FRESHMEN 32

Girls Win and Lose

SAN JOSE NORMAL DEFEATS NEVADA

Score of 30 Is Piled Up Against Our 22 Points

On last Thursday evening after a short rest of a few hours the Nevada varsity girls were defeated by the "School Marm" in San Jose. Although details are scarce and telegrams more so, we were informed that Miss Dora Nelson, the Nevada center, suffered a severe injury in a fractured ankle while playing.

From the score one might imagine that a very close game was played. With this valuable player disabled the chances of Nevada winning were greatly lessened.

NEVADA DEFEATS U. OF P. AT THEIR OWN HOME

Sagebrush Co-Eds Run a Score of 38 to Their Opponents' 18

Friday afternoon on the University of Pacific courts out of doors our girls administered a second drubbing to the Native Daughters.

With Miss Nelson out of the game our team was greatly weakened. Those who went on this trip were:

Melvin E. Jepsen, prex U. of N. Student Body; Miss Meighan, coach; May Porter, captain; Hata White, manager, and Misses Noble, Smith, Nelson, Colyer, Bray, White, Jepsen and Mack.

Nev. To Be Represented

NEVADA TO BE REPRESENTED

Agriculture Department Exhibit Is Complete

F. L. Peterson left for Los Angeles last Tuesday evening in charge of the Nevada exhibit for the Pacific land show, to be held in that city from the 18th to the

31st of March. This land show is the first of its kind to be held in the west and is an exposition of the agricultural products of the soil. The Nevada exhibit consists of grains samples in jars and in cured heads, several varieties of potatoes, onions, apples, etc., and considering the rather unseasonable time of the year for making such a show a creditable exhibit has been gotten together. Framed bromide enlargements in sepia, 11 by 14 inches of animals owned by the College of Agriculture, showing the grand champion Holstein cow Stafford Mercedes Aggie Tuebie, the grand champion Holstein bull Tuebie Pietertje Colantha Lad, at the California State Fair in 1910; Cheviot sheep, Nevada winter lambs, views of Reno and of the State will also be displayed. The frame upon which is mounted the 48 ribbons won by the College of Agriculture at the California State Fair last year, and the 11 gold and one silver medals will also be shown.

During the progress of the show lectures illustrated by some 50 lantern slides will be given on the agricultural resources of the State.

Underclass Men Compete

UNDERCLASSMEN COMPETE

In a Fast and Furious Game the First Year Men Emerge Victors

Saturday night saw one of the fiercest contests for victory seen on the U. of N. for some time. In a fast game the 1914 five came out with six points to their credit.

The game was close from the start never a difference of more than 6 points. The first half closed with a score of 13-19 in favor of the Freshies.

The Sophs took a brace in the beginning of the second half and for several minutes the score was 21-22, then 23-24, and so on until the Freshman teamwork and training began to show their op-

ponents in a bad light.

In no part of the game was either team found napping. Some times three players after the "big round bag" at a time. Delahide was almost a certain shot at the basket whenever the chances were even. Settlemyer ("Fighting Bill") played a strong fast game. Among the Freshmen Pennell and McPhail were stars. Their goal-throwing was almost faultless. The Sophomore line-up was:

Forwards, Settlemyer, Collins; center, Delahide; guards, Wilson, Heward; subs, Gilcrease.

The Freshmen five were: Forwards, McPhail, Harbaugh; center, Pennell; guards, Smythe, Webster; subs, Harriman, Kelly. Referees—Prof. Haseman and Ray Crews.

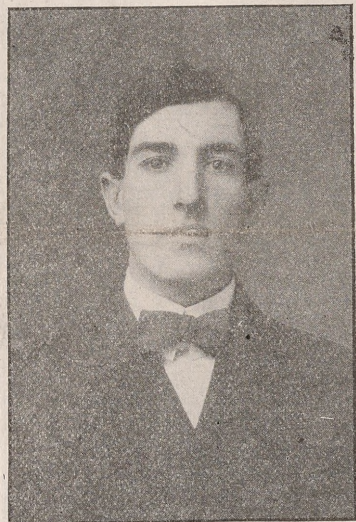

Nevada Graduates Return

NEVADA GRADUATES RETURN

Two 1908 Men Visit Their Alma Mater

Last week witnessed the return of two of the most popular graduates of the U. of N.—Fred J. Freeman and Hugh J. Gallagher. "Dad" and "Boo" returned for a short visit with their many friends on the hill.

