

## BIG RALLY!! THURSDAY!! RALLY!!

### AGGIES WILL PRESENT SHOW PRIOR TO SANTA CLARA MEET

#### Aggie Rally A-Auto-Rally

Varsity Parade and Show At  
Grand Thursday Night;  
Funds for A. S. U. N.

By L. B. PATRICK, '13

Thursday is a big day in "farmerdom." All the farmers, little, big, old and young and all their friends (and they have friends, too), are to have some regular rally and show at the Grand theater next Thursday eve in advance of the Santa Clara-Nevada track meet.

It is a well known fact that the Silver in the jeans of Nat Wilson, the A. S. U. N., so far as the association is concerned, is running at low tide, and that unless the boosters all boost there will be an under tow and the treasury will be a missing link altogether, leaving the debts of this year for the 1913 Rugby team to pay off before they can start ahead.

It is to alleviate this condition that the farmer students have devised a most peculiar and unique show for the stage Thursday night. They refuse to divulge the nature of the show, but state that it has never been seen in Reno before (not even behind a picket fence).

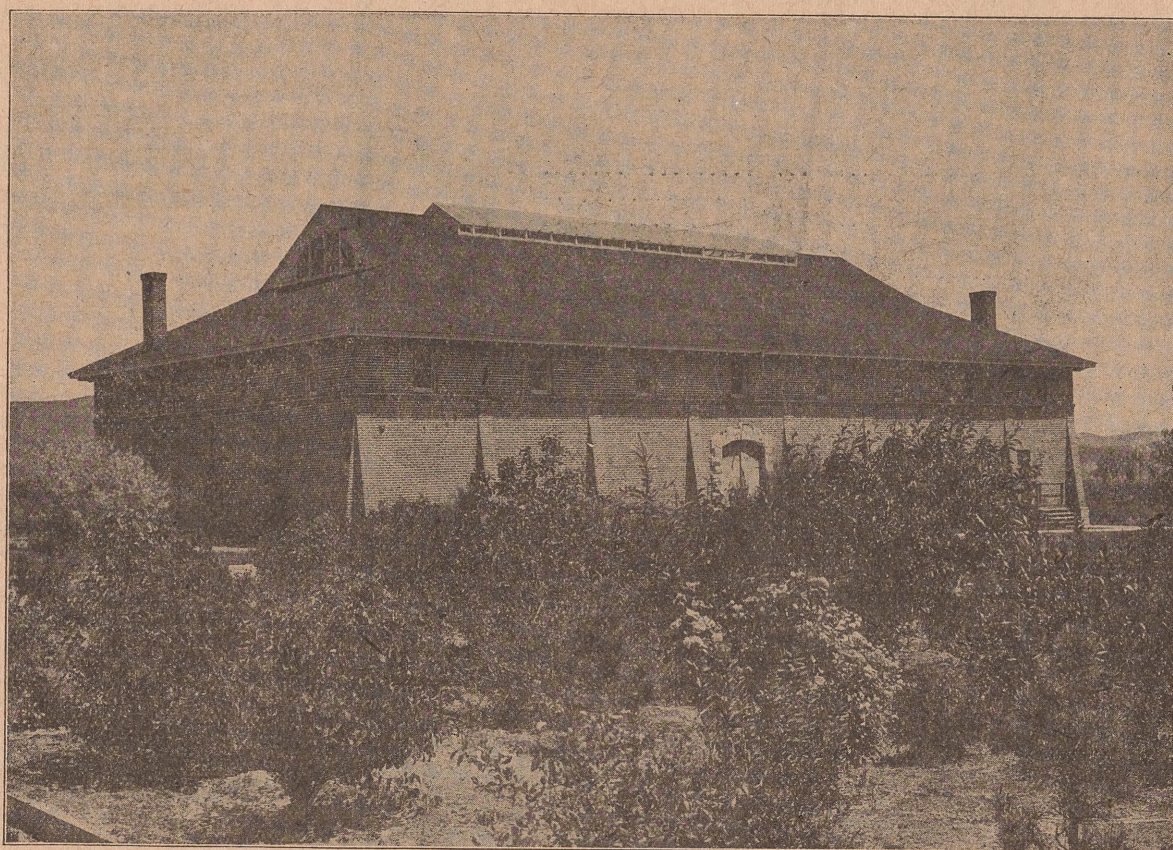

In addition to the aggies' part of the show they have secured the services (gratis of course), of the Glee club, the Mandolin club and other stunts which they intend to present on the eventful night.

It is stated that "Hungry" Henningsen and "Husky" Sinal are to put on a little skit after the show is all over and the crowd given a chance to go home. The ushers of the theater, however are against such performances, as it only necessitates that they usher for a second show and incidentally take up more tickets. All of which only shows that the show is going to be a howling success.

#### Some Gasoline Parade

Preceding the show the students are earnestly requested to congregate on the Mackay quadrangle and enjoy a gasoline ride about town and dispense yells and band selections with the obligato of auto sirens.

The exact time and further particulars of the rally will be posted on the bulletin board on Wednesday so that all students and faculty and a lot of their friends can learn the exact time of the show and the gasoline parade.

THE GYMNASIUM

#### Prof. Howes Has Resigned

Prof. E. A. Howes has resigned. His resignation was handed into the president's office some time ago and on Tuesday last it was accepted by the board of regents. It was with regret that they accepted it and they wished this member a success kindred to that he has achieved in Nevada (they could not have expressed it stronger) in all of his future enterprises.

