

FIELD MEET--U. S. C. vs. U. N.--SATURDAY

All University Men Out For Big Field Meet Rally Friday Night

STUDENT BODY MEETING HELD FRIDAY MORNING ON BLEACHERS

Constitution Amended Relative to Securing Men to Conduct Paper FUTURE OFFICERS NAMED Contest for Important Offices Promises to Be Very Close

At the request of the Freshmen, who were decorating the gym for the Glee, President Cazier called last Friday's important meeting of the A. S. U. N. to order on the Mackay bleachers. Following the reading of the minutes of the previous meeting by Secretary Maud Price, Tom Walker made a partial report of the finances of the Michigan Glee and Mandolin club concert, which, under the management of Mr. Walker and Mr. Haseman, yielded the net sum of \$81.25, which is to form the nucleus of a fund for injured athletes. To aid in the perpetuation of this fund Manager Joe McDonald of the Sagebrush announced that 50 per cent of the money due the Sagebrush by the students would be given, when paid, to this fund.

Following this business, President Cazier made a few important announcements. Among these were that the freshmen would charge the regular price of \$1.50 to all non-members of the A. S. U. N. who attended the Glee; that one ticket, and only one ticket, would be given each student to sell for the Santa Clara field meet which occurs next Saturday afternoon—50 cents and not the ticket is supposed to be turned in to the treasurer. He announced the Reno High-Y. M. C. A. vs. Nevada track meet which was to occur on Saturday, and the Mexican war pictures in the gym scheduled for Saturday night.

After making these announcements the president declared nominations for next year's officers of the student body in order. In a short speech setting forth the importance of the presidency of the A. S. U. N. and the qualifications for his candidate, as revealed by his record in college, for that position Henry

CLASS OF SEVENTEEN GIVES COLLEGE ONE JOLLY GOOD TIME.

(By Elsie Farrer.)

The Freshman Glee has come and gone, leaving memories of lovely streams of music and profusions of pink and white blossoms. The party was a springtime one and this idea was carried out in every detail. The roof of the gym was a solid mass of intertwined branches covered with pink and white flowers of the kind that never fade. The musicians were almost hidden behind tall green plants.

There were cozy corners, too, five of them. Three at the west end of the hall were especially pretty, veritable bowers, made of gree crepe paper and covered with the same blossoms that adorned the ceiling. Their deep, soft couches kept the dancers rested and happy until the last. In front of the doors were green pillars and these, too, were twined with flowers.

Behind a garden wall at the opposite end of the gym cooling ices and dainty cakes were welcomed by the guests. It was lovely to sit there, at the little tables and look out over the green wall on the pretty scene. There happy dancers kept time to the strains of Charley Sinar's seven-piece orchestra. The lights came down softly through pink flowers and cast flickering shadows on the ladies' beautiful gowns.

The programs carried out the idea of spring and blossom time. They were designed by Jessie Hylton and were an opening apple blossom, the petals of which framed the face of a laughing fairy—or maybe she was just a cute Freshman girl.

The patronesses of the evening were the Mesdames Jameson, Parker, Farrer, Brown and Miss Polluck.

A fantastic grand march, which formed the figure seventeen, was led

NEVADA--SANTA CLARA FIELD MEET WILL BE CLOSE FIGHT

Nevada Needs More Fellows Training for the Pole Vault WINNER IN MEET TOSSUP Conference Men Will Compete on Berkeley Track May 2

All athletic interest at the University of Nevada is centered at the present time on the Santa Clara-Nevada meet, which is to be held on the Mackay field next Saturday afternoon. A representative of the Sagebrush happened in upon a couple of Nevada men probably better qualified to make prophecies concerning the outcome of the big meet than any on the campus yesterday. They had before them long lists of names and events and on the margins of the paper was much figuring.

"How do you dope it out?" asked the Sagebrusher.

"It is going to be mighty close is the way we figure. It's a toss up as to who will win. Nevada is shy on pole vaulters and in this event is our weakest point. We have fellows who have done some work along this line and they should be out every night this week because every point we can get is going to count."

"In regard to selling those tickets," said Graduate Manager Ross, for one of the men was he, "you can remind the students that President Cazier announced in student body that each member of the A. S. U. N. was to take one ticket and sell it. They can now obtain that ticket from me."

Light work is prevailing on the practice field this week, so that men, after several weeks of hard training, will have an opportunity to rest up and thus be in the best possible condition for the meet on Saturday afternoon. This will be Nevada's last big athletic contest for the term 1913-14; it will be the last opportunity of the year for men to make "N's", and in view of

UNIVERSITY ECONOMICS CLASS LISTENS TO KING OF HOBOS

Varsity Wins Practice Meet

COMBINED TEAMS SUCCEEDED IN GETTING 27 TO NEVADA'S 88 POINTS.

(By Irving Rivett.)

The field meet between the teams from the Reno High and the Reno Y. M. C. A. and the University of Nevada closed last Saturday with the "N" me on the long end of the board. Reno tallied 27 points against Nevada's 88. The time in the whole meet was comparatively slow. Laveago, of the Reno boys, proved the best all-around man, bringing in sixteen credits. For the Nevada men Hovey and Rose did the most noteworthy work.

Powers, from a slow get-off, broke the tape in the 100-yard dash in the slow time of 11 flat. In the 440, Hovey made a pretty finish. Hovey again, in the 880 had a clear finish, but chose to come in with Trabert hand in hand, splitting first and second places between them. Chism in this same race mixed with the Reno man several times in an effort to gain the board. The fouling was quite mutual and neither man was ruled out.

Root, in the first jump of the broad, spiked himself quite badly above the left ankle. He finished the event, but not up to his record, which he established during the week of 22 feet, 1 1/4 inches. The only other accident which marred the meet was a nasty fall taken by Kemper in the 220 hurdles. Kemper struck the next to the last hurdle and fell to his knees in the cinders.

Coach Greatly Pleased.

Coach Ross after the meet said that though poor time was made he was much pleased. He feels that he has some very good men in the short and middle distances who will be point getters. On Monday a few more men will be put through their paces to determine the final team representing

(Continued on Page 8.)

