Communicated

Dear Harry:

The bundle of Sagebrushes that you sent to me were received a couple of days ago. I have read them all through and passed them along to Al Inman, who has been transferred to the company that I am in. I sure do appreciate the papers, as they bring back memories of the good old times "on the Hill."

Not long ago I received a circular letter from the U. of N. and also one from Prof. Knight.

from Prof. Knight.

The account of the bets paid after the frosh-soph game reminded me of the time when the Aggies "cleaned up" on the Engineers a couple of years ago, causing Root to scrape all the skin off his nose, "Kelly" Engle to learn a useful occupation, and "Dutch" Masters to get more practice in donning and wearing a monkey suit.

when I first drove in at this camp about five months ago I had as much trouble turning out for reveille in the morning, on account of the mysteries of the soldier's uniform, as I used to have in dolling up for the junior prom or soph hop. Many were the times that I had to hot-foot it over to the Sigma Nu house to borrow a pair of suspenders and to the P. O. house to find a shirt stud to match the two that I had previously borrowed from some one and forgot to return.

We use the same system in the

some one and forgot to return.

We use the same system in the army. Whenever we stand guard mount we always borrow a new pair of leggings and a hat from someone.

Norris Shindler, second lieutenant, is now in the military police at Camp Lewis. "Sharkey" Quigley is located near our barracks and I see him occasionally. Whenever I go to town I am sure to run into Ed Caffery or some other bird from Reno.

Remember me to the "old timers" on the Hill and Prof. Jones and Prof. Knight.

Sincerely,

Sincerely, CURB SMITH, ex-'17. Corp. John W. Smith, Co. A, 316th Fld. Sig. Bn., Camp Lewis, Wash.

Third Battery O. T. C.,

Dear Kim:

The top'o'the'mornin' to yuh. This has been a quiet morning for St. Patrick's Day, but that is due to another quarantine. I had figured on getting snaps of all the Nevada men in camp, but now that is out of the question, and all that I have is one of we three under the same quarantine. It isn't very good but I hope you can use it, not so much for my sake but Joe and Ed.

News items: Joe Allen has been

News items: Joe Allen has been in bed here for two weeks from a kick he got on the shin. Wasn't so bad, but got an internal infection which looked pretty bad for a while. I thing he will be out in a day or so.

Frek Rains is holding down a good first base for the First Battery and was in the team that beat us 8 to 5

vesterday.

Last night we had a smoker among ourselves, Third Battery and G Company, which was a lot like the good old times at Nevada; Patrick, of California Glee Club, at the piano; Hyde, California, banjo mandolin; a ukelele and another banjo-mandolin. There were a bunch of original stunts that kept the house in laughter. Ed. Caffery was called upon to sing a little ditty, but had been captain the same morning, which left devoid of a voice. You read about how a fellow goes from captain to K. P. in the papers, and it is only too true at camp. Ed. will probably get it soon after his raise, but I am lucky, as usual, though just been captain will have to go back to my dirty bottle sergeant's job, or

just been captain will have to go back to my dirty bottle sergeant's job, or rather milk sergeant or mess sergeant. Nothing to the job but relieve. Sure of K. P., thanks to someone.

Saw Paul Barker yesterday, on the quiet of course; in fact it was a coincidence, because while watching the ball game an overthrow at first took me in pursuit and I saw another fellow going after too, so slowed down, but it was Paul, so we formed a patrol and followed together in close pursuit, soon recovering the ball. He's getting so fat that Uncle Sam will have to fit him out with some new duds before he busts those he has.

I passed by the colonel the other

I passed by the colonel the other day and called the battery to attention, saluting in fine style, and after I got by I look back and there was old T. G. in the front rank of the first squad giving me the high sign. I guess he had a laugh over it, because the colonel didn't return the salute.

I see Harriman has made his departure and Kink is holding down the old job. I imagine he'll make good, and I hope so, because it seems that things are kinder dragging back at school. Keep up the old pep.

school. Keep up the old pep.

They are letting out a bunch of the fellows in camp, and in our battery 33 have been sent back to their old organizations with very good prospects for more to go soon. Don't be surprised when you hear of my departure. It will come soon. Those leaver the control of the control ture. It will come soon. Those leaving have assumed the old title, "Raspberry."

Kim, pass this on to Brow and then to the league, if you wish, because I can't put any more time to letters. There are books to learn as I never knew them before.

Yours for old Nevada

Yours for old Nevada, RUFF.

THE STAR SPANGLED BANNER

Summer girl in gown of red, City youth in costume white; Sky of deepest blue o'erhead, But in background full of fight.

Red of maiden, white of lad,
Blue of heaven up above—
Now if stars could but be had
To make complete the flag we love!

Bull comes prancing into view,
Maid and lad he rudely jars;
Red and white go toward blue—
Bull supplies the stars!

-Exchange.

NEW ERA IS DAWNING IN ARTS AND SCIENCE

College of Arts and Science Is Central Structure of Entire University and Leads Way in Progress.

(By Dean Maxwell Adams) At various times during recent years numerous persons have attempted to define the place and function, describe the past and fortell the fu-ture of the College of Arts and Sci-

Since the establishment of the University of Nevada the College of Arts and Science has been the central structure around which other schools have built. Much of the instruction of the various colleges has always been given by teachers belonging primarily to this school. The University, therefore as a consent with here fore, as a concrete unity, has a more general interest in this college than any other, and it is only in the last few years that we have differentiated very clearly between the various schools; the University and the college were one.

lege were one.

Our colleges are English in birth and tradition, while our method of grouping colleges into a university has a German origin. We can go back to England to the time when the philosophy of Aristotle constituted the college course, and when the entire curiculum was taught by a single teacher. With the revival of learning came the introduction of Latin and later Greek and Mathematics. For many generations these three or four subjects included all the work offered in a college course. Its fundamental idea was discipline of the mind. Its mode of affecting this war, in large part, by shuttling the student's eyes to the distracting things of the present and focussing his gaze on that which was great and good and difficult to understand in the past. From the narrow limits of this old curiculum the modern college of arts and science has evolved, until many of the so-called practical subjects are included in its course. until many of the so-called practical subjects are included in its course. Recently there has been developed a plan by our arts and science faculty various the science faculty. plan by our arts and science faculty to organize the work of the various departments to more completely fit the student for practical work in such fields as Journalism, Law, Medicine Chemistry and Geology. It can no longer be fairly said that a college course is less practical than one in engineering, and the time is fast passing when a young man registers in ing when a young man registers in Arts and Science because he has shown no promise anywhere else.

