

## MONROE DOCTRINE TO BE DEBATED BY B. Y. U. AND NEVADA FRIDAY EVE

MOMENTOUS NATIONAL QUESTION IS SUBJECT FOR DEBATE  
BETWEEN TEAMS FROM UTAH AGRICULTURAL COLLEGE  
AND NEVADA

### THIRD ANNUAL DEBATE

THE QUESTION HAS BEEN DEBATED FOR PAST SEASON BY  
UTAHNS, DECISION OF JUDGES IS EXPECTED TO FAVOR  
NEGATIVE OF NEVADA TEAM

The biggest debating event of the year will take place next Friday evening when the varsity debating team, consisting of Thomas, Edsall and John Heard, will meet the debating team from Brigham Young University in the annual clash between the two colleges. The question to be debated is: Resolved, That the United States should abandon the Monroe Doctrine. Nevada will defend the negative. Governor Boyle is to be the presiding officer of the evening and Justice P. A. McCarran, Judge R. C. Stoddard, and Judge John C. Orr will act as judges of the debate. The contest will begin at eight o'clock in the evening in the gymnasium. Each speaker will be allowed fifteen minutes for his main speech and five minutes for his rebuttal speech. An admission of twenty-five cents will be charged.

Debating teams from the University

of Nevada have contested with Brigham Young in two previous years. In the first contest Brigham Young won the votes of all three judges, in the second, which was staged last year at Provo, Nevada won the decision of one judge. It is hoped that this year will witness the victory towards which the debaters have been striving.

The question has been thoroughly discussed in the interclass debates, the final of which was held last Friday and the varsity team will enter the contest thoroughly prepared to meet their opponents on every argument which they may advance.

The debating teams from Brigham Young University have a high reputation for excellence and the contest will be well worth hearing. The support of the entire student body is desired and needed in order that the team may have the backing and help necessary to bring home a victory.

## SOPHOMORES WIN INTERCLASS DEBATE

CONTEST HELD IN GYM LAST  
FRIDAY RESULTS IN VICTORY  
FOR NEGATIVE

The final contest of the debating series between the four university classes was staged last Friday at ten thirty in the gymnasium with the result that Everett Layman and Lyle Kimmel, representing the sophomore class, won the decision from the senior class representatives who were Charles Riley and Miss Ethel Winger. The question was, Resolved, That the United States should abandon the Monroe Doctrine. The sophomores defended the negative and altho they possessed the advantage in opportunity for logical arrangement and appeal to popular sentiment the contest was not lacking in spirit and the affirmative offered some difficult arguments for the negative to meet. Miss Winger, in speaking for the affirmative, presented the argument that the Monroe Doctrine was ineffective, that it was not fulfilling its original purpose and that it was not prohibiting a commercial invasion of the South American countries by Euro-

pean peoples. Charles Riley of the affirmative was particularly effective in rebuttal and pointed out the gross misapplication to which the Monroe Doctrine has been subjected. The negative showed that the South American nations are still unable to protect themselves and that there is need for a foreign policy of the United States which will protect the rights of the southern republics. Both Kimmel and Layman made effective rebuttal speeches and showed that there will be plenty of material from which to pick a varsity team next year.

The contest attracted considerable attention and a good crowd was in attendance.

## MINING STUDENTS LEAVE FRIDAY EVE

TONOPAH AND GOLDFIELD TO BE  
VISITED BY MINING  
ENGINEERS

Next Friday evening a party of five mining students, accompanied by Profs. Lincoln and Palmer, will leave Reno for a week's stay in the vicinity of Tonopah and Goldfield. It is planned to return either Wednesday or Thursday, which will give the future M. E.'s about a week on this valuable inspection tour.

The first stop will be made at Tonopah, where arrangements have already been made to inspect all the important underground workings and milling plants. The Belmont mine and mill, the West End and probably other plants in the vicinity will be examined and detailed information concerning the mine and mill practice will be obtained. Morning, afternoon and evening classes will be held, in order that the information gained during the day may be noted down in accurate form.

Either Monday or Tuesday the party will leave for Goldfield where the mine workings of the Goldfield Consolidated, Jumbo Extension, and probably the Florence and Merger mines will be inspected. The recently installed flotation plants in both the Consolidated and Florence plants will also receive their share of attention. The 1,000-ton plant of the Consolidated will be gone over in detail, and much practical knowledge is expected to be derived.

Those signed up for the trip are John Quigley, Charles Masters, Nick Dondero, Hlebnikoff, Lloyd Root, and Bourke Healy.

(Continued on Page 2)

## HE-JINKS THURSDAY ENJOYABLE AFFAIR

ANNUAL STAG PARTY UNCOVERS  
MUCH UNSUSPECTED THEAT-  
RICAL TALENT

Thursday evening the gym was the "scene of the He-Jinks and it was a wild night on the bay." According to tradition neckties were not allowed and in some cases they had to be removed by the reception committee.

