THE STUDENT NEWSPAPER OF THE UNIVERSITY OF NEVADA

Vol. XXVIII

UNIVERSITY OF NEVADA—RENO, NEVADA, THURSDAY, SEPTEMBER, 9, 1920

No. 1

Annual Frosh-Soph Scrap on Saturday

Year Promises to be Greatest in History

MANY NEW INSTRUCTORS TAKE THEIR PLACES IN FACULTY. NEW FEDERAL MINE EXPERIMENT STATION EQUIPMENT IS BEING SHIPPED, WITH THE RADIUM EXPERT HARD AT WORK IN THE MACKAY LABORATORIES.

Our best University year has begun. Old students, returning, will note many improvements. The Education Building will soon be completed. Only difficulty in obtaining specialized labor needed for doing the marble and tiling work prevented the completion by the opening day. The three new concrete tennis courts are ready for play. The field north of the tennis courts is being leveled for added open-air drill space for military and physical education work. The new flume receiving the waste flow into the campus lake is now working and soon the ditch around the lake can be drained and filled. Arrangements are completed for the outdoor target range for the cadets. This is to be near the reservoir west of the campus. Both Manzanita and Lincoln halls have been repaired. A cement storage cellar has been put under the hospital and a screened back porch is being added to this building. Some alterations have been made in the gymnasium offices of the staff in physical education and many new lockers for the men in required physical education have been purchased. Two costly new machines have been installed in the Mechanical Department shop and both the departments of Business Administration and of Economics and Sociology have added important equipment. Hundreds of new volumes have been added to the Library.

The old students will miss some well-known instructors. Dean Chas. Knight resigned July first, after many years of effective work in building up the College of Agriculture. He is now the active president of the Reno Chamber of Commerce and in his new capacity he is cooperating splendidly with the University. Just recently he has appointed committees of the Chamber to help secure down-town jobs for University students and to canvas the city of Reno north of the railroad for student-rooming possibilities.

Miss Sears, head of the School of Home Economics, resigned in May. She taught during the summer in the University of California Summer School and may give the coming year to further graduate study in her field.

Professor Goggio, head of the department of Romanic Languages, resigned in August to accept a position in the University of Washington.

Again, the old students will meet a number of new members on the instructing staff. Dean Robert Stewart, formerly head of the Department of Soils Fertility in the University of Illinois, since July has had charge of the College of Agriculture. He will cover the work heretofore in the hands of Dean Knight. Miss Sarah Lewis, last year head of the Household Science Department of the Oregon Agricultural College, has been elected to succeed Miss Sears as head of our School of Home Economics. Miss Campiglia, Nevada State Supervisor

Continued on Page 8.)

FROSH TO WEAR DINKS BY MONDAY

Monday, September 13th will be the final date on which all freshmen must have gotten their "dinks" and have gotten them firmly ensconced on their noble caputs.

The Frosh "dink" is one of the oldest customs of the University of Nevada and must be worn by all freshmen, at all times while on the campus during their first semester at the University. The Campus is considered as being all of the university grounds north of Ninth street and east of Virginia street, and during the daylight hours, any freshman appearing on the Campus must wear his traditional "dink". Any infraction of this tradition will be met by howls of glee from the rest of the student body and the penalty will be administered in a most fitting measure. This penalty, when given is always a source of unending joy to all but the Frosh and consists in the victim being carefully but forcibly deposited in the frigid waters of the Orr Ditch or the Campus Lake.

Sagebrush Varsity Has Heavy Schedule

SIXTEEN LETTER MEN FROM LAST YEAR'S ELEVEN WORKING OUT ON MACKAY FIELD, WITH PROMISING SQUAD OF NEW MEN OFFERING STIFF COMPETITION. 1921 VARSITY TO PLAY IN FOUR STATES.

With "Honolulu, America loves You," as a battle cry, one of the largest football squads ever seen on Mackay Field is fast rounding into shape under the guidance of Coach "Corky."

The lockers in the training quarters were all taken long before school started and many of the late arrivals are waiting for a delayed shipment of equipment before they will be able to appear on the gridiron as football heroes. Besides the possibility of

Freshmen, you can buy your "dinks" at either of two places: Gray Reid & Wright or Franks, both on Virginia Street.

Buy your "dink." Wear it. And let's go, for the biggest of Nevada's years is here.

spending the Christmas holidays in the "Islands," the opportunity to see America first has attracted football players from all parts of the West to the colors of the Silver and the Blue. The man that plays the full season with Nevada will see service in three states and one territory.

The schedule as Courtwright has it lined out now is:

- Sept. 25—Davis Aggies at Reno.
- Oct. 16—Univ. of Calif. at Berkeley.
- Oct. 30—Univ. of Utah at Salt Lake.
- Oct. 23—St. Mary's at Reno.
- Nov. 6—Utah Aggies at Reno.
- Nov. 13—Univ. of So. Calif. at Los A.
- Nov. 25—Univ. of Santa Clara at S. F. Post Season.
- Dec. 25—Univ. of Hawaii at Honolulu.
- Jan. 1—Best Island team at Honolulu.

With sixteen of last year's letter men back for more and a wealth of new material yelling for action, Coach Courtwright hopes to put a team on the field that will give a better account of the University of Nevada even than last year's. Malone, Hobbs, Tam and Hill of last year's squad will not return this season.

Captain "Eddie" Reed, half back on the Nevada varsity for two years is going in the same old form. As a passer and ground gainer, Eddie is hard to beat; coupled with that, his old fighting spirit makes Reed a fit leader for the Nevada varsity in the biggest year it has ever had.

Besides Reed, five letter men from last year will be in the back field.

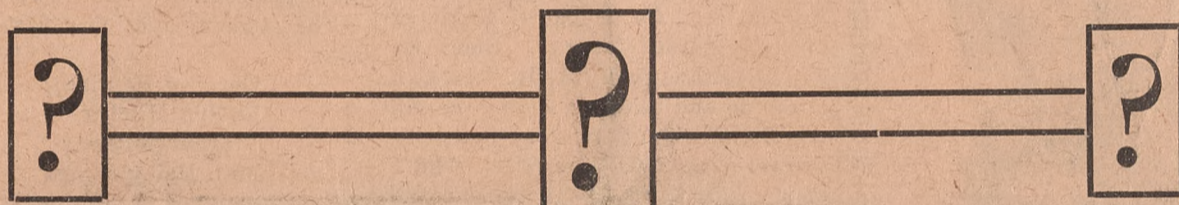

"Rabbit" Bradshaw, second All-Coast quarter back is here to pilot the team for another season. Bradshaw's running and generalship has never had a superior on the Nevada field.

