HAS ARRANGED SEVERAL GAMES

Manager Taylor Is Considering Suitable Names for Football Coach

Football Manager C. C. Taylor has been corresponding with the California Universities, and other schools and athletic clubs on the coast and has succeeded in arranging a series of games almost similar to those of last year. He has asked for a game with the Sheiman Indians on some date before Christmas, and, if they are willing to accept his terms, a game will be played. The faculty desires to have the University renew its athletic relations with the University of Utah, and Mr. Taylor has begun negotiations with a view of securing a game. It is not known whether his efforts will prove successful as Utah has shown no desire to meet us on previous occasions.

Mr. Taylor has been attempting to secure a man who would coach all branches of athletics. Football coaches can be obtained without much difficulty, but the financial end of the matter must be decided upon first. A large applications for football coach have been received, but the abilities of the various men will be considered before a final selection will be made.

FACULTY EXAMINES DINING HALL SITE

After all the business had been transacted in the faculty meeting held yesterday, the members examined the proposed sites for the new dining hall. The advantages of each location were considered, and various suggestions were offered. The members of the faculty desired to become acquainted with the different sites, and a tour of inspection was decided upon. It is expected that the space of ground the dining hall will occupy will be determined within the next few days.

Chicago University has arranged a correspondence course in banking.

The Record has the college news.

NEW HORNS FOR VARSITY BAND

Leader Hastings Is Expecting Arrival of Instruments Daily

Walter Hastings leader of the band, after an absence of about two months during which time he has been attending to his duties in the legislature, resumed his duties last Monday. Mr Hastings has ordered the new instruments for the band and is daily expecting their arrival. The new horns will all be silver plated and when they arrive the band should present a very natty appearance. It is the intention of the band to give a dance in Sparks about the 26th of this month. The proceeds will go toward the purchase of music stands, new music etc.

In an interview Mr Hastings said: "I have taken a great deal of interest in the band since I took charge of it two years ago and I shall try before the end of the semester to make it a very meritorious organization. I will not be with them next year as I intend to move, with my family, to Berkeley this summer and make that my future home." The members of the band are sorry to lose "Mike" as he has proven a very efficient leader and has brought the band up to a very high standard.

The Crucible Club met last evening in the Chemistry building. Mr. Robt. M. Price read a paper entitled, "Alaska during the rush to the goldfields."

The try-out for the debating team to represent the Freshman English class was held Monday and resulted in the selection of the following: J. D. Leavitt, Geo. Commons and Isabel Miller. They are now out with a challenge to debate any team in the University.

Professor Gordon H. True, director of the experiment Station, departed for Lovelocks a few days ago for the purpose of carrying on work connected with the department. During his sojourn there he will measure several wells, and endeavor to advance the work of irrigation.

UNIVERSITY IN PUBLICSCHOOLS

Drs. Kennedy and Adams and Prof. Weir Visit Public Schools

Drs. Kennedy and Adams recently attended a County Institute of Douglas County at Gardnerville. Dr. Kennedy lectured upon Nature Study and the advantages of actual contact with things instead of books. The result is that the pupils of the Gardnerville school have enlisted the interest of their parents and are fixing up the grounds and planting flowers and trees and the ideas suggested by Dr. Kennedy have gone abroad like winged seeds among the people of Carson Valley.

Dr. Adams, professor of Education, lectured several times upon the methods of teaching. As a result, the teachers of Douglas County have organized into a reading circle for the purpose of carrying on professional reading and the reading of the best books, meeting at such times as they can during the year.

Professor Wier has delivered her admirable lecture on "The Goal of the Golden West" at Wadsworth Battle Mountain, Elko and Wells. The lecture was received very cordially at all of the places. Besides this, Miss Wier had the opportunity of visiting the schools at all of these places, talking upon her special subject, history, and giving suggestions as to how the work could best be done. Furthermore, she conferred with the parents respecting the education of their children and the advantages which the University of Nevada offers them.

There will be a hardtimes party in the gym next Friday evening. The students will wear their old working clothes and be ready to have a real good old time. The committee that has the matter in charge intends to give prizes to the best personifications. Judging from the hardtimes party last tree planting day the one tomorrow evening should be a howling success.

The English Club met last evening in room 6.

