IN REPLY REFER TO:

United States Department of the Interior

4700(330)

BUREAU OF LAND MANAGEMENT WASHINGTON, D.C. 20240

September 26, 1973

Information Memo No. 73- 212 Expires: 6/30/74

To: AFO's

From: Assistant Director, Resources

Subject: Wild Horses and Burros

The regulations for implementing Public Law 92-195 became final on August 15, 1973. Most State Offices have reached or will soon execute a cooperative agreement with State officials administering the State branding and estray law. These agreements provide the criteria for adjudicating claims of ownership in accordance with Section 5 of the Act (PL 92-195).

Questions have been raised on the gathering of authorized horses on national resource lands. Information Memo No. 73-203 remains in effect for the licenses now issued. The necessity of filing claims for all authorized unbranded horses is required to protect the interest of the public regarding free-roaming wild horses and burros during the claiming process. This will cause additional work on the part of field offices, but will insure the Bureau's compliance in the protection, management, and control of wild free-roaming horses and burros under the Act.

We are reviewing with the Solicitor's Office a policy to require that all licensed horses and burros, beginning with the 1974 grazing season, be branded prior to being turned onto national resource lands. If approved, this will require the issuance and publication of new regulations before the next grazing season.

Pault

United States Department of the Interior

BUREAU OF LAND MANAGEMENT WASHINGTON, D.C. 20240

Instruction Memo No. 73-411 Expires: 6/30/74 October 1, 1973

To: All SD's and DM's

From: Assistant Director, Resources

Subject: Grazing Trespass Charges--Unauthorized Domestic Horses and Burros

A uniform procedure in all States is desirable for establishing grazing trespass charges during the claiming and gathering process as we move ahead with the implementation of PL 92-195.

The primary purpose of the claiming process is to allow a person to claim his animals and to remove, upon proof of ownership, any privately owned horses or burros and enable us to proceed with an orderly wild horse and burro management program. Any trespass charges must be reasonable and determined on a case-by-case basis keeping in mind the extensive evidence and detail necessary to carry a case through administrative and court review.

Since an earlier directive (Instruction Memo No. 72-35 (expired)) from this office discouraged the claiming and recovery of privately owned animals until such time as regulations implementing PL 92-195 were published, horse and burro use subsequent to February 4, 1972, will not be considered trespass and value of the forage consumed can be assessed at the regular horse grazing fee rate during the grazing use period based upon information provided by the claimant and other available data. Unauthorized grazing use by horses and burros prior to February 4, 1972, will be considered as trespass and subject to settlement under the grazing trespass regulations. Items subject to arbitration in determining AUM's used include length of time animals have used public lands, age of animals, percentage of public lands in the area grazed, and whether the animals have been off public lands part of the year or seasons of the year.

If Settlement of Trespass Obligation Offer, Form 9239-1, is not acceptable to the DM or not submitted in response to the Trespass Notice, Form 9230-1, the DM will consult the Field Solicitor (through current arrangements with the respective SD's) for alternative guidance and compromise considerations (BLM Manual 9230.61) before a demand is issued on the trespasser.

October 18, 1973

Instruction Memo No. 73-443 Expires: 6/30/74

To: AFO's

From: Director

Subject: Branding of Licensed Horses and Burros

It is becoming increasingly evident as the Bureau initiates the wild horse and burro program that the identification of privately owned horses on the national resource lands is a significant problem because many of these animals do not carry brands or other markings. There are numerous areas where the historic practice of turning out privately owned horses and burros has resulted in a hodgepodge of conflicting claims of ownership and an administrative nightmare for field personnel attempting to regulate authorized use.

As the Bureau enters into claiming operations of private animals in connection with PL 92-195, the lack of brands will result in considerably more effort in adjudicating claims and supervising removal of animals than in those cases where the animals are branded. Consequently, we are proposing rulemaking to amend 43 CFR Parts 4112 and 4122, which will require that all authorized livestock over six months of age carry a registered brand or mark (copy of proposed rulemaking enclosed).

The proposed regulation change should be presented at district advisory board meetings scheduled this fall. However, until rulemaking becomes final, any authorization issued for horse or burro grazing use will require the animals to be properly branded.

In addition to expediting claiming operations in connection with PL 92-195, the branding requirement will simplify grazing trespass administration involving all classes of livestock. The action is also responsive to individuals and horse protection groups who have expressed concern that horses thought to be wild and free-roaming have been rounded up by individuals claiming ownership of the animals. The fact that unbranded horses are observed on the open range naturally leads many people to believe that these horses are, in fact, wild and free-roaming, and should remain that way.

4713(330)

As management framework plans are accomplished on areas inhabited by wild and free-roaming horses and burros, decisions will have to be made concerning the continued authorized use of domestic horses and burros in those same areas. Attention to obvious conflicts in the planning process will reduce management problems as resource action plans are implemented.

Furt Berklund.

United States Department of the Interior

4700(330)

BUREAU OF LAND MANAGEMENT WASHINGTON, D.C. 20240

February 20, 1974

Instruction Memo No. 74-52 Expires 6/30/74

To: SD's and DM's

From: Associate Director

Subject: Wild Horse and Burro Population, Supplemental Feeding, and Advisory Board

Since publication of the wild horse and burro regulations on August 15, 1973, concern has been expressed on a number of issues that need further clarification.

1. Significant wild horse and burro population increases have been reported in some areas. You may take steps to maintain wild horse and burro populations at the 1971 level pending the completion of management plans where resource damage is occurring and planning will be delayed. Any proposed animal reduction program must be coordinated with the State Director and WO.

2. Recent newspaper articles have speculated on this winter's range conditions and feed shortages for wild horses and burros. These articles have generated numerous letters as to our policies on supplemental feeding.

You should resort to supplemental feeding only in unusual and extreme circumstances when herd populations are threatened. We must recognize winter losses as one of nature's ways of selection and population control as it is recognized in other wildlife situations.

3. Some offices have asked as to the role of the WH&B Advisory Board in local operational matters. In addition to the role set forth in the regulations (4711.1), you can find further elaboration in the proceedings of the first meeting of the Advisory Board at Salt Lake City on January 12 and 13, 1973.

Following are pertinent excerpts from Associate Director Turcott's comments at the meeting:

- You have been selected because of your talents. You are not representatives of any special group or interest. Your advice is needed from the full scope of your talents and cannot be limited by past or present affiliations.

- In our management and therefore in your advice you must give full weight to the values placed on these animals by the people as a whole. We cannot be unduly influenced by value systems of special groups of our citizenry.
- By Act of Congress and approval of the President, the Secretaries of Agriculture and Interior have full responsibility for the wild horse and burro program. Thus, they have to make the decisions. In the Act the Congress recognized the need for the highest level of advice from qualified citizens. This is your job.
- A desire may arise for the Board to concern itself with the multiplicity of individual actions that must be taken in the implemention of the law, the regulations, policies, and guidelines. We have viewed this Board as operating at the highest levels of program control and not at the local implementation levels.
- In accepting service on this Board you have, of course, not given up your rights as individual citizens. In that capacity you may individually wish to participate in the public participation process at the District, State and regional levels. I know you are all skilled enough to make it clear when you are acting in your individual capacities and when you are acting in your advisory role at the national level.

The issues raised in 1, 2, and 3 above have been discussed with the Wild Horse and Burro Advisory Board members and they support the general approach outlined.

Jeargo L. Turcalt

.01

4710 - WILD FREE-ROAMING HORSE AND BURRO MANAGEMENT

.01 <u>Purpose</u>. This section provides instructions and guidelines required to implement the Wild Free-Roaming Horse and Burro Management Act of December 15, 1971.

.02 Objectives. The objectives are to:

A. Provide uniform and effective direction for the management and protection of wild free-roaming horses and burros on national resource lands.

B. Establish a natural ecological balance to benefit wild freeroaming horses and burros.

.03 Authority.

A. Basic.

1. Wild Free-Roaming Horse and Burro Management Act of December 15, 1971 (16 U.S.C. 1331-1340), PL 92-195.

B. General.

1. Taylor Grazing Act of June 28, 1934 (48 Stat. 1269; 43 U.S.C. 315, as amended).

2. O. and C. Act of August 28, 1937 (50 Stat. 874; 43 U.S.C. 1181a).

3. Endangered Species Preservation Act of October 15, 1966 (80 Stat. 926; 16 U.S.C. 668, as amended).

4. Title I of the Public Land Administration Act of July 14, 1960 (74 Stat. 506; 43 U.S.C. 1361).

5. National Environmental Policy Act of 1969, January 1, 1970 (83 Stat. 852).

.04 Responsibility.

A. <u>The Director and Associate Director</u> are responsible for the overall management of wild free-roaming horses and burros on national resource lands administered by BLM.

B. <u>The Assistant Director, Resources</u>, through the Chief, Division of Range, is responsible for developing and implementing procedures for the protection of wild free-roaming horses and burros.

BLM MANUAL

4710 - WILD FREE-ROAMING HORSE AND BURRO MANAGEMENT

C. <u>State Directors and District Managers</u> as authorized officers are responsible for assuring the protection of wild free-roaming horses and burros on the lands they administer, consistent with the procedures set forth in this Manual section.

.05 Definitions. (Reserved)

.06 Policy. It is Bureau policy that:

A. Administration of the public lands provide for the management, protection and control of wild free-roaming horses and burros.

B. Wild free-roaming horses and burros be protected from capture, branding, harassment, or death.

C. Wild free-roaming horses and burros must be managed in a manner that is designed to achieve and maintain a thriving natural ecological balance on the public lands.

D. All management activities must be at a minimum feasible level and carried out in consultation with the wildlife agency of the State wherein such lands are located in order to protect the natural ecological balance of all wildlife species which inhabit such lands, particularly endangered wildlife species.

E. Adjustments in forage allocation on any such land must take into consideration the need of wildlife species and authorized livestock which inhabit such lands.

F. Management of wild free-roaming horses and burros will not be assigned to any private individual or association through a grazing license, lease, or permit.

.07 <u>Public Participation</u>. A primary concern relative to all aspects of administration of PL 92-195 must be adequate public information, education, and participation. A plan and schedule must be developed by the Director's Office and each State and District Office involved in this activity to assure adequate public participation in accordance with the procedures outlined in BLM Manual 1127.

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND .01 BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

.01 Purpose. The purpose is to provide procedures for:

A. Filing of ownership claims for horses and burros found grazing on national resource lands without authorization.

B. Determining validity of ownership claims.

C. Processing of ownership claims.

D. Removing of such animals when claims are found to be valid.

.02 <u>Objectives</u>. The objectives are to assure that wild horses and burros are provided adequate forage opportunities by:

A. Identifying and removing validly claimed trespass horses and burros from the national resource lands.

B. Removing other trespass horses and burros for which a claim has not been filed.

.03 Authority. (See BLM Manual 4710.03.)

.04 Responsibility.

A. Director and Associate Director. (See BLM Manual 4710.04A.)

B. Chief, Division of Range. (See BLM Manual 4710.04B.)

C. <u>State Directors and District Managers</u> as authorized officers are responsible for:

1. Coordinating the development of valid ownership criteria with appropriate State and Federal agencies.

2. Assuring adequate public participation in the claiming process.

3. Consulting with the Field Solicitor on all matters relating to the claiming, recovering, and sale of trespass animals.

4. Complying with the provisions of this Manual section.

BLM MANUAL

.05

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

.05 Definitions.

A. Trespass horses or burros:

1. Unauthorized animals, either branded or unbranded, grazing on public lands and described in a valid claim. They may be further divided into:

a. Those removed after proper authorization.

b. Those not removed after proper authorization.

c. Those removed without authorization.

2. Unclaimed, branded animals grazing on public lands.

3. Branded or unbranded animals abandoned upon public lands after December 15, 1971.

.06 <u>Policy</u>. It is Bureau policy that public participation techniques be fully utilized to acquaint the public with the regulations and procedures relating to the claiming of trespass horses and burros. A public participation plan and schedule must be prepared by the Director's Office, each State Director, and each District Manager covering the claiming process. (See Illustration 10 for a format of a public information and participation plan.)

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND SURROS

.1 General. 43 CFR 4713.1(b) states:

"The gathering or rounding up of unbranded horses or burros on the public lands where any of such animals are not in fact authorized to be on the public lands pursuant to a grazing license, permit, lease, or other authorization, is prohibited without written notice from the authorized officer. Also prohibited without written notice from the authorized officer, is the gathering or rounding up of unauthorized branded horses or burros where the branded animals are, or may become, intermingled with wild free-roaming horses or burros, or where the gathering or round up is likely to involve or affect wild free-roaming horses or burros."

All authorized officers must assure that the above statement is complied with.

BLM MANUAL

.2

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

.2 Action on Claims.

.21 <u>Filing of Ownership Claims</u>. Ownership claims are filed with the District Manager on Affidavit and Claim of Ownership of Horses or Burros on Public Lands, Form 4710-1, supported by valid proof of ownership, as outlined below (see Illustration 1).

A. <u>State-BLM Cooperative Agreements</u>. State Directors must attempt to develop cooperative agreements with the State agency, or agencies, responsible for branding and estray laws, detailing criteria for valid proof of ownership (see Illustration 9).

1. <u>Field Solicitor</u>. Cooperative agreements should be coordinated with the responsible Field Solicitor.

2. Forest Service. Since the Forest Service (USDA) plays a substantial role in the management of wild horses and burros, it is desirable to include them in the formulation and execution of the agreement, even though they may not be a party to the agreement. It is essential that procedures relating to ownership criteria and claiming be identical between the FS and BLM in each State.

B. Other Ownership Criteria. In the absence of a State-BLM cooperative agreement, the District Manager, with the Field Solicitor's advice, must determine criteria for valid ownership. Such ownership evidence may include:

1. <u>Bill of sale meeting State legal requirements</u>, fully describing the claimed animal(s).

2. <u>Valid inspection certificate</u> issued by the State on a previous occasion, fully describing the animal(s), which clearly identifies claimant's ownership.

3. <u>Valid brand exemption certificate</u> issued on a previous occasion, fully describing the animal(s), which clearly identifies claimant's ownership.

4. <u>Tax receipt</u> identifying the claimant as having paid personal property tax on the claimed animal(s).

5. <u>Common knowledge</u> that the animal(s) claimed is (are) progeny of a mare, or mares, owned by the claimant.

.22 District Manager's Decision. Based on the above criteria, the District Manager determines validity of claim and notifies the claimant on Acknowledgement of Claim of Ownership of Horses or Burros and Decision of the District Manager, Form 4710-2 (see Illustration 2). This form must be served personally or sent by certified mail, return receipt requested.

BLM MANUAL,

Rel. 4-51 2/28/74

Supersedes Rel. 4-49

.23

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

.23 <u>Claiming Schedule</u>. District Manager formulates a schedule for the removal of horses or burros for which claims have been validated. The schedule must conform to overall District planning priorities and cause minimum disturbance to wild free-roaming horses or burros. Another consideration is the grazing authorization expiration date for domestic horses and burros.

.24 <u>Public Meetings</u>. Meetings should be held with the public, claimant(s), and other interested parties to coordinate plans and dates for gathering and removal of owned animals from specific areas.

.25 <u>Gathering Authorization</u>. District Manager issues claimant Authorization to Gather Claimed Horses and Burros, Form 4710-3, in accordance with the claiming schedule (see Illustration 3). Authorization must specify gathering techniques, noting that gathering will be authorized on public lands <u>only</u>, unless cooperative agreements or other arrangements have been executed with private landowners.

.26 <u>Gathering Procedures</u>. The District Manager must supervise all gathering operations to determine that the method used is in compliance with applicable laws and the regulations. The District Manager is responsible for assuring that the gathering is conducted by humane methods.

.27 <u>Trespass Charges</u>. Assess in accordance with 43 CFR 9239.3. Charges must be determined on a case-by-case basis taking into account individual circumstances and data available.

.3

4713 - PROTECTION OF WILD FREE-ROAMENG HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

.3 Action in Absence of Claims.

.31 <u>Closure</u>. If the District Manager determines there are horses or burros on the public lands which fall into one or more of the following categories, he may request that the State Director close the area to grazing by domestic horses and burros (see 43 CFR 9239.3):

- branded, but unclaimed

- branded and claimed, but not gathered

- branded or unbranded, abandoned after December 15, 1971

A. <u>Notice of Closure</u>. State Director prepares Notice of Closure, Form 4710-4, if he concurs with the District Manager's request (see Illustration 4).

B. <u>Publication of Notice</u>. Notices should be published sufficiently in advance of the closure date to allow claimants to file ownership claims. Notices must be published in a local newspaper and posted in the District Office, at the county courthouse, and in a post office near the closure area.

C. <u>Coordination</u>. Coordinate closures with District claiming schedule to allow impoundment of trespass animals at the same time claimed animals are to be gathered. Notify authorized grazing licensees and permittees in the closure area, by regular mail, of closure, prior to publication of the Notice of Closure. If practical, closures should be coordinated with the grazing authorization expiration date of horses and burros licensed or permitted to use the area.

.32 <u>Impoundment</u>. After the closure period, specified in the Notice of Closure, horses and burros may be impounded as follows.

A. <u>Determining Location of Trespass Animals</u>. It must be determined that trespass horses and burros are on public land, or lands under formal cooperative agreement with other landowners, at the time impoundment action is taken.

B. <u>Impoundment Facilities</u>. Corrals, fences, etc., should be located or temporarily constructed on lands owned by the Federal Government, unless formal arrangements have been made for the use of private facilities. In all instances impoundment facilities must be adequate to handle animals as humanely as possible.

BLM MANUAL.

Rel. 4-49 10/23/73 .3201

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

C. Care and Handling of Impounded Animals.

1. <u>Preventing Injury</u>. Care must be taken to prevent injury to horses and burros during roundup and impoundment. Sufficient help should be available to assure adequate handling. If animals are seriously injured or die during impoundment, extent of injury or exact cause of death must be documented.

2. <u>Marking</u>. In some cases it may be helpful to dye-mark impounded animals for identification in the event of loss or for future reference.

3. <u>Feeding</u>. Impounded animals must be adequately fed and watered during impoundment.

4. <u>Security</u>. Provide reasonable security during the impoundment period to prevent harm and unauthorized removal.

D. <u>Ownership Determination</u>. Ownership of impounded horses and burros should be determined jointly by the authorized officer and a State brand inspector. The brand inspector should provide the authorized officer written verification of his identification. Horses and burros determined to be wild and free-roaming must be released on public lands.

1. <u>Trespass Charges</u>. Privately owned horses and burros are considered to have been in trespass and may not be released until a proper trespass charge has been determined by the authorized officer in accordance with the provisions of 43 CFR 9239.3.

Rel. 4-49 10/23/73 4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS .4

.4 Disposal of Unclaimed Trespass Horses and Burros.

.41 Repossession.

A. <u>Redeemed by Their Owners</u>. (See 43 CFR 4713.2(b)&(c))

.42 <u>Transfer</u>. Unclaimed trespass horses or burros may be turned over to the appropriate State or local official pursuant to State branding and estray laws.

.43 <u>Disposal by Sale</u>. Impounded animals not claimed or transferred may be offered for sale, subject to the following.

A. Notification of Sale.

1. <u>Public Notice</u>. Authorized Officer prepares Notice of bale of Impounded Horses and Burros, Form 4710-5, (see 'llustration 5) assuring concurrent issuance as follows:

a. Publish in local newspapers. Care should be taken to assure that notification is published in as many newspapers as possible to inform likely owners. Since many newspapers are published weekin, it is necessary to know the schedule of each newspaper to arrange for simultaneous publication.

b. Post notice in county courthouse for the county, we counties, involved and in the District Office.

c. Post notice in post office(s) which service the area involved by the impoundment.

d. Post additional notices in other public meeting places as appropriate.

2. <u>Private Notice</u>. Notify known owners of public sale, using Notice to Owners of Impounded Horses and Burros, Form 4710-6 (see Illustration 6). This notice must be served in person, or sent by certified mail, return receipt requested.

B. <u>Conduct of Sale</u>. All animals not redeemed by the date and time set for sale are to be sold at public auction.

1. <u>Price Determination</u>. The authorized officer must establish a minimum sale price for each animal. This price must be no less than impoundment costs, unless such costs exceed fair manual value for the animal.

BLM MANUAL

.43B2

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF OF CLAIMED AND TRESPASS HORSES AND BURROS

2. <u>Auction</u>. Animals are to be auctioned individually. If the minimum sale price is not received, animals may be reoffered for sale at progressively lower prices.

3. <u>Payment</u>. Payment must be in cash, money order, or cashier's check, payable to the Bureau of Land Management. Personal checks are not acceptable. All payments are to deposited to account number 142299 (Sale of Miscellaneous Products and By-Products Not Otherwise Classified).

4. <u>Transfer of Ownership</u>. Bill of Sale of Impounded Horses or Burros, Form 4710-7, must be issued to the buyer of impounded animals (see Illustration 7).

.44 Other Disposal. If unclaimed horses and burros cannot be seld or released to State agencies using the above procedures, such livestock may be condemned and disposed of in the most humane manner possible.

.5

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

.5 <u>Records and Filing</u>. Copies of <u>all</u> documents issued under this section, together with copies of State brand inspector reports, must be filed in the District Office. Horse and Burro Claims Record, Form 4710-8, is maintained as a summary for all claims within the District (see Illustration 8).

Acknowledgement of Claim of Ownership of Horses or Burros and Decision of the District Manager

Form 4710–2 (October 1973) UNITED STATES DEPARTMENT OF THE INTERIOR BUREAU OF LAND MANAGEMENT

Date September 6, 1973

Mr. C. A. Weaver Box 204 Wamsutter, Wyoming 82311

X Certified #092856 Registered Return Receipt Requested

ACKNOWLEDGEMENT OF CLAIM OF OWNERSHIP OF HORSES OR BURROS AND DECISION OF THE DISTRICT MANAGER

Your claim of animals filed on Affidavit and Claim of Ownership of Horses or Burros on Public Lands (Form 4710-1) was received in this office on (date) August 28, 1973

[X] Your claim as submitted is acceptable. Authorization to gather and remove the animals claimed will be issued later in accordance with the District Claiming Schedule.

THIS IS NOT AN AUTHORIZATION TO GATHER AND REMOVE CLAIMED ANIMALS*

Your claim as submitted is rejected for the following reason(s):

Claim form is not complete

Claim does not constitute adequate proof of ownership

If your claim has been rejected for the lack of adequate proof of ownership and you have no further evidence to support your claim, you have the right of appeal to the Board of Land Appeals, Office of the Secretary, within thirty (30) days from date of receipt of this decision, in accordance with the regulations in 43 CFR Part 1840 (see enclosed Information on Taking Appeals to the Board of Land Appeals (Form 1842-1)). However, if an appeal is to be taken, the notice of appeal must be filed in the above office (not the Board) so that the case file can be transmitted to the Board. To avoid summary dismissal of the appeal, there must be strict compliance with the regulations.

Persons attempting to remove unbranded borses or burros from the public lands without authorization are subject to prosecution under PL 92-195.

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

Suggested Format for Cooperative Agreement Between the [State] Livestock Board and the Bureau of Land Management

I. Purpose

This cooperative agreement between the [State] Livestock Board, nereinafter referred to as the Board, and the Bureau of Land Management, hereinafter referred to as the Bureau, is for the purpose of identifying joint responsibilities of each agency toward the implementation and administration of the 1971 Wild Free-Roaming Horse and Burro Act, 16 U.S.C. §§ 1331-1340 (1970 Supp.), hereinafter referred to as the Act, and the regulations embodied in 43 CFR Part 4700, Wild and Free-Roaming Horse and Burro Management, hereinafter referred to as the regulations, within the State of

II. Objectives

The Bureau is charged by the Act and the regulations to manage, protect, and control wild free-roaming horses and burros on Bureau administered lands under its jurisdiction, and private land under cooperative agreement. The Board is charged with the responsibility for validating and processing claims of ownership of branded and unbranded animals pursuant to the State branding and estray laws, and the proper disposal of animals pursuant to the livestock sanitation laws, within the State of

THEREFORE, it is the mutual desire of the Board and Bureau to work in harmony for the common purpose of planning, implementing, and administering the applicable State and Federal laws to accomplish the management, protection, and control of wild free-roaming horses and burros within the State of ______ and provide maximum service with minimum adverse effect on resources and the environment.

III. Authority

The Board is authorized to determine claims of ownership under State law with Federal agencies pursuant to _____ State laws (______ Stat., Secs.).

The Bureau is authorized to enter into cooperative agreements with State agencies concerning the management and protection of wild free-roaming horses and burros, and the management, use and protection of the public lands under the provisions of the Wild Horse Act of December 15, 1971, 16 U.S.C. §§ 1331-1340 (1971 Supp.), the Taylor Grazing Act, 43 U.S.C. §§ 315-315r (1970), and other authorities.

