

## S. A. T. C. GOES OVER TOP IN BOND SUBSCRIPTION

### MILITARY QUARANTINE PLACED OVER CAMPUS

MILITARY GUARD SURROUNDS THE CAMPUS FRIDAY NOON AND PASSES ARE REQUIRED FOR EXIT OR ENTRANCE

### PRECAUTIONS TAKEN TO PREVENT DISEASE

DOWNTOWN STUDENTS MOVE ON CAMPUS, PROFESSORS MAY BE QUARANTINED ALSO

The University received a decided thrill last Thursday afternoon when the news came out that in less than twenty-four hours the campus would be put under strict quarantine for Spanish influenza. The quarantine went into effect on Friday noon and at that hour a military guard was placed about the campus. Those students who could move onto the campus were allowed to remain and attend classes but those who could not make such arrangements have been forced to stay away.

Thursday evening was a time of decided activity. Though movies were forbidden everyone took a last look at the village and laid in a stock of necessities needed to pass through the hard winter approaching. Manzanita opened its doors to girls who live about town. This addition brought Miss Mack's family up to the largest size that it has ever been. There are now eighty women in the Manzanita tribe. The few remaining men students not in the S. A. T. C. also moved on the "Hill." Some are quartered in the Aggie building with Section A of the S. A. T. C. and the rest are in the training quarters. Those men in the Aggie building are under partial military discipline. There are fifteen so quartered.

As yet the members of the University faculty and staff of employes are allowed to go and come on pass. Such persons are urged to give heed to and

### RED CROSS INSTALLED ON THE CAMPUS

The University Girls Are to Make Pajamas

Red Cross work will be started on the campus immediately under the auspices of the Women's League with Miss Kate Riegelhuth as director and inspector of work. The government has sent out an urgent call for pajamas and Reno is to furnish five hundred by the middle of November. The Red Cross work on the campus will be in the old "recreation" room at Manzanita Hall and every girl is requested to do her share of the work. The making of pajamas is the simplest kind of sewing, and no girl can give the excuse that she can not do the work. The president of the Women's League has appointed a committee of girls to see every girl on the campus and sign each girl up for at least two hours of sewing. Since Germany's peace terms have been refused it is up to everybody to get in and dig now as never before and although making pajamas seems prosaic and unromantic work, it has to be done so let every girl sign up at least two and possible three or four hours to be regularly devoted to Red Cross.

### QUARANTINE MAY BE LIFTED WEDNESDAY

If there are no new developments in the Spanish influenza epidemic the quarantine will be raised from the campus Wednesday morning. This information will be greeted with joy by the students who have found five days of confinement on the campus rather irksome. The students who have been forced to discontinue classes will also be glad to continue their class work. Although the quarantine may be raised everyone is urged to be as careful as possible in helping to prevent the spread of the disease, for the danger is not all over.

### SECTION A SUBSCRIBES \$7,350 IN BONDS

Collegiate Men Pledge Heavily to the Fourth Liberty Loan and Take Out Maximum Insurance

An example of true patriotic spirit on the part of the collegiate section was displayed yesterday when Division A, S. A. T. C. unit, went over the top with a subscription of \$7350 to the Fourth Liberty Loan.

Shortly after the town whistles had ceased their defiant refusal to Germany's request for an armistice every man in Section A lined up in front of the orderly room in the provisional barracks and made his subscription. Seventy-five men subscribed to the total, making the collegiate section a 100 per cent plus organization.

The enthusiastic and purely voluntary way in which the men pledged from their none too ample allowance is a splendid example for the University as a whole.

Another instance of credit to the collegiate section was the application of every man inducted into Division A for the limit, (\$10,000), in U. S. government insurance. The seventy-one men who entered this section on Oct. first signed up Saturday for \$710,000 in insurance.

The value of this protection is realized by all thinking people. It is a guarantee for the aid and protection of parents, brothers and sisters as well as other close relatives in event of death. It is a big protection to the soldier, the fighting man, enabling him if he should be permanently and totally disabled to live the rest of his life in an independent, comfortable way. He is not compelled to rely upon relief institutions or charity for his maintenance. One of the greatest jeopardies to the morale of the fighting man of the past was the fear of disability which would make him a burden to his relatives and society. The U. S. government insurance does away with all this.