Johnson made the third All-Coast team last year and there will have to be some wonderful half backs on the Pacific Coast to keep him off of the first team this season. As an offensive and defensive player "Johnnie" has few equals.

Dunne, with his famous line plunging ability is sure to be a hard man to oust, and the man that lands his job at full back will have to be some football player.

Grant, another full back from last (Continued on Page 7.)

LANGUAGE HEAD LEAVES NEVADA

Dr. Charles Goggio, head of the department of Romanic languages resigned during the summer to accept a position in the Department of Romanic languages of the University of Washington.

Dr. Goggio, better known as "Prof," came to the University in 1915 from the University of Wisconsin as instructor in Romanic languages and literature and in the five years that he has taught at the University of Nevada he has been appointed instructor, assistant professor, associate professor, professor, acting head, and head of the department of Romanic languages. "Prof" has been, and is, well liked by the student body, is an ardent follower of all of Nevada's athletics, and his loss to the faculty of the University will be keenly felt by all the students.

At the University of Washington, Dr. Goggio will conduct all classes in Italian, and further will teach French and Spanish. He will be associated with fourteen other professors, but will be the only one to teach the three languages, Italian, Spanish and French. "Prof" holds an A. B. degree from Harvard, and A. M. and Ph. D. degree from the University of Wisconsin. At Washington, Dr. Goggio will not only have an increased salary, but will have broader library facilities with which to carry on the research work in which he is interested. Nevada's loss, however, is Washington's gain and with Dr. Goggio go the best wishes of the student body. At the present time no successor has been appointed to Dr. Goggio's position in the department of Romanic languages.

U. N.

BORCHERT & ENGLE TO TURN FARMERS

An item of interest to the older students is the fact that Glenn F. Engle '17 and Earl Borchert '20, both graduates of the College of Engineering have turned farmers. Glenn Engle, better known as "Kelly," is a C. E. graduate and has been connected with the Reclamation Service at Fallon for several years, while Borchert who is known as "Borch," is a Mines grad. Borchert and Engle have taken up homesteads in the Fallon Section and claim in time to have one of the finest ranches in the Fallon section. Engle will still retain his position with the Reclamation Service.

U. N.

UNIVERSITY PROFS. SPEAK IN ELKO

President Clark, Dean Stewart, C. W. Creel of the aggie extension division, and V. E. Scott, professor of dairying, journeyed to Elko last week to speak at the community fair and picnic which was held Friday at Deeth. The fair and picnic which was sponsored by the Elko Farm Bureau was well attended by ranchers from over the northern part of the state, many fine head of stock being exhibited. The stock exhibited at the fair was judged by Prof. Scott.

U. N.

GOLDFIELD LOSES SCHOOL OF MINES

The School of Mines at Goldfield will not reopen this fall according to H. H. Bliss, supervisor of the department of vocational education, in an article in the Goldfield Tribune. A conference was held during the summer with Prof. G. E. Hoffman and it was decided that owing to the present condition of the famous gold camp, and the attendance which fell to one pupil daily, to hold sessions this fall would be useless.

WILLIAMS TO BE ASSISTANT COACH

Charles B. Williams of Elmira, N. Y., accepted the position of assistant athletic coach of the University of Nevada during the summer, and will have charge of all floor work in the gymnasium this year.

Coach Williams has had considerable experience in the east. He was physical director at Elmira Free Academy for one year, coach at John Hancock High School for a year, and later basketball coach of the Elmira Athletic Club. His preparatory training was received at Elmira Free Academy, at Ohio State University where he took a pre-medical course, and later at Springfield University and University of Illinois summer schools for coaches from which he graduated.

The required physical training rule in force this fall has made necessary the presence of an assistant, so Coach Williams will have entire charge of the floor work in the Gym, and Coach Courtright will continue as coach of athletics.

U. N.

SCHOLARSHIP SHOWS BIG IMPROVEMENT

The scholarship for the past semester shows a decided improvement over that of the fall semester. Without an exception the group averages are higher than those of the previous four months and the number of students receiving first honors is doubled. For the semester before there were three men and two women carrying full schedules who received an average of 1.00 in all their courses, while for the past semester four men and six women received first honors. The list of those receiving second honors for making an average of over 1.25 in their work also shows an increase of forty per cent.

The students receiving first honors are:

Dorothy Harrington
Evelyn Hitchens
Virginia Higgins
Mrs. Haley Jones
Ameglio Andreucetti
Herbert Bruce
Helen Cahill
Alice Kincaid
Joseph Hill
Mahlon Fairchild

Those receiving second honors are:

Evelyn Walker
Katherine Maffi
Helen Fuss
John Gottardi
Leila Sloan
Eldon Wittwer
Horace Olmstead
Harry Capper
Rose Mitchell
George Cann

I. O. A. O. leads the sororities with an average of 1.752. The other averages are: Pi Beta, 1.765; D. K. T., 1.929 and Delta Delta Delta 2.142.

Phi Sigma Kappa leads the fraternities, making an average of 2.201. Trowel and Square made an average of 2.477; Sigma Nu, 2.607; Phi Delta Tau, 2.763 and Sigma Alpha Epsilon, 2.764.

The average for Manzanita Hall was 1.996 and for Lincoln Hall 2.361.

U. N.

LYMAN R. VAWTER JOINS VET. DEPARTMENT

The State Veterinary Department gained a new man this summer in Lyman R. Vawter. Vawter comes to the department from Kansas State Agricultural College where he received his degree of D.V.M. and has been for the past three years.

Military Department Notes

The R. O. T. C. Camp held at Camp Kearny, California, from June 17 to July 26 was attended by 900 students from colleges and schools in the Western department. Student Pike of the University of Nevada was awarded the highest mark for military excellence among all the students taking the Basic Camp course. At the conclusion of the camp Cadet Pike was selected as a member of the rifle team to represent the Reserve Officers' Training Corps at the national shooting matches held at Camp Perry during the month of August. This team gained a high position in the contest.

Under a recent act of the Congress students attending the camp now receives pay at the rate of \$30.00 a month while at camp in addition to subsistence, uniforms and quarters; also reimbursement at the rate of five (5) cents per mile for the distance travelled from home to camp and return.

The money allowance for students taking the advanced military courses has been increased from forty (40) to fifty-three (53) cents per day. As this allowance continues throughout the vacation period the amount which the student received for the year including the pay while at camp is \$212.00.

