## BLEACHER RALLY FRIDAY AT 4:30

University Of Nevada vs. Olympic Club October The Second

### Varsity Book Store Discussed

COMMITTEE APPOINTED TO INVESTIGATE FEASIBILITY OF PLAN GIVES REPORT

The project of forming a university book store at the University of Nevada was brought up in the assembled student body near the close of last semester, and a committee of three was appointed to look into the matter.

The following things have been found to be true:

The students and faculty of the university purchased during the year 1913-14 some \$2000 worth of books. This figure is based on the accounts of Mr. Layman, librarian, who purchased approximately 85 per cent of the books. The amount paid out for instruments, paper, pencils, etc., has been estimated at from \$500 to \$1000, with the latter figure rather high.

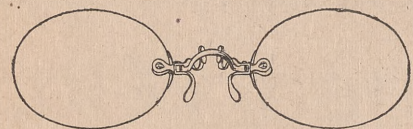

Mr. Layman sold the books at list price. He took the orders from the professors, who stated the number and kind of books wanted. The orders were forwarded in most cases after the classes had formed. His profits were approximately 10 per cent. But of the \$170 profit, \$150 was in "hold-overs" and \$20 only in cash. Some books which were ordered were not taken.

The committee considered that if the problem of the "hold-overs" could be solved, if the 10 per cent profit of \$200 on \$2000 could be realized in cash, it would pay an able student appointed by students and faculty to care for the ordering and selling. The profit on the remaining sum spent for instruments, paper, etc., would be a somewhat higher per cent and could in theory be turned into some student activity. But the chances are that it would be needed in addition to the \$200 to meet the bills of the book store, at least for the first few years. Business propositions can not be carried out with the same certainty as they are planned.

The present mode of ordering books is not entirely satisfactory. Many classes have to wait from three to ten days before securing text books.

The following plan was submitted for approval to the publishing companies with whom Mr. Layman does most of the business in books. The manager appointed by the students and faculty would visit the teachers

### Nevada Wins First Game

NEW MEN AND OLD WORK WELL AMASSING 26 POINTS TO SACRAMENTO'S 0.

The football season began in an emphatic manner when the rugger of blue and white overcame the Sacramento Athletic club Saturday afternoon. As the first exhibition of rugby this year, the outlook is very encouraging, though ragged shots were prominent at times, the long reason and the vim of the candidates insure a well-drilled working unit. Among the backs there was a tendency to hold the ball too long, while in the forward pack the scrum was often slow in forming. Sacramento kicked off and within a very few minutes Nevada had the pigskin at her goal. Martin received a good pass and dashed over the line. McCubbin converted. In a penalty kick against Sacramento soon after play was resumed, McCubbin scored on a beautiful place kick. At this point Sacramento showed considerable spirit and for a while Nevada's line was in danger. A black and white player did get across and the try would have been recorded had not one of his teammates been offside. Nevada varsity began working her back field, passing rushes were frequent within the Sacramento 25-yard line. McPhail received the ball on wing and registered. McCubbin failed to convert.

A common penalty was for picking the ball out of the scrum. A free kick was given Nevada at this time. The ball went into touch. A scrum after the line out brought the ball clear of the pack and Nevada instituted a passing rush including the entire back field. The ball was stopped on the Sacramento five yard line. Considerable friction between the two front ranks developed but no delay to the game was occasioned.

#### Second Half

The second half found many new faces in the lineup, and before the half was completed practically a new team was playing. From the kickoff by Sacramento Hill secured the ball in the loose, passed to McPhail, to Martin who went over for a try. McPhail failed to convert. From the drop a scrum was taken on the 50 yard line. Abbott at this point played too close to the scrum and Sacramento kicked over his head, but the ball bounded onto the track into dead territory and a 25 yard drop out by Nevada was the result. From this on Sacramento played their forwards exclusively and a succession of scrums and line out in the center of the field ensued. From a line out the ball was centered by Sacramento, with high kick. Abbott secured the ball and made a neat kick to touch, gaining much ground and placing the ball on the Sacramento 25 yard line, where it was secured by the Nevada back from the line out and a perfect passing rush placed the ball between the goal posts with Trabert on it. The try was converted by McPhail. At this point Coach Glasscock sent in Gates to replace Healy, Walker for Duddelson and Hancock went in as wing, replacing Captain McPhail. From a dribbling rush by the Nevada forwards started in the center of the field, Deszar scored between the posts. From then on the game was played in Sacramento territory and the ball on their goal line at many times, but eagerness to score by the Nevada men caused many penalties for picking from the scrum and no more scores were registered.

Cedric Beebe left Monday evening for Harvard university, where he will continue his study of chemistry.

