LITERARY PAPER AT UNIVERSITY

**Nevada Will Have a First
Class Magazine Next
September.**

The journalistic field at the University of Nevada will be increased next year by the addition of a literary monthly. Several students have felt that the publication of a magazine that would truly represent the University students was a necessity, and their plans have developed to such an extent that they can state definitely that the new paper will appear next September.

When the Record changed from a paper that failed both as a literary magazine and as a purveyor of college news into its present form, it was expressed on all sides that the literary ability of the students was killed for years to come. The organizers of this new scheme recognize that the establishment of a literary monthly will place college journalism at the University on an equal standing with the other leading colleges of the country. They believe that the display of a little energy is all that is necessary to resurrect the literary ability that is now dormant.

The new journal will contain short stories, editorials and essays on various subjects. It will not attempt to invade the field now occupied by the Record. Its principal purpose is to fill a long felt want. It is not known who will be the editor of the new paper, although several names have already been mentioned for the position. It has been planned that the editor be elected by the students, and that any student is eligible to hold the office.

"Both Sides," a debating journal published by several eastern colleges propose to put a stop to quibbling by requiring each team to give a brief of their argument to their opponents and to each judge.

Next Monday Superintendent Brown will begin the construction of the cement walk, the bequest to its Alma Mater of the class of 1903. The walk will extend from the east side of Steward Hall to the west side of Morrill Hall.

MADE DEBUT IN MUSICAL CIRCLES

**Girls' Glee Club Appears
Before a Select
Audience.**

The Girls' Glee club, of the University, made their initial appearance in Reno musical circles last Tuesday evening at the entertainment given by the Kindergarten Association. The young ladies sang two numbers which were greatly appreciated by the select audience. The University should feel gratified that it is now able to be represented in musical as well as scholastic and athletic affairs.

The Girls' Glee Club organized this year, has been doing good work and has been seen in the Gymnasium on more than one occasion. Under the efficient leadership of Mrs. Layton they hope to make themselves a permanent feature of the student activities of our College.

The young men have also organized a Glee Club, directed by Mr. Merrill and though there may be keen rivalry between the two Clubs nevertheless it is hoped that they will not be found wanting when a united effort for the good of N. S. U. is needed.

It is rumored that the city is to be treated to a joint concert given by the two Glee Clubs this semester. If such is the case we trust our College's musical representatives will have as hearty sympathy from the University and town as did the Berkely Glee Club on their recent visit.

STUDENTS OFFICERS WILL BE NOMINATED

At the meeting of the Student Body next Friday the nominations of the different officers that will look after the interests of the Athletic association for the ensuing year will be made. The constitution provides that the nominations shall be announced one week before the election occurs, and the election will take place at the first meeting of the association in May.

Why don't you advertise.

WERE SUCCESSFUL AS GARDENERS

**Many Evergreens Were
Planted on Mountain
Side by Professors.**

Prof. and Mrs. J. E. Church, Prof. and Mrs. P. B. Kennedy, Dean H. Thurtell and Dr. R. Adams returned last week after having spent a day planting evergreens in the mountains east of town. After the members of the party had reached the snowline, they pitched camp and prepared for the work of the day. They decided that the lower side of a snow bank was the most suitable spot for the beginning of operations. One hundred yellow pines and the same number of jack pines were planted during the day. The soil in that locality was moist from the melting snow, and the day was an ideal one for work of this nature.

The place where the party camped is near the divide between Hunter and Alum creek canyon, and its scenery can not be excelled by another section of the state. Three or four visits will be made each year to this locality by the experiment station staff for the purpose of noticing how the trees have progressed.

The Board of Regents of the University will hold a session next Tuesday. Since Commencement week is rapidly approaching, and since there will be quite a change in the personnel of the faculty next year, the Regents will have considerable business of importance to transact.

The junior miners of Minnesota are enjoying the prospect of the regular month's work in the mines. They will leave about May 1 for California where arrangements have been made for their accommodation with some of the largest companies of Placer, Amador and Tuolumne counties.

The Associated Students of the University of California last Friday elected the following officers for next year. Prentiss N. Gray president, R. H. Elliott vice president, A. Salisbury Secretary.

STATION STAFF AT PARADISE

**University Professors Will
Hold Farmers' Institute
There This Week**

Dr. J. E. Stubbs, director of the experiment station of the University of Nevada, and Professors P. B. Kennedy, G. H. Trus, Peter Frandsen and S. B. Doten departed last evening for Paradise Valley Humboldt county, for the purpose of holding a Farmer's Institute at that place. A social session of the staff and the farmers of the valley will be held Thursday evening, and definite plans for the future sessions will be determined. Two meetings on Friday and three on Saturday will comprise the work planned by the experiment station. It was at the special request of the citizens of the valley that this institute was held. For this reason it is expected that the farmers will take special interest in the work of the board. The residents of Paradise will be especially benefited by these meetings as the University Professors can teach them many things about farming with which they were not previously acquainted. The members of the party will return to their homes in Reno Sunday.

Professor H. F. Ardley who was formerly connected with the Art department of the University of California, lectured at the Congregational church last evening on "Decorative Art." This was the first of a series of free lectures given under the auspices of the English club of the University. The lecture proved to be especially interesting, and was appreciated by all.

Nominee Husky for City Attorney made a short address to the men of Lincoln Hall Tuesday evening. Mr. Husky stated his reasons for deserving the office of city attorney and refuted several statements which have been made against his candidacy.

The University of Oregon refused to admit a student from Pacific University to the Oregon-Washington debate because Pacific and Washington will debate the same question.

Entered at the Reno Postoffice as second class mail matter.

Thursday April 27th, 1905.

