Track Season to Open

The big conference meet between the universities of Nevada, California, Idaho, Washington and Stanford will be held on the Berkeley track at 2 p. m., April 22, 1911. According to the agreement between the athletic associations of these institutions, no university shall enter in this meet a team of more than 12 participants. Each participant must be a student taking at least ten hours of college work. He must also, if he be a special student, have at least ten hours college work to his credit. No competitor is eligible who is not an amateur, neither is he eligible if he has represented his university or any other university during more than three track seasons previous to the season of 1911.

Within seven weeks, tryouts will be held to determine the 12 men who will represent the blue and white in the big meet. Manager Kennedy must submit a list of our eligible track athletes to the chairman of the faculty athletic committee, Prof. Edmund O'Neill of California, on April 1st. We in

turn will receive a list of the eligible track men at each of the four other universities. The lucky 12 will very likely be chosen from the showing they make in the inter-class track meet early in April.

The points allowed for places in track and field contests at this meet will be five for first place, three points for second, and one point for third.

The events in track will be: One mile run, 100-yard dash, 220-yard dash, 120-yard hurdle, 220-yard hurdle, 440-yard run, two-mile run, one-half mile run, and relay race. The field events are: 16-pound hammer throw, running high jump, shot put, running broad jump, pole vault and javelin throw.

The finances of all visiting teams shall be provided from the net gate receipts of the meet. The apportionments are to be based upon the railroad rates from the points of starting and return, and hotel expenses in Berkeley. By this agreement Nevada will receive more of the gate receipts than twice the apportionment of either Stanford or Berkeley.

Baseball Team to Leave

U. N. Lads to Meet Stanford and U. C.

The varsity baseball team will leave Wednesday night for California to play a series of two games. The first is to be played March 9th. The second comes off on the California diamond against the Blue and Gold nine on Saturday, March 11th.

With Knight pitching, the Nevada boys are confident of winning at least one of these games. In Forker of California, the local lads will meet a pitcher who has a reputation of winning three straight games from Stanford two

years ago. Owing to the snow and rain, our players have not had an opportunity to practice much, but during the early days of this week a good deal of snappy practice will be held on Mackay Field. The coast players, however, haven't had much on us in the weather line, as their field has been soaked with rain. After considerable thought and consideration it has been decided that the team will be chosen from the following:

Bennett, Henderson, Fletcher, Manion, Delahide, Hamilton, Myers, Grayson, Heward, Crews, Knight and Sheehy. M. B. Kennedy, manager.

U. of C. to Play Here

A game for the coast championship.

A basket ball game for the championship of the Pacific coast in Woman's basketball will be played in the University gym next Saturday night at 8 o'clock, when the U. of N. team will meet the team of U. of C.

The U. of C. girls have held this honor now for about two weeks when they defeated San Jose Normal, who has been the champion for two years. It is believed by all who saw the game last Friday night that the U. of C. girls have only a few days now to be in the

limelight.

The U. of N. basketball team will see that the score will be rolled up for Nevada, if the rooting section will see that the proper amount of rooting is done.

Now students, the whole game does not rest upon the nine girls who will be chosen to play this game but upon the whole University. Everyone should get in and advertise the game and sell tickets for it.

Boys, how about that basketball rally for the girls next Friday night?

Don't be backward. Boost.

NEVADA 56, U. P. 7

U. N. Co-eds Easily Defeat Visitors

Friday night before a good-sized crowd of anxious spectators, the Blue and White girls won their first game of 1911. From the way they played nothing but a good record can be expected for the rest of the season.

The game was fast from the first whistle to the last, when the "Ray, Ray, Ray U. P." from seven loyal Sagebrushers showed that Nevada spirit.

May Porter as a goal was in a class by herself, for she missed only three attempts at goal-throwing. Her guarding was excellent, partly due to her ability to catch the ball when off the floor.

