

U. C. GLEE CONCERT WEDNESDAY

UNIVERSITY OF NEVADA SINGERS RETURN FROM EASTERN TRIP

Glee Club Trip to Eastern Nevada Fraught With Good for U. of N.

ENTERTAINED BY NEVADANS

Queening One of the Pleasures of Trip, Says Sagebrush Writer

(By CHICK.)

The Glee club returned from its eastern trip on train 19 Monday evening. Many and wonderful are the tales of good times which the members have to tell. The trip was a huge success musically, financially and joyfully; good crowds being the order at every town. Lovelock, Winnemucca, Elko, Wells and Ely were visited. On the return journey Tub Mills was unanimously voted Chief High Mighty Queener for the trip, but that is another story.

Lovelock was the first stop, and there the bunch spent the afternoon in wandering around the surrounding lanes, looking o'er the farms. The club also sang at the high school, receiving much applause from the listeners. It was here in Lovelock that Peter McKinley startled everyone by suddenly developing hitherto unknown qualities as a queener.

At Winnemucca the next evening the club was royally entertained after the concert with a dance, after which the Langwith girls served refreshments at their home. Monk and Glass are always at home when there are eats on the table and this time made no exception to their rule. The young ladies who so ably entertained were extended a hearty vote of thanks. Tub Mills fell pretty hard in this little town and it was with difficulty that he was torn away.

Being somewhat tired and sleepy after two strenuous evenings, most of the bunch essayed to remain in Winnemucca until a late train, but five brave men and true, Webster, Walker, McKinley, Ferris and Rivett, caught a train for Elko at 3:50 a. m. Arriving at Elko this quintette were taken to Lamaille in autos where with Prof. Scrugham they ran an efficiency test on the plant of the Elko-Lamaille Power company. On the return journey to Elko Webster forgot to wear his bonnet and received a most beautiful coat of sunburn which made him

Glee Singers Enjoy Banquet

ELKO ALUMNI ENTERTAINMENT SHOWS REAL NEVADA SPIRIT

(By Mrs. Ethel Marzen McBride, '06) The Elko alumni of the University of Nevada entertained the Glee club at an informal banquet after the concert Thursday evening, May 7.

The attractive dining-room at the Hotel Mayer was gaily decorated with pennants and flowers. Two long tables, with covers laid for forty-four, were festive with fragrant apple blossoms arranged in graceful baskets, pink-shaded silver candelabra and dainty place cards in water colors.

B. G. McBride, in behalf of Elko, welcomed the guests and Tom Walker responded in a humorous vein that caused much merriment.

Professor Scrugham was called on and during his remarks advised the Elko alumni to organize a local chapter in order to promote an active interest in university affairs, among the graduates as well as prospective students. He cited an instance where a board composed of alumni was given certain executive authority in the affairs of its Alma Mater and obtained excellent results. He expressed the hope and belief that the alumni of the University of Nevada may one day have an active part in the government of student affairs. The hearty cheers that followed this address attested to the sincere regard the Nevada students, old and new, have for Professor Scrugham.

Between selections by Hale's orchestra the members of the Glee club, individually as well as collectively, showed their appreciation of the welcome extended them by rendering a varied and generous program. At 12 o'clock everyone stood while the dear familiar strains of "U. of N. So Gay" filled the room. Best loved of all our college songs, it tightened the throats and dimmed the eyes of the alumni who already "dream of by-gone days."

Everyone lingered to shake hands again, to congratulate the Glee Club on their successful concert or to thank the hosts and hostesses for their interest in the college boys.

Plans are already under way to organize the local alumni and make this

THE ARTEMISIA
Unless something unforeseen happens at present the Artemisia will make its appearance upon the campus next week. Work has been held up from time to time which accounts for this late appearance of the book.
The limited time and the approaching end of the semester make it necessary that the management appeal to advertisers and subscribers for every co-operation in the distribution of the books.
Any one who can pay up his subscription ahead of time will be credited, and in doing so will be rendering the task more easy in helping to meet the first payments on the book.

SINGERS OF BLUE & GOLD NEVADA CONCERT WEDNESDAY NIGHT

Nevada Glee Club Will Render Three Numbers During Program

IS STRONG IN VAUDEVILLE

Harry Scheeline Second Bass in the California Singing Bunch

Thirty-five members of the University of California Glee club will arrive in Reno aboard their special car attached to No. 6 at 8:45 tomorrow morning. During the day they will be the guests of the U. of N. Glee club and the U. C. alumni of Reno. Besides being Nevada's honored guests on the campus during the day special entertainment will be provided by Reno people. At 6 o'clock a banquet will be tendered to the California boys by the Reno U. C. alumni. It will be held on the veranda of the Hotel Riverside, overlooking the Truckee. A dance to which students and faculty of Nevada are invited will be given in honor of the visitors by the Elks at their home after the show.

This is the second tour of the University of California Glee to Europe.

UNIVERSITY OF NEVADA SWIMMERS WILL GIVE WATER CARNIVAL

Tennis Finals Decides Champ

"FATHER" HINCKLEY IS DARK HORSE IN TOURNEY— WITHERS WINS

The finals of the men's handicap tournament were played Wednesday between Hinckley and Withers. The girls' singles, mixed doubles and men's doubles, all handicap events, are to be played off this week. Next Saturday and Sunday the men will send a six man team to play the Century club. This team will probably be Withers, H. W. Hill, Heward, Neeld, A. E. Hill and Boggs. Each man will play both singles and doubles, making a total of nine matches. Last fall the Century club won seven out of nine matches from the university men, but they will probably find things reversed this spring.

The men's singles aroused quite a bit of interest among the spectators, besides having thirty entries. The handicaps did not seem to affect the results of most of the matches. The noticeable exceptions were the defeat of H. W. Hill by Feemster in the second round; the defeat of Neeld by Boggs in the third round, and the defeat of Feemster and Boggs by Hinckley in the third and fourth rounds. The tournament had several long matches, especially when Hinckley and Boggs played 40 games and when Price almost eliminated Heward.

The club this year is particularly strong in vaudeville. Rose Gilbert and his beauty chorus is said to be "some bear;" Turner and Baker shine in dialogue and song; Leon Ettenger, the wonderful boy baritone, is a pleasing feature; Howard Patrick, composer of song hits, is on the program; Dick Madox, the entertaining entertainer, "will be there," and, among others, the Exposition Quartet will carry with them the spirit of sunny California across the Atlantic.

Three numbers will be rendered during the evening by the University of Nevada Glee club.