Those of us who have taught for a Those of us who have taught for a decade or more can distinctly see that the dawn of a new era for the college of Arts and Science, as well as the entire University, is at hand. Our school, young as University age is reckoned, with the finger posts still all pointing forward, has closed the first period of its development. Today we are mounting the brow of the hill, from which we look forward to the future, as well as back over the past.

STATE NORMAL SCHOOL IS GROWING RAPIDLY

Dean James Planning to Fill Great Demand for Teachers in Nevada by Addition of Better Facili-ties and New Building.

(By Dean James)

(By Dean James)

In the past year the need of a separate building for the Normal School has become increasingly clear. A recent federal survey of the University of Nevada mentions it as one of the pressing needs of the institution and thus reinforces the proposals of the Department of Education, which have already received the favorable consideration of the University authorities. A request for such a building was made by them to the state legislature at its last session, and that relature at its last session, and that request will doubtless be renewed now that the even greater need of the Col-lege of Agriculture for a building has been met by a generous appropriation of state funds.

Nevada has wisely and economically centered her preparation of teachers of all grades at the state University but has not yet developed the facilities for the training of elementary teachers to the point of supplying more than a fraction of the new teachers needed each year in Nevada, and the young women who are certified each year by the University for high school teaching cannot compete successfully for secondary school positions even on their home grounds with Nevada has wisely and economically cessfully for secondary school positions even on their home grounds with the candidates from a neighboring state. We cannot expect our Nevada girls to have the pick of high school vacancies until, with a separate building and larger teaching staff, there is the opportunity for practice teaching which is at present denied them. In the normal school preparation of elementary teachers, the public schools of Reno have generously co-operated with the University by furnishing a chance for observation and practice chance for observation and practice work as far as this can be done with out disadvantage to their own pupils, and we hope that the same courtesy will be continued and even extended if that appears possible.

Most of the normal school graduates go for a time into country schools and there is a direct call for more training in rural education. New courses have

PRESIDENT WALTER E. CLARK

ENGINEERING BRANCHES OFFER OPPORTUNITIES

Mining, Mechanical, Electrical, and Civil Engineering Departments Well Equipped for Technical Study, With Able Faculties.

Mechanical and Electrical Departments

(By Prof. Stanley Palmer) e Mechanical and Electrical Departments have not only given a large percentage of their students to their country's service this year but also three men of their instructional staff. Dean J. G. Scrugham is a major in the carriage division of the Ordnance Corps at Washington, D. C. Professor A. W. Preston is a chief machinist in the U. S. navy at San Pedro, California, and Mr. P. G. McKinlay is junior lieutenant on board the U. S. S. Fredwick erick.

Special courses in gas engines and radio operating are being given this term to those men who are soon to enter the U.S. government service, in order that they may have some pre-liminary training along the lines which they expect to follow in the government schools.

While considerable accessory apparatus has been added to the department's equipment this year, the most interesting addition is a complete telephone demonstrating cabinet, the gift of the Bell Telephone Company of Nevada. This cabinet contains a complete operating telephone circuit, including two subscriber stations and the essential parts of a central office equipment.

COLLEGE OF AGRICULTURE INCREASING FOOD SUPPLY

Serving Agricultural Interests of the State in Every Way Possible and Increasing Conservation of Food.

(By Dean Knight) Since the United States entered the present struggle for world liberty, our College of Agriculture has undergone a remarkable change in all of its operations. Of the sixty young men actively enrolled in this college, 80 per cent have withdrawn to enter the various branches of service for their country

During no time in the history of this country has the demand been so great for young men trained along agricultural lines, especially those with considerable agricultural experience. The College of Agriculture realizes the great necessity in the continuation of this training so that it may most effectively take its part in solving the momentous problems involved in the maximum production of war foods. The College of Agriculture is giving more consideration in all of its courses of study to the practical application of the various agricultural principles which have to do primarily with the modern methods of farm practice. During no time in the history of of farm practice.

Co-operation

By creating a much stronger co-operation between the farmers and the people of the rural districts and the College of Agriculture and by uniting these forces many difficult problems were readily solved with but little trouble, and the result was a more general and neighborly spirit of converting among the people in the very operation among the people in the va-

atus has been added to the department's equipment this year, the most interesting addition is a complete telephone demonstrating cabinet, the gift of the Bell Telephone Company of Nevada. This cabinet contains a complete operating telephone circuit, including two subscriber stations and the essential parts of a central office equipment.

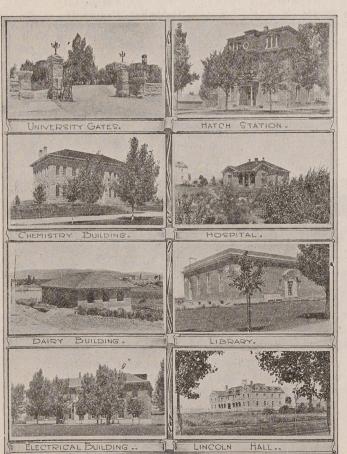

The Mackay School of Mines (By Director Lincoln)
The Mackay School of Mines at the University of Nevada offers a regular four years' course in Mining Engineering, leading to the degree of E. M. upon graduates who present a thesis after holding responsible positions for three years. It also offers a graduate course in mining of one year, leading to the degree of M. S., and a Prospectors' Short Course of four weeks.

The Mackay School of Mines was presented to the University of Nevada by Clarence H. Mackay and his mother. It is well designed and finely equipped with a large museum, library, chemical laboratory, mineralogical laboratory, assaying laboratory and metals large and the course of these crops. Many samples of farm seeds were received from farmers throughout the state and tested for germination and purity. The envirse equipment in the various communities.