### Senior Bench Tested in C. E.

PROFESSOR BOARDMAN AND MR. COUGILL MAKE A STRENGTH OF MATERIAL TEST.

Tuesday morning the class in strength of material witnessed a very instructive and interesting exhibition staged for their benefit by Professor Boardman and Mr. Cougill. The machinery, a Rieble testing machine, was exhibited and its workings explained. To further impress the students, a practical test was made. An octagonal prism made from the same material as the senior bench, which graces the front of the library, was tried out. The result showed the bench was capable of withstanding a pressure of 91,000 pounds, or 3030 pounds to the square inch. On Saturday morning the department made a test on the material the Reno Power, Light & Water company are using in the installation of their disinfectant plant at the reservoir. The first cement block was 30 square inches, and it required 37,000 pounds pressure to crush it. The cement was mixed at the ratio of one part cement to six parts gravel. The second test of a block six square inches in cross sections showed it capable of resisting almost 6100 pounds.

#### GOES TO INDIANA

Bob Ostroff, '15, left last week for Indiana university to take a course in medicine. By finishing at Indiana he will be able to secure his A. B. degree from Nevada which he would have received had he stayed here another year.

### Oxford Man Talks to Faculty

NEVADA FACULTY CLUB LISTEN TO REMARKS OF CEDRIC BEEBE

Last Friday the Faculty Science Club held its first meeting of the present semester in the Mackay Mines building. This club is composed of the faculty of the university, as its name would indicate, and is devoted to the interests of science. Research work is carried on by the different members and the interesting results are first related to this club. Professor Frandsen, as president of the club, may be relied on to furnish many interesting and instructive meetings, as was evidenced last Friday.

Cedric Beebe, one of Nevada's Rhodes scholarshipmen, recently graduated from Oxford and returned to Reno only by a short time before the war broke out, was invited to talk on "Science at Oxford," which he did very entertainingly. Chemistry is Beebe's major study, and next year he intends to enter Harvard to finish his chosen studies.

In his talk Beebe diverged slightly from his subject and explained the system of heating at Oxford. The school term lasts only eight weeks, during which time the professors and heads of the different departments deliver lectures daily. During this term there is no time to study because of the lectures and the social demands. During the vacations almost all the work is done; a tutor is put in charge of each twenty-five students, who acts in a wholly advisory capacity, suggesting references for the students to look up and directing their work. No check is kept on the students and they are perfectly free during the whole school term.

At the end of the school term examinations are given by the heads of each department. Then again, at the end of the three years' course, a general examination is given, covering all the work done during the entire course. In this examination only general questions are asked and the grades received are not for the number of questions answered but for the general excellence and knowledge displayed in the one of two subjects in which the student is specializing.

In the engineering and scientific schools pure science is taught, with no regard for the practical. The laboratories for research and experiment work are well equipped with efficient instructors. Every summer eminent scientists gather at Oxford, both for their brother scientists' benefit and the students. After ending his talk, Mr. Beebe was thanked by Professor Frandsen for what was really a most instructive talk.

### U. of N. Exhibit At Fallon Fair

AGRICULTURAL DEPARTMENT HAS AN INTERESTING DISPLAY

Dean Knight of the Agricultural college returned Sunday night from Fallon, where he had charge of the university exhibit at the seventh annual Truckee-Carson fair. He was very much pleased with the fair in general and with the exhibit made by the university in particular. The university was well represented and took an active part in all exhibits. Professor V. E. Scott acted as judge of the poultry exhibit; W. W. Wilson judged the livestock, and Dean Knight and J. B. Frisbee judged the large exhibits of farm crops. Miss Davis, who recently took charge of the extension work in home economics, and Miss Bardenwerper passed judgment upon the numerous household exhibits of cooking, sewing and needlework presented by the women of the valley.

President Hendrick was an interested visitor on Reno day at the fair and reports a pleasant and valuable time.

During the week Dean Knight received word from the Nevada fair commission of the Panama-Pacific exposition to continue his preparation of an exhibit for the San Francisco and San Diego fairs. In order to keep his exhibit of farm crops, shown at Fallon, in first-class condition for the 1915 fair, he has decided not to have an exhibit this week at the Reno fair. However, the department of food and drugs has taken a booth at Belle Isle and will represent the university. At the fair grounds the university livestock will be exhibited.

The following from the Churchill County Eagle covers the university exhibit at Fallon:

The University of Nevada showed a wonderful display of agricultural products. In the field of agricultural extension the university is going out to the farmers of the state to help them solve the various problems which confront them.

