

- Problems -

1. Determination of
humus potential of
(a) meadows, etc.; of
(b) snowbanks.
2. What is the character of
the continental (Plateau High)
High over the Great Basin
in winter? See W. P. *Apr* 1908
p. 101.
3. Relation of Snowfields to
snow drifts - as regards
durability, amount of precipitation,
etc.
4. Is the rate of flow of water
less following a period
of average ^{light} fall of
snow than an average
heavy fall?

Mountain Observatories

Weather Review April 1908

p. 102 The Observatory
on Mount Etica.