Increasing Acreage of Food Products
The College of Agriculture made urgent requests to the people of the state to use all possible waste lands where water could be obtained for the proper irrigation of the same. In many instances these tracts were carefully examined, soil samples were taken and analyzed and a plan of operation outlined for the quickest and most effective methods of preparing this land for crop production. Several by means of this special service.

Greater Yields Per Acre
By increasing the production. Several by means of this special service.

Greater Yields Per Acre
By increasing the producing power of irrigated lands. This was brought about chiefly by the use of better methods of farm practice. The College of Agriculture helped the farmer to obtain a better general knowledge of the value of his land f

THE UNIVERSITY OF NEVADA IS ON A WAR FOOTING AND CAN BOAST OF

WAR ORGANIZATION-The University War Council as a central organization and clearing house for all war activities, which has kept a record of each enlisted man, has prepared a series of educational newspaper articles and public speeches to promote patriotism throughout the state, and has managed every campaign in the University to a successful close

WAR TRAINING-A Reserve Officers' Training Corps unit with compulsory drill for all underclass students under a regular army officer of large experience.

Special war courses in radio work and gas engines for aviation service and courses in business methods and French for quartermasters.

Special classes for high school students and for women and girls in the care and handling of farm machinery. Over 100 students enrolled in this work at present. University facilities offered to government to train enlisted men in shop work from May

WAR SERVICE-More than 200 graduates, students, and former students in the service of the

nation and eleven instructors

College of Agriculture in co-operation with farmers of the state in increasing food production in present emergency.

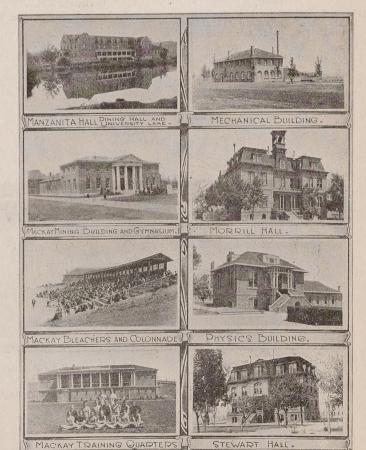

Domestic Science Department working on food conservation.

Girls and women organized for Red Cross work.

Faculty members serving actively on State and County Councils of Defense.

Library collected over 10,000 volumes of books from all over the state to furnish soldiers with reading matter.

VARSITY SQUAD Waite, Savage, O'Brien, Martin. Cessna, Lattin, Gooding.

Basketball was again the most successful sport of the year for the Univer-Basketball was again the most successful sport of the year for the Oniversity of Nevada. At basketball Nevada has always been among the leaders of the Nevada-California League and this season was no exception. Another fact that Nevada has to be proud of is the long series of consecutive seasons that she has been undefeated on the home floor by a college team.

The team left on a week's trip to the coast on February 20 to play four nes. The ease with which the first two games were won caused everyone

to think that the team might win below but that did not happen. Davis Aggies were played at Davis on February 12. The farmers were no match for Nevada and the final score was 36 to 15, Nevada playing all her

subs the second half. On February 13 Nevada went down to defeat at Stanford by a score of 20 to 30. The Sagebrushers played even with the Cardinals the first half but lost themselves the second half. Pat O'Brien starred in this game and made most of Nevada's points.

St. Mary's was the next team to win from Nevada. The game was lost by a large score but every man on the team played in top-notch form, simply being outclassed by the Priests. The score was 27 to 47.

The next night the team went to Berkeley and lost the slowest and poorest game of the series by the score of 20 to 27. Both sides played poor ball. Nevada ended the season in the middle position with 500 per cent, which exceeded our first hopes. The teams finished the season in the following order: St. Mary's, Stanford, California, Nevada, St. Ignatius, Pacific and Davis

Nevada lined up as follows: Center, Savage; guards, Lattin and Martin forwards, Waite and O'Brien; subs, Pargellis, Cessna, Gooding, and Corbett

The government urges everybody to save to help win the war; and that's a form of service that everybody can give the country; and patriotism is really a spirit of service to the country.

Now saving applies to clothes; and the real lesson of the war, in saving, is that true economy is in the quality you buy, the use you make of it, and the care you take of it.

THEREFORE:

Buy only such clothes as you need; buy only the best clothes; take good care of them. You'll get more service in clothes by that method; and it will inevitably bring you to this store to ask for Hart Schaffner & Marx clothes.

FRANK'S

THE ATHLETIC SITUATION

Nevada's general athletic situation, if the unforseen setback of the present year is considered, is at least satisfactory if not promising. The future, though problematical, points to something better than the year that has just

After a season of partial success last year the University looked forward to the present year with the expectation that it would bring a larger measure of success than had been enjoyed in the past. There were several good reasons for this attitude but all calculations were overthrown by the enlistment of practically every athlete in school.

During the summer the University obtained the services of Mr. R. M. Whisman as all-year coach. Coach Whisman is a man with wide experience in college athletics, having taken part in five years of football, five years of basketball, and three years of track and field events in the University of Indiana.

It was hoped that Coach Whisman would be able to put out a winning team in football, but with only a small nucleus of old men and no new men with much high school experience this proved to be too much of a task for one year's work. However, several men were developed who, if not taken into the army, should form the nucleus of a strong team.

army, should form the nucleus of a strong team.

The basketball season, though not as successful as in former years, turned out better than first appearances seemed to indicate that it would. There was not one man in last year's varsity squad in school and the new material did not look very promising. As the season progressed several sophomores and freshmen developed into good material and formed the varsity. The team succeeded in making an average of 500 per cent in the league and was prevented from getting a better place more by inexperience than by lack of abinty. These men will all be in school next year and by that time should be in a condition to be made into a winning team. Women's basketball was also handled by Coach Whisman. The results of the season in this sport proved to be very disappointing. The team made their trip to California enjoying all the confidence possible but returned with three defeats and no victories. With but one exception the squad of twelve will return next year, and backed by this year's experience should be able to retrieve thier losses.