The university exhibit displayed a very complete collection of cereals, forage crops and grasses, including glass jar samples of the different kinds of farm seeds. It is very important that a uniform variety of every kind of farm crop be grown in an agricultural district. By such practice it is possible for the farmers

## Block "N" Society Meets

### ATHLETIC ORGANIZATION HOLDS ITS FIRST MEETING

The first meeting of the Block "N" society took place Wednesday evening in the training quarters. The meeting was more in the nature of a reunion of the old warriors of the last few years than for business purposes. After the assembly was called to order roll was called and a discussion of business ensued.

The treasurer reported a slight deficit in his bank account, which was not surprising to those who attended the banquet last semester.

Amendments to the A. S. U. N. constitution, which were passed by the Block "N" society last year, were again taken up and a committee was appointed to post and introduce the amendments to the student body. Under the head of new business the question of a dance to the Sacramento Athletic Club, after the game, was discussed and passed unanimously. A permanent Block "N" dance committee was appointed to take charge of all dances this year. The chair appointed Messrs. Abbott and Fake. After some spirited enthusiasm exhibited in yells, the meeting adjourned.

## Executive Comm. Holds Meeting

### DIRECTORS OF STUDENT ACTIVITIES HOLD MEETING—IMPORTANT BUSINESS

The executive committee met last Friday, the 18th. Several important problems were discussed. It was decided that the question of charging things to the associated students should be brought up in the next student-body meeting. Some time, used in painting the N, was charged to the associated students last year when it was not decided by them that they should pay for such material. The student body will also decide next time who shall pay for painting the N.

The next discussion was that concerning the appointment of an assistant editor of the Sagebrush and an assistant manager. Ralph Drown and Irving Rewett were elected last semester, but did not return. Article XII, section 2 of the constitution reads as follows: "In case of vacancies in any office provided for in the foregoing articles, the executive committee shall call a special meeting, not later than one week after the vacancy occurs, for the purpose of nominating candidates, and they shall be voted on between five and ten days after their nomination; provided, that

## Cupid Scores Two Victories

### MEMBER OF JUNIOR CLASS ENROLLS IN MATRIMONIAL DIVISION

A very pretty wedding was solemnized Monday evening, September 14, at the home of Mr. and Mrs. C. F. Loring, when Miss Janet Parsons, niece of Senator Thomas Hunter of Elko, became the bride of Johnstone Price, the bridegroom's father, Rev. Dr. R. A. Price, of Cedaryville, Cal., officiating. Dr. G. M. Gardner of Fallon gave the bride in marriage. Miss Carrie Gardner attending the bride and William Price, brother of the groom, as groomsmen. Little Catherine Marie Loring was ring bearer. The bride was charming in the wedding gown and carried valley lilies. After felicitation, an elaborate supper was served, the tables radiant with Bride's roses. Covers were laid for the bride and groom, Mr. and Mrs. C. F. Loring, Rev. Dr. and Mrs. Ira A. Price, Dr. and Mrs. G. M. Gardner, Miss Carrie Gardner, William Price, Miss Catherine Loring. They are cozily domiciled at the Stewart apartment.

eligible candidates in such cases, with the exception of graduate manager, shall be members of the college classes next above those hereinbefore provided. Officers voted for and elected under the above conditions shall take office immediately after their election and hold office for the remainder of the collegiate year in which they are elected."

There seemed to be some question concerning the clearness of this section. Some thought that it is not made clear when this vacancy begins. They thought there should be no vacancy until the duly elected assistant editor and assistant manager resigned, so the following motion was made:

"That relative to the matter of appointing an assistant editor and an assistant manager of the Sagebrush, that the executive committee make a thorough investigation as to the intentions of duly elected assistant editor and assistant manager before making the appointment, as Article XII, section 2, states; and that the editor and manager be authorized to appoint their assistants to act until such time as the executive committee can authoritatively make said appointment."

It was also moved that a committee of two be appointed to investigate these persons, Drown and Rivett, to see if they are going to return.

The executive committee agreed to ask the frat men to house the visiting athletics here on various teams.

Dr. John B. Koch, the student optometrist and optician, at R. Herz & Bro., the jewelers. Lenses ground

## Live Student Discusses Plans

### STUDENTS ACCEPT OFFER OF SAGEBRUSH AND GIVE VIEWS ON A. S. U. N. QUESTION.

Each year the freshmen contract a bill for lime to paint the N, and each year there is the discussion, who shall pay the bill? Last year the freshmen ordered the necessary stuff and had it charged to the A. S. U. N. The executive committee has no authority to pay such a bill, and as yet the bill is unpaid. The responsibility must be fixed immediately.

Shall the sophomore class be requested to see that the N, is painted, and shall the sophs or the freshies pay the bill? Or shall the Block N society be the custodian of its symbol and be authorized to collect the money for its painting? The upper class committee, too, might be held responsible for the freshmen's observing the custom and they might look to the A. S. U. N. for the necessary. There's a chance for an argument here.