Prof. Howes will leave Reno for his new position in Canada about July 1. His position there is one complimentary to the faculties of this professor. He will be dean of the new agricultural school at Vermilion, province of Alberta, Canada.

The Canadian government is establishing a large number of agricultural schools and demonstration farms throughout the dominion. The idea is a new one and the school at Vermilion, which is to be supported by the dominion government in conjunction with the province of Alberta, is one of the first to be started. The demonstration farm is particularly new. In the main universities have conducted experimental farms and, as these are devoted chiefly to experimentation work, they are not self-supporting. The demonstration farm is conducted along different lines. Its object is to keep the farmer on the soil, instead of educating him away from it as is the practical result of so many of our agricultural colleges. A demonstration farm, as its name implies, is for the practical demonstration of scientific agriculture and it is entirely self-supporting.

In conjunction with his work at the Vermilion school Prof. Howes will establish an experimental union similar to the one established here and of which our college of agriculture is now the center. Under him in his school work he will have a staff of five assistants, and all courses preliminary to the profession of farming (Continued on Page 4)

#### P. D. T. Had Some Party

Phi Delta Tau entertained the varsity faculty and friends at an informal dance Saturday night. Every dance on the hill is announced the best until the next one outclasses it. So it was with the Phi Delta Tau dance. The decorations eclipsed those of any other dance this season. A large arc light in the center of gym was enclosed in a lavender shade shaped like the fraternity pin. From the arc extended streamers of lavender ribbon ending in a lavender lattice work under the balcony. Columns of the same dainty color upheld the lattice work and enclosed the lights. The effect was beautiful. Every light was shaded with lavender and threw a soft glow over the dancers.

Ostriff's orchestra contributed entrancing music for 75 couples. Deline (Continued on Page Four)

#### Reno High Defeats '16

By A SPECTATOR

The freshmen track team suffered a decisive defeat at the hands of the Reno prep team Saturday. The preps took the lead at the start and never was the outcome in doubt even though there was a little excitement. The Reno boys have the making of a good and with practice and consistent training should develop a well balanced team. Harriman and Laveaga were the mainstays of the High School boys. Harriman captured three firsts while his team mate took three firsts and two seconds. Hovey and Rose did their share for the babies but were unable to do it all.

The meet was conducted in a slow manner. This was due to the fact that outsiders were allowed on the field and apparently allowed to give decisions as well as the judges. It is a deplorable fact that the U. of N. has no stringent rules forbidding spectators and persons not contesting to run loose over Mackay field and track. It should be stopped. For the sake of visitors, spectators and all concerned no persons should be allowed to tramp around on the field and ruin the condition of both. Something should be done to stop this bad habit and those who have the authority should see to it that such regulations are enforced.

The outcome of events is as follows:

50-yard dash—Harriman (R), first; Raines (R), second; Johnson (F), third. Time, 5 4-5.

100-yard dash—Hovey (F), first; Whitmore (F), second; Robinson (F), third. Time, 5:36 1-5.

100-yard dash—Harriman (R), first; Raines (R), second; Fogel (R), third. Time, 10 4-5.

Pole vault—Laveaga (R), first; McCubbin (F), second; McCarthy (R), third. Height, 9 feet 9 inches.

440-yard dash—Martin (R), first; Chism (R), second; Able (F), third. Time, 58 1-5.

(Continued from Page Five)

#### "Dopester's" On Saturday Meet

Evenly Matched Teams to  
Draw Crowds of Sport Lov-  
ers Saturday

But four days remain until we shall know the result of the Nevada-Santa Clara field meet. Those who have kept in touch with Santa Clara through the papers and their personal knowledge of the team and have watched the Nevada men through the spring training, say that it is Nevada's year to win. From an unbiased consideration of the facts in the case it does seem that Nevada should get one back at the boys from the valley in that meet. Coach Holway is confident of success.

The score is going to be close, say the wise ones; it is bound to be. Santa Clara is strong where Nevada is weak and Nevada is strong where Santa Clara is weak. Each team has a group of strong men to bank on. Lining the whole squad out and picking the ones whose work through the season has shown that they have the stuff to win would dispose the familiar names. Ogilvie and Hovey are expected to finish the half mile in the order named. Captain Bringham is figured for first places in the quarter and 220 and for a place in the century. For places in the same three events put Ole Hylton on your list, say the dopesters. Pennell, Rose and Hancock are good for a couple of places apiece; the first two will probably get at least one and two in the broad jump. Look out for Reynolds in the two-mile. Billy Pennell is the general utility man and he, with Bill Smyth, will make Santa Clara hump to win all three places in the high jump. "Buck" High, the man upon whom Nevada has been banking for the shot put, broke his first finger Mackay day. Buck, hand in plaster cast, went back to training yesterday; "Hungry" Henningson is his colleague in the weight stunt. In the pole vault Nevada may secure a place but as McCubbin is the only Nevada entry, it will be an uphill fight for the freshman. The relay race will be of the one-mile variety and four strong quarter men have been picked for the Nevada side of it. These are Bringham, Hylton, Hovey and Powers. Nevada expects to win it.

## Reno High School Notes

On Tuesday morning the second program of the year was given. The numbers were especially pleasing and all voted the event a success.

On Friday a. m. in assembly Mr. Wellman Bruner was presented with a loving cup from the boys of the school. This token was given in appreciation of Mr. Bruner's services to the school. This is his last year at the Reno High, as he expects to leave Reno.

