

White's Creek Set 6:48 am (cont.)

Water just creeps at high crest  
over the  $\square$  plug west of square  
plug under the bank.

Was the former  $\square$  set lower  
than the other? Other is high in  
the sand.  $\square$  seem to have been  
silted over in deep silt.

Bottom of stream at West Store  
is now surface from surface  
Silt deposited near store may have  
changed an orig. estimate of  
depth of stream

13 - Further measuring  
would indicate that  
the inch of fall noted  
is suffic. to account  
for ~~drainage~~ empty  
overflow bed.

Use West Store as standard  
of measurement.

Silt, silt  
inch.