"Dad" Freeman was a graduate of the civil engineering college and now holds a responsible and lucrative position. His career in college was marked as a

H. J. GALLAGHER, '08

football star, a baseball man, and he holds records for the shot put and hammer throw. Freeman was captain of Nevada's first Rugby football team, which made a very creditable showing against Stanford and U. C.

"Boo" Gallagher graduated in the mechanical college and has for three years been in Schenectady, N. Y., in the motor department of the General Electric Co.

He is now the western salesman for this same company with his headquarters in Reno and San Francisco.

F. J. FREEMAN, '08

NOTICE, TENNIS PAYERS!

There will be a meeting of all men interested in tennis Tuesday afternoon at 4:30. A notice will be posted on the bulletin board to the effect that plans for the organization of a club and construction of a court will be discussed. Anyone having any plans in regard to the cheapest and best method of constructing a court under the existing conditions will please bring them to the meeting.

As the weather promises to be fair from now on, it is hoped that interest will be shown and all men appear at the appointed time, so that progress can be made immediately and the best of the time used. As commencement comes very early this Spring, it is of great advantage to get plans under way as soon as possible.

Committee.

FACULTY TO PLAY TENNIS

Prof's to Engage in Real Active Work

On Friday last the Faculty Tennis club met to discuss plans for this spring. Prof. Hill as chairman announced that funds were necessary. Promptly an assessment was levied upon each and every member.

Secretary Treasurer "Doc" Kennedy was forthwith instructed to accumulate the necessary funds from the various members of the club.

After a short discussion of plans for the season the meeting adjourned.

Sorority Chocolates, the College Girl's Candy, 60 cents a pound. Red Cross Drug store.

New Electrical Building

Senate bill No. 18, appropriating the sum of \$40,000 for the construction and equipment of an electrical building at the University, was passed by the State Legislature with only one dissenting vote. This action shows that the lawmakers appreciate the work being done along such lines and that they are prepared to give liberal support to the cause of technical education, provided that results can be shown. The appropriation will enable the school of mechanical and electrical engineering to secure an equipment equal to that of any similar school in the West. The course in electrical engineering will be much strengthened, particularly in the field of laboratory and research work.

Electricity presents each year more new possibilities, and the evolution in this direction is evidenced by the construction of tremendous electric power plants all over the country.

The volume of electrical business has more than doubled every five years during the last half century. A rate of increase unequalled by any other business. As a result the great industries of

this country are continually looking for young men who have a thorough scientific training in the art. At the present time the electrical development of the large water powers, the scientific illumination of residences, factories and public buildings and the construction of interurban electric railways are fields which are undergoing tremendous expansion. The courses to be offered by the department will cover these applications very thoroughly. Construction on the new electrical building will probably be begun early in June and it should be ready for occupancy in the fall.

Many pieces of equipment will be purchased, including alternating and direct current machines, rectifiers, wireless telegraph and telephone apparatus and other pieces of apparatus embodying the latest practice.

As graduates of this course are much in demand it will probably prove one of the most popular in the university. The building will probably be dedicated with an electrical show in which a number of manufacturers have signified their willingness to exhibit their best up-to-date apparatus.

FACULTY SCIENCE

ASSOCIATION

The next meeting of the Faculty Science Association will be held on Monday, March 20, 1911, at 4:40 p. m. in the lecture room on the first floor of the Mackay mining building. Professor Dinsmore will address the meeting on "The Commercial Manufacture of Glucose and Allied Products."

EVOLUTION COURSE

Program for the week of March 20-25th:

The concluding lecture on "Theories of Evolution" will be given on Tuesday, March 21st. On the following Thursday a subject for discussion will be "The Origin of Life."