The feature of the evening was the burlesque on Alexander, the "Man Who Knows," by "Sharkey" Quigley. With a Turkish towel for a turban and a dressing gown for shroud, he did the Mystery Man to a finish. His crystal had once contained spirits but not of the brand used in this business but more to the "Hennessy Three Star." He answered all the questions asked him for the asking at this time at of and would have pulled the watch trick but watches are not to be had the month. He was to do the ring trick, too, but in spite of his disguise he was recognized and no one would contribute their jewelry to the cause.

One of the most laughable events was the Senior-faculty game. The Profs showed that they had been out of the harness too long but Prof Lincoln did some star basket-shooting. It was hard to convince them that the game was not football and such minor violations of the rules as running with the ball, tackling below the knees, and striking with the closed hand were overlooked by the referee.

Other features of the program was the Pavlova Interpretations by the Freshmen and the grace and rhythm with which Cotter handled his "Hair-pin-like" figure would suggest him as a possibility for the Russian Imperial Ballet. "Monk" Ferris sang "My Wild Irish Rose" in his old-time form, much to the pleasure of his listeners.

The Freshman quartet, as a rooting section were good, and the only objection to their songs was that the authors must have forgotten to put tunes with the words. The Count sang "A Wash Out on the Line" in his native tongue, which was understood by few and appreciated by fewer. Oscar Hammerstein is overlooking a bet in the Count because Scotti can't sing forever and opera must live.

Howard Brown threw Percy Mills in three straight falls and gave the audience a good demonstration of the new "holds" used in wrestling. The preliminary of the big event followed and "Spike" Schindler and Kid Henry, both of the Engineers' Club, fought three fast rounds to a draw.

Bas Crowley and "Wil" Malone also drew equal honors in their six-round go which was faster and much better than is generally seen in amateur exhibitions.

The crowd was large and well pleased and were fed "hot dogs" and coffee.

## SENIORS DEDICATE TREE ON CAMPUS

CYPRESS PLANTED IN FRONT OF  
STEWART HALL BY THE  
1916 CLASS

Tuesday afternoon a custom was inaugurated by the senior class which bids fair to become a yearly ceremony. As a memorial gift to the university, the class of '16 planted a Lawson cypress, one of the hardiest and most beautiful trees to be obtained, in the patch of turf to the southwest of Stewart Hall.

With fitting ceremonies the pit was dug and the tree imbedded in Nevada soil. Speeches by President Abel, members of the class, and by Mr. Hutchinson, donor of the class tree, closed the first formal class-tree planting.

## DATE IS SELECTED FOR ANNUAL LABOR DAY

FRIDAY, APRIL 7, NAMED AS  
DAY OF WORK AND PLAY  
ON MACKAY FIELD

### TRACK TO BE REPAIRED

HONOR EXTENDED NEVADA'S  
BENEFACTOR BY ALL STUD-  
ENTS ON CAMPUS

Plans for the annual Mackay Day festivities, to be held Friday, April 7, are now well under way, and the various committees appointed report good progress. The committee on the big clean-up, slated for the morning, has found plenty of work to do, and announce that every unsightly spot on the campus is to be given the proper attention. The track is to be loosened up, raked and rolled, assuring the track men a surer footing for the meets that follow. The jumping pits bleachers and various athletic equipment are to receive a thorough going over, with the help of every student on the hill. The committee on the morning's work is now busy apportioning jobs to the several straw-bosses in charge.

Mary Raitt and Eva Walker, who are in charge of the commissary department, promise an appetizing feed for the weary workers at the noon-day hour. All the women of the university are to co-operate to make the feed in the gym the event of the day. Lest the delicacies ordinarily supplied will founder the track men for the afternoon meet, a special diet is to be included.

In the afternoon the interclass track and field meet will be run off.

All the cinder men should be in good condition by that time, and a close and exciting meet should result. The Mackay Day Informal will close the day's celebrations. According to custom absolute informality will prevail. Soft shirts for the men, minus ties, with the fair co-eds correspondingly garbed, will heighten the "back to nature" spirit of the day. The Mackay Day dance, most informal of all, is expected to bring to a climax one of the most enjoyable days of work and play commingled, yet staged on the Nevada campus.

## ACADEMIC CHAMPS PLAY FRESHMEN THURSDAY EVE

BUNKERVILLE, WINNERS OF  
STATE TITLE, TO PLAY  
INTERCLASS VICTORS

Next Thursday night in the gym, the interscholastic championship basketball team, hailing from Bunkerville, in the southern part of this state, is to meet the strong freshman team of the university. Judging from the brand of ball played against Reno High in the gym when they won the championship, they should give the freshmen a hard tussle. The Bunkerville team is said to have the best teamwork of any aggregation that has played in the gym this year. Their short passes and accurate shooting make them worthy adversaries for their older competitors.

Dick Bennett, '11, was seen on the campus during the past week. Bennett gained fame during his college days as a rugby star on the crack '09 team. He is now well up in his chosen profession, mining engineering.

