

Timber and Susia.

Data recomputed and arranged for formation of various tables. Without assistance, this MS will proceed very slowly.

Temperature Survey and Frost.

Work of last year continued. Winter killing.

Frosts - 24°F. 27°F. Peas, plums, apples. Low temps required. {Harvard, Job Taylor. Little effort in this critical season.

Shame that nothing was attempted late season, but frosts also late. Public should be convinced of the desirability of attempting cooperation - & save at least the family orchard.

Recl. Service considering. Univ. Regents also. Funds \$150 present year. Forest Serv., Canada, etc.

Need of contin. leadership in work to round out facts already well founded but not finished.

The work will go on. J.E.C.

Temp Survey & Analysis of data

Coif - Publ - Reprint Sec. Parliament Sci. Cong.

Soil + Topog. light for others. Coif. Panl. in dry reservoir. In physical camera only photo.