Intercollegiate track and baseball have proven to be impossible this year

Intercollegiate track and baseball have proven to be impossible this year for several reasons, the main one being the shortening of the semester and the speeding up of the program. In spite of the lack of intercollegiate activity baseball has been given an impetus that it will not be likely to lose for some

As this paper goes to press there is under way the biggest thing of an athletic nature that the University has ever undertaken. If the resolution for compulsory physical training passes the faculty senate, many potential athletes whose abilities have been unknown will be discovered and Nevada will cease to suffer from the lack of suitable material from which to build teams.

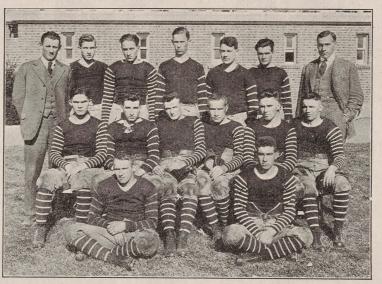

Nevada's first game was with the College of Pacific on January 28 at Reno. Nevada was capable of hitting the basket but played poor ball. The Pacific team was equally as bad and could not hit the basket, losing the game by a score of 52 to 12.

The following week the St. Ignatius team came to Reno. They too were defeated but not by so large a score as the Pacific team. The game was ragged and marked by considerable fouling on both sides. In both games Savage was the big point getter. The final score was 31 to 13.

The team left are a week's trip to the lack of suitable material from which to build teams.

From what has already been said it seems that Nevada should enjoy more success in athletics in the coming year than in the past. There will be available at least a nucleus of veterans for each team and means of getting out enough additional material to work on. Coach Whisman should begin to reap the rewards for this year's work and show a larger balance of success. Physical training and athletics will be put in an organized and stable condition by the proposed physical training classes. Certainly the outlook is for a better year than Nevada has just gone through, but a lesson has been learned in the premature counting of chickens, especially in such unsettled times as the

The 1916 football season opened early in September and there was considerable speculation on the possibilities of the season. A few of the old guard were back and Coach Whisman had arrived and was making himself known to the fellows. On the whole, things looked promising but very uncertain.

The first practice game was called on September 6 and thirty men showed up for training. Many of the new men were freshmen and showed considerable ability but had no experience and were therefore of little use as first string material.

string material.

The team played its first game on September 21 with the Carson Indians

The team played its first game on september 21 with the Carson Indians at Reno. The varsity had no trouble in walloping the redskins, whitewashing them by a score of 50 to 0. During the game the team showed up well in tackling and offensive work and gave a more hopeful outlook for the season. Later developments showed that the Indians were no team to judge by.

McKenzie, Reed, Coach Whisman St. Mary's College came to Reno on September 28. The visitors copped the game by a score of 41 to 0. The Nevada men played well but were outweighed and lacked experience. During the third and most of the fourth quarters no score was made and at this time both sides put up an exhibition of real

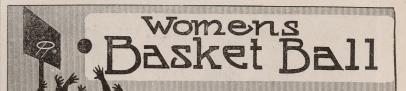

ball. For Nevada this was the best game of the season. On October 18 the team went to Berkeley to meet the California frosh. This game was another whitewash for Nevada and one which was not easy to take. The Nevada line worked well and was capable of handling their opponents but the game was lost by costly fumbles and loose playing. The final

ents but the game was lost by costly fumbles and loose playing. The final score was 60 to 0.

The freshmen came to Reno for a return game on October 27. The game was largely a repetition of the first one, the score being a little smaller. Both teams entered the game with the idea that the chances for a victory lay with Nevada but the thought was soon dispelled. Nevada started to fumble early in the game and continued to do so throughout the game. At no time during the game was the Cub's goal in danger, the Nevada backs being apparently unable to break away for any kind of a gain. The final score was 50 to 0.

The season throughout was disastrous for Nevada. Most of the available men were unseasoned to the game and the few veterans who were at hand could not hold the team together. A limited few excellent men were developed, and on these men lie Nevada's hopes for the coming season.

Quarter—Ascher, McKenzie, Mar tin. Halfbacks—Martin, Young, A. Reed, E. Reed. Fullback—Melarkey, Young, Ed. Reed. Center—Kimmel, Fairchild. Left End—Stever, Melarkey. Left Tackle — Fairchild, Morgan. Left Guard—Patterson, Boyle. Right Guard—Jensen, Summerfield, Bryan. Right Tackle—Malone, Boyle, Bryan. Right End—Dennis, Layman, Malone.

Women's basketball is another sport at which Nevada usually shines. The co-ed teams have met the best on the coast and are as a rule successful.

Coach Whisman issued the first call for women's basketball practice on November 13. Thirty-two girls reported for work, including several members of last year's varsity squad. They made good progress, and by the opening of the second semester practice games were scheduled, but the first real trial did not come until the coast trip.

Early in the second semester games were scheduled with the College of Pacific, Stanford and Mills. Nevada has played all three before, Pacific and Stanford being the regular rivals. All three games were to be played in one week-end trip, which necessarily meant a hard schedule.

The College of Pacific was played on February 14. In a slow game, marked by continual fouling, the Pacific team defeated Nevada by the score of 35 to 18. The first half of the game was nearly even, Pacific having a shade the better of it. In the second period Tidmarsh, a Pacific star, made eighteen points while Nevada secured only eight.

The following day the team played at Stanford. Like the Pacific game, Nevada held her own the first half but slowed down during the second. Stanford also pinned her faith on one tall forward who brought home the bacon. This game was the best of the series and the defeat was easier to take, as Stanford had a good team and the game was fast. The final score was 23 to 7. The final game was played at Mills on February 16. Mills placed a good team on the floor, and in addition to this Nevada was not playing up to form. Through the efforts of Fuss, Nevada finished the first half in the lead. The second period, however, went against Nevada, Mills scoring eighteen points to three. The game ended with the score at 28 to 18.

Although the series was disastrous for Nevada, there is reason to expect better results in the coming season. The team is potentially strong and nearly every member will return next year and the team will then have a

The lineup was as follows: Gladys Dunkle and Edna Clausen, centers; Helen Fuss and Rose Harris, forwards; Salome Riley and Isabelle Slavin, guards; Lavina Shields, Lois Kimmel, Hallie Organ, Hulda Shartel and Ruth Billinghurst, substitutes.