Jerome Higgins, '97, returned recently from Ecuador, S. A., where he has held the position of manager for the South American Mines Co. for some time. Because of war conditions, mining in countries controlled by European capital is at a standstill.

## INTERCLASS MEETS WON BY '17 AND '18

DUAL MEET BETWEEN UPPER  
AND LOWER CLASSES UN-  
COVERS GOOD MATERIAL

Last Saturday the oval men of the University met in the first competition of the season. Two dual meets were run off, the upperclassmen and underclassmen fighting it out against each other for high places. The Junior-Senior meet resulted in victory for the Juniors, 25-15.

The Sophomores easily defeated the Freshmen by a score of 37-14.

Due to a high wind and none too radiant a sun the times made were not fast. King showed a good burst of speed, considering the condition of the track, capturing the 100-yard dash in 10.3. Melarkey had no trouble winning the mile without extending himself.

### The Results

Junior-Senior: Mile—Melarkey, J.; 100-yard dash—King, J., Root, S.; 120 hurdles—Pennel, S., Kemper, J.; shot-put—King, J., Henningsen, S.; 440-yard dash—Organ, J., Silva, S.; 2 mile—Crowley, J.; half-mile—Constable, S.; 220 hurdles—Kemper, J.; 220 dash—King, J., Kemper, J.; high jump—Pennel, S., Kemper, J.; broad jump—Pennel, S., King, J. Total—Juniors, 25; Seniors, 15.

Sophomore-Freshmen: Mile—Mills, S., Donohue, S.; hammer—Hill, S., Buckman, F.; 100-yard dash—Henry, S., Harriman, S.; 120 hurdles—Greenwood, S., Cotter, F.; shot-put—Buckman, F., Hill, S.; 440 dash—Hopkins, F., Stever, S.; 2 mile—Brown, S., Morrison, S.; half mile—Donohue, S., Martin, S.; 220 hurdles—Jones, S., Hampton, F.; 220 dash—Harriman, S., Henry, S.; broad jump—Hill, S., Cessna, F.; high jump—Cessna, Cotter and Buckman, all Freshmen, tied for first.

Relay won by Sophomores—Hill, Henry, Jones and Greenwood.

## SEMI-ANNUAL WORK DONE ON BLOCK N

FRESHMEN DO GOOD JOB ON  
GIANT LETTER ON MT.  
PEAVINE

Once more the N on Peavine is resplendent in its customary coat of white, for last Sunday the freshmen put in the better part of the day in unceasing toil. Beginning at eight in the morning, freshmen laden with buckets, cans and all sorts of receptacles began the two-mile jaunt to the giant letter. Whitewash and water had already been hauled out, so that only mixing and carrying the whitewash up the mountain side was necessary. A bucket-brigade was formed and soon the N took on a lily-white lustre, much to the perspiring babes satisfaction. By two o'clock the work was finished, and the return trip was made in short orde.

## EDITORIAL

### HE-JINKS

Once more the He-Jinks is a thing of history and a word of comment will not be amiss. Frankly the old-time stag celebration, which used to be the joy of all the students on the hill, has degenerated sadly. Some of the stunts staged that night smelled to heaven and return and left a bad taste in the mouth of the squeamish.

Next year the committee in charge should act as censors and eliminate all but the good, clean fun. Lack of time is given as the reason for staging the impromptu stunts that night. Whatever the reasons, to retain the popularity of the He-Jinks, a different character of entertainment must be provided.

### BORROWED

Below are excerpts from an editorial printed in the Reno Gazette. The whole situation is summed up so clearly and forcefully that we reproduce it for the benefit of our readers who have been misled by petty personal attacks.

The president of the university is in Washington, D. C., because a matter of the greatest importance to the university called him there. The university is a government aided institution, the United States has an interest in it, it is broader than Nevada and the people of this state ought to know these facts. Without discussing procedure prescribed in the land bill now before congress, which was introduced by the junior senator at the request of the state legislature, the fact remains that this state has never received from the United States the area of public land to which Nevada is entitled. Washington, Oregon, California, Montana, Colorado, make the small grant to Nevada look insignificant indeed. The school system of Nevada, the University of Nevada as the head of that school system, every educational institution of the state, ought to be receiving the income from the sale of lands that properly belong to the state. That Dr. Hendrick should go to Washington when a measure is before congress to give the Nevada school system land, as the schools and particularly the University of California have been given land, is as wholly and completely a part of his duty as anything else in the administration of a great institution's affairs could be, whatever method of disposing of the lands may be decided upon by congress.

The president of a university is not a member of the teaching force in the different colleges. It is not part of his duty to go into a class room and ask the students questions based upon their text books. He is an administrator. President Wilson of the United States was administrator of the affairs of Princeton University before becoming governor of New Jersey. President Benjamin Ide Wheeler of the University of California is administrator of that institution's business affairs as well as the governor of all the faculties of its different colleges. Henry Suzzalo, just elected and installed as president of the University of Washington, is the business as well as the scholastic

head of that university. So here President Hendrick is business as well as scholastic head of the University of Nevada.