The War Department is now distributing the Victory medal to all who were in military service during the World War. Ex-service men and former members of the Student Army Training Corps may secure necessary blanks and information for obtaining the medal from Colonel Ryan, or from the recruiting officer in town.

First Sergeant Vaughn reported for duty in the military department on August 27, and will assist in the training of the R. O. T. C. Sergeant Vaughn has had twenty years' service in the regular army, including two years in France as a captain of infantry in the National Army.

The military hour during this semester will be 7:30 a. m. Military 1 reporting on Monday, Wednesday and Friday, and Military 3, on Tuesday, Thursday and Friday. This arrangement will permit all students to be released for athletics at 3:30.

—U. N.—

PROFESSOR SEARS LEAVES UNIVERSITY

Prof. Millicent Sears, head of the department of home economics resigned during the summer to accept a position with the department of home economics at the University of California.

Miss Sears has been head of the department of home economics at the University of Nevada for the past three years, succeeding Miss Kate Bardenwerper, and during that time her department has become one of the most important in the university with a large registration. Prof. Sears is well known over the state, having made various tours in the interest of her department. She is a woman of wide experience. She received a B. S. degree from Columbia and later was Assistant in Foods and Cookery of the Teachers College at Columbia, after which she was head of the home economics department of National Park Seminary.

MANY RECIPIENTS OF SCHOLARSHIP

At the thirtieth annual commencement of the University last May the scholarships and prizes were awarded to those students fulfilling the requirements for them. A list is given below of the awards:

Herbert D. Bruce and Helen Cahill, a gold medal, the highest award given that student who attained the highest average grade of scholarship during his or her college course. Bruce and Miss Cahill tied for this honor, the second time in the history of the University when two medals were presented in one year. Tom B. Jones and Alice Kincaid also attained an average grade of 90 per cent or better throughout their courses.

Honor students of the past year were:

Freshmen—Rose Mitchell, Evelyn R. Hitchens, George A. Cann.

Sophomore—Evelyn Walker.

Juniors—Ernest Metscher, Lulu Hawkins, Virginia Higgins, John Gotardi.

Seniors—Lelia Sloan, Ameglio Andreucetti, Helen Cahill, Harry Cooper, Joe Hill, Alice Kincaid.

The five Regent's scholarships of \$50 each were awarded to George A. Cann, Evelyn Walker, Ethel Steinhilmer, Virginia Higgins and Charles Chatfield.

The U. of N. Alumni scholarship of \$50 awarded to a worthy student was given to Helen A. Wogan of the junior class.

The Alice G. Clark scholarship of \$250 was awarded to Margaret Barnes of the junior class.

The Women's League scholarship of \$25 given by the Women's League to the woman student attaining the highest grade for the year and who receives no other scholarship, was given to Evelyn Hitchens.

The J. H. Clemons scholarship of \$50 was given to Eldon Wittwer.

The Antelope Land and Cattle Company scholarship of \$100 was awarded to William Martin.

The Home Economics scholarship of \$100 went to Anne Underwood.

The Judge A. E. Cheney scholarship of \$100 was given to Leona B. Bergman.

The Lewis D. Folsom \$100 scholarship was given to Ernest Metscher.

The Normal school scholarship of \$50 went to Mildred C. Meiss in the form of a \$50 Liberty Bond.

The four Elks' scholarship of \$300 each were awarded to Thomas Buckman, Rose Mitchell, Homer Johnson and Edward Reed.

The four Elks' Membership scholarships were awarded to Richard P. Bryan, Joseph D. Hill, Donald R. Warren and Tom B. Jones.

The Rhodes scholarship of \$1500 annually, tenable for three years, was given to Stanley Pargellis on Jan. 1, 1920.

Paul Hornaday and John Belford were awarded gold watch fobs for representing the University in intercollegiate debating.

To Ray Law and Anthony Zeni were given a prize of \$20 for being members of the winning interclass debating team.

—U. N.—

NEW PROFS FOR HOME EC' DEPT.

Miss Sarah Lewis was elected professor of home economics and head of the department to succeed Miss Millicent Sears, whose resignation was accepted this summer.

Miss Lewis, who is a sister of Dr. A. Parker Lewis of Reno, has been highly recommended by Mrs. Henrietta H. Calvin, head of the home economics department of the federal bureau of education. She has been head of the department at O. A. C. at Corvallis, instructor at the summer session just completed there. She is a graduate of Teachers College of Columbia University.

Assisting Miss Lewis will be Miss Jessie P. Pope who was connected with the department last year and to work at Columbia this summer.

Miss Compiglia, who recently was appointed state supervisor of home economics by the vocational board will also assist in the department's work. During the second semester, Miss Compiglia will devote three days a week to training young women of the university who intend to teach home economics.

—U. N.—

She—You know, Jack, I always speak as I think.

The Sagebrush however does not necessarily endorse the sentiments expressed in the communications, but will be published since the columns of this paper are always open to constructive criticism or ideas of the students and faculty.

RENO, NEVADA, THURSDAY, SEPTEMBER 9, 1920

Nevada's Traditions

For the benefit of the new students, Nevada's traditions are given below. These traditions are not to be read and ignored, but are to be lived up to to the letter.

We can not yet boast of the traditions of student government in matters of honor and cheating, as many other colleges do, but we can claim the tradition of supporting that movement.

We stand for all that is honorable in matters of cheating in examinations and hope always to continue that way.

We feel that we are men and women and need no supervision from our instructors. We sincerely hope that the time will soon come when we can establish the system in our University.

A committee of five, the president of the Associated Students, acting as chairmen, together with four other active students, upperclassmen, shall be known as the upperclass committee. It is the duty of this committee to settle all disputes occurring between unruly students and shall act as court martial.

There is a certain enmity existing between the Sophomore and Freshman classes. The lake and the ditch at Mackay Field are the center of the rushes between the two classes. Ducking is the punishment for unruly Freshmen at all times.

In the fall football rallies and pajama parades are common for the purpose of arousing enthusiasm among the citizens of the city for the support of the games. All students are under obligation to attend these rallies.

Each class gives a formal dance during the year, the Sophomore Hop being the first. Then the Junior Prom, Freshmen Glee and Senior Ball in the order named. Every year we celebrate Mackay Day in honor of Mr. Mackay who gave the University the Mackay Athletic Field. On this day, the men clean up the field and tennis courts and the women prepare a dinner which is served in the gym at noon.

Everybody is expected to learn the college songs and yells, "The U. of N. So Gay" is the college hymn. Whenever it is sung everyone rises and gentlemen are required to remove their hats.

