WOMEN TO PRESENT MUSICAL PROGRAM

Friday evening, December 9, at 7:30 o'clock the department of music, under the direction of Miss Benson, will present a program in concert work. They will be assisted by the young women in Miss Sameth's class of advanced dancing. The evening's entertainment promises to be of an unusual sort for presentation on the campus, and will have decidedly novel and interesting features.

Miss Benson is working hard towards the creation of a "musical atmosphere" on the campus. Besides her many classes in glee, she has started choral work, and formed an orchestra. Her efforts are certainly praiseworthy and merit encouragement. Prior to this year the campus has shown lack of interest in things of musical motif; but now, with incentives created by Miss Benson, interest is being manifested in the art of harmony.

Further this spirit by attending the amusement offered next Friday night in the auditorium of the Educational Building. Students and faculty members, with their friends, are cordially invited.

Program

1. Orchestra
 1. Toreador Song from Carmen.....G. Biget
 2. On Wings of Song.....Felix Mandelsohr
2. Girls Glee Club
 1. Angel Serenade, Violin Obligato.....Ruel Taylor
 2. Nightingale and Rose.....Carl Lehnert
 3. In Spain.....Vicenzo di Chiara
3. Orchestra
 1. Overture, Poet and Peasant.....F. V. Suppe
 2. Hawaiian Love Song.....M. L. Lake
4. Girls' Glee Club
 1. The Angel's Serenade.....G. Broza
 2. Bendemeer's Stream.....J. Sherwood
 - Soprano Obligato.....Miss Rowene Thompson
 3. Kentucky Babe.....Adam Geibel
5. Interpretative Dance—Class in Dancing
 1. Beautiful Blue Danube.....Strauss
 2. Hungarian Dance No. V.....Brahms
 - Accompanied by Orchestra
6. Girls' Glee Club
 1. Home Sweet Home.....H. R. Bishop

FROSH AND SOPH HOLD INTERCLASS DEBATE TRYOUTS

Freas and Fulton Chosen to Talk for Frosh; Robinson and Green for Sophomores

Tryouts for the freshman-sophomore debating teams were held Wednesday evening, November 30. The question debated was: Resolved, that the United States should take steps for the granting of immediate independence to the Philippines. Four freshmen and four sophomores tried out for each one of the teams. The judges were Dr. Adams, Prof. A. E. Hill, and Miss Mack. Howard Freas and John Fulton were selected to represent the freshmen in the debates to be held next semester, and Sidney Robinson and Cecil Green were selected to debate for the sophomores.

The first speaker of the evening was Freas, who spoke on the negative side of the question. He brought out two points against granting immediate independence in a well prepared speech, given in a very pleasing manner. Leland Johnson was the second speaker for the freshmen. He was not so confident as Freas, but showed ability in the debating line. John Fulton was the third freshman speaker. He spoke on the affirmative side of the question, and used the Filipino viewpoint as the basis of his argument. He made a very finished speech. Fulton a member of the winning Reno High School team in the interscholastic debates last May. The last freshman talker was William Romwall. He also spoke on the affirmative side of the question, using the legislative side as the basis of his argument.

Sigurd Nylander was the first speaker for the sophomores. Quotations from prominent men interested in the Filipino situation were used by him as a means of argument. He gave a very good speech. Sidney Robinson was the second speaker for the sophomores. He debated against giving the Filipinos immediate independence. He was among the best speakers of the evening, giving facts in his argument and speaking smoothly.

Chris Sheerin then spoke for the sophomores on the affirmative side of the question. Cecil Green was the last speaker of the evening. He made an analogy between the Mexican situation and the conditions in the Philippines as the basis of his speech.

The judges retired and spent some time deciding the winners of the various debates. Dr. Adams announced the winners to be Freas and Fulton for the freshmen and Green and Robinson for the sophomores. The three judges each gave a short talk praising those who had taken part in the tryouts, and on the future of debating at the University of Nevada.

Professor Turner reported on the matter of a debate with U. S. C. which is being considered at the present time. The question of debates with other colleges was also talked about in the course of the discussion.

The junior-senior tryouts are to be held Wednesday evening, December 7, in the Auditorium of the Educational Building.

U. of N.

SPORT CRITIC PICKS BRADSHAW FOR ALL-WESTERN AMERICAN

"Jimmie" Bradshaw has received a copy of the Chicago Evening Post of December 3 in which the athletic section is taken up with Malcolm MacLean's selection of an All-Western American football team. Bradshaw and Muller were the only men chosen for the first team from the Pacific Coast's long list of excellent players.