Jeff Davis Spends Wednesday With the University Students

LEADER OF HOBO UNION Gives Interesting Discussion On the Unemployment Problem

With much anticipation Professor Romanzo Adams' class in the principles of economics gathered in the economics room in Stewart hall last Wednesday morning at the 9 o'clock hour, for it had been previously announced that the period would be given over to Jeff Davis, "King of the Hoboes," who would devote the time to a discussion of modern labor conditions. Just what sort of fellow this king of the hoboes was going to be and what he looked like and what he would have to say, was the absorbing topic of conversation among the members of the class before they convened. Disappointment, therefore, prevailed when Professor Adams began the regular class work with the brief explanation that Mr. Davis had probably mistaken the hour. At 9:30 there was a knock at the door and a young fellow wearing a neat suit of blue and a prepossessing smile and cap in hand walked rapidly into the room.

Professor Adams introduced this young man as Jeff Davis, president of the International Itinerant Workers' union, better known as "King of the Hoboes." The rest of the hour was placed at the disposal of Mr. Davis.

Talking rapidly, pleasantly, business-like, the hobo began and he crammed that twenty-five minutes full of good solid, convincing logic. His speech was slightly interspersed with slang and his mistakes in grammar were not infrequent, but so well organized were the ideas he stood there to express that his speech was extremely easy to outline. He held his audience from start to finish. His subject was the American problem of unemployment.

According to Jeff there are two great causes for the great amount of unem-

Walker Gives Money Report

A. S. U. N. Fund for Injured Athletes Started as Result of Concert

At the meeting of the associated students held on the Mackay bleachers Friday morning, Tom Walker announced that he had a complete report of the Michigan Glee club concert to submit. He read the report in part, the complete statement follows in this article. Mr. Walker briefly stated the purpose of Prof. Haseman and himself in managing the concert, and, inasmuch as the proceeds therefrom were to be turned over to the A. S. U. N. to form the nucleus of a fund for injured athletes, he explained that a financial report of the concert was due the students.

Through the columns of the Sagebrush the alumni of the University of Michigan who reside in Reno, and those having the entertainment of the Ann Arbor boys in charge wish to express their appreciation to those who contributed toward this entertainment. Among those are Judge Cole Harwood, Charles Short and Otto Hussman and Dr. Hood, who placed their automobiles at the service of the Michigan boys; the Elks, who were the hosts at a reception in their honor; the Commercial club, which offered its club rooms as headquarters for the men during the day; the U. of N. Glee club, the members of which entertained the Michigan Glee and Mandolin club at luncheon; Scott Jameson and his staff, who by their efforts made that occasion a successful one; the management of Moana Springs, who treated the visitors to a plunge; the ladies of the Century club, who crowned a most successful day by giving an informal dance, at which the Michigan fellows were the honored guests. Mr. Walker and Prof. Haseman also wish to express their appreciation to the students and faculty of the college generally for the cordial way in which they responded on that day to this call for Nevada hospitality.

The following is a list of those who aided in the advance sale of tickets to the Michigan club concert:

Earl Ross, \$1; P. McKinley, \$14; G. McCreery, \$1.50; H. Frazee, \$1; I. Rivett, \$5; L. Rose, \$2.50; D. Bird, \$4.15; D. Morrison, \$4; R. Sheehy, \$12.50; A. Clark, \$7; E. Walker, \$10; W. Ferguson, \$3.75; L. Ferris, \$1; C. Mills, \$4.50; D. Pruett, \$6.50; A. Trabant, \$2; M. Goodrich, \$9; E. Borchert, \$4.50; A. Boggs, \$1; L. Johnson, \$9; Y. M. C. A., \$3; O. Layman, \$6; Dr. Hood, \$5; Century club, \$16; Judge Harwood, \$10; C. Webster, \$1.50; D. King, \$6.75; A. Glass, \$1; C. Haseman, \$12; Commercial club, \$2. Total, \$167.15.

Financial Report of Michigan Glee Club Concert

Receipts—Box office, \$432.50; ticket sale, \$167.15; advertising allowance, \$25. Total, \$624.65.

Disbursements—Guarantee to Michigan Glee club, \$400; theater rent, \$75; stage hands, \$7.50; bill posting, \$3; ushers, etc., \$7.50; newspaper advertising, \$40; printing tickets, \$2.75; printing, \$3.25; cigars, \$3.50; piano, \$4. Total, \$548.50. Net gain, \$81.15.

TROUT PLANTED

Recently Karl Horn, Joe Lynch, Comptroller Gorman, Scott Jameson, Amidon and Gassaway made a trip to the Hunter creek reservoir. There, with the aid of a big dragnet they succeeded in capturing fifty big trout of the rainbow, Truckee river and eastern brook varieties. These were put into big alcohol barrels and brought to the university where they were put into the campus lake. Fish Commissioner Siefert, who accompanied the party, said that fish were about ready to spawn. In a few years more it is probable that the students and faculty of the University of Nevada may go fishing, as beside these fish there were a number of small trout planted a year ago and three years ago a large number of black bass were planted in the lake by Attorney Sardis Summerfield.

T. H. P. O.

The mysteries of the T. H. P. O., one of the University of Nevada fraternities, were explained Thursday evening to four candidates, the ceremonies taking place at the fraternities home, 708 North Center street. Ross C. Olds, Chester Bacon, Wilbur Malone and Arthur Boggs were the students received into the fraternity. Upon the conclusion of the initiatory program about 30 members of the alumni and active members enjoyed a banquet at Kane's cafe.

Sectional Meetings Safety Association Held Saturday

Students Given Opportunity to Hear Discussions by State Industrial Men—Visitors From Nevada and California on the Campus

Out of respect to the memory of the mother of Governor T. L. Oddie, who passed away at the governor's mansion at Carson Friday night, the regular first annual session of the Nevada Industrial Safety conference was postponed Saturday until Monday. The meeting was called to order at 10 o'clock by Lieutenant Governor Gilbert C. Ross, who presided upon the request of Governor Oddie. Lieutenant Governor Ross called Attorney General Thatcher to the chair and then presented a motion for the continuance of the session. The motion declared "that inasmuch as Mrs. Oddie, the mother of our governor, passed away last evening, this meeting as a mark of respect to one of the best loved and most honored women in Nevada, do now adjourn until Monday morning. The motion carried unanimously.