GLEE GIRLS ENTERTAINED

The members of the Girls' Glee were the guests of Miss Maud Denny at the regular Century club card party at the Century club last Saturday afternoon.

Water Exhibitions in Swimming and Diving and Life Saving

EDDY FABER'S FIRE DIVE

Moana Show to Raise Funds for Sending Swimmer to Coast Meet

A swimming and life saving exhibition at Moana Springs is to be held by the members of Amos Elliott's class in aquatics on Tuesday evening, May 19, and the proceeds of it are going to be spent in sending a swimmer to California to represent the University of Nevada in one of the swimming contests that are a feature of the sports of U. C. and which are held in the Strawberry Canyon pool. Definite announcement of the event was made yesterday and the members of the class are enthusiastic over the event. The admission is to be 25 cents, including a swim after the show. A special car service is being arranged.

The tentative program contains eighteen separate numbers, lasting from five to ten minutes each, which will follow each other in rapid succession. The grand opening will be a candle parade by the entire class. During this number the swimming pool building will be darkened, all light will proceed from candles held in the mouths of the swimmers. Fun will be added to a number of the events by a funny clown who is at home in the water, in the air or on land—just like a duck. There will be an egg race, a high school student race by five of the crack swimmers of Reno high, an inter-sorority and Manzanita hall swimming contest that will be exciting for the ladies, a faculty-senior relay, an apple and watermelon race, a pingpong race in which the swimmers blow pingpong balls ahead of them on the surface of the water, fifty and 100 yard free-for-alls, an under water contest, and an old clothes race. These are some of the contests, but the real excitement of the evening will be furnished by Eddy Faber, the fearless sophomore, by his daring fire dive. Challenging death, Eddy stands in the sight of all among the rafters of the building far above the water. Suddenly lights are extinguished, and Eddy, a mass of living flame, plunges

Final Report S. G. Committee

Report of the Committee on Student Government Submitted and Approved by A. S. U. N., May 1

Mr. Chairman:

Your committee appointed to confer with the faculty committee for the purpose of formulating a plan for student self-government has finished its work, and herewith respectfully submits its report:

In submitting this report we desire to emphasize the fact that numerous plans of student government now in use in various universities in the country have been considered in detail. In suggesting this plan we feel it the best and most feasible for this university. This decision has been reached after nineteen weeks of tedious and deliberate discussions, in regular weekly meetings rarely adjourned before 11 o'clock at night. Accurate and extensive minutes were kept by the secretary and the plans therein submitted and discarded can be referred to, and will be of immense help when the students come to the matter of incorporating this report into the student body constitution.

It is a well recognized fact that appointed positions with specific delegated powers of recall are more productive in acquiring the best results and efficient membership.

Our recommendations briefly stated are these: There shall be a student affairs committee, consisting of three men and two women to be appointed by the president of the student body, and ratified by a majority of the executive committee.

In considering the powers to be delegated to the student affairs committee, we have discussed the possibility of their coping with the following situations and activities:

1. They may act on all questions of student conduct.
2. They may discuss possible changes in the employment of campus labor.
3. To keep alive the traditions of our university.
4. To co-operate with the faculty in all matters of student affairs, and to be the melting pot of the opinion of all university students regardless of A. S. U. N. membership.

Terms of Office

The term of office of this committee should be one collegiate year.

The decisions of this committee shall be communicated by the chairman of the committee to the president of the university, and through the president, if necessary, to the board of regents.

Upon request of fifteen per cent (15 per cent) of the members of the student body any decision of the committee may be brought before the student body at one of their meetings, and said body will have the power to change the decision.

To insure continuity of policy and to strengthen the membership of the executive committee for the efficient management and consideration of its new duties, we recommend the addition of one faculty member.

The committee also feel that the Block N society, beyond doubt the most representative organization, should also have one member on the executive committee, the same to be elected by the Block N society.

It is not our intention to suggest the enlargement of the executive committee for we know from past experience that small committees usually do more efficient work, therefore we recommend that the two class representatives be dropped and the two men suggested take their place on the executive committee.

In conclusion, we express our hope that by the incorporation of the recommendations we have just made, student government in the University of Nevada will become firmly established, and by it conditions for both students and faculty of the University of Nevada will be bettered.

Respectfully submitted,
CHARLES HASEMAN,
AMOS WILLIAM ELLIOTT,
Faculty.

Nevada Academic League Constitution and By Laws

Published at the Request of the Board of Control for the Use of the High School Members of the Nevada Academic League

The board of control of the Nevada Academic league are constantly receiving inquiries from state high school officials regarding the rules and regulations governing entries, etc., in the meet to be held here on May 30. The constitution and by-laws in full follow. The board of control wishes especially to call attention to sections 4, 5, 6, 7 and 11 of the by-laws:

CONSTITUTION

Article I

1. The organization shall be known as the Nevada Academic league.

Article II

1. The object of the league shall be to promote amateur interscholastic sports, declamation contests and debates.

Article III

1. Upon application, any public school in the state of Nevada shall be admitted to membership. Public schools from outside the state may be admitted by a two-thirds vote of the board of control. Other schools and institutions may be admitted only by unanimous vote of the board of control and the principals of all schools participating in the last previous contest.

Article IV

1. The officers of the league shall be a chairman, vice chairman and secretary and treasurer.

2. The duties of the chairman shall be, (1) to preside at the annual meeting of the league; (2) to preside at all meetings of the board of control, and (3) to discharge such other duties as are incident to the office.

3. The duties of the vice chairman shall be to preside in the absence of the chairman.

4. The duties of the secretary and treasurer shall be, (1) to keep the minutes of all meetings of the board of control and of the annual meetings of the league; (2) to keep the records of all the athletic and declamation contests; (3) to receive and hold all moneys of the league, and to disburse same on written order of the chairman.

Article V

1. The chairman of the league shall be the chairman of the University of Nevada athletic committee.

2. The vice chairman of the league shall be the president of the student body of the University of Nevada.

3. The secretary and treasurer shall be the secretary of the University of Nevada athletic committee.

Article VI

1. The active management of the league shall be vested in a board of control, consisting of (1) the University of Nevada athletic committee; (2) the superintendents of the Reno and Sparks public schools; (3) the president of the student body of the University of Nevada; (4) the graduate manager of athletics of the University of Nevada.

2. The board of control shall (1) pass on the eligibility of the entries to all contests held under the auspices of the league; (2) direct the disbursement of all moneys of the league; (3) select the officials for the track meets and declamation contests; (4) fix the time and date for such contests; and (5) transact such other business as may come before it.