MacLean picked for his first team the following men: Fulback, Locke (Iowa); Halfback, Mohardt, (Notre Dame) and Devine (Iowa); Quarterback, Bradshaw (Nevada); Ends, Kiley (Notre Dame) and Muller (California); Tackles, McGuire (Chicago) and Slater (Iowa); Guards, Bunge (Wisconsin) and Pixley (Ohio); Center, Vick (Michigan).

Band to Entertain With Campus Dance

Music Will Be Furnished by the Band Itself. Entire Organization Behind the Entertainment Insures Its Success. Admission to Be Charged and Proceeds Used to Purchase Equipment

RHODES SCHOLARS TO BE APPOINTED

The Rhodes Foundation announce two scholarships available for Nevada, one for October, 1923 and another for October, 1924.

Candidacy is no longer based upon preliminary examinations but upon college grades in all subjects. Oxford is seeking men who love out-door life and sports, who will study without being driven, and who have a keen interest in their fellows.

While holders of the Bachelor's Degree will compete on easier terms with their fellows at Oxford, all students above the sophomore year are eligible for election.

Facilities are now available at Oxford for students who desire to pursue major work in any of the following subjects: Classics, Modern History, English, Mathematics, Chemistry, Modern Languages, Law, Medicine, and Theology.

The April, 1920, number of the American Oxonian, on file at the University Library, furnishes experiences of and advice by American Rhodes Scholars in each of the departments mentioned.

Nevada men thus far have been specializing in English, History, Chemistry, and Law.

The secretary of the committee desires to meet any students interested in the Rhodes Scholarship for conference and suggestions. Formal application for the scholarship should be made by August, 1923.

The scholarship now carries a bonus stipend of 50 pounds, thus increasing the amount annually available to 350 pounds.

U. of N.

CAMPUS PLAYERS WILL GIVE PLAYS ON NEXT TUESDAY

Hurry, fellows! Get a date. Only five more days before the big evening of one act plays to be given by the Campus Players. Tuesday, December 13, is the date, 8:15 the time, and the price of admission is 35 cents. The Campus Players are trying to get enough money to fit out the stage in the Auditorium of the Educational Building. They can only do this by having a full house. The admission is small and every student and members of the faculty can well afford to go.

Three plays will be given, "The Cuckoo's Nest," "The Confessional," and "An Afflicted Man." The casts, including the best dramatic talent on the Hill, have been working hard with Prof. Turner for the past month, and as the plays are all very interesting, a splendid evening is promised. Two of the plays are snappy comedies, while the third is of a serious nature.

They will be given in the Auditorium of the Educational Building.

As an added attraction, the University Orchestra will render several musical numbers during the evening.

It will be greatly appreciated by the Campus Players, if every student and faculty member will appoint himself a committee of one to spread the word around to his friends, and let them know of the plays, the place, the date, and the exceedingly low price.

Tickets may be purchased from members of Campus Players, at Y. W. C. A. Candy Store and at Cann's Drug Store downtown.

On next Saturday evening a dance will be given in the gymnasium by the University Band. Since the beginning of the semester, the band has practiced three times weekly, and under the leadership of Professors Preston and Kent, a musical organization of no small merit has been developed. This year an exceptional amount of talent was available, and with constant practice and an abundance of hard work, a band has been developed of which the University may well be proud.

The dance will be given in an attempt to raise funds to cover expenses of conducting the band, such as purchasing new music, instruments, etc. Heretofore, these expenses have been defrayed by student body funds, and it is the desire of those most interested in the welfare of the band to make the organization self supporting instead of an expense to the student body.

The music for the dance will be furnished by the band itself. For weeks the bands has practiced constantly on dance music, and a wide repertoire has been mastered. The men who have worked hard to bring the band to its present high state of efficiency deserve all the praise that can be given them, and it is up to the Student Body to express their appreciation of these loyal efforts by attending the dance Saturday night and lending their support to make the affair an unqualified success.

U. of N.

DR. CLARK RETURNS FROM EASTERN TRIP

President Clark returned to the University on Monday from a month's trip through the South and the East in connection with business concerning the University.