The University of Nevada is one of the greatest business institutions of the state. Did the critics of the institution ever think of that? Look at its interests, at the investments of its funds, at the numerous departments into which it is divided, at the number of its employes, at the number of the students—constantly increasing, we might say and notably increasing since Dr. Hendrick was installed—and one can readily realize that it is a vigorous business man as well as scholar who is needed at its head. He must be a man of affairs, at home in public life and public business. The regents in Dr. Hendrick found such a man and he has met with their approval in everything that he has done. His work, too, has been approved by all those capable of understanding it who have taken the pains to inquire about it.

## PRINCIPALS MEET TO REVISE COURSES

### A COMMITTEE APPOINTED TO DRAW UP IDEAS ON STANDARDIZED STUDIES

In order to revise and standardize the high school courses throughout the state thirty superintendents and principals of the various state schools met last Friday and Saturday in a conference with the state board of education.

The plan adopted to secure the best possible revision was to have a committee of five representative school men formulate what they consider to be the wishes of the state high schools and present their findings to the state board of education for consideration and adoption.

It was found that the conference of over thirty superintendents and principals was in substantial agreement as to the course of procedure and revision and the committee's labors will be confined largely to whipping the several suggestions into shape.

The committee named consists of J. R. McKillop, principal of the Fallon high school; B. D. Billingham, city superintendent of schools in Reno; W. H. Weslar, city superintendent of schools in Goldfield; G. C. Jensen, principal of the Elko high school, and R. L. Waggoner, principal of the Yerington high school.

It is expected that the committee report will be ready for submission to be held in Reno in May.

### MATH CLUB MEETING

Mr. Wylie is to address the club on the subject of Euclid's Geometry. The important place which Euclid holds in the development of mathematics will make the talk doubly interesting. The members and all visitors are requested to be in the math room of Morrill Hall promptly at seven on Wednesday night. The faculty and students are invited to attend.

## STATE LABORATORY WORKING OVERTIME

### AVALANCHE OF ROCK TO BE SAMPLED IS GROWING LARGER DAILY

Due to the greatly increased activity in mining, for all kinds of economically valuable minerals besides gold and silver, the state mining laboratory is being flooded with samples of every description. The average applicant for information desires a complete analysis—that is, every element in the rock, and its quantitative relation. Such a determination, even on the number of samples lately received, would necessitate a staff about ten times as large as is at present employed.

In sending in samples, the metals which are to be tested for, and only those expected, should be included in the sample list. No exact value of gold or silver in an ore can be given, but only its presence in commercial quantities, this limit being \$5 per ton.

"We have received a few complaints from mining men in the state who have sent samples to us for analysis because of the delay," said Director Lincoln today, "but we are working as fast as possible and trying to give every one a fair deal. In order to regulate the work and give every one who sends in a sample a fair deal, we analyze the samples in the order they are received. This laboratory cannot compete with the assay offices in the state and when a sample is received for assay we can tell the sender whether the ore contains sufficient mineral to warrant working it but we can not tell the exact amount."

"It is impossible for us to make a complete analysis of all the samples sent to us. If we were to make a complete analysis of the 102 samples sent us last week, it would take not less than 80 days of work. The laboratory at present has only two men and one assistant to do the work and two-thirds of their time is devoted to teaching. Complete analysis of the samples would cost over \$1,000, and it would not be practical to make a complete analysis of all samples sent in."

"The object of the state mining laboratory is to determine for the prospector and the small miner, who are developing the mineral resources of this state, whether his ore can be worked at a profit or not and the laboratory is not supposed to make scientific analysis which are of no commercial value."

In 1900 when the mining laboratory was established there were 122 samples received and 488 determinations made. In 1915 there were 2,058 samples received and 7,830 determinations. During 1916 so far this number has been greatly increased proportionally and is increasing daily.

### MINING STUDENTS LEAVE FRIDAY EVE

(Continued from Page 1)  
 Following is the proposed program for the trip:

Leave Reno 9:30 p. m. March 31, arriving Tonopah 7:50 a. m. April 1. Saturday, April 1: Morning—West End Mill; afternoon—Belmont surface plant and mill; night—Belmont mine.  
 Sunday, April 2: Morning—Tonopah surface plant and geology; afternoon—Extension mill and geology; night—Extension mine.  
 Monday, April 3: Morning—Leave Tonopah 7:50 a. m., arrive Goldfield 9:30 a. m., Florence mill; afternoon—Goldfield Consolidated mill.  
 Tuesday, April 5: Morning—Jumbo Extension mine and geology; afternoon—Goldfield Consolidated mine and surface plant.

Directions  
 P. S.—Secure half-fare ticket orders from Mr. Blarney, and engage berths at once.