The sectional meetings were held in accordance with the program for it was found impossible to postpone them, as many delegates in attendance could not delay their stay. One of the most important sectional gatherings was that held by the electrical division in the electrical building at the university. J. G. Scrugham presided as chairman. The program called for addresses by J. R. Brownell, who spoke upon "Federal Safety Regulations for Electrical Power Companies as Proposed by the National Bureau of Standards."

Other addresses and papers were as follows:

"Proper Voltage for Underground Mines," papers by R. B. Layman, district superintendent of the Nevada-California Power company; G. L. Perrin, chief electrician of the Nevada Hills Mining company (read by Tom P. Walker); L. W. Crehore, of the Fallon electric plant; R. E. Middagh, of the Nevada Consolidated Copper company.

The principal fact developed at the meeting was that a new type of underground locomotive haulage suggested by T. R. Landsborough of the Tonopah Extension Mining company would probably solve many problems in low cost and safety in underground work.

F. O. Broili, H. S. G. Hurlburt and others spoke on the advantages and disadvantages of storage battery locomotives. The principal address was by E. D. Brown, superintendent of the Truckee River General Electric company, who spoke on "Handling High Voltage Line Troubles." Mr. Brown's talk was illustrated by numerous exhibits showing how dangerous conditions were handled and made safe for the operators. H. S. G. Hurlburt, superintendent of the Pacific Power company, gave an interesting address upon lightning protection which was discussed at length by the superintendents and operators present. Jos. Beane, electrical superintendent on the Truckee-Carson government project, described the operation of the electric shovels in operation upon the Lahontan dam. The concluding paper was presented by G. B. Burnham of the General Electric company on safe underground voltage and was discussed by W. K. Freudenberger, engineer to the public service commission; J. D. Leavett, of the Truckee River General Electric company; B. G. McBride of the Elko Power company and others.

The following named were appointed directors of the electrical section for the year 1914:

E. D. Brown, superintendent Truckee River General Electric company; W. N. Chatfield, manager Pacific Power company; H. S. G. Hurlburt, superintendent Pacific Power company; B. G. McBride, manager Elko-Lamoille Power company; L. W. Crehore, electrical engineer Fallon city plant; G. L. Perrin, chief electrician Nevada Hills Mining company; Joseph Beane, electrical superintendent U. S. reclamation service; R. E. Middagh, engineer Nevada Con. Copper company; Thos. G. True, chief electrician Reno P. L. & W. Co.; T. R. Landsborough, electrical engineer Tonopah Extension company; J. K. Poe, electrical superintendent Goldfield Consolidated company; A. D. Voss, electrical engineer Buckskin Mines company; F. B. Mechling, manager Nevada-California Power company; R. B. Layman, district superintendent Nevada-California Power company; W. K. Freudenberger; C. S. Young, Lovelock Power company; J. G. Scrugham, University of Nevada, committee chairman; F. O. Broili, Nevada Machinery and Electrical company, committee secretary.

This committee is charged with the duty of recommending electrical standards for Nevada.

The transportation section met at 3 o'clock in the gymnasium with a considerable number of railroad men in attendance. The meeting was called to order by W. E. Wallace of the Brotherhood of Railroad Trainmen. Ex-Congressman Bartlett briefly explained points in the constitution and by-laws and Superintendent H. L. Bell spoke of the desires of the Southern Pacific to co-operate with the association in every way. A lively debate on the methods of electing officers was participated in by Frank Ingram, R. A. Cole and other members of the railroad brotherhoods. The section went into caucus and the constitution and by-laws were discussed section by section. A number of amendments were proposed and accepted as the recommendations of the transportation division to be presented to the general meeting on Monday. The Southern Pacific was officially represented by Superintendent W. A. Whitney of the Sacramento division, Assistant Superintendents H. L. Bell, F. C. Smith, Grant H. Moore and others. The Nevada Northern was represented by H. A. Davidson, J. A. Ross headed the Brotherhood of Locomotive Engineers. The firemen, trainmen and other organizations were represented by official delegates from each lodge.

Dr. Max. Adams At German U.

Visits Famous Laboratory — Now Working on Important Nevada Study

During the week a letter was received on the campus from Dr. Maxwell Adams, head of the department of chemistry. Dr. Adams writes that he spent the last part of March and the first part of April, two weeks in all, visiting at Munich and viewing the sights to be seen in southern Germany and northern Austria. On April 15 he was to begin his work at Goettingen, Germany. At this university Dr. Adams will do the real work of his trip, the investigation of the Nevada sagebrush and pines, especially the turpentine products of these native Nevada plants. It was for the carrying on of this work that Dr. Adams went to Europe, as he had carried the work as far as the apparatus which most American universities afford permit.

At Geneva, Dr. Adams writes that he had the opportunity of visiting the laboratory of Professor Pictet. Professor Pictet is noted for work done in physical chemistry, especially the liquefaction of oxygen. He is still conducting important experiments in the liquefaction of gases. Dr. Adams spent an enjoyable and profitable day in the laboratories of this chemist.

MEXICAN WAR PICTURES

The Mexican war pictures shown at the gymnasium last Saturday night were enjoyed by a small but enthusiastic gathering, mostly students. The pictures themselves were impressive and in parts gruesome in the extreme. Among the interesting scenes shown were refugees crossing the Rio Grande, scenes from the battles along the border and the famous old jail at Juarez. Pancho Villa, leader of the constitutionalists, paraded in front of the camera. Between reels the crowd was entertained with many selections by the Men's Glee club.

ANOTHER MACHINE

Prof. Charley Knight of the agricultural college, has a five-passenger Overland car which he sported on the campus for the first time last Thursday.

THE ARTEMISIA

Cuts have been received and active work has commenced toward the publication of the 1914 Artemisia. The book will be on the campus early in the next month and as there will be a limited number of copies it would be

well for students to sign up for a book at once. Cuts will be a feature of the book, while snappy joshes and write-ups will keep up the literary standard. In an early issue of the Sagebrush will appear a complete description of the annual.

If you want a book—sign up now!

