Plan Conformance/NEPA Compliance Record

X. DECISION

I have reviewed this plan conformance and NEPA compliance record and have determined that the proposed project in conformance with the approved land use plan and that no further environmental analysis is required. It is my decision to implement the project as described with the stipulations/mitigation measures identified below.

Stipulations/Mitigation Measures: Gathering will be in three WSAs. The capture site is on the inter edge of a WSA. The trap will be set and removed with only temporary surface disturbance due to trampling by horses. T&E and cultural clearances will be done prior to gathering operations. Access to the trap will be on existing ways. Vehicles will be kept to a minimum of trips. Vehicles will have to turn around off the existing way and vegetation and soil disturbance will occur. This disturbance will be rehabilitated back to its naturalness as soon as the trap is removed. This activity meets the non-impairment criteria for wilderness. Humane procedures prescribed by the Secretary of the Interior, in accordance with Section 404 of FLPMA will be used for handling horses.