BLM MANUAL

Rel. 4-40 10/23/73

Illustration 9, Page 2

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

Suggested Format for Cooperative Agreement Between the [State] Livestock Board and the Bureau of Land Management

IV. Resource Planning System

The Bureau's resource planning system produces guidelines and decisions for management of the resources on Bureau administered lands. Since wild free-roaming horses and burros can be affected by decisions which are produced by the planning system, it is essential that information, data, viewpoints, and cooperation be obtained from the Board. The Board, can also benefit from similar consultation with the Bureau. IT IS THEREFORE AGREED:

A. Wild Free-Roaming Horses and Burros. "Wild free-roaming horses and burros" shall mean all unbranded and unclaimed horses and burros which have used lands administered by the Bureau on or after December 15, 1971, or do hereafter use these lands as all or part of their habitat. Unbranded, claimed horses and burros, when the claim is found to be erroneous, are also considered as wild and free-roaming if they meet the criteria above. However, this definition shall not include any horse or burro introduced onto Bureau administered lands on or after December 15, 1971, by accident, negligence, or willful disregard of private ownership.

B. Board. The Board will participate, to the extent allowed by other program commitments, in planning system meetings called to review management plans and proposals, and offer recommendations regarding wild horse and burro management and other management alternatives. The Board recognizes the Bureau's jurisdiction over wild free-roaming horses and burros, including those that stray from Bureau administered lands or are privately maintained as provided in the Act and the regulations.

C. Bureau. All resource information gathered by the Bureau during the inventory and public participation phases of the planning effort will be available for review by the Board. To the extent allowed by program commitments, the Bureau will assist the Board as requested in providing data beneficial to the Board's planning efforts.

1. Claims to Animals

The Act (16 U.S.C. §§ 1331-1340), and the Secretary's regulations thereunder (43 CFR Part 4700), provide that persons may recover unbranded animals where they can show proof of ownership under the State estray laws.

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

Suggested Format for Cooperative Agreement Between the [State] Livestock Board and the Bureau of Land Management

Therefore, in order to properly conform to such provisions and to provide harmony between the State and Federal agencies in recognizing those persons who have legitimate claims to animals, otherwise thought to be wild and free-roaming, it is mutually agreed that the following procedures must be followed:

a. Written claims will be accepted by the Bureau's authorized officer.

(1) The claimant must submit with his claim a sworn affidavit asserting ownership to the claimed animals and indicating a willingness to defend title and setting forth the following:

(a) Number of animals claimed.

(b) Full description of each of the claimed animals including factors indicating tameness such as animal being gelded, or broken to rope or saddle.

(c) Date and circumstances animals entered upon the open

(d) Location of relevant private or leased lands where animals were kept prior to the entry on open range.

(e) Any other information the claimant deems relevant.

(2) Other ownership evidence, when available, will be submitted with the claim. This may include:

(a) A bill of sale fully describing the claimed animal(s) and which meets all State legal requirements for a bill of sale, or

(b) A valid inspection certificate, issued by the Board for some previous occasion, which fully describes the animal(s) and which clearly identifies the animal(s) as belonging to the claimant, or

(c) A valid brand exemption certificate, for some previous occasion, which fully describes the animal(s) and which clearly identifies the animal(s) as belonging to the claimant.

If the claimant is unable to satisfy (a), (b), or (c) above, the Board may consider other appropriate indicia of ownership which may include, but is not limited to; whether the claimant has paid personal property tax upon the claimed animal(s); or whether the animal(s) is the known progeny of a mare owned by the claimant.

BLM MANUAL

range.

Rel. 4-49 10/23/73

Appendix 5a, page 35 Illustration 9, Page 4

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

Suggested Format for Cooperative Agreement Between the [State] Livestock Board and the Bureau of Land Management

b. Upon receipt of the written claim and supporting information, the Bureau's authorized officer must meet with the Board's representative and jointly review the information submitted by the claimant. Based upon this review, the Board must certify in writing to the authorized officer as to whether the claimant meets the State ownership requirements.

(1) If State ownership requirements have been met, the Bureau's authorized officer must issue written authorization to the claimant setting forth the terms and conditions for gathering the animals. The Bureau's authorized officer and the Board's representative may participate in and supervise roundups directed by the Bureau to assure compliance with State laws and regulations.

(2) After animals are gathered, they must be inspected by the Bureau's authorized officer and Board representative, and upon satisfaction of ownership and determination of any trespass charges, the animals must be turned over to the claimant. Unclaimed animals, showing evidence of abandonment, such as unregistered brands, tattoos, or tags, must be turned over to the Board to be handled under State estray procedures. Wild free-roaming animals must be returned to the open range.

2. Disposal of Animals

Pursuant to the Act and regulations, the Bureau may direct the disposal of animals. Prior to disposal, the Bureau must consult with the Board regarding disposal of animals except in acts of mercy requiring immediate action. The Board must review any proposed disposal and make recommendations concerning the method of destruction and the method of disposing of destroyed animals, in accordance with State laws concerning humane treatment of animals and public health and sanitation.

Horses or burros known to be infected with certain communicable or infectious deseases such as swamp fever and sleeping sickness must be disposed of by the Bureau in the most humane manner after consultation with the Board. In the event of potential disease epidemic in a wild horse and burro herd, the Bureau must consider recommendations and guidance of the Board to minimize the potential and to dispose of infected and exposed animals.

3. Violations; Enforcement

In the event of alleged or known violations of the Act, the Bureau must contact the Board to validate the ownership status of the animal(s) involved according to the criteria set forth in this agreement. The Board may be requested to assist in enforcement proceedings where wild free-roaming horses or burros are involved.

BLM MANUAL

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

Suggested Format for Cooperative Agreement Between the [State] Livestock Board and the Bureau of Land Management

4. Property Damage

The Board may be requested to assist the Bureau in investigation of alleged property damage inflicted by wild free-roaming horses or burros. Assistance must include, but may not be limited to, establishment of the ownership status of animals.

V. Administrative Matters

A. Annual Meeting

The Board and the Bureau must meet jointly at least once annually to discuss matters relating to the planning, coordination, and implementation of the Act and regulations pertaining to management of wild horses on or affecting the Bureau administered lands and provide for other meetings as necessary.

B. Other Agreements

The local representatives of both agencies may enter into supplemental or specific agreements to accomplish the purpose of this agreement.

C. Transporting Horses and Burros

Horses and burros must be transported from Bureau administered lands in accordance with rules and regulations of the Board and the Bureau.

D. Funding Obligations

Nothing in this agreement shall be construed as obligating either party hereto in the expenditure of funds.

E. Restrictions

No member or delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this agreement, or to any benefit which may arise therefrom.

F. Discrimination

All cooperative work under the provisions of this agreement, or supplemental agreements or memorandums of understanding, must be accomplished without discrimination against any person because of race, creed, color, sex, or national origin. Illustration 9, Page 6

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

Suggested Format for Cooperative Agreement Between the [State] Livestock Board and the Bureau of Land Management

G. Termination

This agreement shall become effective when signed by the designated representatives of the parties hereto and shall remain in force until terminated by mutual agreement, or by either party upon thirty (30) days notice in writing to the other of its intention to terminate upon a date indicated. Amendments to this agreement may be proposed by either party and shall become effective upon approval by both parties.

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

4. Nevada Woolgrower's Association - same as 3 above.

5. Nevada Farm Bureau Federation - same as 3 above.

6. Nevada Conservation Forum - this Forum has provided the opportunity for people representing many interests to get together periodically and discuss matters of conservation interest and to update members about ongoing programs. The organization as such will take little interest in the wild horse and burro management program; however, individual members, for example, President Cliff Young, can be expected to take an active interest and exert strong influence for management and protection from a preservationist point of view.

7. Nevada Mining Association - the Association will be sympathetic and interested in our management problems regarding wild horses and burros but will make no effort to become actively engaged unless a management action is taken which it believes is inimical to its immediate interests, such as designation of a wild horse range in an area where the NMA expects to conduct mining activity.

8. Sierra Club - will be interested and actively watchful of the Bureau's wild horse and burro management program from the standpoint of effect on the environment, particularly from the viewpoint of overutilization or institution of range practices which might upset the ecological balance.

9. Nevada Outdoor Recreation Association - cannot be sure of the Association's response to the wild horse and burro program. It is generally protection and preservation oriented. Would not expect much in the way of support or opposition unless there was degradation caused by wild horses and burros in an area which it felt had wilderness or recreational values.

10. Reno Gem and Mineral Club - only a casual interest evidenced in the Bureau's management of the national resource lands. About the only time it can be expected to react is to a management decision which would restrict its use of a particular area.

11. Nevada State Committee on Federal Land Laws - has maintained a rather adversary stance with respect to BLM. It will be very interested in the wild horse and burro program, particularly as it may affect the livestock industry. It can be expected to formulate its judgments independently and report, with recommendations, directly to the Governor.

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

12. Governor - is interested in effective public land management which will keep the lands open and available for unrestricted use consistent with State interests and needs. As a generalization, he will support management of the wild horses and burros.

13. Nevada Wildlife Federation - can be expected to support the wild horse and burro management program, but will be very concerned if it is necessary to reduce forage allocations for wildlife in order to balance out for wild horses, particularly if such reductions are not made even more severely for the livestock industry.

14. Department of Conservation and Natural Resources - the Department will reflect and implement the views of the Governor, but will perhaps be conditioned to a considerable extent by the Nevada State Committee on Federal Land Laws. The sympathy of the Department may be characterized as industry (livestock) oriented, and our management will be viewed from this standpoint.

15. Department of Fish and Game - will be actively engaged with our management of wild horses and burros if specific ranges are designated for wild horse and burro use. This participation is in keeping with the Department's responsibilities for wildlife management. As an organization, it will be generally sympathetic, supportive, and helpful to our management program as long as it does not intrude into any areas which it believes to be a State's rights area.

16. Department of Agriculture - as an organization will not be greatly concerned with our wild horse and burro program unless it must actively participate in the determination of the ownership process. This will be a sensitive area with the Department, and the way it is handled and the agreements arrived at will determine its attitude about this program and the BLM.

17. Nevada Open Spaces Council - will be interested in our management of the wild horses and burros from a conservationist/preservationist point of view. It can be expected to be critical of a management program which reduces wild horses and burro numbers in order to protect forage for the livestock industry. By and large, the Council can be expected to support our management program if it feels the program is being legitimately designed to maintain the ecological balance.

18. Nevada Organization for Wildlife - this organization will exhibit a reasonable interest in the wild horse and burro program and can generally be expected to support our management endeavors. However, it, along with the Nevada Wildlife Federation, will be critical of any forage reductions at the expense of wildlife, particularly if reductions are not the same or more for the livestock industry.

BLM MANUAL

Rel. 4-49 10/23/73 Illustration 10, Page 4

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

19. Nevada Environmental Education Council - we are not well enough acquainted with this organization to assess what its viewpoint might be with respect to the wild horse and burro program.

20. Nevada Off-Road Vehicle Association - will be interested in our management only to the extent that closures or restrictions on off-road vehicle use may be placed in effect in certain areas to protect the wild horses and burros. While the Association might question the need for closure or restriction in any given area, it can generally be expected to be cooperative and helpful. However, it will have little understanding of the management problems inherent in this program.

21. National Mustang Association - this organization actively supports the protection and management of wild horses and burros. It may not, however, be fully supportive of a BLM management program. If past practices are any indication, it will want to actively engage itself in some phases of our management. The NMA will need to be handled with care.

22. Wild Horse Organized Assistance, Inc. - the organization is heavily oriented to the protection and preservation of the wild horses and burros, with little regard for other considerations. It will support management which moves to achieve these objectives. It will be critical of compromise measures recognizing other interests at the expense of wild horses and burros. It is adamantly opposed to any action even suggesting inhumane treatment of these animals. With care, we can gain some support for our management program.

23. Society for Range Management - a society of professional and lay people interested in range management. It will be extremely interested in the program as it affects future direction and concepts in management techniques.

24. Wildlife Society - an organization of professional wildlife biologists. It will be vitally interested in the wild horse and burro program, since this program directly affects wildlife and wildlife habitat management.

25. Society of American Foresters - a society of professional foresters. It will be interested from a resource management standpoint, but not agressively concerned since wild horse and burro management will not directly affect timber management in Nevada.

26. Forest Service - this agency has the same responsibilities under Public Law 92-195 as BLM. Forest Service people have been very cooperative and interested to date and can be expected to continue to cooperate in all actions relating to wild free-roaming horses and burros.

BLM MANUAL,

Rel. 4-49

Illustration 10, Page 5

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

27. University of Nevada - the University (College of Agriculture in particular) can be expected to be keenly interested in the program because of its impact upon its various disciplines and because of its general interest in all activities concerning the program.

28. American Society of Animal Science - a Society of professional animal scientists. It can be expected to be very interested in the program in Nevada due to the "range orientation" of the livestock industry here. It also opens new avenues of study and management for the Society.

29. Nevada State Multiple-Use Advisory Board - interest and support can be expected to vary considerably by individual member. As a group, however, the Board may be opposed to many of the actions required by Public Law 920195.

C. Long-Range Goals: To promote public knowledgeability about, and obtain active support for, the Bureau's efforts at wild horse and burro management, including administration of the public lands for the management and protection of wild free-roaming horses and burros; protection of wild free-roaming horses and burros from capture, branding, harassment or death; management of wild free-roaming horses and burros in a manner designed to achieve and maintain a natural ecological balance on the public lands; consideration of adjustments in forage allocation on national resource lands to accommodate the needs of wildlife species and authorized livestock which inhabit such lands; and to assist the Bureau in arriving at wise management decisions in these matters.

D. <u>Short-Range Objectives</u>: To inform the public regarding the claiming process and determination of ownership; to assure the public is informed regarding gathering the removal of claimed horses and removal procedures; to inform the public regarding the Bureau's planning system and its use in wild horse and burro management, and to gain public participation in the development and implementation of wild horse and burro management plans.

E. Informing the Public: To realize the short-range objectives and long-range goals of this program, the following means of disseminating information should be utilized: newspapers, news releases, feature stories, television news items, interviews, information-education items, brochures, fact sheets, public presentations, employee meetings, public meetings, and radio information tapes. Particular emphasis should be put on the use of workshops.

Two- to five-minute radio tapes will be made for use by local radio stations on various phases of the program as it is carried out, including feature stories describing the program's management and its immediate and ultimate objectives.

BLM MANUAL

Appendix 5a, page 42

Illustration 10, Page 6

4713 - PROTECTION OF WILD FREE-ROAMING HORSES AND BURROS IN THE IDENTIFICATION AND REMOVAL OF CLAIMED AND TRESPASS HORSES AND BURROS

F. <u>Timetable of Actions</u>: While the specific dates for scheduling the events under Informing the Public are not immediately known, they can be calculated as follows:

a = publication of final regulations

a - 15 days = news release regarding claiming period and procedures. Letter to publics transmitting simple handout explaining mechanics of claiming period and how to be handled.

a + 2 days = news release of final regulations. Letter transmitting regulations to publics. Radio item on farm news.

a + 5 days = television appearances regarding regulations, claiming, gathering, and removal of horses.

KCRL-TV, Channel 4 - Perspective - Dick DeWitt KOLO-TV, Channel 8 - By-Line - Tad Dunbar KTVN-TV, Channel 2 - On the Line - Cork Proctor

a + 15 days = first workshop on regulations. Employee meetings.

a + 20 days = radio tapes covering regulations, claiming, gathering, and removal, made available to Districts for local use.

b = gathering and removal of claimed animals.

b - 3 days = news release to announce gathering and removal schedule (to be supplied by Districts).

b + 1 day = feature article covering program to date, e.g., regulations, claiming, and gathering operations.

b + ? = periodic summaries of gathering and removal proceedings.

c = initiation of substantive management.

c + 1 = feature article regarding program, wild horse numbers, where located, management to be used, enforcement needs and techniques, and special problems.

c + 2 = radio tapes reflecting material in feature article above.

c + 3 = initiation of workshops regarding wild horse management program, its problems and needs. Employee meetings.

Scheduled through this timetable of actions will be public meetings exposing our MFP's, with particular emphasis on the wild horse management program.

4711 - MANAGEMENT COORDINATION

.01 <u>Purpose</u>. This section provides information and guidance for coordination of wild free-roaming horse and burro programs with advisory boards, State and Federal agencies, and other interested parties.

.02 <u>Objective</u>. The objective is to seek and obtain full participation by all agencies and interested parties in the conduct of the program.

.03 Authority. Title 43 CFR 4711 (also see BLM Manual 4710.03).

.04 Responsibility.

A. The Director and Associate Director. (See BLM Manual 4710.04A.)

B. The Assistant Director, Resources. (See BLM Manual 4710.04B.)

C. <u>State Directors and District Managers</u>, as authorized officers, are responsible for coordination with the Joint National Advisory Board on Wild Free-Roaming Horses and Burros, appropriate State and Federal agencies, and other local organizations and individuals concerning policies and guidelines in addition to the actual conduct of the program within their respective areas of jurisdiction.

.05 Definitions. (Reserved)

Appendix ba, page 46

BLM MANUAL

.1 <u>Recommendations of the Joint National Advisory Board on Wild Free-</u> Roaming Horses and Burros.

.11 <u>Required Consultation</u>. Consultation with the Advisory Board is required concerning policies and guidelines of a national scope relative to:

- Establishment of specifically designated ranges

- Management plans

- Adjustment in numbers

- Relocation of animals

- Disposal of animals

(See Appendix 1 for National Advisory Board - Administrative Procedures.)

.12 Desirable Consultation. The Advisory Board may also be consulted on other matters relating to the protection, management, and control of wild free-roaming horses and burros.

. 2

.2 State Agencies.

.21 Wildlife.

A. <u>Designation of Specific Ranges</u>. The District Manager must consult with the appropriate State wildlife agency prior to proposing the designation of a specific range.

Such consultation must include:

1. Area and location of the proposed range.

2. Plans for management of the area and optimum population objectives.

3. Need for special land-use regulations and their enforcement.

4. Expected impact on other uses, especially wildlife, and mitigating measures which may be taken to provide an alternate source of forage or habitat.

5. Possible predator control measures.

6. Development of facilities, if any.

7. Plans for any artificial manipulation of vegetative types.

8. Any other matter related to the establishment and use of the proposed range.

B. <u>Natural Ecological Balance</u>. The authorized officer must consult with the appropriate State wildlife agency to protect the natural ecological balance of all wildlife species which inhabit national resource lands, particularly endangered wildlife species. The Endangered Species Act of 1973 and implementing Departmental and Bureau guidelines establish, as overriding priority, the preservation of habitat for wildlife species threatened with extinction.

.22 Livestock. A person claiming ownership of a horse or burro on the public lands shall be entitled to recover it only if recovery is permitted under the branding and estray laws of the State in which the animal is found. In most instances, recovery of privately owned animals will be accomplished through procedures established in a cooperative agreement between the appropriate State agency and the Bureau (see 4713, Illustration 9).

3

4711 - MANAGEMENT COORDINATION

.3 Cooperative Agreement.

.31 Federal Agencies. The authorized officer, in providing for protection and management of wild horses and burros, must coordinate planned actions with other Federal land-managing agencies which might be affected by the provisions of the Act. (See Appendix 2 for an example of a memorandum of agreement with Federal Agencies.)

.32 State Agencies.

A. Land and/or Wildlife. Supplements to existing memorandums of understanding between State land and/or wildlife agencies and the Bureau may be required to effectively carry out the provisions of the wild horse and burro regulations for the protection, management, and control of wild free-roaming horses and burros in harmony with the wildlife resources within a State. (See Appendix 3 for an example of supplemental memorandum of understanding.)

B. Livestock. (See 4713, Illustration 9, for an example of a cooperative agreement with State sanitary and branding authorities.)

.33 Individuals or Organizations. Cooperative agreements may be entered into with individuals or organizations to maintain wild freeroaming horses and burros as follows:

A. <u>Public Land and Other Intermingled Ownerships</u>. If the grazing patterns of the wild free-roaming horses or burros require utilization of lands in other ownership, the authorized officer must seek cooperative agreements through individuals or organizations to insure continuance of such use. An example of where such an agreement might be sought is the railroad checkerboard lands located throughout much of the West. Wild free-roaming horses and burros utilizing both public and private lands by reason of a cooperative agreement are managed by the authorized officer, with full public participation in the planning process.

B. <u>Maintenance on Private Land Under Wild Free-Roaming Conditions</u>. An individual or organization is considered to be actively maintaining wild free-roaming horses or burros on private lands if measures are taken that are designed to protect or enhance the welfare of the animals under such conditions. The cooperative agreement must set forth the following management and maintenance requirements:

1. Number of Animals

2. Description of animals

3. Annual report (due in January of each year)

4. Means of control

BLM MANUAL

Appendix 5a, page 50

5. Means of disposal

6. Facilities for maintenance

7. Provisions for humane handling

8. Provisions for acts of mercy

C. Private Maintenance of Excess Animals Under Humane Conditions and Care. An individual or organization may maintain excess animals on private or leased lands. Requests for excess animals must be in writing and should be submitted to either the District, State, or Washington Office. A cooperative agreement must not be entered into with individuals or organizations where public lands, as defined in the Act (PL 92-195), will be a portion of the land area used to maintain the excess animals. The cooperative agreement must insure proper care and protection of the animals under humane conditions, and provide that neither the animals or their remains may be sold or used in any way for commercial exploitation, nor may any of the animals be transferred or reassigned except with written permission from the authorized officer. Fee title cannot be conveyed with the animal (see Illustration 1). The cooperative agreement may indicate any necessary special conditions that might be deemed necessary, such as marking or tattooing for subsequent identification.

1. A letter is sent by the authorized officer to those individuals or organizations which have indicated an interest in privately maintaining one or more excess animals. The letter is to determine further interest in the animals and state the general terms of assignment under a cooperative agreement.

2. Animals considered excess can be assigned to individuals or organizations by the authorized officer after a favorable recommendation from a screening committee selected by the District Manager. The selection committee should be persons having an interest in the management program. The committee usually should not exceed seven persons, and include two or three Bureau personnel.

3. Individuals or organizations wishing to obtain a horse or burro should state number wanted as to sex, age, color, etc., and why they desire excess animals. They must state type of facilities available such as pastures, size, location, etc., and furnish any additional comments that would be helpful in determing the best home for the excess animals. Applicants under the legal age must have their parents or legal guardian sign a request for excess animals.

BLM MANUAL

.4

4711 - MANAGEMENT COORDINATION

.4 <u>Grazing District Advisory Boards</u> in reviewing grazing applications or wildlife programs, may make recommendations relating to the protection and management of wild horses and burros if the presence of these animals affects livestock or wildlife.

UNITED STATES DEPARTMENT OF THE INTERIOR BUREAU OF LAND MANAGEMENT

COOPERATIVE AGREEMENT ASSIGNMENT FOR PRIVATE MAINTENANCE OF WILD FREE-ROAMING HORSES OR BURROS

Sally M. Cooper of Saratoga, Wyoming

and the Bureau of Land Management for the United States of America for and in consideration of the mutual benefits hereunder, and in accordance with Public Law 92-195, Sec. 3(b), do enter into this cooperative agreement for the maintenance, protection, and the welfare of wild free-roaming horses and burros.

Animals listed below have been declared excess and available for private maintenance in accordance with 43 CFR 4712.3-2.

ANIMALS ASSIGNED

Give description of each animal including color, markings, or other available identification information

1 yearling - brown filly with star and strip, white pastern, left rear leg

TERMS OF THIS AGREEMENT

1. Maintenance, as herein required, shall mean proper care and protection of the animals under humane conditions

- 2. None of these animals, or their remains, may be sold or used in any way for commercial exploitation, nor may any of these animals be transferred or reassigned except with written permission from the Authorized Officer
- 3. This agreement shall remain in full force and effect until (1) animals die, or (2) this agreement is terminated by the Authorized Officer after due notice in writing because of cooperator(s) default or violation of any of the terms or provisions of this agreement
- 4. Special conditions:

DEPARTMENT OF THE INTERIOR **Office of the** Secretary

DEPARTMENT OF AGRICULTURE Office of the Secretary

National Advisory Board on Wild Free-Roaming Horses and Burros

Administrative Procedures

I. <u>Purpose</u>. This document provides for the operation and describes the purpose, composition, and functions of the National Advisory Board on Wild Free-Roaming Horses and Burros.

II. <u>Authority</u>. The Act of December 15, 1972 (16 U.S.C. 1131-1340) requires the protection and management of wild free-roaming horses and burros on the public lands. Section 7 authorizes and directs the Secretary of the Interior and the Secretary of Agriculture to appoint a joint advisory board to advise them on any matter relating to the protection and management of wild free-roaming horses and burros, and specifies the qualifications required for membership on the advisory board.

III. National Advisory Board on Wild Free-Roaming Horses and Burros.

A. <u>Membership</u>. The Board shall consist of nine members, none of whom shall be an employee of the Federal Government or State governments.

1. Qualifications. Each member must have specialized knowledge in one or more of the following fields: The protection of horses and burros, the management of wildlife, animal husbandry, and natural resource management. At least one of each of the above disciplines shall be represented on the Board at all times.

2. <u>Selection</u>. All members shall be selected on the basis of experience and established competence in their respective fields of special the knowledge. Appendix 5a, pg. 54

a. <u>Appointments</u>. All members will be jointly appointed by the **Secretary of the Interior and the Secretary of Agriculture**.

4. <u>Term</u>. The term of appointment will be 1 year. If a member does not serve his full term, the Secretary of the Interior and the Secretary of Agriculture may appoint a successor for the remainder of the unexpired term. Members may be reappointed for additional 1-year terms not to exceed 10 years of total service.

