular.
 - He fought for environmental programs before it was the thing to do.
 - He pushed to register lobbyists in an effort to bring special interests out of the shadows of the legislature and into the light of public scrutiny.
- He called for energy planning during his Lt. Governor race back in 1970.
- He sponsored and passed a resolution at the national Lt. Governor's Executive Board meeting, calling for a National Energy Policy long before the Administration was discussing such a policy.
 - He supported the community college system when it was under heavy fire by critics.
- Harry Reid is not afraid to plan ahead and vote his conscience.

Reid

U.S. Senate

Friends of Reid, John Koontz, Chairman

No wonder many people feel:

**Today's
Cost of
Living is
a Crime,
and Politics is Just
Another Dirty Word.**

The reason people feel that way is obvious. They feel there aren't enough people in Congress who care about the man on the street, and they're right.

That's why you continue to pay more than your fair share of this country's taxes.