PROF. CHURCH TO GO

TO LAKE TAHOE

Evaporation Experiments to Be Started

Dr. J. E. Church of the Mount Rose observatory left Saturday morning for Truckee. From there he intends to snowshoe to Lake Tahoe, near Tahoe City, where he contemplates establishing a number of evaporation experiments.

Measurements of snow depth and density will be recorded for further work next summer.

Free for your room—a sorority girl photo. Call for one. Red Cross Drug Co.

Register Being Compiled

STUDENT REGISTER BEING COMPILED

All Graduates and Old Students Will Be Known

A register of all graduates, regular and special students, who have ever registered at the University of Nevada, has been installed.

The committee of faculty and graduates is now working on the whereabouts of any and all former students who are not known as yet.

They will send out blanks to all former students in hopes of completing an extensive card index of every student and his present whereabouts.

The information blanks will include the year of registration, department, degree, college attendance elsewhere, occupation, present address and name in full and the married name if a co-ed.

The committee under their present speed of working will have the register printed in book form and mailed before the silver jubilee, in May of 1911.

This jubilee will be a grand homecoming of students to see

their alma mater in all her glory.

Mr. and Mrs. Clarence Mackay together with a party of eastern friends are to be present and lend their aid in making the 1911 commencement the biggest affair in the history of this university and State.

There have been graduated from U. of N. since 1889, 676 students. The first college graduate in 1891, first graduate in agriculture, 1892. Thus far there have been 2868 students who have attended the University of Nevada.

The committee on university graduates and old students who have attended the university since 1886 and including all those registered at present. The faculty committee is composed of J. E. Church chairman, Peter Frandsen, '95; Romanzo Adams. The student committee is composed of John Wright '95, David Hayes '00, Mrs. Maude Senseny '96, Mrs. F. H. Church '02, Mrs. Henry Thurtell '90, Mrs. Hattie Pierson '90, Miss Edith Hurd '96, Miss Frances Frey '90, Esther Wickham '06, and Mrs. Louise Blaney-Twaddle '95, secretary.

This statistical work is being carried on by Mrs. Twaddle, the secretary of the graduates committee.

"RUSSIAN HONEYMOON" IS OVER

Last Friday night at the Majestic theatre before a large audience of students and a number of townspeople, the Dramatic Society presented the three-act comedy, "The Russian Honeymoon."

The costumes were splendid, real, and very suggestive of Russian life. The scenery was realistic and, in fact, everything which would add to the attractiveness of the little play was there.

Harold Hale, as Ivan, the shoemaker, was without a doubt the hit of the evening. His cackling laugh and wheezy voice were always welcomed with applause.

The one who seemed to be everywhere, pretty and vivacious always, was Helen Hobbins. Her little love scene as fetching.

To see Helen Pickett administer justice was enough to make anyone a criminal. She was bright, careful and truly beautiful in her gorgeous costume.

Gilbert Tyler, as Osip, was a most untiring and persistent

lover. He was as he always is, a jolly good fellow.

D'Arcy Cashin, as the Intendant, was there "with the goods." He will make as grand a reputation on the Nevada stage as he possesses on the Greek Theatre stage.

Gladys Jones—well, she was just Gladys. The only thing we are wondering about is the fuzzy dog and its connections.

Luther DuBois makes a splendid Russian; his height and stature made him particularly suited to his part. His "fussing act" was a great improvement over a similar one in "Higbee of Harvard."

Miss Howe, as Poleska, was fascinating and attractive, as she always is.

Everyone who attended the play enjoyed themselves. It was a mixture of pathos, ridiculousness and naturalness, which is always satisfying.

THE EXECUTIVE COMMITTEE —WHAT IS IT?

From rumors and facts at hand about the transactions of the student body executive committee show that body to have assumed a state of lethargy or sleep from which they cannot seem to be aroused.

The Constitution defines and specifies in Article V exactly what the duties of the executive committee shall be.

One of the duties therein required is to "Bring matters of student concern before meetings of the Association."

In view of this fact this committee seems to be quite reticent about disclosing the "business" transacted at any meeting of the committee.

