

New Haven Oct. 12, 1888

My Dear Nellie:—

Your letter was gladly received. Tell the boys that I should be most happy to receive the samples of silver ore both for the cabinet of the college and for my own collection, and that we should be very greatly obliged to him for the same.

Am glad you didn't wait for me to write, I have been "dreadful busy" and am still so though my lectures are not yet commenced.

Of course we have calls to

make & calls to receive
which take much time
& then my microscope (which
is a splendid one) & other
work occupy me constantly.
Flora is very well
and sends love to you
and the children. She
says she meant to have
written to you in this

I will write again soon,
My love to the little sisters

Ever yours

A. E. Kerrill

P.S. Please excuse my
paper & envelope as I
am at the laboratory where
I can find no better

My Dear Nellie: --

Your letter was
gladly received. Tell
the Coln. that I should
be most happy to re-
ceive the samples of silver
ore both for the Cabinet
of the College and for my
own collection. and
that we should be very
greatly obliged to him
for the same.

Am glad you didn't
wait for me to write.
I have been "dreadful
busy" and am still so
though my lectures are not
yet commenced.

Of course we have calls to

make & calls to receive
which take much time
& then my microscope (which
is a splendid one) & other
work occupy me constant-
ly. Flora is very well
and sends love to you
and the children, she
says she meant to have
written to you ere this

I will write again soon,
my love to the little sisters

Ever yours
A. E. Verrill

P.S. Please excuse my
paper & envelope as I
am at the Laboratory when
I can find no better