5. <u>Compensation</u>. Members shall serve without compensation, except for reimbursement of travel expenses, including per diem, in connection with their duties as members.

B. <u>Functions</u>. The Board shall advise, consult with, and make recommendations to the Secretary of the Interior and the Secretary of Agriculture, or their duly authorized representatives, on any matter relating to wild free-roaming horses and burros.

C. <u>Meeting</u>. The Board shall meet at times and places to be determined by the Secretary of the Interior or the Secretary of Agriculture, or both, or their duly authorized representatives. It is estimated that there will be four meetings per year at an annual cost of \$30,000 and one man year of support.

1. <u>Call to meet</u>. The Secretary of the Interior and/or the Secretary of Agriculture, or their respective designees, will issue a formal call for each Board meeting.

2. <u>Agenda</u>. The Secretary of the Interior and/or the Secretary of Agriculture, or their respective designees will, in consultation with the chairman, formulate and approve the agenda for each meeting in advance.

3. Official participation. All meetings will be conducted in the presence of a duly authorized full-time salaried official or employee of the Department of the Interior or the Department of Agriculture, who is authorized to adjourn any meeting whenever he considers adjournment to be in the public interest.

Appendix 5a, page 55

4. Quorum. A majority of Board members holding office shall constitute a quorum which shall be required for the conduct of Board business.

5. <u>Public participation</u>. All meetings of the Board will be open to public observation. Any interested person may attend meetings, make a presentation upon request to the chairman, or file a statement with the Board. However, the authorized Department of Agriculture or Department of the Interior representative may establish reasonable limits as to the numbers of persons who may attend and the nature of their participation to the extent that available accommodations and time require limitation.

6. <u>Advance public notice</u>. To provide interested parties an opportunity to attend and participate, advance public notice of the date, place, and general subject matter of scheduled meetings will be given through publication in the <u>Federal Register</u> and appropriate local news media.

7. <u>Support services</u>. The Secretary of the Interior or his delegate shall be responsible for providing support services for the Board, including advance public notice of meetings.

D. <u>Chairmanship</u>. The Secretary of the Interior and the Secretary of Agriculture will designate one of the members as chairman and another as vice chairman for the first year. Thereafter, members will annually elect the chairman and vice chairman among their own members.

The chairman will be the liaison between the Secretary of the Interior and the Secretary of Agriculture or their duly authorized representatives in working with the Departments in formulating agendas and otherwise arranging for the orderly conduct of business. He will preside at meetings and appoint members of working groups of the Board. The vice chairman will act for the chairman in his absence. Appendix 5a, E. <u>Record or proceedings</u>. A written record shall be made of all pg. 56
proceedings of Board and working group meetings. A verbatim transcript may be made but is not required. As a minimum, each record of proceedings shall include: (a) the agenda; (b) the date(s) and place(s) of the meeting;
(c) the names and addresses of all in attendance and the capacity in which they participated, (d) a description of matters discussed and conclusions
reached; (e) the recommendations made and reasons therefor; together with concurring or minority views and, at the request of any individual member,

individual views; and, (f) copies of all reports received, issued, or approved by the Board. The Board chairman shall certify to the accuracy of the record of proceedings of each meeting. Such records, together with appendices, working papers, drafts, studies, and other documents, made available to or prepared or used by the Board, will be available for public inspection and copying in the Office of the Director of the Bureau of Land Management, Washington, D. C. Additionally, copies of the record of proceedings for each meeting shall be available for viewing at the libraries of the Department of the Interior and Department of Agriculture and the Library of Congress, Washington, D. C.

F. <u>Rules and procedures</u>. The Board is solely advisory and shall function in accordance with applicable Federal committee management requirements, and any supplementary and complementary guidelines which the Secretary of the Interior and the Secretary of Agriculture, or their respective authorized representatives, may jointly prescribe. Determinations of actions to be taken and policy to be expressed with respect to any report or recommendation of the Board shall be made only by the Secretary of the Interior, Secretary of Agriculture, or their authorized representatives. G. <u>Advice and recommendations</u>. All advice and recommendations of the Board shall be made with the approval of a majority of the members present. Advice and recommendations of individual members, including minority views, may be made by the individuals involved. Each report of advice and recommendations shall be addressed only to the Secretary of the Interior or the Secretary of Agriculture, or both, or to their respective authorized representatives, and shall address only matters covered in the record of the Board's proceedings.

H. Termination. The term of the Board is indefinite.

/s/ Harrison Loesch Asst. Secretary of the Interior

/s/ T. K. Cowden Asst. Secretary of Agriculture

January 2, 1973

4711 - MANAGEMENT COORDINATION

MEMORANDUM OF AGREEMENT - FEDERAL AGENCIES

MEMORANDUM OF AGREEMENT

BETWEEN

HILL AIR FORCE BASE, U.S. AIR FORCE

DUGWAY PROVING GROUND, U.S. ARMY

AND BUREAU OF LAND MANAGEMENT, U.S. DEPARTMENT OF THE INTERIOR RELATIVE TO

THE MANAGEMENT OF WILD, FREE-ROAMING HORSES WHICH INHABIT PUBLIC LANDS UNDER THE DEPARTMENT OF INTERIOR AND NATIONAL DEFENSE JURISDICTIONS IN WESTERN UTAH, IN ACCORDANCE WITH PUBLIC LAW 92-195

It is jointly recognized that wild, free-roaming horses inhabit public lands both within the Dugway Proving Ground and the Wendover Bombing Range and adjoining national resource lands administered by the Bureau of Land Management. The habits of these horses fluctuate, depending upon seasonal conditions, but normally they summer on national resource lands in the Cedar Mountains and Dugway Range, and winter on the Dugway Proving Ground and Wendover Bombing Range in the Wildcat Mountain, Granite Mountain, and portions of the Cedar Mountain and Dugway Range both within the Dugway Proving Ground and outside.

It is recognized that the welfare of these horses will depend upon the joint effort of the National Defense Agencies and the Bureau of Land Management for the management of their habitat and protection of the horses.

Public Law 92-195, 92nd Congress, commonly known as the Wild Horse and Burro Act, herein referred to as the Act, and the regulations of the Secretary of the Interior, pursuant thereto (43 CFR Part 4700) herein referred to as the regulations, provide for the protection of wild, free-roaming horses and burros and their management as components of the public lands administered by the Forest Service and the Bureau of Land Management. The Act provides that where wild, free-roaming horses use other than national resource lands or national forest lands, that cooperative agreements may be entered into to promote the protection and welfare of these animals.

Therefore, in the interest of carrying out the purposes of the Act, the undersigned hereby agree as follows:

1. That the wild, free-roaming horses that use lands under the jurisdiction of the Defense Department and the national resource lands under the jurisdiction of the Bureau of Land Management, will be considered to be under the jurisdiction of the Secretary of the Interior.

2. That a joint management plan will be developed to provide for the management of these wild horses and their habitat in a manner consistent with the purposes of the Act. This management plan will include the following:

BLM MANUAL

Appendix 5a, page 60

4711 - MANAGEMENT COORDINATION

A. An annual inventory of the wild horse populations in the area of joint concern.

B. A continuing review of the habits of the wild horses in terms of grazing and watering patterns, seasonal migrations, and the availability of water and forage.

C. A determination of the necessary use-facilitation projects -- water, fencing, etc. -- to provide for the welfare of the animals.

3. That implementation of the management plan shall be the responsibility of the Bureau of Land Management and will be carried out in accordance with terms and conditions specified by the Commanding Officers in the interest of program coordination and minimizing conflicts with the basic mission of the Defense installations.

4. That the following procedures will be used, and controls recognized in carrying out this joint effort:

A. The inventory of the horses and their habitat will be conducted jointly in accordance with plant or techniques jointly agreed upon and may include aerial or on-the-ground surveys and photography. In no case will Bureau of Land Management officials engage in these activities without clearance from the Commanding Officers of the Defense installations involved, and then only in accordance with restrictions and conditions imposed.

B. The Commanding Officers of the Defense installations shall assure that responsible officials under their commands shall be aware of the terms and conditions of this agreement, and, in carrying out their maneuvers and operations, shall exercise controls and assure compliance therewith.

C. If it is determined by the Commanding Officer of either of the Defense installations that the presence of wild horses interferes with military programs and operations, such problems shall promptly be referred to the District Manager, who shall be responsible for correcting the problem in accordance with access and related constraints or directives imposed by the Commanding Officer.

D. The District Manager of the Salt Lake District, Bureau of Land Management, herein referred to as the District Manager, shall represent the State Director of the Bureau of Land Management/implementation of this agreement.

BLM MANUAL

4711 - MANAGEMENT COORDINATION

5. There shall be at least semiannual joint reviews of this wild horse management program by the Commanding Officers of the Defense installations and the District Manager of the Bureau of Land Management. These normally will be conducted in December and May, but could be at other times as conditions dictate. The management plan may be updated on the basis of information gathered in these reviews.

6. No wild, free-roaming horses shall be removed from the area, or harassed, captured, branded, or killed by either military or Bureau of Land Management personnel except as provided for in the Act and the Regulations. In the event horses are accidentally injured or killed by normal military operations, such instances shall be promptly reported to the Bureau of Land Management District Manager.

7. There shall be open channels of communication between the District Manager and Commanding Officers to provide for prompt reporting of problems associated with wild horse management and to promptly and efficiently carry out the programs here jointly agreed to. Any problems that cannot be reconciled at the District Manager-Commanding Officer level shall be referred through channels to higher authority of each agency for resolution.

8. The liability of the parties under this agreement is contingent upon the necessary appropriation and reservation of funds being made therefor.

This agreement is effective immediately and shall remain so until cancelled or modified by any party hereto by written notice. Such written notice must be two months in advance of the intended cancellation or modification date.

4711 - MANAGEMENT COORDINATION SUPPLEMENTAL MEMORANDUM OF UNDERSTANDING

SUPPLEMENT NO. 1 TO MASTER MEMORANDUM OF UNDERSTANDING BETWEEN THE UTAH STATE DIVISION OF WILDLIFE RESOURCES AND THE BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

FREE-ROAMING HORSES AND BURROS

- I. Purpose: To effect management of free-roaming horses and burros on State and Federal lands in Utah.
- II. Policy: It is hereby understood that free-roaming horses and burros are, by virtue of Public Law 92-195 of December 15, 1971, under the jurisdiction of the United States. These animals shall be recognized as an element of the range ecosystem in Utah and shall be protected from capture, branding, harassement, or death, except as provided for by regulations. Personnel of both agencies will assist each other in enforcing these regulations on lands of respective jurisdiction.

Such animals shall be managed and controlled in a manner that is designed to achieve and maintain a desirable ecological community on Federal and State lands in accordance with the basic policy of the respective agencies.

III. Coordination-Cooperation:

A. The BLM shall coordinate its management of free-roaming horses and burros at the State and district levels with appropriate Division of Wildlife Resources Offices.

4711 - MANAGEMENT COORDINATION

- B. The Division of Wildlife Resources will provide aircraft, pilots and observers to assist in surveys of free-roaming horse and burro populations as mutually agreed upon. The Bureau of Land Management will reimburse the Division for aircraft operations and maintenance expenditures on an hourly rate basis. Services by Division personnel will be provided at Division expense.
- IV. Modifications: This agreement shall remain in effect unless cancelled or modified by either party by informing the other, in writing, at least two months in advance of any intended cancellation or modification date.

CHAPTER: 2200 - ZERO CODE

POSTING NOTICE: Last ED is No. 7 to FSM 2260

2204 - DELEGATION

2204.1 - Limitation on Delegation

1. Delegations Limited to the Chief

e. Establishment of Wild Free-Roaming Horse and Burro Ranges.

f. Appointment of USDA representative to the National Advisory Board on Wild Free-Roaming Horses and Burros.

2. Delegations Limited to Regional Foresters

1. Approving management plans involving wild free-roaming horses and burros. This may be delegated to Forest Supervisors under such review procedures as he deems necessary to insure adequate control.

3. Delegations Limited to Forest Supervisors

t. Processing of private ownership claims for unbranded horses and burros on National Forest System lands as per FSM 2266.

u. Disposal of wild free-roaming horses and burros as an act of mercy. This may be delegated to District Rangers.

v. Delegate individuals outside of the Forest Service as "Agents of the Secretary" in carrying out specified actions in the management of wild free-roaming horses and burros.

All Forest employees are designated as Agents of the Secretary in enforcing sections (p) and (q) of Secretary's Regulation 36 CFR 231.11. Such delegation does not limit Forest officers in their actions relative to protecting wild horses and burros when other broader law enforcement authorities exist.

Any action contemplated against an individual(s) will follow procedures established in FSM 5310 including a review by the Office of the General Counsel.

2260 - WILD FREE-ROAMING HORSES AND BURROS

<u>2260.1</u> - <u>Authority</u>. Public Law 92-195 (85 Stat. 649, 16 U.S.C. 1331-1340) establishes wild horses and burros as a part of the "Natural System" of National Forest System lands and requires their protection, management, and control. Other laws applicable to National Forest System lands also commonly apply in the administration of these animals. One that plays an important assisting role is the Multiple Use-Sustained Yield Act of 1960 (74 Stat. 215, 16 U.S.C. 528-531).

Secretary's Regulations have been developed to guide in the protection, management and control of such horses and burros. The Regulations are nearing final publication and will be available shortly (36 CFR, Part 231). In the interim, the Regulations as proposed in the final environmental statement, July 6, 1973, on wild free-roaming horses and burros will serve as a suitable reference.

<u>2260.2</u> - <u>Objective</u>. The objective in administering wild freeroaming horses and burros and their progeny on the National Forest System lands is to maintain a thriving ecological balance in those areas where they now occur, considering them an integral component of the multiple use resources and regulating their population and accompanying need for forage and habitat in correlation with that of uses recognized under the Multiple Use-Sustained Yield Act.

In considering population levels, it will be necessary to remember that to fully comply with the objectives of Congress the animals are a part of the "Natural System" of many National Forest System lands. As such the option will seldom exist as to deciding whether or not they are a suitable component of an area (1971 Horse and Burro Territory). As with wildlife, they must be considered as properly belonging in the area at some planned management level.

> ED No. 9 8/6/73

Appendix 5b, page 6

2260.3

2260.3 - Policy.

1. Wild free-roaming horses will be managed in a manner that will confine them to their 1971 Horse and Burro Territory as an integral component of the multiple use resources, and regulate their population and accompanying need for forage and habitat in correlation with that of uses recognized under the Multiple Use-Sustained Yield Act.

2. Relocation of wild free-roaming horses or burros will be made only to areas identified as 1971 Horse or Burro Territory, where suitable habitat capacity is available.

3. The Forest Service will provide for the protection, management, and control of wild free-roaming horses and burros on National Forest System lands rather than the granting of leases and permits to private parties for such purposes.

4. Wild Horse and Burro Ranges will be established only in those unique and singularly important situation where it is especially fitting to meet the purposes of the Act.

2260.4 - <u>Responsibility "Agents of Secretary</u>." The Chief, Forest Service, is responsible for the administration of the Wild Free-Roaming Horse and Burro Law, P.L. 92-195, and Secretary's Regulation, 36 CFR 231.11, as an agent of the Secretary of Agriculture.

Any employee of the Forest Service, or other individual who either individually or by virtue of the position he holds is delegated authority by the Chief, Forest Service, to take actions under the Wild Free-Roaming Horse and Burro regulations will be considered an "Agent of the Secretary." This does not preclude that each and every Forest Officer has the responsibility of providing protection to wild horses and burros as provided by the law and regulation.

<u>2260.5</u> - <u>Definition of Wild Free-Roaming Horses and Burros</u>. "Wild Free-Roaming Horses and Burros" shall mean all unbranded and unclaimed horses and burros and their progeny that have used lands of the National Forest System on or after December 15, 1971, or do hereafter use these lands as all or part of their habitat. Unbranded, claimed horses and burros where the claim is found to be erroneous are also considered as wild and free-roaming if they meet the criteria above. However, this definition shall not include any horse or burro introduced onto National Forest System lands on or after December 15, 1971, by accident, negligence, or willful disregard of private ownership.

Animals meeting the above criteria are automatically considered "Wild and Free-Roaming." It is not ordinarily necessary to entertain a process of proving them wild. The law provides the option to individuals to claim and prove ownership to animals under State estray laws. As suggested above, however, the process requires initial action on the part of the claimant, not the Government (see FSM 2266 - Ownership Claims).

<u>2261</u> - <u>COOPERATION</u>. In providing for the protection, management, and control of wild free-roaming horses and burros, cooperation shall be maintained with other Federal Agencies, State Agencies, local governments and private individuals and organizations which may be affected or interested.

2261.1 - Bureau of Land Management. The Bureau of Land Management and the Forest Service are charged to jointly protect, manage and control wild horses and burros on their respective lands in a similar fashion. It is therefore necessary that all activities related to wild horses and burros be coordinated to reflect similar management objectives. Upon occasion it may be desirable to enter into State level agreements to insure coordinated approaches to the management, control, and protection of horses and burros.

Where wild free-roaming horses and burros use lands administered by the Bureau of Land Management as a part of their habitat, all management activities related to the protection, management, and control of these animals will be coordinated with the Bureau of Land Management to the fullest extent possible. Coordination should take the form of a joint effort in inventory, planning, and management.

<u>2261.2</u> - <u>Other Government Agencies</u>. In providing the protection, management and control of wild horses and burros, planned actions shall be coordinated with other Federal land management agencies which may be affected by the provisions of the Act and/or regulation.

The advice and suggestions of agencies with qualified scientists or other expertise should be sought when appropriate.

<u>2261.3</u> - <u>State and Local Governments</u>. Applicable State Agencies will be consulted on those matters that are of interest to them.

<u>2261.31</u> - <u>State Agencies</u> - <u>Claiming Procedures</u>. Regional Foresters will attempt to develop a cooperative agreement with the State Agency responsible for the branding and estray laws. Such agreement will spell out the acceptable proof of ownership. It is desirable to include the Bureau of Land Management in this agreement. Close cooperation with the Bureau of Land Management is essential even though they may not be a party to the agreement. It is essential that procedures relating to ownership criteria and claiming be identical between the Bureau of Land Management and Forest Service in a given State.

If an agreement cannot be made with the State Agency responsible for the branding and estray laws, ownership claims will be approved

> ED. No. 9 8/6/73

2261.32

or rejected by the Forest Service in accordance with State law.

<u>2261.32</u> - <u>State Agencies</u>, <u>Wildlife</u>. Consultation will be made with the appropriate State wildlife agency in the protection, management, and control of wild free-roaming horses and burros. Such consultation should include, but not be limited to:

1. Areas identified as 1971 Horse and Burro Territory.

2. Wild free-roaming horse and burro management plans.

3. Expected impact of wild free-roaming horses and burros on other uses, especially wildlife, and the coordination measures expected to be taken to mitigate impacts.

4. Possible predator control measures.

5. Establishment of Wild Horse and Burro Ranges.

<u>2261.4</u> - <u>Private Individuals and Organizations</u>. Full public knowledge and participation is desirable in the management of wild horses and burros. This can often be accomplished by public meetings, advisory board meetings, and similar events where the agenda might provide for consideration of wild horse and burro matters.

<u>2261.5</u> - <u>Cooperative Agreements</u>. Cooperative agreements may be entered into with other Federal Agencies, State Agencies, local governments and private individuals and organizations for the purpose of carrying out the responsibilities of protection, management, and control of wild free-roaming horses and burros.

2262 - NATIONAL ADVISORY BOARD

<u>2262.01</u> - <u>Authority</u>. Public Law 92-195 (16 U.S.C. 1331-1340) to require the protection, management, and control of wild freeroaming horses and burros on public lands, and Public Law 92-463, Federal Advisory Committee Act.

2262.02 - Charter:

CHARTER NATIONAL ADVISORY BOARD FOR WILD FREE-ROAMING HORSES AND BURROS

1. <u>Purpose</u>: Compliance with Section 9(c) of the Federal Advisory Committee Act (86 Stat. 770).

2. <u>Official Committee Designation</u>: The National Advisory Board for Wild Free-Roaming Horses and Burros.

3. <u>Committee Objectives and Scope of Authority</u>: As provided by the Act of December 15, 1971 (85 Stat. 649), advise the Secretaries of Agriculture and the Interior on any matter relating to wild free-roaming horses and burros on national forest lands and on public lands administered by the Bureau of Land Management.

4. <u>Period of Time Necessary for Committee's Activities</u>: Since the Board has been established by statute and its responsibilities are related to continuing Forest Service and Bureau of Land Management responsibilities for the use and management of national forests and the National Resource Lands, the Board's activities are indefinite in duration.

5. <u>Agency Official to whom the Board Reports</u>: Director, Bureau of Land Management, Interior Building, Washington, D.C. 20240, or Chief, Forest Service, Independence and 14th Street, SW, Washington, D.C. 20250.

6. <u>Agency Responsibility for Administrative Support</u>: Bureau of Land Management, U.S. Department of the Interior.

7. <u>Committee Duties</u>: Gather and analyze information, make studies, hold meetings, and develop recommendations for the Secretaries of Agriculture and the Interior.

8. <u>Estimated Annual Operating Costs</u>: \$30,000; 12 man months of Federal manpower.

9. <u>Estimated Number and Frequency of Meetings</u>: Four regular meetings annually.

10. <u>Committee Termination Date</u>: December 31, 1974, unless otherwise provided for by law in accordance with Section 14 of the Federal Advisory Committee Act.

C. Wayne Cook Chairman, National Advisory Board on Wild Free-Roaming Horses and Burros

Date

Appendix 5b, page 10

2262.03-1

2262.03 - Administrative Procedures:

DEPARTMENT OF THE INTERIOR Office of the Secretary

DEPARTMENT OF AGRICULTURE Office of the Secretary

National Advisory Board on Wild Free-Roaming Horses and Burros

Administrative Procedures

On page 11276 of the <u>Federal Register</u> of June 6, 1972, there was published a notice and text of proposed administrative procedures (charter) for the National Advisory Board on Wild Free-Roaming Horses and Burros.

Interested persons were given 45 days within which to submit written comments, suggestions or objections. Upon consideration of these comments and suggestions, certain changes have been incorporated. Additionally, language has been added to reflect the requirements of newly enacted Public Law 92-463, the Federal Advisory Committee Act.

The changes required by Public Law 92-463 are as follows:

1. The wording of IIIA5, <u>Compensation</u>, has been amended to clarify the provisions for payment of travel expenses.

2. A sentence has been added to IIIC, <u>Meetings</u>, to give the estimated number of meetings per year, annual operating costs, and man years required.

3. A new clause reading: ". . . who is authorized to adjourn any meeting whenever he considers adjournment to be in the public interest." has been added to IIIC3, Official participation.

4. Part IIIC4, <u>Executive</u> <u>session</u>, has been eliminated, and Part IIIC5 renumbered IIIC4.

5. Part IIIE, <u>Public participation</u>, has been renumbered IIIC5, reworded to insure that all meetings will be open to the public, and to provide for the making of presentations and the filing of statements.

6. The portion of IIIE, <u>Public participation</u>, concerning advance public notice of meetings has been separated and expanded under part IIIC6, <u>Advance public notice</u>. 7. A part IIIC7, <u>Support services</u>, has been added to spell out responsibility for such services.

8. Part IIIF, <u>Record of proceedings</u>, has been renumbered IIIE, and the word "official" dropped from subpart (c). Subpart (d) has been changed to read, "a description of matters discussed and conclusions reached;". Subpart (f) has been amended to provide for certification of the accuracy of records by the Board chairman. Additionally, a sentence has been added to indicate where copies of Board records may be inspected and copied.

9. Part IIIG, <u>Rules and procedures</u>, has been renumbered IIIF, and the words ". . . is solely advisory and . . . " added between "Board" and "shall" of the first sentence. A sentence has been added to prescribe responsibility for actions to be taken with respect to any report or recommendation of the Board.

10. A part IIIH, Termination, has been added.

The following changes were made in response to comments:

1. The second sentence of II <u>Authority</u> has been eliminated. Although the sentence was an accurate statement of the law, its repetition in the charter could be interpreted as a limitation on the broad scope of the Board's advisory functions.

2. IIID <u>Chairmanship</u> has been revised to make clear that the chairman and vice chairman would be selected from among the membership of the Board. The word "principal" has been deleted from the first sentence of the second paragraph.

3. IIIE <u>Public participation</u> has been revised to show that their duly authorized representatives, as well as the two Secretaries, can call emergency meetings.

4. IIIH <u>Advice and recommendations</u>, renumbered IIIG, has been amended by changing "dissents from majority views" to "minority views" in the second sentence.

It was concluded that no further change was necessary to reflect the fact that State university staff members are qualified to serve on the Board, and that the Secretaries will seek a proper balance of interests on the Board. The suggestion that "land use" be added to the list of qualified disciplines was not adopted because the law itself specifies the qualifications. Similarly, there were recommendations to appoint officials of State government. The Act specifically prohibits such appointments.

The procedures are hereby adopted as revised and as set forth below. They shall become effective January 1, 1973.

I. <u>Purpose</u>. This document provides for the operation and describes the purpose, composition, and functions of the National Advisory Board on Wild Free-Roaming Horses and Burros.