An additional important feature is that the policy can be converted after the war into any kind of insurance desired. This provision is invaluable to a man who could not pass physical examination for life insurance in a regular company after the war, for it will still be a government insurance handled by Uncle Sam.

### PROF. SCRUGHAM IS PROMOTED

Former Dean of Engineers is Made a Lieutenant Colonel

James G. Scrugham, former Dean of the College of Engineering, has just been promoted to the rank of lieutenant colonel in the ordnance department.

Prof. Scrugham left the University on leave of absence two years ago to become state engineer; after serving a year in that position he enlisted and was given a major's commission. He was placed in the carriage section of the department and since his promotion has been on the artillery board. Lieutenant Colonel Scrugham was one of four majors out of two hundred in his department to receive a promotion.

### HARRY DAY IN LINE FOR COMMISSION

Word has been received of Harry Day to the effect that he may soon be on the list of commissioned officers from Nevada. Day is acting company commander of a hundred and fifteen men, which corresponds to the position of captain in the army. Harry is remembered as one of the popular Seniors of last year and as president of his class. He is stationed at San Pedro, Cal.

A man who won't lend is the Kaiser's friend.

### S. A. T. C. IS NOW FULLY INSTALLED ON CAMPUS

SECTION B MEN LEAVE MONDAY NIGHT, PART SENT EAST AND PART SENT WEST

### COLLEGIATE MEN GO INTO LINCOLN HALL

ONE HUNDRED MEN FROM CALIFORNIA AND ONE HUNDRED FROM NEVADA TAKE OVER NEW BARRACKS

The S. A. T. C. is now become almost an institution on the campus. In two short weeks the Student's Army Training Corps has been systematized and the men are being rapidly whipped into shape by the officers in command. The uniforms have not yet arrived but they are expected any day and when the men of Section A are clothed according to military regulations they will begin to have the appearance of real soldiers. At present they are learning the rudiments of drill and military etiquette. The different groups march to their classes and the instructors are required to have each man stand at attention to recite and also to insist on plain well-enunciated speech in class, as a part of the military procedure.

Last night the hundred men of Section B, formerly of the second Training Detachment, were sent away after a ten weeks' course in technical training. The detail that has been sent to the Southern Pacific shops in Sparks each day went east and those who have been working on the campus were sent west, presumably to the Presidio. Four or five men were retained to assist in the training of the new Section B men who arrived in Reno this morning. One hundred of these men came from all parts of California and the other hundred came from all parts of Nevada. They are being installed in the new barracks which are now ready for habitation, having been built in a surprisingly short time, considering the scarcity of materials and labor. The Section B men will be given courses similar to those given the two preceding training detachments, part of the men being trained on the campus in

technical work and the rest sent to Sparks. These men will now eat in their own mess hall and this will somewhat relieve the congestion in the University dining hall, which will now accommodate only the regular students and the Section A men.

Section A has been quartered in the basement of the Agricultural building for the last two weeks but it will now move into Lincoln Hall. Many of the men in the collegiate section have lived in the hall as civilians so most of them will be at home immediately in the new quarters. Lincoln Hall will be kept in strictly military order, however. The many pennants, pictures and decorations of the old student days will not be seen under the new regime.

Monday the Section A men had their first taste of guarding. The "B" men have been guarding the campus since it was put under quarantine but on their departure the younger men manfully took their posts at 8 o'clock in the rain in spite of the fact that their overcoats had not yet arrived, determined not to be found wanting in the slightest detail.

The collegiate section men were given their first three "shots" last Saturday afternoon and although some were rather under the weather for a few hours the company stood them very well on the whole, as there are no men sick in the infirmary as a result of the inoculations.

Every precaution is being taken to guard against the Spanish influenza and there are no cases where there are even any symptoms of the disease on the campus so far, either among the students or soldiers.

### DR. HASEMAN ADDRESSES SCIENCE CLUB

The first talk to be given before the Faculty Science Club this year was presented by Dr. Haseman last Tuesday. The subject of the talk was "The Modern Airplane," and Dr. Haseman established the fact that the word is properly spelled a-i-r and not a-e-r-o-plane.

