SUBJECT: August HEALTHLINE

As you may have noticed, there was no August HEALTHLINE tape. I apologize for any programming inconvenience this may have caused you; we experienced some production complications and were unable to prepare a tape within our regular time frame.

A September tape is currently in the production stages. It will contain :60 spots on:

- female sexuality
- patient compliance in taking drugs
- gastrointestinal tract
- speech development in children
- car seats for infants
- depression
- intimacy
- electron microscopy

Thank you for your continuing use of our spots and your public service support of the School of Medicine
