Nevada Victor Great Contest

Santa Clara Is Defeated by Nevada in Annual Track Meet

COACH SI ROSS PLEASED

Hardy of Santa Clara and Root of Nevada Make High Scores

By Irving Rivett

Nevada's annual intercollegiate field meet with Santa Clara ended Saturday at Mackay field with the Nevada men winners by more than 15 points, the final score being 70 1-3 to 51 2-3. On a fast track, made so by the recent rain and much elbow grease on the part of Nevada men, good times were made although no records were broken in the track events. With crowded bleachers and excitement running high, the meet proved the best drawing card of Mackay field this year.

Nevada pulled down seven first-class places, tying with Santa Clara, who also secured the same number. Of second and third place men, Nevada scored the greatest number. Hardy of Santa Clara proved the best all-around man, bringing in 15 points for the visitors. Hardy took part in four events, taking first places in two of them.

Root of Nevada entered in three events, capturing two firsts and one second, giving to Nevada 13 credits. But one field record was broken, that of the hammer throw. Kiely, Santa Clara's husky weight man, slammed the ball out 120 feet 11 inches, bettering the old record by 11 inches. Ogilvie and Trabert, both "N" men, sauntered across the tape in the mile run, leaving third place for McCarthy of Santa Clara and incidentally opening the meet with Nevada in the lead by seven points. Throughout the entire meet a lead was maintained and though small, Santa Clara did not succeed in breaking it once.

Santa Clara secured her first first place when Hardy broke the tape in a pretty finish of the 100-yard dash. Nevada took second and third in Root and Mills.

The 440-yard dash brought the first real excitement of the day. The men jumped the gun and were called back by Starter Elliott. The next get-off was nearly as poor as the first. Mills failed to leave his marks until sev-

MACKAY TRACK AND BLEACHERS

Temblor Stirs Nevada Campus

EXCITEMENT IN DORMITORIES PREVAILS EARLY FRIDAY MORNING

The heavy earthquake that visited this section of the country in the early morning hours of last Friday was not without its effect upon the university. The consternation spread among the Manzanita inmates by the shaking of the building and the consequent dropping of plaster in several of the rooms has not altogether subsided as the Sagebrush goes to press. Many of the dormitory co-eds decided that the campus was the safest place to be and it was only after considerable coaxing that several of them were persuaded to re-enter the building. Miss Rosalie Pollock, the matron, fainted twice. From Lincoln hall, where the temblor resulted in the twisting of one partition sadly out of plumb and in separating a portion of the north wall nearly two inches from the building, there came a series of war whoops and a trio of third-deck inhabitants didn't stop running until they had harbored themselves in the T. H. P. O. house nearly a quarter of a mile away.

Seven minutes after the earthquake, Head Janitor Gassaway was upon the campus to ascertain whether serious damage had been wrought. He was met at the gate by Professor Feemster, of the department of history, who had run campusward for the same reason. In the dim light a cursory examination of the buildings was made, but no very serious damage could be found.

University life began as usual on the campus at 8 o'clock Friday morning, and Mr. Gassaway made a more thorough examination of the buildings. He found Lincoln and Manzanita halls damaged as has been described, the top chimney on Hatch station completely demolished, the two north chimneys on the same building dangerously cracked and twisted out of shape, the north chimney on Stewart hall was in a similar condition; in the gymnasium one of the big skylights is broken; in the Mackay School of Mines the electrical building, the chemistry building and Stewart hall there is much plaster cracked. In Morrill hall the plaster in room 6 and in the president's of-

CALIFORNIA GLEE CLUB NEVADA CONCERT SCHEDULED MAY 13

Nevada and California Glee Clubs Will Give Joint Concert

WILL ALSO PLAY BASEBALL

Harry Scheeline Accompanying Berkeley Boys to Europe

Director Charles Haseman of the University of Nevada Glee club wired last evening to the California Glee club to the effect that the Nevada singers would manage their concert in Reno on May 13, and that the Nevadans would give a joint concert with the Berkeley men. The University of California Glee club will stop here on its way to Europe where it is scheduled to appear before many of the crowned heads during the summer months; its stay in Reno will be made enjoyable by lavish entertainment planned by the U. C. alumni who reside in Reno. Definite arrangements for their program while in Reno have not been completed at this time, but it is known that a dinner to be served on the veranda at the Hotel Riverside and a dance at the Elks' home

(Continued on page 4)

THURSDAY INSPECTION

On Thursday, April 30, will be held the annual inspection of the University of Nevada Cadet Battalion. All classes will be suspended on that day. Captain W. T. Merry, of the general's staff, United States Army, is the inspecting officer. He inspected the Nevada battalion last year. Captain Merry is in Logan, Utah, today and is expected on No. 5 Thursday morning. The inspection will probably begin at 10 a. m.

(Continued on page 5)

Amos Elliott Aid Lectures

FIRST AID INSTRUCTION TO BE GIVEN—STRENGTH TEST APPARATUS

Amos W. Elliott, head of the department of physical education for men, will begin his series of lectures in first aid and laboratory demonstrations immediately following the lightening of the military schedule after inspection day, April 30. Classes will be held on Monday, Tuesday, Wednesday and Thursday of each week and the men will be divided into as many as practicable small classes so as to insure as much individual attention as possible. In order that the men who will graduate in June will get as thorough a course in this work as possible a special class for seniors only will be arranged.

Accompanying the lectures in first aid to the injured laboratory demonstrations will be a feature. Classes will be instructed as to the proper procedure when persons have been the victims of electric shocks, epilepsy, fainting, apoplexy, poisoning, drowning, etc. Instruction will be given as to the proper methods of bandaging wounds and stopping the flow of blood when an artery is cut. How to use splints in case of a fracture of a bone and the correct methods of carrying injured persons will also be taught in this course.

To aid in this instruction Professor Elliott has a number of charts issued by the Red Cross Society of America illustrating the different treatments. The course is similar to that given in most universities and at California, so popular was it with the men, that the university was forced to limit it to students of the engineering colleges.

Apparatus Received

This department of the university has also received from a manufacturing firm in Rhode Island an anthropometric apparatus. The outfit consists of a manometer for the testing of the gripping strength of the hand and forearm, and a back, leg and chest dynamometer for recording the strength of other muscles of the body. All of these records are registered in terms of kilograms. By a series of tests, including gripping, lifting, raising the body between parallel bars and chinning, an aggregate of nearly 600 kilograms should be reached. The pri-

Student Body Meets Friday

Election of Officers for Next Year Promises Close Races

POLLS OPEN UNTIL 2 P. M.

