Clothing.

Kahn's coat & suit.

Rabbit skin blouse.

Winters & gloves.

5:45 p.m.

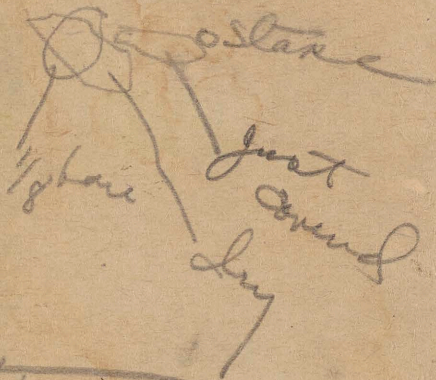

Water risen  
at all stages  
 $\frac{1}{4}$  inch.

Placed dry  
stone by east  
stave.

becca

in rocks, by <sup>21</sup> stake

~~Book~~

6 p.m.  
large rock  
with small  
stone on top.

Sail at 11 foot  
out. Stone at

N.W. end just under

White's Cave

12:00 M.

Water (according to south rivulet) has recently been higher. Have placed stakes at either edge of wetted sand and one <sup>marked</sup> center one, at present level of rivulet.

Two other stakes to west - Tall one with fragment of wood at top is notched at present high water level.

Long one to east (5 feet away near bank) between large stones at present water level.

Note - yesterday cloudy but windy - Today (Sunday) sunny. Clouds few - air cool.

rough on water.

Pictures for Mr. L. D.

Galena Creek (upper middle)

10 am.

Tras tions - set.

Two cuts for max. + min.  
height of water in pool -  
high water mark on tall plate  $9\frac{1}{2}$  in.  
Stream has recently been  $1\frac{1}{2}$  - 2  
in. higher, to judge from <sup>range of</sup> rocks still  
wet. See marks made by pencil  
on rocks & plates.

Stone laid here.

11 p.m.

Water-fallen  $1\frac{1}{4}$  -  $1\frac{1}{2}$  in. below  
but high + low same cut marks,  
Little horizontal plug projecting from  
rock is just visible at high water

Sunday - (Sat. credit windy on Mt.)

Galena Creek (lower meadow)

10:30 - a.m.

Two water level fluctuations of water  
Pit on S. side of gulch. Highest  
water crest 4 inches

---

Second Series (one notch & at high crest)

in still water & rest.

---

P.S. No markings on stone of a higher  
level yesterday or today. Perhaps  
other markings in upper meadow  
& Jones Creek are capillary.

---

5 P.M. No apparent fall  
change in level at either stones