"FAKING" A THRILLER FOR THE "MOVIES"

A recently produced "movie" film shows a dare-devil detective using a dirigible to overtake an express train in which is riding, in fancied security, the criminal who seeks to escape him. The picture shows the detective climbing down a knotted rope from the dirigible to the roof of the speeding train. Few scenarios have called for a more hazardous feat. When shown upon the screen it is so realistic that the spectators involuntarily clutch at their chairs, scarcely breathing until the act is completed in safety. An article in the May Popular Mechanics Magazine explains how the scene was "faked."

THE WOODWORKER

The mechanical department has received a Crescent universal woodworker and it is being set up in the wood shop of that building. The machine consists of a band saw, jointer, saw table, reversible single spindle shaper and borer. Either a 26-inch or a 32-inch band saw, and an 8-inch, 12-inch or 16-inch jointer can be supplied.

It is claimed for the Crescent universal woodworker that it can be made to do the duty of a complete planing mill. Four men can work at the machine at one time without interfering with each other.

SOME LEMON

Jake Meshon, the man who takes care of the green house, is the proud owner of a lemon grown in Nevada—in the green house. The lemon is green yet, but it is so large and heavy that it is necessary to support the plant on which it is growing with a stick and to help the stem out by means of string. The circumference of the fruit the long way is fifteen and a half inches and the distance round a cross section is fourteen and a half inches.

ROSS OLDS VISITS

Ross C. Olds, during the first semester a student in the Mackay School of Mines, arrived from his home in Berkeley last Thursday morning and has been renewing old friendships on the campus and in Reno. He enjoyed the hospitality of the freshmen at the Glee. He left yesterday morning for Berkeley and hopes some time to come back to Nevada and resume the special work in geology he had begun here.

IT BEATS THE DUTCH

Otto Hussman has purchased an American underslung. Karl Horn has a new Indian motorcycle.

MACHINE GUN ON ARMORED AEROPLANE

French military authorities are experimenting with the first armored army aeroplane, equipped with a machine gun mounted over the engine. Bullet-proof plates of hardened steel protect the working parts of the aeroplane, and a V-shaped shield screens both the gunner and the ammunition. The pilot is seated behind the gunner, and the gun is mounted high enough to eliminate any possibility of hitting the propeller when it is fired.—From the May Popular Mechanics Magazine.

PRACTICAL DEVICES FOR SLEEPING OUT OF DOORS

Now that the vogue of open-air sleeping has grown beyond the stage of a "treatment" and interests those who want to keep well as much as it does those who want to get well, it is interesting to see how simple, inexpensive and adequate shelter may be provided in or on the ordinary dwelling. In the May Popular Mechanics Magazine a number of simple ways to provide out-of-door sleeping places are described, with illustrations.

JOHN R. BROWNELL

Among the visitors at the university during the meeting of the Industrial Safety association was John R. Brownell, superintendent of safety of the California industrial accident commission.

"SPUD."

Huga Hauser, better known among the older fellows in the university as "Spud," who graduated from the Mackay school of mines in 1911, is spending the week in Reno. "Spud" is following the mining game in Nevada and has been ever since his graduation.

The first proofs of the pamphlet to be issued by the university and containing the proceedings of the Industrial Safety Conference, held here in the month of January, have been received. The work is being done at the state printing office in Carson.

Word has been received from Don Cameron, Mines '12, to the effect that he has returned from Canada and is doing some leasing at Austin, Nev.

Hot Egg Chocolate, for the cold days, at Dalton, Clifford & Wilson's.

WANTED

To inform you that if you need spectacles or eyeglasses to consult Dr. John B. Koch, the expert optometrist and optician, at R. Herz & Bro., the jewelers. Every case receives my personal attention. Rates most reasonable.

Comedian Heads Big Road Show

"A show you know," is the way they bill the Metropolitan road show and it's really appropriate as the last aggregation was capitally selected and if the artists who are to appear at the Majestic theater on Thursday, Friday and Saturday nights are equally as proficient along their respective lines as their predecessors, and reports are that they are superior, one can anticipate a delightful evening's enjoyment. It was a happy idea, this selecting talent from the artists going to and coming home from Australia and the coast cities will benefit thereby.

In the present instance we are to have another party of twenty-five well known players, divided into seven acts, who have achieved a reputation for excellence and the whole should afford some pelasure. There is an important number at the head in Charles A. Mason, the well known German comedian, who is assisted by a double quartette in the rendition of the German Saengerbung. This is Mr. Mason's original conception and abounds not alone in tuneful numbers, but is bubbling with unctuous humor. The audiences are loth to part with them.

A number on the bill that will especially delight the music lovers will be the renditions on the xylophone by Esmeralds, who is acknowledged as being the greatest performer on this instrument in the world.

Charles King and Virginia Thornton have just returned from a triumph in the Antipodes and will render one of their greatest successes, "The Councillor," which reaches the height of dramatic intensity.

But to dilate on the individual successes would demand too much space—suffice to say that the aggregation is strictly high class, high salaried and numerically liberal. Those who want to see vaudeville at its best won't fail to be present. Seats are now selling. The same prices prevail as before.

WITHDRAWS NAME

Owing to the fact that I prefer to be a candidate for the office of assistant editor of the Sagebrush, I wish to withdraw my name as a candidate for Junior class representative on the executive committee.

Vocal Duet Will be Feature of the Program

The regular Y. W. meeting will be held this Wednesday at 4:30. A vocal duet will be given by Mrs. Turner and Miss Sameth. Reports from the president and chairmen of last year's committees will be read and the new officers installed. Those who will lead the association this year are: Gertrude Shade, president; Lysie Rushby, vice president; Carina Damm, treasurer, and Laurena Marzen, secretary. All are cordially invited to attend.

"SAFETY FIRST"

University of Nevada Bulletin, Vol. VIII, No. 1, January 1, 1914, has arrived and has been distributed profusely among those present at the industrial safety association meeting held here Saturday and Monday. The book contains 140 pages and covers completely the proceedings of the first annual industrial safety conference held at the University of Nevada January 26 and 27, 1914.

MRS. MILES B. KENNEDY ILL

On Monday morning Mrs. Miles B. Kennedy submitted to an operation for appendicitis. The operation was of rather a serious character and was successful. Dr. Hood performed the operation at the St. Mary's hospital.

