Dear Interested Public :

We have received a grazing application from Michael Burke for temporary non-renewable (TNR) winter use on the Goldbanks Allotment. The requested use is as follows:

Mud Springs Winter Pasture 200 Cows 02/01 to 02/28 184 AUMS

Currently the winter pasture is used from December 1st until January 31st. Last winter TNR was requested and approved within the same use area and the same numbers of livestock and season of use.

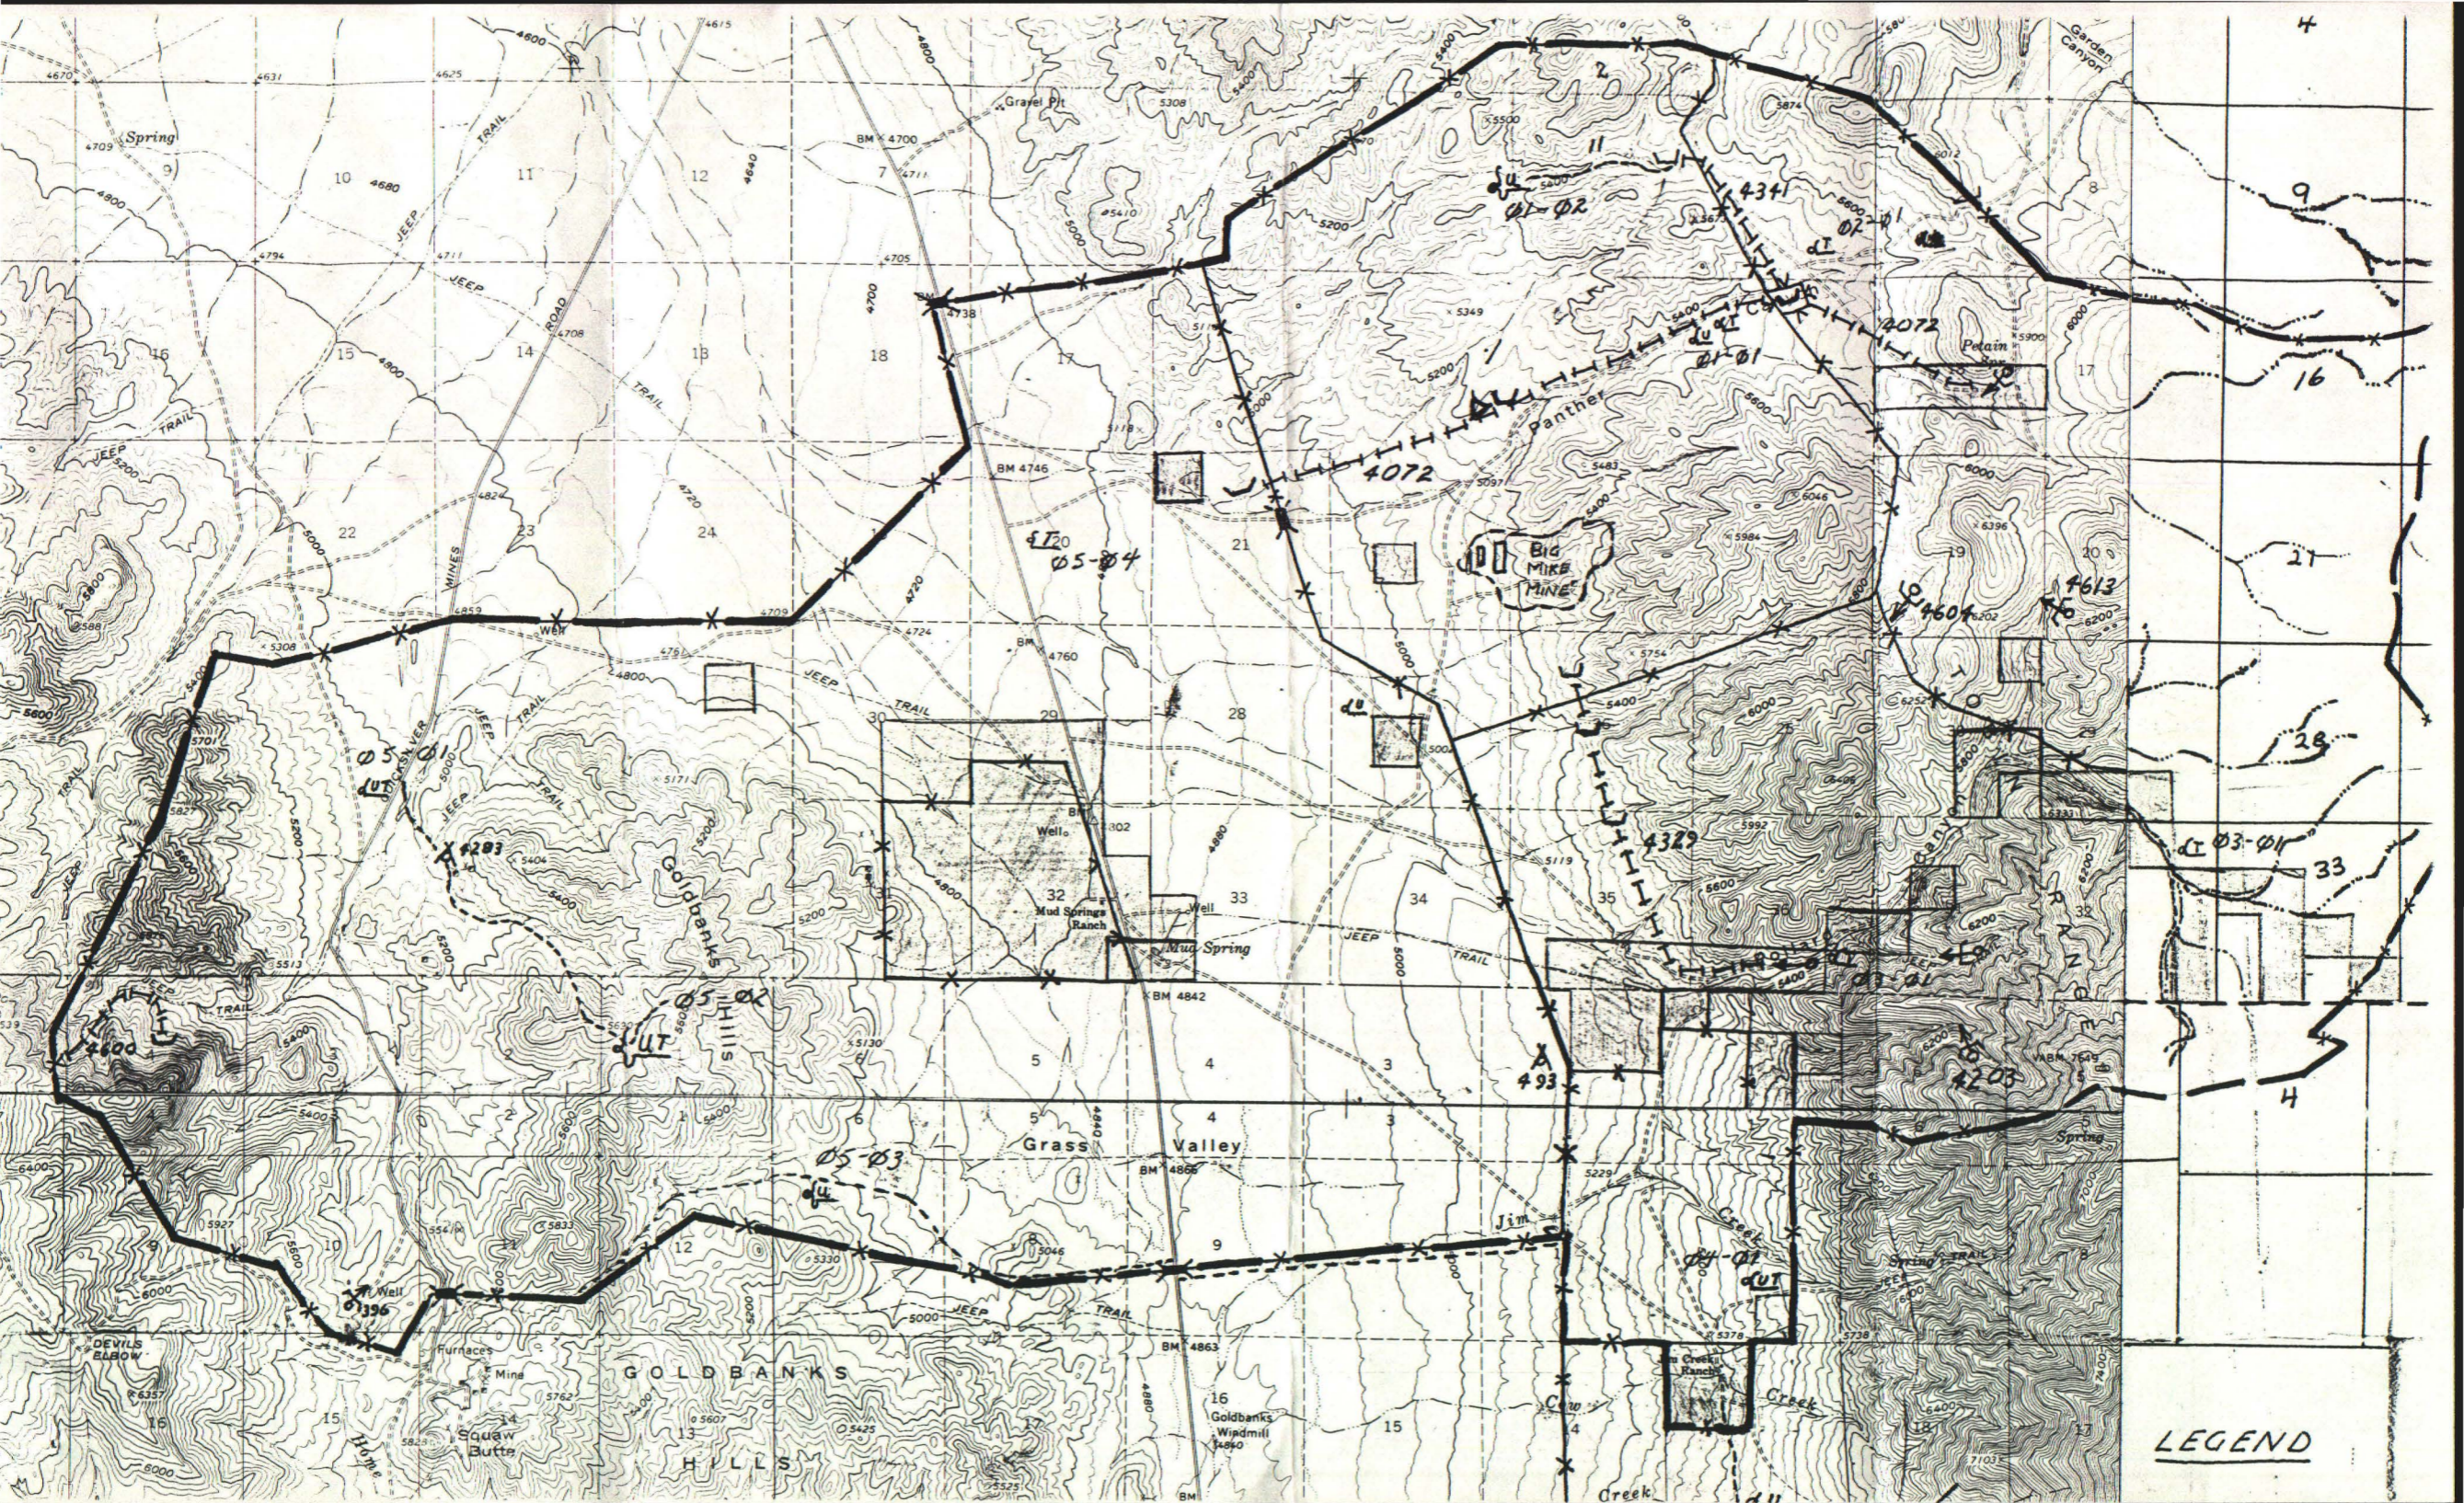

Utilization monitoring was conducted in the winter pasture on January 19th. There was no more than slight use (1 - 20%) recorded in one site with no use recorded on the majority of the sites.

If you have any comments or concerns related to this application, please contact Ron Pearson at (702) 623-1500 no later than January 31, 2000.

Sincerely yours,

Colin P. Christensen
Assistant Field Manager
Renewable Resources