On Friday evening the tryouts for the declamatory contest was held. The audience was rather small, but the contestants did fine work regardless of this. Miss Elenor James won the girls' contest, while Dean Bryant gained a victory over the other boys. Isabel Rising and Newton Jacobs were chosen as alternates.

On Saturday afternoon the Reno High gained its first victory over the University of Nevada freshmen. The meet was a success, and the outlook of the Reno High is by far more promising for the academic than expected. In the sprints Harriman took three firsts, Raines took two seconds and Fogle one third. Martin and Chism took first and second in the quarter. In the half McCarthy gained second. Hovey of the university broke the state record, running it in 2:09 3-5. Hovey also took the mile, and his team mates, Whitmore and Robinson, followed him closely. Franzman ran a heady race for the High School, as did Melarky. In the hurdles Rose of the varsity gained both first places. He ran the 120 hurdles in 16 3-5, a new track record. Lavega took second in both events. The pole vault was won by Laveaga, McCubbin, freshman, second, McCarthy, High School, third. The Reno High took all three places in the high jump, Laveaga and Fogle tied for first and Clifford took the third place, Laveaga took the broad jump, Rose of the varsity, second and Raines, High School, third. The shot was won by Henningson, varsity, and his team mates, High and Able.

On Wednesday evening the two literary societies will close for first honors at the High School gym. It will be one of the most spirited contests ever held in the High School, as both societies have been working hard, besides the recitations there will be a debate, the subject being, "That Immigration is Detrimental to the United States." One coming Wednesday evening can be assured of a very pleasant evening.

A minstrel show is now in progress under the direction of Mr. Pierce. The production will be presented on May 2. This is the first attempt of a minstrel show and all of the cast are working hard to make it a success.

Saturday, the 26th, is set for the try-out for the track team to represent the Reno High in the coming academic meet.

### "DOPESTERS" ON SATURDAY MEET

(Continued from page one.)  
ists have been doing some good work on their own account. The following clipping from the San Francisco Examiner reveals their achievements in the trials for the Nevada meet, but there is nothing in them to give Nevada grounds for worry:

UNIVERSITY OF SANTA CLARA, April 19.—The Santa Clara squad of track athletes gave a splendid exhibition in the trial meet on the Mission oval this morning.

The meet between the Santa Clarans and the University of Nevada is scheduled for the coming Saturday and it is the general opinion that the outcome will hinge on the relay and sprints.

Haskamp, Best and Hardy, the varsity men in the sprints, have shown themselves to be in excellent condition during the workouts in the past week. Best has developed an entirely new stride and at different times has shown a wonderful burst of speed in the 220.

Momson, Milburn and Caspars are showing great form in the 440, and although Momson won his race yesterday he had to extend himself.

The results:  
100-yard dash—Haskamp, first; Hardy, second; Davis, third. Time, 10:30.

220-yard dash—Best, first; Davis, second; Ginnochio, third. Time, 24 flat.

440-yard dash—Momson, first; Mil-

burn, second; Caspars, third. Time 57 flat.

880-yard run—Yoel, first; McCarty, second; Zaput, third. Time, 2:12.

Mile—Schino, first; Benness, second; Costel, third. Time, 4:48.

220-yard low hurdles—Hardy, first; Fitzpatrick, second; Ramage, third. Time, 27 flat.

120-yard high hurdles—Haskamp, first; Fitzpatrick, second; Noonan, third. Time, 16 flat.

#### Field Events

Shot put—Kiely, first; Sweezy, second; Boone, third. Distance, 44 feet.

Hammer throw—Cochina, first;

Kiely, second; Sweezy, third. Distance, 160 feet.

High jump—Haskamp, first; Ferrario and Leonard, second. Height, 6 feet 1 inch.

Discus throw—Cochina, first; Kiely, second. Distance, 137 feet.

Broad jump—Hardy, first; Momson, second; Haskamp, third. Distance, 21 feet 10 inches.

#### Coach Will Sprint

In the course of the meet Coach Howley is going to extend himself for the 110-yard world championship. The record now at 10 4-5, the coach has equaled in practice and he aims on Saturday to officially knock it down a notch.

## Nevada Cadets Receive Flag

**Bran New Colors Accepted by Battalion Wednesday With Fitting Ceremony**

The old national flag, which has been saluted by the battalion for the past ten years or more, and has served as an incentive to spur the companies on to excellence in drill at the annual inspections, has been saluted for the last time and has now been placed among the valued trophies of the military department.

The first purchase out of the money appropriated by the last legislature for the military department of the university was that of a new national flag. The flag was received a few days ago, and is of the finest banner silk—it is no exaggeration to say that it is the finest and most beautiful flag in the state.

At the weekly review and inspection last Wednesday, the new flag appeared for the first time. Preceding the review, the flag was received by the cadet battalion with befitting honors. Escorted by the color guard, Color Sergeant Cogwill, proudly bearing the new flag, took his place in front of the center of the battalion. At the command of Cadet Major Wilson the battalion presented arms, the field music sounded "to the colors," and the new flag was brought forward to salute in acknowledgment of the honor. It is only on such an occasion as this that the national colors execute the salute. It was a beautiful ceremony, and with the flag waving in the breeze, was calculated to inspire a feeling of increased patriotism and love for that flag in the heart of every one present.