Tradition has chosen some sacred places. Only Seniors are allowed to sit on the cement bench in front of the Library. Even Juniors are denied that honor. We take pride in the beautiful quadrangle and lawns about the buildings. To keep them thus, no persons, not even Seniors, walk upon them except when drilling. The back steps of Morrill Hall are for Freshmen, the front steps for the upper classes.

Men do not smoke on the campus between sunrise and sunset. This includes the road to the north side of the Chemistry building.

Tradition dictates certain articles of clothing for the various classes. Only Seniors wear the sombrero; only upper classmen wear corduroy trousers. Freshmen are obliged to wear the "dink" during their first semester.

At student body meetings or assemblies, Seniors occupy the front rows of seats, Juniors behind them and so on, the Freshmen being always careful to keep behind fellow students of the upper classes.

Only Senior men wear the moustache. It is the duty of the Freshmen class to keep the "N" upon the hill whitewashed. This is done at stated times, under supervision of the Block N Society.

The University Library is chiefly for the convenience of the students. When books are borrowed, they should be returned on time so as not to inconvenience some other student who may need them.

With the College Scribes

LET THE WOMEN ALONE

Innumerable well meaning people throughout the country are taking the women to task for their vagaries in dress. They point to the fact that the modern dress exposes a few inches of feminine charms, and they see as a consequence the prompt demoralization of the world.

But why all this hubbub over what a woman wears? Is her form one of which she should be ashamed? Ask the men!

Eve was garbed in flowing hair and a fig leaf, yet Adam appears not to have been disturbed at this fact. She was Eve, and that was sufficient for him.

She represented the most beautiful thing in all the world to him—and from the days of Adam the verdict of man has not changed.

The artist sees nothing immodest in the woman who poses for him, because it is art.

The savage respects woman who is clothed only from the waist to the knee, because it is the custom of his country—and custom makes right.

The evil, we fear, is often in the eye of the critic and not in the object of his criticism.

"Let him who is without sin cast the first stone."

And in the meantime, let the women alone—bless 'em!
—Arkansas Weekly.

YOUNG BLOOD IS NEEDED

"The university profession must be recruited by the development of young and new men" is the message sent to undergraduates by President Burrows today.

It is surprising how few of our college men ever give a thought of adopting the profession upon which they themselves are dependent during their university career. The reason for the lack of attention in this direction could probably be written in dollar signs.

Although the advantages which President Burrows has mentioned are all tempting in themselves, the ordinary college student, even though qualified to make a good professor, is essentially utilitarian. He sees the successful lawyer riding in a six-cylinder car while the professor of a long and successful career still rides in a Ford. Consequently he studies law.

The President's presentation of the educator's benefits will doubtless attract a good many undergraduates. The proper number and quality of men will not be attracted, however, until the world at large recognizes the true worth of the professor and gives him his just compensation—a salary greater than that of the mechanical worker.

Study?
Hell!

—Hal '23 in Pelican.

Greetings, Friends. Here I am again, and once more I shall proceed to bore you to death with my line of gleanings from the waste basket.

The best things I had in this column last semester I wrote myself. Sure, it's a fact. I've got one of the best little domes you ever saw when it comes to this goof stuff. Listen to this little contribution, and we'll start.

Give me time. I'm starting, but I've got to get primed up on milk shakes so I'm necessarily a little slower than in the good old days.

We're off. Listen.

In starting on my weakly bit, I really feel the mood.
So take again old pen in mitt,
And pass out scandal food.

And once again, on the subject of these early morning classes.

This military drill

At seven-thirty

Is really

Fine.

Builds the boys

Up.

You know

Teaches 'em discipline—

Really it

Does.

I'm all for it.

I don't have

To take it.

But say, here's a good one if you haven't heard it.

"How did you get your mustache into this condition?" asked the barber. I tried to steal a kiss from a girl who was chewing gum."

And again speaking of kisses. They say there is disease in a dog's kiss.

But why go to the dog.

But getting off of that dangerous subject, I found a peach of a cafe to eat at this summer, and to prove to you it IS a rare place to eat I'll give you one of their signs:
"Table d'Hote Dinner 60 cents. Soup changed daily."

The Chaparral has it thusly—

Queener—How old is that girl you were with?

Snake—Sixteen.

Queener—Ah, sweet sixteen and—

Snake—No; sweet sixteen but—

Here's a deep one.

They tell me Marc LeDuc went out for track work this summer.

Howzat?

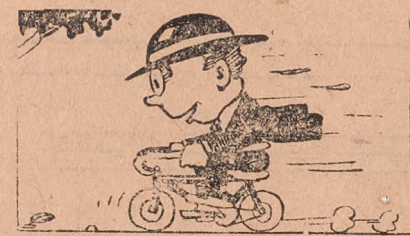

Driving spikes on the S. P.

I overheard a rare conversation today. Two of our fair damsels had just met after the summer vacation.

M.—"Tell me all the scandal that has been created while I have been away."

G.—"There's been none—while you were away."

Skip Hammond rode up from California on his tin Indian several days ago. Here he is—perceive.

Borchert cogitated long over one of the articles which appeared in the Raspberry last semester. You know, the one where the mining graduate took up a homestead and raised spuds.

"Borch" was a Mines grad. He therefore gave up his profession, took up a homestead, and now he and Engle are raising spuds at Fallon.

Red Gelmstedt tells me that out on the old farm he has a cow that shimmies.

Ah! The original milk shake.

Not mentioning any names, but this happened last semester in Geology class. Here are the facts:

Geology Prof. (laying his hand on a specimen of corundum)—"My hand is on one of the hardest rocks known", (scratching his head with other hand).

Li'l Eddie's voice in deep whisper from back of room—"Which hand, Prof?"

She looked at him with warm and limpid gaze.

SOME cow.

"Fixin' yore car?" asked the interested spectator as Al Reed emerged from beneath his Packard.

"Oh, no," was the withering reply. "Merely dabbling in oil."

Here's a little poem from an exchange. It's good, read it:

The Scrubs

The scrubs get the rubs—I'll admit they're dubs—

But they're game right through to the core.

They get all the knocks, they are treated like rocks,

But they grin and they ask for more.

They're not looking for fame, but they're playing the game,

For each is a fighter at heart.

A cheer for the scrubs who gets all the rubs—

Let's make it good from the start!

We've got to have a second team for the Varsity to play against. Some people call them the scrubs. It's a rare thing when a new man makes the Varsity the first year he plays, without playing at least a year on the second string, or scrubs. We need a big second string to give the Varsity the work they need to put them in shape for our first game, and for the big Cal-Nevada game. Let's have so many men trying out for football that Corky will have to order uniforms by the gross.

