

Office of Carson Daily Appeal.

Carson City, Nevada, Jan 26 1865

Dear Brother Addison—

Enclosed is
an editorial article from the
Carson Appeal in relation to
the "Dew's Inaccountable" which
I sent you. You will see that
I have taken the liberty to
use your name in connection
therewith. The article has been
copied in several of the papers
of this State; which fact shows
that there is considerable
interest felt in the matter.
Indeed Black Rock ores still
continue to puzzle our
miners and scientific men;
and whoever may solve the
problem of working them will

achieve one of the greatest
discoveries of the age. One
Isenbeck has long pretended
to know a process by which
they can be reduced; and he
has, no doubt, succeeded in
procuring some remarkable
"Inspects" from them. If you
have ever caused a second
analysis of the "black wax"
I should like very much
to be made acquainted with
the result; and not only the
result but the process adopted
to secure it - if favorable.

It has just occurred to me
to mention Senator Stewart's
Bill providing for a National
School of Mines. I suppose that
Bill will become a law in some

shape; and as it provides for the
location of the said school at
some point west of the Rocky
Mountains, and as it contemplates
the employment of a Professor
to act as its Principal, I
thought that with your consent
I would mention your name
to him as a suitable person
to fill that place. What do
you think of it?

By the way, I met, some
days since, Prof. King, the
chief of the Scientific Survey
now being conducted in these
parts under Government. In
the course of my conversation
with him I mentioned your
name, and he spoke of you
as one of his old and

intimate acquaintances. He
has lately been having some
photographs taken of the
interior of the Cornstock mines,
by aid of Magnesian lights.
If I can procure any of
them, I will send you some.
I have some shells and bugs
which I will send you very
soon.

Nellie and the baby are
in excellent health; and
the youngster grows like a
weed. We tried to get his
picture taken the other day,
but he proved too uneasy.
Will send you a likeness of him
as soon as we get one. Nellie
joins me in sending love to
you and Flora and Mattie.
Yours paternally
Henry R. Hughes