3. The board of control shall have power, to appoint such special committees, from time to time, as may be deemed proper.

4. Five members of the board of control or their proxies shall constitute a quorum.

5. The constitution and by-laws may be amended at any time by a unanimous vote of the board of control.

By-Laws

1. The schools of the league, represented by their principals and track captains, shall, by a two-thirds vote at the annual meeting, have the right to disapprove any action of the board of control.

2. Reports of the officers of the league shall be read at the annual meeting of the league, and same shall be incorporated in the minutes of the meeting.

3. Assessments may be levied at the discretion of the board of control. Such assessments shall be paid to the treasurer of the league.

4. No person shall be eligible to participate in any of the contests held under the auspices of this league unless he is a regularly enrolled student in the school that he represents, and has been such for at least three

months prior to the contest. Two weeks of unbroken absence, unless for sickness, are sufficient to debar the contestant. Students over twenty-one years of age are not eligible to entry. A regularly enrolled student is defined as one who has carried at least 15 hours work per week, with a grade of 75 per cent or higher, for a period of at least three months prior to the contest, who is not a post-graduate student, and who is no connected with the school in capacity of instructor or assistant instructor in any way.

5. Any person who has won first place in any event for two consecutive years is barred from entry in that event for the next succeeding year.

6. No person who has ever taken part in any intercollegiate contest between institutions granting collegiate degrees, shall be eligible to participate in contests held under the auspices of this league.

7. Not more than two representatives from any school shall be entered in any one event, and not more than twelve representatives from one school shall be entered in any field meet held under the auspices of the league.

8. Lists of all contestants shall be sent to each school entering at least one week prior to the field meet. All protests touching the eligibility of contestants must be filed with the board of control prior to the day of the field meet.

9. The following will be the list of events contested for at the annual field meet: 50 yard dash, 100 yard dash, 220 yard dash, 440 yard dash, half mile run, mile run, 120 yard hurdle, 220 yard hurdle, pole vault, broad jump, high jump, shot put.

10. An athletic badge will be awarded each student of the schools having membership in the league who can make badge performance in any three of the above events.

Badge tests may be held at any time of the year, and each school will conduct its own tests on its own grounds. A trophy, to be held for one year, will be awarded at the annual field meet to the school that qualifies the highest percentage of its enrolled boys for the athletic badge. The school reporting the highest percentage will be officially tested, and if the percentage attained at the official test is still higher than any other reported percentage, the school will be awarded the trophy. If, however, in the official test the school falls below other reported percentages, these other schools will be tested in the order of their standing until a school is found whose official percentage is higher than any other reported percentage.

(Each school is expected to conduct its own tests. If assistance is required, application should be made to the secretary of the board of control.)

11. The annual declamation contest shall be held on the evening preceding the annual field meet. No entry in the declamation contest shall appear in special costume. Declamations should not require more than ten minutes for delivery. Boys and girls will contest separately. The judges will mark upon the following scale:

Articulation and pronunciation... 25
Carriage and gesticulation..... 25
General effect 50

WORKING WOOD WORKER

Prof. Richard Brown and Al Preston are directing the students in "wood shop" in the use of the universal wood worker installed by that department a few weeks ago. Practical utilization of the machine is to be had in the making of window and door screens for the physics, chemistry, dining hall, Lincoln hall and other buildings upon the campus.

DIRECTOR Y. M. C. A.

Dr. J. E. Stubbs, president of the University of Nevada, has been elected a director of the Reno Y. M. C. A. to fill out the unexpired term of one year of A. W. Plummer, who is leaving Reno and has resigned from the board. The annual election of officers of the association will be held at a meeting of the board next Wednesday evening.

EDITORIAL

"DICK"

For the first time in many years Prof. Richard Brown is handling the work of his old department, the University of Nevada wood shop. Long before the present mechanical building was built when the boys slept upstairs in the "rams' pasture" and the wood shop was downstairs in the same building, "Dick" Brown instructed future engineers in the handling of tools and wood working machinery. Then the old wood shop burned down and following that the present mechanical building and Lincoln hall were built. "Prof." was placed in charge of buildings and grounds, a new man was broken in by him to take charge of the wood shop, and he was made master of Lincoln hall, where he and his family took up their residence.

It has been twenty-three years since Prof. Brown began to serve the University of Nevada. With the exception of last term, when he was compelled to live at Pacific Grove on account of failing health, he has been a daily figure upon this campus. In the twenty-one consecutive years that he was actively engaged in serving this institution it is safe to say that he was closer to the men in college than any man is now or any other man ever has been. In the twenty-one years that Dick Brown controlled affairs in the men's dormitory, a control of twenty-one college generations of all types of men, most of them lawless, he made a friend of every college man. If you should ask him today about any man out of those hundreds of men who lived upon this campus in all those twenty-one years, he would place him instantly, for they were his boys and he loved them in spite of the pranks they used to play. If you should approach today any one of those hundreds of men who lived in Lincoln hall during the mastership of Richard Brown, he would have the kindest word of all to say for that old man. If they were in trouble they went to "Prof." and they received sympathy and help; if mischief were the cause there was always kindly advice to show the straight way cut. If it were not for the forgetfulness of his friendship on the part of some of the "old boys" who have passed out through the portals of this little school, Prof. Brown would be a richer man today. But never a word of this could you ever draw from Richard Brown.

And now, on wood working days, sitting legs crossed on one of the work benches upstairs in the mechanical building directing the fellows at work in making screens for buildings on the campus, is Prof. Brown doing the same work he came here twenty-three years ago to do and doing it just as conscientiously. He is feebler now—feebler than when he looked more like the picture that hangs over the fireplace in the reading room of Lincoln hall—may that picture be honored by Nevada's dormitory men forever; but the same old interest, the same old fire is there. It is the same old fire that checked midnight riots

in Lincoln hall; but, in the morning, warmed by the glow of a smile that had replaced the fire, we were greeted. How we loved that smile and the sly little wink that went with it—the wink that meant that all was not only forgiven but heartily forgotten.

Glee Singers Enjoy Banquet

(Continued from Page One)

first happy occasion an annual event in honor of the Glee club. At least ten alumni were unable to be present.

Besides the members of the Glee club place cards were written for Mr. and Mrs. R. W. Hesson, Mr. and Mrs. J. B. Fitzgerald, Mr. and Mrs. C. B. Armstrong, Mr. and Mrs. B. G. McBride, Mrs. Lulu Hurley, Mrs. H. H. Cazier, Misses Tessie Crane, Louise Dewar, Bertha Knemeyer, Josephine Crane, Beulah Hershiser, Messrs. Ward Lusk, Alyn Carville, Archie Dewar, Will Crane, Harold Hale, W. H. Settelmeyer, Nat Wilson, Professor Scroggum, Mr. Harlan.