Article in the A. S. U. N. Constitution Governing Student Elections

President J. I. Cazier has announced that next Friday, May 1, will be election day. Following the student body meeting, which will convene in the gymnasium at 11 o'clock, the polls will be open, and will remain open until 2 p. m. Yesterday President Cazier made the following appointments of election officials: Inspector, Lester P. Harriman, '14; ballot distributor, Edwin Krall, '15; poll clerk, Delwyn Dessar, '14; ballot clerks, Clarke Webster, '14; Elmer Wiley, '15.

The following is the list of candidates for offices in the A. S. U. N. whose candidacy has, up to date, been announced:

For president—Tom P. Walker, Elmore Abbott, Waterfield Painter, Harper C. Need.

For vice-president—Richard Sheehy, Lee Hylton.

For secretary—Jessie Hylton, Carina Damm.

For treasurer—Earl Berchert, Geo. Ogilvie.

For women's athletic manager—Ethel Brown, Dorothy Bird, Francis Smith.

For representative on the executive committee from the Junior class—Louis Rose, Edward North, Harry Hovey.

For representative on the executive committee from the Sophomore class—Hurd, Moore, Bryant, Melarky, Clark, Organ.

For editor of the U. of N. Sagebrush—Louis Somers, Glenn Engle.

For manager of the U. of N. Sagebrush—Joe McDonald.

For assistant editor of the U. of N. Sagebrush—Irving Rivett, Lister Withers.

For assistant business manager of the U. of N. Sagebrush—Ralph Drown.

For graduate manager—Silas E. Ross.

The following is the article of the constitution of the A. S. U. N. dealing with elections:

By Duffy, '14

Old G. H. S. is in great shape this year, and we intend to be well represented at the Reno meet. Although the track prospects are not so good as they might be still we have at least one prospective point winner—perhaps more. The fellows have been out at practice regularly and Coach Foley hopes to work his team into creditable shape. Some time before the meet, we expect to arrange a preliminary contest with our ancient rival, Tonopah.

Tennis has been added to our sports this spring, and the students are enthusiastic about the game. Two players will probably go to Reno to represent the school at the tournament.

There are several candidates entered for the preliminary declamation contest to be held here about the 15th of May. The school has always taken great interest in this work, and we have strong hopes that the "gift of gab" will be as effective this year as it has been in the past.

The Glee club was great—the best thing we have heard for a long time. We surely appreciated the concert in the study hall and the interesting address by Dr. Haseman.

The evening performance made a big hit with everybody, and if the high wind made singing difficult, the fact was not apparent to the audience. Tonopah isn't the only place where the fellows broke hearts. Monk Ferris is favorite here, but Walker runs close second.

We hope we will have an opportunity to hear the club again next year. They are the best kind of advertisement for the university—not that we need one here, for we have always been Nevada boosters.

Mines' Safety Car to Visit

University Industrial Safety Men
Confer With Bureau of Mines
Man

H. M. Wilson, engineer of the bureau of mines experiment station at Pittsburgh, Pa., arrived from the east Thursday and spent the day in consultation with Ed Ryan, state mine inspector; Prof. J. G. Scrugham of the mechanical department of the University of Nevada and Prof. J. C. Jones of the Mackay School of Mines. The conference was with regard to the itinerary of the federal bureau of mines safety first car.

The car is used in giving demonstration of proper measures for accident prevention and rescue work, and is expected to arrive in Nevada during July. A tentative program was arranged during the meeting which calls for the presence of the car in the state for nearly two months during which time it will visit all the important mining camps that can be reached by the railroad, and two excursions will be taken away from the railroad, the supplies and equipment to be transported by automobile.

Thursday's session was in conjunction with action taken earlier in the week at the safety first convention. The tentative program calls for the following visits to be made by the car and crew:

July 8, Ely, where about ten days will be spent and an opportunity afforded every miner in the district to become familiar with the methods of accident prevention and rescue work as demonstrated by the crew.

July 18, Virginia City.

July 27, Goldfield.

August 3, Tonopah. After a week in Tonopah the crew will be taken to Manhattan by automobile on August 15 and several days spent at that camp.

August 21, Blair.

August 29, Wonder and Fairview. This trip will likewise be taken by automobile.

On September 5 the car will reach Reno and stay here for at least a week. A more thorough and complete program will be drafted by the safety first committee before the arrival of the car, and it is possible brief stops will be arranged for other points not already named.

The fountain, opposite the post-office, is the place to get all kinds of candies.

Nevada College Education Announces Summer Courses

Excursions, Low Expenses and Valuable Courses Will Attract Large Numbers of Pedagogues to Nevada During the Summer

Registration—The registrar's office will be open for registration on Monday, June 22. All are requested to register promptly. All classes will start work on Tuesday, June 23.

Admission—No entrance examinations are required. Courses are open to any person of good moral character and sufficient academic preparation to profit thereby. However, those wishing regular college credit must be graduates from an accredited high school or its equivalent.

Faculty—Instruction in the summer session will be given by the following named persons: Miss Clara M. Hetschel, head of the department of art and manual training, Chico Normal school; Miss Agnes Howe, professor of history, San Jose Normal school; Mrs. Mertrude Hallock Wagner, formerly supervisor of music in the Reno schools; Miss Grace A. Day, supervisor of training, college of education; Herbert Kimmel, professor of education, University of Ottawa, Ottawa, Kan.

Credit—Credit toward a university degree is in every case subject to the regular matriculation requirement of the university. One and one-half credits will be allowed for each course. No person may register and receive credit in more than four courses. One may, however, enroll as a visiting member in such courses as one sees fit.

Expense—Dormitories will open Saturday, June 20; dining hall, June 21. Board can be had at the university dining hall for \$18.00 per month; room at the university dormitories for \$5.00 for six weeks. There will be a registration fee of \$5.00, thus making the total expense of the six weeks' session \$37.00. Students coming to the university dormitories are expected to furnish their own towels, sheets, pillow cases, such covering as they will require and one comfort of extra thickness, three feet by six feet, to put on mattress.

Lectures—A number of lectures will be given during the session by educators of the state and by persons from outside the state.