Santa Clara Field Meet

(Continued from page one.)

the fact that Nevada lost to Santa Clara last year, the meet is being looked forward to with much anticipation by enthusiasts on the hill and down town.

With but a few exceptions, which are noted, Coach Si Ross was able to give out the line up of the Nevada team for next Saturday afternoon yesterday. The events will be called in the order named:

- Mile run—Ogelvie, Trabert (Silva or Abel).
- 100-yard dash—Powers, Root, Mills.
- 120-yard hurdles—Rose, North McPhail.
- 440-yard dash—Mills, Hovey, Healy.
- Twomile run—Kent, Farrer, King.
- 220-yard hurdles—Rose, Hancock, (Kemper or Vogt).
- 220-yard dash—Mills, Powers, Sather.
- 880-yard dash—Hovey, Trabert, Chism.
- Relay team (four men to be chosen from the following, each man to do a quarter of a mile)—Hovey, Mills, Trabert, Ogelvie, Abel, Healy, Rose, North.
- Hammer throw—Jepson, Pflaging, Abel.
- High jump—Watson, Smyth, Luce.
- Shot put—Harriman, Henningsen, Abel.
- Broad jump—Root, Rose, Luce.
- Pole vault—McCubbin, Bacon, Clark.

Santa Clara Eligibles.

Graduate Manager Ross has not received the definite lineup of the Santa Clara team. Some time ago S. A. Eline, S. J., faculty director of athletics of the University of Santa Clara, and C. A. Buckley, S. J., director of studies, submitted the following list of eligibles according to the four years' contract:

- McCarthy, Uhl, Hewitt, Lane, Booth, Gianella, Navelet; Lannon, Conneally, Trabucco, Watson, Nicholson, Salaya, F. Stewart, A. Stewart, Soto, Ojeda, Lyons, Jackson, Carberry, Leonard, Crane, Hardy, Donahue, O'Neill, McLaughlin, Bottler, Kiely, Kavanaugh, Cavanaugh Ginocchio, J. Fitzpatrick, B. Fitzpatrick, Concannon, Cochino, Allen, Milburn, Bothwell.

Conference Men.

Seven men of Nevada have this year qualified for the Pacific coast conference meet to be held on the California track on May 2. In qualifying for this meet, Hovey lowered any record ever before made on the Nevada track for the half mile; Root broke the Nevada broad jump record by clearing 21 feet 8 inches; Watson, in the high jump, bettered the old Nevada record by two-fifths of an inch, by clearing the bar at five seven; Kent's record for the two mile is 10 minutes and 3 seconds. Ogelvie will run the one mile at the conference, Powers the 100-yard dash and Mills the 220-yard dash.

HARRY GRAYSON

Friends of Harry Grayson have heard from him. He was at Colon, Panama, when he wrote, and by this time has probably reached the interior of Costa Rica, where he will go into the mining game under Gus Sielaff, a graduate of the Nevada School of Mines.

SENIOR PINS

The class of 1914 received their class pins during the week and are now sporting them proudly. The pin consists of a gold nugget rectangular in shape bearing on its upper part the seal of the University of Nevada, and on the lower part the raised figures "1914."

HELEN HIGGINS

Miss Helen Higgins, '13, who is teaching school at Hot Springs, Smith Valley, Lyon county, motored to Reno last Friday with Mrs. Simpson of that place. While in Reno they were the guests of Miss Higgins' parents, who reside at 437 Granite street. They returned to Smith Valley Sunday.

REAY MACKAY

Reay Mackay, '13, was a visitor from Los Banos, Cal., Sunday.

PATTERSON-BARANHART

News has been received by friends in Reno of the marriage of Miss Maud Patterson to Jacob Baranhart at Berkeley on Thursday last. Miss Patterson is well known in Reno, and in 1901 was a special student at the University of Nevada. They will make their home in Cedarville, Cal.

NOT A CANDIDATE

I wish to withdraw from nomination for Women's Athletic manager. LYSLE RUSHBY.

Student Body Last Friday

(Continued from page one.)

Wolfson placed in nomination Tom Walker. Miss Bartholomew nominated Elmore Abbott, Dale Pruett named Waterfield Painter, and Lester Harriman placed Harper C. Need in nomination. For vice president Richard Sheehy and Lee Hylton are the candidates. Jessie Hylton and Carina Damm are candidates for the office of secretary, Ruth Miller having withdrawn her name on account of uncertainty as to her registering next semester. Borchert Ogelvie will contest for the treasury department, Miss Ethel Brown and Miss Dorothy Bird, for women's athletic manager; Rose, North Engle and Hovey, for representative on the executive committee from the junior class; Hurd, Moore, Bryant, Melarky, Clark, Organ, for sophomore representative. For next year's editor of the U. of N. Sagebrush Louis Somers and Glenn Engle will contest, and for manager, Joe McDonald, incumbent, was the only man nominated.

During Friday's meeting of the A. S. U. N. an amendment to the constitution had been passed. The amendment previously posted upon the bulletin board by Joe McDonald provided for an assistant editor and an assistant manager for the Sagebrush. These assistants are to serve in their capacity of assistants for one year, and at the end of that time they are to take office, if satisfactory to the students body, and new assistants elected. The idea of this amendment is to secure experienced men for the management and editorship of the paper. Nominated for the position of assistant editor are, Lister Withers and Irving Rivett, both members of the Sagebrush staff. For assistant business manager, Ralph Drown, a freshman, who is helping in that capacity this year, was the only man nominated. Silas E. Ross, incumbent, was renominated to be a candidate for the office of graduate manager.

President Cazier made an appeal to the men not out for track to do a little work on the track so that it would be in better condition for training, which was responded to by a large number of the men. The meeting adjourned.

STANFORD WINS

STANFORD UNIVERSITY, Cal., April 18.—E. M. Bonnett of Stanford broke the Pacific coast half mile record here today in a meeting between the University of California and Leland Stanford Jr., university. Bonnett did the distance in 1:54 3-5, as against the coast record of 1:56 2-5, held by Edmundson of Seattle.

Six Stanford - California records were broken. Stanford won the meet, 66 5-6 to 55 1-6, taking ten first places.

SIGMA ALPHA.