### TICKETS FOR GAMES

Nevada's geographical position demands a great deal of expense to compete in athletics. The athletic fee is insufficient to meet these demands. The season's success requires a crowd there is a game. Get behind this on the Mackay bleachers every day

### LITERAL.

During a concert tour of the late Theodore Thomas and his celebrated orchestra, one of the musicians died, and the following telegram was immediately dispatched to the parents of the deceased:

"John Black died suddenly today. Advise by wire as to disposition."

In a few hours the answer was received, reading as follows:

"We are broken-hearted; his disposition was a roving one."—Tit-Bits.

### COULD STAND IT LONGER.

A lecturer one torrential night addressed an audience which might have been much larger without taxing the seating capacity of the hall. Naturally he was willing to curtail his address, and, having reached what he considered the psychological moment, said: "I'm afraid I've kept you too long." Whereupon a voice replied: "Go on, it's still raining."

proposition—your athletes work hard for the team's success. Can \$4 a semester pay for your shares of the glory they win? Think this over, and when you are asked to sell tickets get a few and sell them. There is a prize offer, too. Get in line.

## SAGEBRUSH REPORTER GATHERS NEWS OF ALUMNAE AND STUDENTS

George Curnow, graduate of M. E. and E. and E. '11, was a visitor on the campus Saturday.

Andrew Hardin was out of the football squad from injuries received to his shoulder during practice. Hardin gave promise of brilliant work and may still figure in the possibilities for a first-team berth before the season is over.

The Mackay School of Mines laboratory has received news of an antimony deposit near Millers, which may prove to be very important. Antimony is used in the manufacture of gunpowder, the supply of which is being shot away at a rapid rate these days. The only other deposit of antimony known within the state is near Mill City. This property was worked for some time, but closed down because of the opening of the Japanese fields, which could be worked much cheaper and the products marketed with greater facility. In view of the war and the scarcity of the metal, the Millers field is very interesting. Students are requested to inquire for lost articles at the registrar's office, where very frequently lost possessions are placed.

Miss Margaret Langwith, who visited the campus at registration time,

## Reno High School Notes

### RED AND BLUE ACTIVE WITH RUSHES AND FOOTBALL

The annual Freshman-Sophomore tieup contest was held Friday afternoon on the Mackay Field. After a spirited contest, which was witnessed by large crowds, the decision was given to the Sophomores. In the evening the initiation was held in the High School gym. It also was a success and improved the condition of the treasury to a considerable extent.

Football occupies the limelight of activities and a fine showing is being made. Harvey McPhail, varsity captain, has been scoured for coach and is confident of turning out a winning team. Games have been arranged between the High School and second varsity for every Monday. Preliminary arrangements for games with Alameda, Sacramento and Grass Valley are now being made.

E. S. L., 1915.

A pretty sure way to get "fired" is to get "loaded" on the job.

Folks that make a picnic out of life musn't growl if they find ants in the sugar.

## Figures Show Varsity Growth

### ALL DEPARTMENTS OF THE UNIVERSITY HAVE INCREASED

Rumors have been afloat from the time the first freshman put in an appearance and asked for a "card" that nineteen fourteen-fifteen would see the largest enrollment at Nevada U. For the first time the rumor is correct; at this time Nevada has more students than at this time any other year not only that, but the enrollment is the largest in the history of the institution. To date there are 319 students registered, of which 219 are men and 100 are women. The enrollment is represented in the different colleges as follows: Arts and Science, 142; Mines, 28; Mechanical and Electrical Engineering, 70; Civil Engineering, 12; Agriculture, 41; Education, 26.

The total enrollment shows an increase of 23 per cent in the number of students this year. That the growth of the university is mainly within the state is borne out by the fact that in 1913 24 per cent of the enrollment consisted of nonresident students, while this year 24 3/4 per cent are residents of Nevada, showing that the increase is from within the state.

## Yell Practice At Lincoln Hall

### DORMITORY IS A HOT BED OF SPIRIT FOR BENEFIT OF TEAM

Each Wednesday and Friday night the men who live in the dining hall will spend from fifteen minutes to half an hour practicing Nevada songs and yells. The bleacher rally the first week of college disclosed the fact that new men were as a whole not familiar with songs of Nevada. At the suggestion of Yell Leader Borchet the Sagebrush printed every yell and song of Nevada last week. Going further along the same line the energetic yell leader has promised that each man will know them. With this idea in mind he has inaugurated the song practice twice a week. A few hearty eaters have grumbled at the fact that they can't dine and sing at the same time, but the suggestion that they not eat so much and sing a little more was well taken and "Borch" has the varsity behind him in his efforts to make the "pep" show this year.