In team work is where our team is strong. That's why they made 31 points in 20 minutes. Think of it, 3 points every two minutes.

We are proud of Martha Noble, the U. N. goal, who has made good. Miss Noble played on Elko High team before coming to U. N. While there she won a reputation for hard, fast ball,—just the kind Nevada plays.

When the ball got into the hands of Nevada centers the chances for a basket were what one might call "fat," for the Nelson, Mahan, Smith, Porter system proved 2 points whenever tried.

U. P., with seven active players on the floor, made a fighting loser all the time. Just like the U. P. boys did in 1909, "fight" all the while. This spirit with team work will give U. P. a team to be proud of. The visiting team was "on the job" all the while, never showing the least inclination to lag.

However, their goal-throwing was quite weak, while the Nevada guards, "Bee" Bray and Leila White, were too strong for their opponents.

Our team needs the support of the student body. They make the scores. The line-up was as follows:

U. P.—Forwards, Miss Draper, Van Glahn; centers, Misses Thode, Chatfield, Prouty; guards, Misses Wann, Rodda; subs, Misses Richardson, Lovejoy.

U. of N.—Forwards, Misses May Porter, Martha Noble; centers, Misses Dora Nelson, Frances Smith, Grace Mahan; guards, Leila White, Bee Bray; subs, Effie Mack, Lydia Colyer.

Gov. Folk to Lecture

Probable Candidate for United President at the Majestic.

Next Wednesday evening at 8 o'clock Ex-Governor Folk of Missouri will deliver his great popular lecture "Soldiers of Peace" in the Majestic. Governor Folk became first known for his work as circuit attorney in St. Louis, where his exposure and prosecution of official corruption awoke the slumbering public conscience and was the beginning of the wave of "insurgency" that has since swept from the Atlantic to the Pacific.

As a recognition of his sterling worth and character Folk was elected governor of Missouri in the face of most bitter opposition of those who had profited through special privileges in the past. During his incumbency thirty far-reaching laws were passed for the benefit of the many rather than the few.

From an unknown attorney practicing law in St. Louis, Folk

has become in the past few years one of our national figures, and will probably be the Democratic nominee for President in 1912.

To see and hear such a man who by standing and fighting for common decency and honesty in politics has placed himself in line for the higher honor within the gift of the American people is a privilege that should not be neglected. To students in particular with their futures still before them there is much that may be learned from the man who has made good and no one who can raise the price of admission should be absent next Wednesday night. Single admission 25c, 50c, \$1.

BASKET BALL LUNCHEON

U. P. Is Entertained on Friday

The Girl's Basketball Association which was organized this fall for the promulgation of the interests of basketball in all its phases showed its great worth last week. The girls of University of Pacific basketball team who were our guests this week, were taken care of immediately by the association members, thus relieving the girls on our team of any responsibilities of entertainment.

Friday at noon the U. P. girls were entertained in a violet tea in the domestic science department. A most delicious and appetizing chicken luncheon was served to all the visitors and the members of our own team.

Next week the girls are going to entertain the U. C. team. The president of the association is desirous of having all members help even more this week than last.

BASKET ASSOCIATION ORGANIZED

College Women Organize to Foster Athletics

Last Tuesday at 4:30 p. m. the G. B. A. A. met in the gym to discuss the constitution. Miss Isabelle Schuler presided and expressed the desire that the association give an entertainment to each of the visiting teams.

This is the first organization of the kind at U. N. and from the reception given the U. P. team and the one planned for the U. C. the association will be a success.

Due to the efforts of the Misses Schuler, Smith, Bray, Cleator and Glass the luncheon on Friday was a huge success. We only hope the association will keep up this spirit.

Nev. Academic League

Board of Control Completes All Plans For Annual Track and Field Meet

May 12th and 13th were the dates set for the Declamation contest and Field Day. This year is to witness one of the most hotly contested field meets ever held on the Mackay field.