Sunday afternoon the second degree of Sigma Alpha was taken by John Heard, Willard Mason and Louis Vogt. Monday evening twenty-six members of the fraternity gathered at the Sigma house to welcome with a banquet these three new men.

The Fountain, opposite the post-office, is the place to get all kinds of candies.

Lincoln Hall Park Planting

Superintendent Lynch and Force Improving Tract in Rear of Old Dorm

During the Easter recess about 35 students of the university spent their vacation digging back of Lincoln hall. The work being done was in preparation for making the grove and park in that part of the campus. The work was finished during the week just past by Superintendent Lynch and his men and the actual planting of the trees will begin this week. Money is not available at the present time for the completion of the walks and avenues that are to wind through this little forest, but the regents at their last meeting decided to go ahead with the planting so that the trees could be growing during the time between now and when it is possible to continue the work. Four hundred trees will be started. They consist of ash, maple, locust, black walnut, box elder, linden, elm, poplar, European mulberry and many other varieties. Pines will be put in next year. They are now at the university farm.

The tract of land north of Lincoln hall which is to form this park has all been trenched and 2650 feet of pipe laid to carry the water for irrigation purposes. All of the holes in which the trees are to be planted were dynamited and a yard of new soil purchased for the purpose is to be put around each tree. The trees are now at the university farm waiting to be hauled to the campus in wagons.

The plans for the park are all completed. The trees will be planted according to specifications and the walks and avenues staked out. These walks and avenues will be bordered with grass and ornamental shrubbery when

Nevada Girls Within Rights

Superintendent Bray Declares Children Have Right to Write Suffrage Essays

In an article entitled "Public Questions in the Schools," by John Edward Bray in the Carson City Daily Appeal of April 11, the state superintendent of public instruction defends the University Suffrage club. The article concludes with the following paragraph:

"With all due respect to those who have raised the hue and cry of 'politics in the schools,' I wish to assure them that the alarm is uncalled for; that the university girls had a perfect right to offer prizes for essays—and so has anybody else; and that the public school children have a perfect right to contest for these prizes under the guidance of their teachers or otherwise; that the state has not authorized, and under the constitution cannot authorize, any man or body of men to deny to children in the public schools the right to study, discuss or write upon any legitimate subject within the pale of morality; and that to exercise the right of discussion or writing is not introducing politics into the schools."

the regents find themselves in a position to add the finishing touches.

Superintendent Lynch has 9000 forest tree seedlings now at the farm. These seedlings are being kept there ready for use whenever improvements on the campus demand them. He expects to more than double this reserve supply next year.

A D. C. W. Special Egg Shake is delicious, 15c, at the Fountain, opposite the postoffice.

THE PUBLIC DEMAND QUALITY

"It is quality that the public demands from us now," remarked Martin Beck in a recent interview on the vaudeville situation in America. "This might be described by the word class. I consider that the day of the cheap, twady act is about passed. The public is ever ready to pay the price to witness the best that is in the market, but they insist on that best. It is but a repetition of what has happened in the legitimate theatrical world. There are few if any of the heretofore thousand companies who played over the country at so-called popular prices. They have been compelled to give way to the more pretentious and costly organizations, and it all came about through the support of the public. So it is with vaudeville. The tinsel and makeshift must make room for artists with merit who place his capital behind his art."

It is this idea that prompted the Hurst Bros. to organize quality vaudeville into one big company and bring them to Nevada every fortnight. The exodus to and return from Australia of the best class of acts made this a possibility, and on next Thursday, Friday and Saturday evenings, April 23, 24 and 25, at the Majestic theater we shall see the second edition of the Metropolitan Road Show comprising seven acts and twenty-four people, in a bill that is both diversified and entertaining. It's the bringing of Orpheum quality to our doors and the theater-going public will undoubtedly appreciate the facts. Seats are now selling.

SHOWERS READY

Karl Horn, who has been in charge of placing the showers in the gymnasium for men taking gym work, finished the work of installing them Thursday. Men taking these courses under Prof. Amos Elliott will have all the pleasures of hot and cold showers after their exercises.

Penny Contest Gains Sixty

Y. W. C. A. Fund for Summer Camp at Asilomar Increased by Nearly Sixty Dollars

By Captain Bird

The Penny contest is over. The victory, however, was hard won and the battle was a bloody one. The victims were mostly boys and as a result their pockets are empty. The word "penny" is one forbidden to be spoken on the hill. This is the eulogy over that terrible word. There was no use to deny having a penny. The warriors promptly replied, "I'll sell you a nickel's worth," and if the bell didn't ring to save you, your money was gone. Not even a squeal of resistance could leave the victims lips. The spoil was great. The victors spent hours in counting the money which they had rung from the unresisting public. Thirty dollars and fifty cents was their total, but when with shouts of glee they announced their sum total, the other side was not far behind. Almost \$60 the two armies handed into the high and mighty officers of the Y. W. C. A. Only one thing remains. The conquered must pay the price of their defeat. They, under their leader, Zoe Gould, are going to do so, quite splendidly in fact, with a hard time party next Saturday night, and the victors in all their glory will be there in full force.

HELP A GOOD CAUSE

In order to help perpetuate the Cripple Athletic fund started by Professor Haseman and Tom Walker, and which is described in full in another article, the management of the Sagebrush has decided to give fifty per cent of all money covering subscriptions to the students during the remainder of this year to this fund.

At the present time there are about one hundred members of our student body who have not paid their subscriptions for this year, although they have received the paper and read it every week. It is indeed a large task to make out bills for each and every delinquent subscriber and present them at every student body meeting as has been done in the past. The honesty of the students and their loyalty to the university has been relied on this year, and in most cases has not been found wanting.

The subscription price for one year is \$1.50 cents of which goes to boost a worthy cause along. Pay up now.

WOMEN ORGANIZE

On April 6 a new organization of women was formed, filling a long-needed want. It is composed of all women who have earned their "N" pins by participating in a game with either U. of C. or Stanford. The object for the organizing of such a body was the desire that basketball rulings should have a stronger backing, and that the women should take a greater interest in athletics. A constitution is being drawn up, which will determine all the regulations of the society. The name chosen was "The Women's N Society" and the following officers were elected:

President, Dorothy Bird; vice president, Francis Smith; secretary, Ethel Brown; treasurer, Lysle Rushby.