FRANK PETERSON

Frank L. Peterson arrived from Lovelock Sunday and is back at his old stand in the agricultural office in Hatch station. Frank will spend the summer in Lovelock and in Reno and on the road between, in his U. S. irrigation investigation work. When the vacation is over he will go back to Davis, where he is instructor in farm mechanics of the University of California agricultural college.

MRS. STUBBS EXPECTED

Mrs. J. E. Stubbs and Ruth are expected to arrive in Reno tomorrow morning from Berkeley and will take up their residence at their campus home. Ms. Stubbs has completely regained her health. President Stubbs is expected to return from his eastern trip about May 20.

BROTHER HERE

Livingston La Tourette, brother of Miss Alexandrine La Tourette, assistant librarian, is visiting with his family on North Lake street, and will spend about a month in Reno. He has been attending Oberlin college, Ohio, and was a member of the Oberlin College Glee club.

through the air to find safety from death by fire in the dark waters of the pool.

According to the program tentatively made out, the following are the events that Announcer Boggs will proclaim on next Tuesday evening:

- 1, candle parade;
- 2, springboard stunts, high diving, rings (with clown);
- 3, fifty or one hundred yards free-for-all;
- 4, pingpong race;
- 5, Eddy Fabers' remarkable death-challenging fire dive;
- 6, old clothes race;
- 7, porpoise diving;
- 8, life saving and resuscitation exhibition;
- 9, champion teams race by members of the class;
- 10, faculty-senior relay;
- 11, ladies' race (inter-sorority and Manzanita);
- 12, water polo;
- 13, high school free-for-all;
- 14, interclass relay;
- 15, apple or watermelon race;
- 16, life saving exhibition;
- 17, egg race;
- 18, under water contest;
- 19, free swim for spectators.

FRANK GIGNOUX

Distinction has come to Frank Gignoux, E. E. '13, in the form of an appointment to a position in the experimental laboratory of the General Electric company at Schneckady. Few of the large corps of young electrical engineers employed by the company gain a place in this laboratory.

CLAUDE HAMILTON

Claude Hamilton, who graduated from the department of mechanical and electrical engineering at Christmas time, has been promoted to the position of assistant to the chief engineer of the McGill Power plant, the electric power plant of the Nevada Consolidated Copper company. The McGill plant is the largest electric power plant in the state of Nevada and one of the largest in the west.

WANTED

To inform you that if you need spectacles or eyeglasses to consult Dr. John B. Koch, the expert optometrist and optician, at R. Herz & Bro., the jewelers. Every case receives my personal attention.

Y. W. C. A.

Two Interesting Talks of German Life Will Be Given on Wednesday

An interesting meeting has been planned for next Wednesday at the regular Y. W. meeting. Two interesting talks will be given on some topic of German life. Prof. Haseman's talk will be on the "Student Life" and Miss La Tourette on the "Passion Play." There will also be special music. Everyone is invited to come.

Masonic Temple, Reno

This Season's Men's and Young Men's

clothes are made on "natural" lines; not much if any padding; narrow shoulders; very soft draping of all the garments and coats with soft front.

Hart Schaffner & Marx

have perfected this style of garment; they know how to make a soft front that stays put; doesn't get "flabby" in a few weeks' wear.

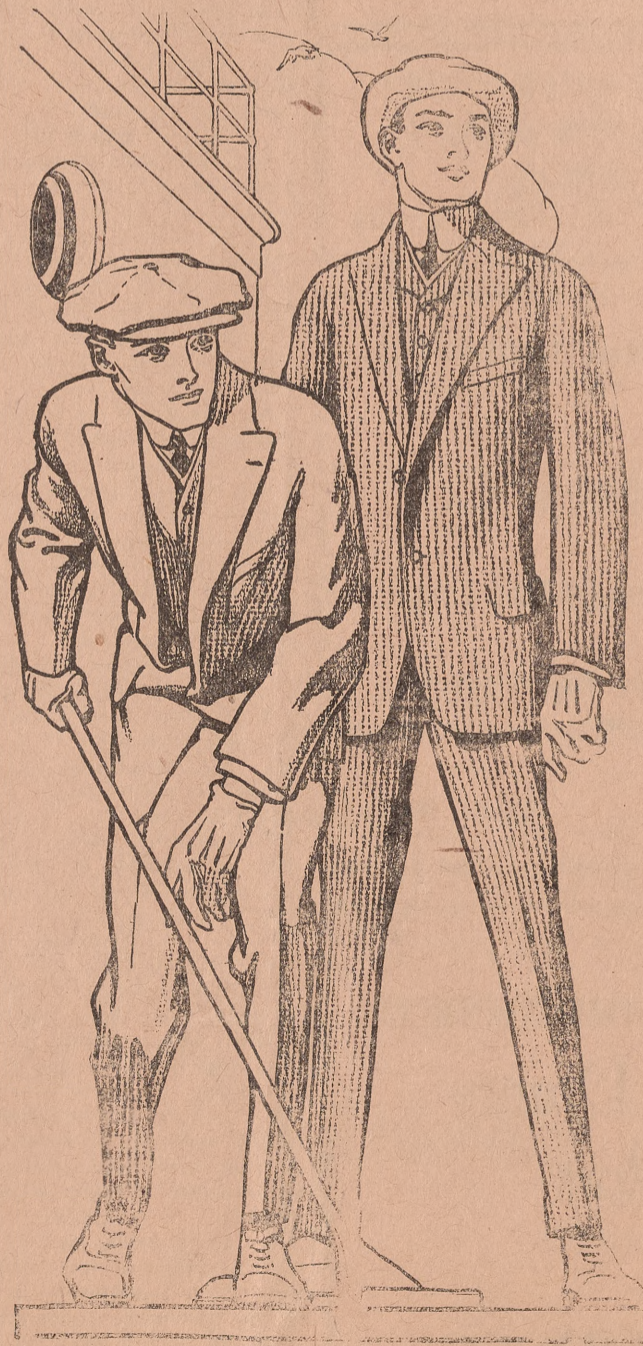

You'll see the difference as the season advances; better see it on the other fellow; not on yourself.

BLOCK "N" BANQUET

Tonight at the Mineral cafe the members of the Block "N" society of the University of Nevada will hold their banquet. Festivities will begin at 9:15. The banquet is in honor of Moore, Bacon, Malone and Boggs making their letter in baseball, and Root, Clark and Chism winning the track letter by having made two or more points against Santa Clara.