The appearance of the new flag has already had a magical effect on the cadets of the battalion. There is going to be some hard work done by the two companies before the annual inspection, and it is a safe prediction that when the two companies appear in competition before the inspector, the two finest company drills ever witnessed at this university are going to be seen. The best company will win and will carry the flag for the next year, but there will be honor in defeat.

## Candidates

For president—John I. Cazier.  
 For vice president—Clark Webster, Harvey McPhail.  
 For secretary—Nell Morrow, Maude Price, Grace Mahan.  
 For treasurer—William I. Smith.  
 For sophomore member executive committee—Elmer Abbott, H. C. Neeld.  
 For freshman member executive committee—Irving Van Dalsem, Coin Cazier, John Lemburger.  
 For women's athletic manager—Lisle Rushby, Myrtle Neasham, Lella White.  
 For graduate manager—Silas E. Ross.  
 For editor "Sagebrush"—Elmer Wiley, Bob Farrer.  
 For business manager "Sagebrush"—Delwyn Messar, Joe McDonald.  
 Persons may be nominated for any office if notice is served up to within 48 hours of election. Election day is Friday, May 3.

### POPE-HARTFORD 1913

The students of Nevada are indebted to the Pope-Hartford automobile agency for furnishing machines to the co-eds at the Mackay day rally. The favor worked both ways too—the Pope people were proud to have such a charming crowd of passengers; and that crowd of passengers are hoping that they are worthy of the car.

### SI TALKS

Silas E. Ross of the state board of food and drug control, delivered a lecture on the labeling of food and drugs before the civics section of the Century club last Saturday afternoon.

Dr. Maxwell Adams of the department of chemistry left Saturday night on a trip to Tonopah and Goldfield and the southern district on a school inspection tour. While on his trip Dr. Adams will incidentally book the academic meet.

Frank Peterson has been making a visit of several days in Salt Lake City on business connected with the irrigation investigation.

## High Schools Show Interest

**Lovelock School First to Enter Teams in the Nevada Meet. Spaulding & Bro. Offer Cup**

That the high schools throughout the state are showing great interest in this year's academic meet is evidenced by the large number of letters and inquiries received by the board of control. Every day Prof. Scrugham receives some kind of inquiry relative to the rules and regulations either of track, tennis or declamation contest. Last Friday the first definite entries were made. They came from the Humboldt County High School at Lovelock. By this letter Craig Friel (fourth year) was entered for the shot put and Fannie Howard (first year) for the declamation contest. Besides these, the same school entered its team for the girls' tennis tournament as follows: Ruth Davis (third year), Manilla O'Neal (first year), Ruth Schorling, alternate (third year).

### Spauldings Offer Trophy

The A. G. Spaulding Co. of San Francisco has offered a handsome loving cup to be used as trophy by the Nevada Academic league. The team gaining the highest number of points for two successive years possesses the cup, but until the cup is thus won it will remain in the trophy case in the lounging room of the Mackay training quarters.

## Miss Sameth Trains Class

**Dancing on Green This Year Will Outshine All Former Efforts**

With but three weeks more until commencement, Miss Elsie Sameth and her class in physical training are working faithfully so that their entertainment, which has been tentatively set for the evening of May 12, will be in every way a success. The dancing on the green this year promises to be even a greater feature of commencement week's entertainment than in former years. Through the series of dances a little story will be run that will connect six parts. Miss Myrtle Neasham and Miss Dorothy Bird are the authors of the plot. The girls of the freshman and sophomore classes have been divided into two groups who will appear alternately.

In addition to the presentation of this cleverly arranged program by the college women, the children of the first, second, third and fourth grades of the Reno schools will appear. These are being trained by the women of the College of Education. They have been divided into four groups and each group will appear separately.

The evening's program will conclude with the May-pole dance.

### DR. FRED RULISON MOVES

Dr. Fred Rulison of the Rulison Bros., dentists, has moved his offices to more commodious quarters in rooms 3 and 4, Sunderland building. He has the new offices fitted up into first class dental parlors and will be pleased to meet all his old friends and new ones in his new office.

Louis Rose has accepted the position of assistant engineer at the Nevada hospital for the insane. Louis' employment there will be in line with his college engineering work here, as it has to do with the power plant and steam boiler at the asylum, and it permits of his continuing his course at school.

### FOR SECRETARY

Miss Grace Mahan is a candidate for the office of secretary of the A. S. U. N. instead of for women's basketball manager as was published in last week's issue of the Sagebrush.

Dwight Leavitt, '07, was a visitor in Reno Thursday and spent some time on the hill. Mr. Leavitt is manager of the Truckee River General Electric company's interests in Virginia City and vicinity.

### SHOWERS

The tennis courts are well on their way to realization. Showers is the next improvement to be agitated. The University of Nevada has a gym—but the gym has no showers. The University of Nevada provides a course in physical training for its young ladies—but it does not provide showers to make that course either safe, hygienic or beneficial. It is uncleanly, unsanitary, dangerous for girls to exercise vigorously on the gym floor and then, tired and perspiring, to change the costume of the gym for the costume of the street without the needed shower. It is inconsistent for a university to require it of its students. Nevada has done it for years and is still doing it—it is not a drawing card for the college. The gym must be provided with showers.

In years past funds for the purpose seem to have been lacking. Miss Sameth is arranging a series of entertainments for next semester to start a fund. It will require a good deal of money to equip the gym properly with the needed improvement, but the money must be provided. Whether the money comes from the state,

whether it is raised or whether it is subscribed is a matter of little moment—that gym must be equipped with showers before Nevada can truthfully advertise the worth of her course in physical training to the world.