You know the Cal game comes very soon now, and we sure are going to bring that wonderful Golden Bear's hide back and nail it to the flagpole on the Training Quarters.

Let's go, for the biggest year in Nevada's football history.

They tell this one on Gooding.

A friend was visiting the ranch and admired one of the cows.

"What's that cow's name?" was his eager question.

"Chocolate," replied Gooding.

"Ah, I see," came from the friend, "and every evening you go out and milk chocolate."

And about that time someone sapped him with a ripe squash.

I quote from the Louisiana Reveille for the benefit of the new Frosh:

1. Calculus. Never work a problem whose answer is zero. When you finish you'll find that you had all your work for nothing.

2. Public speaking. Always take

3. Spanish. Get the pronunciation into your head, and you'll have it all in a nutshell.

4. Shop. The best way to drive a nail without smashing a finger is to hold the hammer with both hands.

5. General. Take it easy; you graduate by degrees any way. Don't study your lesson; lessen your study.

Lives there a souse with nose so red,

Who never to himself hath said: "This is my last, my final beer; Bartender, take this nickle here."

"Oh, a typographical error," cried the man in the book as he swallowed a needle instead of a noodle!

—OLD POOCH

U. N.

CONCLUSIVE EVIDENCE

William and Henry, chauffeurs, were discussing the ill luck of a fellow-chauffeur, Clarence, who had the day before been fined for taking out his employer's car without permission.

"But how did the boss know Clarence had taken the car out?" asked Henry.

"Why," explained William, "Clarence ran over him."—Harpers.

1923: What is that girl worth?

1023 S.: Four million dollars.

1923 (shaking his head slowly): It's not enough.

THE SCHOOL OF EDUCATION

With the opening of the University this fall, the Department of Education begins its work on a reorganized basis. The most significant change is the enlargement of the Department into a School of Education. The new school will continue as an integral division of the College of Arts and Science though it will have its own dean. This reorganization has been adopted to increase the possibilities for the effective training of teachers for the elementary and high schools of the state, a service which is one of the most, if not the most, important which the University can render.

Mr. Hall, who came to Nevada last spring from the University of Cincinnati, where he had been a professor of education for fifteen years, is to be dean. Other instructors will be Dr. Young, Miss Day, Mr. Traner, Mr. Billingham, Miss Diehm, Miss Lewers, certain teachers of the Reno high school, who will assist in supervising practice teaching, and instructors in other departments of the University giving work required for the Normal diploma.

Some changes have been made in the courses formerly offered, though none of a radical nature. While the courses are strictly professional, some should be of interest and value to every citizen. The University expects every student to play a significant part in the solution of the problems of his community, the most important of which is the education of its children. Lack of interest, knowledge and intelligence in such simple, but vital daily affairs in every community is little short of calamitous. The many vacancies in the schools of the state and the large number of teachers that it has been necessary to invite from other states are evidences of a failure to fully appreciate our responsibility.

For teaching in the elementary schools, the School of Education offers two curricula, one of which can be completed in one year and qualifies for a second grade teaching certificate good for three years; the other requires two years and qualifies for a first grade certificate, good indefinitely. The high school teachers' diploma entitles the holder to teach in any high school of the state; this diploma can be secured by University students who complete 18 hours of work specified by the School of Education. These 18 hours constitute a minor in meeting requirements for graduation. Graduates of the two-year Normal course will be able to secure a baccalaureate degree in two additional years of college.

It is expected that more seniors than usual will be candidates the coming year for the high school diploma. It is estimated that perhaps ten students will complete the requirements the coming year for the two year elementary course, but no estimate can be made of the possible number of Freshmen who may enroll, because the many other lines of work attracting young people are seriously interfering with the normal supply of teachers.

The new Education building will soon be ready for occupancy. It is the newest and finest on the campus, and is certain to be appreciated by the students as well as the faculty. The faculty hopes that the quality of its work may be worthy of such a building.

U. N.

His Most Important Function.

The Cleaner Who Cleans

NOTED SOIL EXPERT IS NEW AGGIE DEAN

With the resignation of Dean Knight from the College of Agriculture last spring, a search was made for his successor which resulted in the appointment July 1st of Robert Stewart as Dean of the College of Agriculture and Professor and Head of the Department of Agronomy.

Besides being a noted soil expert, Dean Stewart is the author of a number of Experiment Station Bulletins and of articles in agricultural journals. He received a B.S. degree in 1902 from Utah Agricultural College and in 1909 received his Ph.D. degree from the University of Illinois. In 1902 Prof. Stewart was appointed assistant chemist in the Utah Experiment Station which position he held for three years. From this position he joined the Utah Aggies as assistant professor of chemistry, later being made Professor of Chemistry and Head of the Department, besides being Station Chemist at U. A. C. In 1905 he entered the faculty of the University of Illinois as Professor of Soil Fertility. Dean Stewart has had a great deal of experience in agricultural chemistry and soils and his appointment as Dean Knight's successor means a great deal to the university.

Robert Stewart is a member of the Illinois Academy of Science, American Chemical Society, Utah Academy of Science, American Association for the Advancement of Science, American Society of Agronomy, Sigma Xi and Gamma Sigma Delta.

U. N.

Aged Aunt, despondently: "Well, I shan't be a nuisance to you much longer."

Nephew, reassuringly: "Oh, don't talk like that, Auntie; I'm sure you will."—Passing show.

YOUR COLLEGE HYMN
Learn It; Sing It; Cherish It.

U. OF N. SO GAY

In a day that will be bye and bye,
We'll often dream of a by-gone-day,
And sing again the sweet old song
Of U. of N. so gay.

When college days are gone and past,
And wide and far our lots are cast,
Then mem'ry sweet of days of yore
We'll keep until the last.

Chorus

So here's to the friendships that bind us in one,
And the fair hours of youth yet undone.

Come drink to the health of old jolly N. U.

And the banner of the Silver and Blue.

Now, here's to Nevada so staunch and so strong,

May prosperity stay with her long.

Come drink to the health of old jolly N. U.

Where all honor and all eminence belong.

U. N.

A Scout is Thrifty.

Question: What do you do with your shoes when you wear them out?

Answer: I wear them back in the house again.—Boy's Life.

VACUUM RESEARCH ROOM G-E LABORATORY

Using the X-Ray in the Home

Greater X-ray Service—through Research

FOR years after the discovery of X-rays it was evident that only intensive research could unfold their real possibilities.

Meanwhile, scientists of the General Electric Company developed the process of making wrought tungsten. This proved ideal as the target in X-ray tubes and its use for this purpose soon became universal.