The real business transacted by this committee we are led to believe is carried on outside of the meetings and without an official vote. In just one instance let us

mention that no order was signed officially giving the baseball team \$175 to go to California. In another instance the accounts of the business manager of the U. of N. Sagebrush were "examined" and reported in an unofficial way, "satisfactory." Again the monthly report required of the business manager by Article VIII, Section 5, has received but little attention and has not been "examined" carefully enough.

If the student body intends to allow its interests to be controlled by a few lax members of this committee we can only foresee a rank exposure of some of the worst graft yet seen in student affairs at the U. of N.

For the best interests of this university the student body can not become too intimately acquainted with the so-called "secret" meetings and inner workings of the executive committee of the student body.

CONSTITUTION OF THE ASSOCIATED STUDENTS

(Continued from Last Issue)

Section 6. The profits of the paper shall be equally divided between the editor-in-chief and the business manager. If the editor-in-chief receives credit for his work, the business manager shall receive in addition 1-2 per cent of the total money for advertisements.

Section 7. The business manager or editor-in-chief, or both, may be removed by a two-thirds vote of the executive committee when the condition of the paper warrants it.

Article IX—Insignia

Section 1. At the close of the football, basketball and track seasons the captains and coaches of the respective teams shall recommend to the executive committee those members of the respective teams entitled to the privileges of wearing the 'varsity' letter, a block N. This privilege shall be granted subject to the following regulations:

1. The candidate must have participated in half, or time equivalent to a half, of a football game, or he must have played five innings of a baseball game, or taken one point in a track or field meet; provided, however, that if he were on the original team entering a football or basketball game and was prevented by injury from playing the specified time, he shall be granted an N.

Athletic contests for which N's are granted must be held with teams from the University of California or Leland Stanford Jr. university.

Section 2. The block N granted for football shall be ten inches high, and the block N granted for track and baseball shall be nine inches high.

Section 3. At the close of the women's basketball season, the captain and coach of the team shall recommend to the executive committee those members of the team entitled to the privilege of wearing the six-inch Gothic N. This privilege shall be granted subject to the following regulations:

1. The persons recommended must have participated in half or time equivalent to half of a women's basketball game, or they

must have been on the original team entering such a game and have been prevented by injury from playing the specified time.

2. And the games in which they played must have been with teams from any of the State Normal schools of California or the University of California or Leland Stanford Junior university.

Section 4. Block N's for football, baseball and track, and Gothic N's for women's basketball may be granted in special cases not covered by the foregoing by two-thirds vote of the members of the association.

Section 5. Men wearing block N's of a size granted for something other than that for which they received N's and women wearing other than the 6-inch Gothic N shall, at the discretion of the executive committee, be deprived of the privilege of wearing N's.

Section 6. No person who has not been granted the privilege of wearing an N shall wear one on either cap or sweater.

Article X—Meetings

Section 1. Regular meetings of the association shall occur on or between the first and seventh days of each month. The president of the executive committee may call special meetings, and shall be required to do so on the presentation of a petition signed by 50 members of this association.

Notices of all regular meetings must be published 24 hours in advance.

Section 2. Seventy-five members shall constitute a quorum.

Article XI—Amendments

This Constitution, except as otherwise provided, may be amended at any meeting by a two-thirds vote of those present, provided that the proposed amendment has been discussed at a previous meeting, or has been published one week.

Article XII—Miscellaneous

Section 1. Any act of any officer, or of the executive committee, may be repealed or amended at any meeting by a two-thirds vote of those present.

Section 2. In case of vacancies in any office provided for in the foregoing articles, the executive committee shall call a special meeting not later than one week after the vacancy occurs for the purpose of nominating candi-

dates, and they shall be voted on between five and ten days after their nomination, provided that eligible candidates in such cases with the exception of those for graduate manager, shall be members of the college classes next above those hereinbefore provided. Officers voted for and elected under the above conditions shall take office immediately after their election and hold office for the remainder of the collegiate year in which they are elected.