WINTER SCENES

Photographs of Mount Rose and Lake Tahoe were obtained by Dr. J. E. Church and Frank Folsom during

their recent trip in the mountains. The pictures, taken with a Premo circuit camera equipped with a Zeiss protar VII lens and color screen are remarkably clear and distinct. They show the wonders of the Sierras in winter. Snow cornices, timber screens, snow sampling, Lake Tahoe and modes of packing, all are revealed in this set of photos.

VISITS TRUCKEE

Prof. S. P. Ferguson of the department of meteorology spent Saturday in Truckee on business connected with his department.

Home Restaurant, Lunch and Grill Room

36 and 38 West Second Street

We have leased the adjoining building to us and have just opened a first-class lunch and grill room. An archway joining the two compartments makes our places the largest restaurant dining room in the city.

Having installed one of the latest model broilers, in charge of a first-class chef, we are better prepared than ever to take care of our customers.

Now Is the Time To Sit for Those Graduation Pictures

Peggy O'Neil "Peg o' My Heart" at Majestic Friday and Saturday

"PEG O' MY HEART"

"Peg O' My Heart," which Laurette Taylor has been playing in New York for nearly two years and which comes to the Majestic theater Friday and Saturday evenings of this week is indeed a comedy of charm. The story deals with Peg, the daughter of an improvident but lovable Irishman and an aristocratic Englishwoman on whom her relatives turned their backs when she set out for America with the husband of her choice. By the will of one of Peg's uncles who repented on his deathbed his unkindness toward his little sister, the little Irish-American maiden is brought to England to be properly reared at the expense of his estates. Peg is received into the family of an aunt, not

from love, but for the sake of the money, that her care and instruction brings. Her treatment is hardly that of a favored relative, but she finds little to make her life pleasant except the friendship of one Jerry, a friend of the family, her experience setting forth vividly the contrast between her rather uncouth manners and the stilted and unconventional ways of this English household.

The play is in three acts, the entire action taking place in the living room of Regal Villa, in Scarborough, England.

The popular cast selected by Mr. Morosco includes Peggy O'Neil, Martin Sabine, Roland Hogue, Jane Meredith, A. T. Hendon, Fraser Coulter, Joseph Yanner and Olin Field.

Debating Club Holds Meeting

Last night's meeting of the University of Nevada Debating society was called to order by Sol Casier, temporary chairman. A program was given as follows: An essay on the Mexican situation by Charles Reilly; "What Brought Mark Twain to Nevada," by Miss Otto; a reading by "Billy" Fife; an essay written by Earl T. Ross and read by Prof. Turner, entitled "The Relief Principle."

Following the program the chairman opened the business meeting of the club and under "old business," T. L. Withers, business manager, gave his report. Under "new business," the club discussed the advisability of choosing, before this semester is over, a suitable question for debate with Erigham Young university next year; this matter was left in the hands of a committee consisting of Turner, Reilly and Withers. The last meeting is called for May 25.

Nominations for officers to serve the club during the next year were declared in order and a lively election followed, resulting in the choosing of the following: President, T. L. Withers; vice president, Louis Somers; secretary, Miss Schmailing; business manager, Sol Casier; faculty director, Professor Turner.

A vote of thanks was taken by the members present, the secretary was instructed to formulate it and it was requested that this be published in the Sagebrush.

ENGINEERS' CLUB

On Thursday evening, May 14, at 7:30, in the lecture room of the electrical building, a regular business meeting of the Engineers' club will be held. The principle business of the meeting will be the election of a president, a secretary and a treasurer for the club for the ensuing term.

TEST AT LAMOILLE

On last Thursday Prof. J. G. Scrugham, accompanied by Tom Walker, P. G. McKinley, Clarke Webster, Irving Rivett and "Monk" Ferris, visited the power plant of the Elko-Lamoille Electric Power company at Lamoille and ran a test upon it. These men are members of the Nevada Glee club who were spending that day in Elko and the trip was made to Lamoille and back by auto. They were accompanied back to Elko by Bill Settlemyer and Nat Wilson, Nevada graduates who are employed at the plant.

AUTO TRIP

Otto Hussman, Tom Walker, Phillip Cowgill and Prof. H. P. Boardman made a trip to Lahontan and Fallon during Saturday and Sunday a week ago in Otto's American underslung. An examination was made of the big dam and construction works at Lahontan and a visit enjoyed at the reclamation service office at Fallon.

NEW OFFICE

The new office of the research department of the agricultural experiment station in the chemistry building has been newly papered and furnished. New electric fixtures, file cases, desks, instrument cases and chairs, all of oak, make Dr. Jacobson's office an attractive one.

NAT WILSON

Nat Wilson, a winter graduate of the department of mechanical and electrical engineering, is expected in from Lamoille, where he at present is employed by the Elko-Lamoille Power company, for commencement. Nat will visit until about June 10 with his family in Reno and then will go to Schnectady, where he will enter the service of the General Electric company.

Summer Course Tech. Students

Bluestone Property in Lyon County
Again Chosen for Summer
Work

The Bluestone mine, in the Mason valley copper mining district, has again been chosen by the civil engineering and geological departments of the university for their annual summer courses in practical surveying and geologic mapping. In 1911 these two technical classes camped at Bluestone. The civil engineering summer course lasts from June 4 for four weeks and will be under the direction of Prof. H. P. Boardman, head of that department. The summer course in geology begins also on the day following commencement and is of two weeks' duration. It will be in charge of Prof. J. C. Jones of the department of geology of the Mackay School of Mines. The two classes will camp together in tents at Bluestone and meals will be had at the mine foreman's home. The mine's buildings have been placed at the disposal of the students and instructors for office purposes.

The Bluestone Mining company's property is situated on the Nevada Copper Belt railway, about three and one-half miles east of the famous copper property of Ludwig. It is two miles from the town of Mason and about four miles in a southwesterly direction from Yerington, the county seat of Lyon county. Inspection trips will be made by the classes to other points of interest in this geologically interesting region.

The summer course in surveying is required of students in the civil engineering department. The work will consist of surface and underground surveying. The members of the C. E.

Dinny Leaves Atlanta Trip

Head of Food and Drugs Control Issues
Reno's Bid to
Shriners

Carrying an invitation from the Reno Shriners for all members of that order to stop off in this city when they visit San Francisco next year, Sanford C. Dinsmore departed last Wednesday evening for the annual Shrine convention at Atlanta, Ga. The invitation will be delivered to the convention by Dinsmore and Dr. H. E. Reid, who is also a delegate from the Nevada lodge.