### Bound to Be Seen.

Little Mr. Einstein, a traveling salesman, on Thanksgiving day found himself far away from home, and naturally very lonesome. He knew not a soul in the hotel at which he was staying, and he decided that he must attract some attention any cost.

Presently a bell-hop came through the lobby paging a Mr. Murphy. "Mr. Murphy! Mr. Murphy!" he shouted. At this point Mr. Einstein jumped up and hand hollered: "Say, boy, vat initials!"  
—Everybody's.

### A Bad Deal.

A hustling promoter named Coe was head of a big cocoa Co. A native named Koko Said, "Pay what you owe, Coe, Or give me the Coe Cocoa Co." He had other projects, had Coe—Coke ovens were one line, and so The two coalesced; The two coalesced; Imagine the rest: "Coe Koko Coke and Cocoa Co."

## EDITORIAL

Once again ye mighty scribe taketh his trusty pen and discovereth an spirit. Yes, ye crab argueth for support. There is no doubt to every spectator on the Mackay bleachers last Saturday afternoon that the rooters deserted the team. Yes, deserted is the word. The support was lacking. Why? Yes, why was it lacking? Was it because the fellows were too busy "doping" out the first team possibilities? It was not because the yells are unknown. Organized yelling takes exertion. It is work. It makes your voice husky, but it is small recognition of the activities of the fellows in the football suits. Why be backward in your appreciation of the football men. There is not a reason in the world why old Peavine should not have echoed and re-echoed to the cheers of the bleacherites on Saturday. Fellows, it's squarely up to you. Nevadas' yelling was poor last Saturday. You can show Nevada spirit by

contrast in the yelling at the Olympic game. Some one, in addressing a football meeting one time said: Pep stood for Pluck, Earnestness and Perseverance. It well may symbolize that. But that definition does not include loyalty. Nevada's sons are loyal. The yell leader is entitled to your loyal support. It is no easy matter to face an audience of hundreds of people and direct the cheering, and it is mighty discouraging to face a score of unenthusiastic students and ask the mto yell. A proper function of the cheer leader at a football game is to restrain the cheering and save the enthusiasm for concerted efforts. Now the bleacher rally Friday afternoon will afford a chance to make up to a certain extent the lapse of last Saturday. Show Borch and the team you are with them. Show the townspeople your opinion of Nevada and the team. Get behind and push.

## Girls Receive Warm Praise

THE DEPARTMENT OF HOME ECONOMICS AT TRUCKEE-CARSON FAIR

The young women students in the department of home economics are justly proud of the compliments they are hearing daily on all sides in regard to the delicious Parker house rolls that they made in their laboratory last week under the direction of

Associate Professor Kate Bardenwerper. About two hundred and fifty of the rolls, baked on Thursday, were taken over to the Truckee-Carson fair at Fallon, and then—after being heated over—were served on Friday and Saturday to the visitors at the fair, thus making many new friends, not only for the department of home economics, but also for the University of Nevada.

Dr. John B. Koch, the student optometrist and optician, at R. Herz & Bro., the jewelers. Lenses ground while you wait.—Advt.

## Mine Rescue Car To Cal.

### MEN WHO TRAINED NEVADA CREWS CONTINUE WORK IN CALIFORNIA

It is expected that the United States bureau of mines car No. 5 will visit California mining districts from September 19 to October 31, the attendants continuing the training of

mine rescue and first aid work as they did in Nevada. The itinerary will probably be closely adhered to and is arranged as follows: September 20-22, Jackson; September 29-October 5, Angels Camp; October 6-13, Melrose; October 13-20, Jamestown; October 22-31, Kennett.

Store Discussed**

Continued from Page One

some time before school opened and secure from them an estimate of the number of books needed. He would then order their estimated number, with the understanding that he would sell those needed and return within 20 to 25 days the remaining.

By this ordering some time before school started the books could, in many cases, come by freight and a saving in transportation charges be effected.

The answers were not encouraging. Two companies, Ginn & Co. and MacMillan & Co., replied that they would enter into such a plan, although Ginn & Co. placed a limit of a year on such an agreement, neither company would permit a return of more than 20 per cent of the amount ordered, McGraw-Hill & Co., who handle most of the scientific books, would give 15 per cent discount and a return privilege of anything less than 25 per cent.

These three companies handle in the neighborhood of 50 per cent of the books which the university uses. A book store could thus be fairly certain of a profit of \$100, but no more. To this figure could be added whatever profits would accrue from the sale of instruments and paper and from an exchange of second-hand books.

The committee has not yet exhausted all sources of information regarding this subject. If it seems advisable it will find out more concerning the amount of material other than books used and it will learn the attitude of the board of regents and the possible support which the A. S. U. N. would give to such a proposition.

The purpose of this article has not been to advocate, but to explain and give facts. Whether or not the establishment of a book store at this time is a safe proposition has not been decided. Further investigations will be made.