### THE WRONG SPIRIT

We were all freshmen once. The harder we worked for the old U in that, our most joyous year in college, the happiness we are to look back on it. The wrong spirit was shown in student body this morning. It was the spirit that the class of '16 is being driven to its work. No freshman class should work for the college in that spirit. The freshmen have shown the right spirit in being well represented in every activity that required work during the whole term. The traditions of the school, however, prescribe that track and field be put in shape by the first year boys preliminary to each contest. The request of President Settlemyer, therefore, was neither unusual or uncalled for. Put your shoulder to the wheel, '16, there are only a few weeks more and there are a bunch of freshies coming.

## Letter Comes From Islands

In line with the policy of the Sagebrush of publishing news and articles that tend to bind active and alumni students of the college more closely together, your paper this week is publishing an interesting account of the Philippines which comes from J. E. Sears, a graduate of the C. E. department. The letter is printed through the courtesy of Prof. Boardman and some of its more personal elements have been omitted. It will be of primary interest to engineers. The letter follows:

The Government of the Philippine Islands, Department of the Interior, Bureau of Lands, Manila.

March 8, 1913.

Prof. H. P. Boardman, Reno, Nev., U. S. A.

Dear Prof. Boardman:

Your letter of December 31, 1911, was duly received a little over a year ago. To be exact, it was received at the Manila P. O. 8 p. m. January 31, 1911. At that time I was in the hills.

I will take your letter up item by item. Am glad to know that they have made those improvements on the front of the campus. It will certainly make things look more ship-shape. When I get back to Reno again I will need a guide to pilot me around. How has the state legislature been treating the university the last three years?

Now I will answer a few questions for you. "How do I like my job by this time?" Well, much better than I did when I received your letter on December 11, 1911. As long as I stay in the islands I shall stick in Manila. They have me moving from barrio to barrio. Chow was scarce, and bamboo floors get exceedingly hard before morning, and furthermore I had to furnish hot meals at all hours for about a bushel of hungry bedbugs. Also, one gets pretty anxious to hear a little English spoken once in a while. The native lingo, with a mixture of Spanish, gets monotonous. But in a few years more one

will be able to travel, practically all over the islands, and meet up with natives who can speak English.

The bureau has a "very good" way of breaking in the new men. They kick you out in the jungles with an outfit and tell you to root hog or die. At least, that is the way they did with me. Well, I will be honest. Some times I made good on a job and some times I made "bad." Anyway they have increased my pay instead of firing me. It takes a new man about two years to get "wise." Most every thing is done the reverse to what it is in the states, i. e., the things that are purely eastern.

Now, concerning subdivisions. You have nothing like it in the U. S. so far as I know. The lots are very irregular, and in making a subdivision

## Prof. Howes Has Resigned

(Continued from Page One.) will be taught. The school is for the benefit of co-eds too, and as a result instruction in domestic science is especially featured. In three years the Canadian government will establish an agricultural college in Alberta, similar to the Guelph institution, and at that time the Vermilion school will, of course, become subsidiary.

Prof. Howes will so organize his experimental union work and other branches favorable to the Nevada farmers, which he has made tributary to the institution here, so that his successor can continue without loss of time. This he expects to have finished before June is over and he will be ready to leave by the first of July.

Prof. and Mrs. Howes have made many friends in Nevada. Both of them leave with regret. Prof. Howes has endeared himself to students and faculty alike in this brief term. He is known, not only to the students of his own department, but by his college spirit, he has become popular with all. The university and the agricultural interests of this state realize that a valuable man is leaving. The Sagebrush joins all in wishing for him and his family every happiness and success.

## P. D. T. Had Some Party

(Continued from page one.) cious fruit punch was served by a smiling darkie. The march was led by Miss Mary Leon and Waterfield Painter.

The patronesses were: Mrs. Scott Jamison, Mrs. Painter, Mrs. Howes, Mrs. Howard Ferris, Mrs. Kaye, Mrs. Hobbins and Mrs. Krall.

you have to pick up the monument to which the lot is tied. Then run a traverse out in the general direction to where the division is to be made. When you think that you are in about the right longitude and latitude compute the bearing and distance from your traverse sta. to the corner. Then run the traverse across the lot and pick up the other corner. This, as you will see, is a sort of a cut and try method, and only works when you can find the monument to which the lot is tied. Generally it takes considerable time to find the monument and make the computations. This is necessary in order to make the new work jibe with the old work, and to keep in the good graces of the office. In making an original survey you place your traverse sta. in the handiest place, and shoot in

**THE EXILE**

I want to go, want to go, want to go West again,  
Out where the men are the truest and best again,  
Out where my life will have savor and zest again,  
Lord, but I'm sick for it, sick for it all!  
Sick to be back where my heart is unbound again,  
Somehow I'm lost and I want to be found again  
Where I belong, on my natural ground again,  
Out where the men and the mountains are tall.

I want to go, want to go, want to go West again,  
Feel the brisk air in my throat and my chest again,  
Wing myself back like a bird to the nest again,  
Up where its roomy and open and grand,  
Up where the sunshine is golden and glorious,  
Manners as bluff and as bracing as Boreas,  
Nobody distant—and no one consoracious,  
Comradeship sure of the deep Western brand.