## SOCIAL

A very pretty week-end function was the progressive dinner given by the "Jolly Dozen" Club. The home of Miss Eunice Cagwin in Sparks was the scene of the first course. Here the table was beautiful in the club colors of yellow and black, the table centered with the jonquils, the basket handle fastened with the black tulle and the pretty favors fastened with the two-toned ribbon. The place cards were in the tones and flowers. Here grape fruit was served. The first course was served at the home of Miss Elsie Herz where an elegant table center of violets were very pretty and artistic and the menu delicious. The dinner course was served at the home of Miss Margaret Fulton on First street. The anemone filled an artistic basket to overflowing and centered the board and from the flowers rippled pink tulle and dainty ferns. The tall candles held pink shades. The menu was elegant. The salad course was enjoyed at the home of Miss Helen Hobbs on North Virginia street where an elegant menu mingled prettily with the artistic floral center piece which was in hundreds of butterflies and flowers, the effect being very beautiful. The dessert course was found at the home of Miss Rowena Evans. The rooms were beautiful in hycancinths of the various colors. An artistic arrangement centered the table and the menu was artistically served. The remaining hours were spent at this pleasant spot where dancing and music was enjoyed. Participating in the pleasures of the evening were Misses Ruth Pyle, Eva Walke, Freddie Hilp, Margaret Fulton, Elsie Herz, Alice Hobbs, Helen Hobbs, Lena Laden, Rowena Evans, Eunice Cagwin and Messrs. Bert Walker, Freddie Hilp, Margaret Fullard Mason, Frank Golden, Robert Baker, Dale Pruett, Harry Hovey, Carl Stever and Laurence Sullivan.

## MANZANITA HALL NOTES

### MANZANITA HALL PARTY

Manzanita Hall last Saturday was in a state of confusion never before known. Girls in caps and aprons rushed madly in search of brooms and cedar mops. Rugs, which had never been violently disturbed before, were dragged out and thoroughly swept and beaten. It is rumored that some even went so far as to actually wash windows and looking glasses. Now the meaning of all this confusion was the "party" to be given that night by the girls. Word had been sent around that the first thing in the line of amusement would be room inspection at eight o'clock sharp. Therefore all the industry on the part of the girls.

Needless to say the Hall responded admirably to all the energy expended upon it, and when the guests were proudly taken on the inspection tour, cleanliness and order met them at every turn.

After the general survey of the Hall the guests assembled in the drawing rooms where the programs for the leap year dance were given out. Then followed the grand march to the dining hall where the dance was to take place. For one night the usual order of things was reversed. Shy gentlemen sat awkwardly against the wall while the fair sex rustled dances.

On the walls were appropriate signs which warned the gentlemen that for one evening they were to conduct themselves as ladies if possible.

Dancing continued until eleven thirty when a serpentine was formed, lead by the house president, Ethel Winger. The long line wound out of the dining hall around to Manzanita's front door, down the hall and into the recreation room, where delicious refreshments were served in cafeteria style. At the close of the evening all assembled again in the drawing rooms and after singing "U. of N. So Gay," and a skyrocket for the Manzanita Hall girls, the party broke up. Every one assented in voting it one of the most unique and enjoyable parties of the year.

### Leap Year and More of It

A rule has been proposed at Kansas University to prevent men from attending the girls' basketball games without a lady escort. The purpose is to secure a more silent audience for the games.

## Sampler Perfected By Prof. Church

### EXPERIMENTS BY LOCAL SCIENTIST RESULTS IN USEFUL INVENTION

Experiments by Dr. J. E. Church, Jr., meteorologist at the University of Nevada; S. P. Ferguson and Henry F. Alciatore, section director for the United States weather bureau, may revolutionize the method of measuring snow as well as lead to important discoveries in engineering and irrigation problems.

Acquiescing to the demands of irrigationists and engineers for knowledge as to the exact snowfall and water supply in the Truckee, Carson and Walker basins, Professor Church and Ferguson have perfected an instrument which determines the average depth, water content and density of snow. The measure is called the Church Snow-Sampler. It is so far superior to the measures now in use that the Swiss government has them in use, and, after an experiment, the Canadian government will probably install them throughout the dominion. The sampler is economic in so far as it saves a great deal of labor.

H. F. Alciatore is co-operating with the university experts, and the three are gathering data on the Truckee, Carson and other watersheds which will, in the future, be very valuable to engineers as data can be furnished as to water power which can be developed at almost any point in any of the watersheds.

Under Church's system the sampler is set in a course plainly marked and it automatically records depth, water content and density. In the Tahoe basin courses with the Church sifter will be established at Lake Valley, Grass Lake, Geneva and Freel Lake. In the Carson basin courses will be established at Williams, Burnside lake, Blue lake; Walker basin, courses at Pickle Meadow, Willow Flat, Big Meadow and Keswick Meadow.

In addition to the above mentioned which are known as the high level courses in the 7,000 to 10,000 foot levels, courses will be established in the lower levels. Both Church and Alciatore are watching very closely the outcome. If the sampler will answer the purpose in all branches, a

number of measuring stations now being kept up at much cost to the government will be done away with, and the sampler substituted.

