4) INFERTILITY

:60 PSA

COUPLES WHO HAVE NOT BEEN SUCCESSFUL IN GETTING
PREGNANT MIGHT CONSIDER SOME NEW MEDICAL TECHNIQUES.
IN VITRO FERTILIZATION FOR FEMALE INFERTILITY AND
SPERM CAPACITATION OR VITALIZATION FOR MALE
INFERTILITY HAVE BEEN DEVELOPED WITH THE COOPERATION
OF DR. CLIFF STRATTON OF THE UNIVERSITY OF NEVADA
SCHOOL OF MEDICINE:

.20 "Modern medicine has made such enormous
advances in human infertility...married couples
now have at least a 40% chance of pregnancy."

STRATTON REPORTS THAT ALL THE BABIES CONCEIVED BY
THESE NEW METHODS AND BORN RECENTLY IN RENO AND LAS
VEGAS ARE HEALTHY AND NORMAL. SO INFERTILE COUPLES
WHO HAVE NOT BEEN HELPED BY SURGERY OR HORMONE
TREATMENTS SHOULD NOT GIVE UP HOPE. THIS IS
"HEALTHLINE" FROM THE UNIVERSITY OF NEVADA SCHOOL OF
MEDICINE.
