NOTICE OF FULL FORCE AND EFFECT DECISION FOR THE MAVERICK-MEDICINE WILD HORSE GATHER

MANAGEMENT ACTION: The action is the implementation of the Wild Horse Amendment to the Wells Resource Management Plan (RMP). The Wild Horse Amendment (the Amendment) was signed on August 2, 1993. The Maverick-Medicine Wild Horse Gather Plan and associated Environmental Assessment (BLM/EK/PL-94/021) continues the implementation of the Amendment by gathering wild horses to initial herd size as specified in the Amendment. Initial herd size in the Maverick-Medicine Herd Management Area (HMA) is 332 horses.

METHODS: The method to be used will be an age selective removal within the HMA to reach the initial herd size.

DATES: The action will begin on or about November 7, 1994, and will likely be 10 days in duration.

LOCATION: The action will occur in the Maverick-Medicine HMA.

NUMBER OF HORSES INVOLVED: The approximate number of horses to be gathered and removed is 168; 332 horses will remain in the Maverick-Medicine HMA.

CAPTURE TECHNIQUES: A helicopter will be employed to move horses into temporary traps. Motorized vehicles will be employed to transport the horses to their final destination.

AUTHORITY: The authority for this decision is contained in Sec. 3(a) and (b) and Sec. 4 of the Wild Free-Roaming Horse and Burro Act (P.L. 92-195) as amended and Title 43 of the Code of Federal Regulations, which states in pertinent parts:

4700.0-6(a): "Wild horses and burros shall be managed as self-sustaining populations of healthy animals in balance with other uses and the productive capacity of their habitat."

4710.4: "Management of wild horses and burros shall be undertaken with the objective of limiting the animals distribution to herd areas. Management shall be at the minimum level necessary to attain the objectives identified in approved lands use plans and herd management area plans."

4720.1: "Upon examination of current information and a determination by the authorized officer that an excess of wild horses or burros exists, the authorized officer shall remove the excess animals immediately..."

4770.3(c): "The authorized officer may place in full force and effect decisions to remove wild horses or burros from public or private lands if removal is required by applicable law or to preserve or maintain a thriving ecological balance and multiple use relationship. Full force and effect decisions shall take effect on the date specified, regardless of an appeal. Appeals and petitions for stay of decisions shall be filed with the Interior Board of Land Appeals as specified in this part."

ADDITIONAL INFORMATION: Copies of the Draft Maverick-Medicine Wild Horse Gather Plan and the associated Preliminary Environmental Assessment (EA# BLM/EK/PL-94/021) were sent to all organizations and individuals who expressed an interest in the wild horse program in the Elko District. The organizations and individuals were allowed a 30 day comment period. Through this process, all input from affected interests has been considered in the finalization of the draft gather plan. After consideration of input received through the comment period, it has been determined that the following changes to the draft document are required:

1. On page 2 of the draft gather plan, the foal recruitment rate will be changed from the statewide average of 18 percent to 14 percent for the Maverick-Medicine HMA. This will change the approximate number of horses in the HMA from 518 to 500 and change the number to be removed from 186 to 168.
2. On page 5 of the draft gather plan, the second paragraph, under D. Branded and Claimed Animals, shall be reworded to read as follows:

The COR/PI will coordinate closely with the District Brand Inspector to make arrangements for dates and times when brand inspections will be needed. A reasonable effort will be made to allow for a brand inspection of the older horses which do not meet the age selective removal criteria before they are released back to the public lands within the Elko District.

To expedite the removal, this decision is being placed in Full Force and Effect. The rationale is as follows:

1. Implementation of the subject plan is expected to bring the wild horse populations into a state of thriving ecological balance as determined in the Wells Wild Horse Amendment.

Monitoring data has shown that when horse numbers become excessive, such as they have in the HMA in question, water quality and quantity declines due to trampling of soil and vegetation around springs and plant vigor decreases due to successive years of over-utilization. In addition, horses are currently making more than 10 percent utilization in winter use areas prior to livestock entry. Reducing horses to the initial herd size as outlined in the Amendment should alleviate this problem.
2. If the removal is not placed in Full Force and Effect, the potential for loss and damage to the health of the ecosystem would increase due to the length of time required for the Interior Board of Land Appeals to review the decision should it be appealed.
3. These actions are required to prevent further deterioration of the rangeland and to avoid further irreparable damage to the natural ecological balance of the area's vegetative resource.

The Finding of No Significant Impact and Decision Record for the Environmental Assessment covering this action are available for review upon request at the Elko District Office.

APPEALS: Within 30 days of receipt of this decision, you have the right of appeal to the Board of Land Appeals, Office of the Secretary, in accordance with the regulations at 43 CFR, Part 4, Subpart E and 43 CFR 4770.3(a) and (c). Within 30 days after filing a Notice of Appeal, you are required to provide a complete statement of the reasons why you are appealing. In addition to the copies you must file with the Board of Land Appeals and the Regional Solicitor, please also forward a copy to the Elko District Office, P.O. Box 831, Elko, NV 89803. A copy of your Notice of Appeal and Statement of Reasons must also be served on any party adversely affected by this decision. The appellant has the burden of showing that the decision appealed from is in error.

If you wish to file an appeal and petition for a stay, the petition for a stay must accompany your notice of appeal and be in accordance with 43 CFR, Part 4, Subpart E and 43 CFR 4770.3(c). Copies of the notice of appeal and petition for a stay must be submitted to the Interior Board of Land Appeals, Office of Hearings and Appeals, 4015 Wilson Boulevard, Arlington, VA 22203, and to the Regional Solicitor's Office, Pacific Southwest Region, U.S. Department of the Interior, 2800 Cottage Way, Room E-2753, Sacramento, CA 95825-1890, at the same time the original documents are filed with this office.

If you request a stay, you have the burden of proof to demonstrate that a stay should be granted. A petition for a stay of a decision pending appeals shall show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied,
2. The likelihood of the appellant's success on the merits,
3. The likelihood of immediate and irreparable harm if the stay is not granted, and
4. Whether the public interest favors granting the stay.

Sincerely yours,

RODNEY HARRIS
District Manager

RE: Maverick-Medicine Wild Horse Gather Decision

Dear Mr. Harris,

We were in receipt of a full force and effect decision for the gather of the Maverick-Medicine Wild Horse Herd. It was the intent of the Wells Amendment to adjust HMA's based upon conflicts with private lands and to establish initial herd levels for new HMA's. These new herd areas, Antelope and Maverick-Medicine, were to have AML's established based on achieving a thriving natural ecological balance with other uses. This determination of AML's were to be based upon LUP criteria and monitoring data as described in the 1989 IBLA Decision.

We have reviewed, through the consultation process, the Wells Amendment, Wells Amendment Environmental Assessment and Maverick-Medicine Gather Plan/EA, and cannot determine how the AML of this decision was determined. For example, the District contends that use pattern mapping was weight averaged, 10% desired utilization for winter forage, and yield indexing were applied in the carrying capacity computations. These computations were not found in the Wells Amendment EA nor Medicine Gather Environmental Assessment.

The decision and gather plan implements actions to re-structure the wild horse herd. Issues pertinent to age, sex and reproduction have not be adequately addressed.

Rodney Harris, Area Manager
October 3, 1994