SECOND TRYOUT FOR DEBATERS

Team to Meet San Jose Normals Will Be Chosen Next Wednesday

There were no contestants at the tryout which was posted for Tuesday night last week. It has been decided to select the team to meet San Jose from a match debate between certain speakers picked from the Student Body and a team chosen from the freshman composition class. The debate will take place in Room 6 next Wednesday evening. The question will be the same as has been submitted to the Normal. The sides will not be picked until next Tuesday noon. At that time J. S. Case for the team from the Student Body and T. F. O'Brien for the Freshman team will meet and draw lots for their respective teams. The team from the student body is composed of J. W. Wright '05, Emily Berry '05 and M. B. Kennedy '06. J. D. Leavitt '07, Isabel Miller '08 and Geo. Commons '08 are the members of the freshman composition class.

IMPORTANT MEETING OF BOARD OF REGENTS

An important meeting of the Board of Regents will be held next Saturday forenoon. The proposal of an old alumni that the students be compelled to wear their uniforms at all times will be finally settled. This question has caused more discussion among the students than any one that has been considered during the last few years. Everyone is anxious to learn what the decision of the regents will be in regard to this question.

A large number of bids for the construction of the metallurgical laboratory have been submitted. They will be opened next Saturday, and the Regents will name the successful contractor. Other questions of equal importance will come up for settlement.

The regular meeting of the Alpha Beta Literary society will take place in Room 6 next Saturday evening.

Thursday, April 6, 1905

Editor Today John S. Case

We print today a clipping from the Carson News relative to the removal of the University to the Capital City. This in itself while not of serious moment has a certain importance in the demonstration of the fact that the first tap of the death knell of the gambling element in the State of Nevada sounded when the present gambling laws were passed:— and that the knell is rapidly being augmented.

The disastrous blow on the attendance of the University dealt by the reputation of Reno can not be disputed and under present conditions it would seem that any city or town in the State which could offer conditions friendly to the growth and development of the University would be justified in seeking to receive it. Business men of Reno are awakening to the fact that the unrestricted game, while it creates a momentary stir in business; while there is a churning of the water near the propellers, yet a more than countermanding effect is felt in the long wake of an evil reputation. This is a characteristic question from the business men of Reno who advertise in the Student Record, "whats the matter up there on the hill, seems like there's a great many less students than a few years ago. We used to do considerable business with students and now while we still get our share yet there don't seem to be so many."

The falling off in the attendance of the University and the not groundless pretensions of Carson are things which will have their effect in molding the opinions of the

citizens of one section of the State; Reno.

**PECULIAR FORMATION
 IN WESTERN SIERRAS**

The Western Sierras contain a distinct picture, figuratively speaking, of a California bear. It is plainly discernible from most any viewpoint on the campus. A peculiar formation of the snow and trees form this amazing spectacle. The eyes and the nose and the outline of the cheeks are made by clumps and rows of trees. It is hardly possible that the picture will be observed unless it is first pointed out by someone with a knowledge of its location.

Anyone possessing the fruitful imagination of Pagans could very soon attribute a reason for the phenomenal sight, just as the ancient Romans, when they chanced upon a rock having the appearance of a weeping woman, explained it in the story of Niobe, or as they accounted for the hue of the negro in the story of Phaethon. However, as we have not that happy faculty and if we had the usage of this enlightened age would hardly permit of our indulging in such fancies, the curious reader must be satisfied with the explanation afforded above.

Next Friday the men and women of the university will gather and perpetuate the customs of University Day, and what customs could be more fitting on that day than the planting of trees. Out of our love for the University and her customs comes the desire to see her beautiful and inviting.

The beautifying of the campus is a task fraught with systematic work and care. From the simple planting of the twig results the growth and development of the tree unaided save by nature, a fact common to other universities, is being part of an old river terrace,

not so with us. Climate, the condition of the soil, the campus are not favorable to vegetation. But the determination of the Nevada will overcome these difficulties. Each year through our custom we will plant trees and our efforts of last year were not in vain and out of it will come our Alma Mater of the future beautiful to behold.

Mention THE STUDENT RECORD in your dealings with the business men who are advertisers in the college paper. It is these men who make it possible to maintain this paper. Let them know their public spirit is appreciated.

Agitates Removal of the University

The Reno and Carson papers have created a discussion on the practicality of removing the University from its present site to Carson. A correspondent in the "Carson News" expresses his views on the subject as follows.