San Francisco is in the field for the 1915 convention and in the event the coast city is successful in its campaign, the Nevada delegates will ask all delegations to stop off in Reno and be the guests of the local temple. Elaborate preparations will be made for the reception and entertainment of the Shriners, as several thousand members of the Masonic fraternity will pass through Reno to attend the session.

Dinsmore will be absent ten days or two weeks and plans on returning direct to Reno as soon as the Atlanta session is completed.

Classes who will take the 1914 trip are Dondero, McQuiston, Hinckley, Painter and Neeld. The class in geology will make a geologic map of the region based on the topographic map made by the class in 1911. Those who will take the summer work in geology next month are Painter, Neeld, Stickney, Smyth and Claffin. At the present time the Bluestone mine is doing very little work and so the students will be given full swing in the underground workings of the property.

Offer Prizes Econ Essays

Subjects for Essays Conducted Annually
by Professor Laughlin
of Chicago

Announcement has been received at the University of Nevada of the terms of the annual competition in essays on economic subjects which is conducted by Prof. J. Laurence Laughlin of the University of Chicago.

Four prizes, ranging from \$1000 to \$200 have been offered to students of economics and of commercial subjects for the production of the best essays on a number of timely topics.

One of the subjects, which is now of particular interest because of the question of canal tolls, is "Ship Subsidies by Indirection;" another is, "Price Maintenance," which is being very widely discussed by commercial experts. Other subjects suggested are:

A local study of the immigration problem; a study of the protocol in the needle trade industry; the economic validity of the single tax; reciprocity and retaliation in foreign trade; the development of trade with Latin-America.

The papers are to be completed by June 1, 1915. Competitors are divided into two classes. Undergraduates of any American college may compete for a first prize of \$300 and a second prize of \$200. Any other American, without restriction, may compete for a first prize of \$1000 and a second prize of \$500. The committee retains the right to award all prizes to undergraduates if the merits of the papers demand it.

Similar contests have been conducted for ten years. The University of Chicago has thus far had the most winners, with a total of five. Northwestern, Cornell and Washington and

Gold Medal Life Saving

Nevada Industrial Safety Association
Favors Awards of
Heroism

A gold medal for acts of heroism in the saving of lives in Nevada will be awarded by the Nevada Industrial Safety association according to action taken at the meeting of the executive committee held at the Commercial club during the week. The question of recognizing acts of heroism was freely debated and the committee members were unanimous in the desire to present gold medals to those who performed daring risks in the saving of lives.

The meeting was attended by a full membership and was called to order by Governor Oddie. The members present were George A. Bartlett, Frank Ingram, W. B. Alexander, V. L. Ricketts, W. E. Wallace and J. G. Scrugham.

Routine business occupied several hours of the session. It was decided that moving picture films illustrative of various phases of the safety movement be procured and the secretary was instructed to enter into negotiations for the pictures without delay. The films will be shown throughout the state in the leading moving picture theaters in an effort to spread the safety movement.

Every electrical company in the state, with one exception, has taken out membership in the association, according to the report of the secretary and practically all of the mining companies and railroads have likewise become affiliated with the organization.

FIRST AID SCHEDULE

The following is the schedule of work in first aid to the injured for the week commencing Monday, May 11: 1. Treatment of wounds. 2. Packet of National Red Cross society. 3. Bandaging, (a) three cornered bandage, (b) figure eight bandage, (c) reverse bandage of arm, (d) recurrent bandage of head. 4. Carrying. The week commencing May 18: Fractures, dislocations, use of splints, etc.

DR. MACK RETURNS

Dr. Mack of the state hygienic laboratory returned from Elko and vicinity Sunday night where he has been since last Wednesday studying a condition of anaemia common among the horses there.

FACULTY CLUB BANQUET

The banquet at the Riverside, the great annual event of the Faculty Women's club of the University of Nevada, is planned for Saturday afternoon, May 23.

Mrs. Miles B. Kennedy, who was operated on a few weeks ago for appendicitis, is improving constantly.

Lee are tied for second place, with fourteen winners each; Oberlin college has had three, the University of Illinois two, and one each have come from Yale, Harvard, Columbia, Michigan, Pennsylvania and Wisconsin.

STRENGTH TEST RESULTS

The following are the results of the men who have thus far tried their strength on the new apparatus for that purpose recently acquired by the department of physical education for men: North, 629; Wiley, 628; Hodgkinson, 627.4; Ogelvie, 627.4; Hancock, 731; Faber, 833.25; Fake, 624.9; King, 735.1; Phillipi, 727; Silva, 833.7.

**President Jos. E. Stubbs
Reports Eastern Colleges**

Regent and President Touring East in Search of the Right
Men to Fill Important Places in the University
of Nevada Faculty

The following report on universities of Indiana and Illinois was written by President Stubbs and is going the rounds of the campus for members of the faculty to read. Dr. Stubbs and Regent Reid are now upon university business in the east:

Indiana

Yesterday we were at the University of Indiana, where we were very cordially received by President William L. Bryan and by several members of the faculty.

1. The university has a college of arts and science which gives the degree of B. A. only.

2. The university requires sixteen units for admission to this college; eleven from fundamental subjects, English, foreign or ancient languages, mathematics, history and science. It accepts five other units from any subject taught in the commission high school of the state, and these may represent such subjects as agriculture, domestic science, manual arts, commercial geography, book-keeping, typewriting and stenography provided they are thoroughly taught.

3. The university year is thirty-six weeks divided into three terms of twelve weeks, and besides they have a summer term of twelve weeks which makes forty-eight weeks in the year for the summer term does the same work in the same subjects and gives the same credit as the work of the other terms.

4. The university requires 183 credits for graduation and these hours on the basis of two terms make the requirement 121 hours for graduation, or about the same as ours.

5. The university requires six hours a year in English and three hours in hygiene.

6. The student must elect thirty hours of language and this means Greek, Latin, the romance languages, German or comparative philology. The thirty hours may all be taken in one language or divided between two.

7. Thirty hours must be taken in a group consisting of mathematics and natural science. Fifteen hours shall be chosen in two different departments, one of which must be mathematics, chemistry or physics.

8. Twenty hours shall be chosen from the subjects of history and political science; economics and social science; English literature, Greek literature and English, philosophy, education, fine arts, music, history of the English language. No technical or professional courses may be included in this group.