## The Results On California Fields Show Strength Of Nevada's Rivals

### CALIFORNIA VARSITY TEAMS ARE EACH VICTORS IN SATURDAY GAMES

On California Field at Berkeley Saturday afternoon, the University of California varsity Rugby team defeated the Stanford-California Alumni team by the score of 17 to 5, and the California freshmen took the measure of the Berkeley High School fifteen at 18 to 14.

Captain McKim of the California was absent from the lineup and the power of the California attack weakened in consequence. The scrum play was less aggressive than usual and the backs seemed also to be less effective in their ground gaining ability. The defensive of the alumni was powerful and few passing rushes were successfully executed by the Blue and Gold backfield.

Montgomery opened the scoring for the winners with a penalty place kick from the thirty-yard line, which went through the posts by a narrow margin. A dribbling rush allowed Lockhart to fall over the line for the next score, and the half ended with the tally at California 8, Alumni 0.

The only score of the Alumni came in the second half, when Mosen took the ball over after a long passing rush. Stroud converted. The varsity broke into the score column again when Hayes went over and Montgomery converted. The final gun sounded with the ball near the Alumni goal line and Sharp took the ball over in the corner of the field, making the final tally 17 to 5.

The freshmen secured revenge for a defeat at the hands of Berkeley High School earlier in the season and downed the prep team, 18 to 14. The contest was closely fought and represented one of the best games of the freshman season.

Liversedge of the first-year team starred in a sensational play when he blocked a kickoff in the early part of the second half and, unaided, dribbled the ball the length of the field and through the Berkeley High goal posts.

Bender, Brown, Tilden and Liversedge were responsible for the scores of the freshmen, while Saunders, Muldoon and Johnson chalked up the points for the High School team.

"Dat tango, boss, am sort of a easy motion. Ye jes go a-stealin' along easy like ye didn't have any knee joints and wuz walkin' on eggs that cost fo'ty cents a dozen."—Atlanta Constitution.

## Oakland College New Activity

### ST. MARY'S BOYS GOING AFTER AQUATIC HONORS

St. Mary's university is going right after the swimming honors hereabouts. They have a squadron of aquatic stars arrayed who will receive the advice and coaching of Otto Ritter, graduate of the department of calisthenics at the University of California. Walter Grace of Honolulu, who defeated "The Duke"; Robertson, a crack junior swimmer, and Bill Howell, who attracted so much attention at the recent big meet at Ocean Park, are among the men that will be taking the water and prizes in St. Mary's uniforms. It is a big jump from aquatics to basket ball, but the St. Mary's men are contemplating the situation in the latter pastime with satisfaction. The whole of their inter-state championship team will be available. St. Mary's men did well in the modified Marathon round Lake Merritt. Graduate Manager Nevis, as usual, was very much on the job.—S. F. Bulletin.

### ANDERSON-HAUS

A surprise to the campus came in the form of the wedding announcement of Morris Anderson and Miss Lena Haus, both graduates of the university in 1913. Both young people have a host of friends, who wish them a happy future. Mr. Anderson was a graduate of the college of civil engineering and a member of the T. H. P. O. fraternity. Miss Haus was a graduate of the college of arts and sciences and was a member of Delta Delta Delta. After their honeymoon the young couple will reside in Phoenix, Arizona.

If you don't want to be with the largest crowds, don't go to D. C. & W. Co.'s.—Advt.

### ST. MARY'S WINS OVER COLLEGE OF THE PACIFIC

St. Mary's College Rugby team opened its season Saturday, defeating the College of the Pacific fifteen on the Oakland campus by a score of 22 to 5.

The first half was a forward struggle, with the advantage slightly in favor of the losers. Ham scored for College of the Pacific team early in the game and the goal was converted by Smith. Moy scored for St. Mary's, but Robertson failed to convert.

Guisto, Moy and Robertson scored tries in rapid succession for St. Mary's at the outset of the second half. The backfielders did some splendid work in passing the ball. Robertson converted two of these tries. Later in the session Moy scored his third try.

The winning team lined up as follows: Moore, Quin, H. Brandon, Perovich, A. Brandon, Fallon, Cummings, Guisto, forwards; Magee, half back; Moy and Robertson, five-eights; Cooney, Fleming and aMroni, three-quarters, and Randall, fullback.

### IN MEMORIAM.

"My word, Jacob," said Steinberg, "that is a beautiful diamond you have in your pin. How much did it cost?" "I paid one thousand dollars," replied Jacob.

"One thousand dollars! Good gracious!" exclaimed Steinberg. "Vy, I did not know you ver vorth so much money."