Glee Singers At Sparks Hi

Trips That U. of N. Men Will Take Throughout Nevada This Year

Saturday night the Glee club shows in Robinson hall, Sparks, under the auspices of the Sparks High school. Melvin E. Jepson, '10, principal of the high school, has taken the affair in hand and promises a capacity house.

The date for the big trip—the trip that all are looking forward to—has been set for May 5. During the week's absence the club will make six appearances, one each at Lovelock, Winnemucca, Elko, Wells, Ely and McGill. In each town are located graduates and former students of the University, who will form the rooting section to get the crowd.

There is also a fruitful field for new students in the western part of the state. The Glee club hopes to appeal to many of these.

The visit to Ely and McGill will prove interesting for the large copper workings there. There are Nevada men making good in responsible positions with companies in each place. Their advertising with the Glee club's should draw students for Nevada.

The trip to Yerington has been canceled due to an overcrowded semester. The eastern trip will probably wind up the Glee club's active work until commencement time, when much new stuff will be prepared.

"JIMMIE" LAYMAN

R. B. Layman, E. E. '11, is in Reno visiting his family and also representing the Nevada-California Power company of Goldfield at the industrial safety association meeting.

Mining Dept. Gets Machine

Brief History of Radio-Activity Discoveries—Instrument Now at M. S. M.

An electroscop for determining radio-activity, a machine of the same kind as those used for this purpose by the United States bureau of mines, arrived at the latter end of the week at Mackay School of Mines. The apparatus is manufactured by the Denver Fire Clay company of Salt Lake and Denver. Owing to the large number of requests by people of the state asking if samples of minerals sent into the mining department were radio-activity the apparatus was purchased and this quality of minerals can now be determined and the extent of the activity as well, in a very little time. The machine was tested out Saturday morning and works fine, say those in charge. It attracted considerable attention among those called to the campus by the industrial safety meeting.

The discovery of the property of radio-activity was largely accidental. In 1896 Becquerel was conducting experiments to determine the effect of the fluorescence or uranyl potassium sulphate on sensitized plates enclosed in light proof covers. Fluorescence is a peculiar property imparted to certain substances when they are exposed to the sunlight which causes them afterward to glow in the dark. Becquerel placed his covered plate in a drawer and put the uranium salt upon it, to await a sunny day before exposing the salt. A few days later he started the experiments he had in mind, substituting a new plate. When the old plate was developed he was very much surprised to find that it had been strongly affected by the salt, which had not been exposed to the sunlight. This result started a new train of investigation which convinced Becquerel that he had discovered a new property of matter and that this property was peculiar to uranium.

Schmidt and Curie, working independently, found that thorium was also radio-active. Madame Curie ascertained that there were minerals more radio-active than uranium, and that if uranium were separated from these minerals it had the normal activity, thus leading to the conclusion that there was some element or substance in the residue that possessed a high degree of activity. A chemical investigation of pitchblende from Joachimsthal showed still another radio-active substance was separated with the bismuth, to which the name of polonium was given, in honor of her native land, Poland. Continuing the work Madame Curie and her associates found another element, which was separated with barium, which when brought to a state of concentration, was several million times as active as uranium. This was radium. Debiere afterwards found a fifth radio-active substance, actinium, and in 1905 Poltwood isolated the metal ionium. Development in the knowledge of radio-activity has been rapid since that time. Pitchblende was until recently the main source of radium.

The electroscop consists of two compartments, one above containing a suspended aluminum leaf in front of which is attached a reading microscope, and one below in which the ore to be tested is placed. Usually the leaf is electrically charged by means of a piece of vulcanite rubbed on the sleeves of the coat, the charge causing the leaf to rise, then the natural leaf of the electricity is noted on the scale, and calculated as a certain number of divisions per minute. The ore is then placed in the com-

Safety First Officers Elected At First Meeting

Executive Committee and Board of Directors for Three and Two-Year Term Elected for Safety—Governor Oddie President—Women Organize

Election of officers and the perfection of organization was completed yesterday at the first annual session of the Nevada Industrial Safety association held at the University of Nevada gymnasium. Sessions were held in both morning and afternoon and the work before the meeting was speedily disposed of. Lieutenant Governor Gilbert C. Ross presided.

One of the most important parts of the program was the adoption of the constitution and by-laws, drafted by former Congressman George A. Bartlett. The adoption followed after a few amendments were made. During the afternoon the election of officers was held.

A delegation of women attended the meeting and favorable discussion was heard upon the plan to interest the mothers and teachers clubs in Nevada in a plan to teach the safety first idea to children, special reference being made to accidents resulting from street cars and automobiles.

The officers elected were as follows:

Executive Committee

Tasker L. Oddie, president; Edward Ryan, first vice president; W. E. Wallace, second vice president; J. G. Scrugham, third vice president; V. L. Ricketts, fourth vice president; Frank Ingram, George A. Bartlett, L. A. Herring, W. B. Alexander.

The first vice president is chairman of the mining section.

The second vice president is chairman of the transportation section.

The third vice president is chairman of the electrical and mechanical section.

The fourth vice president is chairman of the general section.

Board of directors elected for—

Three Year Term

Tasker L. Oddie, governor of Nevada, Carson City; V. L. Ricketts, Reno Gazette, Reno; H. P. Boardman, professor civil engineering, U. of N., Reno; Homer Mooney, Nevada State Journal, Reno; D. W. Bell, assistant superintendent Southern Pacific Co., Ogden; T. F. Rowlands, superintendent Southern Pacific Co.; J. M. Fulton, assistant general freight and passenger agent S. P. Co., Reno; J. A. Ross, secretary Brotherhood Locomotive Engineers, Sparks; F. W. Ingram, secretary Brotherhood Locomotive Firemen, Sparks; C. H. Conerty, secretary Brotherhood Railway Trainmen; C. W. Blackwell, Brotherhood Locomotive Firemen, Sparks; E. D. Brown, superintendent Truckee River General Electric Company,

partment below and the leak of the leaf noted as before. If the ore contains uranium and radium, the rate at which the leaf falls will always be faster than the natural bealf of the instrument itself. This is due to the fact that the rays given off by the radio-active material ionize the air in the compartment in which it is placed, and if the leaf has been charged positively the negative ions will be attracted to the leaf system and will discharge the charge that has been imparted to it. This ability to discharge electricity is the means by which radio-active substances are recognized.