II. <u>Authority</u>. The Act of December 15, 1971 (16 U.S.C. 1131-1340) requires the protection and management of wild free-roaming horses and burros on the public lands. Section 7 authorizes and directs the Secretary of the Interior and the Secretary of Agriculture to appoint a joint advisory board to advise them on any matter relating to the protection and management of wild free-roaming horses and burros, and specifies the qualifications required for membership on the advisory board.

III. <u>National Advisory Board on Wild Free-Roaming Horses and</u> <u>Burros</u>.

A. <u>Membership</u>. The Board shall consist of nine members, none of whom shall be an employee of the Federal Government or State governments.

1. <u>Qualifications</u>. Each member must have specialized knowledge in one or more of the following fields: The protection of horses and burros, the management of wildlife, animal husbandry, and natural resource management. At least one of each of the above disciplines shall be represented on the Board at all times.

2. <u>Selection</u>. All members shall be selected on the basis of experience and established competence in their respective fields of specialized knowledge.

3. <u>Appointments</u>. All members will be jointly appointed by the Secretary of the Interior and the Secretary of Agriculture.

4. <u>Term</u>. The term of appointment will be 1 year. If a member does not serve his full term, the Secretary of the Interior and the Secretary of Agriculture may appoint a successor for the remainder of the unexpired term. Members may be reappointed for additional 1-year terms not to exceed 10 years of total service.

5. <u>Compensation</u>. Members shall serve without compensation, except for reimbursement of travel expenses, including per diem, in connection with their duties as members.

B. <u>Functions</u>. The Board shall advise, consult with, and make recommendations to the Secretary of the Interior and the Secretary of Agriculture, or their duly authorized representatives, on any matter relating to wild free-roaming horses and burros.

C. <u>Meeting</u>. The Board shall meet at times and places to be determined by the Secretary of the Interior or the Secretary of Agriculture, or both, or their duly authorized representatives. It is estimated that there will be four meetings per year at an annual cost of \$30,000 and one man year of support.

1. <u>Call to meet</u>. The Secretary of the Interior and/or the Secretary of Agriculture, or their respective designees, will issue a formal call for each Board meeting.

2. <u>Agenda</u>. The Secretary of the Interior and/or the Secretary of Agriculture, or their respective designees will, in consultation with the chairman, formulate and approve the agenda for each meeting in advance.

3. Official participation. All meetings will be conducted in the presence of a duly authorized full-time salaried official or employee of the Department of the Interior or the Department of Agriculture, who is authorized to adjourn any meeting whenever he considers adjournment to be in the public interest.

4. <u>Quorum</u>. A majority of Board members holding office shall constitute a quorum which shall be required for the conduct of Board business.

5. <u>Public participation</u>. All meetings of the Board will be open to public observation. Any interested person may attend meetings, make a presentation upon request to the chairman, or file a statement with the Board. However, the authorized Department of Agriculture or Department of the Interior representative may establish reasonable limits as to the numbers of persons who may attend and the nature of their participation to the extent that available accommodations and time require limitation.

6. <u>Advance public notice</u>. To provide interested parties an opportunity to attend and participate, advance public notice of the date, place, and general subject matter of scheduled meetings will be given through publication in the <u>Federal Register</u> and appropriate local news media.

7. <u>Support services</u>. The Secretary of the Interior or his delegate shall be responsible for providing support services for the Board, including advance public notice of meetings.

D. <u>Chairmanship</u>. The Secretary of the Interior and the Secretary of Agriculture will designate one of the members as chairman and another as vice chairman for the first year. Thereafter, members will annually elect the chairman and vice chairman among their own members.

The chairman will be the liaison between the Secretary of the Interior and the Secretary of Agriculture or their duly authorized

Appendix 5b, page 14

2262.03-5

representatives in working with the Departments in formulating agendas and otherwise arranging for the orderly conduct of business. He will preside at meetings and appoint members of working groups of the Board. The vice chairman will act for the chairman in his absence.

Record or proceedings. A written record shall be made Ε. of all proceedings of Board and working group meetings. A verbatim transcript may be made but is not required. As a minimum, each record of proceedings shall include: (a) the agenda; (b) the date(s) and place(s) of the meeting; (c) the names and addresses of all in attendance and the capacity in which they participated, (d) a description of matters discussed and conclusions reached; (e) the recommendations made and reasons therefor; together with concurring or minority views and, at the request of any individual member, individual views; and, (f) copies of all reports received, issued, or approved by the Board. The Board chairman shall certify to the accuracy of the record of proceedings of each meeting. Such records, together with appendices, working papers, drafts, studies, and other documents, made available to or prepared or used by the Board, will be available for public inspection and copying in the Office of the Director of the Bureau of Land Management, Washington, D. C. Additionally, copies of the record of proceedings for each meeting shall be available for viewing at the libraries of the Department of the Interior and Department of Agriculture and the Library of Congress, Washington, D. C.

F. <u>Rules and procedures</u>. The Board is solely advisory and shall function in accordance with applicable Federal committee management requirements, and any supplementary and complementary guidelines which the Secretary of the Interior and the Secretary of Agriculture, or their respective authorized representatives, may jointly prescribe. Determinations of actions to be taken and policy to be expressed with respect to any report or recommendation of the Board shall be made only by the Secretary of the Interior, Secretary of Agriculture, or their authorized representatives.

G. <u>Advice and recommendations</u>. All advice and recommendations of the Board shall be made with the approval of a majority of the members present. Advice and recommendations of individual members, including minority views, may be made by the individuals involved. Each report of advice and recommendations shall be addressed only to the Secretary of the Interior or the Secretary of Agriculture, or both, or to their respective authorized representatives, and shall address only matters covered in the record of the Board's proceedings.

H. Termination. The term of the Board is indefinite.

(Sgd.) Harrison Loesch	T. K. Cowden
Assistant Secretary	Assistant Secretary
Secretary of the Interior	Secretary of Agriculture

2262.04 - Memorandum between USDA and USDI:

MEMORANDUM OF UNDERSTANDING BETWEEN THE DEPARTMENT OF AGRICULTURE AND THE DEPARTMENT OF THE INTERIOR WITH RESPECT TO THE NATIONAL ADVISORY BOARD ON WILD FREE-ROAMING HORSES AND BURROS

P.L. 92-195 (85 Stat. 649; 16 U.S.C. 1301) requires formation of a joint National Advisory Board to advise the Secretaries of Agriculture and Interior on matters relating to wild free-roaming horses and burros. In connection with the National Advisory Board on Wild Free-Roaming Horses and Burros, we agree to the following cooperative procedures:

I. In dealing with the Board, both Departments will endeavor to impress upon the Board members and the public at large that it is a joint Board assisting both Departments.

II. The Board will be utilized jointly by both Departments to the maximum extent possible. There may be instances when a meeting may be called to assist one Department only. The Department initiating the call for a meeting will provide advance notice and invitation to the other Department for attendance and participation.

III. Both Departments will designate an official representative to the Board who will attend all meetings of the Board.

1. The official representative may redelegate his role to other responsible officers in the agency concerned.

2. The Department initiating the call for a meeting will designate the presiding Governmen official to be the Co-chairman for that meeting, but he may relinquish this by mutual agreement of both Departments.

IV. In compliance with Executive Order 11007 and to avoid confusion in reporting, record keeping, and financing:

A. The Secretary of the Interior, or his duly appointed representative, will assume the duty of providing primary support services for the Board and for preparing reports required by statute, Executive Order, OMB Circulars, and other directives. Such responsibility includes:

1. Processing and payment of all authorized expenses by the Board;

2. Maintaining the official file of Board activities;

3. Furnishing clerical and secretarial help and materials;

4. Furnishing all support services for joint-Department of the Interior-Department of Agriculture meetings of the Board;

5. Furnishing the Department of Agriculture with a timely, complete, and accurate copy of all material being entered into the official file of Board activities, including records of Board meetings, and copies of reports prepared in accordance with statute, Executive Order, OMB Circulars, and other directives, and

6. Processing formal calls for all meetings of the Board.

B. The Department of Agriculture will:

1. Provide a timely notice to the Department of the Interior for all meetings of the Board which it desires called;

2. Provide local support services for Board meetings called for the sole purpose of advising the Department of Agriculture;

3. Reimburse the Department of the Interior for expenses incurred for meetings called solely for the conduct of Department of Agriculture business and for its share of the costs of joint meetings; and

4. Furnish the Department of the Interior with a complete and accurate record of meetings supervised by the Department of Agriculture.

V. This memorandum of understanding will become effective upon signature.

Signed

(sgd) Rogers C. B. Morton

Earl L. Butz Secretary of Agriculture Rogers C. B. Morton Secretary of the Interior

May 25, 1972

May 23, 1972

2262.05 - Designation of Secretary's Representative

The Secretary of Agriculture has delegated to the Chief of the Forest Service, pending regulation, the authority for appointing the Department's official representative to the National Advisory Board on Wild Free-Roaming Horses and Burros.

2262.1 - Consultation with National Advisory Board on Wild Free-Roaming Horses and Burros. A National Advisory Board on Wild Horses and Burros is required by the law. The members are appointed jointly by the Secretaries of the Interior and Agriculture. The Board is established for the purpose of providing program direction at the national level in an advisory capacity. Their role has been and will continue to be vital in the early stages of implementing the regulation and development of management direction.

Coordination with the Advisory Board will be maintained by the Chief in a way that will develop overall direction in the protection, management, and control of wild horses and burros. As a general rule, the Board will not be burdened by asking them to review specific management actions. However, every effort will be made to keep them fully informed of progress and developments across the National Forest System lands.

2263 - INVENTORY AND STUDIES

<u>2263.1</u> - <u>Census</u>. Sufficient data must be collected on wild freeroaming horses and burros so that meaningful management plans, required control of wild horses and burros, and adequate coordination with other uses and activities can be achieved. The disruption of wild horse and burro habits can result when adequate information is not available. High quality data and records are important to insure that land management decisions do not have an adverse effect on wild horses and burros.

The census of wild free-roaming horses and burros will collect information on numbers, herd composition, reproduction levels, feeding habits by time of year and weather conditions, herd unit, seasonal distribution on movement, external influences, and the effect of other animal species on horse and burro behavior.

Each Regional Forester will develop detailed guidelines for the collection of census data.

<u>2263.11</u> - <u>Inventory Area</u>. Inventories will be conducted on each of the 1971 Horse and Burro Territories.

<u>2263.12</u> - <u>Methods</u>. Various techniques and combination of techniques can be used in the collection of census data. Each individual situation will establish the best techniques to be used in the collection of data. The most common techniques are:

> ED. No. 9 8/6/73

1. <u>Helicopter</u>. Helicopters give the advantage of intensive inventory of a large area in relatively short periods of time. Not all data required can be obtained by helicopter observation alone. When using aircraft, care should be exercised to avoid undue stress and disturbance to animals being observed.

2. <u>Surveillance of Water Sources</u>. A continuing surveillance of all water sources in the inventory area in a systematic approach for a 3 or 4 day period. Accurate data may be difficult to obtain in areas with numerous or closely located waters which may have an overlap in use by various herds. These areas may require that several water sources be watched at the same time. This system yields good data on herd composition, reproduction levels, animal health, and identification of individual animals. However, important habitat relationship data cannot be obtained by this type of surveillance.

3. <u>Systematic Grids</u>. Travel throughout the inventory area in a systematic manner and document wild horse or burro herds as they are encountered. The advantage of this method is that animals are recorded in the location they are presently inhabiting. Data collected from these locations will prove valuable in determining herd unit boundaries. A disadvantage is that many of the animals inhabiting the inventory area may be missed.

4. <u>Photographs</u>. Photographs will serve as an important identification tool of wild horses and burros. Photographs should be taken of each band at the time of observation.

<u>2263.13</u> - <u>Individual Animal Data</u>. The need to identify individual animals is important for planning the removal of excess animals, removal of animals from private land or other Government land when requested, and for the processing of claims by private individuals. Age class, sex, reproduction activities and color markings of individual wild horses and burros should be obtained as accurately as possible.

Appendix 5b, page 19

2264.1

<u>2263.2</u> - <u>Habitat</u>. Wild free-roaming horse and burro habitat information will be obtained from existing range environmental analysis and wildlife habitat inventories. Where these do not exist, procedures defined in FSM 2210 and FSM 2610 will be used to gather the needed habitat information.

The information found in other resource inventories should be utilized in fully evaluating wild free-roaming horse and burro habitat.

2263.3 - Wild Horse and Burro Ecology (reserve)

2264 - "1971 HORSE AND BURRO TERRITORY"

Means the National Forest System area to be identified by the Chief, Forest Service, as the areas which were the territorial habitat of wild free-roaming horses and/or burros at the time of the passage of the Act.

Land use planning endeavors will recognize Wild Horse and Burro Territories as the habitat boundaries for the management of these animals.

It will be the responsibility of the Regional Forester to identify all areas meeting this definition by December 31, 1973. As a minimum, this identification will include the following information:

1. Exterior boundaries of the territorial habitat limits, regardless of the landownership. This should include the complete habitat requirements for the animals.

2. Estimated number of wild horses and/or burros occupying the territory as of December 1971.

3. Those numbers currently occupying this territory.

4. The extent that animals depend upon other lands for portions of their habitac requirements.

5. Outside influences that are or might be causing numbers to fluctuate. This might include migration from adjacent lands, unusual predator problems, general range condition, and removal by unauthorized activities.

A Regional report including maps of the areas should be furnished to the Washington Office by January 15, 1974.

<u>2264.1</u> - <u>Herd Units</u>. An area of land within 1971 Horse and Burro Territory that is defined as the territorial habitat of one or more

> ED. No. 9 8/6/73

stallions and their mares, or jacks and their jennies, which range as one band of animals. This specifically identifies the maximum geographic limits used by the herd under varying weather conditions and which is needed for reproduction and survival.

This relationship of animals and habitat is not always a clearly identifiable situation. Therefore the use of herd units cannot always be a key factor for management purposes.

<u>2264.2</u> - <u>Horse and Burro Range</u>. This is an area of land specifically designated by the Chief from 1971 Horse and Burro Territory for the purpose of sustaining an existing herd or herds of wild free-roaming horses and burros, which does not exceed their known territorial limits and which is devoted principally but not necessarily exclusively to their welfare in keeping with multiple-use management.

By policy Horse and Burro Ranges will be established only when unique and singularly important situations require such classification to insure meeting the intent of the law. Their establishment must be formally approved by the Chief.

2265 - PROTECTION, MANAGEMENT, AND CONTROL

<u>2265.1</u> - <u>Management Plans</u>. A management plan will be prepared for all Horse and Burro Territories. When appropriate, herd unit plans may also be developed. Each plan should present the needs for the specific wild free-roaming horse and burro territory. The basic components of all management plans should include applicable information as follows:

1. <u>Background information</u>. This would be such items as herd history, existing resource condition, and animal health.

2. <u>Objectives</u>. The objectives for both animals and resource management should be clearly stated. Management objectives will need to be coordinated with other uses and activities on the area. Where necessary, because of complexity, interim management objectives may be established. In establishing objectives, the retention of the wild free-roaming nature of the animals in harmony with a thriving ecological balance is essential. Normally management will not be intensive, but will be coordinated with existing livestock and wildlife management plans. Modification of intensive domestic livestock management plans may be necessary to insure the welfare of wild horses and burros.

It is the intent of the wild horse and burro law to not restrict these animals to any one particular strain. Because of this, biological management of animals will not ordinarily be to improve strains or conformation. Rather management should be to maintain

a biologically sound level. This does not preclude management objectives aimed at favoring a particular genetic strain of animal when there appears to be a special value to be realized.

3. <u>Management (resource)</u>. Description of the management techniques proposed to achieve the desired intensity of management of management.

4. <u>Management (animals)</u>. Include such direction as level of population protection requirements, means of disposal, and means of capture. Planned populations levels will be arrived at by considering number presently on territory, suitability of range to feed horses, condition of range, range trend, and coordinated use by horses with other multiple uses. These criteria are not to be used to establish minimum or maximum numbers, but are to be used as an aid in determining a sound biological population. These criteria are the recommendation of the National Advisory Board somewhat modified by the Forest Service.

5. <u>Improvements</u>. Those improvements, structural and nonstructural, needed to assure the desired level of management. Improvements may be constructed from appropriated funds or cooperative deposits.

6. <u>Cooperative arrangements</u>. Spell out the applicable cooperative arrangement that will be needed to achieve the management objectives as defined. Where appropriate cooperative agreements should be included in the appendix of the plan.

7. <u>Studies and evaluation</u>. Described followup action to be taken and any studies that might be required to fully implement management plan.

<u>2265.2</u> - <u>Protection of Wild Horses and Burros</u>. The Forest Service is responsible for the protection of individual animals and herds of wild free-roaming horses and burros even though they may move to lands of other ownership or jurisdiction as a part of their annual territorial habitat pattern or for other reasons. Surveillance and protection of wild free-roaming horses and burros will be maintained at all times through the use of cooperative agreements or other media as authorized by law. However, Forest Service personnel are not authorized to enter upon lands of other ownership in the surveillance and protection of wild horses and burros without permission or court order.

When there is cause to believe that the protective measures of the Act and regulation are being violated, appropriate administrative and/or criminal and civil judicial procedures will be implemented.

<u>2265.21</u> - <u>National Forest System Lands</u>. Where wild free-roaming horses and burros are entirely confined to National Forest System lands

for their territorial habitat, they will be administered by the Forest Service. Permits will not be issued to individuals or organizations for the management of animals on National Forest System lands. Cooperative agreements may be entered into whereby individuals or organizations may provide funds for management purposes such as water or habitat improvement.

<u>2265.22</u> - <u>Private Lands</u>. Owners of private land who wish to maintain wild horses and burros in a wild state may do so when excess animals are available for such purposes. A cooperative agreement will be entered into for their protection, management, and control. The agreement will provide for an annual report of the welfare and status of the animals. In those instances where wild horses or burros stray or migrate seasonally from National Forest System lands onto private lands and the owner makes no objection to their intermittent presence, no cooperative agreement is required.

<u>2265.23</u> - <u>Other Government Lands</u>. Although wild free-roaming horses and burros may wander from National Forest System lands to lands of other Government ownership, parks, monuments, military, etc., or conversely they remain under the protection of the Forest Service, coordinated management of the animals should be achieved through a cooperative agreement. Control programs by other Government Agencies on lands under their jurisdiction that affect wild horses and burros must be approved by the Forest Service. However, Forest Service personnel will not participate in execution of such control programs.

<u>2265.3</u> - <u>Landowners Request</u>. Upon request by a private landowner(s), wild free-roaming horses and burros that have strayed from National Forest System lands will be removed. When the fences on private lands are not in conformance with the applicable State fence laws, the landowner will be advised of his responsibilities.

In moving wild free-roaming horses and burros from private lands, the applicable State laws governing livestock movement will be adhered to.

All wild free-roaming horses and burros removed from private lands will be returned to their normal herd territories with a minimum of physical damage or undue stress.

<u>2265.4</u> - <u>Capture</u>. Wild free-roaming horses and burros may be captured as necessary to achieve their protection, management, and control. Captured animals may be corralled and held in a humane manner pending release, relocation, or disposal.

All actions affecting the capture of wild free-roaming horses and burros shall be under the direction of a Forest officer. Caution and surveillance of operation must assure a minimum of risk to the welfare of the animals. Handling (corral, water traps, etc.) shall be such as to reduce or eliminate inadvertent injury to the captured animals. Adequate food and water shall be provided to satisfy animal requirements.

<u>2265.5</u> - <u>Population Control</u>. When it is necessary to conduct an artificial control of wild horse and burro numbers, the following priorities will be observed:

1. Severely injured or sick animals which may be destroyed immediately (FSM 2265.54).

2. Old, sick, and lame animals that are excess to the biological needs of the horse or burro population.

3. Problem animals which demonstrate individual habits or traits that pose an undue threat to the safety or welfare of persons, wildlife, or livestock.

4. Animals that are determined to be in excess of population numbers required to maintain a sound biological level with a natural ecological balance that is harmonious with multiple use management of the area.

2265.51 - Policy.

1. Populations of wild free-roaming horses and burros will be maintained in those areas identified as 1971 Horse and Burro Territory.

2. Population numbers will be maintained at levels that will result in a sound biological balance that will insure their perpetuation.

3. Population numbers will be maintained at a level that is compatible with the sound multiple use management of the area.

4. Healthy wild horses and burros will be destroyed only when it is unfeasible or impracticable to capture and/or relocate them.

<u>2265.52</u> - <u>Relocation of Wild Horses and Burros</u>. Wild horses and burros may be relocated when they are found to be excess or problem animals. They may also be relocated if it is necessary to prevent their repetitive return to private land from which their removal has been requested. Relocation must be to other areas identified as 1971 Horse and Burro Territory if suitable habitat capacity is available or to the custody of private parties.

<u>2265.53</u> - <u>Private Custody Arrangements</u>. Individual animals selected for relocation may be placed with private parties or other Government

ED. No. 9 8/6/73

Appendix 5b, page 24

2265.54

Agencies. When this is done a cooperative agreement will be entered into. The cooperative agreement will not transfer title but merely place the animal(s) in custody of the private individual.

The cooperative agreement will also cover such conditions as:

1. Specification for humane treatment.

2. Prevention of commerical exploitation.

3. Prevention of disposal to a third party.

4. Requirement for an annual report on the animals' health.

5. Requirement for noncommercial disposal of the carcass in case of death.

6. May allow domestication and riding.

7. May allow gelding of stallions.

<u>2265.54</u> - <u>Disposal as an Act of Mercy</u>. Severely injured or seriously sick animals will be destroyed immediately in the most humane manner possible. This destruction must be done by an Agent of the Secretary. Acts of mercy may be taken regardless of other population considerations.

All destruction of animals as an act of mercy should be fully documented by the person destroying the animal. This documentation will fully describe the health of the animal and the conclusions reached that lead to the act of mercy. When the cause of the injury or circumstances leading to the injury are known, they should be documented.

<u>2265.55</u> - <u>Disposal of Old, Sick, and Lame Animals</u>. If excess populations exist, old, sick, and lame animals may be destroyed in the most humane manner possible. The National Advisory Board has indicated in recent meetings that they do not need to be consulted for such disposal if the action is being conducted in accord with approved management plans.

Inclusion of animals in this category will be restricted to those not biologically necessary to the herd and to those instances where relocation is not possible or practicable. Their relocation may not be possible due to age, health, or the general condition of the animal. Sound horses, even though old would not fall into this classification.

<u>2265.56</u> - <u>Disposal of Excess and Problem Animals</u>. Normally these animals will be relocated to private custody, 1971 Horse and Burro

Territory, or to other Governmental Agencies. They will be destroyed only when all means of relocation have been fully explored and found to be unreasonable or impractical.

When it is determined necessary to destroy excess and problem animals, it will be done in the most humane manner possible. Such actions should be anticipated and reviewed with the National Advisory Board prior to taking action.

<u>2265.6</u> - <u>Remains of Wild Horses and Burros</u>. Known carcasses of wild horses and burros may be disposed of in the manner set forth by State sanitary codes. In no event will they be processed into a commercial product.

Where State sanitary codes do not prescribe techniques for disposal, the following may be considered:

1. <u>Burying</u>. When carcasses are buried, such agents as quick lime should be spread over the carcass prior to covering.

2. <u>Burning</u>. Burning should be done in line with State fire laws and when not a hazard to National Forest System lands.

<u>2265.7</u> - <u>Appointment of Agents of the Secretary</u>. The appointment of individuals outside of the Forest Service as Agents of the Secretary should be restricted to the carrying out of Forest Service action programs and cooperative agreements for the maintenance of wild horses and burros. In most cases management actions on wild horse and burro areas will be accomplished by Forest Service employees.

Where landowners or individuals are experiencing problems with wild horses and burros, they should not be given authority as Agents of the Secretary.

Delegation of Agents of the Secretary will be in writing and of short duration. The delegation should spell out the specific authority being given to the Agent and the duration of the authority.

> ED. No. 9 8/6/73

2266 - CLAIMS

The following claiming procedures have been developed in conjunction and with the advice of the National Advisory Board. The Bureau of Land Management has established similar procedures to be followed. Therefore, all claiming procedures will stay within the framework outlined below.

<u>2266.1</u> - <u>Handling Ownership Claims</u>. Ownership claims for unbranded, unpermitted horses and burros occupying National Forest System lands as all or part of their habitat will be recognized within the State estray laws and the criteria cooperatively agreed to with the State Agency administering State estray laws (2261.3). Only those horses and burros which do not qualify as wild and free-roaming may be captured or removed from National Forest System lands or other lands, except by Agents of the Secretary.

The processing of ownership claims will be handled in three distinct steps:

1. Filing of claims by private parties and the evaluation of these claims for validity. Claims will be accepted for a period of 90 days after publication of the Regulation (36 CFR 231.11).

2. Issuing of permits for the capture of animals in the case of approved claims. Capture permits may extend for any reasonable period into the future but not more than 1 year.

