December 2, 1925

Mr. Robert A. Allen, State Engineer  
Carson City, Nevada

Dear Robert:

I am inclosing a few bills for presentation to the Board the beginning of this month if possible.

The Cooperative Snow Surveys matters in the South are progressing rapidly and favorably. Los Angeles is now asking for complete details to start the snow survey in full speed next Spring.

When you have time, let us have a conference on the Humboldt and Pyramid and the Comparison of the last Forecast with the run-off. It is very good on the east Slope of the Sierra, but demonstrates the absolute need of detailed knowledge of the Humboldt and further knowledge of the snow line on the west side of the Sierras.

With best wishes,

P. S.: Please send me another package of ordinary claims blanks.

J.E.C.