Dr. H. D. Sheldon of the University of Pittsburg will be present during the fifth week of the session and will deliver a series of lectures on some of the most vital questions in present day education.

Dr. Sheldon is an author, lecturer, and teacher of much more than ordinary ability. He has studied educational systems in America and Europe, and has recently returned from extended foreign travel and study.

Courses
1. **Educational Psychology**—This course will deal with the present day problems of the school room and society. Problems of school technique, management and administration will be considered from the psychological point of view. Retardation, elimination and vocational guidance will be among the topics treated.

2. **Child Study**—This course is designed to present the facts so far as they are known concerning the nature and development of the mind during the second period of the child's life. Special attention is given to the interpretation of these facts with reference to their practical significance to the teacher.

3. **Reading**—Problems involved in teaching reading throughout the grades, including the technique of phonics and other mechanical phases of the work, as well as interpretation and expression, will be studied from the teacher's point of view. Selections from the texts used in Nevada and others from standard literature will be studied and read aloud each day.

4. **Review and Methods in History**—This course is a review of history for the grades. Aside from technical training in the methods of presentation the teacher will receive training in searching out valuable material not found in the ordinary text books, and in utilizing the material according to the nature and interests of the child.

5. **Review and Methods in Arithmetic**—A review of the principles and processes of arithmetic and a study of special methods of teaching the subject throughout the grades.

6. **Geography**—A study of aims, materials, methods and underlying principles in a modern course of elementary school geography. A special study will be made of industrial geography and causal relationships, together with field excursions and demonstration lessons.

7. **Drawing**—This course includes work with water colors, pencil, crayons and charcoal. The subjects studied are still-life, landscape, pose drawing, design, illustrative drawing, composition and principles of perspective. The object is to enable the students to teach this subject as required in the elementary schools of Nevada.

8. **Industrial Arts**—A study of industrial arts as taught in the first six grades of the elementary school. The work will include paper folding, construction work, and weaving for the first three grades, problems in pasteboard, wood and textiles for the three succeeding grades.

10. **Penmanship**—An entire period daily, devoted to practice, aiming toward perfection of form, speed and muscular movement. The aim of the course is to teach penmanship and to train teachers to teach penmanship to children.

11. **Music**—A course in public school music. Study of notation, sight singing, presentation of primary and grammar grade methods, musical interpretation.

12. **Folk Dancing, Games and Physical Exercises**—Suited to the needs of teachers in the elementary grades and rural schools will be given three periods a week throughout the session.

Excursions

At the end of each week opportunity will be offered to join excursions taken to various points of interest for the purpose of study and recreation.

For further information, address
COLLEGE OF EDUCATION,
University of Nevada,
Reno, Nevada.

HARRY BOYS

Harry Boys, an inmate of Lincoln hall during the term 1912-13 and a special student in the Mackay School of Mines, spent Friday and Saturday at the university and was one of the spectators at the Nevada-Santa Clara track and field meet. For the past several months Boys has been surveying around Pasa Robles and is now bound for Idaho. While en route to that state he will visit a number of the Nevada mining camps, where Nevada men are employed.

PRETTY SPECIMEN

W. E. Smith of Duckwater has sent in a sample of iron ore to the Mackay School of Mines for analysis that that institution is going to claim part of it for its mineral collection in the museum. One surface of the rock contains all of the colors of the rainbow and is what is known as tarnished iron ore. The rock has a botryoidal or globular structure readily discernible under the microscope.

STANFORD CONFERENCE MEN

Sixteen men, point winners against California in last Saturday's meet, will represent Stanford in the Pacific coast conference meeting to be held at the University of California oval, May 2.

The men are Campbell, Grant, McWilson, Norton, Murray, Krohn, Say, Kee, Wolcott, Chace, Gard, Bonnet, lor, Sisson, Lachmund, Bedeau and Bihlman.

These men are asked to report at once to Coach Campbell with regard to training for this meet.—Daily Palo Alto.

O. P. OSGOOD

The Nevada College of Agriculture was visited last week by O. P. Osgood, who addressed Prof. Murdock's class in irrigation. Mr. Osgood is connected with the Truckee-Carson irrigation project at Fallon; his address dealt with the legal issues involved in the water question in Churchill county, and the possibilities of irrigated lands in Nevada.

NAME A TREE

The planting of the four hundred trees which are to form the grove north of Lincoln hall is going along merrily. It has been suggested that the students each plant a tree and name it after himself or herself, and Superintendent Lynch has given his approval to the idea. It will be for everybody to plant his tree not later than Wednesday as the trees have already commenced to bud and no time can be lost in getting them into the ground.

Every student in the University of Nevada is entitled to plant a tree and name it. Provision will be made for keeping the tree permanently marked the name that you have given it. In the years to come, in the days of the greater University of Nevada, this park that they are laying out now, will be one of the choice spots in the

Nevada campus. Future Nevadans will stroll along its grass-bordered avenues and rest in the shade of these very trees. And by these trees we shall be remembered forever.

NOTIFY THE OFFICE

Students who change their addresses in Reno should notify the registrar's office; persons leaving college before the end of the term should notify that office and leave their new addresses; alumni changing their place of address should also notify the registrar's office.

That office is constantly besieged with inquiries as to the whereabouts of students. Often, were your addresses known, the result would be to your advantage. Always keep the university informed as to where you are.

Cal. Glee Club Reno May 13

(Continued from page one.)

will be features. The Nevada-California Glee clubs' joint concert will be held at the Majestic theater on the evening of May 13.

On the afternoon of May 13 the University of California Glee club baseball team will cross bats with the University of Nevada baseballers on the Mackay field. There are 25 men in the California party, and in this

number there are a number of veteran diamond men. Bill Forker, the former California star pitcher, the man who pitched 17 innings against Stanford and won, is a member of the party. Harry Scheeline, who spent his freshman year at Nevada during the term 1912-13, is also one of the U. C. singers who will go to Europe.

The fountain, opposite the postoffice, is the place to get all kinds of candies.

Another delicious drink, Old Dutch Windmill, at the Fountain, opposite the postoffice.

Geo. Ogilvie Track Captain

Nevada Men Qualify for Pacific Coast Conference—Ogilvie Will Go

A meeting was held in the lounging room of the Mackay training quarters yesterday afternoon at which Silas E. Ross, track coach and graduate manager, presided. Those present were those eligible, because they had taken at least one point in the Santa Clara-Nevada track meet, to vote for next year's track captain. Almost unanimously, by their first ballot, they elected George Ogilvie captain of the 1915 track team.