9. This counts up as follows: Required six hours of English; three hours of hygiene; elective within language group, 30; in mathematics and natural science group, 30; in history and economics, 20; or a total of nine hours required and sixty hours group electives.

10. The student is required to select a major subject as early as the sophomore year. In this major subject and allied departments he is required to take 75 hours; usually 45 in the major and 30 in the allied departments, and selected with the approval of his dean. This leaves 39 hours for three electives.

11. The university has one plan of work especially for the freshman, which is excellent, and I think it part of the Princeton plan, or better perhaps, the Oxford plan, which originated it. It is this: The instructor has a group or a class of 25 freshmen in a subject requiring five hours a week. Four hours are given to lectures and recitations, but the fifth hour is given to meeting the members of the class in groups of five and going over their work with them smoothing out difficulties and giving the student a better insight into his work. This means five hours on one day of the week for this kind of consultation.

12. The university has a school education with a dean at its head, but the aim of this school is to give training of a professional character for teachers and really aims to make out of the school a graduate school.

The Campus

The campus is strikingly beautiful. It comprises about sixty acres of rolling land covered with maple trees which give it a semi-forest appearance. The university was placed in this location in 1883 and nearly all of the buildings are of Bedford limestone. Two of the oldest are of brick

and are rather out of keeping with the rest.

The university now has a tax levy which will produce from \$500,000 to \$600,000 a year, so that they feel that they are on easy street.

Salaries

Salaries are paid as follows: Head professors, \$3000; professors, \$2750 to \$2250; associate, \$2100 to \$1800; assistants, \$1500; instructors, \$1200 to \$1000; fellows, \$900 to \$300.

The president and professors are elected annually and there is no such thing as a limited tenure of office.

They are governed by a board of trustees whose terms are three years in length and they are elected, five by the state board of education and three by the alumni.

The attendance is about 2300.

At one time there was quite a contest for appropriations for the state institutions. The University of Indiana, Purdue university and the state normal schools vied with each other and this developed in unhealthy strife. Now under agreement the state institutions are living in harmony and each respecting the rights of the others.

The university has a beautiful chime of bells which was rung for our edification. Dr. Reid was especially pleased by these and while he does not wish to transfer this set to Nevada, he says we must have an equally good set for the University of Nevada.

The professors teach from ten to twelve hours a week and the assistant professors about fifteen.

Purdue

Purdue has the engineering colleges, the college of agriculture and the experiment station. They have a director of the experiment station and deans for the different schools. Their requirements for admission are the same as the other schools, by all of their work is required but there is little election. The average of the students work about twenty hours a week. Two hours of laboratory count for one of lecture work. They give a B. S. in agriculture, civil engineering, etc. The university has a summer session for teachers who wish to equip themselves for teaching in any one of the subjects that are taught in Purdue.

University of Illinois

We visited the University of Illinois on Friday and Saturday. Most of the statements are from information furnished by Dean Babcock of the faculty of arts and science.

1. The college of liberal arts and the college of science were quite recently merged into one college to be known as the college of arts and science.

2. They give but one degree, B. A. and before the schools were merged this was the degree given.

3. There are four specialized courses, which are nominally placed under the college of liberal arts and science, but which have no right there, for which they give the degree of B. S.

4. They have the usual 15 credits for admission to the college and allow, I think, but three credits for vocational subjects.

5. Of required studies, they have six hours in English. Of required group studies, they have 48 hours and require the student to take eight hours each in the six groups, which are placed in their catalogue.

6. They require a major of not less than 20 hours, nor more than 40 hours in the one subject.

7. At present they have no requirement of two minors, but it is possible that before they are through they will arrange a course which shall have a major and two minors.

8. Under this schedule there are 50 hours of free electives.

9. In their college of education 15 hours of educational subjects are required, of which three hours may be taken in elementary psychology, as a prerequisite. To date they have not required any practice teaching, but they regard this as a serious fault and have resolved to equip and build a high school building within a year and maintain a high school for the purpose of practice teaching on the part of their students. Dean Babcock said their plan contemplated about two hours per day for five days in the week, covering a period of two months for each student.

10. The University of Illinois re-

**Henry Wolfson
Is Appointed**

Will Leave for Washington June 4
to Take Examination for Dip-
lomatic Service

From Senator Pittman and Senator Newlands of Nevada, Henry Wolfson, '14, has received word that he has been designated by them for a qualifying examination for a secretaryship in the diplomatic service of the United States. This recommends him to an appointment if he is found qualified as the result of the examination. The examinations for the service are non-competitive, 80 per cent being the minimum grade necessary to make a man eligible for appointment.

Henry Wolfson came to Nevada in the term of 1912-13 and registered in the college of arts and science. His work here has been in languages, law and history, subjects which would prepare him for the diplomatic service. He reads, writes and speaks French, German, Spanish and English. He has earned the reputation during his two years at Nevada of being one of her strongest students and in student activities he has been actively connected with the student control movement. He is a member of the Sagebrush editorial staff and of the Nevada debating team.

Wolfson is expecting his commission from the president of the United States and after that is received he will be ready to go to Washington. He is planning on leaving Reno June 4, the day after commencement, when he will graduate from the University of Nevada. Wolfson does not anticipate much delay in getting a position after the examination is taken, as only one man has been appointed to the diplomatic service from Nevada in the last twelve years. According to the rule laid down in this service in cases of candidates of equal merit, equal representation shall be given to states and territories. As Nevada has not had an appointment for twelve years, the state is entitled to an early one.

PRaises Editor

Miss Gertrude Shade, a Virginia City girl, was the editor of the woman's number of the Sagebrush of May 5, a beautiful publication issued weekly by the students of the University of Nevada. It is an excellently edited sheet, full of news of interest and cleverly written articles, and is a credit to both Miss Shade and the able corps of young ladies who assisted her in compiling it.—Virginia City Correspondent of the Nevada State Journal.

BONEHEAD BASEBALL

Double boneheads are rare in baseball—scarcer than hens' teeth, and naturally so, for the completion of a bonehead requires vigilance and quick thinking by the opposition. Still, double concretes happen ever and anon, the most famous one possibly being that pulled by Cozy Dolan and Harry Gessler at Chicago several years ago.

On this occasion Dolan had reached second in the ninth, and one was down, the score at the time being in favor of the Cubs by a one run margin. The next batter hoisted a long fly over center field Gessler grappled the ball and, deciding that it was the third out, tucked the ball in his pocket and flew for the clubhouse.

Dolan, instead of taking advantage of the break to score the tying run, also figured that it was the third out and followed Gessler across the field, while a raving mob of players from both teams, surrounding them, tried to impress the horror of the situation upon them.

