

We have received a very favorable report on this property and can heartily recommend it to our clients as a safe and profitable investment. We believe it will prove a big money-maker for stockholders if bought at the present low price of 50 cents a share—par value \$5.00.

We have an allotment of only 50,000 shares available at this figure and it will be necessary for you to send in your subscription at once if you want to get in before the stock advances. Terms: 5% discount for all cash; or one-fifth down, balance in four equal monthly payments.

Below is proof of an advertisement which will appear in all the big city dailies of the country on April 13th and 14th.

THE WALLACE H. HOPKINS COMPANY
151 La Salle St., Chicago, Ill.

A \$5.00 STOCK AT 50¢

In a Company Headed by Governor Sparks, Owning 995 Acres 50 Claims—of Marvelously Rich Copper-Gold Ore in the World Famous Goldfield-Tonopah-Yerrington Money Belt.

We Have a Proven Mine, with the Ore Sacked Ready for Shipment. This Means to Every Investor Big Dividends in the Near Future.

HON. JOHN SPARKS,
Governor of Nevada and President of the Nevada-Goldfield Mining, Milling and Smelting Co.

HERE is a straight, honest, clean-cut mining proposition so thoroughly safe and with such an absolute certainty of big profits to stockholders that you simply cannot, in justice to yourself, put one single penny into any investment until you first investigate this opportunity. This property is so good—so extensive and with such a wonderful showing of proved ore values—that the Governor of Nevada, the richest mining State in the Union, after a full, personal investigation, accepted the Presidency of the Nevada-Goldfield M., M. & S. Co.

THE MINE.
Showing Entrance to Tunnel, Giving 1,000 Feet Depth on Vein at Our "Home Base" Claim at Yerrington.

John Sparks, Governor of Nevada and the active, responsible head of this Company, has lived for many years right in the heart of the mining region. He knows the "ins" and "outs" of mining like a book. He knows the difference between a "prospect" and a proven mine. He knows the distinction between honest, legitimate mining, carried on as a business, and the "wildcatting" and "stock-jobbing" of irresponsible "promoters." Here's

WHAT THE GOVERNOR SAYS:

"I would never have accepted the Presidency of this Company unless I believed in it thoroughly. I consider this 50-cent stock—selling for limited time at 50¢—the greatest opportunity offered investors in many years to make a fortune in legitimate mining. It is my honest opinion that those who are fortunate enough to buy shares now at the bottom price will run rich profits within the next few months."

This is entitled to the respect and confidence of every thinking man or woman who has a little money to invest in a safe and profitable enterprise. It is the statement of a honest man, Chief Executive of one of our greatest States. Can you find, anywhere, at the head of a mining company, a man whose word carries more weight or whose official standing gives you a better guarantee of protection?

CAPITALIZATION.

This Company is conservatively capitalized at \$5,000,000, divided into 1,000,000 shares, par value \$5.00 each. In view of the immense acreage and the millions of tons of ore known to be in the 50 claims held by the Company, a capitalization of \$30,000,000 would not be inconsistent. There is no preferred stock or bonded indebtedness. All shares are common, non-forfeitable and non-assessable, carrying no personal liability. There are 400,000 shares of Treasury Stock. We offer 200,000 shares, par value \$1,000,000, for the purpose of raising money quickly for development work on a large scale. The first allotment of 50,000 shares will be sold at 50¢.

As this unusual offering of a \$5.00 stock in a proven mine at 50¢ will no doubt cause a large over-subscription on the first allotment, we reserve the right to return all applications received after the first 50,000 shares are subscribed.

OUR PROPERTY

We have 50 claims—about 995 acres—in the Goldfield-Tonopah-Yerrington general zone, which makes our holdings among the largest in the entire district. In the big 8½x11 prospects we have prepared fully describing our entire proposition, we show four large maps giving the location of all our groups of claims. Send for this beautifully illustrated book. It is the most complete mining prospectus ever issued.

At Yerrington on the Walker River (which passes within 100 yards of our property), our "Home Base" group is right next to the famous Storage mine, whose value is placed by experts at over \$2,000,000.

Immediately surrounding our "Home Base" mine are the "Dyer," "Bluestone," Ludwig, Nevada-Douglas and Malachite mines with estimated values ranging from \$50,000 to \$40,000,000. We figure conservatively that we have at least 10,000,000 tons of ore in the "Home Base" mine—enough to insure enormous dividends leaving out of consideration our rich holdings of hundreds of acres at Lida, Liberty, Goldfield and Tonopah.

REPORTS OF EXPERTS.

Probably no mining company in the country has had the benefit of a more careful examination of its properties by experts of high standing.

Our Consulting Engineers, Mr. H. H. Hunter and Mr. E. E. Stewart are men of recognized ability and broad experience. Mr. Hunter has had thirty years' experience, and is acknowledged one of the best Copper Experts of the

Showing a Large Tonnage of High-Grade Ore Sacked Ready for Shipment.

country. He has a large clientele, among whom may be mentioned Col. O. P. Posey, Senator Odde and other large operators of the Nevada-Copper-Idaho in his judgment. Mr. Hunter personally supervised several of the most productive leases that have been operated in the district. Mr. Stewart has had over twenty years' experience, from Alaska to Mexico. He was consulting engineer for the largest English syndicate operating in Alaska. Well known by mining men throughout the country as a very conservative man.

Mr. W. J. Knox, M. C., was for fourteen years chief metallurgist for George Washington. He is the inventor of the Electro-Magnetic process for the concentrating of per cent. Acknowledged to be one of the best copper men of the country today. He has prepared an elaborate treatise on the treatment of our ores, showing conservative cost and profits.

All three of these acknowledged authorities have made reports on our property. If you will be glad to send copies to you free of charge.

NOTE—The Western Assay Co. of Denver made a number of assays of 250 tons from our various properties at different levels and reported an average value of 11.3 per cent copper. Many of the world's greatest copper mines that have paid millions in dividends produce ore that assays only from 3 per cent to 7 per cent copper.

REMEMBER

This is a \$5.00 Stock at 50¢ and you buy an interest in a real mine. If you want to "gamble" and care nothing about the safety of your money, you had better buy stock in a "paper mine"—a mere "prospect"—at from 5¢ to 20¢ a share.

OFFICERS AND DIRECTORS.

President—Hon. John Sparks, Governor of Nevada; Carson City.
Vice-President—John H. Reinger, New York City.
Secretary—W. T. Watson, Goldfield, Nev.

DEPOSITORY.

State Bank and Trust Co., Goldfield, Nevada.

MINING OFFICES.

Goldfield and Yerrington.

QUICK DIVIDENDS.

Investors are going to get surprisingly quick returns on their money. Remember, this is already a proven mine. We have the ore sacked ready for shipment. As rapidly as money comes in on stock subscriptions a large force of men will be put to work, other claims will be opened up, machinery installed and the active work pushed with all possible energy. The fact that Hon. John Sparks, Governor of Nevada, is at the head of this Company, gives you every guarantee that the property will be developed solely in the interests of the stockholders.

SPECIAL NOTICE.

We advise you to send in your order for the 50¢ shares. The allotment of 50,000 at this initial price is going to be quickly snapped up by wise investors who know that this is a \$5.00 stock, worth to-day every penny of \$2.50 a share. The safest plan will be to wire your reservation of stock and let remittance follow by first mail.

Redoubt Plant Where Our Ores Will Be Milled. Now in Operation at Goldfield. Capacity, 400 Tons Per Day.