Some of the more interesting points were concerned with the lifting power of the various types of wings, the stream-line effects of the different parts and various propellers.

The lifting power of the wings is a component of the curve from back to front. The greater this curve the greater is the lifting power of the wing but there is a corresponding reduction of speed. In high speed machines the curve is almost flat. There are also the three types of machines, mono, bi and tri-planes. The monoplane has proven the most efficient because in the case of the other two types the wind eddies of one plane disturb the operation of the plane above or below it. Regardless of this fact the biplane is coming into more general use because its construction is stronger. With the monoplane the difficulty lies in bracing the planes. To offset this disadvantage the wooden braces are made in stream-line shape and even wire braces are sometimes made in this shape.

The propellers in front are called "pullers" and those in the rear are called "pushers."

In learning to fly it is not necessary for the students to be taught any math higher than trig. They are not

(Continued on page three)

### STATE MINING SCHOOLS HOLD CONFERENCE

Uniform Curriculum Agreed on by the Principals

The second conference of the directors and principals of the Nevada Secondary Mining Schools was held October 7th and 8th at the Mackay School of Mines. The conference was attended by Director Lincoln, the five principals, four of whom are graduates of the Mackay School of Mines, and several professors of the University, including Professors Haseman, Jones, Young, C. R. Hill and Palmer. President Clark and Deans Adams and Boardman were also present.

The purpose of the meeting was the discussion and adoption of a course of study specifying the length of time and hours for each subject so that a uniform curriculum may be followed by each one of the five schools in the state.

The Nevada Secondary Mining Schools were provided for by a special act of the state legislature and are indirectly under the Board of Regents of the State University. Their main purpose is to prepare mining men to fill special positions around mines, such as surveyors, mine foremen and assayers. The schools have adopted a system of granting certificates to all successful students and these certificates act as recommendations wherever those who receive them may go throughout the state.

The first school was started at Tonopah and was followed shortly by others at Ely, Goldfield and Virginia City. There are now five schools, one being a traveling school which is now at McGill. Each school specializes on the particular kind of mining in its

### THE BOND AND PEACE OFFENSIVES

Germany has again carried the war to America. If not intentionally she has unintentionally done so and stands in a fair way to achieve a most cherished end—the defeat of the Fourth Liberty Loan. This latest peace offensive has come just at the critical moment for our bond offensive. The peace drive is directed squarely at the United States, the only nation floating a loan at this time, the other allied governments being practically left out of the negotiations. If Germany has planned to attempt to get two birds with one stone she has picked the most opportune moment of the whole war. If by trickery she fails to bring about a dishonorable or unstable peace she may hope to cause the failure of the greatest loan in the world's history by making the people think that peace is coming and that there is no further need to subscribe to the loan.

Probably nothing would suit the kaiser better than to be able to tell the German people that America's fourth loan had failed and that America was tired of war and tight with her dollars. Nor would the effect of such news be very stirring to the boys who are fighting the Hun.

To prevent this condition lies with each person individually and there is but one way to do it. **BUY BONDS.** If you can't buy them yourself do what you can to get others to buy. Be a booster. An oversubscribed fourth loan will give the administration and the army the necessary backing to bring about a firm peace and an infirm kaiser.

### MAKE THE BEST OF IT

By the presence of the guards at the gates and entrances to the campus we are reminded that the University is under a military quarantine. How long it will last is unknown, but we do know that it will be indefinite if a case of Spanish influenza breaks out on the campus. In neglecting to observe the precautions given us by Lieutenant Muller we should remember that we are endangering not only ourselves but others who may be less able to resist the disease. The instructions are very simple and should be followed carefully by every person now living on the campus. In the meantime, it might be worse. Little inconveniences and annoyances are trifles and the students are showing a splendid spirit in co-operating with the authorities. It is easy the first few days but if the quarantine should last a month or two the real test will come when the novelty has worn off. The University has never been put under a strict quarantine before, though several years ago the students living on the campus were not allowed to go down town during a short period. We are living through a new college experience, for most of us, at least, and we might as well make it as pleasant an experience as possible.