Last September the members and officers of the Young Women's Christian Association reunited, embued with To belong to the Block N Society is considered the highest honor that the athlete can win at Nevada. The Block N Society is an honor society with only one requirement, and that is proficiency in athletics. The big letter is granted to men filling the requirements in the major sports of football, basketball, baseball, and track, and anyone receiving his letter automatically becomes a member of Block N Society.

As the new provisions of the Society is an honor society with only one requirement, and that is proficiency in athletics. The big letter is granted to men filling the requirements in the major sports of football, basketball, haseball, and track, and anyone receiving his letter automatically becomes a member of Block N Society.

As the new provisions of the Society is an honor society with the light of that same purpose in their eyes. They had come into contact with the leaders of the National Association, and for the first time perhaps realized how tremendous was the program of the world association for carrying relief, help, and comfort to men and women here and "over there."

The local association, however small a cog in this contact with the leaders of the National Association, and for the first time perhaps realized how tremendous was the program of the world association for carrying relief, help, and comfort to men and women here and "over there."

and anyone receiving his letter automatically becomes a member of Block N Society.

As the new provisions of the A. S. U. N. constitution read, letters are granted to men who have played at least one-half of the season's games in football, including the "big game," or one-half the scheduled games in basketball, including two big games, or participated in two-thirds of the innings played in baseball, or have won a first place in a dual track meet or

nings played in baseball, or have won a first place in a dual track meet or one point in the big five-cornered meet. These new amendments make the requirements harder to fulfill.

There are now ten members of the society who have earned their letters and are now in school. They are: Kimmel, Melarkey, Patterson, Stickney, Bryan, Martin, Cessna, O'Brien, Waite, Lattin.

The officers for this year are: Kimmel, minds of the year the membership was recruited to the number of 104. The freshmen, as well as the old timers, caught the spirit of "help the other fellow," and proceeds from the Social Service Tea enabled the association to bring comfort and cheer to six families in this city.

To stay at home and do the commonplace was hard, and fostered a restlessness on the common that the found in the point of the year the membership was recruited to the number of 104. The freshmen, as well as the old timers, caught the spirit of "help the other fellow," and proceeds from the Social Service Tea enabled the association to bring comfort and cheer to six families in this city.

waite, Lattin.
The officers for this year are: Kimmel, President; Bryan, Treasurer; Martin, Scretary; Cessna, Vice-President.

monplace was hard, and fostered a restlessness on the campus that found a safety valve in the Student Friendship War Fund campaign, launched under the auspices of the North American Student Association. One-fifth of that wonderful and sacrificial gift from the students and faculty of the University of Nevada has been turned over to the Y. W. C. A. to make possible the splendid and ever increasing part the women of America are having and will have in the winning of the world. world.

world.

To help rebuild the world in which there will be a democracy founded on the principles of Jesus Christ is the aim and vision of the young women students who have enlisted in the study of the "New World Democracy."

The officers who have been the guiding lights of the organization are: President, Georgia C. Damm; Vice-President, Evelyn La Kamp; Secretary, Magdalena Bertschy; Treasurer, Mary Browder.

AGRICULTURAL SOCIETY

The opening of school in September, 1917, saw the Agricultural Club with an enrollment of not over a dozen members; the rest, some eighty per cent all told, were either in the army or navy. At the first regular meeting it was decided to take in the Domestic Science girls as active members of the organization.

After their entrance into the club, officers were elected. As it had been the custom in previous years to give a dance it was decided, owing to the lack of members, to make the affair this year much smaller. The dance was held at the President's residence in the data of in the smaller. instead of in the gymnasium as for merly.

Nothing outside of the general run of business was attempted until the latter part of the second semester. Then the biggest proposition in which the Agricultural Club has ever been asked to co-operate was suggested by Door Knight at a little informal gath. asked to co-operate was suggested by Dean Knight at a little informal gathering at his home. This was the task of helping in the instruction of some eighty high school boys and girls in practical agriculture, home economics and handling and care of tractors. From the results it can be seen that the alpha progradless of its small entered to the company of the the compa and it hopes to make out of every boy and girl enrolled in the course a trained person fit to go out into the field this summer, helping the farmers to increase their crop yield and aiding the housekeepers in a more vigorous food conservation. In this way it is indirectly aiding the allies in the war for democracy.

Elmer Knight is the president of the Agricultural Club and Gertrude Webb is secretary-treasurer.

A. S. U. N.

S. U. N. EXECUTIVE COMMITTEE

The Associated Students of the University of Nevada is an association organized for the purpose of furthering athletic and all other intercollegiate relations of the University. It also provides for and directs student activities on the campus. The dues of the association are five dollars a semester or ten dollars a year. This sum pays for a subscription to the Sagebrush and the class dues of each individual. It also provides a budget for the Women's

League.

The end of this year finds the A. S. U. N. out of debt with the slate clean to start the coming year. This financial independence is due in part to success in raising six hundred dollars at Belle Isle last spring, when the student body, generously aided by the Alumni Association, gave a carnival in which every society on the Hill took part. It is to be hoped that the affair may be repeated to receive in the results in the results are received in the results are received.

at regular intervals, perhaps every two years.

In common with every organization comprised largely of men, the A. S. U. N. has been greatly depleted in numbers. It has given many students to the army and navy, with pride in its ability to furnish so large a proportion of its total enrollment. Two presidents, Rufus Ogilvie and Frank Harriman, have entered the army. Wm. Shearer, vice-president, has gone into the navy. The list is long, and of the two hundred and nineteen stars on the University Service Flag a large part represent men enrolled the last year or two as

students.
Officers: Clinton V. Melarkey, President; Adele Norcross, Secretary; William Stickney, Treasurer; Hulda Shartel, Women's Athletic Manager; Chas. Gooding, Athletic Manager; Ira Redfern, Junior Representative; Tom Jones, Sophomore Representative.

the club, regardless of its small en-rollment, exerted itself to the utmost, SOCIETY MATH SOCIETY

During the past few years there has been a decided tendency in educational circles to underrate the importance of mathematics in high school and college curriculums. To counteract this tendency and to create a more lively interest in the subjects of higher mathematics the Mathematics Club was organized three years ago, was later reorganized as the Importance of those students interested in the art of argument. Prof. Turner is the director and coach of the society, and it is largely through his capable leadership that the Clionia has maintained intercollegiate debating.