I want to go, want to go, want to go West again,  
Hear the old gang with its quip and its jest again,  
Ride a good horse and be decently dressed again—  
Corduroids, Stetson and old flannel shirt.  
Flowers and trees—I have suffered a blight of them,  
Give me the peaks with the gray and the white of them,  
Blessed old memories—yet how they hurt.

I want to go, want to go, want to go West again,  
Up near the top of the mountainous crest again—  
Gulches and gorges and cliffs and the rest again,  
Heaving themselves in their grandeur to view.  
Let me just feel the old thrill in my breast again,  
Know the old cam'radeire mutely expressed again.

**Ohio University Damage Slight**

COLUMBUS, O., April 12.—Although 192 acres of the Ohio state campus were completely covered by the rise of the Olentangy river, which runs through the university grounds, the damage to property is exceptionally small as compared with Columbus or the rest of the state. It will probably reach \$10,000.

The track on the university spur was torn up and the trestle across the river was demolished. No coal or freight trains can enter the campus until this is repaired.

Heavy damage was done on the poultry farm on the west side of the river, including 1500 eggs about to hatch and nine incubators. The hog barn was in water up to the eaves. The flood rose to within a few feet of Townshend hall and skirted the cattle barns.

Many students living in towns suffering heavily from the flood have not returned, and while several deaths have been reported none has been verified.

Prof. Scragham left Friday night for Elko where he will confer with the Elko Power company relative to contracts which will amount to \$30,000, for electrical machinery to be installed by that company.

Assistant to the Director Morgan of the Berkeley experimental station visited Professor True of the agricultural department here Friday on business connected with his department at California.

C. J. Heisey of the governmental experimental station near Fallon was a visitor on the hill during the week. Mr. Heisey is also the secretary of the Churchill county fair.

Dr. Mack made a trip to Ludwig last week where he was called on departmental matters.

Gee, but I want to go, want to go West again,  
Back to the mountains, old girl—and to you!

BERTON BRALEY.

## Huge Block N Grows Rapidly

Coat of Whitewash All That Is Necessary to Make Letter Gleam for Santa Clara

A bigger crowd than ever climbed to the Reno Mizpah to work on the "N" Sunday morning. As arrangements for hauling the whitewash to the mountain could not be made last week the letter was not whitewashed Sunday. The men, however, pitched in to the work of throwing rocks so as to make the job a more finished and permanent one, with the result that the letter is plainly visible from the campus even without the aid of the whitewash. If the plans of those in charge carry, a number of the men will go to the "N" on either Wednesday or Thursday afternoon and give it a good coat of whitewash. Everyone is anxious to have the letter entirely finished by Saturday as the boys have worked hard, and it seems a shame not to have the result of their labor more in evidence on the date of Nevada's biggest track meet.

Those who betook themselves to the mountain side last Sunday morning are: Harold and Oliver Layman, Abbott, Farrer, Phlegging, Hamilton, Stoukie, Webster, Lampe, McPhail, Frandsen, Krummes, Dessar, Henningsen, McKinley, McDonald, Walker, Reynolds, Somers, Healy, Harvey, Hecox, Quigley, Shannon, Pearson, Cafarata, Swaine, Pennell, Charles, Parsons, Neeld, Evans, Faber, Joe Wilson, Allen, Raymond, Boyes, Lemburger, Cazier, Abel, Borchart, Settlemyer, Mackay, Anderson, Haun, Wiley, Smyth, McCreery, Sinal, Barton, Patrick, Johnson, Hylton.

### MILITARY SCHEDULE

April 18, 1913.

Memorandum No. 17

The following schedule of instruction for week commencing Monday, April 21, is hereby announced:

Monday, April 21—Battalion drill, close order.

Tuesday, April 22—Battalion drill close order.

Wednesday, April 23—Battalion review and inspection, followed by guard mount, guard detail to be announced later.

Thursday, April 24—Company drill. During the week's drill all movements prescribed for company and battalion will be executed. Officers and non-commissioned officers look up their drill regulations and familiarize themselves with every movement.

After the Wednesday formation there will be no formation in blue uniform until the inspection, April 30. All cadets must take immediate steps after Wednesday to have their uniforms placed in neat condition—pressed, cleaned, if necessary, missing buttons and ornaments replaced. Service uniforms must also be placed in good condition. At the inspection, the nature of the report which the inspecting officer will give the battalion will be influenced largely by the personal appearance of the cadets, the neatness of the uniforms, and the condition of the personal equipment. Attention to these details reflects the military training and are equal in importance to a thorough understanding of the drills. By order of the COMMANDANT OF CADETS.

### DR. CAMERON VISITS

Dr. F. K. Cameron, chief of physical and chemical investigation of the bureau of soils, Wash., D. C., visited the university and co-operative laboratory Friday. Dr. Cameron has been on an extended tour of the west investigating the giant kelps of the Pacific coast and the fish scrap market of the northwest. While here he consulted with Prof. George J. Young and John A. Cullen as regards the potash work of the desert basins. Dr. Cameron is one of the most eminent scientists in the country and the author of many publications. He expressed himself as being very well pleased with the work of the co-operative laboratory.

Donald B. Brander, who has been confined to the hospital for the past several weeks with an attack of appendicitis, is again able to be around and celebrated Sunday by visiting his haunts at Lincoln hall. Mrs. Donald B. Brander has been in Reno, too, during the illness of her husband.

Jay Skinner and Bert Cahlan were visitors on the campus Thursday.

Read the Sagebrush for all the college doings.