3. Final verification or rejection of ownership claims after the animals have been captured.

A claimant must submit an affidavit claiming ownership and indicating his willingness to defent title to the claimed animals. All ownership claims will be accepted and acted upon. The claim should include such information as the following (see also sample format, end of section):

1. Numbers of animals claimed.

2. Full description of each animal, including such factors as color, markings, brand, and factors indicating tameness such as animal being gelded, broken to rope or saddle.

3. Location of animals on National Forest System lands.

4. Date and circumstances animals were released upon National Forest System lands.

5. Location of relevant private lands where animals were kept prior to release upon National Forest System lands.

6. Documentation of proof of ownership such as:

a. Bill of Sale(s) fully describing the claimed animals and meeting all State legal requirements, or b. State inspection certificate issued for some previous occasion, or

c. State brand exemption certificate (in those States that provide these) issued for some previous occasion.

d. Other indicia of ownership that may be used are:

(1) Whether the claimant has paid personal property tax upon the claimed animal(s).

(2) Whether the animal(s) is the known progeny of a mare owned by the claimant.

Claims received for horses and burros will be acknowledged in writing to the claimant. He should be informed that no grazing fee will be charged for whatever time is required by the Forest Service to determine the validity of claims, timing, and method of removing claimed animals.

Those horses and burros that are branded but unclaimed or that were unbranded but released upon National Forest System lands after December 15, 1971, will be considered as trespass or unauthorized animals. They will be removed only in a manner that will not cause harassment or injury to the wild free-roaming horses and burros where they exist.

<u>2266.2</u> - <u>Ownership Claims</u>. All ownership claims will be analysed to determine the validity in accordance with State law and cooperative agreements made with State Agencies. Where cooperative agreements do not exist the Forest Supervisor will have the full responsibility to assess the claim as to its evidence of ownership. After fully evaluating the claim the claimant will be advised of the Forest Supervisor's finding. Where there is a determination that the claim is based on sound merits of ownership the claimant will be informed that capture authorization will be granted. Where claims are rejected, the reason for rejection will be stated.

<u>2266.3</u> - <u>Capture of Claimed Animals</u>. Capture will be accomplished within the criteria established by the Forest Supervisor in a manner which will not cause harassment to wild free-roaming horses and burros or result in violation of law. All captures will be approved in writing. The actual capture efforts will be observed and overseen by a Forest officer.

<u>2266.31</u> - <u>Public Notice</u>. The pending regulation provides for a 90-day claiming period for individuals to claim unbranded horses or burros utilizing National Forest System lands. Public notices

ED. No. 9 8/6/73 Appendix 5b, page 28 2266.32

> should be made spelling out the claiming period and the procedures that are to be followed in submitting claims. When several claims are received for a given area, a public notice should be given in order that other parties will be aware of pending activity. Comments from interested parties will be accepted and utilized in determining validity of claims. In some instances it may be advisable to hold a public meeting for discussion of the subject.

<u>2266.32</u> - <u>Capture Procedures</u>. When there are two or more claims covering animals in a given area, capture actions by all claimants will ordinarily be accomplished concurrently under joint criteria. Timing of roundups can often be done so as to assist in the minimization of stress on the animals and also make the bunching and corralling of the animals easier. Use of aircraft and motorized vehicles will not be used in capturing animals.

Some means of controlling and corralling horses and burros are as follows:

1. <u>Tranquilizers</u>. Animals may be placed under control through use of tranquilizers or immobilizing drugs. This procedure may be effective in aiding in the humane removal, relocation or disposal of animals.

2. <u>Water traps (salt traps)</u>. Water and/or salt traps may be used for capture of horses and burros where this can be accomplished in a humane manner. Frequent inspection and ther measures must be taken to prevent undue stress of animals 3, ured by trapping.

<u>2266.33</u> - <u>Handling Facilities (corrals, fences, etc.)</u>. Should be located on National Forest System lands and owned by the Federal Government unless formal arrangements have been made for the use of private facilities. In some cases, it may be necessary to construct temporary facilities adequate to handle animals in a humane fashion during capture. Care must be taken to prevent injury to horses and burros during the roundup and corralling of animals. Sufficient help should be available to adequately handle the horses and burros. Should animals become seriously injured or die during corralling, extent of injury or exact cause of death must be thoroughly documented.

<u>2266.34</u> - <u>Care of Horses and Burros</u>. Horses and burros will be properly fed and watered while corralled. Security should be provided to keep them safe from harm and prevent unauthorized removal while corralled.

<u>2266.35</u> - <u>Ownership Verification</u>. Once the animals are captured the ownership will be verified prior to granting permission to remove animals. Criteria established through a cooperative agreement (2261.3) will be used to verify ownership claims.

Where cooperative agreements do not exist the Forest Supervisor will make the final determination as to the validity of the claim. This determination should be done according to the complete requirements of State laws. Customary practices of ownership in the area which do not clearly conform to the State law will not be acceptable in this evaluation. Although there is no agreement, State brand inspectors can be of assistance in making this evaluation. Permission will then be granted to transport the animals. All transportation must conform to the respective State laws.

Where claims for unbranded animals are not valid, the animals will be considered as wild free-roaming horses and burros and released with a minimum of delay. Where claims for branded inimals are not valid, the animals will be handled as trespass of unauthorized per FSM 5333.

> ED. No. 9 8/6/73

Appendix 5b, page 30

2266.35-2

(Sample Claiming Form)

AFFIDAVIT AND CLAIM OF OWNERSHIP OF HORSES OR BURROS

I hereby claim ownership to the following described animals using National Forest System lands as part of their habitat.

1. Animals are _____ Horses _____ Burros

2. Number of animals claimed

3. Full description of each animal (include color, markings brand, and factors indicating tameness such as animal being gelded, broken to rope or saddle)

4. Location of animals

a) Geographic description of lands: _____

b) Legal description of lands:

5. Date and circumstances animals were released:

6. Location of relevant private or leased lands where animals were kept prior to release:

I hereby certify that the above described animals are owned by me and I will defend my title to them. I will gather and remove them only upon receiving written authorization from the Forest Service.

Title 43—Public Lands: Interior CHAPTER II-BUREAU OF LAND MANAGE MENT, DEPARTMENT OF THE INTERIOR

SUBCHAPTER D-RANGE MANAGEMENT (4000) [Circular No. 2347]

WILD FREE-ROAMING HORSE AND BURRO MANAGEMENT

Protection, Management, Control and **Reservation of Forage**

Subchapter D, Chapter II, of Title 43 of the Code of Federal Regulations is amended as follows:

RT 4110--GRAZING ADMINISTRATION (INSIDE GRAZING DISTRICTS) (THE FEDERAL RANGE CODE FOR GRAZING DISTRICTS)

1. The first sentence of paragraph (d) of § 4115.2-1 of Subpart 4115 is revised to read as follows:

§ 4115.2-1 License and permit procedures; requirements and conditions. *

.....

(d) Cancellation or reduction of licenses or permits; show cause; appeal to examiner. Licenses or permits are subject to cancellation or reduction to the extent that they have been improperly issued, or to the extent that their continued effectiveness is adversely affected pursuant to any of the provisions of \$ 4111.1, 4115.2-1(e), 4115.1-1(k) (4), 4114.4-4, 4115.2-5(a) (6), 4712.1-3, or 4712.1-4 of this chapter.

PART 4120-GRAZING ADMINISTRATION (OUTSIDE GRAZING DISTRICTS AND EXCLUSIVE OF ALASKA); GENERAL

2. Paragraph (a) of § 4121.2-1 of Subpart 4121 is revised to read as follows:

§ 4121.2-1 Minimum requirements, rating and classification of lease land.

(a) Land Resource Consideration. The authorized officer will determine the availability of public land for grazing leases and the amount of forage available for use by livestock in conjunction with considerations of forage reservations for watershed protection, wildlife, wild free-roaming horses and burros, and other multiple uses.

3. A new Group 4700 is added to Subchapter D to read as follows:

Group 4700-Wild Free-Roaming Horse and Burro Management

RT 4710---WILD FREE-ROAMING HORSE AND BURRO MANAGEMENT; PART GENERAL

Subpart 4710—Purpose; Objectives; Authority; Definitions; Policy Sec

- 4710.0-1 Purpose.
- 4710.0-2 Objectives.

Subpart 4714-Enforcement Provisions

- 4714 1 Arrest 4714.2 Penalties.

Subpart 4710-Purpose; Objectives; Authority; Definitions; Policy

§ 4710.0-1 Purpose.

To implement the laws relating to wild free-roaming horses and burros on public lands.

Published in 38 F.R. 22002, August 15, 1973 - Effective August 15, 1973.

§ 4710.0-2 Objectives.

The objective of these regulations is to provide criteria and procedures for protecting, managing, and controlling wild free-roaming horses and burros as a recognized component of the public land environment.

§ 4710.0-3 Authority.

The Act of December 15, 1971 (16 U.S.C. 1331-1340), and the Act of June 28, 1934 (43 U.S.C. 315-315r).

§ 4710.0-5 Definitions

(a) "Authorized Officer" means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described herein. (b) "Wild free-roaming horses and

burros" means all unbranded and unclaimed horses and burros and their progeny that have used public lands on or after December 15, 1971, or that do use these lands as all or part of their habitat, including those animals given an identifying mark upon capture for live disposal by the authorized officer. Unbranded, claimed horses and burros where the claim is found to be erroneous are also considered as wild and freeroaming if they meet the criteria above. However, this definition shall not include any horse or burro which entered or was introduced onto public lands after December 15, 1971, by accident, negligence, or willful disregard of ownership.

(c) "Herd" means one or more stallions and their mares or jacks and their jennies.

(d) "Excess animals" means wild freeroaming horses or burros determined to be in excess of populations proper to maintain a thriving natural ecological balance and harmonious multiple-use relationship in an area of the public lands.

(e) "Problem animal" means a wild free-roaming horse or burro whose demonstrated individual habits or traits pose an undue threat to the safety or welfare of persons, wildlife, livestock, or property; or a wild free-roaming horse or burro infected by a contagious disease or suspected of being diseased or seriously ill.

(f) "Public lands" means any lands administered by the Secretary of the Interior through the Bureau of Land Management.

(g) "Wild horse or burro range" means a specifically designated area of land needed to sustain a herd or herds of wild free-roaming horses or burros, and which is devoted principally but not necessarily exclusively to their welfare in keeping with the multiple use management of the public lands.

(h) "Management plan" means a written program of action designed to protect, manage, and control wild freeroaming horses and burros and maintain a natural ecological balance on the public lands. (i) "Act" means the Act of December

15, 1971 (16 U.S.C. 1331-1340).

(j) "Advisory Board" means the joint advisory board established by the Secretary of the Interior and the Secretary of Agriculture pursuant to section 7 of the Act.

§ 4710.0-6 Policy.

(a) Wild free-roaming horses and burros are under the jurisdiction of the Secretary of the Interior and will be managed as an integral part of the natural systems of the public lands. They will be protected from unauthorized capture, branding, undue disturbance, and destruction. They and their habitat will be managed and controlled in a manner designed to achieve and maintain a thriving ecological balance on the public lands and a thriving population of sound, healthy individuals, all in accordance with the basic program policies for public land management set forth in Subpart 1725 of this chapter.

(b) Wild free-roaming horses and burros on the public lands will be managed by the authorized officer, with full public participation and such cooperative arangements as he may find helpful. Management on public lands will not be assigned to any private individual or association through a grazing license. lease, or permit.

Subpart 4711-Management Coordination

§ 4711.1 Recommendations from the joint national advisory board on wild free-roaming horses and burros.

Policies and guidelines relative to proposals for establishment of ranges, proposed management plans, adjustments in number, relocation and disposal of animals, and other matters relating generally to the protection, management. and control of wild free-roaming horses and burros shall be presented to the Advisory Board for recommendations.

§ 4711.2 State agencies.

(a) All management activities including, but not limited to, establishment of ranges and adjustments in forage allocation shall be planned and executed in consultation with the appropriate State agency to further consider the needs of all wildlife, particularly endangered species.

(b) All actions taken in connection with private ownership claims to unbranded horses and burros shall be coordinated to the fullest extent possible with the appropriate State agency.

§ 4711.3 Cooperative agreements.

The authorized officer may enter into cooperative agreements with other landowners, private citizens, nonprofit organizations, and with Federal, State, and local governmental agencies as he deems necessary for purposes of protecting, managing and controlling wild freeroaming horses and burros. Where the grazing patterns of the animals require utilization of lands in other ownerships or administration, the authorized officer shall seek cooperative agreements to insure continuance of such use.

Subpart 4712—Management Considerations

§ 4712.1 Management; general.

§ 4712.1–1 Planning.

In planning for management, protection, and control of wild free-roaming horses and burros, including the establishment of specifically designated ranges, determination of desirable numbers and other management provisions of these regulations, the authorized officer will utilize the Bureau's multipleuse planning system with its requirements for public participation by and coordination with others.

§ 4712.1-2 Intensity of management.

Wild free-roaming horse or burro herds may be managed either as one of the components of public land use or on a specifically designated wild horse or burro range. Management practices shall be at the minimal feasible level and shall be consistent to the extent possible and practical with the maintenance of their free-roaming behavior. Management facilities should be designed and constructed to the extent possible to maintain the free-roaming behavior of the herds.

§ 4712.1-3 Habitat reservation and allocation.

The biological requirements of wild free-roaming horses and burros will be determined based upon appropriate studies or other available information. The needs for soil and watershed protection, domestic livestock, maintenance of environmental quality, wildlife, and other factors will be considered along with wild free-roaming horse and burro requirements. After determining the optimum number of such horses and burros to be maintained on an area, the authorized officer shall reserve adequate forage and satisfy other biological requirements of such horses and burros and, when necessary, adjust or exclude domestic livestock use accordingly. See §§ 4115.2-1(d) and 4121.2-1(a) of this chapter.

§ 4712.1-4 Closures to livestock grazing.

The authorized officer may close public lands to use by all or a particular class of domestic livestock where he finds it necessary to allocate all available forage to, or to satisfy other biological requirements of, wild free-roaming horses or burros. Such closures may be made only after appropriate public notice and in accordance with the procedures for reduction or cancellation of grazing privileges provided for under the provisions of this subchapter. See \S 4115.2-1(d) and 4121.2-1(a) of this chapter.

§ 4712.2 Establishment of specifically designated ranges or herd management areas.

§ 4712.2–1 Designation.

The authorized officer may designate and maintain specifically designated ranges principally for the protection and preservation of wild free-roaming horses and burros.

§ 4712.2-2 Criteria for designation.

In designating specific ranges and herd management areas, the authorized officer, in addition to any other provisions of these regulations, shall:

(a) Consider only those areas utilized by wild free-roaming horses or burros as all or part of their habitat on December 15, 1971.

(b) Consider only those areas where self-sustaining herds can maintain themselves within their established utilization and migratory patterns.

(c) Consider only those areas which are capable of being managed as a unit to ensure a sustained yield of forage without jeopardy to the resources.

(d) Develop a wild free-roaming horse or burro management plan in accordance with \S 4712.2-3.

§ 4712.2-3 Management plan.

The authorized officer shall, in connection with the designation of a specific range, develop a proposed wild freeroaming horse or burro management plan designed to protect, manage, and control wild free-roaming horses and burros on the area on a continuing basis. The authorized officer may also develop herd management plans as part of the multiple use management on areas outside of specifically designated wild horse or burro ranges. All management plans shall be developed in accordance with the Bureau's planning system and shall govern management of the area.

§ 4712.3 Removal and relocation or disposal of excess or problem animals.

§ 4712.3-1 Method of capture.

Under the supervision of the authorized officer, wild free-roaming horses and burros may be captured, corralled and held under humane conditions pending disposal of excess or problem animals under the provisions of this Subpart.

§ 4712.3-2 Relocation of animals.

(a) The authorized officer may relocate wild free-roaming horses and burros on public lands when he determines such action is necessary to: (1) Relieve overgrazed areas, (2) locate animals removed from private lands in accordance with \S 4712.4-3, (3) remove problem animals, or (4) achieve other purposes deemed to be in the interest of proper resource and herd management. Such animals relocated on public lands shall not be introduced onto areas of the public lands which were not used by wild free-roaming horses or burros as all or part of their habitat on December 15, 1971.

(b) The authorized officer may also place animals in the custody of private persons, organizations or other governmental agencies. Custodial arrangements shall be made through cooperative agreement which shall include provisions to maintain and protect the animals and ensure that the animals will not be used for commercial exploitation. The authorized officer may, in his discretion, mark animals placed in private custody for identification purpose.

§ 4712.3-3 Disposal.

Where the authorized officer finds it necessary to remove excess animals from areas of the public lands, and he determines that it is not practical to relocate them on public lands or capture and remove them for private maintenance under § 4712.3-2, he may destroy such animals in the most humane manner possible. No person, except the authorized officer or his authorized representative, shall destroy wild free-roaming horses and burros.

§ 4712.3-4 Acts of mercy.

Any severely injured or seriously sick animals will be destroyed in the most humane manner possible as an act of mercy.

§ 4712.3-5 Disposal of carcasses.

Carcasses shall be disposed of in any customary manner under State sanitary statutes. In no event shall carcasses, or any part thereof, including those in the authorized possession of private parties, be sold or processed into a commercial product.

§ 4712.4 Animals on private lands.

§ 4712.4–1 Allowing animals on private lands.

Nothing in these regulations shall preclude a private landowner from allowing wild free-roaming horses and burros to remain on his private lands so long as the animals were not willfully removed, enticed, or retained by him or his agent from the public lands.

§ 4712.4–2 Active maintenance of animals on private lands.

Any individual who actively maintains wild free-roaming horses and burros on his private lands shall notify the authorized officer and supply him with a reasonable approximation of their number and location and, when required by the authorized officer, a description of the animals. Thereafter, he shall furnish an annual report updating the information during the month of January. An individual will be considered to be actively maintaining wild free-roaming horses or burros if he takes measures of any kind designed to protect or enhance the welfare of the animals. No person shall maintain such animals except under cooperative agreement between the private landowner and the authorized officer setting forth the management and maintenance requirements including provisions for regulating disposal of excess animals.

§ 4712.4-3 Removal of animals from private lands.

The authorized officer shall remove, as soon as he can make the necessary arrangements, wild free-roaming horses and burros, from private land at the request of the landowner where the private land is enclosed in a "legal fence." A "legal fence" for this purpose is one which complies with State standards and specifications. In "no fence districts" or other areas where the private landowner is not required by State statute to fence the private land to protect it from trespass by domestic livestock, the authorized officer shall, as soon as he can make the necessary arrangements, remove wild free-roaming horses or burros from such private land at the request of the landowner.

Subpart 4713 is revised. The full text of revised subpart 4713 follows:

Subpart 4713—Protection of Wild Free-Roaming Horses and Burros in the Identification and Removal of Claimed and Trespass Horses and Burros

§ 4713.1 General.

(a) All unauthorized and unbranded horses and burros on the public lands, except those which entered or were introduced onto the public lands after December 15, 1971, by accident, negligence, or willful disregard of ownership are presumed for the purpose of management to be wild free-roaming horses or burros.

(b) The gathering or rounding up of unbranded horses or burros on the public lands where any of such animals are not in fact authorized to be on the public lands pursuant to a grazing license, permit, lease, or other authorization, is prohibited without written authorization from the authorized officer. Also prohibited without written authorization from the authorized officer is the gathering or rounding up of unauthorized branded horses or burros where the branded animals are, or may become, intermingled with wild free-roaming horses or burros, or where the gathering or round up is likely to involve or affect wild free-roaming horses or burros.

§ 4713.2 Action on claims.

(a) Any person claiming ownership under state branding and estray laws of unbranded or branded horses or burros on public land where such animals are not authorized must present evidence of ownership to justify a roundup before permission will be granted to gather such animals. Claims of ownership, with supporting evidence, shall be submitted within 90 days of the effective date of these regulations. All written authorizations to gather claimed animals shall be on a form approved by the Director. After such public notice as the authorized officer deems appropriate to inform interested parties, he may authorize the gathering or roundup. The authorized officer shall provide in the authorization that the gathering or roundup shall be consistent with the legislation which prohibits the use of aircraft or motor vehicles to capture unbranded horses or burros; shall establish in the authorization a reasonable period of time to allow the gathering of the claimed animals; and shall provide such other conditions in the authorization which he deems necessary to minimize stress on any associated wild free-roaming horses or burros and to protect other resources.

(b) After the animals have been gathered the authorized officer and the appropriate state or local official shall inspect each claimed animal in relation to the evidence of ownership previously presented by the claimant. The state or local official shall then make a written determination of ownership concerning each claimed animal pursuant to the state branding and estray laws and any agreement between the Bureau and the appropriate state or local authority. A copy of the written determination shall be provided to the authorized officer. No animal may be removed from the gathering place until the claim of ownership has been proven to the satisfaction of the authorized officer.

(c) Unauthorized horses or burros which have been claimed and have been determined to be privately owned in accordance with the provisions of this Section will be considered to have been in trespass and may not be released until a proper trespass charge has been determined by the authorized officer in accordance with the provisions of 43 CFR 9239.3.

Subpart 4714—Enforcement Provisions

§ 4714.1 Arrest.

The Director of the Bureau of Land Management may authorize such employees as he deems necessary to arrest without warrant, any person committing in the presence of the employee a violation of the Act or of these regulations and to take such person immediately for examination or trial before an officer or court of competent jurisdiction. Any employee so designated shall have power to execute any warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of the Act or these regulations.

§ 4714.2 Penalties.

In accordance with section 8 of the Act (16 U.S.C. 1338), any person who:

(a) Willfully removes or attempts to remove a wild free-roaming horse or burro from the public lands, without authority from the authorized officer, or

(b) Converts a wild free-roaming horse or burro to private use, without authority from the authorized officer, or

(c) Maliciously causes the death or harassment of any wild free-roaming horse or burro, or

(d) Processes or permits to be processed into commercial products the remains of a wild free-roaming horse or burro, or

(c) Sells, directly or indirectly, a wild free-roamng horse or burro maintained on private or leased land pursuant to section 4 of the Act, or the remains thereof, or

(f) Willfully violates any provisions of the regulations under Group 4700, shall be subject to a fine of not more than \$2,000 or imprisonment for not more than 1 year, or both. Any person so charged with such violation by the authorized officer may be tried and sentenced by a U.S. commissioner or magistrate, designated for that purpose by the court by which he was appointed, in the same manner and subject to the same conditions as provided in section 3401, Title 18, U.S.C.

W. R. WILSON, Acting Deputy Assistant Secretary of the Interior. AUGUST 13, 1973.

FOREST SERVICE

Rules and Regulations Grazing; protection, management, control of wild and free-roaming horses and barros_____ 22000

Title 36—Parks, Forests and Memorials CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 231-GRAZING

Protection, Management, and Control of Wild Free-Roaming Horses and Burros

On December 20, 1972, a notice of proposed rulemaking was published in the FEDERAL REGISTER (37 FR 28077). The proposal would amend 36 CFR Part 231 for the purpose of providing authority and direction to the Chief, Forest Service, for protection, managing, and con-trolling those wild free-roaming horses and burros that are associated all or part time with National Forest System lands. In addition to the above publication the proposal was discussed in a draft environmental statement filed with the Council on Environmental Quality on December 21, 1972, and in a final environmental statement filed on July 6, 1973. The proposed rule making and the environmental statements were reviewed in detail with the National Advisory Board on Wild Free-Roaming Horses and Burros. National Forest Grazing Advisory Boards were also called upon to review the proposal as provided by the Requirements of the Granger-Thye Act (sec. 18, 64 Stat. 87, 16 U.S.C. 580k). All comments received from Advisory Boards and comments received from the public at large were considered in preparation of a final regulation. Revisions made as a result of the comments received and further analysis by USDA and the Forest Service are summarized below:

1. Section 231.11(a) Definitions, "Agent of the Secretary" has been added to the list of definitions.

2. Section 231.11(a) Definitions, the term "excess animals" has been substituted for "surplus animals."

3. Section 231.11(a) Definitions, the term "1971 Horse and Burro Territory" has been defined and adopted as a means of more clearly identifying the areas where Wild Horses and Burros were found at the time of the Act.

4. Direction has been established in \$231.11(b)(3) to identify the 1971 Horse and Burro Territory as rapidly as possible.

5. Section 231.11(c) Ownership Claims, has been revised to provide more specific information on the procedures to be followed and to make specific reference to the use of Cooperative Agreements with State agencies administering the State estray laws. The phrase "evidence of ownership" has been substituted for "probable ownership."

6. Section 231.11(e) Other Lands, Protection Upon, has been slightly revised to show more clearly that Wild Free-Roaming Horses and Burros associated with the National Forest System lands are protected whenever they move to lands of any other ownership or jurisdiction.

7. Section 231.11(h) Cooperative Agreements, has been simplified to eliminate any implied restriction in the use of cooperative agreements.

RULES AND REGULATIONS

8. Section 231.11(j) Disposal of Animals, has been slightly revised for clarity concerning Acts of Mercy.

As so revised the proposal is hereby adopted to read as set forth below. It becomes effective immediately.

§ 231.11 Wild free-roaming horses and burros.

The Chief, Forest Service, shall protect, manage, and control wild freeroaming horses and burros on lands of the National Forest System and shall maintain vigilance for the welfare of wild free-roaming horses and burros that wander or migrate from National Forest System lands. If these animals also use lands administered by the Bureau of Land Management as a part of their habitat, the Chief, Forest Service, shall cooperate to the fullest extent with the Department of the Interior through the Bureau of Land Management in administering the animals.