At that meeting Coach Ross announced the men who had qualified, by their records of last Saturday afternoon, for the conference meet to be held on the University of California track on May 2. Powers in the 100-yard dash, Mills in the 220, Hovey in the 880, Kent in the two-mile, Root in the broad jump, and Ogilvie in the mile run are the men who will represent the University of Nevada. In regard to Root there was a little doubt yesterday afternoon, but it is expected that a wire from Ross stating Root's consistent performances will make his place in the conference secure. On account of lack of competition, Ogilvie did not let himself out in the Santa Clara meet, having the desire to reserve his strength for other events in which he was entered. As a result his time did not qualify him for the conference. Coach Ross and the men on the team are very anxious that Ogilvie be one of the group to go to Berkeley and have therefore started a collection to raise the \$20 needed to defray the expenses of sending him. Dr. Charles Hase-man and Coach Ross have headed the list with subscriptions of \$2 apiece, many of the track men have donated various amounts and a committee has been appointed to raise the rest of the money necessary.

Another delicious drink, Old Dutch Windmill, at the Fountain, opposite the postoffice.

Chinese Studies Run At Cornell

Portland Sunday Journal Tells What Other Colleges Are Doing

Cornell University

Cornell's Chinese students held recently a novice track meet at Percy field for the purpose of discovering the new material needed to win the inter-collegiate track meet to be held at the next summer conference of Chinese students. Having won the meet for the last two years, the Chinese undergraduates are hoping to score a third victory this summer in order to gain permanent possession of the trophy cup. The most creditable mark made by the new men was in the 100-yard dash, which was won in 11 2-5 seconds, according to the student timers.

An honorary upperclass society has been formed in the College of Law. The society is composed of 18 seniors and 18 juniors, who will hold mock court sessions for the purpose of giving the members practice in procedure. The men will meet soon to draw up a constitution and to choose a name for the organization.

Yale University

It was a matter of surprise to many that the two-thirds vote of the academic undergraduates necessary for adoption of the honor system proposed by the Academic Senior council failed to materialize. Many students feel that no real provocation for an honor system exists, and look with strong disfavor upon the signing of a pledge of honor. On the other hand, a large number who have watched the successful working of a similar system in the Scientific school feel that the undergraduate morals would be bettered by the introduction of an honor system in the college. It therefore appears quite likely that the question may be agitated again within the next year or two.

Announcement has been made of an interesting prize to be given for the first time this June, in memory of

ENGRAVING for COLLEGE and SCHOOL PUBLICATIONS

THE above is the title of our Book of Instructions which is loaned to the staff of each publication for which we do the engraving. This book contains 164 pages, over 300 illustrations, and covers every phase of the engraving question as it would interest the staff of a college or school publication. Full description and information as to how to obtain a copy sent to any one interested.

We Make a Specialty of Halftones, Color Plates, Zinc Etchings, Designing, Etc.

For College and High School Annuals and Periodicals. Also fine copper plate and steel die embossed stationery such as COMMENCEMENT INVITATIONS, VISITING CARDS, FRATERNITY STATIONERY, ETC.

Acid Blast Halftones All of our halftones are etched by the Levy Acid Blast process, which insures deeper and more evenly etched plates than it is possible to get by the old tub process, thus insuring best possible results from the printer. The engravings for this Annual were made by us. Mail orders a specialty. Samples sent free if you state what you are especially interested in.

CENTURY BUILDING

INDIANAPOLIS INDIANA

Temblor Stirs Nevada Campus

(Continued from Page One.)

rice suffered. Mr. Gassaway estimates that the damage done to the various buildings about the campus by this earthquake will aggregate between \$500 and \$700. The university repair gang are at work fixing the damaged walls and chimneys.

On Friday morning the regents also took steps to prevent further damage from earthquakes. They had an architect from the firm of Bliss & Faville of San Francisco, architects

for the University of Nevada, inspect all the campus buildings. At their request, City Engineer Meskimmons, also made a thorough examination of the university property. As a result of their examination these experts recommended that the coping stones on the chimneys and airshafts at Lincoln hall be removed, that the three chimneys on Hatch station be dispensed with, and also that on the northern side of Stewart. These repairs have been ordered made.

Reno Article In Great Paper

Superintendent Billingshurst Writes Article for Christian Science Monitor

Illustrated with photographs of the new Reno High school building and the Mount Rose Grammar school building, an article appears in the issue of the Christian Science Monitor, one of the most widely read newspapers in the United States, which is designed to bring the advantages of Reno as an education center to the attention of people everywhere. The Sagebrush has received marked copies of this paper, that of April 14, and takes pleasure in reprinting it here.

The author's name is not given in the Monitor. It was written by Superintendent B. D. Billingshurst of the Reno public schools.

Reno's New Schools

Reno, Nev.—This city has brought its schools to what is regarded as a high state of efficiency. It has about 12,000 population, and during the last four years four new grade buildings have been erected at an average cost of \$50,000 each, and a new high school at a cost of nearly \$150,000, which, with a former grade building and a memorial kindergarten, represent an aggregate value of \$450,000.

These buildings have been constructed with special reference to the welfare and comfort of pupils and teachers; to the demands of the industrial idea in modern education, and to their architectural attractiveness and convenience. They have been warmly commended by the publications of the Russell Sage Foundation, by educational magazines and by prominent educators.

Structures' Special Features

The new buildings are one story in height. All the classrooms in which pupils are seated and do most of their studying and reciting are located on the first or ground floor. This both eliminates stair climbing and minimizes thought of fire. The grade schools are of mission architecture, and the high school of Spanish renaissance, types regarded as especially adapted to one-story structures.

Another feature is their spacious and attractive auditoriums, seating in each grade building 400 to 500 persons, and in the high school 1,000 persons. The high school auditorium also is used as a gymnasium, where basketball games and other athletic and social affairs are held. These auditoriums are provided with stages, stage scenery and dressing rooms. The buildings, therefore, serve all the useful functions of modern instruction and recreation and at the same time become social centers for their respective communities.