Section 3. Not later than 30 days after they take office the treasurer and graduate manager shall each furnish a bond of \$500, and the business manager of the paper a bond of \$100 as a guarantee for the faithful performance of their duties. The bond shall be approved by the executive committee. The expense of securing the bonds shall be met by the association.

Section 4. No person shall take part in any activity recognized or supported by the association unless he shall be a member of the association.

Section 5. No officer presiding over a meeting of any organization recognized by this Constitution shall discuss any matter whatsoever from the chair.

Section 6. This Constitution shall go into effect immediately upon its adoption.

Section 7. At the first regular meeting of the executive committee in each collegiate year, bullet in boards shall be designated as the official bulletin boards and all publications of notices herein provided shall be upon them.

BY-LAWS

Article I

Roberts' Rules of Order shall govern this association in all cases in which it is applicable and in which it is not inconsistent with the Constitution or these by-laws

Article II

Any member may call for a vote by ballot in meetings of this association.

Article III

Section 1. Dues for membership in this association shall be payable to the treasurer or some person designated by him

Judging a Mining Property

(Continued From Last Week)

In most cases ore exists in a well-defined vein easily distinguished from the walls and the waste material, and the determination of the ore and the measurement of the ore blocked out is not a difficult matter.

The superficial area of a block of ore in square feet multiplied by the average thickness of the vein in feet will of course give the contents of the block in cubic feet; and the tonnage may be found by dividing this amount by the number of cu. ft. required to make a ton of that particular kind of ore.

The factor of average vein thickness must be carefully determined by taking measurements across the vein at right angles to its dip. This may be done at the time when and at the points where the samples are taken, or it may be done independently of the sampling. In any case it should be done at a sufficient number of points across the ore body to give a fair average, and these points should be fixed by measurement to eliminate personal choice.

In mines where there has been a considerable amount of development the sampling of the ore is the really vital factor in mine examination; in cases of mining property in a prospective stage other considerations such as geological formation may and often do have greater weight. In the case of the prospect the prime consideration is as to the chance of finding ore—in the developed mine the prime consideration is the value of the ore already found.

Books, valuable and instructive, have been written on the subject of mine sampling, and rules for the guidance of those who need them are many; but ore bodies are so variable, and the conditions under which they exist so different that hard and fast rules for sampling should be viewed with suspicion and used if at all with prudence. The expert, if he is competent, will size up the situation and decide for himself just what method of procedure will give him the data required in any given case; if he be incompetent rules will not help him; that is to say, the knowledge on which the rules are based should be in the expert's head, a part of his mental furniture, so that he may go about his task ready for whatever develops, without trying to remember what the rules might say.

In a preliminary examination sampling need not be so extensive or thorough as in a final examination; but as most preliminary examinations are in fact final the first sampling should at least be sufficient to do justice to the mine. The method and amount of the work must be decided in each case by the man on the ground. It having been decided what bodies of ore are to be sampled and how extensive and intensive this work shall be, the method of taking each individual sample may vary according to the notions of the expert, but the result aimed at will be always the same, for the object of taking the sample is to secure an average of the ore in that section of the vein which the sample represents. For this purpose it should represent a uniform section of the ledge cut across the vein. The size of the section, so long as it is uniform and represents equal portions of the different vein strata, does not greatly matter.

Personally I like good-sized samples where the section is not less than 3 inches wide and 1 inch deep, and even larger; but in hard flinty quartz where the work must be done by hand this is almost out of the question. Where small sections are necessary greater care will be required in order that an undue proportion of the softer and probably richer ore may not get into the sample.

One good sample is worth a dozen poor ones, but next to care and skill in sampling, the number of samples is a chief element of safety, for only from a large number of samples can the aver-

age value of the ore be safely computed.

This is especially necessary in our Nevada porphyries, where the ore body is frequently a more or less highly mineralized portion of the country rock without clearly defined form and not easily distinguished from the surrounding mass.

When the samples are secured they should be prepared for the assay office by breaking the larger pieces down so that all will pass through a screen with half-inch openings, after which the entire sample is thoroughly mixed on a canvas, and quartered down to a suitable size.

