

THE METALS EXPLORATION COMPANY

1213 HOBART BUILDING, SAN FRANCISCO, CALIFORNIA

October 27, 1923

Dear Dr. Church,-

I have not heard from you since I expressed the bound MS to you, but I trust that it reached you safely.

You will see that I am again with the Metals Exploration Company. Two weeks ago the company called me up and asked if I would return to them. There has been an entire reorganization, and very few of the old officers are left. The present management looks very good and very likely things will go very well from now on. I agreed to return to them and am on the job once more. However, should things develop so that I would be needed in the south for snow survey work, I might consider it, for the mining industry is very unstable.

I hope things have gone well for you and that California will consider the need of snow survey work.

I have a small amount of time to turn in to you, together with one month's rental of typewriter (which receipt I have been holding for quite a while). I am attaching a list. Please do not pay this out of your own pocket. Let it take its course.

With kindest regards, I remain,

Respectfully yours,

*Edgar*