The mechanical fan system of heating and ventilating with thermostat temperature control supplies each pupil with 30 cubic feet of fresh air each minute and changes the air in each classroom eight times per hour. Other features are vacuum sweepers, electric wires in conduit, fire reels and up-to-date drinking fountains, shower baths for boys and girls; rest room and kitchenettes. All surfaces are made so as to catch as little dust as possible. For example, the baseboards are covered to meet the floors, and doors are perfectly smooth, without panels or moldings. There is left-side lighting in the classrooms, with translucent double shades operating from center rail of window. There are thoroughly ventilated wardrobes which can be entered only from the classrooms. Ample space in the rear is provided for unobstructed playgrounds, and in front for lawns and flowers.

Teaching Efficiency Required

For the instruction of the 1,800 pupils 59 teachers and supervisors are employed. The board insists upon a high standard of preparation and experience for its teachers, and requires for positions in the grades graduation from a state normal school and not less than one year's successful experience; for positions in the high school, graduation from a reputable university or college, and not less than two years' successful experience.

Courses of study, from kindergarten through the high school, are considered in keeping with the material equipment. The high school offers the usual four years of work designed to prepare students either for practical usefulness or for entrance to the best colleges and universities. The teaching includes commercial and industrial courses. The high school is accredited with such institutions as the University of California, Stanford university, University of Nevada and the University of Michigan. The grade schools are conducted on the usual plan, with

(Continued on Page Eight)

"MORNIN' ON THE DESERT"

(Found written on the door of an old cabin in Southern Nevada)

"Mornin' on the desert, and the wind is blowin' free,

And it's ours, jest for the breathin', so let's fill up, you and me,

No more stuffy cities, where you have to pay to breathe,

Where the helpless human creatures move and throng and strive and seethe.

Mornin' on the desert, and the air is like a wine,

And it seems like all creation has been made for me and mine.

No house to stop my vision, save a neighbor's miles away,

And the little dobe shanty that belongs to me and May.

Lonesome? Not a minute! Why, I've got these mountains here,

That was put there just to please me, with their bluish an' frown and cheer.

They're waitin' when the summer sun gets too sizzlin' hot,

An' we jest go campin' in 'em with a pan an' coffee pot.

Mornin' on the desert,—I can smell the sagebrush smoke.

I hate to see it burnin', but the land must sure be broke.

Aint it jest a pity that wherever man may live

He tears up much that's beautiful that the good God has to give?

"Sagebrush aint so pretty?" Well, all eyes don't see the same.

Have you ever saw the moonlight turn it to a silvery flame?

An' that greasewood thicket yonder,—well, it smells jest awful sweet

When the night wind has been shakin' it,—for it's smell is hard to beat.

Lonesome? Well, I guess not! I've been lonesome in a town.

But I sure do love the desert with its stretches wide and brown.

All day through the sagebrush here the wind is blowin' free,

And it's ours jest for the breathin', so let's fill up, you and me."

MORNIN' ON THE DESERT

(A Parody)

"Mornin' on the desert, and the wind a blowin' free,

Looked some different to that fellah from what it did to me.

We were stranded on the desert, almost dyin' with the heat,

Didn't have a drop of water and not very much to eat.

"Mornin' on the desert" found us feelin' mighty blue,

Couldn't tell which way we'd come from nor where we's goin' to;

"No house to stop our vision," and the wind was blowin' free,

"It was ours, just for the breathin'," didn't fill up Bill and me.

"Lonesome? Well, I guess not." But 'twas not the mountains gay,

It was lizzards, snakes and centipedes, desert's children what they say.

But I sure do hate the desert, "with its stretches wide and brown,"

And that sizzling sun at daybreak, sizzles when it's going down.

"Sagebrush aint so pretty?" well there wasn't any there,

Not a brush to hide under, from the sun's infernal glare.

I was longing for the city, and a little bush or two,

Anything to cool my blood off, An-heuser Busch would do.

This desert was in Texas, the place that God forgot,

Where the Devil took a homestead and staked it out in lot;

But he hasn't any sexton, and he doesn't toll the bell,

Men's bones bleach on the desert, and their spirits are in—

"Mornin' on the desert," aint no very cosy spot,

When there's nothing in your stomach, in your pan or coffee pot.

Some folks like the desert, well happy may they be,

Your truly for the City, one trip's enough for me.

ARTHUR V. DOANE LEAVES

Stanford Men Vote "Honor"

Honor System at Stanford Interesting in Light of Nevada's Problem

Men students in assembly this morning cast 317 votes in favor of a "straight honor system" in examinations. If the proposed departure from established practice is approved by the faculty, students who take advantage of opportunities to cheat will be responsible only to themselves and to the opinion of their classmates. There will be no prescribed penalty imposed.

Three forms of honor system were proposed and discussed at the meeting. Eighteen voters favored a method by which a student who found another cheating would have an option of either reporting him to student authorities, or speaking only to the offender.

Nineteen students wished to secure an honor system under which cheating students must be reported for punishment.

In accordance with the overwhelming sentiment against reporting wayward students, President A. G. Halm, '14, of the Associated Students, will submit the chosen form of honor system to the faculty for approval. Men who spoke for the "no spies" honor system this morning stated that it would be the only real honor system. Objections were made against a necessity of keeping an absolute check on the honesty of the students, and the point was maintained that a private reprimand of cheaters would serve more fairly and effectively.

Since President Branner has not been on the campus today it is impossible to state what the attitude of the faculty who are in close touch with student affairs could not be obtained this afternoon.

The action of the Stanford student

Penny Contest Losers Treat

Enjoyable Time by the Y. W. C. A. Girls in Farm Yard Gym Friday

By Mary Raitt, '15

Friday night saw the end of the penny crusade; that is, so far as material things go. The memory will last a long time, and it's all due to the losing side losing valiantly. The gym wasn't a "bower of beauty" this time, which fact was rather a relief, because rose-colored lights, billowing hangings, etc., etc., grow tiresome sometimes, especially when adjectives run low. Zoe Gould and her company had arranged a country scene, and country it was from the straw-covered floor to the "constabule," who was equal to any occasion, whether tying the nuptial knot or playing the piano. In the center of the gym was a rustic well, artistically covered with blossoming vines and holding in its mossy depths two old oaken buckets, one containing buttermilk, the other lemonade, both in keeping with the country atmosphere and exceedingly satisfying to the sunbonneted, straw-hatted girls and their best "fellows." For costumes it was almost a repetition of the Jinks. There were girls in gingham aprons, true Maude Mullers, and girls in overalls, Hiram and Joshs, and a girl in imposing constable regalia, silver star,

body in departing from the more common character of the honor system as it is employed at other universities will probably be unexpected by the faculty. Student officers are of the opinion, however, that the rigid appeal to personal honesty made by the proposed method will meet approval.