The board of control appointed the following committees with the chairman the first named:

The Entrees and Field Meet Committee — J. G. Scrugham, M. B. Kennedy, L. A. McClure and M. E. Jepsen.

Prizes, Publicity and Program — C. A. Haseman, P. B. Kennedy, E. E. Winfrey and L. B. Patrick.

Declamation Contest — D. B. Billingham, E. E. Winfrey, R. C. Thompson and P. B. Kennedy.

Entertainment Committee — L. A. McClure, M. E. Jepsen, S. E. Ross, R. Brown, Mrs. Kaye and Principal Ferguson.

Ticket Sale, Gate and Auditing — M. B. Kennedy, C. Haseman, D. B. Billingham, P. B. Kennedy and J. G. Scrugham.

Each committee has the power to make full arrangements for its branch of the field meet and declamation contest to be held in May.

The League offers this year for the first time a badge bearing an emblem for any contestant who succeeds in making the prescribed time.

The following is a list of the events and the time prescribed: 50-yard dash—6 seconds.

CHARLES K. BADGER IN RENO

Former Yell Leader Spends a Few Hours in Reno

"Cap" Badger, ex-'11, stopped off in Reno last Tuesday on his way east. Mr. Badger is a Deputy U. S. Marshal in Southern California. His trip east was a rush order or he would have stopped over in Reno and visited his many friends at U. of N.

- 100-yard dash—11 seconds.
- 220-yard dash—25 2-5 seconds.
- 440-yard dash—58 seconds.
- Half-mile run—2 minutes, 16 seconds.
- Mile run—5 minutes, 30 seconds.
- 120-yard hurdle—19 3-5 seconds.
- 220-yard hurdle—29 3-5 seconds.
- Pole vault—9 feet.
- Broad jump—18 feet, 6 inches.
- High jump—5 feet.
- Shot put—37 feet.

THE STUDENT BODY MEETING

Last Friday was the date set for a student body meeting in the gym. The few loyal students who attended this assemblage were somewhat disgusted at the remainder of the student body who found it more interesting or more advantage to remain away.

The student body meetings are for the purpose of discussing the affairs of the students—your affairs—every single student's business. Why don't you go? The constitution requires that 75 members shall constitute a quorum.

Still only 60 members attended. Are you one of 60 or one of 260? Which is the best class to be in? Are you one of the 60 live students?

If this condition continues to exist at U. N. the student body will be controlled by a handful of students, who attend meetings. If you are going to allow some one else to manipulate your rights you have made a good beginning. You're NOT going to do it.

The way to manage student affairs is to become unified. We cannot become unified if you are going to read magazines walk around. Get into the right "boat"—Then "All Heave Together."

U. N. PROFESSORS

INVENT

Dinsmore and Jacobson Patent Apparatus

S. C. Dinsmore and C. A. Jacobson of the Chemistry department have lately received a patent on an appliance called "a separator."

The invention corresponds to a pipette in a small degree, but has a bulb attached which aids in perfecting the syphoning of liquids. The efficiency of the apparatus lies in its advantages in syphoning vaporous liquids without inhalation because the air bulb removes all such dangers.

The reservoir attached to the lower end of the inlet is funnel-shaped and allows all the liquid to be admitted into the separator.

This invention allows a gravity solution of three liquids to be separated one at a time with very little danger of mixing.

Acids of all kinds may be transmitted to and from solutions and receptacles without danger of loss or evaporation.

NOTICES

Evolution Course

The program for this week is as follows: On Tuesday, March 7, the subject for discussion will be "The Laws and Theories of Heredity." On Thursday, March 9th, the lecture will be on "The Inheritance of Acquired Characters."

Faculty Science Association

The next meeting of the Faculty Science Association will be held on Monday, March 6th, at 4:40 p. m. in the lecture room on the first floor of the Mackay Mining building. The subject of "Wind Experiments" will be discussed by Prof. H. P. Boardman. Everybody is welcome to attend these meetings.