Professor Church has been experimenting on a sampler for the past five years. It was not until a few weeks ago that the instrument was perfected to any satisfactory degree. While east last month demonstrations made to Canadian government officials greatly pleased them and at the present time the installation of the Church sampler throughout the dominion is being considered.

### ROUND UP

Prof. Scott and Dr. Lockett have just returned from a successful agricultural extension campaign in the southern part of the state. They held meetings and demonstrations in Overton, Bunkerville and Panaca.

The meetings were principally in dairying and animal husbandry and consisted of lectures on types of dairy cattle, creamery work and rural sanitation.

The people of southern Nevada are very enthusiastic and are making use of the suggestions given. As a result of last year's meetings, two pure-bred Holstein-Friesen bulls have been brought into Bunkerville and Mesquite. There is a better attitude towards dairying and plans are being made to start a small creamery and cheese factory. The plan is to use the ice plant and employ a person who can handle both as the work increases.

Much interest is being taken in club work and about fifteen boys wish to take up the dairy project. They are going to send the samples of butter to the Dairy Extension office for scoring.

Overton has more improved cattle than Bunkerville, having seventy high grade Jerseys and thirty Holstein-Friesians. The directors of the Clark County Experiment Farm wish to put in a milk house and a small concrete silo for furthering the work in dairying.

### Stanford Student Body Adopts New Constitution

With but little opposition, the Stanford Student Body has adopted a new constitution, providing for an entire reorganization of student government. The old one was inadequate and lacking in detail so it was decided to draw up a new one perfect in every detail.

DOWN THE ALLEY—THEY ALL KNOW

### Ready!—"Roll Your Own!"

A fresh, lively "roll your own" cigarette of "Bull" Durham is as quickening and inspiring as the roll of drums or the "get busy" notes of a bugle call. "Bull" Durham is the smoke of the red-blooded—the bright and breezy smoke that goes with youthful enthusiasm and energy.

## GENUINE "BULL" DURHAM SMOKING TOBACCO

No other tobacco in the world has the unique, mellow-sweet mildness or the delightful aromatic fragrance of "Bull" Durham. Made of rich, ripe Virginia-North Carolina leaf, "Bull" Durham has that distinctive, exclusive quality which has made it the favorite smoke of three generations.

Only by "rolling your own" with "Bull" Durham can you get a cigarette with the individuality and personality that give such perfect, lasting satisfaction.

## Wool Exhibit Wins Favorable Comment

### THE COLLECTION OF FLEECES COVERING THE PRINCIPAL TYPES IS PRAISED

Trade journals throughout the United States have commented very favorably upon the Nevada wool display at the recent Panama-Pacific exposition. This exhibit was given eight gold medal awards as the most representative range wool display of the exposition and it speaks well of the state as a sheep producer as well as one of the world's biggest silver producers. This exhibit has recently been returned and is now being exhibited at the agricultural building at the state university.

The most valuable fleece in the exhibit is a pure bred Corriedale and it is the result of cross breeding two widely variant types of sheep, the Merino and Lincoln. In the exhibit is a fleece valued at \$3,000.

The collection of Nevada grown fleeces is fairly representative and shows what the various sections of the state produce in the way of wool. From Adams and McGill of White Pine County, there is a completely graded set of 14 fleeces showing the ordinary run of range bred wools when classed according to the moderated Australian fleeces without "skirting" being done.

Taylor and Wheeler, of Lovelock, H. F. Dangberg Co. of Minden, William Potts of Austin, Pyramid Land and Stock company of Pyramid, California-Nevada Land and Stock company of Washoe County, are among the firms who have contributed to the display. The exhibit will be added to from time to time.

This exhibit is now being increased. Some Lincoln and Oxford fleeces are coming from the University of Wyoming and a Tunis from Arizona. Samples of cheviot fleeces have been sent to California and a Cootwold to the University of Arizona. This exhibit will be used in classroom work when completed.

### MISADJUSTED VISION

In these days most college graduates have supposedly managed to rid themselves of the idea that the world is clamoring for them, and that people are crowding the galleries to watch their coming and going. They are determined that their diplomas will not bring with them an inflated opinion of their own capabilities and worth. They have convinced themselves that they are willing to start at the bottom and climb. In this humble frame of mind they deliberately set out in search of an opportunity. And right here is where they begin to mistake.

Opportunity for them is a big thing, something unusual which is apt to be found far away. Their telescope is, therefore, focussed for some large object in the distance. A particular acquaintance "falls into" a pile of money or lands a "soft" job, and they speak of his opportunity. The element of luck which comes to one in a million goes entirely unrecognized.

For some men, beginning at the bottom simply means a temporary postponement of high salaries and riches. Climbing constitutes a short period of delay before accepting the president's chair. A mere pittance of eighteen dollars per week would strain the bounds of their idea of eating humble pie. They imagine that there is a short-cut to success and fame, something intangible in the guise of opportunity. And yet their far set vision overlooks opportunities every hour in the day.