Two debates were arranged for and entered into this year, but the Nevada later reorganized as the Importance of those students interested in the art of argument. Prof. Turner is the director and coach of the society, and it is largely through his capable leadership that the Clionia has maintained intercollegiate debating. was organized three years ago, was later reorganized as the Junior-Senior mathematical honor society under the name of Mu Alpha Nu and is now one of the flourishing organizations on the campus.

was organized three years ago, was entered into this year, but the Yevatta team was unsuccessful in both in obtaining the decision. In April Brigham Young College sent a team to Reno to debate the following proposition: "Resolved, that the United States should the campus."

During the present year the meetings have been planned to include social as well as mathematical activities. This spring, for the first time, the society will issue its annual publication, the "Polyhedran," a mathematical bulletin to be sent to the various high schools in the state with the purpose of making high school mathematical instruction more efficient and of least response to the the purpose of making high school mathematical instruction more efficient and of least response to debate with College of the pacific upon the negative side of the question "Resolved that the United States should adopt compulsory arbitration in all labor disputes, constitutionality conceded." A two-to-one decision was lost to Nevada. Stephens and Pargellis represented Nevada on the negative side.

The next week the same team of Stephens and Pargellis journeyed to San Jose to debate with College of the Pacific upon the negative side of the guestion "Resolved that the United States should adopt compulsory arbitration in all labor disputes, constitutionality conceded." side.

The next week the same team of Stephens and Pargellis journeyed to San Jose to debate with College of the Pacific upon the negative side of the question, "Resolved, that the proposed senate amendment to the war revenue bill, commonly known as the 'conscription of wealth,' whereby it was proposed to raise the bulk of war revenue by the taxation of war profits, would be the best solution of the problem of war finance." The opinion of the judges gave the best of the argument to Pacific.

VARSITY DEBATING TEAM Pargellis Stephens

W. L. U. N.

The Women's League of the University of Nevada owes its first start to the former Dean of Women, Miss Louise Fargo Brown. Familiar with such organizations in many well-known colleges, she believed that the existence of a Women's League at the University of Nevada would be a benefit to the women students, enabling them to enter more intelligently into student life and activities. In the spring of 1917 a group of senior girls met and drew up a constitution for the league, which was adopted at a meeting of all the women of the University. Just before the close of the

meeting of all the women of the University. Just before the close of the semester, officers were elected in accordance with the provisions of the constitution. There was no more time to accomplish anything in that semester.

Early in the month of September Miss Mack, the new Dean of Women, called a meeting of the women and it was decided to continue the league in spite of many attending difficulties. Since that time the organization has grown slowly but steadily, and in a year or two it will be a powerful factor in campus life. If the war congrown slowly but steadily, and in a year or two it will be a powerful factor in campus life. If the war continues the women of the college will be called more and more to fill the positions that men are now occupying. The Women's League plans, with the aid of the administration, to help the women find suitable nositions. This women find suitable positions. This will be particularly for those women will be particularly for those women, graduates and undergraduates, who do not wish to teach, since this phase of employment is already taken care of by the Education Department. Heretofore the girls entering the University have almost exclusively prepared themselves for teachers, but the constantly widening field of occupations for women has made it necessitions for women has made it necessities and women has made it necessities and women has made it necessities where we would necessities and which we will necessities and women has made it necessities and which we will necessitie the hand which women has made it necessities and which we will necessitie the women has made it necessities and which we will necessitie the women has made it necessitie tions for women has made it necessary that University of Nevada women enter other fields and the Women's League plans to aid in this work

Besides the planning of greater things the league has made itself felt in concrete ways on the campus this past year. Under the direction of Miss Mack, stars were sewed on the Service Flag. All members of the league sent candy at Christmas to Newydron in the service sided in the reague sent candy at Christinas to Nevada men in the service, aided in the sale of War Savings Stamps and Liberty Bonds, gave their services in making sandwiches and selling "hot dogs" when required, knitted and made bandages for the Red Cross, and in many little ways did the things which bandages for the Red Cross, and in many little ways did the things which women do in times of war without getting or wanting a great deal of appreciation, happy in the accomplish-ment of little things well done. Officers: Myrtle Cameron, Presi-dent; Rose Harris, Secretary; Mar-garet Drumm, Treasurer.

ENGINEERING SOCIETY

The Engineers' Club was completely reorganized at the beginning of the semester, and with new life it has gone far in its work. Meetings are held every two weeks and a talk on engineering lines is made by either on engineering interests make by either a visiting engineer or by a member of the club. The membership includes all engineering students and faculty, now numbering well over forty.

On the sixteenth of March the engi-On the sixteenth of March the engineers celebrated their annual Engineers' Day. During the afternoon all the engineering laboratories were opened for general inspection. After visitors had gone through the buildings the engineers played the aggie basketball team to a standstill and established their supremacy. A later date saw the aggies again go down to defeat in a hard-fought baseball game. defeat in a hard-fought baseball game. The club has done much good work

throughout the year, but much more can be expected of it in time to come. The officers, who have done all in their power to keep the club activities up to standard, are: William Holcomb, President; Harry Day, Vice-President; Tom Jones, Secretary; and Reid Corbett Traceurer bett, Treasurer.

= HONOR FRATERNITIES AND MILITARY

PHI KAPPA PHI

The Phi Kappa Phi is a national honor society composed of graduate and undergraduate members. The Nevada chapter was founded May 4, 1912, with nineteen charter members. Its prime object is to emphasize scholarship in the thoughts of college students, to hold fast to the original purpose for which institutions of learning were founded, and to stimulate mental achievement by the prize of membership.

The qualifications are very rigid for membership. The student must be excellent in scholarship, ranking with the first one-fourth of the class. The committee also weighs the character, ability, and leadership in worthy college activities, thus holding the society to a very high membership.

