Nov. 15 08

Dear Chas:—

I wrote you some time ago but do not know if you recd. my letter or not.

I do hope you have been well. and hope you will write me a good long letter, and tell me all of the news in general.

Well Chas. I have a little bad news to tell you if you do not already know it.

Allen wrote that our permit for Parnville was N.G. Will you tell me all that you know about it? and also what Nick said when you talked with him. What did he say in regard to our work and survey.

I had great hopes of getting a big company into it and put up a large plant. but now it seems we have lost our rights even to put in a small plant for Elbo and that was an easy matter to get that money but what I wanted to do was to generate close to 5000 H.P. and it would have been a gold mine, a better Parker had written to a large co, and

they were waiting for more water
measurements! After I left I wrote
to Harry Jones and he & Allen went
out and put in mine to get the
required measurements during the
low period, and I have kept a record
up until now and expected to have
it all ready but it seems as if we
did not live up to the law. If you
know what was expected of us aside
making sunny & water measurements will
you let me know as soon as you can,
We could not put in a plant until we
knew how much water was there and
something seems very strange. I
was under the impression that we did
not have to start work until we knew
what kind of a plant was required & we
could not tell that until water was
measured. Please tell me all you
can in regard to what Nick said about
starting work.

What done for the time and will
tell you all about the place in my
next.

Tranquilly,

B. G. McD.

Moenie, Arizona.