**SLAVERY**

Dear Lukewarm:

As a part of its work for the Council of Defense, Kampus Kat thinks it best for all concerned that you should be informed of the fact that a friend of yours is in the habit of turning "uncle's" diamond sparkler inside out and her eyes in all directions at the officers' mess. By this camouflage she is breaking the hearts of all our handsome young lieutenants. As these officers are needed to save their country, Kampus Kat respectfully recommends that you give the matter your immediate attention.

Hoping you are the same,  
**KAMPUS KAT.**

Time—Morning after young cadet has taken his departure.

Place—In front of the library.

Two girls—Alice Kincaid and friend.

Friend—"Oh, Alice, do take off your coat and let me see your new frat pin." Alice, blushing—"Oh, I'm just trying to get up the courage. I'm so new at this game."

Two young ladies on the second deck of Manzanita are now engrossed in the study of the "wig-wag" signal system. The instructor holds office hours from eight to ten p. m. in the south end of the Aggie basement, wearing a nobby business suit of white B. V. D.'s. The signals are well understood on the whole, but now and then some little puzzling detail comes up. At present the code is being feverishly perused in an effort to find a translation for the vigorous shaking of a shirt at an open window.

Say, what do you know about it? A certain girl had three chances to go to the dance the other night, but that wasn't enough as she had to go around the hall and tell every other girl about it with the result that the second and third fellow got left altogether when they tried the other girls for dates. We protest against these actions as men are pretty scarce articles these days.

"I want to ged a house to rent," Ikey told the real estate agent.

"All right, my friend, I have just what you want. Nice three-room house; rent, eight dollars; but, understand, there is no bath room in the house."

"Dot makes no difference. We only want it for a year."

**STATE MINING SCHOOLS  
HOLDS CONFERENCE**

(Continued from page one)  
district, the Ely and McGill schools  
specializing on copper mining and the  
Tonopah and Goldfield schools on gold  
and silver.

The attendance of these schools is  
increasing each term. There are now  
twenty-two students at Ely, twenty-  
seven at Goldfield and twenty-seven  
at Tonopah. The Tonopah and Gold-  
field schools have doubled in their at-  
tendance the last year, notwithstand-  
ing the fact that the draft has taken  
a great many students and also pros-  
pective students.

The course which was outlined at  
the conference and which will be fol-  
lowed as closely as possible by all  
five schools consists of the following  
groups of studies: Drafting, survey-  
ing, geology, mineralogy, chemistry,  
assaying and metallurgy. These  
courses will fit men for the positions  
mentioned above and also for the fol-  
lowing position: Timbermen, sampler  
men, draftsmen, prospectors, solution  
men, cyanide mill foremen, cyanide  
metallurgist's assistants, flotation  
foremen and smelter foremen.

The principals of the schools who  
attended the conference are as fol-  
lows: D. T. Smith, Virginia City  
School of Mines; E. R. Bennett, Tono-  
pah School of Mines; G. E. Hoffmann,  
Goldfield School of Mines; W. W. An-  
derson, Ely School of Mines, and V. M.  
Henderson, Traveling School of Mines,  
now at McGill.

**WHEN THE BLUE  
STAR TURNS TO GOLD**

We don't seem to know 'till we've  
lost it  
Just how much a thing is worth.  
And then, when it's gone, we discover  
'Twas the most precious thing on  
earth,  
Something we prized in its newness,  
We prize more when it's grown old.  
And that which we treasured as silver  
We now find is purest gold.

Today you are proudly displaying  
A tiny flag of red and white,  
It is shining in your window  
Through the day and through the  
night.  
And on its white heart is gleaming  
A star of Heaven's own blue;  
A star for your boy who is fighting  
For his country and for you.

Ah, those service flags of crimson,  
How we glory in each star;  
How we love our boys and miss them  
And how proud of them we are.  
And if God in His infinite wisdom  
Should call them back to his fold,  
We will still fly our flag of crimson—  
But the blue star now is gold.

O boys, in the flush of your manhood,  
How you answered that call for  
arms!  
How you came from towns and the  
cities,  
From the vilages and farms.  
How we gloried in your going;  
And we ask dear God to hold  
And to help us if the time comes  
When our blue stars turn to gold

And we send to you this message  
To that land across the foam,  
To tell you how we love you  
And we miss you here at home.  
And we want you to know now and  
always,  
That your name will be ever enrolled  
On our Service Flag of Crimson  
With its blue stars turned to gold.  
—Will M. Cressy.