## Money Matters Engage Regents

Board Met Last Tuesday to Make Budgets and Discuss Improvements

The board of regents met last Tuesday for the purpose of considering the budgets for next year. They will convene again on May 1 and the budgets, which by that time will have been prepared as a result of Tuesday's meeting, will be approved.

Definite action was taken relative to the erection of the new library building, which is to cost \$10,000, and the dairying building, which will cost \$4800. Actual construction will be begun at an early date and it is expected to have both of these structures ready for use at the beginning of the next semester. It was also planned to have the northeast corner of the basement of Stewart hall, which is now utilized as a sort of general store room by the library, converted into a ladies' parlor and rest room. Work upon this will be begun at once in order to have it in readiness at commencement time.

At their meeting Tuesday the board took up in detail a long list of improvements and discussed their advisability and feasibility at the present time. The list is a long one and when all of them have been accomplished, which they will be eventually, it will be a long stride in the direction of our campus beautiful. Among these improvements may be listed the following:

A ladies' parlor in the basement of Stewart hall, a complete renovation and refitting of Lincoln hall, shower baths for women in the gymnasium, a concrete bridge across the Orr ditch on the main driveway, lattice-work enclosure on east side of Manzanita hall, planting of new trees and lawns and general ground improvements, a park on area back of Lincoln hall, a cement aqueduct for the Orr ditch across the lower end of the lake. Some of these improvements will, in all likelihood, be made in the very near future; others will eventually be made; all, until after May 1, when the board will take definite action, are best described as "contemplated."

## Official List Of Eligibles

The following are the lists of men who are eligible to compete according to the Nevada-Santa Clara contract, in next Saturday's meet:

### Nevada

100-yard dash—Hylton, Bringham, Powers.

220-yard dash—Bringham, Hylton Powers.

440-yard dash—Bringham, Hylton, Powers.

880-yard run—Hovey, Ogilvie, Robinson.

Mile run—Ogilvie, Hovey, Kent.

Two-mile run—Reynolds, Kent, Ogilvie.

Broad jump—Rose, Pennel, Hylton.

High jump—Gilcrease, Smythe.

220 hurdles—Hancock, Pennel, McPhail.

120-yard hurdles—Pennel, Rose, Hancock.

Shot put—High, Henningsen, Abbott, Hancock.

Pole vault—Bacon, McCubbin, Patterson.

Hammer throw—Henningsen, Phlegging, Jepson.

Relay race—Hylton, Hovey, Powers, Bringham.

The above is subject to change according to weekly showing.

R. A. Bringham, captain; C. E. Holway, coach; S. E. Ross, manager.

### Santa Clara

Allen, Barnard, Bennesen, Best, Blinn, Bronson, Caspars, Coschina, Crane, Curry, Davis, Fitzgerald, Fitzpatrick, Gianella, Ginocchio, Hardy, Haskamp, Kiely, Laine, Leonard, MacAuley, McCarthy, McLaughling, Milburn, Momson, Noonan, Ramage, Schino, Sheehy, Stewart, Sweezy, Traynham, Yoell, Zaput.

C. A. Buckley, E. J. Ryan, athletic director.

### Y. M. C. A.

At the Y. M. C. A. Friday evening, April 25, at 8:30 p. m., a party is to be given by the directors and their wives. A "mock trial" will be one of the features of the evening. It will be of interest. You are all cordially invited.

Ben D. Cardinal, representative of the Minden Flour Milling company of Douglas county, was on the campus Friday in conference with Prof. Dinsmore.

**Robert Logan  
Visits Campus**

Robert Logan, a veteran mining man and pioneer of this state, passed through Reno one day last week on his way to his home in Carson City. While in Reno it occurred to Mr. Logan that Nevada's university was situated in that city and he took a walk hillward to see the place. Mr. Logan had not been a visitor on the campus in nearly 25 years—Nevada had developed from nothing to a university since he had seen her last. It was the good fortune of your reporter to run into "Old Bob" on Virginia street shortly after his return from the hill and the old gentleman took the opportunity to tell him what he thought of things in general that he had seen up here.

"I saw some of your co-eds," said Mr. Logan, "and they were of the true Nevada type. I saw your grounds and I went through some of your buildings, and although I expected that the institution had been developing with rapid strides, I was surprised to see the wonderful progress it has made. You boys should be proud to be students at a place like that. In proportion to the population Nevada's university has a great deal more to show than the universities of older and more populous states. I hope you will continue to grow, as I know you will, and I am going to visit you often in the future."

**White Swans  
Upon the Lake**

The board of regents ate their lunch at the dining hall on Tuesday and as they walked from Morrill hall across the tram, Regent Codd suggested to the comptroller that a couple of swans would make the lake less lonesome looking. The comptroller agreed and the swan agitation commenced.

Comptroller Gorman has been busy writing to Ely, San Francisco, Del Monte and other places where lakes are adorned with swans since Tuesday in the endeavor that a pair be located. In the meantime Miss Marie De Flon and "Doc" Milentz have been agitating the proposition among the students. All that is necessary for the members of the student body to do is to "go down into their jeans" for ten cents apiece and in less than three weeks there will be two white, graceful birds skimming o'er our campus lake to delight the eyes of our commencement visitors.

Swans have been brought to Ely where they live happily on the little pond in the court house park. Nevada climate is therefore not too severe for them. The regents have promised to provide for the feeding and housing of the birds. All that it is necessary for the members of the student body to do is to "go down into their jeans" for ten cents apiece and Nevada will have some swans.

