Bureau of Land Management
Chester E. Conard, District Manager
Post Office Box 71
Winnemucca, Nevada 89445

Dear Mr. Conard:

In order to provide an over-all picture of the unique circumstances and the diversity of locations in the state of Nevada, we are doing a work sheet on several individual districts. We would greatly appreciate your attention to these questions:

1. Number of livestock permittees, district wide.
2. Number of animal unit months of authorized use, ~~for~~ domestic livestock, district wide.
3. Number of suspended non-use permits (voluntary or decision) district wide.
4. Number, if any, of free-use permits, district wide.
5. Number of estimated wild horse population, district wide.
6. Number of claimed wild horses, district wide.
7. Estimated population increases of wild horses.
8. Grazing capacity- The total number of AUM's available for livestock? Wildlife? Wildhorses?

We realize that most of your management framework plans are done on area basis, however, we feel it is important to be able to view the district as a whole in this situation. We thank you for your help.

Most sincerely,

Dawn Y. Lappin (Mrs.) - Adoption Director