At New Orleans he attended the annual meeting of the State Universities and the Land Grant Colleges. While there President Clark served on the Executive Committee. At the close of the convention he continued his trip East. En route to Washington he stopped at the campus of the University of Virginia and examined the buildings. The buildings on the Virginia campus are of the same type as the Mackay School of Mines which was designed after them.

In Washington President Clark visited in the present and future interests of the University of Nevada, the Federal Bureau of Mines, State Relation Service, Federal Bureau of Education and the Inter-departmental Social Hygiene Board.

Still further business concerning the University called President Clark to New York City where he spent a week before starting on the return trip.

BOULDER CANYON PROJECT OF HUGE IMPORT TO STATE

Profession of Engineering Will Receive Tremendous Impetus When Project Is Started

One of the most important, and to residents of Nevada, one of the most interesting projects under consideration at the present time is the power development of the Colorado River. There are at least three reasons why this is true: (1) On account of the need of protecting against floods the lands now irrigated by Colorado River water; (2) the needs of a supply of water for additional irrigable lands, and (3) the urgent necessity of supplying additional hydro-electric power in the surrounding country.

While it is the third largest river in the United States, the Colorado has never lent itself to cultivation. For several years, the question of controlling the waters of this river and utilizing the stream for developing electric power has been under discussion, and has led to a controversy which is at the present time occupying much attention in the commercial world. A commission has been appointed, consisting of representatives of the various states interested, and it is expected that the outcome of their conference will result in some definite decision concerning the future development of the river.

The Colorado watershed offers a number of potential hydro-electric sites, among which are: The Bluff and Glen Canyon sites in Utah, the Turley site in New Mexico, and the Boulder Canyon site in Nevada. Compared with the Boulder Canyon site, the others are all of small size and possibilities.

The Southern California Edison Company has proposed a 500-ft. dam near Lee's Ferry, which is just south of the Utah state line. This dam would impound over 400,000,000 acre-ft. of water. Investigations at Boulder Canyon have shown the feasibility of a high dam at that point. The amount of storage which would be furnished by a dam there has been computed at 31,600,000 acre-ft. The canyon walls extend to the 2000-ft. contour, or 700 feet higher than the contour which would result in the above capacity.

Various arguments have been advanced both for and against each of these proposed reservoirs, which will undoubtedly be among the first to be constructed on the river. The proponents of the Lee's Ferry reservoir claim that the impounding of a large volume of water at an elevation of over 3600 feet and above the section of the river wherein the greatest amount of power is available will not only control the flood waters of the river, but will also permit with the greatest advantage later power developments further downstream. Opposed to this is the argument that a

reservoir 640 miles from the point of greatest diversion would be too far distant to permit of exact regulation of the water to provide for the fluctuating need of irrigation. It has also been claimed that some 2,000,000 acre-ft. of water per annum would be lost should the Lee's Ferry reservoir be constructed rather than the one in Boulder canyon. The advocates of the Boulder Canyon reservoir site claim that the construction of a dam at this location would regulate the river sufficiently to meet the needs for irrigation and dwell upon the further advantage that the proposed power house would be 150 miles nearer Los Angeles, which is at present the nearest available market.

Although the need for additional hydro-electric power in this section of the country is not so urgent as the problem of controlling the flood waters of the Colorado River, the time will come within the next decade when this need will be paramount to any other.

The magnitude of the proposed Boulder Canyon project may be illustrated by the fact that it will have seventeen times as large a storage capacity as the huge Khartoum dam on the Nile, which at the time of its construction was thought to be the largest project possible, and the limit to which water could be impounded by artificial means. It will have a capacity four times as great as that of the Elephant Butte dam which is at present one of the largest in the world.

In case the Boulder Canyon site is chosen for the construction of the reservoir, it will mean bringing to the state of Nevada one of the largest construction projects in the country. It will also mean that when the dam is completed a source of cheap electric power will be available which will enable resources of the state in the vicinity of the Colorado River to be developed which would otherwise be wasted. Copper which is produced in Utah and other states and which is now shipped to the eastern seaboard for refinement, could be refined in Nevada with power at the cost this development would afford. It would also be possible with a cheap power rate, to commercially produce the large quantities of borax, iron, vanadium, uranium and gypsum which are deposited in the deserts of southern Nevada.

DOUGHERTY PLAYED ON FOOTBALL TEAM

Some time ago the Associated Press dispatches reported the death of William Francis Dougherty, an American engineer in India. He was stoned and beaten to death by mutinous Hindus in Bombay. An examination of the Registrar's record brings out several interesting facts concerning his residence here.