MEN'S MEETING THURSDAY

All the men students of the University and High School are requested to be present in the gym promptly at 11 a. m.

The meeting is to be addressed by Gale Seaman of the Y. M. C. A. Mr. Seaman comes to Reno well recommended by all eastern audiences and will no doubt please a very large audience. The topic of his talk will be one of great interest to all the men of the Faculty, University and High School.

THE RUSSIAN HONEYMOON

Local College Talent at Majestic, March 17

The date for the "Russian Honeymoon" has been definitely set for St. Patrick's night, March 17. The Majestic curtain rises at 8 p. m. sharp. Miss Howe shows remarkable versatility as the devil-winged angel in the play. Miss Howe as Poleska is at first arrogant, stiff and unbearable. She gradually changes her character and occasionally shows strains of the deepest human sympathy. At length, of her own free will, she sets about to make the most of the miserable condition in which she finds herself. It is at this point we see in her character the noble and sublime qualities in woman.

The love scene between Michelle, Helen Hobbins, and Osip, Gilbert Tyler, is the most spicy bit of performance in the whole play. Tyler is an artist worth studying.

Harold Hale, as Ivan the old shoemaker, is able by his cackling laugh to turn the most serious and sentimental scenes into a rollicking hilarity. He is so perfect in his interpretation of the part that the coach grows hungry for "prime old cabbage soup" as she sees him eat his lady's imaginary tea and muffins.

Cashin, our California Greek Theater star, is a marvel as Kouliboff the slave driver. One who sees him interpret the manoeuvres of "Binylebub" will never forget the scene.

Helen Pickett as the sister of the count will hold the audience spellbound with her clever administration of justice. You should see Gladys, Miss Jones in the role of a French maid and Du Bois as a count will unquestionably move the audience to tears when they appear together.

GOVERNOR FOLK TO ADDRESS UNIV. STUDENTS

Wednesday, March 8, 1911. Governor Folk who is on a western tour of the United States will lecture at the Majestic theater. Dr. Stubbs has wired an invitation for Mr. Folk to talk at a general assembly on Wednesday morning in the gymnasium. The topic of his lecture is not selected as yet but will no doubt be of national interest. The public is cordially invited Wednesday, March 8, 1911, 11 a. m. Be there.

AGRICULTURE CLUB MEETING

Student Club Holds Very Interesting Meeting

Last Monday the Agriculture Club met in full force at the home of Professor and Mrs. Knight on Sierra street. The program of the meeting was a very interesting one, consisting of a talk by Prof. True and Mr. Creel. Lester Harriman talked on the Truckee-Carson project in Nevada; Carl Milentz expressed several good opinions upon important club matters.

Following these "Remarks" F. H. Wilkins cracked several very deep jokes on the members of the club.

Upon adjournment refreshments of the most delicious sort were served in buffet style. The following were present.

Prof. True, Mr. McCarthy, J. W. Wilson, L. P. Harriman, J. C. Cazier, E. S. Bender, Corliss Darling, Prof. Knight, C. W. Creel, C. A. Milentz, L. B. Patrick, F. H. Wilkin, H. S. Manion, Neil McVicar and Dick Randall.

GRAND CONCERT FREE

If you own a Victor Talking Machine or an Edison Phonograph, 17 cents a day will pay for one. Call today at the first store north of the Virginia-St. bridge, Emporium of Music, Phone 94, P. O. Box 87, Reno, Nev.

Drawing materials and instruments at Porteous Decorative Co.

MILITARY SCHEDULE FOR WEEK MARCH 6-11

Practical instruction will commence on Monday, March 6, 1911. Blue uniforms will be worn for all formations until further orders.

Cadets will attend the university ready for drill whether they expect drill or not.

The commandant or in his absence the cadet major will determine whether recall for drill will be sounded on account of weather conditions.

Daily reports will be made of all cadets not in uniform.