(a) Definitions. As used in this section, (1) "Agent of the Secretary" means any employee of the Forest Service or other individual who either individually or by virtue of the position he holds is delegated authority by the Chief, Forest Service, to take actions under the Regulations of this Section. (2) "Wild Free-Roaming Horses and

Burros" shall mean all unbranded and unclaimed horses and burros and their progeny that have used lands of the National Forest System on or after December 15, 1971, or do hereafter use these lands as all or part of their habitat. Unbranded, claimed horses and burros where the claim is found to be erroneous are also considered as wild and freeroaming if they meet the criteria above. However, this definition shall not include any horse or burro introduced onto National Forest System lands on or after December 15, 1971, by accident, negligence, or willful disregard of private ownership.

(3) "Herd" means one or more stallions and their mares, or jacks and their jennies.

(4) "Excess animals" means wild free-roaming horses or burros determined to be in excess of populations proper to maintain a thriving natural ecological balance and harmonious multiple use relationship on National Forest System lands.

(5) "Problem animal" means a wild free-roaming horse or burro whose demonstrated individual habits or traits pose an undue threat to the safety or welfare of persons, wildlife, livestock, or property.

(6) "National Forest System lands" are the National Forests, National Grasslands and other Federal lands for which the Forest Service has administrative jurisdiction.

(7) "1971 Horse and Burro Territory" means the National Forest System areas to be identified by the Chief, Forest Service, as the areas which were the territorial habitat of wild free-roaming horses and/or burros at the time of the passage of the Act. (8) "Wild Horse and Burro Range" means an area of National Forest System land specifically so designated by the Chief, Forest Service, from 1971 Horse and Burro Territory, for the purpose of sustaining an existing herd or herds of wild free-roaming horses and burros, which does not exceed their known territorial limits, and which is devoted principally but not necessarily exclusively to their welfare in keeping with the multiple-use management concept for the National Forest System lands.

(9) "Act" means the Act of December 15, 1971 (85 Stat. 649, 16 U.S.C. 1331-1340), Public Law 92-195.

(10) "National Advisory Board" means the Advisory Board as established jointly by the Secretary of Agriculture and the Secretary of the Interior under the provisions of the Act.

(b) Administration of Wild Free-Roaming Horses and Burros and their Environment. The Chief, Forest Service, shall:

(1)Administer wild free-roaming horses and burros and their progeny on the National Forest System land in the areas where they now occur (1971 Horse and Burro Territory) to maintain a thriving ecological balance, considering them an integral component of the multiple use resources, and regulating their population and accompanying need for forage and habitat in correlation with that of uses recognized under the Multiple Use-Sustained Yield Act of June 12, 1960 (74 Stat. 215: 16 U.S.C. 528-531). He may designate areas of National Forest System land as specific Wild Horse and Buro Ranges in those unique and singularly important situations where he determines such designation as especially fitting to meet the purposes of the Act and the Multiple Use-Sustained Yield Act and after consultation with the appropriate agencies of the State where such Range is proposed and with the National Advisory Board.

(2) Provide direct administration for the welfare of wild free-roaming horses and burros that are located on National Forest System land by use of the Forest Service organization rather than by the granting of leases and permits for maintenance of these animals to individuals and organizations.

(3) Direct that an identification of all areas meeting the definition of 1971 Horse and Burro Territory be completed as rapidly as possible.

(c) Ownership claims. Individuals wishing to assert a claim of ownership under the estray laws of a State to any unbranded, unauthorized horse or burro on National Forest System lands must present a written claim and evidence of ownership to the Forest Supervisor before permission will be granted to attempt a capture of the animal(s) involved. A claimant must support his claim in accordance with whatever criteria are cooperatively agreed to between the Forest Service and the State Agency administering the State estray laws. In the absence of a cooperative agreement a claim will be substantiated in accordance with State law, will be reviewed by

FEDERAL REGISTER, VOL. 38, NO. 157-WEDNESDAY, AUGUST 15, 1973

the Forest Service for compliance with such law, and will require Forest Service approval. All ownership claims to unauthorized, unbranded horses and burros located on National Forest System land on or after December 15, 1971, must be filed with the Forest Supervisor by November 15, 1973. Capture attempts must be authorized by written permission of the Forest Supervisor. He shall establish in the authorization a specific, reasonable period of time to allow capture of claimed animals and shall stipulate other conditions, including visual observation by Forest Service personnel, that he deems necessary to minimize stress on associated wild free-roaming horses and burros and to protect other resources involved. Prior to authorizing the capture of a claimed animal, the Forest Supervisor shall provide whatever public notice is appropriate in order that all interested parties may take notice and furnish him with any pertinent information relative to the claimed animals.

Prior to removal of claimed, captured animals from National Forest System lands, the claimant shall substantiate his claim of ownership in accordance with whatever criteria are cooperatively agreed to between the Forest Service and the State agency administering the State estray laws. In the absence of a cooperative agreement, ownership claims shall be substantiated in accordance with State law and subject to approval of the Forest Service.

(d) Removal of other horses and burros. In the event branded horses or burros or horses or burros which do not come within the definition in paragraph (a) of this section are intermingled at any time with herds of wild free-roaming horses or burros, the Forest Supervisor shall require and allow their removal only by methods which do not subject the wild ones to physical damage or undue stress. Horses or burros introduced onto National Forest System lands after December 15, 1971, by accident, negligence, or wilful disregard of private ownership shall be considered in trespass and treated in accordance with 36 CFR 261.7 and 261.13.

(e) Other lands, protection upon. Individual animals and herds of wild free-roaming horses and burros, as components of the National Forest System lands, will be under the protection of the Chief, Forest Service, even though they may thereafter move to lands of other ownership or jurisdiction as a part of their annual territorial habitat pattern or for other reasons. The Chief will exercise surveillance of these animals through the use of cooperative agreements and as otherwise authorized by law. and act immediately through appropriate administrative or criminal and civil judicial procedures to provide them the protective measures of the Act at any time he has cause to believe its provisions are being violated.

(f) Private lands, removal from. Owners of land upon which wild free-roaming horses and burros have strayed from National Forest System lands may request their removal by calling the nearest office of either the Forest Service or Federal Marshal.

(g) Private lands, maintenance. Owners of land who wish to maintain wild free-roaming horses and burros which have strayed onto their lands from National Forest System lands may do so by notifying the nearest office of the Forest Service in timely fashion and providing such information on a continuing basis as the Chief, Forest Service, may require. Such owners shall protect the wild freereaming horses and burros on their lands. They may not, in so maintaining these animals, impede their return to National Forest System lands unless authorized by cooperative agreement with the Forest Service.

(h) Cooperative agreements. The Chief, Forest Service, may enter into cooperative agreements as he deems necessary to further the protection, management, and control of wild free-roaming horses and burros.

(i) Relocation of animals. The Chief, Forest Service, may cause wild freeroaming horses and burros to be captured under the supervision of Forest Service personnel and relocated if they are found to be "excess" animals, "problem" animals, or if it is necessary to prevent their repetitive return to private land from which their removal has been requested.

(1) Relocation upon National Forest System land may be made only to areas identified as 1971 Horse or Burro Territory, and if suitable habitat capacity is available.

(2) Animals may be placed in the custody of private persons, organizations, and other Governmental agencies through the use of a cooperative agreement. Such custodial care arrangements must require that the animals be maintained and protected in accordance with the Act, and not used for commercial exploitation.

(j) Disposal of animals. No person except a duly designated Agent of the Secretary shall destroy any wild freeroaming horse or burro. Such Agents may destroy wild free-roaming horses or burros under the following circumstances:

(1) Severely injured or seriously sick animals may be destroyed immediately in the most humane manner possible as an Act of Mercy.

(2) Old, sick, and lame animals may be destroyed in the most humane manner possible after appropriate consultation with the National Advisory Board.

(3) When the Chief, Forest Service, finds it necessary to remove wild freeroaming horses or burros for the reasons identified in Section (i) and he determines there is no practical way to effect either their capture or their relocation, the animal(s) shall be destroyed in the most humane manner possible. To the extent possible, such problems will be anticipated and reviewed with the National Advisory Board before action is taken.

(k) Disposal of carcasses. The remains of deceased wild free-roaming horses and burros including those in the custody of private parties may be disposed of in any customary manner under State santary codes but in no event will they be processed into a commercial product.

(1) Agents of the Secretary. The Chief, Forest Service, is authorized to designate Forest Service personnel to serve as "agents of the Secretary" in accomplishing the purposes of the Act and these regulations. The Chief, Forest Service, may also appoint other individuals to serve as "agents of the Secretary" to assist Forest Service personnel in specific situations of short duration.

(m) Management coordination. A 11 management activities by the Chief. Forest Service shall be carried out in consultation with the appropriate agencies of the State involved. The expert advice of qualified scientists in the fields of biology and ecology shall also be sought in administering wild free-roaming horses and burros. The advice and suggestions of agencies, qualified scientists, and other qualified interest groups shall be made available to the National Advisory Board for their use and consideration. Actions taken in connection with private ownership claims shall be coordinated to the fullest extent possible with the State agency responsible for livestock estray law administration.

(n) National Advisory Board. The Chief, Forest Service, shall appoint a representative to attend all meetings of the National Advisory Board for Wild Free-Roaming Horses and Burros and to function as prescribed by the Memorandum of Agreement between the Department of the Interior and the Department of Agriculture and the Joint Charter issued by the Secretary of the Interior and the Secretary of Agriculture. Policies and guidelines relative to proposals for the establishment of ranges, adjustments in number, relocation and disposal of animals, and other matters relating generally to the protection, management, and control of wild free-roaming horses and burros shall be presented to the National Advisory Board for recommendations.

(o) Studies. The Chief, Forest Service, is authorized and directed to undertake those studies of the habits and habitat of wild free-roaming horses and burros that he may deem necessary. In doing so, he shall consult with the appropriate agencies of the State(s) involved.

(p) Arrest. Any employee designated by the Chief, Forest Service, shall have the power to arrest without warrant, any person committing in the presence of the employee a violation of the Act or of the regulations in this section and to take such person immediately for examination or trial before an officer or court of competent jurisdiction. Any employee so designated shall have power to execute any warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of the Act or of the regulations in this section.

(q) *Penalties*. In accordance with Section 8 of the Act, any person who:

(1) Willfully removes or attempts to remove a wild free-roaming horse or burro from the National Forest System lands, without authority from the Chief, Forest Service, or; 22002

3

(2) Converts a wild free-roaming horse or burro to private use, without authority from the Chief, Forst Service, or;

(3) Maliciously causes the death or harassment of any wild free-roaming horse or burro, or;

(4) Processes or permits to be processed into commercial products the remains of a wild free-roaming horse or burro, or;

(5) Sells, directly or indirectly, a wild horse or burro allowed on private or leased land pursuant to Section 4 of the Act, or;

(6) Willfully violates a regulation issued pursuant to the Act shall be subject to a fine of not more than \$2,000 or imprisonment for not more than 1 year, or both. Any person so charged with such violation by the authorized officer may be tried and sentenced by a United States commissioner or magistrate, designated for that purpose by the court by which he was appointed, in the same manner and subject to the same conditions as provided in section 3401, Title 18, U.S.C. (85 Stat. 649 (16 U.S.C. 1331-1340); Sec. 1,

(85 Stat. 649 (16 U.S.C. 1331-1340); Sec. 1,
30 Stat. 35, as amended (16 U.S.C. 551); Sec.
32, 50 Stat. 525, as amended (7 U.S.C. 1011);
74 Stat. 215 (16 U.S.C. 528-531))

ROBERT W. LONG,

Assistant Secretary for Conservation, Research and Education.

National Advisory Board on Wild Free-Roaming Horses and Burros

Administrative Procedures

On page 11276 of the <u>Federal Register</u> of June 6, 1972, there was published a notice and text of proposed administrative procedures (charter) for the National Advisory Board on Wild Free-Roaming Horses and Burros.

Interested persons were given 45 days within which to submit written comments, suggestions or objections. Upon consideration of these comments and suggestions, certain changes have been incorporated. Additionally, language has been added to reflect the requirements of newly enacted Public Law 92-463, the Federal Advisory Committee Act.

The changes required by Public Law 92-463 are as follows:

1. The wording of IIIA5, <u>Compensation</u>, has been amended to clarify the provisions for payment of travel expenses.

2. A sentence has been added to IIIC, <u>Meetings</u>, to give the estimated number of meetings per year, annual operating costs, and man years required.

3. A new clause reading: ". . . who is authorized to adjourn any meeting whenever he considers adjournment to be in the public interest." has been added to IIIC3, Official participation.

4. Part IIIC4, <u>Executive</u> <u>session</u>, has been eliminated, and Part IIIC5 renumbered IIIC4.

5. Part IIIE, <u>Public participation</u>, has been renumbered IIIC5, reworded to insure that all meetings will be open to the public, and to provide for the making of presentations and the filing of statements.

6. The portion of IIIE, <u>Public participation</u>, concerning advance public notice of meetings has been separated and expanded under part IIIC6, Advance public notice.

7. A part IIIC7, <u>Support services</u>, has been added to spell out responsibility for such services.

8. Part IIIF, <u>Record of proceedings</u>, has been renumbered IIIE, and the word "official" dropped from subpart (c). Subpart (d) has been changed to read, "a description of matters discussed and conclusions reached;". Subpart (f) has been amended to provide for certification of the accuracy of records by the Board chairman. Additionally, a sentence has been added to indicate where copies of Board records may be inspected and copied.

9. Part IIIG, <u>Rules and procedures</u>, has been renumbered IIIF, and the words ". . . is solely advisory and . . . " added between "Board" and "shail" of the first sentence. A sentence has been added to prescribe responsibility for actions to be taken with respect to any report or recommendation of the Board.

10. A part IIIH, Termination, has been added.

The following changes were made in response to comments:

1. The second sentence of II <u>Authority</u> has been eliminated. Although the sentence was an accurate statement of the law, its repetition in the charter could be interpreted as a limitation on the broad scope of the Board's advisory functions.

2

2. IIID <u>Chairmanship</u> has been revised to make clear that the chairman and vice chairman would be selected from among the membership of the Board. The word "principal" has been deleted from the first sentence of the second paragraph.

3. IIIE <u>Public participation</u> has been revised to show that their duly authorized representatives, as well as the two Secretaries, can call emergency meetings.

4. IIIH Advice and recommendations, renumbered IIIG, has been amended by changing "dissents from majority views" to "minority views" in the second sentence.

It was concluded that no further change was necessary to reflect the fact that State university staff members are qualified to serve on the Board, and that the Secretaries will seek a proper balance of interests on the Board. The suggestion that "land use" be added to the list of qualified disciplines was not adopted because the law itself specifies the qualifications. Similarly, there were recommendations to appoint officials of State government. The Act specifically prohibits such appointments.

The procedures are hereby adopted as revised and as set forth below. They shall become effective January 1, 1973.

I. <u>Purpose</u>. This document provides for the operation and describes the purpose, composition, and functions of the National Advisory Board on Wild Free-Roaming Horses and Burros.

II. <u>Authority</u>. The Act of December 15, 1972 (16 U.S.C. 1131-1340) requires the protection and management of wild free-roaming horses and burros on the public lands. Section 7 authorizes and directs the Secretary of the Interior and the Secretary of Agriculture to appoint a joint advisory board to advise them on any matter relating to the protection and management

3

Appendix 8, page 4

of wild free-roaming horses and burros, and specifies the qualifications required for membership on the advisory board.

III. National Advisory Board on Wild Free-Roaming Horses and Burros.

A. <u>Membership</u>. The Board shall consist of nine members, none of whom shall be an employee of the Federal Government or State governments.

1. Qualifications. Each member must have specialized knowledge in one or more of the following fields: The protection of horses and burros, the management of wildlife, animal husbandry, and natural resource management. At least one of each of the above disciplines shall be represented on the Board at all times.

2. <u>Selection</u>. All members shall be selected on the basis of experience and established competence in their respective fields of specialized knowledge.

3. <u>Appointments</u>. All members will be jointly appointed by the Secretary of the Interior and the Secretary of Agriculture.

4. <u>Term</u>. The term of appointment will be 1 year. If a member does not serve his full term, the Secretary of the Interior and the Secretary of Agriculture may appoint a successor for the remainder of the unexpired term. Members may be reappointed for additional 1-year terms not to exceed 10 years of total service.

5. <u>Compensation</u>. Members shall serve without compensation, except for reimbursement of travel expenses, including per diem, in connection with their duties as members.

B. <u>Functions</u>. The Board shall advise, consult with, and make recommendations to the Secretary of the Interior and the Secretary of Agriculture, or their duly authorized representatives, on any matter relating to wild free-roaming horses and burros.

4

C. <u>Meeting</u>. The Board shall meet at times and places to be determined by the Secretary of the Interior or the Secretary of Agriculture, or both, or their duly authorized representatives. It is estimated that there will be four meetings per year at an annual cost of \$30,000 and one man year of support.

1. <u>Call to meet</u>. The Secretary of the Interior and/or the Secretary of Agriculture, or their respective designees, will issue a formal call for each Board meeting.

2. <u>Agenda</u>. The Secretary of the Interior and/or the Secretary of Agriculture, or their respective designees will, in consultation with the chairman, formulate and approve the agenda for each meeting in advance.

3. <u>Official participation</u>. All meetings will be conducted in the presence of a duly authorized full-time salaried official or employee of the Department of the Interior or the Department of Agriculture, who is authorized to adjourn any meeting whenever he considers adjournment to be in the public interest.

4. Quorum. A majority of Board members holding office shall constitute a quorum which shall be required for the conduct of Board business.

5. <u>Public participation</u>. All meetings of the Board will be open to public observation. Any interested person may attend meetings, make a presentation upon request to the chairman, or file a statement with the Board. However, the authorized Department of Agriculture or Department of the Interior representative may establish reasonable limits as to the numbers of persons who may attend and the nature of their participation to the extent that available accommodations and time require limitation.

Appendix 8, page 6

6. <u>Advance public notice</u>. To provide interested parties an opportunity to attend and participate, advance public notice of the date, place, and general subject matter of scheduled meetings will be given through publication in the <u>Federal Register</u> and appropriate local news media.

7. <u>Support services</u>. The Secretary of the Interior or his delegate shall be responsible for providing support services for the Board, including advance public notice of meetings.

D. <u>Chairmanship</u>. The Secretary of the Interior and the Secretary of Agriculture will designate one of the members as chairman and another as vice chairman for the first year. Thereafter, members will annually elect the chairman and vice chairman among their own members.

The chairman will be the liaison between the Secretary of the Interior and the Secretary of Agriculture or their duly authorized representatives in working with the Departments in formulating agendas and otherwise arranging for the orderly conduct of business. He will preside at meetings and appoint members of working groups of the Board. The vice chairman will act for the chairman in his absence.

E. <u>Record or proceedings</u>. A written record shall be made of all proceedings of Board and working group meetings. A verbatim transcript may be made but is not required. As a minimum, each record of proceedings shall include: (a) the agenda; (b) the date(s) and place(s) of the meeting; (c) the names and addresses of all in attendance and the capacity in which they participated, (d) a description of matters discussed and conclusions reached; (e) the recommendations made and reasons therefor; together with concurring or minority views and, at the request of any individual member,

individual views; and, (f) copies of all reports received, issued, or approved by the Board. The Board chairman shall certify to the accuracy of the record of proceedings of each meeting. Such records, together with appendices, working papers, drafts, studies, and other documents, made available to or prepared or used by the Board, will be available for public inspection and copying in the Office of the Director of the Bureau of Land Management, Washington, D. C. Additionally, copies of the record of proceedings for each meeting shall be available for viewing at the libraries of the Department of the Interior and Department of Agriculture and the Library of Congress, Washington, D. C.

F. <u>Rules and procedures</u>. The Board is solely advisory and shall function in accordance with applicable Federal committee management requirements, and any supplementary and complementary guidelines which the Secretary of the Interior and the Secretary of Agriculture, or their respective authorized representatives, may jointly prescribe. Determinations of actions to be taken and policy to be expressed with respect to any report or recommendation of the Board shall be made only by the Secretary of the Interior, Secretary of Agriculture, or their authorized representatives.

G. <u>Advice and recommendations</u>. All advice and recommendations of the Board shall be made with the approval of a majority of the members present. Advice and recommendations of individual members, including minority views, may be made by the individuals involved. Each report of advice and recommendations shall be addressed only to the Secretary of the Interior or the Secretary of Agriculture, or both, or to their respective authorized representatives, and shall address only matters covered in the record of the Board's proceedings.

Appendix 8, page 8

H. Termination. The term of the Board is indefinite.

Asst. Secretary of Agriculture

January 2, 1973

THE ADVISORY BOARD'S FIRST YEAR

March 26, 1974

Washington, D.C.

Section 7 of the Wild Horse and Burro Act authorized and directed the Secretaries of the Interior and Agriculture to appoint a joint advisory board of not more than nine members to advise them on any matter relating to the management and protection of wild horses and burros. The group that you see seated here today is the result of the action by the Secretaries to select representation to meet the goals and objectives of the Wild Horse and Burro Act.

One of the prime assets of the Board, as set forth in its charter, is its joint responsibility to the Bureau of Land Management and the Forest Service. This responsibility provides for uniform criteria and procedures between the two agencies in the management of wild horses and burros.

The assignment given this advisory board was a new and perhaps unique challenge. This is true not only for the members of this Board but for the two managing agencies as well. The board has reviewed and made recommendations on a number of important issues concerning the management of wild horses and burros under a multiple-use concept. These recommendations were made to the two Secretaries and their managing agencies and were based upon combined experience and knowledge of the committee in plant and animal husbandry, and natural resources management.

As a <u>National</u> Advisory Board we have provided advice at the highest operating levels of program controls rather than at the local levels. During

Appendix 9, page 2

the past year it was felt that the most urgent need for advice from this Board should be in advance of program actions. Other means provide for full public participation and interdisciplinary consideration at local levels; however, membership on the board has not precluded individuals of this body from participating in meetings at local levels.

The suggestions and recommendations of the Board have been instrumental in changing and, in several instances creating, a complete rewrite of the draft for the regulations. Recommendations of the Board have not always been passed with unanimous agreement. Many times a resolution was vigorously debated before final passage or defeat. Because of the qualifications and background of the Board's members there was wide diversity of views, but this perhaps demonstrates the strength of such a Board for evaluating the broad spectrum of any particular problem that may arise. The Board has a chance to see a wide range of options before making a final recommendation. We believe through this past year we have dealt with these problems on the basis of mutual concern and cooperation.

During the past year the Board met on four occasions. Meetings were held in Salt Lake City, Utah; Denver, Colorado; Billings, Montana; and Lake Havasu City, Arizona. All meetings of this Board have been and we presume will continue to be open to the public. Any interested person is invited to attend the meetings, make a presentation upon request to the Chairman, or file a statement with the Board at the time of the meeting.

•

First Meeting January 12 and 13, 1973 Salt Lake City, Utah

The first meeting was devoted largely to orientation for the Board. The agencies explained the Federal Advisory Committee Act, the Advisory Board Charter, and the role of the Board under the present assignment.

Considerable time during this first meeting was used in reviewing a draft of the proposed regulations of the agencies. Individuals from the public had their first chance to express their views on wild horse and burro management to the Board and the agencies.

PUBLIC COMMENT

Nine individuals from the public presented their views. A brief summary follows:

There was an expression that the capture of wild horses in the past had been accomplished by individuals and organized groups as a form of sport and pleasure and that this should be allowed to continue as a method of wild horse population control. Representatives of these groups expressed a desire to acquire title to any animals they captured.

Several individuals indicated that there was a great amount of information available relative to wild horses and burros and their management from various individuals and groups and that the Advisory Board and administering agencies should seek out and utilize this information. A suggestion was made to modify the bloodlines and characteristics of wild free-roaming horses by introduction of domestic stallions. Considerable discussion followed, both pro and con, on this suggestion.

PROBLEMS CONSIDERED

- I. Several important policy guidelines were set forth at the initial meeting.
 - A. The BLM or Forest Service will not assign management responsibility for wild free-roaming horses and burros on the public lands. This was not interpreted to mean the agencies did not need advice and council in carrying out management responsibilities.
 - B. The Agencies will manage wild free-roaming horses and burros in a manner that is designed to achieve and maintain a thriving natural ecological balance on public lands.

II. Inventory of wild free-roaming horses and burros.

A. Data was presented by the Agencies relative to the estimated numbers of horses and burros occupying national forests and BLM lands, including location, land status and specific ranges.

III. Removal of claimed animals.

- A. Individual statestatutes differ and present a problem with respect to proof of ownership.
- B. Cooperative agreements appeared to be the only solution.

IV. Excess numbers.

- A. Planning systems for managing a balanced ecosystem would identify excess numbers.
- V. Disposal of excess numbers.

A. Relocation.

- B. Placement in private custody.
- C. Disposal in a humane manner.