Abolishment of the Plug-Ugly contest was endorsed on 68 ballots, and its retention in some modified form was favored by 226 votes.—Daily Palo Alto.

high boots and all, who hailed from Skunkville.

To Nan Coon's accompaniment, Miss Sameth danced as she always dances; we all enjoyed it, but the "men folks" just went wild. The constable made no attempt to quell the disturbance, either, "he" just sat there puffing at his corncob with the keenest enjoyment and had eyes for no one but the dancer. Gladys Hofer recited a pretty little country piece, and so did Veronica Diekey; Lysle Rushby sang with Florence Nelligan and Alma Morrow whistling. A group of sailors danced the hornpipe and then Ruth McKissick and Doris Taylor did a pretty whirl which savored not at all of country instruction. Their dance was interrupted though by the boys who always seem to exert themselves painfully just to break up a girls' party—but they never do break it up, just cause a ripple of excitement and then are forgotten.

We all danced and played and then we ate. Real farm ice cream and delicious cake was the menu, accompanied by a hand-painted place card which, of course, helped greatly.

So to the losing side we give our heartiest congratulations and thanks for such a jolly time.

WILSON MALONE

Wilson Malone left during the week for Battle Mountain with a party of surveyors from the United States land office. He will be employed in this party during the summer months and will resume work at the university at the beginning of the second semester.

Captain Applewhite, commandant of cadets, returned from a flying visit to Winnemucca yesterday, where they are organizing a special cavalry troop of the national guard.

Superintendent Abel was a visitor on the campus from Winnemucca Sunday.

General Engle Mobilizes Army

Earthquake Proof Camp Established Within Two Hundred Feet of Lincoln Hall

Immediately following the first earthquake felt Sunday evening, Glenn S. Engle, a resident of Lincoln hall, embarked upon a new enterprise. Mr. Engle has staked a claim of some hundred square feet on the grounds in the rear of Lincoln hall and here is awaiting recruits for his contemplated march to Washington.

As a test to find the best men for officers of the march, Mr. Engle has established camp in his newly staked claim and here is closely observing the men as they sleep these long, cool and quaky nights through. Archie Trabert, the first man to enlist, was on the ground almost as early as the general. Close behind Trabert were Coe and Price.

When seen by a Sagebrush reporter early Monday morning, Trabert, who is aide de camp, stated that the first night spent on the camping grounds was highly successful. Not one man deserted ranks, although had there been any loose bricks on Lincoln hall and the wind had carried them two hundred or more feet toward the camp any many of the four now enlisted might have been struck down. For bravery, hardiness to withstand the elements, loyalty to the cause, and love of adventure, Mr. Trabert stated that the men now in the ranks cannot be surpassed. The roll will be open for any new recruits during the rest of the present week.

WORK BEGUN

Work has been begun by the seniors on the concrete "Senior Bench" which will be the farewell gift of that class to the University of Nevada. The bench will be a substantial one and will be placed just north of the main entrance to the new library. It will be provided with a place for the class record.

SHIPMATE KILLED

Marine Gallagher, one of the four United States marines killed in the first attack on Vera Cruz, was a shipmate of Head Janitor Gassaway on the battleship Wisconsin. They were together on this battleship in Asiatic waters during the Russo-Japanese war.

LUTHER E DU BOIS

A card was received on the campus a few days ago from Luther E. Du Bois, a special at Nevada in 1910-11. "Duby," as he was commonly known at Nevada, played football on the 'varsity team of that year. He is now employed at Grass Valley and writes that he is the father of a 6-months-old son.

MORE TROUT

Gassaway, Amadon, Horn, Lynch, Gorman and Jameson, the college fishermen, are planning a trip to the Reno Power, Light and Water company reservoir northwest of Reno in the very near future. The company will drain the reservoir to clean it and have given the college fishermen permission to drag some trout out of it to transplant into the campus lake.

FRANK PETERSON

Frank L. Peterson is expected to arrive in Reno this evening, the term at the California Agricultural college at Davis, where he is instructor in farm mechanics, having been completed. Frank will resume his government irrigation work in Nevada during the summer months.

TO LOVELOCK

Jack Pearson and Roy Meffley went to Lovelock on Sunday. Meffley will be employed in that region in irrigation work under Frank Peterson during the summer and Jack Pearson will also be employed in the same department.

ARRIVES FROM FLETCHER

Miss Winifred La Tourette arrived from Fletcher, Nev., last Saturday night and will visit with her family on Lake street. Miss La Tourette has been teaching the district school at Fletcher during the winter.

MRS. JACOBSON LEAVES

Mrs. C. A. Jacobson left Reno during the week for Berkeley where she will spend the summer. Dr. Jacobson expects to join her in the California college town in June and they will reside there during the summer.

Seismograph Records Large Earthquake Here Friday Morning

By Professor J. C. Jones

Head of the Department of Geology, Mackay School of Mines

The above autograph of the recent earthquake represents the path in a horizontal direction multiplied by five through which a given point moved during the passage of the quake. It was produced by the working of a pen point attached to a pendulum which remained practically at rest on a plate of smoked glass firmly attached to a wall of the Mackay school of mines. It shows that the wall actually moved back and forth at least three-quarters of an inch in an east and west direction and vibrated nearly as far north and south.

It is an exceedingly difficult if not impossible, to trace the entire movement in detail but enough can be given to allow anyone who wishes to attempt the complete solution of the maze. The beginning of the earthquake is represented by the extremely irregular line about the center of the plate. The earth moved southerly with many slight

vibrations to the east and west for a distance of one quarter of an inch. Then there was a sudden jerk to the east followed by a greater swing to the north. The vibrations increased in length in all directions and at about the climax the earth moved suddenly westward about three-quarters of an inch, did a figure eight, and then as suddenly resumed its former position. At one time the movement was severe enough to move the pen completely off the 4x5 plate as is shown by the single scratch at the bottom of the plate. The vertical movement of the earth is indicated by the dotted line appearing in the record where the pen was jarred up from the plate and making a record only at the moments when it hit the plate.