Dougherty is officially on record at the Office as a student of the University of Nevada in 1908 and 1909. The Registrar remembers him as a man of exemplary character and ideals, always in the fore in student affairs, and anxious to help the man that was down. This merciful quality of his, a constant willingness to extend a helping hand to a brother in distress, was partly responsible for his death, as his over-kindness led him to be incautious.

While a student of the university, Dougherty played on the Rugby team which was then as powerful an organization as is our American team today. He was not a graduate of Nevada, although he pursued extensive work here along the lines of his chosen endeavor, electrical engineering.

After completing the curriculum here, he was employed by the Reno Power, Light and Water Company. He was in their employ, stationed in Reno and vicinity, for several years. Finally, severe electrical burns, sustained while in the performance of his duties, made it necessary for him to leave active work and seek some similar line of endeavor not quite so strenuous.

At this time the world was looking towards the East, and in that direction Dougherty went. He has been prominently connected at one time or another with the foremost American Electrical firms in the east, particularly in India.

While in Reno he became a member of the Reno lodge of the Benevolent and Protective Order of Elks, a membership which he kept up until his death.

COMMITTEE DESIRES IDEAS ON DIVISION OF STUDENT BODY FUNDS

The committee for reapportionment of student body funds met for the second time Tuesday. At the first meeting it was decided that it was impossible for this committee to reapportion funds among the different organizations, due not only to the fact that conditions vary from year to year but also as to the difficulty of allowing the proper amount to each different organization. At this same meeting it was suggested that a council be elected by the Student Body to handle all its financial affairs.

At the second meeting of this committee, suggestions were made concerning the method by which the council would handle the funds. It was suggested that all small amounts of money be handled by a revolving fund and that all large amounts be taken before the council before being expended.

The finer details of this plan have not been worked out by the committee, as it wishes to receive suggestions from different organizations as well as individuals of the Student Body.

This should be of interest to every one as it is a matter of vital importance under present conditions. The committee, therefore, desires that any ideas concerning this plan be mailed to Prof. Haseman or discussed with some member of the committee.

Mistaken Motive

Willie Willets was late to Sunday School and the teacher, inquired the cause.

"I was goin' fishin' but paw wouldn't let me," said Willie.

"That's the right kind of a father to have," said the teacher. "And did he explain the reason why he would not let you go on Sunday?"

"Yeah, he said there warn't enough bait for two."

CO-EDS INSTRUCTED IN ART OF DRESSING

Last Wednesday evening the Y. W. C. A. held one of the most entertaining meetings ever held on the campus. The subject was, "How a Girl Should Dress," and every fair co-ed was interested.

Erma Hoskins, Chairman of Meeting Committee, opened the meeting and introduced Miss Campiglia, who has studied the problem of women's clothes from every angle. Her talk was most interesting and amusing, and with the help of eighteen living models she showed the girls the absurdity of every girl believing that she can wear a particular type of dress because it is the style.

The women of Y. W. C. A. were very appreciative of the hints and suggestions offered them by Miss Campiglia, as the Y. W. C. A. stands for the well but sensibly dressed young woman.

The meeting closed with a piano solo by Miss Eleanor Ahlers.

Next Wednesday evening the Reverend Brewster Adams will talk to the Y. W. C. A. at their Christmas meeting, December 14. Knowing the speaker of the evening, everyone is prepared for something good and a large attendance is expected.

COACH GAINS NEW PLAYS AS RESULT OF EASTERN TRIP

Coach Courtright Obtains Valuable Information by Watching Eastern Teams in Action

By John Cahlan

A few weeks ago "Corky" left for the East to see Notre Dame college in action. He went with the intention of gaining some knowledge of the open game of football, as played by the greatest exponents of this style of play. In this he was successful. He has returned and with him he has brought a whole suitcase full of new plays. Plays, not ones cast aside as useless, but plays which have been used successfully against some of the best teams in the East.

The reason for this trip was to gain some information with which to strengthen Nevada's game. Nevada has been noted, on the Coast, for its adaptability in the use of the open style of football, and "Corky" with this in mind, got some new and unheard of plays from a team which specializes in this department of the game.