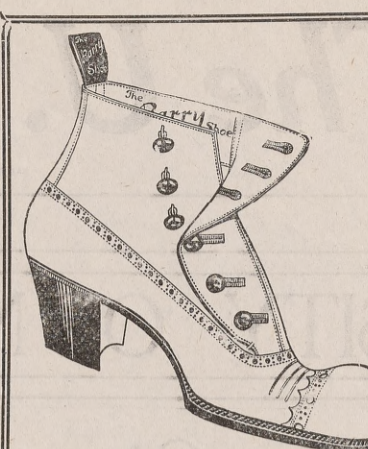

The following schedule of drills is announced for the week beginning March 6:

- Monday company drill.
 - Tuesday company drill.
 - Wednesday battalion parade.
 - Thursday battalion drill.
 - Friday battalion drill.
- By order of the Commandant.

U. C. WOMEN PRACTICING FOR GAME WITH NEVADA

Daily practice is being held by the women's basket-ball team in preparation for the game with the University of Nevada team. Arrangements have been made for this game to take place on the Nevada campus at Reno on Saturday, March 11th. The squad, composed of nine regular players and three substitutes, will leave on the Friday preceding the game, returning the following Sunday.—Daily Californian.

Food and Drug Inspection

(Continued from last issue)

"Syrup with maple-like flavor," "Sorghum Corn Syrup," a new discovery not known to the agriculturist; "Pure Family Lard" in one-inch letters with the words "With Beef" tucked away in 8-point type in one corner and "Fat added" in the opposite corner. The permission granted to qualify certain substances with "style," "type," or "brand" has resulted in some remarkable types being discovered. "Japan Style Rice" is freely put upon any old rice whether it resembles the Japanese variety or not. Bologna style sausage, and many others too numerous to mention, show the loophole that is open for ingenious prevaricators in this respect. Catsup "made from tomatoes and tomato trimmings when made from peel, cores and waste;" "Butter made under the daily inspection of pure food inspectors" proved that the manufacturers meant that it was subject to their inspection, if they cared to inspect it. Some of the qualifying phrases required by law are even found on the neck of the bottle, the back of the bottle and even on the bottom of the bottle. The consumer has certain rights. He should not be compelled to walk around a bottle, or turn it upside down or stand upon his head if he desires to read the labels. Where an article contains benzoate of soda, artificial color or is made from an imitation flavor, when displayed conspicuously at the fountains giving a list of all syrups which are made from imitation flavors, those that are artificially colored, and those that are preserved with benzoate of soda. The experiences of inspectors are very amusing in compelling dispensers to keep these signs prominently in place. Sometimes we find them at the very top of the wall of a 14-foot ceiling. One good use of those signs, however, has been found. It can be determined when an earthquake has visited a certain locality by the positions in which signs are found. In a neighboring state an inspector in one afternoon found 4 signs which had just fallen down back of the counters, although the records of the weather bureau showed no indication of this earthquake on the seismograph.

It seems to be a common misapprehension on the part of some manufacturers that they can be alarmingly extravagant with the truth on one portion of the label, if they will qualify it upon another. Another common impression prevails that, because a label or name is copyrighted or a trademark obtained in years past, it gives them an undisputed right to continue to use it even though such copyright or trademark be false or misleading in every particular.

Another matter of labeling that has arisen is that of stamping old labels with rubber stamps. If the label or package were laid on a flat surface and the paper were sized and great care exercised a rubber stamp impression would be fairly good hile it lasted, but the surface is usually irregular, the paper not sized and the operator extremely careless, so that the stamp appears upside down, or on one edge of the paper or has slipped on the paper and the impression blurred, and at best if properly put on and exposed to the sun it very shortly fades.

In canned goods many misbrands are found, such as "Early June Peas" canned in July or August, "Sugar Corn" and "Evergreen Corn," which are common Indian Corn, or field corn, boiled down to a degree of tenderness. The label "Cream Corn" is gradually disappearing, the manufacturers saying that they did not mean that it contained any cream, but it was the cream of their pack.