In 1913, fifty-eight members were taken in; in 1914, five; 1915, eight; 1916, nine. Since 1912 eighty-five members have been taken in.

The following students were elected to membership this year: Magdalena Bertschy, Faith Maris, Elizabeth Bailey, Stanley Pargellis, Alice Hobbins, and Myrtle Cameron. All are registered in Arts and Science and will receive B. A. degrees.

MILITARY DEPARTMENT

By Major Ryan, Commander of Cadets

The system of military training introduced in our land grant colleges shortly after the close of the civil war, and very recently extended to other colleges and universities throughout the country, has for its purpose the creation and maintenance of a body of educated young men which would furnish in great measure the officers required to train and lead the large forces of citizen soldiers that it might be necessary to assemble in time of national citizen soldiers that it might be necessary to assemble in time of national

danger.

That time is now upon us, and the past year has shown the wisdom of our legislators in making provision for this need, and also the value of this training as a military asset to the nation.

The young men who have received military instruction at college during the past ten years are furnishing a large percentage of the junior officers for the great national army which we are now assembling, and this source of supply has been of such value that the War Department is making every effort to stimulate and increase it. Several of our leading universities have become veritable military academies and every encouragement and assistance is given to the student who wishes to equip himself for the duties of an officer.

More than two hundred stars in the Service Flag bear witness that the University of Nevada is doing its share in this work. A number of its former students are now holding commissions in the army and many more are at present receiving special training at the national cantonments to qualify them for commissioned rank.

present receiving special training at the national cantonments to quarity them for commissioned rank.

More than one-third of those who enrolled in the cadet battalion at the beginning of the year have joined the colors and are now in military service. All of those who held commissions as cadet officers have been selected for the officers training camps and will soon exchange the metal disk of cadet rank for the gold and silver bars of the full-fledged officer.

During the year special courses have been conducted in government business methods for those wishing to enter the Quartermaster Department of the army; in wireless telegraphy and the gas engine for those seeking service in the signal corps or aviation section, and in military French for all who were subject to military service.

the signal corps or aviation section, and in military French for all who were subject to military service.

Military drill will be a feature of the special course of instruction to be conducted during April for the students of the primary and high schools who will be assembled at the University for training in farm work, and also for the enlisted men who will probably be stationed at the University from May to October for instruction in shop work.

Owing to the tremendous demand on our national resources to provide the clothing and equipment necessary for the vast army now being gathered throughout the country it has not been practicable for the War Department to provide the uniforms and other equipment for the infantry unit of the Reserve Officers' Training Corps established at the University in September, 1916. This has been a serious handicap to the Military Department, but there is good reason to hope that the coming year will find the training unit completely equipped and that the services of its former members in this war will prove a lasting inspiration for future cadets of the University of Nevada.

DELTA ALPHA EPSILON

Delta Alpha Epsilon is an honorary organization which admits upper-class women who are completing majors and minors in the English department with a scholastic standing of eighty-five per cent or more. Dr. H. W. Hill is faculty advisor, and through his interest and help the society is greatly bene-fited. The organization plans to produce two plays during each school year with the idea of developing histrionic talent among the women of the Univer-sity. One of these plays is to be an Elizabethan drama and the other is to be the production of a modern dramatist. The masculine parts are taken by the members of the society and they have proved that this feat may be done sucmembers of the society and they have proved that this feat may be done suc-

The war, with its many attendant "benefits" and financial drains, has had its effect on Delta Alpha Epsilon as on other organizations. The first semester of the present year was felt to be too unsettled to attempt the staging of a play. Several plays by Ibsen and Shaw were read and studied, however, and early in the second semester the society decided on the Irish play, "Riders to the Sea," by J. M. Synge, to be given at the Century Club April 12. "The Twelve Pound Look," by J. M. Barrie, was later decided on, to be given at the Majestic theatre the 23rd and 24th of April as a benefit for the Senior Class.

ODE ON THE DEATH OF AN INSECT

He died a noble death-he did-That animal so small! He was a hero. Sad to say, He knew it not at all!

He was a fly in winter time Who had survived the frost, And through the snow and chilly wind His gauzy wings had tossed.

He flew around the room tonight: He buzzed and buzzed again.
I cussed that fly beneath my breathI cussed again—and then—

I straightway lifted up my hand And swore to kill that fly. The college paper—Kimmel's best— Was in repose nearby.

I used the "Sagebrush" for a bat.
I sing, as victors should,
My tribute to a murdered fly—
He did the best he could! —A. A., '20.

SAD, ISN'T IT?

Mary is little and pretty; She had beau-catching smiles before But these smiles affect no longer The best, who have gone to war.

For Bill had to join the army, And Harold the naval reserve, And Tom in the aviation His country is trying to serve.

Jim Williams had feet that were crooked,

And a funny cough when he laughed, So he filed a claim for exemption And beat the selective draft.

And now he is going with Mary,
And Mary is going with him,
And I guess when he gets some money
That Mary will marry Jim!
—A. A., '20.

Our idea of anti-climax is to wait half an hour to get into our dear Stephen' Gow House and, on reach-ing the promised land, to be confronted with one hot dog and a boiled onion as the lnnch feature.

You and Your Girl Will Like It

ALWAYS A NIFTY SHOW

PRICES 10, 20 and 30 Cents

The Majestic theater presents Douglas Fairbanks in his greatest speed picture, "American Aristocracy," Friday and Saturday of this week. As all Fairbanks patrons know Douglas never walks when he can run, never present agents when he can run, never present agents when he can run, rever enters a gate when he can vault a fence, never uses a pair of stairs when he can scale a balcony or utilize a fire fence, never uses a pair of stairs when he can scale a balcony or utilize a fire escape when there is a rope he can climb to the top of a building, all these amusing mannerisms are allowed full play in American Aristocracy. Smuggling war material into Mexico is the foundation upon which the story is based, and with Jewel Carmen in support, most sensational episodes of daring and comedy situations are enacted in the five acts.

Me and My Dog is the rather amusing title of the Bruce Educational picture and Cupid's Camouflage, the Christie comedy.

Rose and Gilson comedians who tell comedy lies, Lillian De Croix, the personality girl, and Toki Murata, Japanese acrobat, complete an exceptionally varied vaudeville program.