Coach K. K. Rockne, of Notre Dame, was interviewed by "Corky" and he stated that without a line coach a team was woefully weak in one of the essentials of the game. He cited the instance of Centre college of Kentucky. Without a line coach Centre invaded Harvard last year and were forced to bow before the Crimson 34-14. This year Centre hired a line coach, again swooped down upon the Harvard green and walked over Harvard defense for a 7-0 victory. This is but one instance of what a line coach can do.

Nevada was clearly outplayed in the line by the California Bears and had the Nevadans been coached in the line, it would have been a different story. "Corky" is essentially a backfield coach and strategist. Could Nevada have the services of a line coach, who knows but they could beat the Bears? Nevada's line has never been as good as the backfield and the reason is clearly seen, the backfield coached by an expert, has absorbed some of the knowledge meted out to them, while the line has had to learn by experience. With a line coach, to give the men in the forward defense the expert advice of the finer points of the game, the Silver and Blue team would greatly improve.

On his trip East Courtright also learned the advisability of spring practice. He stated that at Notre Dame the line-men are practicing the year 'round and by Spring are in good condition. The spring training also keeps them fit and when they return to school in the fall they are ready for scrimmages the first week.

It may be possible that the squad will make a training trip next fall for a week before the semester begins so as to be in shape when school opens. With this in mind and the possibility of a line coach looming in the distance, Ne-

vada has, by all indications, the right to hope that the season next year will be even more successful than the one just passed.

U. of N.

HEAT OF ELECTRICAL FURNACE IS KEY TO INDUSTRY

Recent perfection of electrically heated furnaces has made it possible for the United States to manufacture optical glass of a quality equal, if not superior to, that which this country formerly depended upon Germany to supply.

Now we look no longer to the vaunted city of Jena for this material. A new American industry with electricity's aid sees to it that we don't. Forty-inch telescopic lenses are being turned out by a New York state lens company. Cooling the molten glass at just the proper rate is the scientific secret of good optical glass manufacture.

Formerly most of the glass annealing furnaces of this country were fuel fired; then came electricity.

The even heat of the electric furnace throughout its interior due to electricity's peculiar quality of uniform radiation and the furnace's perfect insulation, its exact control, and its freedom from all gases that might contaminate the furnace charge are proving to be factors enabling America to meet Germany on an even competitive basis.

NEVADA MEN WILL ATTEND ASILOMAR Y M C A MEETING

The week of December 26 to January 3, will find from four to five hundred college men of California, Nevada, and Arizona, gathered in a Y. M. C. A. Student Conference at Asilomar, California. Asilomar is located on the Monterey Peninsula, and is an ideal spot for such a conference.

In a letter from J. D. Foster, a secretary of the San Francisco Y. M. C. A., who helped organize the Y. M. C. F. A. on the Campus, to Leslie Bruce, editor of the Sagebrush, Mr. Foster urged that the University of Nevada do its best to send several men to attend this convention. Mr. Foster said in his letter, "From the point of view of the University as a whole the sending of a few leaders to the student conference will help a great deal in the stimulation of higher ideals and standards of living on the campus, especially if the proper use is made of the delegates after they return."

The Conference Committee of the Y. M. C. F. A. is working to secure men to attend the meeting.

The personnel of the faculty of the conference is one which should command a great deal of attention. Among them are: President David P. Barrows of the University of California; Presi-

dent R. B. von KleinSmid, President-elect of the University of Southern California; J. Stitt Wilson, noted lecturer and philosopher; Dr. Vernon McCombs, Superintendent of the Latin-American mission for the Pacific Southwest; Tom S. Sharp, Executive Secretary of the Student Volunteer Movement; Dr. Lincoln A. Ferris of San Diego, and Dean D. W. Kertz, President of McPherson College of Kansas. This is only a partial list of leaders to be present.

The conference is planned for any high-minded, serious purposed man in any college in Arizona, California or Nevada, who cares for better personal and campus character standards.

Any man on the campus who is interested and might possibly like to at-

tend, is requested to see the conference committee, or Professors Thompson, Wilcox, or Hartman.

CAMPUS PLAYS

Campus plays by campus players seems at last to have reached the point of possibility and the three one act plays to be given next Tuesday by the Campus Players, the new dramatic organization, marks the first step in an attempt to purchase properties for the stage in the Educational Building. Through the efforts of this organization a curtain has been purchased and it is hoped that full equipment may be furnished within the next few years.

Other than stimulating an interest in dramatics, both in study and production, the players will form an effective link between the campus and downtown organizations. The Elks' shows for athletic scholarships can feel free to draw upon University talent; in this way another effective bond between the citizenry of the state and the students can be forged.—W.