Too little is known at present of the general extent of the earthquake to safely indicate the problem source of the disturbance, but from the character of the record it would seem as if the fault along which the slip occurred causing the shock was located at no great distance to the west of Reno.

High Schools At Berkeley

National and Pacific Coast Interscholastic Records for Nevadans to Beat

In last Friday's issue of the Daily Californian, the Berkeley paper gives in tabular form the national and Pacific coast track records for the benefit of the high school men visiting at California and competing in the California interscholastic. The Sagebrush copies these records in the interest of the Nevada Academic league athletes, who will be here on May 29 and 30. Concerning the invasion of Berkeley on Friday and Saturday by the high school athletes, who will receive all told trophies and medals to the value of \$400, the Daily Californian has the following to say:

"In almost embarrassing numbers, but with eager hopes, 375 high school athletes have swooped down upon the open doors of the university in answer to its invitation to come and partake in the annual week-end games in honor of the Californians that are to be. Fraternity houses are jammed full, sleeping cars are sidetracked for the overflow, and many return to their nearby homes during the few hours of sleep that have been allowed by the plans of the committee."

Skimmed Milk Always Branded

Nevada Food and Drug Control Is Praised in Wisconsin Dairy Paper

The following was taken from an editorial in the current issue of the Milk Dealer, a magazine published in Milwaukee, Wis., in the interest of the dairying industry.

"The Nevada Pure Food Law requires something that was omitted, overlooked or not thought of, by some of the pure food officials in other states, and one of the regulations reads as follows: 'Milk and cream in hotels, restaurants and lunch rooms must comply with the standards set forth in the law, or a sign stating the fact that an inferior quality of milk or cream is served must be placed in a conspicuous place.'

"If such a sign were necessary in many of the hotels and restaurants in most states, some would if the fact were stated, read something like this: 'Partially Skimmed Milk,' 'Skimmed Milk,' 'Diluted Milk,' or 'Skimmed and Diluted Milk.' The signs for cream would mostly be 'Creamless Cream,' and would be used by most of the so-called first-class hostesses who make it a practice to get as much of the unfortunate traveler and give as little as possible. Cream is one of the few articles which is subject to expansion.

"Milk dealers would find their trade would increase among the hotels and restaurants if a regulation like that in Nevada was in effect and in force.

"It would be interesting to know how many states have laws similar to that in Nevada, or how many require milk served in hotels, restaurants and so forth to contain the same per cent of fat as that sold for family use."

Spring Rugby Finer Points

Swimming, Punting Contest, Interclass Football Game, All in May

With the Nevada-Santa Clara field meet over and intercollegiate athletic relations completed for the year, just enough athletics will be indulged in at Nevada for the remaining weeks of this term to keep the men in good physical condition. Foremost in this light spring work interest naturally focusses upon spring football and the Sophomore-Senior rugby game, which was played to a draw on two occasions during the rugby season last fall. As neither of these classes has proved its supremacy, the Haseman interclass rugby trophy is still without an owner and the class of 1914 has one chance left to get its numerals engraved thereon. On the other hand if the Sophomores win in the coming contest they can, by also winning the interclass series in their Junior and Senior years as well, become the perpetual owners of the cup for the regulations so provide for the class winning the trophy three years in succession. The game will be played on the Mackay field within the next two weeks.

Spring football is indulged in at the various universities for the purpose of learning the finer points of the game. During the more strenuous season in the fall there is not time for the coach to give the individual attention necessary for the men to pick up the little details that a man should know to be a finished rugby player. During the spring practice there will be special instruction in punting and a punting contest is being arranged. If possible a trophy or prize of some kind will be awarded to the man whom this contest proves to have the most accurate boot in the University of Nevada.

Another branch of athletics new to Nevada, swimming, under the direction of Professor Elliott, has a strong following. During the winter months the class in swimming suspended operations but with spring the weekly visits to Moana have been resumed. The work now is entirely in life-saving and finished swimming. The class in enthusiastic and want to give an exhibition before the semester is over. Any student is welcome to avail himself of these weekly trips to Moana. Tuesday night is swimming night; the class leaves the Second and Virginia street corner on the 7:30 car.

The fountain, opposite the post-office, is the place to get all kinds of candies.

this association previous to the first week in May, nominations for officers and members of the executive committee shall be made, and they shall be voted on in the first week in May.

Sec. 2. All elections of officers and members of the executive committee shall be subject to the following regulations:

1. No person whose name does not appear on the official list of members shall be allowed to vote.

2. Voting shall be by ballot.

3. At least one week in advance, a day in the first week in May shall be designated as election day, and two hours of this day shall be designated as hours of voting.

4. The polls shall be open during the hours of voting provided that all the members on the official list do not vote in less time, in which case the polls shall close when the last member votes.

5. There shall be at the polls at all times one inspector, one ballot distributor, one poll clerk and two ballot clerks. The ballot distributor shall give one ballot to each voter and the latter shall mark it and together with his or her name, give it to the ballot clerk, who shall pronounce the name and wait until the poll clerk has crossed it from the official list, before depositing the ballot in the ballot box.

6. Ballots shall be counted immediately after the polls close and the result made known immediately after the count is finished.

7. No candidate for office shall be an official at any election.

Sec. 3. Candidates not nominated at the last meeting previous to the first week in May must announce their candidacy at least 48 hours before the hours of voting.

Sec. 4. A plurality of votes shall be sufficient to elect any candidate.

Sec. 5. Officers and members of the executive committee shall take office at the beginning of the college year succeeding that in which they were elected and hold office for one college year, except the graduate manager, whose duties shall begin at the end of the semester in which he is elected and last for one year.

Sec. 6. Special elections shall be called in case of vacancies. Article VII, Section 2.

Nevada Victor Great Contest

(Continued from page one.)

er seconds late. Hovey, Nevada's star sprinter, got off in good shape, but came to his knees on the bank of the first turn. Hovey spiked a Santa Clara man, whom he claimed cut in on him and fouled him, and as a result of his fall failed to place. Mills, the last man off, succeeded in passing all but Soto of Santa Clara. Healey of Nevada pulled in third. Though much argument ended the event, it was not contested.

Santa Clara broke the tape in both the hurdle events with Nevada in second and third places. The two-mile run was Nevada's from the first lap. Kent after three times around the four-lap track, began to walk away from the rest of the field, finishing nearly a complete lap in advance of McCarthy, the visitor's distance man. Farrar of Nevada dropped across the line third.