"Vell, you see," exclaimed Jacob, "ven der old man died he left one thousand dollars for a stone to be erected to his memory, and dis is der stone."—Kansas City Star.

## MILITARY

The following schedule of instruction for the week commencing Monday, September 21, is hereby announced:

Monday, September 21—Both companies; instruction of new cadets in the school of the squad and company; manual of arms and marching; all non-commissioned officers and an officer to be present with each company. Particular attention will be paid to the proper execution of "right shoulder arms" in moving forward from the halt and in coming to order arms upon halting. Band practice Tuesday, Wednesday, Thursday, same as Monday. Details for firing on range will be announced later. By order of the Commandant of Cadets.

We figure that you deserve the best—and you get it at D. C. & W. Co.'s

Artie Bodie, who's allus playin' pranks on folks, yestidday told Willie Oates, whos' bin odd in his 'head ever since he fell off his pa's barn roof, that if he'd eat a spoonful of red pepper it would make him smart. Willie tried it. It did.

The reason lots of towns aint s'ea-ports of success is because they ain't never had a tide of public sentiment to boost them.

## Federated Women Work For Nev.

PROGRAM AT MAJESTIC TOWN  
CLUDE TOWN AND UNIVER-  
SITY ORGANIZATIONS

The seventh annual convention of the Nevada Federation of Women's Clubs will begin Wednesday afternoon and conclude Saturday evening, with a special program at the Majestic theatre. This program is for the benefit of the student loan fund of the University of Nevada, which will be a fitting climax to the week's work. The program will include the University Glee Club in specialties, some motion pictures and a thrilling one-act play entitled "The Half Century of Progress." Some rare talent has been unearthed in the rehearsals for the skit and a good evening of entertainment is guaranteed.

President A. W. Hendrick has leased the home of the late Senator Massey and will domicile his family there after his return from Washington.

## Pres. Hendrick Visits Fallon

PRESIDENT OF UNIVERSITY IS  
DEEPLY IMPRESSED BY IRRIGATED REGION

On Saturday morning President Hendrick was a visitor to the Truckee-Carson fair at Fallon. During the day he was an interested spectator at the races and met many of the citizens of that section of the state. The possibilities of the arid land of the state when water is brought upon it made a deep impression on him. Speaking of the university exhibit, President Hendrick said he was pleased with the displays made up by the different university departments and the work of the faculty in contributing to the success of the fair.

## Fallon Women Are Fine Cooks

HEAD OF EXTENSION WORK  
PRAISES EXHIBIT BY FARMERS' HOUSEWIVES

Miss Norma Davis, who judged the home economic exhibit for the Fallon fair, complimented the women of that section on the quality of the display made last week. Speaking to a Sagebrush reporter, Miss Davis said: "You may quote me as saying that the bread, jellies, jams and canned goods offered for display by the women of Fallon and vicinity were the best I have ever seen. I have attended and judged many contests in the east and middle west, but a better quality of cooking than the women at Fallon showed has never come under my observation." While at Fallon Miss Davis demonstrated the cooking of baking powder biscuits, besides advising and solving problems for the women of the district.

## New Song Is Very Popular

U. OF N. GLEE CLUB SINGS NEW  
PIECE TO THE DELIGHT  
OF HUNDREDS.

At the installation ceremonies incident to the taking of the oath of office by Dr. Hendrick, the Glee club surprised the assemblage with a song they have been holding for several months. The song was to be sung at the graduation exercises, but the sudden demise of President Stubbs made a change in their program. The song is to the tune of "Heidelberg," but the words are the work of Earl T. Ross, who received his master's degree last year. The song is especially fitted for glee club work, the tenors bearing a great part of the melody. The words are:

Better than schools of formal halls  
Is the college that's always jolly,  
Teeming with free-hearted fellowship  
And warmed by a love that's true;  
And better than marble and old brick  
walls,  
Where we banish all melancholy,  
So come let us sing,  
Boys, let the song ring,  
Our toast for Nevada U.

## These Stories Never Die

OLD SPORT YARNS, LIKE  
TIDE, ROLL ON FOREVER

Sport stories die hard. In fact they never die. Years ago someone told the yarn about Joe Cantillon asking Comiskey for two passes to the ball game. Joe was then umpire and Comiskey is reputed to have waved his arm at the gatekeeper with the injunction that if Cantillon "really had any friends" to let them in.

That was years ago. The other day a Chicago writer pulled this fresh change:

"A fan called at the gate at Washington yesterday and said he was a friend of Umpire Connolly. 'If an umpire really has a friend let him in,' said Secretary Fowler."

It is also about time for the other one to show up again—the yarn about the prominent actor—anyone since the vintage of '63 will do—who asked the waiter why one of the lobster's claws were missing, and the waiter explained that it had been fighting; whereupon the gay dog of a Thespian refused to eat the one and ordered that the winner of the fight be cooked for him. Yes, Tilly, it is about time for that one to make its annual bow in the press agent dope sheet—Minneapolis Journal.