Then further research resulted in the development of an X-ray tube of a radically new type—the Coolidge Tube—with both electrodes of wrought tungsten and containing the highest attainable vacuum.

But the complication of high-vacuum pumps made the new tube in large

quantities impossible. The answer to this problem was the Langmuir Condensation Pump, utilizing mercury vapor in its operation and almost automatic.

To meet the need for simple X-ray apparatus during the war, the G-E Laboratory developed the Self-Rectifying Coolidge Tube, which made possible portable outfits at the front. The latest X-ray outfit of this type is so small it can be taken conveniently to the home or to the bedside in the hospital.

Thus the Research Laboratory of the General Electric Company continues to serve, that progress in things electrical may continue for the good of humanity.

The Cleaner Who Cleans

**MANY MARRIAGES
DURING SUMMER**

The wedding of two former students of the university early in June, culminated a pretty romance begun several years ago when both were members of the Class of 1920 at Nevada. Miss Leila Ogilvie and Mr. Joseph Hauck, both well known here, were united in marriage at the home of the bride's parents at Lee, Nevada, by the Rev. Mr. Swander of Elko. The bride was attended by Miss Rose Harris, a classmate, and the groom by Mr. George Ogilvie, the bride's brother. A number of friends and the immediate relatives were present at the ceremony, after which the happy couple left for lake Tahoe where they spent their honeymoon, before going to Berkeley to make their home. Mrs. Hauck was one of the most popular students ever at the university, being a member of Delta Delta Delta sorority and holding various class and other offices. Mr. Hauck was a member of the Glee Club here and an active man in Lincoln Hall. He served during the war as a first lieutenant.

Miss Agnes Jensen, former member of the Class of '21, was another university girl who was married during the summer. She had been teaching in Humboldt county and later in Rochester, where she met Mr. J. Woodworth, a mining engineer located in that district. The ceremony was performed in California. Mrs. Woodworth attended college here for two years, graduating from the Normal School in 1919. She was a member of Pi Beta Phi. The groom is a graduate of the University of California, where his father is a member of the faculty.

Miss Alice Kincaid, a graduate of the university with the Class of 1920, and Mr. Roy Franklin Jones of Seattle Wash. were married on August 17th at the Trinity Episcopal Church in Reno, in a simple and very impressive ceremony. The groom was formerly a student the university of Washington, at which institution the officiating clergyman was also a student and served as a pilot with the Air Service during the war, attaining the rank of second lieutenant. He is now a construction engineer and is located in Seattle. The bride's home is in Alaska where she met Mr. Jones before coming to college here. While at the university, she was a very active and popular student, being a member of D. K. T. sorority, of which she was president last year, and a member of Phi Kappa Phi, honorary scholarship fraternity. She was president of Women's League last year and has won several scholarships during her attendance at Nevada.

One of the prettiest weddings ever held in Fallon occurred June 8th when Miss Margaret Dolf and Mr. Ira Kent were united in marriage at the home of the bride's parents in Fallon, by the Rev. H. L. Bellam, formerly of the Sparks Episcopal Church. Miss Florence Milner of Reno was bridesmaid while the groom was attended by Mr. Richard Sheehy of Lahontan, a former classmate. Only the immediate relatives and close friends of the two families were present at the ceremony, following which, the couple left for a trip to Alaska before returning to make their home in Fallon. Mrs. Kent attended Mills College and Mr. Kent is a graduate of Nevada with the Class of 1915, where he was very prominent in student activities.

Miss Mildred Griswold, 1920 graduate of the university, was married in July to Mr. Mark Scott, a prominent rancher of Starr Valley, in Salt Lake City, after an elopement from the Griswold ranch. Mrs. Scott was the first member of the graduating class of this spring to be married, though there have been a number of others who followed suit shortly afterwards. While in college, Mrs. Scott was an active worker in several organizations, being a member and president of the I. O. A. O. sorority last year and also president of the Y. W. C. A. and a very popular student.

Miss Dorothy Hempton, a graduate of the university with the Class of 1917 and Mr. Andrew Kinneburg of Battle Mountain, were married at the Episcopal Church this June by the Rev. Samuel Unsworth. The bride was attended by her niece, Miss Isabel Wigg, and the groom by Mr. Gordon Hempton, brother of the bride. Only

the immediate relatives and a few intimate friends were present at the ceremony. Miss Hempton was a very popular student while on the Hill, and was a member of Delta Delta Delta and Delta Alpha Epsilon and an active member of the Y. W. C. A. Following the ceremony the couple left for Sydney, Australia, the bride's former home, for a six months' trip, after which they will return to make their home in Minnesota.

A wedding of great interest to Nevada students took place in Yerington on June 6th, when Miss Lora Lamberson and Mr. Donald R. Warren were united in wedlock by the Rev. Dixon at the home of the bride's parents, in Yerington. The bride was attended by Miss Edna Greenough, a graduate of Nevada, while Mr. Earl Wooster supported the groom. Only the relatives and close friends were present at the ceremony. Their marriage is the culmination of a romance dating back many years, when both attended high school in Yerington.

Both the bride and the groom are well known on the Hill, having been active and very popular students during their career in the university. Mrs. Warren attended college here in 1915 and 1916, graduating from the Normal school, and has since been teaching in the Yerington schools. She is a member of I. O. A. O. "Don" Warren has been in attendance at the university since 1917 when he registered in the Civil Engineering school. He was a live wire in student affairs and during his stay here held many important offices, besides being editor of last year's Artemesia, and an officer in the A. A. E. He is a member of Phi Delta Tau.

Miss Donna Dike, a graduate of the University in 1918, became the bride of John B. Hunley, formerly of Packard, Nev., on July 27 at the Presbyterian church in Los Angeles. Miss Helen Mace, who received a master's degree from the university the same year, was bridesmaid. Mr. and Mrs. Hunley are now living in Brewster county, Texas, where Mr. Hunley is engaged as a mining engineer. When at college Mrs. Hunley was a member of the I. O. A. O. Sorority and Delta Alpha Epsilon. Since that time she has been an instructor in English and Spanish in the Las Vegas high school. Mrs. Hunley graduated from Lovelock high school before attending the university.

William C. Duddelson of Ely, a former student of the University of Nevada and professor of agriculture at Lovelock high school last year, was married during August in Vancouver to Miss Helen O'Neil of Berkeley, Cal. Mr. Duddelson was a member of the class of 1915 at the university, which he attended for two years, later going to an eastern college. He was a member of the Sigma Alpha fraternity here. During the war he served as an officer in France, where he was wounded. Mrs. Duddelson is a graduate of the University of California, since then having lived for one year in Alaska where she taught school. Mrs. Duddelson taught in the Lovelock grammar school last year.