There is no levity in the movement to remove the State University from Reno to Carson. It is a most serious matter. There is a condition, and not a theory facing the State. The attendance at the University is rapidly falling off, in spite of the fact that it is strongly officered and strongly supported by the State. The reason for such decay can be found only in its location. The good people of Reno are just as good as any other good people. But they are victims of their prosperity, like any other people would be. It is not their fault that the town is infested with an element that no parents will permit their children to be by, if they can prevent it. A quiet place is the right place for a school, and a strenuous place is not.

When the structures at Reno were erected there was not enough money appropriated to do the work right, and the result has been a lot of patching. The buildings can be used for almost any purpose. They could be turned into a Monaco or a San Carlos, where people who so feel inclined could satiate their appetite for gambling. They could be turned into hotels. Reno always being short of hotels, The State would have no difficulty in disposing of them.

The water in Carson is pure, and there are several ideal sites for the location of the University grounds and campus. Parents would feel that their children were safe from all evil influences and associations in Carson.

Building, with all modern improvements can be erected here, and a large attendance would follow.

The question, it seems to be has resolved itself to a removal of the University or closing it down for want of attendance. When individuals are faced with such a condition in a mining town, they have to remove.

The Freshmen and Sophomores of the University of Idaho celebrated St. Patrick's Day with a rush that was of six hours duration. The last two hours were taken up with the removing of the Freshmen's shoes by the Sophomores. The peculiarity of the event was that there were no hard feelings on either side.

Baseball Players Out for Practice

Baseball practice was resumed yesterday afternoon after a lapse of several weeks due to the inclement weather. Quite a number of men turned out yesterday for practice. As baseball is the only branch of athletics that will be patronized by the students this semester, it is expected that much interest will be taken in the National sport. A series of games have been arranged with neighboring towns and they will be played in the near future.

The committee which was appointed to discuss the reseeding of the lawns met and decided on a plan which they believe will effectually solve the difficulties attendant upon the work. On the edge of each lawn a deep hole is dug and then filled with ashes. The affording a drainage for the whole lawn The work has commenced on one of the lawns in front of Morrill Hall and the results obtained will serve as a criterion for all future work which may be done on the lawns.

Yale has decided to put a pony polo team in the field this year. About twenty five undergraduates have organized and have leased the Elm City driving park and stables. Yale is now arranging a series of games with Harvard, Princeton and West Point; and will also play a series of practice games with such clubs as the Taconic club of Hartford, the Providence club and Troop A of New York.

Unique Topic for Chemistry Lecture

Professor N. E. Wilson of the Chemical department will deliver a lecture to the pupils of the Reno High School tomorrow afternoon on the subject: "Things and Then Some." He chose this unique subject, because he does not intend to delve into some of the special branches of chemical science. As his audience is composed of high school students, Prof. Wilson felt that a general discussion of chemistry would prove far more interesting to them. Milk, coal, petroleum and other subjects of a similar nature will be fully treated during the lecture. The lecture will be illustrated by stereoptican views. Prof. Wilson expects to confine his lecture entirely to these views, and will discuss each view as it appears on the curtain.

When Principal E. E. Winfrey made arrangements with Prof. Wilson, it was stipulated that the lecture should be given at the Reno High School. When his machine was returned a few days ago, he found that it was in a dilapidated condition. He informed Mr. Winfrey in regard to the condition of affairs with the results that the lecture will occur in the gym. The "Prof's" lectures are well known among the students, and on invitation is extended to all the students to be present on that occasion.

Students Organize Fire Department

The new chemical fire engine arrived Saturday and was duly installed. That evening a meeting of all the Lincoln Hall men was called and the organization of a fire company effected. The officers of the company were chosen from among the resident students and plans for fire drill discussed. The officers for the balance of the semester are as follows: Chief, A. H. Steckle '05, Assistant chief L. D. Skinner '06, Branch officers, C. A. Hart '07, and J. A. Champagne '07. Students stopping at Lincoln Hall will comprise the company. In order that they may become thoroughly acquainted with the methods employed in using an engine of this kind, drill will be indulged in occasionally, and it was even suggested that a fire alarm of some kind be turned in during the dead of night, so that the students might become accustomed to an emergency of this kind.