The state and national laws forbid the use of any words or statements that are in anywise false or misleading. This is ordinarily taken to apply to substances

claiming to be of medicinal or therapeutic effect.

Therapeutic misbranding is one of the most difficult subjects that the control official has to contend with. The outrageous falsehoods and humbuggery that have grown up in the sale of patent or proprietary medicines in the past fifty years are almost unbelievable.

That there should be any sickness at all in this world with all these "sure cures" at our command is a mystery. Why should a man fill an early grave when Blank's Blooming Balderdash can be obtained for fifty cents per bottle and his consumption disappear. A preparation was said by a manufacturer to be made by placing a few pounds of pitchblende in a washtub, soaking it over night and then bottling the water. Another interesting substance was claimed to be made entirely of the fat of the Bengal tiger and the Yulah reptile. This was presumably manufactured while Teddy was in Africa. "Rattlesnake Oil" from the Texas oil fields is more or less familiar. A substance labeled, "Balsam," which contained considerable morphine, same not mentioned on the label, bore the statement that it "relieves patients in the last stages of consumption by giving them much needed rest." There was hardly enough morphine in this to bring about the desired results or to be satisfactory to the undertaker.

Hair tonics that will make hair grow on a flatiron or a tombstone are still in existence and hair dyes that will restore your gray hair to its original color, notwithstanding your hair might have been original black, red or blonde.

Another substance depicts a long neck of a giraffe which is printed upon the carton with the statement following "If you had a neck as this fellow and it was sore all the way down, this would quickly cure it." What is the use of producing antitoxin when wholesale diphtheria can be cured by the contents of a four-ounce bottle.

Another substance is labeled "AnAntitoxin" when made from ordinary crude drugs. Liquid egg shampoo, that does not even contain an eggshell. Another preparation is claimed to be a sure cure for headache, backache and corns. This manufacturer is to be congratulated upon successfully working both ends and the middle.

Hundreds of preparations are labeled to be cures for freckles. Some of them have been found to be successful in that they not only remove the freckle, but the hide with it.

Another substance found to contain bichloride of mercury was advertised as a pleasant and sure cure for cracked lips. Many hair restorers and dandruff cures of well-known advertisers have been found to contain wood alcohol, a substance which has been known to bring about blindness, paralysis, insanity, and locomotor ataxia.

Another preparation kills the hair-eaters. We would like to get a pair of hair-eaters for the Smithsonian Institute.

Headache preparations guaranteed to be harmless and will leave no bad effects are found to contain enough acetanilid to paralyze a dinosaur.

Toilet Powder and Bath Powder labeled "An oxygen bath powder." Not even as much oxygen in this substance as is found in a broomstick.

The chief agents of soothing syrups are known to be opium, morphine, chloroform, etc.

Dr. Fahrney's Teething Syrup contains morphine and chloroform.

Dr. Groves' Anodyne for Infants, morphine sulphate.

Dr. Miller's Anodyne for Babies, morphine sulphate and chloralhydrate.

Free for your room—a sorority girl photo. Call for one. Red Cross Drug Co.

STANLEY WILTON WRITES TO U. OF N.

Stanley M. Wilton, ex-'11, who is now at Oxford enjoying a Cecil Rhodes scholarship, says: "I came up to Oxford with thousands of other students on last Friday (January 20th), which was the assembly day for this term.

"Many of my Rhodes brothers, almost all in fact, made the mistake of rushing off to the continent to spend their six weeks' holidays. Personally I am very glad to have spent the vacation in London, which from an educational standpoint is the finest city in the world. It is also the finest city in many other respects.

