

After 5 days, return to
ELKO LUMBER COMPANY,
ELKO, NEVADA.

Mr. C. M. Sparks,
Reno,
Nevada

W. H. S.

May 20 th. 1911.

Dear Chas:-

Arrived here just in time as they were having a great time with the septic tank and I had to fire half of them and have not had a minute to turn around.

I asked Ethel to send the notes to you and hope they get there as I did not know the address so please send it to me when you answer this.

Please tell Lee that the contract for the jail at Wells was let to the Mc Ginty Bros. of Elko and that they are to have two steel sells and he may stand some chance to sell them the sells if he will write to them I would see them for him but I do not stand very well with them and it would be better for him to write and not mention my name at all.

I am sending Miss. Collins the money for the application in this mail and I hope she can file on the new one and not have any one ahead.

Will you please ask the Overland people to send my mail here the next time you are in there.

Since I left here F.J. Siebert, engineer for Wingfield told a party that they would like to get the Lamoille power for Buckhorn. ^{Siebert,} He told him in confidence but as he was interested in our getting a plant out there and he was going to look at the notes as soon as I get them in shape and take some stock he said he wanted to tell me. So you see we may be able to get them to take all of the bonds. I thought I would tell you but be sure and dont mention a word about it as they may know where it came from. I will not tell a soul about the figures untill I hear from Miss. Collins and see if we can get in a new application.

Must close for this time and write a dozen other letters.

Fraternally yours,

B. G. M