**HOW TO STRENGTHEN OUR  
PERSONAL DEFENSE AGAINST  
SPANISH INFLUENZA**

1. Avoid crowds and public gather-  
ings—influenza is a crowd disease.
2. Smother your coughs and  
sneezes—cough into your handkerchief  
or hand—this prevents the germs be-  
ing thrown into the air.
3. Breathe through your nose—not  
your mouth.
4. When the air is pure breathe all  
of it you can—breathe deeply.
5. Wash your hands before eating  
—your fate may be in your own hands.
6. Don't use a napkin, towel, spoon,  
fork, glass, or cup which has been  
used by another person and not  
washed in boiling water.
7. Sleep with the windows open.
8. Keep mouth, skin and clothes  
clean.
9. Don't let the waste products of  
digestion accumulate—regulate your  
bowels.

CARL J. MULLER,  
First Lt. Medical Corps U. S. A.

**DR. HASEMAN ADDRESSES  
SCIENCE CLUB**

(Continued from page one)  
required to do any tricks with their  
machines, though it is the "tail-spin,"  
a necessary manoeuvre, that causes the  
most accidents among the cadets.

The next talk will be given to the  
club October 22 by Dean Boardman  
on the topic, "U. S. Explosive Plant  
'C', Nitro, W. Va." The program prom-  
ises to be most interesting this year  
as most of the addresses are based on  
the personal experience of those sched-  
uled to speak.

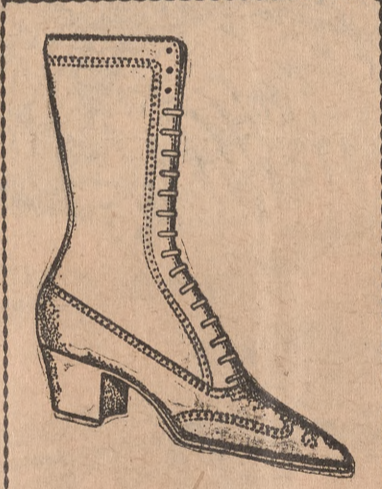

Saturday evening the girls of Man-  
zanita Hall and the boys of Section A  
of the S. A. T. C. enjoyed a most en-  
joyable dance and "sing" at the girls'  
hall. The boys furnished the eats  
which were very good and the girls  
cleared out the parlors and halls for  
dancing. In spite of the too recent  
inoculations everyone had a good time.  
The boys sung and "Dutch" Berning  
gave the different bugle calls. The  
girls put on a clever skit entitled  
"Balled Out." "Call to Quarters"  
came all too early.

**MILLS-COWGILL**

Miss Faith Mills of Fallon and Mr.  
Philip Cowgill of Reno, who was a  
member of the class of 1915, were  
married in Fallon the thirteenth of  
September. The young couple are mak-  
ing their home in Ruth, Nevada, where  
the groom holds a responsible position.

**DR. WILCOX HERE**

Dr. Wilcox of the United States De-  
partment of Labor was on the cam-  
pus last week. The purpose of his  
visit was a conference with President  
Clark, Dean Knight and Director Nor-  
cross of the Extension Department, in  
which the labor problems of Nevada  
were considered.

Never in the history of Manzanita have there been so many girls in the Hall. All day Friday there was a steady stream of girls from the street car to the Hall—all loaded down with blankets, pillows, suit cases, cots, and mattresses—and we might also say, with a good supply of groceries. The residents of Manzanita surely proved their hospitality, throwing open all their doors and stretching the walls as much as possible. In the evening there were the queerest noises that anyone could imagine and Miss Mack now feels confident that her family was comparatively quiet before we were placed under quarantine. The girls from down town are having the time of their lives and are getting a taste of real life in a dormitory. Feeds, shows, parties—in fact everything that goes to make Manzanita one grand place—were put on for the benefit of the new guests and from all indications were immediately appreciated. We are afraid that even after we can once more come and go at will, Miss Mack will have a hard time losing some of her newly acquired family.