RECOMMENDATIONS

- I. That the agencies immediately begin to develop model cooperative agreements with state agencies which is encouraged in Section 5 of the Act.
- II. That the regulation for proof of ownership in the claiming process be strengthened.
- III. That the agencies keep the Board informed on pertinent and current literature relative to behavior and management of wild horses and burros.
- IV. That the agencies develop a continuing inventory of wild free-roaming horses and burros that inhabit federal lands either in part or for all of their annual habitat requirements.
- V. That each Board member review the proposed regulations in view of finalizing them at the next meeting in Denver, Colorado.
- VI. That the agencies obtain a legal opinion on transfer of title to excess animals to private ownership.

Second Meeting March 21 and 22, 1973 Denver, Colorado

Most of the time at this meeting was devoted to discussing the regulations for each agency with respect to the revisions and suggestions from the committee. However six well prepared statements were made by individuals representing themselves or organizations that were concerned with the management of wild horses and burros.

PUBLIC STATEMENTS

The Rocky Mountain Regional Office of the Humane Society and the International Society for Protection of Mustangs and Burros expressed concern regarding the apparent misconduct of the roundup of the Idaho horses. Their Societies expressed interest in helping improve roundup and claiming procedures.

The Animal Protection Institute of America expressed concern about the wild burros and their role in the environment. They favored closer supervision over roundups and claiming of wild horses.

Some individuals making statements believed that organized groups should be given permits to carry out or continue mustanging while others disagreed with this practice since it constituted harassment of animals.

Mr. William Wright of Nevada explained the various ways wild horses might be gathered by using a combination of horsebackers and an airplane. He made a strong case for use of a plane, when properly handled, as a humane method of managing wild animals.

ISSUES CONFRONTED

I. Revision of the regulations.

A. Disposal of animals

1. Relocation.

2. Gifts.

3. Recycle in the system.

B. Acts of mercy.

C. Disposal of carcasses.

1. The old, sick, crippled etc.

D. Claiming animals.

"II. A lack of uniformicy between BLM and Forest Service regulations.

III. Need for research concerning behavior and feeding habits of wild horses and burros.

IV. Cooperative agreement criteria with:

A. States.

B. Other agencies (BIA - National Park Service)

C. Private land owners.

RECOMMENDATIONS

- I. Authorized officer to designate specific free-roaming wild horse or wild burro ranges (This was changed later to Director of BLM and Chief of Forest Service).
- II. Total number allowable animals be interpreted to mean in general the approximate number of free-roaming horses and burros in existence at the time of passage of the Act.

- III. Claims be based upon evidence of ownership as cooperatively agreed upon by the Agencies and State authorities.
 - IV. The Agencies obtain a legal review of all laws pertaining to the use of airplanes in working with wild horses or burros in management practices.
 - V. It was recommended that cooperative agreements such as the one between

Wyoming and BLM be concluded with all states as rapidly as possible.

Third Meeting July 16 and 17, 1973 Billings, Montana

Again, as in previous meetings, the formulation of a final proposed list of regulations for the management of wild free-roaming horses and burros occupied most of the Board's time.

At the Billings meeting, the Board was able to inspect the Pryor Mountain • wild horse range on the border between Wyoming and Montana. In the Pryor Mountains the Board was able to observe first hand the Bureau of Land Management planning process in action. This wild horse range was established in 1968 prior to the enactment of the Wild Horse and Burro Act (Public Law 92-195) with the help of several of the present board members. At the present time the Pryor Mountain horse range is managed under the concepts of the new law and regulations.

PUBLIC COMMENTS

During the period on the agenda for hearing comments from the public, the following persons appeared before the Board:

Mr. Alan J. Kania, Feral Organized Assistance League, Inc. Mr. Harold L. Perry, The Humane Society of the United States Mr. Kent Gregersen, Nitional Mustang Association, Inc. Mr. Eldon Smith, Wildlife Biologist

The full text of their comments is on file with the BLM. The general nature of their comments is as follows:

Mr. Kania told the Board of his experience in viewing wild horses in the Bookcliff area north of Grand Junction, Colorado. He explained his present research efforts on different diseases of horses and the issue of horses being classified as an exotic or feral species.

The primary concern of the Humane Society, according to Mr. Perry, is that in all instances where a reduction in numbers was necessary, all animals would be handled and transported or disposed of in a humane manner.'

Mr. Gregersen proposed mustanging as a possible way to reduce numbers of excess horses in a region. He stated several areas in the West had a large overpopulation of horses, and suggested the distribution of the excess animals to other areas.

Mr. Smith stated the Bureau of Land Management should set a definite policy for wild horse management in the Pryor Mountain complex. If protection under the Act creates an excess of animals, the surplus must be disposed of when overpopulation occurs.

PROBLEMS CONSIDERED

- I. Inclusion of NPS, BSF & W, and military reservations under the provisions of the Act.
- II. Disposal of carcasses of free-roaming wild horses and burros to rendering plants.
- III. Who is the authorized officer to designate specific wild horse or burro ranges?
- IV. Capturing, corralling animals for observation or disposal in a humane manner.

RECOMMENDATIONS

- I. That this Act be ammended to provide:
 - A. That the NPS, BSF & W, military reservations and BR lands to be included under the provision of the Act.

- B. That carcasses of animals of free-roaming wild horses and burros designated for disposal could be sold to rendering plants.
- C. That aircraft including helicopters and motorized vehicles to be used in capture and removal of excess animal numbers when the craft contains an employee of one of the two departments.
- D. That title of surplus animals to private ownership be permitted either through sale or gift.
- II. It was made a matter of record that the committee does not feel disposed, at this time, to make a recommendation for amendment to the present Act to include mustanging.
- III. It was again recommended that the Secretaries request adequate funding to do the necessary research to properly manage wild horses and burros on public lands.
- IV. The Board recommended that the two agencies follow the policy of not resorting to supplemental feeding of wild horses and burros except in extreme emergency.

Fourth Meeting

November 6, 7 and 8, 1973

Lake Havasu City, Arizona

The site of this meeting was selected to give the Board an opportunity to become better acquainted with the problems involved in burro management on public lands. The lower Colorado River area has one of the larger concentrations of burros in the Southwest. At this meeting, guest speakers were selected for their expertise in burro management and wildlife inhabiting the same environmental niche. They were:

Pete Sanchez, Death Valley National Monument John Russo, Arizona Game and Fish Department Larry Powell, Bureau of Land Management Richard Weaver, California Fish and Game Department Patricia Moehlman, Chico State College Kathy Ayres, Forest Service

PUBLIC COMMENTS

During the period on the agenda for hearing comments from the public, the following persons appeared before the Board:

Mrs. Bob Barling, Naval Weapons Center, China Lake, California
Mr. Belton P. Mouras, Animal Protection Institute, Sacramento, California
Mr. Ben Avery, <u>Arizona Republic</u>, Phoenix, Arizona
Mr. Herbert Martin, Humane Society of the U.S., Washington, D.C.

The full text of their comments is a matter of record with the BLM.

The general contest of their comments is as follows:

Mrs. Barling stated that burros were a problem over much of the Naval Weapons Center. Last winter in one area, after a drought period, there was not sufficient food for the concentration of burros. The NWC intends to maintain herds of burros consistent with the carrying capacity of the land consistent with the values of other wildlife on the base. Mr. Belton P. Mouras stated the concerns of his organization range from the multitude of all animals to interest in a single animal or species. At this time, they would like to see wild burros and horses maintained in a natural and undisturbed state, free from unnecessary fear, pain or suffering. His organization feels in spite of the fact that burros are not a potential game animal like bighorn sheep, they do have a rightful place on the range and reasonable and normal competition with other species, including game species, should be tolerated. Disposition by destruction, when absolutely necessary, should be accomplished by a method considered humane.

썦

Mr. Avery pointed out in any wildlife or burro problems, the public must be interested to get action. He told of the progress in attempting to restore the desert bighorn sheep in greater number within his State. He said, we do have burro-bighorn conflicts without any question. Mr. Avery said he does feel that the burro does have a place in Arizona. There should not be this conflict between the two species. Mr. Avery would urge the Board to adopt a policy to try and separate burros and bighorn.

Mr. Herbert Martin stated that the purpose in being here is to express the concern of the HSUS, and its many members across the country for the health and welfare of wild free-roaming horses and burros as defined in PL 92-195. Ideally, his organization would like to see all animal species living side by side without conflict. Unfortunately, man must attempt to help the ecological scales level with a semblance of balance. People must resolve or at least minimize the conflicts which exist between certain species as well as their habitat. Horses and burros must be managed in such a way as to equally consider other forms of life around them.

PROBLEMS CONSIDERED

- I. Location and behavior of wild burros.
 - A. A concentration of burro numbers and a stressed water and feed supply.
 - B. Competition between bighorn sheep and burros.
- II. A final analysis for the years activity and recommendations.

RECOMMENDATIONS

- I. That the two federal agencies begin immediately to formulate and initiate management plans for wild horses and burros under the multipleuse concept for each individual area where these animals reside.
- II. That the agencies receive the full support of the Board in forewarning the public that population control measures beyond the removal of live animals from an area might be necessary for the protection of the overall land resources.
- III. The Board recommended where practical that research on wild horses and burros should be conducted outside the agencies under contracts and cooperative agreements and further that the agencies expedite the research program and request adequate funding for this effort.
- IV. That the Forst Service and BLM negotiate formal cooperative agreements with other federal agencies where burros and horses are using lands under more than one governmental jusisdiction.

FUTURE PROBLEMS

From the four meetings and the issues raised to date, the Board has learned that the successful protection, management and control of wild horses and burros will not be an easy task. Some of the problems still unsolved

are:

- An accurate inventory of wild horses and burros and an evaluation of the land resource capability to support these numbers consistent with other demands.
- Means of disposing of excess numbers such as transfer of ownership through gifts and sales or through recycling them into the system in a humane manner acceptable to the public.
- 3. Use of aircraft in collecting animals for removal or inspection in the management plan.
 - 4. Convincing the public that control of animal numbers is absolutely necessary to manage a viable biological system and that total and complete protection without control will not only be catastrophic to the animals but to the land resources as well.
 - 5. Research is needed to determine the true overlap between wild horses and burros with livestock and game animals otherwise a well founded and a defensible management plan can not be formulated.
 - 6. Wild free-roaming horses and burros that obtain part of their annual feed requirements from private lands will present a difficult problem that will require agreements, payments for damages and/or for the feed they consume.
 - 7. The claiming procedures and agreements between state and federal agencies are yet to be tested and revised to work in an effective manner.
 - 8. In order to eventually accomplish the task of managing the wild free-roaming horses and burros the Act itself may have to be amended or complemented by other legislation both from the state and federal level.

- 9. The Board should not become involved in specific administrative problems, litigation, or controversy that is legally the responsibility of the Agencies.
- 10. Nost important of all the Board must not become divided. They must continue to work together as a body and consider each issue on its merits and its absoluteness in maintaining the wild horses and burros on public lands in e balanced and productive ecosystem.
- 11. Develop management plans on all local wild horse and burro areas consistent with the Act and with minimum reliance upon the advice of the Board for deciding local issues.

Ŧ

MEMORANDUM OF AGREEMENT BETWEEN HILL AIR FORCE BASE, U.S. AIR FORCE DUGWAY PROVING CROUND, U.S. ARMY AND

BUREAU OF LAND MANAGEMENT, U.S. DEPARTMENT OF THE INTERIOR RELATIVE TO

THE MANAGEMENT OF WILD, FREE-ROAMING HORSES WHICH INHABIT PUBLIC LANDS UNDER THE DEPARTMENT OF INTERIOR AND NATIONAL DEFENSE JURISDICTIONS IN WESTERN UTAH, IN ACCORDANCE WITH PUBLIC LAW 92-195

It is jointly recognized that wild, free-roaming horses inhabit public lands both within the Dugway Proving Ground and the Wendover Bombing Range and adjoining national resource lands administered by the Bureau of Land Management. The habits of these horses fluctuate, depending upon seasonal conditions, but normally they summer on national resource lands in the Cedar Mountains and Dugway Range, and winter on the Dugway Proving Ground and Wendover Bombing Range in the Wildcat Mountain, Granite Mountain, and portions of the Cedar Mountain and Dugway Range both within the Dugway Proving Ground and outside.

It is recognized that the welfare of these horses will depend upon the joint effort of the National Defense Agencies and the Bureau of Land Management for the management of their habitat and protection of the horses.

Public Law 92-195, 92nd Congress, commonly known as the Wild Horse and Burro Act, herein referred to as the Act, and the regulations of the Secretary of the Interior, pursuant thereto (43 CFR Part 4700) herein referred to as the regulations, provide for the protection of wild, free-roaming horses and burros and their management as components of the public lands administered by the Forest Service and the Bureau of Land Management. The Act provides that where wild, free-roaming horses use other than national resource lands or national forest lands, that cooperative agreements may be entered into to promote the protection and welfare of these animals.

Therefore, in the interest of carrying out the purposes of the Act, the undersigned hereby agree as follows:

1. That the wild, free-roaming horses that use lands under the jurisdiction of the Defense Department and the national resource lands under the jurisdiction of the Bureau of Land Management, will be considered to be under the jurisdiction of the Secretary of the Interior.

2. That a joint management plan will be developed to provide for the management of these wild horses and their habitat in a manner consistent with the purposes of the Act. This management plan will include the following:

A. An annual inventory of the wild horse populations in the area of joint concern.

B. A continuing review of the habits of the wild horses in terms of grazing and watering patterns, seasonal migrations, and the availability of water and forage.

C. A determination of the necessary use-facilitation projects -- water, fencing, etc. -- to provide for the welfare of the animals.

3. That implementation of the management plan shall be the responsibility of the Bureau of Land Management and will be carried out in accordance with terms and conditions specified by the Commanding Officers in the interest of program coordination and minimizing conflicts with the basic mission of the Defense installations.

4. That the following procedures will be used, and controls recognized in carrying out this joint effort:

A. The inventory of the horses and their habitat will be conducted jointly in accordance with plans or techniques jointly agreed upon and may include aerial or on-the-ground surveys and photography. In no case will Burcau of Land Management officials engage in these activities without clearance from the Commanding Officers of the Defense installations involved, and then only in accordance with restrictions and conditions imposed.

B. The Commanding Officers of the Defense installations shall assure that responsible officials under their commands shall be aware of the terms and conditions of this agreement, and, in carrying out their maneuvers and operations, shall exercise controls and assure compliance therewith.

C. If it is determined by the Commanding Officer of either of the Defense installations that the presence of wild horses interferes with military programs and operations, such problems shall promptly be referred to the District Manager, who shall be responsible for correcting the problem in accordance with access and related constraints or directives imposed by the Commanding Officer.

D. The District Manager of the Salt Lake District, Bureau of Land Management, herein referred to as the District Manager, shall represent the State Director of the Bureau of Land Management/implementation of this agreement. 5. There shall be at least semiannual joint reviews of this wild horse management program by the Commanding Officers of the Defense installations and the District Manager of the Bureau of Land Management. These normally will be conducted in December and May, but could be at other times as conditions dictate. The management plan may be updated on the basis of information gathered in these reviews.

6. No wild, free-roaming horses shall be removed from the area, or harassed, captured, branded, or killed by either military or Bureau of Land Management personnel except as provided for in the Act and the Regulations. In the event horses are accidentally injured or killed by normal military operations, such instances shall be promptly reported to the Bureau of Land Management District Manager.

7. There shall be open channels of communication between the District Manager and Commanding Officers to provide for prompt reporting of problems associated with wild horse management and to promptly and efficiently carry out the programs here jointly agreed to. Any problems that cannot be reconciled at the District Manager-Commanding Officer level shall be referred through channels to higher authority of each agency for resolution.

8. The liability of the parties under this agreement is contingent upon the necessary appropriation and reservation of funds being made therefor.

This agreement is effective immediately and shall remain so until cancelled or modified by any party hereto by written notice. Such written notice must be two months in advance of the intended cancellation or modification date.

FOR OFFICIAL USE ONLY

The following is an investigation report compiled jointly by the Bureau of Land Management and the U.S. Forest Service concerning the roundup of allegedly wild horses north of Howe, Idaho, during the months of January and February 1973.

During the latter part of Getober or the first part of November 1972, WILLIAM B. ROBISON, a rancher residing approximately 15 miles north of Howe, Idaho, contacted BILL K. YMARSIMY, 220 North East Main Street, Blackfoot, Idaho. YEARSLEY is in the real estate business working out of St. Anthony, Idaho, for the United Farm Agency. ROBISON asked YEARSLEY if he (YEARSTEY) would be interested in gathering a herd of 50 or 60 horses that ROBISON claimed were owned by local ranchers in the area. YEARSLEY tentatively agreed to undertake the roundup of these horses. YEARSLEY agreed as a favor to ROBISON. ROBISON told him that the horses were cutting into the grazing for his livestock and that he would lose his grazing lend. ROBISON holds grazing privileges for cattle on all of the BLM administered lands and National Forest lands on which the horses were roaming.

It was YEARSLEY's understanding that the roundup would take place the Thanksgiving weekend in 1972. YEARSLEY begon his preparations for the roundup approximately November 15, 1972.

On or about the same time that ROBISON contacted YEARSLEY, ROBISON also contacted L. R. (SLEM) HAWLEY, a local reacher in the Howe, Idaho area. ROBISON asked HAWLEY if he would be interested in relinquishing any property rights to horses that he (HAWLEY) claimed in the Badger Creek area. HAWLEY agreed that he would relinquish any right to horses that he had in this area and by mail sent to ROBISON a bill of sale which was dated November 15, 1972. This bill of sale was for three branded horses. HAWLEY's claim to ownership is based upon his turning out seven unbranded fillies and a branded stud horse onto Federal land in 1955.

During November 1972 ROBISON also made contact with two other individuals, LKO D. AMY, a local rancher in the Howe, Idaho area and JAY LITTLE, an individual who had owned the ROBISON ranch prior to selling it to ROBISON in 1970. ROBISON requested that AMY and LITTLE make out a bill of sale to him for any horses they claimed ownership to in the Badger Creek area. Both AMY and JAY LITTLE agreed to relinguish any interest that they might have in these horses to ROBISON. Bills of sale were obtained by ROBISON from these two individuals dated December 5, 1972. The bill of sale from AMY was for six unbranded horses plus offspring. The bill of sale from J. LITTLE was for seven to ten branded horses. J. LITTLE believes that he signed a blank bill of sale which did not specify the number of horses. AMY's claim to ownership is based upon a stallion and a mare that he lost in the area in 1951 as he was moving horses. J. LITTLE's claim to ownership is based upon a possibility that some of his horses may have escaped from his ranch prior to selling it to ROBISON in 1970.

On December 19, 1972, a Bureau of Land Management Advisory Board meeting was held in Idaho Falls, Idaho at the District Office. This meeting was attended by a number of individuals, among them were LEO AMY and GEORGE B. WOODIE of Howe, Idaho, JENS JENSEN of the Bureau of Land Management from Boise, Idaho, and WALTER (ED) JONES, District Manager of the BIM Office at Idaho Falls, Idaho.

One of the items discussed at this meeting was Public Law 92-195 relating to the protection, management and control of wild Tree-roaming horses and burros on public land. Also discussed were the proposed Department of Interior regulations concerning implementation of this act. AMY and WOODIE left this meeting with the impression that if the herd of horses in the Badger Creek area was not removed from Federal lands within 90 days they would be declared wild free-roaming horses. The BIM District Manager, JONES, had this same understanding. Copies of the proposed BIM regulations and copies of PL 92-195 were given to all Advisory Board members at this meeting. The proposed BIM regulations were amended on December 12, 1972. The copies of the proposed BIM regulations that were given to the Advisory Board members did not contain this amendment. Within several, approximately 8, days after the meeting WOODIE furnished ROBISON his copy of the proposed Department of Interior regulations.

On December 28, 1972, ROBISON and FRANK HARTMAN, JR., also a rancher at Howe, Idaho, visited the Eureau of Land Management District Office in Idaho Falls. They discussed with District Manager JONES, the possibility of removing the band of 50 to 60 horses from Federal lands in the Badger Creek area. The District Manager advised them that if the horses were theirs they should remove them from Federal lands and that they would not need written permission to do so. JONES also advised them to contact the County Attorney and County Sheriff concerning their proposal to gather their claimed horses, which they did. However, no counsel or guidance was provided by either the County Attorney or the County Sheriff to the ranchers concerning the State of Idaho brand or estray laws.

On December 29, 1972, a water board or fish and game meeting was held at the Howe school. There were no Federal employees present at this meeting. One of the items of discussion among the ranchers attending this meeting was the gathering of the bend of 50 to 60 horses in the Badger Creek area. ROBISON was at this meeting as well as LEO AMY and HARTMAN. ROBISON apparently led the discussion

concerning the horses and indicated to the other ranchers that his primary concern was that they all be in agreement concerning the gathering of these horses.

At some point during the month of December ROBISON again contacted YEARSLEY about gathering the horses. ROBISON agreed to turn over to YEARSLEY the three bills of sale that were in his possession for the consideration of one dollar.

YEARSLEY received an additional bill of sale from HARTMAN (dated 1/3/73). This bill of sale transferred to YEARSLEY horses in the Badger Creek area in which HARTMAN claimed ownership. HARTMAN's claim to ownership is based upon his purchase of a ranch in 1968 that had been owned earlier by ANDY LITTLE. ANDY LITTLE denies that he conveyed to HARTMAN any interest he may have had in horses in the Eadger Creek area.

On approximately January 5, 1973, BIM District Manager JONES contacted Forest Supervisor RICHARD EENJAMIN of the Challis National Forest, Challis, Idaho. JONES advised BENJAMIN that the ranchers in the Howe area were going to gather horses on Federal land in the Badger Creek area. JONES continued that these horses were on Federal land administered by the BIM and that the horses were privately owned. BENJAMIN told JONES that as long as the horses were being gathered on land administered by the BIM and that the horses were privately owned the Forest Service would not be involved.

On approximately January 6, 1973, YEARSLEY made an attempt to gather the horses by means of a helicopter. The helicopter was piloted by SAM BUCKLEY of Mountain States Helicopter Service, Rigby, Ideho. The helicopter attempt to gather the horses was virtually unsuccessful. One white stallion was captured, and was kept by one of HARTMAN's hired men.

Between January 6 and January 20, 1973, YEARSLEY requested the assistance of MAX FAIMER of Sugar City, Idaho, to help him gather the horses. PAIMER agreed and was to receive half of the horses captured. PAIMER stated he never intended to do anything else with the horses than to sell them for slaughter.

A second helicopter attempt was made on approximately January 20, 1973. This attempt was also unsuccessful.

During the period of January 20 and February 10, YEARSLEY stated that he used an airplane in an attempt to haze the horses into a corral. The airplane was piloted by a man named MASON (?). They were unsuccessful in their attempts.

Also, between January 20 and approximately February 10, 1973, YFARSDEY and PAIMER, with the assistance of numerous other individuals on horseback, were successful in gathering 6 additional horses. One of these horses, a mare, allegedly had the LEO AMY brand upon her. The remaining horses were unbranded. Five of these horses were transported to the ranch of PAIMER at Sugar City, Idabo. There two of the horses were given to a MELVIN GRIFFITH, of Rexburg, Idaho, and three of the horses were consigned to BISH JENKINS, an Idaho Falls horse dealer, for sale to the Central Nebraska Pack in North Platte, Nebraska. The two horses in the possession of MELVIN GRIFFITH were stallions. After being notified that these might be government protected horses (March 3, 1973), GRIFFITH castrated the two horses (March 7, 1973).

By this time YEARSLEY was becoming discouraged with their unsuccessful attempts to gather the horses. They were staying at the ROBISON reach during the roundup. Each day, according to YEARSLEY, ROBISON would implore them not to give up. YEARSLEY stated that ROBISON told him that he (ROBISON) was in daily contact with the BIM and that they were pressuring him to get the horses off Federal land. YEARSLEY further stated that ROBISON had told him that if they could not capture the horses they were to shoot them. This was also PALMER's understanding.

BIM District Manager JONES says that other than at the December 28 meeting with ROBISON and HARTMAN he (JONES) did not make requests of ROBISON to remove the horses from Federal lands. JONES also stated that he never, at any time, told the ranchers to shoot the horses they could not capture. In one of JONES' conversations with ranchers from the Howe area JONES was asked what would happen if the ranchers could not get all the horses off. JONES told them he did not know; that he would have to study it. It might be limited to what was there it might be more.

At about this same time DAVE LINDBERG, the Assistant Area Manager for the BIM, contacted ROBISON to advise him that the BIM had received an incuiry from U. S. Senator FRANK CHURCH concerning the roundup. This incuiry was received in the BIM office in Idaho Falls on February 15, 1973. The U. S. Forest Service Office in Ogden received this same incuiry from CHURCH on approximately the same date.

YEARSLEY was told by one of the men participating in the roundup about CHURCH's inquiry. All of the men staying at the ROBISON ranch discussed the CHURCH inquiry the evening of February 16 and they decided to continue their attempts to gather the horses.

During the period February 17-19, 1973, approximately 21 horses were trapped in a high rimrock area by YEARSIEY, PAIMER, and others.

These horses were trapped on February 17, 1973, and left unattended at the site of their capture until the morning of February 19, 1973. One very young suckling colt was outside of the trap area. LYN MONN from the Howe area took this colt home with him. This colt subsequently died. At the time of capture and after leaving the area the ranchers discussed various means of controlling the horses so they could remove them. They consulted a veterinarian in Rexburg, Idaho. He advised them to partially close their nostrils with hog rings.