This should be attended to with great care, the remaining portion of the sample after the opposite quarters have been discarded being thoroughly mixed each time. The one essential point to be insisted upon throughout is that the sample originally shall represent a fair average of the vein at the point taken, and that in each successive division the residue shall be a fair average of the original sample.

The assaying of samples is generally given over to public assayers, and it is not necessary to go into the detail of the work. Assayers as a rule I believe are honest and capable. The one criticism I would make of their work, and this should by no means have a too general application is carelessness. When it is remembered that the ounce or so of ore which the assayer finally melts represents 32000 ounces on his assay certificate it becomes evident how vitally essential it is that every possible error be excluded.

Having ascertained the results of the assays of his samples the expert will be prepared to calculate the value of the ore reserves. First of all, he will probably make of his underground map an assay map by marking on it the assay results at their proper points; this will show him just where the pay ore is located, the portions of the vein to be discarded from his estimate, the trend of the ore shoots, whether the ore values are increasing with depth, or otherwise, and other valuable information.

His next step will be to ascertain the average assay value of each block of commercial ore. The average assay value of a block of ore is not found by adding all the assays together and dividing the amount by the number of assays, although where the width of ledge is nearly uniform and the number of assays large this method is fairly accurate. The better method, however, is to

take each particular assay as a factor as many times as it represents feet (or inches) of the vein width. Evidently an assay representing 5 feet of ore for example has a relatively greater importance than an assay representing 1 foot, because it represents five times as much ore.

The tonnage of each block of ore multiplied by its average assay value equals the gross value, and the totals of the various blocks give the gross value of the ore blocked out, or in sight.

The ental processes which distinguish one portion of a vein as ore in sight will at the same time distinguish other portions as probable ore or ore partially in sight, but the method of estimating the latter class of ore is evidently quite different from that used in measuring the former.

Estimates of probable ore can not approach the degree of exactness attained in the estimate of ore in sight and they should not pretend to; but taken at their real value and without pretense to exact knowledge they are frequently quite as valuable in determining the wisdom of a mining transaction as the judgment of ore in sight. It is here that competent expert advice has a great and peculiar value.

I know it is often said that one man can see as far into the ground as another, and this as a bald statement of fact is true enough.

The Chinaman who first saw an electric car expressed about

all he saw in his oft quoted expression, "No pushee, no pullee, go like hellee;" but the trained mechanic sees not only the car but the mechanism that controls the turning on and off of the electric current sees the motor that responsive to the silent mystic power turns the wheels and moves the car, sees the trolley uniting the motor to the wires along which the current speeds, sees far off the power plant and the ponderous dynamo converting into man's use the mighty forces lurking beneath the foam and ripples of a flowing stream.

Y. M. C. A. MEN LECTURE

Benefits and Pleasures of the Organization Explained

Last Sunday and Monday Mr. Gale Seaman and Mr. Wm. DeWitt, representatives of the Y. M. C. A., were the guests of the university. Mr. Seaman is the Pacific Coast secretary of the Y. M. C. A. and Mr. DeWitt is the secretary of the association at the University of California.

Sunday afternoon Mr. Seaman and Mr. DeWitt met with the men of Lincoln Hall and both addressed them for a short time.

Their talks dealt with the great work being done by the Y. M. C. A. all over the continent, and it is seldom that the U. of N. men have an opportunity to listen to more interesting or instructive men.

Both of these gentlemen are college men, and young men, and they know how to talk to college men, and how to reach them.

Monday morning both gentlemen addressed the general assembly in the gymnasium. Mr. Seaman's address was on "The distinctive elements in the life of a college man." It was a talk which went straight to the point and as the facts were taken largely from his own experience and the experiences of his friends, one knew that what was being told was true and that the person talking knew what he was talking about.

Again at 6:30 Monday evening Mr. DeWitt talked to the Lincoln Hall men.

Both gentlemen left for California Monday evening. Their visit was certainly enjoyed by all those who met them, and it is to be hoped that they will pay us another visit at no distant date.