"The art galleries and the many splendid museums are wonderful. One can pass a week in each, and then will have only given it a cursory glance. The great British museum was but a minute's walk from my lodgings in Russell Square, and I passed many pleasant and profitable hours there, seeing the works of man from his earliest day down through the great Greek civilization to our present time. The Smith Kensington museum is wonderfully unique. Among many interesting things I was especially interested in the technical branch of the museum, where I saw working models of all kinds of machinery from Watt's first engine to a stamp mill. Press a brass button, and inside a glass case a splendid little locomotive works and shows you its mechanical principle, or else a perfect toy printing press clatters away and gives up its secrets. Here also I saw nine foot models of the modern sulphuric acid and soda manufacturing plants, the principles of which I had the pleasure of studying in the chemistry laboratory at U. of N. There were other chemical plants in miniature. It afforded me great pleasure to see them in reality. I studied old London from Westminster to Fleet street, and had the pleasure of dining in Samuel Johnson's club, the Cheshire Cheese.

"London impressed me as being a remarkably healthy city for its size. It is kept very clean and orderly. Englishmen are very orderly and have a fine respect for the law, which is usually enforced. The London police are the finest I have seen—actually gentlemen; and their management of the enormous traffic is perfect and amazing. The complex underground railway system, the so-called "Tubes," is very impressive. Winding about several hundred feet under ground they solve quietly and speedily a once great traffic problem. London is great and impressive; it is truly the center of our modern civilization, and a year's deep study could not begin to exhaust its scope for intellectual research. Whatever one's vocation, be it theology or engineering, London has advantages for study which no other country possesses.

"Of course I saw the famous London Pantomimes, Jack and the Beanstalk, Peter Pan and the Bluebird, as well as other famous fairy plays. I also saw Sir Herbert Tree play King Henry VIII, a royal play gorgeously reproduced.

"It is only since I have been in England that I have begun to conceive the philanthropy and greatness of the mind of Cecil Rhodes. The opportunities here for general culture are found not alone in Oxford, but in all England. A degree here is insignificant in comparison to one's broader education outside the university. I can only concur in hoping that Nevada boys will more appreciate the opportunities that a Rhodes scholarship affords. Oxford can give one much, England can give more.

"At the centers of Anglo-Saxon civilization one begins to get an insight into the higher purposes of the life given to us by his Creator."

U. C. TO HAVE A NEW AGRICULTURAL BUILDING

Although delayed to some extent by the heavy rains of January, work on the new Agricultural building, which is being erected on the west side of the campus, is now progressing rapidly.

This structure, which is to cost approximately \$200,000, is to be built of white granite in accordance with the plan for future buildings of the Greater University. The building will be two stories high and about as long as California Hall.—Daily Californian.

COLORADO AGRICULTURE

College Exhibit for Farmers Has Most Complete Equipment

Fort Collins, Colo.—Under the supervision of C. H. Hinman, director of extension work at the Colorado Agricultural college, the special train which is to carry a liberal education to the farmers is being fitted out for the trip which begins Monday.

Four cars will be used. In the first car will be the irrigation engineering, agronomy, including farm mechanics and forge and shopwork exhibits. The second car will contain educational material in horticulture, poultry, potato raising, entomology and zoology. In the third car will be represented the animal husbandry department, with dairying and poultry, and in the fourth car will be the veterinary exhibits, articles from the domestic science department and the traveling office of the institute.

In the veterinary department exhibit is declared to be the most complete collection of tubercular specimens ever gotten together. These were prepared by Dr. B. F. Kaupp, pathologist of the department, and show the effect of tuberculosis in various stages in horses, cattle, hogs and other livestock.

Character sketch.....Alice Young

At the meeting held Tuesday the article of the Nevada Academic League Constitution which any student, who has taken part in any inter-collegiate athletics is barred from the meet. After announcements were made Miss Howe entertained the students with the recitation of "How Aunt Melissa Would Bring up a Boy."

Last Tuesday afternoon members of the chemistry class visited the pure food laboratory. They were very interested in the explanations by Prof. Dinsmore, and the exhibitions, especially the products of skim milk.