Reno; L. W. Crehore, city engineer, Fallon; R. E. Middagh, electric engineer Nevada Consolidated Copper Co., McGill; P. F. Bragg, Nevada Engineering works, Reno; J. C. GIVEN POWERS

At the Request of the superintendent of grounds the following letter is printed in the Sagebrush:

UNIVERSITY OF NEVADA
JOSEPH EDWARD STUBBS, Pres.
Reno, Nev., March 16, 1914.

Mr. J. B. Lynch,
Superintendent of Grounds,
University of Nevada.

My Dear Mr. Lynch: The regents wish you to assume the responsibility of saying when the pond may be used for purposes of swimming or skating, and give you full power to act in this matter.

When in your judgment it is unwise for the young people to use this pond at any time during the year, your word is to be their law and to be obeyed. Very truly yours,
J. E. STUBBS, President.

CECIL CREEL

Cecil W. Creel, a graduate of the agricultural college of this university, is now in charge of the new field station of the United States bureau of entomology at Forest Grove, Oregon. His territory comprises Oregon, Washington and Idaho.

College Men Are "Strong" For The New L System Clothes For Young Gentlemen

They meet their ideas of appearance and endurance. No frills about them—no affected cut—just well designed, clean-cut, stylish-looking clothes, that fit right—feel right—look right—and best of all—stay right. And the price is right.

Broad jump—Laveago (R), Root (N), Rose (N). Distance, 21.1.

Pole vault—Laveago (R), Clark (N) and Porteous (R) tie. Height, 10 feet.

University Class Listens to Hobo

(Continued from Page One)

employment in this country at the present time: (1) Labor-saving inventions throwing men out of work and, (2) the immigrants. He explained that he stood not for I. W. ...ism, socialism, nor radicalism of any sort, but that his idea was to perfect democracy, to remedy industrial conditions as they are found today. He is a disbeliever in strikes and recommends that these difficulties between employer and employed be settled by arbitration.

Such being the causes of unemployment, Jeff went on to say that the Itinerant Workers were good, honest, American citizens demanding justice, not charity, for they were the class of men suffering most as a result of this unemployment. In America there are four classes of unemployed: The resident unemployed, the man in the city or town who finds himself out of a job because of factory closed or business dull and because he is tied down by his family cannot migrate in search of other opportunities; the second class is the "hobo"; the third, the "tramp"; the fourth, the "bum."

Jeff draws a line clear and distinct between these four classes of men out of work. The typical hobo is the man who, finding himself out of work, migrates in search of opportunities. Having no money to "flirt with the cushions," he "rides the rods," for he has no definite assurance that a job will await him at any particular place in his travels and he must conserve his capital. As soon as he finds a job he quits hoboing. He can accept no charity and still be a hobo. Fellows in this class are organized into a union known as the International Itinerant Workers' union, they hold a convention every year and elect officers. For three years Jeff Davis has been their president and in this capacity it is his duty to travel about the country studying conditions, helping hoboes when possible, and informing the people that hoboes have nothing in common with I. W. W.'s, tramps, or bums.

The third class of unemployed, Jeff says, are the tramps. These are fellows lower in the scale. They believe that the world owes them a living. They are the fellows known on the road as "blanket stiffs," who deface property, "beg at your back door for something to eat, refuse to work, and if you refuse them they come back at night and burn your barn down."

Jeff's fourth class of unemployed is still lower than the tramp. This is the "bum, the ash dump of society." Bums are the victims of the drug or liquor habit, or on account of some physical disability, have been rendered unable to work. They have lost all self respect and pride and beg from the people on the street, and yet to be found in their ranks are men who would have made their mark as artists, literary men or other callings had they had the ambition to work.

"We have made a big mistake in ignoring the unemployed problem for so long," said Jeff, "and that is the reason that conditions are so bad today. In the United States there are no less than 2,000,000 hoboes. To correct the evil, I would suggest three things to do: Establish a national employment bureau in connection with the postoffice and so bring the manless job and the jobless man together; exclude all immigration into the United States for at least five years in order to let the American workman, who because of his higher standard of living has not been able to compete with the foreign laborer, to get on his feet again; legislate in favor of Americans, compelling employers to employ citizens in preference to non-citizens of the United States."

Jeff left Wednesday night for Sacramento and San Francisco. From there he expects to ship to Australia and New Zealand, where he will study methods of dealing with industrial problems and will then return to the United States. His home is in Cincinnati, where his wife and children reside.

LEARN THE NEW DANCES

Be Taught Right
Classes on Tuesday From 8 to 10 Beebe Hall
Private Lessons by Appointment MRS. WILSON Phone 1568W

Freshie Class Glee Victor

(Continued from page one.)

by the president, Dean Bryant, and Miss Marie Means. This was followed by the schottische, "When It's Apple Blossom Time in Normandy," which, although it broke the time honored custom of the waltz for the first dance, was the final touch to complete the springtime picture.

The crowd was just right, the music was excellent, the decorations pretty and effective, the floor perfect, the dancers happy. What more could there be to make a Freshman Glee a real success?

PHI KAPPA PHI

The initiation of Miss Edwina O'Brien and William I. Smyth in the Phi Kappa Phi honorary society will be held in room 6 tomorrow evening. These are the only members of the class of 1914 to make the fraternity.

L. W. HARTMAN

Dr. L. W. Hartman, head of the department of physics, returned Sunday evening from a week's trip through the eastern part of the state where he has been inspecting the schools in the interest of the university. He reports a very enjoyable trip.

"PAT."

Joseph Alphonse Naden, sometimes known among his old friends at Nevada as "Pat," has been visiting his family in Reno. Mr. Naden is a member of the class of '08, and since his graduation has worked for various electrical concerns. He is now with the Westinghouse Electrical & Manufacturing company, and a few years ago was the representative of that company in Europe.

"Doc" Miles B. Kennedy made a trip to Carson City during the week just past, where he took some samples for the purpose of finding out what kind of ice cream is being dished up to the people of the capital city.

Another delicious drink, Old Dutch Windmill, at the Fountain, opposite the postoffice.