**Tennis Courts  
To be Built**

The regents have decided to allow for bills for material to be used in tennis court construction to the extent of \$500. Active work will begin as soon as the orders for sand and cement can be filled and the material placed upon the ground. Bill Settemeyer, Harold Layman and Harper C. Neeld constitute a committee of the Block N society who have been boosting the proposition and now that it has been definitely decided that the courts be built, this committee will look into the matter of labor. The plan as now outlined by the committee is that (added to the money allowed for these improvements by the regents is the \$100 donated by the Girls' Tennis club and the \$100 by the faculty) the boys will donate their mite in labor. A schedule will be arranged so that each man will put in at least three hours of labor and so that there will always be at least six men on the job at one time. In order for the men of the university to live up to their part of the agreement, it will be necessary to accede to this request of the committee. Workers may expect them at any time.

## Letter Comes From Islands

(Continued from Page 4)

the lot corners from time to time as you come up to them. The area is computed by the Manila office. It is very seldom that one finds a lot out in the jungles that is very regular in shape.

Boundaries were not very carefully established during the Spanish days. The man who claimed the land, made a statement to the effect that he thought that the parcel of land contained about 2000 hectares, and that he had caused monuments to be placed on the corners. Yes, the old boundaries are adhered to pretty closely in most cases, except where the area called for by the old plan is greatly exceeded by the area found by making a new and up-to-date survey of the old boundaries. Here is where the lawyers come in. Some times the man wins out, and gets the area called for on the new plan, and some times he has to have a resurvey made and takes the area called for on the old plan.

There is a little topographical work done by the bureau. They have a project under way in the province of Taybos now.

On practically all surveys we have to set at least two concrete monuments, marked P. L. S.-B. L. (privit land survey, bur. lands). These monuments are 15x15x60 cm.

Are we required to be particular in the location of true meridian? I should say that we are. In fact, I think that they invented that true meridian business out here. We take all of our observations direct. No solar attachment goes in the bureau of lands. Will enclose a couple that I took. Also will send a lot of forms that we have to use in our monthly reports. At this time of the year the vertical circle will read about 37 degrees 30 minutes around 8:30 a. m. I have found that solars taken before 8 a. m. and after 4 p. m. give better results. I have never used Polaris. In fact, doubt if I could find it. I have found that a knowledge of astronomy wouldn't hurt me any. Have been reading "New Astronomy" by Prof. David Todd, printed by the American Book company. I think that it is a very good book.

We use natives for rodmen, chainmen, recorders, sketchmen, draftsmen and computers. They do very well where there is not very much original thinking to be done. The bureau has a school where they manufacture what they are pleased to call junior surveyors.

Thought that Millar was old enough to know better than to play foot ball. My ribs still bother me at times; guess that I never will get the kink out of them. They play soccer down this way, i. e., the Englishmen and the half breeds. The natives don't take to the game, but they would rather play baseball than do anything else. Baseball is the only thing American that they have taken to gracefully.

The government has built roads and bridges that would put the roads and bridges in Nevada and California to shame, and they have been built for very reasonable price. The natives enjoy a complete and up-to-date educational system, sanitary system, practically run all of the provincial governments, but still they are howling for independence. They also have a voice in the government of the islands. Have no bills to pay for an army or a navy. An American always is at the head of all important positions for otherwise one couldn't live over here. The natives never get a chance to put their mits in the "dough bag," for when it comes to grafting they can make Abe Ruef sit up and blink. The Spaniards are pastmasters at the grafting game, and the natives were very apt pupils. In fact, the natives are very good at learning. We haven't gotten they thoroughly weaned away from the old Spanish way of doing things. There are many different tribes. The Moro is the best fighter. A Moro will charge a whole company of infantry with nothing but a bolo in his hand, and he will get two or three men before they get him. Because of the many tribes and their different customs it will be some time before they can be brought together. Furthermore some are hardly better than savages.

I nearly forgot to tell you about the work in the city of Manila. In running primary traverse we repeat the angles at the stations six times, always turning to the right. The whole traverse is run through in this man-

ner and then the standard chain is brought out. We always apply a constant pull on the chain (No. 20) and make corrections for temp. Use 100m Lucas and K. E. chain tapes. For sta. we use the rims on the manholes, fireplugs, and large G. I. spikes, all of which we have since found to be very unsatisfactory because the city people are always tearing up the manholes, moving the fireplugs and resurfacing the streets. This is because the powers that be didn't get together and come to an agreement before the work was started. We had about five districts completed before we found out our mistake. We make haste slowly now. However we will not lose so very much of our work.

We have set cu. wire sta. in the curbs. After running the primaries we next run secondaries and tie in the surveys already completed, and what ever new work that may come up. Azimuths are established by several a. m. and p. m. observations over primary sta. We are going to make a complete survey of this old berg. The bureau uses mostly Berger transits.

If you think that the Artemisia crew is capable of producing the goods why please give the enclosed card to the editor.

Well, I was a long time getting this letter under way. The quantity I will guarantee, but I leave you to judge the quality of it. Hoping this finds you and yours enjoying the best of health I remain,

Very respectfully,

J. E. SEARS,

Care Bureau of Lands, Manila, P. I.

### FRANK WAS THERE

Frank Bannigan was one of the willing workers on the "N" on Sunday, April 13. His name was unintentionally omitted in the list published last week.