Prof. Charles LeRoy Brown, instructor of biology, was married May 30 in Elko to Mrs. Anna M. Dowden by the Rev. J. M. Swander at the home of Mr. and Mrs. F. Byrne of that city. Mrs. Brown has taught school in Elko county since 1915, when she graduated from the Elko county normal school. Prof. Brown was principal of the Verdi school before he became connected with the university in 1918. He is a graduate of Nevada with the class of 1912 and took a master's degree here in 1913.

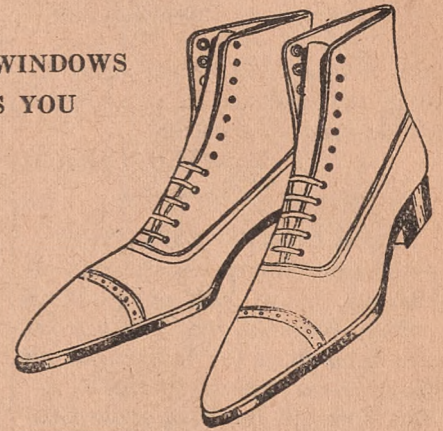

A very pretty wedding took place June 16 at the home of Mr. and Mrs. C. S. Meacham in Reno, when Miss Ruth Murray became the bride of Victor Jones, Rev. Brewster Adams officiating. Present were the immediate family and a few intimate friends. The bride was attended by Miss Jessie Taylor, with Mr. Edgar Myers acting as groomsman. Mrs. Jones is a graduate of Nevada with the class of 1916, and while in college was extremely popular among her classmates. She was a member of Delta Alpha Epsilon, dramatic society, and accomplished creditable work in the line of dramatics while teaching the past year in the Tonopah high school. Previous to this she taught in both the Reno and Dayton schools. The couple met while Mr. Jones was instructor in manual training in the Tonopah high school.

A wedding of interest to university people took place in Reno on July 3 when Miss Dorothy Randall and Lawrence Layman were joined in wedlock by the Rev. Mr. Howe. Both bride and groom were students here last year, Mrs. Layman being a member of the freshman class and a very popular girl, and the groom a junior in the engineering school. Both are talented

musicians, Mr. Layman being a member of the Glee club for several years and sang with the university quartet last year. During the war Mr. Layman served with the 27th engineers in France and went through several big drives made by the American army there. They have made their home in Reno.

**Sagebrush Varsity
Has Heavy Schedule**

(Continued from Page 1.)

year, with his famous boot, will make Nevada safe in any punting game.

Church at quarter is another man that can be depended upon to do his share in the back field. With his experience at piloting the team successfully through many tight places last year he will be a valuable man.

“Tiny” Fairchild, Captain of last year's team and veteran guard of two seasons will be more valuable than ever as a guard this year. “Tiny” weighs one hundred and eighty-five and has had six years of football experience.

“Long” Tom Buckman is out stronger than ever, with a hundred and ninety-five pounds, and two years' experience on the varsity he should be able to hold his own at either guard or tackle.

At center, Witter is the only old man on the job at present, but “Moose” is a fighter from whistle to whistle and can be relied upon for better work this year than ever before.

Heward, the other center last year, has not registered yet, but is expected the latter part of the week. Jack is said to be bigger than ever.

Al Reed, star tackle of last year is on the job again with more fight than ever before. For getting through the line and smashing up plays Al has yet to meet his match.

“Oats” Wright is out for the other tackle. Oats was taken sick in the middle of the season last year and out of the game, but he is coming back stronger than ever this year.

The keenest competition will in all probability be for the end position. All four of last year's men are back—Martin, Ted Fairchild, Bailey and Jones are all making a strong run for the jobs, and besides these veterans there is Sherry who played end on the 28th Division team; George, formerly of the Kansas state Normal; Hearne and Goodwin of Anadarko (Okla.) High School and James Eagleton of Norman (Okla.) High School are also out to land places on the Varsity. Noble Waite, though lacking in experience, is learning fast and will make a valuable end before the season is over.

Four men with records from Reno High School are out: Fooster and Humphrey are two fast back field men, Harwood a tackle and Duborg a center, show promise of being valuable men.

Hammert, from Anadarko, Okla. and Middleton and Seranton from Elko are also out for back field jobs. L. N. Hardy from Los Angeles Junior College is an old timer at tackle, Lucid from Turlock, Calif. and Boyer from Elko, though light have shown speed and are working hard for a position.

Charlie Schiller and George Gooding of last year's squad did some great work at tackle in the latter part of the season and are after a regular place on the team this season.

An additional number of heavy but inexperienced men are out and in all probability some of them will be used to add weight to our line, among them are: Larsen, Rees, Griswold and Adams.

With games scheduled with practically all the large teams on the Coast, and the heaviest schedule ever attempted by a Nevada Varsity, it looks as though a great number of new men will be used.

The spectators will probably miss some of the spectacular track meets which they witnessed last season but they will see more real foot bball.

The game with the Davis Aggies will not be such an easy victory for the Silver and Blue as it has been in former years, for the farmers are promising themselves revenge. And with several men from last year's California Varsity they will in all probability present a strong combination.

The University of California will contain a large number of the members of the Freshmen team from last year, and it is rumored around the campus that they are offering odds that they give the “Sagebrushers” an overwhelming defeat, but it is also rumored that the entire Hill will be in Berkeley on the sixteenth of October to see the Nevadans turn the tables. This is the first time in years that the California Varsity has condescended to play the U. of N., and as the dream of every old football man on the Hill is to “Beat California,” the Blue and Gold warriors will sure have to play football if they don't want to lose their shirts.

The Utah Aggies have always put out a strong team and the local fans are sure of witnessing some good football when they come to Reno in November.

St. Mary's will also be back this year. Last season they held Nevada to a nothing-to-nothing score on the Mackay field and are planning on going home with the bacon this time.

Nevada will wind up the season in San Francisco on Thanksgiving Day with a game with Santa Clara. Although defeated last year by a large score the Saints will have a much stronger aggregation this season and are out for blood.

The Island teams present an unknown quantity, but the wearers of the Silver and the Blue can be counted on to give a good account of themselves when they land on the “Beach at Waikiki.”

