This run-off is mainly

Consequently, since the cap. of the
soil ^{only} in the immed. vicin. of the
snow fields ~~is~~

In fact, } as the base of the mountain
will } ~~*~~

the soil below the ~~is~~ higher
snows is dry throughout the winter
and its melting run-off is
aided but little by the moisture
in the soil near the base of the mts.

The apparent lack of channels is shown
in the following brief table