Nevada took all three places in the half-mile. Hovey, Chism and Trabert finishing in the order named. Hovey, though pretty well battle scarred from his fall in the cinders in the

440, made the neatest run of the day, breaking the tape in 2:7 with a vast amount of sprint left in him.

Clark of Nevada proved a surprise in the pole vault, taking first place by a jump of 10-6. McCubbin and Bacon of Nevada and Donohue of Santa Clara tied for second. Root, Nevada's man, took the broad jump in a leap of 21-7. Santa Clara captured second and third places. Kiely of Santa Clara took first in both events with the weights. In the relay, Nevada took the lead and held it to the end.

Coach Ross was greatly enthused over the results of his men. With conscientious training he expects to turn out some very good men for the pole and the sprints for next year. The results of the meet were better than he figured, more new Nevada men showing than he calculated. Four of his men, Hovey, Mills, Kent and Powers, yesterday qualified for the conference to be held at Berkeley on May 2. The men are expected to make good showings for old Nevada.

Mile run—Ogilvie (N), Trabert (N), McCarthy (S). Time, 5:4.

100-yard dash—Hardy (S), Root (N), Mills (N). Time, :10-2.

High hurdles—Fitzpatrick (S), Rose (N), North (N). Time, :16-2.

440-yard dash—Soto (S), Mills (N), Healey (N). Time, :54-2.

Low hurdles—Hardy (S), Hancock (N), Rose (N). Time, :26-1.

Two-mile run—Kent (N), McCarthy (S), Farrar (N). Time, 11:2-2.

220-yard dash—Root (N), Hardy (S), Powers (N). Time, :23-2.

880-yard dash—Hovey (N), Chism (N), Trabert (N). Time, 2:7.

Mile relay—Won by Nevada: Healy, Mills, Hovey, Ogilvie. Time, 3:37 1-2.

Pole vault—Clark (N), tie for second, McCubbin, Bacon (N), Donohue (S). Height, 10-6.

Hammer throw—Kiely (S), Jepson (N), Pflaging (N). Distance, 120-11.

High jump—Leonard (S), tie for second, Watson, Luce (N), Hardy (S). Height, 5-6 1-2.

Shotput—Kiely (S), Lane (S), Harriman (N). Distance, 39-6.

Broad jump—Root (N), Soto (S), Hardy (S). Distance, 21-7.

Totals—Nevada, 70 1-3; Santa Clara, 51 2-3.

Starter—Elliott.

Clerk of Course—Boggs.

Judges at Finish—Knight, Kennedy, Booth.

Timers—Bane, Henderson, Hook.

Scorer—Sheehy.

Marshal—Cazier.

DR. CHURCH SAFE

Professor J. E. Church of the University of Nevada, whose extended absence on a trip to the summit of Mount Rose caused fear to be felt for his safety, reported yesterday from Brockway, a point on Lake Tahoe, Church, with Frank Folsom, left on April 10 for the Mount Rose summit and it was announced on departing that the party would return to Reno last Friday. A relief expedition was organized yesterday morning and Phillip Cowgill and Glenn Engle left in search of the pair.

When Professor Church communicated with Reno it was too late to head off the searching party. Professor Church declared he had experienced severe weather on Mount Rose which delayed the work of taking snow measurements.

YOUTH IS TAKEN TO COAST SANITARIUM

Master John O'Sullivan, son of Mr. and Mrs. J. B. O'Sullivan, who has been critically ill for the past several days, was taken to San Francisco last evening, where he will be placed in the Adler sanitarium and the assistance of specialists secured. Mr. O'Sullivan accompanied his son.

Yesterday the boy was in an extremely critical condition.

The Fountain, opposite the post-office, is the place to get all kinds of candies.

eight grades below the high school. The boys of the sixth, seventh and eighth grades are given manual training, and the girls of the same grades domestic branches, including cooking and sewing. A music and art supervisor is employed, and the seven buildings are provided with nine pianos, most of which have been purchased by the teachers and pupils.

State Institution at Hand

The University of Nevada, with a faculty of more than 40 members, is located at Reno, and provides courses in mine engineering, agriculture and liberal arts.

Reno is beautifully located in an irrigated valley in western Nevada, only a night's ride from San Francisco. Its climate is pleasant. In the winter there are few unpleasant days. Reno is built in a picturesque location. It is surrounded by lofty mountains, 23 miles from Lake Tahoe, whose only outlet, the Truckee river, flows through the heart of the city. This is essentially a residence town, of beautiful homes, well-kept lawns in harmony with the rich foliage of its trees and shrubbery.

Francis Gordon Brown, '01, who was a scholar and an athlete of distinction. From the fund of \$5,000 subscribed by university and other friends, a medal and money award is to be made each year to the junior selected as the Gordon Brown memorial prize man, choice being based on intellectual ability, high manhood, capacity for leadership and service to the university.

University of Washington

Statistics compiled during the past week show that of the 201 students of the University of Washington receiving conditions at the close of this last month 86 were members of campus fraternities and sororities. It is believed that the competition which will be instituted among the campus organizations at the close of this year when the standing of the various home clubs is published will have a large influence in further reducing the number of delinquencies reported for the Greek letter societies.

Four hundred and ninety-four thousand dollars was required to operate the university during the fiscal year ended April 1. The largest amount allowed to any department went to chemistry. The College of Mines received the next largest appropriation. On the faculty salary roll, the English department led with \$21,000.

Amos Elliott Aid Lectures

(Continued from Page One)

mary object of these tests will be to ascertain whether or not men are physically fit to enter strenuous athletics. Those who are not able to register the required number of points in the strength test will be worked gradually into condition by means of light indoor exercises. Beginning with next Tuesday morning Professor Elliott will be in his office in the gymnasium from 9 to 11 o'clock of the days Tuesday, Wednesday and Thursday of each week

ready to make these strength tests. Records will be kept of the kilograms registered by each man and these average records will be compared with the average records made by the college men of Harvard and of California, as colleges typical of the east and west respectively. In future semesters these tests will be taken at the beginning of each.

WANTED

To inform you that if you need spectacles or eyeglasses to consult Dr. John B. Koch, the expert optometrist and optician, at R. Herz & Bro., the jewelers. Every case receives my personal attention. Rates most reasonable.