## U. of N. Exhibit At Fallon Fair

Continued from Page One

to supply large quantities of uniform products for market and thus receive the benefit to be derived from large shipments.

The dairy department carried on a competitive cow test in connection with the university exhibit. This work was in charge of Professor V. E. Scott, at the head of the dairy department. He gave daily demonstrations to the farmers on testing of milk besides taking up such factors as the feeding, breeding of dairy cattle, care of milk, developing the herd, testing of cows and the establishing of a cow testing association.

Much attention was given to the dairy-cow competition. Eleven cows entered; each morning and evening the milk was weighed and samples taken, which on the following day were tested for butter fat. A bulletin was posted each day on the weighing cabinet near the dairy cows, showing the amount of butter fat given to date. Besides this, competitive test other farmers brought in milk to be tested for butter fat, and showed a wonderful interest in the building up of dairying in the community.

### Pure Food Supply

The display by the Pure Food and Drug department, in charge of S. C. Dinsmore, presented a very classy display, including the following: Cereal breakfast foods showing comparative food values including ninety brands found on the Nevada market; products made from corn, stock foods, oils, starches, dextrine, rubber substitute and corn syrup of different grades; process of milling flour from wheat, showing various stages in the milling of by-products and finished products ready for consumption; test for bleached flour; artificial products, jams, jellies, preserves; material showing advancement made in canning industry; crude drugs about 400 in number, accompanied by a map showing their distribution over the world; poisonous plants; coffee and tea from coffee and tea-producing districts; potash salts, crude and refined from the German potash mines, the present source of the world's supply; nitrate of soda from Chili; products from skim milk; pure and adulterated food products, candy, spices, vinegar, flavoring extracts, coffee, canned products, etc. A few simple household tests to detect adulteration of various food products; exhibit of certified artificial food colors. During the week inspection was made of scales and all weighing and measuring devices.

### Farm Engineering

The College of Engineering, of which Dean J. G. Scrugham is at the head, was represented with a small locomotive and two large cases of farm tools, all of which were made by the students in the shops. The work in farm engineering is a very important factor in increasing the efficiency of the farmers in their various farm practices. There are several ways of making and repairing farm tools, and by the training re-

ceived by the students in this engineering work they are well prepared their most hearty co-operation in the working out of the household and community problems. They understand that only a portion of her time can be spent in this project, but they felt that much can be accomplished in this section in the home economics' work, especially with the valuable assistance of Miss Davis.

### Home Economics

Miss Norma Davis, in charge of the extension work in home economics, has proved to be a very efficient demonstrator and interesting speaker on household economics.

In connection with the demonstration with the farm women, Miss Davis took up discussions on the following subjects:

Selection, preservation, preparation and serving of food; economic, hygienic and esthetic sides in the use of clothing; sanitation, construction and arrangements of home; preparation for motherhood and care of the infant.

In taking up this work, Miss Davis exchanged ideas with the farm women in the homes where small groups are collected to arouse community interest; with the rural schools to organize girls' clubs for social betterment; at public meetings under the auspices of the women's clubs, teacher-parent clubs, literary clubs and mothers' clubs, with follow-up work to secure continuous efforts and permanent results; and with bulletins, circulars, charts and other illustrative material on home economic subjects to be distributed throughout the state wherever there is a call.

In connection with the extension work in home economics, Miss Davis makes the following statement: "Generally speaking, I wish to become a rural problem solver for the women of Nevada, and I feel through their co-operation much can be accomplished in arousing a continued interest in home economics on a scientific basis, so that the women of the state who have found housework a drudgery will find it a pleasure and have the work so organized that they will have time for interests outside the four walls of their home, but interests which are vitally connected with the welfare of the members of their families."

Miss Davis has made a large acquaintance among the women of the project and all have shown a very intense desire to extend to Miss Davis

ceived by the students in this engineering work they are well prepared their most hearty co-operation in the working out of the household and community problems. They understand that only a portion of her time can be spent in this project, but they felt that much can be accomplished in this section in the home economics' work, especially with the valuable assistance of Miss Davis.

An interesting experiment for the embryoi chemists of the university may be performed with two chemicals rather easily obtained. Fill a test tube with a hot concentrated solution of barium nitrate and then drop in a crystal of potassium chromae. So called osmotic plants will grow with lightning rapidity. They are beautiful things and illustrate a rather interesting chemical phenomena.

### AN ASSOCIATION FAVORED

"Aren't you afraid politics will get into big business out your way?" "I'm hoping it will." replied the man who refuses to be scared; "maybe it will improve politics."