Artie Hoffman finally took the ball away from Gessler, chased Dolan to the clubhouse and made the putout at the edge of the bathtub. That was the richest double break on record, but there have been a few others almost as funny.—Hamilton Evening Journal.

quires 125 hours for graduation from the college of liberal arts and science.

11. The U. I. is very strong in every one of its departments. It spends money like water and yet the university is always poor. They think nothing of erecting buildings that cost \$600,000 each. I think the president thinks in units of \$100,000. It is a well managed university and is growing rapidly, and yet keeps up its work in every department. Sometimes I think the president has a liking for big things, as, for example, they are building the biggest armory for university uses in the United States. They can drill and maneuver 2000 men on the floor.

A "Lesson" in Clothes

A great clothing maker has taught the world a new lesson.

He has proved that there is wisdom and economy in establishing one suit of clothes of one guaranteed quality as a master product of his organization.

Don't ignore the lesson behind

STYLEPLUS CLOTHES \$17

"The same price the world over."

The lesson is founded on this simple truth. A big organization taught to work together toward one known goal can do bigger things at less expense than if the members work single-handed at cross purposes.

The STYLEPLUS lesson has the power to draw to this store a constantly increasing number of customers who say, "I never believed these values possible for the money."

Are you going to be one this Spring? You will have to be hard to please if you cannot find "your style of suit" in our big selection.

Nevada Singers Return Monday

(Continued from Page One.)

the bright and shining light of the chorus that evening.

The crowd at Elko was not as large as was expected, but what they lacked in quantity they made up in "pep." The U. of N. alumnae banqueted the Glee club immediately following the concert. (It was noticed that not one of the members refused the invitation.) It was some banquet, to say the least. It surely was mighty fine to see some forty people, all alumni or students of the old U. of N. sitting around the tables, talking over the old and new times. The banquet adjourned at a late hour and the fellows were indeed glad to immediately hit the hay.

Friday morning the gang entertained the Elko high school, where Rivett stepped into the limelight by absolutely refusing to get on the pitch of "Uncle Si's clock," the job finally being turned over to Glass, who handled it beautifully. The remainder of the morning was used by everyone to write letters home and to sundry other places. It was at Elko also that Frazee became famous by enlightening the crowd as to the behavior of a 200 cylinder, 14-horsepower, two and a half cycle gas producer which he at one time managed

to crank. Frazee now carries the appropriate nick-name of "Gas Engine."

The town of Wells did not look at all promising from the train as it pulled into the station. Ole Johnson received quite a ride from the bunch because he wanted to show there. Later, however, when it was found that every seat in the theater was sold much rejoicing filled the company. Mr. Johnson and "Ole" secured three autos and in the afternoon rode the fellows through the beautiful Clover valley. Ross decided to move to the valley as soon as school is out, because he saw many of his long-eared, musically inclined friends in the neighborhood.

The house was full to the eves, even standing room being in demand at the evening's performance. Johnson proved to be the favorite of the evening, the audience calling repeatedly for a solo, which Ole blushing refused to give. He was, nevertheless, crowned Duke of Wells by the bunch and is to be respected and obeyed accordingly. A dance followed the show, but most of the fellows were glad to go to bed, Ross and Johnson being the only ones who stuck for the last hesita-er-waitz.

The next day was spent almost entirely on the train. As the buffet car on the Nevada Northern was not stocked up to feed a tribe of fifteen young cannibals, the provisions were rapidly depleted until pork and beans were the only eatables obtainable.

The two concerts at Ely were to full houses, the second evening showing

a particularly well packed establishment. They were certainly enthusiastic, too, calling for three and four encores on every number. Before the show was half over it was feared that the encores would not last, but by doubling up on some choruses the end was safely reached.

Sunday was spent in sightseeing, taking in the mines and smelter of the Nevada Consolidated Copper company. Ole was pretty "foxy" at Ely, although Tubby seemed to have "Moore" fun. The university club extended a cordial invitation to the Glee to use their club room, and the Glee members certainly did. While at the club house Sunday evening a badger fight was staged, McCreery being the victor of the bets in the gory fray, Rose barely managing to escape serious injury. Clark managed to climb a tree to get out of harm's way.

Ely was left Monday morning at 6:40 and by traveling all day, the bunch returned to little old Reno and the U. of N. to spend the coming week in sleep and in catching up in school work.

Of course Prof. Haseman and Corris behaved beautifully during the entire trip and kept the fellows on their good behavior.

LECTURE ON SOCIALISM

On last Wednesday morning at the 9 o'clock hour at the request of Prof. Romanzo Adams, head of the department of economics, Bishop F. S. Spaulding gave a lecture on socialism. Prof. Adams' class in the principles of economics were just at that part of the subject where socialism is discussed, but in view of the fact of a lecture other classes were invited to attend and larger quarters were found in the department of history on the lower floor of Stewart hall. The address made a strong case for socialism as a remedy for the wrongs of the present industrial system. Bishop Spaulding was at that time in attendance upon the convocation of the Episcopal ministers in Reno and he is bishop of the diocese of Utah.

DR. ORDAHL RETURNS

Dr. George Ordahl of the department of psychology returned from an extended trip through the central portion of the state in the annual inspection of the high schools in the interest of the university last Friday.

GLEE CLUBS ENTERTAINED

The Century club ladies have again been hostesses to the university—and at the same time shown their gratitude for the services of the university glee clubs. Last Monday night they entertained the students at a dancing party in Century club hall where music and punch and sandwiches were liberally dispensed to all. The Glee club boys were all there and sang for the enjoyment of all. It was a dandy party and the Glee clubs certainly appreciate the kindness of the ladies.

SNOW SAMPLER

One of the Mount Rose snow samplers and weighers devised and used by Dr. J. E. Church and Prof. S. P. Ferguson in their snow investigations in the Sierras is being manufactured in the physics building and will be shipped in the near future to the

weather investigators of the Swiss government. It is the idea of the meteorological officials to distribute these instruments as broadly as possible so as to promote snow investigations by other institutions. By getting the data regarding snow melting, etc., under different climatic conditions a more thorough knowledge of the subject may be obtained.

RAY ROBB

Ray Robb, a graduate of the mechanical department of the University of Nevada, arrived from Tonopah Sunday and spent Monday on the campus. Ray is on his way to Rye Patch where he will have charge of the installation of a gas engine.

CAPS AND GOWNS

Prof. J. D. Layman is receiving orders for caps and gowns for commencement at the library.

Special Announcement