CAPTAIN ERG CALLS FOR SPRING PRACTICE

Twice-a-Week Schedule Is Planned—Light Work Will Be In Order

Stanford University—The first Spring Rugby practice was started on the Auxiliary football gridiron at Stanford last week. This was the announcement of Captain P. E. Erb, '12, at a football meeting in room 50 last week.

Erb stated that no hard work is to be undertaken but that spring practice is to be instituted simply to get the men familiar with the details of the English game. Workouts are to be held twice a week on Tuesdays and Thursdays, and to continue for four or five weeks. The training house quarters will be shared with the baseball men.

Games will be played with outside teams whenever the occasion offers. The first game will be played with a 15 chosen from the Palo Alto company of the National Guard of California.

There will be little coaching undertaken and the practice will be made as interesting and informal as possible. About 25 men have signified their intention of turning out for practice and this number will undoubtedly increase before the first practice. — Daily Palo Alto.

This plan is exactly in line with that advocated by The Sagebrush not long ago, and will no doubt be carried out successfully by the Stanford squad. However, there is still plenty of time left and Nevada may take advantage of the Spring practice.

AGRICULTURE CLUB

The postponed meeting of the U. of N. Agriculture Club will be held on Monday evening, March 20, 1911, at 7:30 sharp. This meeting will be held at Prof. Knight's home, 1015 Sierra street. Vice-Prex. Patrick. C. A. Milentz, Sec'y.

Lady was going down for third time. Madam, you hand, thundered the lifesaver, leaning over the skiff.

Oh, this is so sudden, sir, she blushed, and sighing he let her drown.

Can you subscribe?

Hooray for the Mech. building! Irene Conkey, '10, was a visitor at the U. of N. last week.

A note in a co-ed's book—"Eat Quaker Oats and get "Fat."

Some folks say a boy won't steal. I caught a fellow by the name of Teele.—Dummy editor.

The legislature went home. They have not hurt the State Treasury with university appropriations.

Fussing (alias Queening) is now seen glaring before the eyes of unsophisticated Freshmen who are striving very hard to resist temptations.

Constitution of Associated Students

Continued from Page Two

each semester upon registration. These dues shall go toward the support of student activities and their amount shall be fixed by the executive committee and faculty committee on student affairs.

Section 2. Persons registering at any other than the regular times shall be required to pay the full fee.

Section 3. All revenues derived from other sources than dues paid for membership shall be turned in to the treasurer immediately after their receipt to be devoted to such purposes as the executive committee sees fit.

Article IV

Section 1. Not later than one month after the various teams disband, the members thereof shall meet to elect captains. These shall be elected in the following manner:

The graduate manager or the women's athletic manager shall name the eligible persons, and each member of the team shall vote by ballot for one of the persons named. No nominations shall be made. The graduate manager or the women's athletic manager, and the coach shall count the votes and announce as captain the person receiving a plurality.

Section 2. All captains of the athletic teams shall be elected from the Sophomore or Junior classes, except as provided in Section 3 below.

Section 3. A vacancy in the captaincy of any athletic team shall be filled by those ex-members of the team in college electing from their own number a Junior or Senior in the manner described above. Captains elect immediately after their election and hold office until a new captain is elected as provided in Section 1 above.

Section 4. Captain elected as provided in Section 1 above shall take office immediately after their election and hold office until a new captain is elected as provided in Section 1 above.

Article V

At the beginning of the first semester candidates for the position of yell leader shall try out before a committee consisting of the president, vice-president and the graduate manager of this association, together with the old yell leader and one assistant. This committee shall decide on the person most eligible for the position. The president shall appoint the candidate decided on by the committee.

Section 2. Candidates for yell leader must be members of the Sophomore or Junior classes except as provided in Section 4 below.

Section 3. The yell leader shall take office at the beginning of the collegiate year and hold office for one collegiate year.

Section 4. Vacancies in the office of yell leader shall be filled in the manner described in Section 1 above, except that if the old yell leader and his assistants be absent the captains of the various men's athletic teams shall act in their place, and that the candidates must be members of the Junior or Senior classes.

Article VI

These by-laws may be amended in the same manner as the Constitution of the association.