On the morning of February 19, YEARSLEY, PALMER end, according to YEARSLEY, everyone else in the area who could ride a horse, returned to the trap area. There they found that four horses had fallen over a 40 foot cliff to their death. Three other horses had caught their hooves in the rocks. Since they were already caught, FAINER placed hog rings in the nostrils of the three horses whose hooves were caught. They attempted to free these three horses but could not do so. Therefore, they disposed of the three by cutting their throats and pushing the bodies over the cliff. In all, seven horses met their death at the trap area.

During this time someone thought they saw a cougar at the base of the cliff. PALMER took a rifle that he had with him and proceeded to the base of the cliff in an effort to shoot the cougar. Instead of a cougar, PALMER saw another horse that had fallen over the cliff and survived. This horse escaped capture at this time.

Hog rings were then placed in the nostrils of the remaining horses in the trap. These horses were removed from Federal lands on the evening of February 19.

During the period of approximately February 19 to February 25, 1973, approximately 20 additional horses were gathered and shipped to the PAIMER ranch at Sugar City, Idaho. In addition to these, three horses broke their legs while attempting to avoid capture. PAIMER shot these three. PAIMER also observed the bodies of two horses that had recently died of unknown causes. PAIMER did not see any brands on these five horses.

Several snowmobiles were used in gathering these horses. However, YEARSLEY stated that the man who used his snowmobile most effectively was LYN MUTAN, who resides in the Howe area. MUTAN used his snowmobile to haze horses into a corral in the Rocky Run area. YEARSLEY stated that MUTAN also bull-dogged a horse from his snowmobile. One horse was reportedly roped by another man on a snowmobile.

A total of 39 horses had been received by PAIMER. Five had been disposed of by PAIMER as stated carlier in this report. One of the remaining 34 horses was claimed by a ROBERT HALL of Howe, Idaho, and 6

transported by HALL to his sister-in-law's residence at Ririe, Idaho. A second horse, a young colt, was sold to GARY GRIFFI'H for the amount of \$30. GARY GRIFFITH resides at Rexburg, Idaho. A third horse was sold for \$10 to ROINIE MOSS of Rexburg, Idaho. The remaining 31 horses were consigned by FALMER to BISH JANKINS of Idaho Falls, for shipment to Central Nebraska Pack in North Platte, Nebraska.

On March 1, the 31 horses were inspected by State Brand Inspector BOYD SUMMERS and were found to have no brands. As PALMER had no "Bill of Sale" transferring these horses to him he requested HARIMAN, ROBISON, and LEO AMY to sign the Brand Inspection Certificate as owners, which they did. All of these individuals were present during the inspection.

The MILLER transport company of Hyrum, Utah, was hired by JENKINS, to transport the 31 horses, via Idaho Falls, from Sugar City to North Platte, Nebraska. At the JENKINS stockyard in Idaho Falls, one horse was removed from the truck because it was believed to be too weak to make the trip (this horse was observed dead in the BISH JENKINS yard by Federal officers on March 3, 1973). While the truck was at the JENKINS yard, seven additional horses were added to the shipment, making a total of 37 horses shipped to North Platte, Nebraska.

A summary of the unbranded horses captured or that died during the roundup shows:

- 31 shipped to North Platte with brand inspection certificate
 - 3 shipped to North Platte with no brand inspection certificate
 - 7 dead at the trap area
 - 3 shot dead in the roundup area
 - 2 found dead in the roundup area
 - 2 in possession of MELVIN GRIFFITH
 - 1 in possession of GARY GRIFFITH
 - 1 in possession of ROBERT HALL
 - 1 in possession of hired man at HARTMAN ranch
 - 1 in possession of RONNIE MOSS
 - 1 suckling colt that died while in the possession of LYN MUNN

53 Total number of unbranded horses.

In addition to the 53 unbranded horses, one horse was allegedly gathered that bore the IEO AMY brand. The disposition of this horse is not known at this time.

Many of the mares in this herd of horses were with foal. Most lost these foals either during the many attempts to capture them or at the packing plant yard in Nebraska.

BACKGROUND AND RELATED INFORMATION

Prior to 1945 a large band of horses, 200 or more, could be found in the Badger Creek area. Periodically, the horses were rounded up and either sold or used as saddle and pack stock by local ranchers. After selecting the horses to be retained the remainder were returned back onto Federal lands. About 1945, all of the horses were rounded up and disposed of. Allegedly, there were no horses in this particular area for a period of approximately six years.

In the early 1950's several ranchers either lost horses in the area or turned out unbranded stock on Federal lands. They did this in an attempt to establish a reservoir of horses they could draw upon at will. By using unbranded stock they attempted to avoid any trespass action by the Government. These efforts apparently met with success, inasmuch as the herd grew in size, and in spite of several attempts to do so, the BIM was unable to determine ownership so as to initiate any trespass action.

Periodically from 1955 to 1965 the horses in the Badger Creek area were gathered. Selected horses were removed from the herd and the remainder were returned to the range. During one such roundup in 1962, conducted by an individual named CURLEY ANGEL, and assisted by others, a number of branded and unbranded horses were gathered. ANGEL claimed all the unbranded horses but the local ranchers made him return all the branded stock back onto Federal land.

The last known roundup in the area occurred in approximately 1964. There have been no known attempts to gather these horses between 1964 and January 1973.

The horses, for the most part, grazed on National Forest lands. At the time of the roundup there was more than sufficient feed available to the horses on the National Forest lands that they used.

EMERGENCY DIRECTIVE NO. 2

CHAPTER: 2260 - WILD FREE-ROAMING HORSES AND BURROS

2261 - COOPERATION

This should follow ED No. 1 of 9/12/73. It is expanding R-2 material in 2261 Cooperation.

COOPERATIVE AGREEMENT BETWEEN

THE WYOMING LIVESTOCK BOARD; THE BUREAU OF LAND MANAGEMENT, U. S. DEPARTMENT OF THE INTERIOR AND THE FOREST SERVICE, REGIONS TWO AND FOUR, U. S. DEPARTMENT OF AGRICULTURE

I. PURPOSE

This Cooperative Agreement between the Wyoming Livestock Board, hereinafter referred to as the Board; the Bureau, of Land Management, hereinafter referred to as the Bureau, and the United States Forest Service through the Regional Foresters of Region Two and Region Four, hereinafter referred to as the Forest Service, is for the purpose of identifying joint responsibilities of each agency and instituting close cooperation toward the implementation and administration of Public Law 92-195 for the Protection, Management and Control of Wild Free-roaming Horses and Burros, hereinafter referred to as the Act, and the Secretary of the Interior's regulations embodied in 43 CFR Part 4700, and the Secretary of Agriculture's regulations embodied in 36 CFR 231.11, hereinafter referred to as the Regulations, within the State of Wyoming.

II. OBJECTIVE

The Bureau is charged by the Act and the regulations to manage, protect, and control wild free-roaming horses and burros on Bureau-administered lands under its jurisdiction, and private land under cooperative agreement. The Forest Service is charged by the Act and the regulations to protect, manage, and control wild free-roaming horses and burros associated with lands under the administration of the

Appendix 12, page 2

2261--10

Forest Service. The Board is charged with the responsibility for validating and processing claims of ownership of branded and unbranded animals pursuant to the State branding and estray laws, and the proper disposal of animals pursuant to the livestock sanitation laws, within the State of Wyoming.

Therefore, it is the mutual desire of the Board, the Bureau, and the Forest Service to work in harmony for the common purpose of planning, implementing and administering the applicable State and Federal laws to accomplish the directed management, protection and control of wild-free roaming horses and burros within the State of Wyoming and provide maximum service with minimum adverse effect on resources and the environment.

III. AUTHORITY

The Board is authorized to determine claims of ownership under State law pursuant to Wyoming State brand laws, WS (1957) Chapter 22, as amended.

The Bureau and the Forest Service are authorized to enter into cooperative agreements with State agencies, and with each other, concerning the management and protection of wild free-roaming horses and burros under the provisions of the Act.

IV. MANAGEMENT CONSIDERATION

To accomplish the purpose and objective of this agreement, IT IS MUTUALLY AGREED:

A. Planning

The Bureau's and the Forest Service's planning system produces guidelines and decisions for management of the resources on the respective administered lands. Since wild free-roaming horses and burros can be affected by decisions which result from planning systems, it is essential that information, data, viewpoints and cooperation be obtained from the Board. The Board can also benefit from similar consultation with the Bureau and the Forest Service.

1. Board

The Board will participate, to the extent allowed by other program commitments, in planning system meetings called to review management plans and proposals, and offer recommendations regarding wild horse and burro management, and other management alternatives. The Board recognizes the jurisdiction of the Bureau and the Forest Service over wild freeroaming horses and burros, including those that stray from lands administered by the Bureau or the Forest Service, or are privately maintained as provided in the Act and the regulations.

2. Bureau and Forest Service

All resource information gathered by the Bureau and the Forest Service during the inventory and public participation phases of the planning effort will be available for review by the Board. To the extent allowed by program commitments, the Bureau and the Forest Service will assist the Board as requested in providing data beneficial to the Board's planning efforts.

B. Claims of Animals

The Act and the regulations thereunder, provide that persons may recover unbranded animals where they can show proof of ownership under State estray laws.

Therefore, in order to properly conform to such provisions and to provide harmony between the State and Federal agencies in recognizing those persons who have legitimate claim to animals, otherwise thought to be wild and free-roaming, it is mutually agreed that the following procedures will be followed:

 Written claims will be accepted by the Bureau's and/or Forest Service's authorized officer. The Forest Service's authorized officer as referred to herein is the Forest Supervisor or his delegated representative.

Appendix 12, page 4

2261--12

- a. The claimant must submit with his claim a sworn affidavit asserting ownership to the claimed animals and indicating a willingness to defend title and setting forth the following:
 - (1) Number of animals claimed.
 - (2) A description of each of the claimed animals including factors indicating tameness, such as animal being gelded, broken to rope or saddle, and including other marks, such as, tattoos, tags, or mancreated blemishes, color pattern or characteristics, clearly visible.
 - (3) Date and circumstances animals entered upon the open range.
 - (4) Location of relevant private or leased lands where animals were kept prior to the release on open range.
 - (5) Any other information the claimant deems relevant.
- b. Other ownership evidence when available will
 be submitted with the claim. This may include:
 - A bill of sale fully describing the claimed animal(s) and which meets all State legal requirements for a bill of sale, or
 - (2) A valid inspection certificate issued by the Board for some previous occasion which fully describes the animal(s) and which clearly identifies the animal(s) as belonging to the claimant, or
 - (3) A brand certificate issued by another state for some previous occasion as required by rules and regulations of the Board.

If the claimant is unable to satisfy (1), (2), or (3) above, the Board, Bureau, and Forest Service may consider other appropriate indicia of ownership which may include, but is not limited to: (a) whether the claimant has paid personal property tax upon the claimed animal(s); (b) whether the animal(s) is the known progeny of a mare or jenny owned by the claimant.

- 2. Upon receipt of the written claim and supporting information, the Bureau's or Forest Service's authorized officer will meet with the Board's representative and jointly review the information submitted by the claimant. Based upon this review the Board's representative will certify in writing to the authorized officer as to whether the claimant meets the State ownership requirements.
 - a. If State ownership requirements have been met, the Bureau's or Forest Service's authorized officer will issue written authorization to the claimant setting forth the terms and conditions for gathering the animals. The Bureau's and/or Forest Service's authorized officer and the Board's representative may participate in and supervise roundups directed by the Bureau or the Forest Service to assure compliance with State laws and regulations.
 - b. If State ownership requirements have not been met the Bureau's or Forest Service's authorized officer will advise the claimant accordingly and reject his claim.
- 3. After animals are gathered they will be inspected by the Bureau's or Forest Service's authorized officer and Board representative, and upon satisfaction of ownership and a determination of any trespass charges, the animals will be turned over to the claimant. Unclaimed animals showing evidence of abandonment such as unregistered brands, tattoos, or tags will be turned over to the Board's representative to be handled under State estray procedures. Wild and free-roaming animals will be returned to the open range.

Appendix 12, page 6

2261--14

C. DISPOSAL OF ANIMALS

Pursuant to the Act and regulations, the Bureau or the Forest Service may direct the disposal of animals. Prior to disposal, the Bureau and/or Forest Service will consult with the Board regarding disposal of animals except in acts of mercy requiring immediate actions. The Board will review any proposed disposal and make recommendations concerning the method of destruction and the method of disposing of destroyed animals, in accordance with State laws concerning humane treatment of animals and public health and sanitation.

Horses or burros known to be infected with certain communicable or infectious diseases such as "swampfever" or "sleeping sickness" will be disposed of in the most humane manner after consultation with the Board or its authorized representative. In the event of potential disease epidemic in a wild horse or burro herd, the Bureau and/or Forest Service will consider recommendations and guidance of the Board to minimize the potential and to dispose of the infected and exposed animals.

D. VIOLATIONS; ENFORCEMENT

In the event of alleged or known violations of the Act, the Bureau and/or Forest Service will contact the Board to validate the ownership status of the animal(s) involved according to the criteria set forth in this agreement. The Board may be requested to assist in enforcement proceedings where wild free-roaming horses or burros are involved.

E. PROPERTY DAMAGE

The Board may be requested to assist in investigation of alleged property damage inflicted by wild freeroaming horses and burros. Assistance will include, but may not be limited to, establishment of the ownership status of animals.

V. ADMINISTRATIVE MATTERS

A. ANNUAL MEETING

The Board, the Bureau and the Forest Service will meet jointly at least once annually to discuss matters relating to the planning, coordination and implementation of the Act and Regulations pertaining to management of wild horses and burros on or affecting Bureau or Forest Service administered lands and provide for other meetings as necessary.

B. OTHER AGREEMENTS

The local representative of the agencies may enter into supplemental or specific agreements to accomplish the purpose of this agreement.

C. SUBJECT TO EXISTING LAWS

Horses and burros will be transported from Bureau administered lands in accordance with rules and regulations of the Board and the Bureau, and from National Forest System lands in accordance with rules and regulations of the Board and Forest Service.

D. FUNDING OBLIGATIONS

Nothing in this agreement shall be construed as obligating any party hereto in the expenditure of funds.

E. RESTRICTION OF CONGRESSIONAL DELEGATES OR RESIDENT COMMISSIONER

No member or delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this agreement, or to any benefit which may arise therefrom.

F. DISCRIMINATION

All cooperative work under the provisions of this agreement or supplemental agreements or memorandums of understanding will be accomplished without discrimination against any person because of race, creed, color, sex or national origin.

> ED No. 2 10/24/73

Appendix 12, page 8 2261--16

G. TERMINATION

This agreement shall become effective when signed by the designated representatives of the parties hereto and shall remain in force until terminated by mutual agreement, or by any one or more of the parties upon 30 days' notice in writing to the other party or parties of such intention to terminate upon a date indicated.

Amendments to this agreement may be proposed by any party to the Agreement and shall become effective upon approval by all parties.

IN REPLY REFER TO

4700 (D-330)

United States Department of the Interior

BUREAU OF LAND MANAGEMENT DENVER SERVICE CENTER DENVER FEDERAL CENTER. BUILDING 50 DENVER. COLORADO 80225

APR 1 9 1974

Dear Sir:

The Bureau of Land Management is soliciting cooperative research contracts with research institutions interested in conducting investigations of wild, free-roaming horses and burros.

Our research informational needs for both horses and burros are enclosed. However, we are limiting our research efforts to horses at this time, in the following priority areas:

- 1. Biological and Physiological Needs.
- 2. Population Dynamics.
- 3. Competition with Other Animal Life.

Your Departments of Range Science, Wildlife, Zoology, Agriculture, Biology and others may be interested in developing cooperative research contracts with the Bureau of Land Management to provide the needed information.

Would you please bring the enclosed to the attention of those who would be interested.

Sincerely yours, Director, Denver Service Center

United States Department of the Interior

BUREAU OF LAND MANAGEMENT DENVER SERVICE CENTER DENVER FEDERAL CENTER. BUILDING 50 DENVER. COLORADO 80225

Memorandum

To: Prospective Research Contractors

The Bureau of Land Management is required by Public Law 92-195 to protect, manage and control wild, free-roaming horses and burros on public lands. Reliable information is decidedly lacking on which a responsible program can be based. Through extensive interviews with government agency and research personnel, as well as others, the BLM has developed a brief listing of research information required to develop a biologically sound program of protection, management and control. This list of research needs is attached.

Your review of the attached listing of information requirements is invited. Your consideration of possible cooperative research contracts to conduct certain studies is solicited. At this time, the BLM is not prepared to finance a broad, comprehensive research effort, but will consider cooperative research contracts on the following high priority categories only:

- 1. Biological and Physiological needs (See Item A in the attached list)
- 2. Population Dynamics (See Item B in the attached list)
- 3. Competition with Other Animal Life (See Item D in the attached list)

If you are interested in conducting research in the above categories, please submit a project proposal to the above address attention: Dr. Floyd E. Kinsinger. At this time, partially due to budgetary limitations, we are soliciting project proposals only for wild, free-roaming horses. (Burros will be considered for additional research effort in the future).

If you submit a project proposal, it should be received by July 31, 1974. Research proposals finally selected for funding will not be initiated until July 1, 1975, due to the time involved in review, budgeting and obtaining appropriations. The proposal should be relatively brief but concise and contain, as a minimum, the following:

1. Title

2. Introduction

IN REPLY REFER TO

4700 (D-330) 1740 3. Justification and need (including probable duration)

4. Study Objectives (be specific)

5. Brief description of methods used to obtain data

6. Location

- 7. Proposed Annual Budget (include source and amount of cost-sharing funds expected from other sources, including the contracting research agency)
 - a. Salaries and wages
 - b. Travel
 - c. Operations
 - d. Equipment and Supplies
 - e. Overhead (indirect costs)
 - f. Publications costs
- 8. Brief biography, including significant publications, of the principal investigator(s).

It is anticipated that several high quality research proposals will be submitted. After careful review of all proposals, the successful contractors will be notified.

Any questions regarding the information contained herein should be directed to:

Dr. Floyd E. Kinsinger Denver Federal Center Bldg. 50 Denver, Colorado 80225

Research Informational Needs for a Program of Protection, Management, and Control of Wild, Free-Roaming Horses

I. Title - Wild Horses as Components of the Range Ecosystem.

II. Introduction - Western rangelands have supported a substantial population of feral horses for several hundred years. Passage of the Taylor Grazing Act in 1934 resulted in the first broadscale attempts to control overuse and destruction of grazing lands and provide for conservation of the natural resource values inherent in these lands. Well into the second half of the 20th Century, undomesticated horses running at large on the range were considered as undesirable trespass animals subject to partial or complete elimination in the interest of providing more water and forage for domestic livestock and wildlife. Public Law 92-195, dated 12/15/71, has completely changed this concept. Wild horses and burros have assumed the mantle of "living symbols of the historic and pioneer spirit of the West," to be preserved "as an integral part of natural systems of the public lands." To meet the requirements for control, protection, and management as authorized in P.L. 92-195, requires greatly expanding the fund of knowledge now available to resource managers. Studies to develop this information may be carried out in part as an "In-House" effort by Bureau employees. Other needs can best be satisfied by contractual research carried out by educational institutions, research agencies, or professional consulting firms.

III. <u>Research Objectives</u> - Listed below are topics needing additional study and research by educational institutions, research agencies, or recognized consultants.

A. Biological and physiological needs of wild horses to include:

1. Forage requirements including preferred vegetative types; preferred plant species; low preference survival species; a comprehensive list of all utilizable plant species.

2. Water requirements; daily watering habits; subsistence on snow; maximum travel distance to water under drouth conditions; use of water to influence animal movement and management.

3. Band composition and territorial requirements, i.e., habitat acres per animal; daily travel distances; seasonal migrations: tolerance to other bands of horses; tolerance to man's activities without losing wild, free roaming characteristics; need for buffer zones.

B. Population dynamics to include:

1. Reproductive rate; average breeding age; average life span; season of foaling.

2. Survival by age groups; colt mortality and causes.

3. Characteristics of non-breeding animals such as young bachelor bands and older solitary animals.

C. Predation and Disease:

1. Influence of native predators, particularly mountain lions on colts and juveniles.

2. Effect, if any, by coyotes or other predators on young or winter-weakened animals.

3. Evidence of disease, such as equine encephalitus, as a mortality factor.

4. Parasites and their role in disease transmission or direct loss of animals.

D. Competition with other animal life:

1. Degree of competition or compatibility with native big game animals.

2. Influence on habitat of small wildlife species.

3. Compatbility with domestic livestock at water holes, salt licks, or other areas of concentration.

4. Degree of overlap between wild horse and wild burro habitat areas, if any.

E. Environmental Influences:

1. Evidence of change in vegetative composition or trend resulting from horse use.

2. Effects of trampling at watering places or other site depleting activities.

3. Evidence of other than normal wear and tear on developed range improvements due to horse use.

4. Evidence of depletion of watershed from destructive grazing habits.

F. The contract should include a compilation and thorough review of literature, published and unpublished, with appropriate abstract of material applicable to management of wild horses on public lands.

IV. <u>Research Plan</u> - The contracting agency shall furnish a detailed plan and location for conducting a study of wild horses, including procedures and methods to achieve data needed for each of the objectives listed under Section III. Should the plan call for collection of specimens for autopsy or other purposes, it shall be the responsibility of the researchers to secure legal clearance and authorization for such action from the authorized officer.

Subsequent to such authorization, the Bureau and the Contracting Agency will jointly agree upon the number, place, and time of needed specimen collections with adequate record documentation in each case. In addition, if telemetry, aerial surveillance, or similar procedures will be involved, the exact procedure shall be fully outlined in order to meet the anti-harassment and other provisions of PL 92-195 and PL-86-234.

V. Estimated Project Costs. In consideration of the plan and objectives of this study as outlined in the preceding sections, any individual or agency offering to conduct the study shall provide an estimated time and cost breakdown for completion of the project. The estimate shall provide a time frame for completion of the various phases with estimated costs on an annual basis. Costs shall be broken down as to:

A. Level and quality of manpower to be utilized.

B. Supplies and equipment needs.

C. Anticipated cooperative support in terms of manpower, equipment usage, etc., which may be required from BLM.

D. Any special requirements not included under (A), (B), (C).

Research Informational Needs for a Program of Protection, Management, and Control of Wild, Free-Roaming Burros

I. Title - Wild Burros as components of the Range Ecosystem.

II. Introduction - Feral burros are found principally in the desert rangelands of southwestern United States, but occur locally in small groups or bands in most of the other western states as well. They are believed to be descendants of animals brought into Mexico and the southwest by early-day Spanish explorers, augmented by pack animals which were abandoned or escaped from miners, prospectors, and sheepherders during the past hundred years or longer. Generally, they have been tolerated or even regarded with affection by westerners, excepting instances where excessive populations resulted in conflict or severe competition with ranching interests, recreational developments, or endangered wildlife populations. Reduction or elimination of animals under these situations led to the first protective legislation enacted in California in 1953. Now, under the provisions of Public Law 92-195, burros will receive full protection in all areas where populations existed as of December 15, 1971, The Bureau of Land Management, as one of the the date of its enactment. agencies charged with administrative responsibilities under this law, will require much more detailed information than has heretofore been available about the burro and its habitat. Some of this can be acquired in the course of regular operational programs. Other needs must be filled through contractual study and research carried out by educational institutions, research agencies, or professional consultants.

III. General Research Objectives.

۰.

A. Biological and physiological requirements of wild burros to include:

1. Forage requirements; preferred range types and plant species; a comprehensive listing of all plants used, including low preference survival species.

2. Water requirements under normal and drouth conditions; distances traveled to and from water sources; use of water to influence animal movements and management.

3. Habitat limitations as related to extremes of climate, elevation, shelter and other factors. Appendix 13, page 8

4. Social characteristics relating to such things as group association, territorial requirements, if any, others.

B. Population dynamics:

1. Reproductive rate, average breeding age and life span.

2. Survival data by age groups, colt mortality.

C. Predation and disease:

1. Predators as a limiting factor on population growth, distribution patterns, etc.

2. Losses due to disease or parasites.

D. Competition with other animals.

1. Degree of competition or compatibility with other native animal and bird life with special reference to bighorn sheep.

2. Compatibility with domestic livestock, competition for use of water or salt.

3. Overlap, if any, with habitat of wild horses.

E. Environmental influences.

1. Evidence of changes in vegetative composition or trend due to burro use.

2. Determine the degree of site deterioration due to trampling; destruction of water developments or range improvement structures; depletion of soil or vegetation from destructive grazing use; other watershed influences.

F. Compilation and review of literature, both published and unpublished with appropriate abstract of material applicable to the protection and management of the burro and its habitat.

IV. <u>Research Plan</u> - The contracting agency shall furnish a detailed plan and location for conducting a study of wild burros, including the procedures and methods to be used in reaching the objectives listed under part III. If the study plan requires capture or collection of specimens for marking, autopsy, or other purposes, it will be the responsibility of the contracting agency to secure legal clearance and authorization under provision of State or Federal law.