Many students tasted saccharine which sweetened things up considerably.

The choral society started again Sunday evening. Not many High School students were present. Come out students; we need you. The choral will meet next Tuesday. Let us see more High school girls practice Wednesday afternoon.

One of the senior girls has been overheard remarking that she isn't as sweet as she was Tuesday.

It seems Eugene has cultivated a taste for foul. He seems particularly "Chiek."

Anyone desiring to see the state championship trophy can do so by visiting the physics laboratory room.

Miss Eleanor James, who has recovered from her recent illness, returned to the hall Sunday.

Say those examinations during the past week were some deep; were they not?

"Colonel" Knapp was laid up with tonsillitis.

Have many of the U. H. S. students say: I am Shee-hy. Is that so Rich.

SAGEBRUSH TO RUN

A CALENDAR

Heretofore the various clubs and organizations have had to rely on the bulletin boards for publishing notices of meetings and gatherings and quite often these notices were not seen. The Sagebrush intends to run a column of notices under the head of "University Calendar," giving all information in regard to meetings. Any one club that has any notice to be printed in the Sagebrush. Please hand them to L. B. Patrick before Friday night.

Personal

Collins is "at home" again.

Whose paper are you reading now?

Watch for the next student meeting.

Why was Billie Settlemyer dressed up so splendidly last Friday?

Ivah Pruett, who has been very ill in a Reno hospital, is much improved.

Coral La Fontaine, who was a student here last semester, is taking a course at Heald's Business College.

Vocal lessons given by expert instructor in Lincoln Hall each evening from 6:30 till a shoe stops the spell.

Mrs. C. A. Jacobsen, who has been ill for some five weeks is much improved and will be able to be out shortly.

It is rumored that "Bub" Hicks and Du Bois are going out for tracks this spring. Bub will likely win the broad grin.

Tyler at the table—"There goes one of the U. P. girls wearing one of my pins." Question: Just how many pins does Tyler have?

The numerous friends of Augusta Curler are very sorry to hear that she had to leave school on account of her health. Come back soon Gussie.

Miss Howe, while coaching "The Russian Honeymoon": "Oh I am hungry I smell something cooking." Du Bois, sitting with his shoes against the radiator, "It's my rubber heels burning Miss Howe."

Bessie Winter, who has spent so much of the term in the hospital, is out again. She left for her home in White Rock Friday morning. Her friends are sorry to see her go, but are glad that she is feeling so much better.

Ethel Thompson, who has been under quarantine two weeks, was back at classes Monday morning. Keep on boosting.

Watch Settlemyer—there is a girl in it.

Collins has had some good news lately.

Did you subscribe yet.

We learned last week that Nelson Brunette '99, died Jan. 5, 1911, at Liverpool, England. Mr. Brunette was a graduate of the School of Mines. He leaves a sister, Mrs. Albert Ward of Tonopah.

A certain party was seen out rather late last Saturday night. Why?

COLLEGE WOMEN'S OUTLOOK CLUB

There will be a meeting of the College Women's Outlook Club Wednesday, March 8th, in the Domestic Science room. Everybody be present as promptly as possible after 4:30. The usual refreshments will be served, after which the following program will be heard:

Maria Mitchell, Her Life and Work, Mabel Finney.

A Famous Woman scientist, Margaret Langwith.

Madame Curie, Her Work in Science, Augusta Curler.

It is hoped that the attendance at this meeting will be even larger than it was at the last. Any girl registered in college is welcome as a member. The club meets on the second Wednesday of each month—there are no dues, the refreshments each time being supplied through the generosity of the Domestic Science department. The work taken up is becoming more interesting all the time and the club hopes, by the end of the term, to have on its rolls the name of every girl in college.

Sorority Chocolates, the College Girl's Candy, 60 cents a pound. Red Cross Drug store.