Business men tell us that there are plenty of men with courage and ambition. The problem that confronts the executive of a large corporation is a problem of finding men who are ready to take hold of a proposition for the purpose of gaining experience. No man can direct the policies and affairs of any business until he knows what is going on under him. Starting half way up the scale will never gain him this knowledge.

Opportunity will seldom appear on the lens of the magnifying and distance-adjusted telescope. Rather it travels with experience, the giver of "poise, power and personality."—Colgate Madisonensis.

### California's Charter Day

California celebrated the forty-eighth anniversary of the founding of the university last Thursday. George Edgar Vincent, president of the University of Minnesota, was the chief speaker and headed the ceremonies in the Greek Theatre.

## Y. W. C. A.

The following were those chosen by the nominating committee and accepted by the association as the officers for the ensuing year: President, Helena Shade; vice-president, Ruth Pyle; annual member, Dorothy Hempton; secretary, Eva Walker; treasurer, Elsie Farrer.

The remainder of the hour was devoted to a musical program which was as follows: Instrumental solo, Juanita Frey; instrumental duet, Hulda Shartel and Grace Fuss; vocal duet, Doris Taylor and Eva Walker; violin solo, Belle McMillan.

Dean Knight, of the College of Agriculture, has been called to Sutcliffe, a resort near Pyramid Lake, to direct the beautifying of the grounds. A large number of trees are to be planted and considerable money spent to make this place a popular one with the motorists this summer. While in the district Dean Knight will make a study of the soil and water for agricultural purposes.

## ROMANCE GALORE IN SENIOR COMEDY

**MYSTERIOUS MR. BUNBERRY,  
PROMINENT CHARACTER IN  
PLAY, ATTRACTS MUCH  
ATTENTION**

Despite the serious-sounding title, "The Importance of Being Earnest," to be presented by the Senior class April 14, in the High School Auditorium, is one of the most brilliant comedies imaginable. The mysterious Mr. Bunberry, who receives so much attention throughout the play, should be very well known by every young man who now and then stays out after the curfew rings. He is that type of amiable young man, always ready to disappear when not wanted, or move to a distant spot and there await the call. For general all-round usefulness he is hard to beat.

Love scenes are numerous throughout the play, and the readiness with which the masculine members of the cast consent to extra rehearsals is painful.

Jack O'Sullivan, who is directing and coaching the entire cast, is optimistic over the outlook. The separate roles are well filled and the piquant, snappy lines of the play are handled in a way that assures a capable production.

## SOCIAL

At times our cub reporter is allowed to "write up" short news items. We have often corrected him in regards to his use of statements too direct and explained that it was exposing us to damage suits. We explained that the use of such phrases as "It is reported" and the quoting of the authority often relieved us of difficulties. He was sent to cover and write up a certain social affair and

this is the copy that found its way to our desk.—Ed.

"It is rumored that Manzanita Hall entertained at what was said to have been a leap year party. Reports show that one Miss Elsie Farrar was mistress of ceremonies and if hearsay is correct she was a great success. Gossip tells us that nearly everyone had an enjoyable time because the music, we are told, was exceptionally good. Some of the boys (names on file in our office) state that they were allowed to inspect the sacred precincts of the Hall and emphatically say that one of their ambitions have been realized. They also admit, we understand, that they were duly punished for every dance they ever cut with a girl and in one case, they say, a fellow thought that the girls were afraid he had the "small pox," so clear did they steer of him. He, we are told, put the following sign on his coat: "I have not got the small pox."

Regardless of the cloud of uncertainty hovering around the details the one big fact is certain—that everyone had a royal good time, and await Manzanita's next affair with joyful expectation.

## GIRLS' GAME

The girls' basketball series was played last week and the girls of the Freshman class held up their end and followed the boys' example winning the series by a large margin.

The first game was between the Freshmen and the Sophomores and the yearlings found practically no resistance in piling up the score. The score, 30 to 2, tells the story. The winning team was composed mostly of the stars from the high school teams of last year and the team work was the feature of the game.

The finals were played Friday evening in the gym and was the best game of girls' basketball seen on the local floor this year. It was full of excitement and clever playing. The work of Mary Martin at forward and Salome Reiley at guard was excellent. The Freshmen team worked

together like a clock and displayed a brand of basketball that would have been a credit to any college co-ed team. Long, difficult baskets were frequent and the new rule regarding trying for a basket after a dribble was, many times, taken advantage of. Both teams were ardently supported by their respective classes and the individual playing of the stars was loudly applauded.

## NEW BOOKS

Only a few new books have reached the library for report this week.

Baldwin's World's War, Calthrop's English Costume, Cubberley and Elliott's State and County School Administration, Fielde's Parliamentary Procedure, Firebaugh's Physician's Wife, Hopt and Spafford's Laboratory Exercises in Agriculture, Ingram's Christopher Marlowe, Kansas Historical Collections, volume 13, Masson's Wordsworth, Shelley and Keats, Perrot and Chipiez's History of Ancient Egyptian Art, Priest and Nun, Smith's Eighteenth Century Essays on Shakespeare, U. S. Brewers Association Year Book for 1915.