—U. N.—

**NOTICE TO ALL
VOCATIONAL MEN**

Blank requests for medical attention, to be used whenever a trainee of the Federal Board of Vocational Education is in need of medical or surgical treatment, are on file in the President's office. Trainees will note that in order to facilitate payment of bills for medical service, it is necessary to secure these blanks and upon them make formal request for such treatment.

—U. N.—

**VIC HENDERSON
RESIGNS AT ELY**

Vic Henderson, better known on the Hill as “Spike,” and graduate of the University in 1912, has resigned his position of head of the Ely School of Mines to enter the firm of King and Malone. “Spike” will handle the mining and metallurgical end of the firm and will leave the civil and hydraulic end of the work to King and Malone. Henderson spent several years as head of the Ely School of Mines and his loss to the school will be greatly felt. His successor has not yet been appointed. Since the close of the term last spring, the school has been moved to McGill, where it will be held after this.

**WALTER PALMER
MANAGES SMELTER**

Walter S. Palmer, professor of metallurgy at the university of Nevada spent a large part of his summer vacation managing the new smelter of the Bullshead Mining and Smelting Company in Elko county. This smelter which was blown in around the middle of May is expected to bring numerous small leasers into the Spruce Mountain mining district in the northern part of the state. It was designed by Capt. Davis of Reno to treat the lead-silver ore of this district.

November 20	Open date	Reno
November 25	Santa Clara	San Francisco
POST SEASON		
December 25	University of Hawaii	Honolulu
January 1	Best Island team	Honolulu

SIBLEY IS NEW MECHANICAL HEAD

The Engineering Department gained a professor not only of wide experience in engineering lines, but an expert in oil refining and an author of numerous reports, pamphlets and articles in technical magazines when Frederick H. Sibley was elected to be professor of Mechanical Engineering and head of the department. Prof. Sibley who received his Ph.B. from Brown University in 1898 and his M.E. degree from Case School of Applied Science in 1905 has held many responsible and important positions over the country, and a brief mention of a few of the most important positions held by him will show the worth of the man elected to head Nevada's mechanical engineering department. For twelve years Prof. Sibley was connected with the Westinghouse Company in Pittsburgh and later was draughtsman and assistant engineer in various plants around Providence and Boston, and was draughtsman and designer with what is now the New York Central Railroad.

After receiving his M.E. degree from Case School of Applied Science, Prof. Sibley was assistant professor of mechanical engineering at Case. From Case he went to the University of Alabama where he remained for five years as Prof. of mechanical engineering and finally left there to enter the University of Kansas where he was professor and head of the department of mechanical engineering for eight years. During the war Prof. Sibley was in charge of the Technical School for drafted men at Kansas and during this period was over twenty or more instructors and about 350 men.

Prof. Sibley not only is a member of the American Association for the Advancement of Science but is also a member of the Authors Club of America, the S. P. E. E., American Society of Mechanical Engineers and Sigma Xi. More could be said about Frederick H. Sibley if space would permit, but this brief record of his experience will show how valuable a man the university has gained by his addition to the faculty.

DEAN BRYANT IS SHOT BY HERDER

Dean Bryant, well known university student several years ago was killed August 8 in Stockton, Cal., by a demented sheepherder, according to reports from that city. It is said that Bryant stepped into a cigar store from his automobile to buy a cigar. The sheepherder came in, and after greeting Bryant, fired several shots, causing almost instant death. No motive could be found for the sheepman's actions and it is thought he was demented, judging from his previous strange actions.

Bryant was a Reno boy, graduating from the local high school and later attending the university for several years where he readily made a host of loyal friends who mourn his untimely death. While in both high school and college he was a prominent athlete and active worker and booster for the University of Nevada and was a member of Sigma Nu. During the war he was a master electrician in the aviation service, serving in both France and England. Less than a year ago he was married to Miss Aileen Wells of Stockton and his wife and family are tendered the heartfelt sympathy of the entire university.

Year Promises to be Greatest in History

(Continued from Page 1.)

of Home Economics, will be another new worker in our School of Home Economics, during the second semester of this year. Professor F. H. Sibley, during the past five years head of the Mechanical Engineering Department of the University of Kansas, is at his post as the new head of our Department of Mechanical Engineering. Also Instructor Clarence H. Kent, last year in the Reno High School, has been added to the staff of the Mechanical and Electrical Departments. Instructor Charles B. Williams is here as Coach Courtright's new assistant. Professor Goggio's successor has not yet been chosen. Everyone is gladly welcoming back Professor Sameth, who returns to her headship of the Department of Physical Education for Women. She has been during graduate study at Chicago and Wisconsin Universities during the past year.

On July 9, 1920, the Federal Bureau of Mines formally ordered the transfer to our University of the Federal Mining Experiment Station for Rare and Precious Metals, for many years stationed in Colorado. Mr. Davis, this new station's expert in platinum, has been at work here in one of the Mackay School laboratories since the middle of August. A carload of the station's equipment is now enroute from Colorado and will be stored temporarily in the barracks. Three of four more carloads of equipment will follow. The remaining six members of the new station's staff, including Dr. Lind, the head of the new station and one of America's foremost specialists in radium, will reach our Campus some time in December. Plans are rapidly completing for the erection of a new \$30,000 brick building, just north of the Mackay School of Mines, to house this new Experiment Station.

Mr. Isaac R. Mathews of Reno recently gave the University \$6700 to found a scholarship in memory of his wife, Rose Sigler Mathews.

So the campus, beautiful under Superintendent Lynch's watchful care, the buildings, many of them retouched for better service, the department quarters, many of them with added equipment and the staff, rounded out to completeness, welcome the old students to a new year's work. The old students join all these in a warm welcome to all new students.

The student body is well organized and its many organizations have live officers for this coming year. No university year ever started with so promising prospect for athletics. Fifty men are already hard at work on the football squad, many of them having taken a flying start last week, practicing hard morning and afternoon. A heavy intercollegiate schedule, including a game with California Varsity and the two Christmas holiday games at Honolulu offer such opportunity to our gridiron men as will insure close competition for every team position and the final development of a great team. There is fair chance that both in football and in basket ball this coming year may eclipse all past University records.

All then—the plant, the staff and the student body—are set for our University's best year.

LET'S GO!
WALTER E. CLARK.

UTAH TO PLAY COAST ELEVENS

University of Utah's football team has inaugurated the plan of making its own schedule in hope that Utah this year will meet all western university teams. In the past Utah has played only members of the Rocky mountain conference.

Already games are scheduled with the University of California and with the University of Nevada. Leaders at the college hope to add the Universities of Oregon and Washington to the list before the beginning of the conference games. The California game will be played at Berkeley on October 23.