Editor Today John S. Case

There will be an influx of the old boys of the University at Reno on July 4th. It is being planned among the mining and mechanic alumni in the state to gather together in Reno at carnival time. Interviews with several graduates from the southern gold belt develops the fact that extensive preparations for the reunion is being made by the Topopah, Goldfield, Bullfrog and Diamondfield aggregations. It is planned at the reunion to effect an organization of this branch of the alumni and to elect officers for the same.

It is a matter of regret that the University will be closed when her sons return to their own. No welcome cheers from an enthusiastic Student Body will greet them, as they review the familiar grounds and the old class bell will not be ringing. It is hoped that the next reunion will take place at a time when we all can gather and with a "Wah Hoo Wah" hail the heroes who have gone before.

Will Determine Best Fruit for Climate.

Dr Kennedy is at present conducting a series of experiments on a large number of small fruits such as strawberries, raspberries, grapes and currants. The purpose of the experiments is to determine what varieties of fruit are best adapted to this climate, and many different kinds of fruits have been secured. This is a field of work that the Experiment Station has never attempted before and the results of these tests are bound to prove successful.

Drill Distasteful to Californio Students

Beginning next August drill will be held but three days each week at the University of California and but two years' drill will be required of each student. Beginning with the class of 1909, drill will not be required of the Juniors and Seniors. From this it becomes evident that the distaste for things military by the University of California has at last made an impression on the war department. It is stated that President Wheeler held a special conference with the Secretary of war in an endeavor to curtail the military regulation for the University of California. It is argued that under present conditions Nevada could not expect to secure a similar change in the military department. The number of men who would be enabled to retire from drill under the two year plan would reduce the batallion to such an extent that it would fall under the limit allowed by the war department.

F. J. Delonchant '04 is up from Reward California where he has been employed as expert assayer by the Reward Gold Mining Co. B. L. Libby '99 is superintendent of this mining Co.

**He Has Seen
Better Days.**

"Bolly" the faithful old water horse is on his last legs. Never again perhaps, will he figure in the work of hauling water or in a student escapade. With an existence on the campus longer than any student and almost as long as any member of the faculty, he has during that lapse of years rendered to the college a service as great as any animal could, be he man or beast.

His entrance into college was rather unique. His first owner was a young man in the central part of the state, who, desiring to come to the University and not being able to afford the price of a railroad ticket, rode "Bolly," then a fiery young animal, from his home in Eureka County to Reno. The University authorities recognized in the handsome young animal the marks of a useful horse and purchased him from the owner, for use in the general work about the campus. He has been doing continuous service since that time and not once has he failed to do his best.

Besides being used in all kinds of drudgery, he has been the innocent agent of hundreds of escapades which, were they discovered, would have resulted in as many expulsions. He undoubtedly remembers with a shudder the many times he has been taken from his stall in the dead of night, hitched to the President's carriage and obliged to cavort about the country for the amusement of some mischievous students, or tied in front of some prominent saloon. How lucky he was not imbued with the power of expression and still unlucky, for were he thus gifted he could probably now tell a story of his life experience which for pathos and humor could hardly be excelled.

Be that as it may now that his last days have come we must all feel a touch of sorrow for the sufferings of faithful old "Bolly."

J. G. Vaughn, '05 of Darthmouth, captain of last years football team of that college, who applied for the position of physical director at the University of Nevada, answered the telegram sent to him by President J. W. Wright, of the Student Body, and said that he was still open to accept the position. The only difficulty in securing his services is in regard to the salary that he wants.

The Record has all the college news and things relating to the University in general.

**"Three Inventions"
Topic for Lecture**

Professor George J. Young of the Mining department will be the principal speaker at the General Assembly of the faculty and students next Friday. He has taken for his subject, "Three Inventions," and during the course of his lecture he will treat of the principal inventions that have attracted the attention of the commercial interest of the country during the last few years.

The evergreens which were planted on University Tree day are showing up well, and from present indications none of the trees will die. Dr. Kennedy, who had charge of the work, is well pleased with the work that was accomplished on that day, and says he has no doubts as to the future success of these days.

Hazing has been made a misdemeanor in the state of Pennsylvania, punishable by a fine of \$500 or six month's imprisonment, or both.

The Crescent Club members are going to put out a May issue of the CRESCENT, which will contain fifty pages, and the University can well be proud of the club's effort.

**PREPARING FOR
ANNUAL CONTEST**

**Various High Schools
Have Sent In Their
List Of Entries**

The annual inter-scholastic field day between the different high schools in various portions of the state will take place on the University track on Friday, May 15. The high school of Reno, Virginia City, Dayton, Elko and Tonopah have signified their intentions of taking part in the meet, and have already sent in a list of men that are eligible. The Carson high school has not been satisfied with the treatment it has received during the past three years, and will not have any representatives at the coming contest.

In order that some of the disgraceful features of last year's meet might not be repeated this year the athletic association of the University whose officers hold similar positions in the High School league will consider all protests at their meeting held two weeks before the field day. Under this scheme all protests will be disposed of at the proper time.

The University track will be put in shape for the coming field day. Several surprises will probably be created as several new schools will send a squad of men to contest for honors on the track.

**CONTRACTORS BEGIN
WORK ON FOUNDATION**

Self and Sellman, the well known Reno contractors, who were selected several weeks ago to construct the mining and metallurgical laboratory at the University, began work on the building Tuesday. They are now engaged in grading for the foundation, and expect to have it finished in a short time. When this work has been disposed of, the building of the structure will be started. If no obstacles interfere in the carrying out of their plans, the laboratory will be completed on July 1st. It will then be turned over to the Regents for their inspection.

H. P. Updike, G. H. Hoffman and C. L. Jameson, of the Junior surveying class, have made the determinations for the location and foundation of the new mining laboratory.

The students have again taken up their college work after having lead a butterfly life for the past five days.