U. of N.

GIVE US A NAME

The University of California has the Bear for her fighting, and pre-eminently, athletic emblem; Arizona, the Wildcat; College of Pacific, the Tiger; and Washington State, the Cougar. Within the last few weeks, Stanford has chosen the Indian as her symbol and already, sport writers on the Pacific Coast newspapers are referring to the Palto Altons as "Indians."

Our own school, Nevada, has attained prominence in the athletic world that promises to become nationwide in the very near future. The football team's trip to the Hawaiian Islands last year was mentioned on the sport pages of nearly every paper of importance in the United States. This season, too, the Varsity's victorious invasion of Rocky Mountain states as well as the showing it made against the strongest teams the Pacific Coast had to offer, was given no little prominence in the athletic sections of all the western newspapers. Yet, in all the white-ups extolling Nevada's athletic prowess, there may be found a common weakness—our warriors have no suitable name.

"Sagebrushers," many writers call them, but the word is too long and cumbersome to ever gain wide usage. "Sagehens" is another attempt to name the representatives of the University, but the title has met with little favor. To call a Nevada man a "Sagehen" is inviting the same disastrous result that "Sammie" produced when applied to some hardy member of the A. E. F. in the World War. "Silver Staters," "Renoites," "Nevadans"; all have been tried on the sport-loving public and all have failed.

What we need is a symbol that will lend itself, like California's Bear, to usage in our yells, songs, and college publications. It must be acceptable,

first of all, to the newspaper writers for they will be the ones who will make the most use of it. It must be short, but at the same time, expressive of Nevada's spirit. It must be agreeable to the students whom it will typify. There are 637 students registered in the University this semester; they should have 637 ideas for a good Nevada emblem or symbol. Hand your contribution to any member of the Sagebrush staff. Give us a name!
U. of N.

A PERMANENT POLICY

A permanent policy in athletics, a permanent and definite plan for student organizations, a body more or less systematic in scope as regards student activities, with a few members retained year after year to be constantly in touch with matters of student concern, is a proposition now up for consideration. That system and efficiency and stability may be given our growing body, it is at this time, we believe an advisable move.

Provision should be made in the student body constitution for the election of faculty representatives, men in touch with student life, and a student committee of four or five members who could constitute a finance council of an athletic board of control. A committee of this sort, with the athletic manager appointed by and responsible to it, could, we believe, formulate a definite policy for student action which would be of inestimable value in future years.

The yearly changing of the executive board, no matter how efficient the newly elected members may be, can result only in an ever changing policy and considerable confusion. Experienced faculty men carrying on the work year after year in an advisory capacity can form the link to a definite constructive policy.

Student finances should be carefully guarded at this time. Within the next few years Nevada may apply for entrance to a conference and a budget building toward this purpose should be started. Without permanency in the executive body this cannot be accomplished. Savings can be made in many ways through small items, and a permanent body could accomplish this. A policy should be decided as to number of men making football trips and the expenses on the same.

A definite and permanent plan is need by the students at this time and a new form of organization is necessary to perpetuate this policy.—W.

U. of N.

With the College Scribes

At the present time, more than ever, employers and critics of the college man are demanding that he enter into activities. Questionnaires sent to applicants who are in search of a job, usually contain the question, "In what activities were you engaged?"

Employers realize the difference between the man with activities and the man without them. The man who has engaged in them is a greater asset to his employer because he is a well-rounded man; a good mixer, a man of responsibility and one who has the ability to put something across. He is obtaining an employe who has acquired tact and experience to a greater degree than the average man.

Activities at Carnegie are varied enough that a man may choose the activity for which he is best suited. Activities, publications, musical organizations and class offices offer enough opening for an aspirant.

If the material benefit is not an advantage gained, there is your Alma Mater to think of. The band, for instance, in public performance, is supposed to represent the best the student body can do, in spite of the fact that there are a dozen or more fellows in school who could aid the band but have not the initiative to come out. This is true of every activity.

Then there is the satisfaction of doing something well. The accomplishment of something well done is a pleasure, the demand is ever increasing and it is this demand that has pushed many a man to success.—The Tartan.

