

The "cold snap" of Jan 6/13 was borne
into the valley from the NE. The temp of -6°F .
at Church's, Plumb's, and Glenn's seem
to have been identical; at Clark's, however,
the temp was only -2° and at Kioux -3° .

In Southern California, the temp. were
low everywhere, only a few spots having moderate
temperatures.

It is true that all slopes here will suffer
almost equally during killing frosts; however,
the "inversion of temperature" will affect only
the lower levels.