Between seven and eight on Friday evening, the girls amused themselves by playing hop-scotch on the walk, drop the handkerchief and many other such games. And let it here be said to the credit of one of the professors that he came up in his car and offered to take some of the girls for a ride. If it had not been for the fact that he was a married man, that the young ladies were under quarantine, and that the professor considered it a good joke his invitation would have been gladly accepted. However, there are days coming in the near future when the big gates will not be guarded and the professor will then be wise to make himself conspicuous by his absence whenever he has his car.

But we're all happy anyway—the gang's all here and we are having one grand time.

213 ENTERTAINS

Those people who were standing around Manzanita on Friday evening saw ice cream, cake and pickles mysteriously entering. Upon tracing it they found its fatal end was in Suite 213, where some twenty girls were all trying to vie with each other in the doing of stunts. When the eats came, silence reigned supreme and only the occasional rattle of a spoon was heard. When all appetites were appeased, the singing, laughing and shouting were renewed until the fear of the "quiet committee" sent them flying off to bed.

Those who indulged were the Misses Katie Rupp, Edna Greenough, Helen Fuss, Theresa Haughney, Ruth Pilkington, Salome Riley, Mildred Griswold, Carmen Rockstead, Jennie Howson, Velma Truett, Lavina Shields, Georgie Money, June Harriman, Emily Burke, Phyllis Brown, Mary Browder, Leila Sloan, Hulda Shartel and Arlein Dalzel.

IMPROMPTU PARTY AT MANZANITA

Monday evening Manzanita Hall entertained at a most delightful impromptu party in honor of the men of Section B of the S. A. T. C. who were to leave for the East at midnight. There was some mention of having a dance but as the time was so short the girls arranged for a jolly-up with music and corn-popping as the chief diversions. The last evening of the men in the detachment was made as pleasant as possible and at ten o'clock the men were bidden God-speed with many real regrets.

Me  
And Bill went  
Down to the  
Picture show  
The other night.  
The orchestra played  
"Over There" and Bill  
Thought it was  
The national anthem.  
Bill stood up  
So did I,  
Darn Bill.

—The Sheridan Reveille.

Smart One: "How much are your four-dollar shoes?"  
Clerk: "Two dollars a foot."

YOUNGER GENERATION VISITS CAMPUS

This past week the campus has been visited by as gay a group of young folk as have been within the University gates for a long time. They were county winners in agricultural extension work who were given a trip to Reno as a reward for faithful work during the past year. They came in from Churchill, Lyon, Ormsby, Douglas, Humboldt and Washoe counties with the club leaders from those counties. They enjoyed trips to the University farm, the Nevada Packing Company, Bower's Mansion, the Model Dairy, and went sight-seeing in Reno and on the campus.

The unfortunate circumstances which imprisoned the college people caused them to leave sooner than they had intended and kept them out of the picture shows, but in spite of these misfortunes they claim to have had a splendid time and it is to be hoped that they will come again some time when there is no threat of influenza.

"Father, what do they mean by gentleman farmers?"

"Gentlemen farmers, my son, are farmers who seldom raise anything except their hats."

He rode a horse with a short tailed coat.

Asilomar is our Y. W. C. A. officers training camp and different girls told about the wonders of this place at the last meeting, October ninth. Ruth La-Kamp told about a day at Asilomar which proved to be a very busy one indeed. Helen Fuss spoke of recreation at Asilomar and her talk made all the girls very anxious to go there and share in the good times. The music at the camp was left to Anne Underwood to tell about and it seemed that everyone must be happy there because there is so much singing. Alice Boynton, who is a "stuck-up" and who spent the summer at Asilomar told about the pleasures of "Stuck-Up Inn" and the joys of busy summers at such a beautiful place.

Doctor: "Did that cure for deafness really help your brother?"

Pat: "Sure enough, he hadn't heard a sound for years, and the day after he took that medicine he heard from a friend in America."

NO "SAGEBRUSH" NEXT WEEK

The Sagebrush will not be issued next week. The A. S. U. N. constitution provides for but four issues in each calendar month. This month has five Tuesdays and the fourth paper will be issued on the last one.

Wife: "Everything is getting higher."

Husband: "Oh, I don't know. There's your opinion of me and my opinion of you, and the neighbors' opinion of both of us."