## DEMONSTRATION CAR TO AID EXTENSION WORKERS

**RAILROAD COMPANY TO SUPPLY SPECIALLY EQUIPPED CAR FOR AGGIES LECTURERS**

The San Pedro, Los Angeles and Salt Lake Railroad Company are sending their demonstration car out over their system the first part of next month and the Department of Agricultural Extension has been asked to collaborate with them in the work done in Nevada.

The car and work is under the direction of Douglas White, general industrial agent of the railroad company. The first meeting will be held in Overton April 11th, the second in Las Vegas on the 12th and the last meeting in Nevada will be held in Panaca April 13th.

Mr. C. A. Norcross, director of the Department of Agricultural Extension, will lecture on agricultural extension work and Dean Scroggum will talk on the results of experiments in pumping. Dean Knight will cover the reclamation of Alkali lands, principles of irrigation and soil and crop management in the south.

The car embodies all the results of the experiments run at the different agricultural colleges and lectures covering the new methods of handling the crops and livestock. The expense of this car is borne by the railroad company and in past years has proved a very profitable investment.

## A. I. M. E. to Enter Nevada Section

**MINING ORGANIZATION TO INSTALL STATE CHAPTER IN MAY**

W. L. Saunders, past president of the American Institute of Mining Engineers, will be in this city May 18 for the purpose of installing the Nevada section of the institute. Mr. Saunders is at the present time a member of the naval advisory board and has held several positions of merit.

The organization of the Nevada section will be of importance to mining engineers of the state, all of which automatically become members. The placing of Nevada as a section will make eligible many other in the state who are identified with mining.

That Nevada is to become a section is largely due to the efforts of the Nevada Mine Operators' Association. With the organization in May will come headquarters which will be located in Reno. Officers will be maintained and all of the business transacted locally.

In the past engineers in Nevada have been considered under the Utah section. The institute has on its membership rolls some of the best engineers in the world together with recognized authorities on mining.

## Australian Stock Bought for Farm

**AGGIE DEPARTMENT SUPPLYING FARMERS OF STATE WITH PEDIGREED ANIMALS**

Sales of registered and pedigreed hogs from the university farm have been made as follows during the past week: Berkshire registered hogs—H. J. Long, Fallon; R. M. Taylor, Paradise Valley; Col. H. B. Maxson, Reno; H. L. Anderson, Shellbourne. Duroc Jersey hogs—William Laubenheimer, E. A. West, Yerington; Senator A. W. Keddie, Fallon; Col. H. P. Maxson, Reno; J. L. Johnson, Currant, Nye County. Holstein bull—William Johnson, Wells. Guernsey bull—C. E. Beigler, Lamoille.

These animals were all bred on the university farm and are to be used in grading up the stock throughout the state. They are of good type in their respective breeds and of known strains and much is to be expected of them.

To replenish the farm and enlarge the scope of livestock, some Corriedales have been bought in Australia and are now on their way to the university farm.

## THE COLLEGE MAN AND THE NEWSPAPER

No man can complete a college course without acquiring some ability to assimilate information from the printed page. This faculty he applies in his courses, but how often does he fail to use his developed talent beyond the pale of the curriculum.

What a contrast there is in the average college man's method of reading a newspaper to his method of attacking work required in a course. He usually glances at the headlines on the first page and then, unless he belongs to that small minority who have no athletic interest, devours the main items on the sporting page; next he glances over the headlines in the rest of the paper, reading in full any items of special interest to himself regardless of their real moment. What information he does take in is not likely to be retained long, because of the usual absence of effort to remember definitely and to co-ordinate rationally what has been read.

How many undergraduates are there who can trace clearly and concisely even without going much into detail, the main developments in the war? How many can talk intelligently on European relations during

the war and produce any real facts to back up their statements? How many have at their tongues' end much other important and useful information?

Familiarity with past events, progress and philosophy can have little value for the man of today if his learning is wholly divorced from present-day developments, if he does not use it as a background for his own knowledge, views and actions regarding modern problems. With the college man the remedy for his lack of perspective is not more time spent with the newspaper, but the application to his newspaper reading of the same principles he applies to reading done in connection with a college course—memorizing important facts, and continual co-ordination of events. —McGill Daily.

### What Becomes of Them

Aside from the profession of teaching and those who are married, Wisconsin has 401 women graduates actively engaged in business. Of these 100 are engaged in literary fields, 65 in social work, 48 as clerks, stenographers, etc., 9 as doctors, 6 as lawyers, 2 ministers, 2 actresses, 58 druggists, 19 farmers and a few others in practically every branch of business activity.

### One Way to Get Through College

A student at the University of Oregon has added one to "Get Rich Quick Wellingford's" schemes. An old man came to the university the other day asking for the jewelry department. According to his story he gave his watch to a young man who claimed to be studying watch repairing at the university. The young man promised to fix the watch free of charge and told the owner to call at the jewelry department for the watch. When the owner got there, to his amazement he found that there was no watch department.
