As the vegetative and watershed resources show that corrective management measures must be undertaken, several actions were made. Domestic livestock numbers were reduced, intensive management plans for domestic livestock grazing were initiated, habitat plans for wildlife are being developed and multiple-use management plans are being developed. Until the plans can be implemented further, resource damage needs to be held to a minimum.

Horse & Burro Population  
Management for Herd Management Areas

	Burros <u>110</u>	<u>1,320</u>	<u>81</u>	<u>972</u>
	Horses 1,715		2,720**	

\*This area contains a large number of animals that are domestic and the large number to be removed will be all domestic until we are assured that the minimum population of wild horses are maintained then wild horses will be excess.

\*\*All areas have an undetermined number of private animals so the number of animals to be removed does not represent wild horses in total.

New Years Lake Herd Management Area