Sunday the vaudeville headline is the Norris Baboons ,a most interesting and astounding brute intelligence act, with Jack Livingston in the feature picture, "The Man Above the Law."

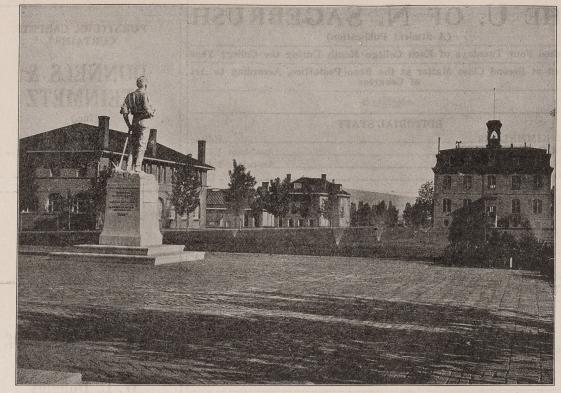

Wednesday next week, begins a four

Law."

Wednesday next week, begins a four weeks showing in episode form of the official Italian war pictures, two and a half reels each Wednesday and Thursday for four weeks, pictures taken by the Italian government and now showing in the beautiful Rivoli Theater, on Broadway, New York.

Alice Joyce heads the story section next Wednesday in "Song of the Soul."

THE CAMPUS

TO THE POINT

"Hello! How're you?" "Juslik the bottom of the fire." "Howzat?" "Grate; and how're you?" "Oh, juslik a nutmeg—grater. But, say, there's a lil dance here Fri. nite." "Oh, juslik a legal sentence." "Howzat?" "Fine." "Yes; a fine of 75c and a term of two hours' imprisonment. But, the point is, do we go?" "Yes, I guess so." "That's juslik my pencils." "Howzat?" "All write." "Oh, now, don't take me too seriously." (Revengefully) "Aw, I wouldn't take you at all." (Curtain.)

Hill all your glasses full today With milk or grape juice mild, And in the good, old-fashioned way Pledge those who went, but smiled. Fill all your glasses full tonight With water from the well, And pledge yourself to help 'em fight 'Till Kaiser Bill's in hell!

Here's to our teachers—the profs and the deans! Oh, may they be working ly) "Aw, (Curtain.)

"I was outspoken in my sentiments at the club this afternoon," said Mrs. Garrulous to her husband the other evening. With a look of astonishment, he replied: "I can't believe it, my dear! Who outspoke you?"

On, may they be working In jumpers and jeans! In jumpers and jeans! And forget all their brains And not even have sense To come in when it rains!

"I simply can't stand the toot of an automobile horn. "How's that?"

"A fellow eloped with my wife and every time I hear a horn toot I think he is bringing her back.

She said "I can't be all of these,
So you must lilac everything.

TO -

Oh, Worthy Dean, Rave on for aye! You needs must rave To earn your pay.

Let not your tongue Get twisted, man, But use the Biggest Words you can.

Oh, Noble Dean, How much you know! Explain it to us Here below.

Have you noticed the contest now on between Harvey and Ralph for the favors of a certain young lady? She is the belle of Gardnerville, and the contest has become quite warm. We hope that Agnes has sufficient control of the young man to provent them.

ignation a certain high school young lady. As he was unable to keep his standard in the club and with the other sex at the same time,, Reid chose

IMPORTANT CHANGE IN THE FACULTY

There is to be quite a change in the faculty next year. Prof. Dutch Kimmel, Dean of Astronomy,' has handed in his resignation, to take effect May 8th.

the position.

Prof. Peart has been instructing in the advance courses of campustry. Owing to the capability of Prof. Peart, he will also meet all of his campustry classes. The popularity of these courses has necessitated several new instructors. We extend a most hardy welcome to Profs. Jones, Cahlan and Cessna. Cessna.

The following have also been appointed as student-instructors: Lattin, Benson, Bowen and Harker.

Dean Peart announces that his courses are to be very practical; most of the work will be laboratory. His office is to be in Manzanita, as he thinks that will be most convenient.

MILITARY STRATEGY.

Did he moan and sigh? Did he set an' cry
An' cuss the hurricane sweepin' by?
Did he grieve that his old friends failed to call?
When the earthquake come and swallered all?
Not him! He climbed on top o' the hill,
Whar standin' room wuz left him.

MILITARY STRATEGY.

The training in the military camps has certainly made great strategists of some of the boys sent down from Nevada. This is more than apparent on the campus these days when a half dozen or so men from the R. O. T. C. can be seen practicing their art upon the young ladies. It is even more apparent when the home guard attempts to horn in and finds that he does'nt know enough strategy to keep on even terms. In that case an orderly retreat

AUCTION SALE

The auction sale at Manzanita Hall last week was a great success enabling the girls to dispose of a considerable amount of odds and ends of wearing apparel and at the same time gathering in a neat amount of money for a Belgian baby. From all reports there was quite a variety of goods to pick from and some girls laid in a years supply of clothing at about forty

SUCH DELICIOUS ODORS

contest has become quite warm. We hope that Agnes has sufficient control over the young men to prevent them from coming to blows. Up and at 'em, boys, and may the best man win!

At the last meeting of the Bachelors' Club the resignation of Reid Corbett was unanimously accepted. Mr. Corbett gave as the reason of his resignation a certain high school young

PREPARE!

If 100 lbs. of Nitrate were put on every acre of Wheat in United States, our Wheat Crop would be increased 300,000,000 bushels.

Why not use 100 lbs. on your acre and help feed our armies?

> For correct information on Wheat and other crops, address

DOVE Sold In Reno

PALACE

Goods House

Aside from their beauty it is true economy to buy our "Dove" Undermuslins, because they are so carefully made and of such good materials that they wear exceptionally

You'll find the prices surprisingly reasonable.

Every open arm-hole in a "Dove" garment has an extra shield sown in as a reinforcement, a feature which insures much longer wear.

We offer this splendid assortment of new "Dove" styles with the confidence that our customers will find in them the daintiest and most serviceable of undermuslins.