DULCET DRINK

He clasped his arms around her waist
And on her lips he pressed a kiss.
Quoth he, "I've sipped from many a cup
But never from a mug like this."
—U. of R. Campus

THUMBS DOWN FOR MARSHALL FIELD

Marshall Field has refused to give employment to girls who bob their hair, wear short skirts or roll their stockings. They would have saved lots of time by limiting the announcement to the words, "No girls wanted."
—The Agonistic

HARD TO EXCEED

"We call our baby Infinity."
"How come?"
"He's the limit."—Froth.

Purple Sage

Prof. : "Equilibrium is where opposing forces come to rest. Give an example."
Frosh: "The cemetery."

IS THAT SO!

John F. Garrity, a prominent Mason Valley rancher, was shot yesterday, through the stomach, by an infuriated and inebriated Indian, who until recently he had had in his employ. It is thought, as we go to press, that he may have been wounded.—Yerington Times.
Tough old country—that Mason Valley. We hope that since they went to press it was discovered that the wound was only caused by the scare.

For further information as to the past and future of Mason Valley see Cox.

Remember the night that he ran the Lincoln Hall Association out of its own home—including Prof. Turner and Fat Harker.

"The Junior Dance—As They Tell It"

A man stops talking when he gets sleepy, but a woman doesn't stop until she goes to sleep.

Soft as the
Shades of night;
Woven with
Fairy-like skill
Far out-rivalling the
Sheen
On butterflies' wings—
Is this
Bit of
Shimmering silk,
Of which I write.
Before this altar of
Feminine grace,
I stand appalled.
Before its
Mysteries I am as the
Untaught child—
Curious and eager
To learn
Diaphanous, bewitching,
Shivering into tiny
Silken shivers
Before the rude puffs of wind—
It hangs on the
Backyard fence.

My, my, what a line, thought the whale, as he swallowed the anchor chain.

He (telling a joke) "Do you see the point?"
She (who is hard of seeing) "If it is what I think it is, I don't and you're no gentleman."—Wampus.

I left her at the darkened stair,
And bent above her glorious hair,
Oh fain would I have kissed here there.
Came the quick warning,
"Don't you dare."

I turned in meek humiliation,
Nonplussed at my temerity,
When whispered from the balcony
Came a sweet, taunting
"Don't you dare."
—Cornell Daily Sun

There is one football man in particular, who needs to be commended for his rigorous training. Farintothentnight he has been seen on the field, between the Training Quarters and the bleachers. Rev) has been showing some splendid teamwork in the last two games and we are sure that it is due to these workouts between dark and midnight.

AS THE SNAKES WOULD HAVE IT

She, timidly: "May I have this dance with you, Percival?"
He, languidly: "Why, yes, Miss Spent, if you can find a partner."

Can you imagine anything as sadly pitiful as a blind artist?

Quacking geese; noisy alarm clock.
Yawns; a gong; patter of feet; splash!
Gow bell; mush; coffee, prunes.
Mad scramble; 7:45's; R. O. T. C.
Lectures; naps; profs; flunks;
Bells! mad scramble; hash; potatoes;
rice,
Calm; more bells; more profs.; 'lab.'
Committees, tennis; loafing; most 'ny-thing.
Bells; potatoes; hash; rice;
Mad scramble; dates; bells;
Jazz; complete exhaustion.

—V. L.

"I'm getting all stuck in this intellectual atmosphere," sighed the statue of Eugene Field as another frosh, outwitted Prof. Layman and parked another slab of Spearmint on his bronze ear.

THE LEADING MAN

Soubrette: "Mr. Boaster tells me he has the position of leading man in that new drama."
Star: "Yes, he leads the cow across the stage in the first act."

JUSCOMINSIR

Officer, who meets a soldier who has his leggins under his arm and coat unbuttoned, grumbles out:
"Hey, there, how long have you been in the army?"
Soldier, good naturedly: "Just come in, sor, how long have you been here?"

Whoopee! Love fourteen and your serve.

Prof. Feemster Drives Up to Classes

Eve passed the luscious fruit
Then clothing came in style.
We'll have to pass the fruit again
In a short, short while.
—Sun Dodger

It looks as though Eve was due for a return engagement. Of course the editor is fond of fruit and I'm not—but

With the winter coming on an' everything—well self preservation is the first law of nature.

The good homely signboard at the head of this collection of borrowed jokes is no more. "THE PICKIN'S" is no more. With new editors and advances in civilization and culture come changes. This modern philosophy is now served under the title of "Purple Sage." Next year it will probably be "LINES FROM PARADISE."

Still there is no cause to worry. This column is like the Gow House Menu. Though the name may change its the same in body and soul.

"THE LIBE AS IT SHOULD BE"
"Please—"
"No—"
"Just one more."
"No—"
"Just this once?"
"Why can't you be satisfied?"
"Just one more, dear."
"Just one then—"

And with that their hands met, for a mere second, while she passed him a sugar coated doughnut.

Prof. Young is responsible for the statement that the interest shown in classical dancing is not due to a love of the classics but is caused by a desire to become better acquainted with the dancer.
—TAPS.

Enough of this, let's turn over a new leaf.

REDUCED RATE PRIVILEGE IS GRANTED TO STUDENTS

Students traveling between Mina and points on the Tonopah and Goldfield railroad have been granted half-fare privileges on condition they travel in parties of five or more between the same points, on same trains and on same dates. Each student in such party must surrender, at time of purchasing ticket, an identification certificate, which may be obtained from President Clark.

The reduced one-way fare for each student member of a party is as follows:

Between Mina and Tonopah \$2.69.
Between Mina and Goldfield, \$3.76.

Students wishing to avail themselves of these reduced fares for the Christmas season are requested to notify Miss Beckwith promptly, although they will be unable to arrange parties until the examination schedule has been posted. Tickets for the going trip may be obtained at President Clark's office on presentation of identification certificate and exact fare.

It was impossible to secure rates over the Southern Pacific and the old fare will hold to Mina. In taking advantage of these rates each party of five will select its leader who will have the ticket made out to himself and party.

U. of N.

HOME EX. APPEASE SIXTY APPETITES AT WEEKLY LUNCHEON

On Friday, December 2nd, the Home Economics Club served a delicious luncheon to sixty people in the Home Economics rooms of the Agricultural Building. The women belonging to this club selected and prepared the entire menu that was served to the guests. The luncheon Friday consisted of:

- Tamale Pie
- Pineapple Salad
- Parker House Rolls
- Bavarian Cream Coffee

The women plan to give a series of luncheons during the coming semester for the benefit of those students who live down town. Tickets for the luncheon will be on sale at various times, but only a limited number will be offered as the Home Economics department is not equipped to handle more than sixty guests.

U. of N.

OVERWORKED

They were sitting on the tramway
And the light was soft and dim;
She seemed so well contented
That no murmur came from him.

"George," she asked "are you reporting

"For that U. of N. Sagebrush, yet? It is shocking how they publish All the scandal they can get."

"No, my love," he whispered softly
And he drew her to himself
"I have left" (in fact that morning
They had laid him on the shelf)

"But," he said, and hugged her closer,
She returning the caress,
"Just at present I am working
For the Associated Press."

—J. B., U. of N.

SIGMA NU DANCE

Friday, December 2, was the night of the Sigma Nu semester dance. The Century Club was dressed up for the occasion in the white, black and gold of the Fraternity. A dozen crests on black hides ornamented the walls; even the dispenser of the punch fitted into the color scheme of black and white.

Between dances, Sigma Nu musical talent nobly avenged themselves on guests and brothers. Early in the evening the Sigma Nu Saxophone Quartette attempted "Poppy Land." Later in the evening Ray Carrol gave a violin selection, "The Rosary." Howdy Wilson proved his dramatic ability by declaiming "I'm Looking for a Bluebird" in such pathetic tones that the women danced closer to their partners for the remainder of the evening.

The Sigma Nu song concluded the musical numbers much to the relief of the dancers. A leap year effect was given by the favor dance. Each woman was given a powder puff in which a Kewpie attempted to hide his birthday costume. This Kewpie held the secret of her next partner.

Those present were the Mesdames Charles Knight, Taylor, Bunnell, Jacks and Turner; the Misses Margaret Mack, Louise Sissa, Gray, Wilson, Shurtleff, O'Sullivan, Porter, Douglas, Harris, Campbell, Miles, Clinton, Braun, Walker, Meek, LeDuc, Taylor, Underwood, Blake, Kennedy, Farwell, Kensingler, Grubnau, Harris, Hayes, Grant, McGee, Thompson, DeHart, Shoemaker, Costello, Sullivan, Patterson, Kervin, Sawle, Porter, Mills Bangham, Clink, Eason, Stevenson, Marshall, Ahlers, Muth, Harriman, Quillici, Ruth Walker, Coates and Adams; the Messrs. Bruce, Brooks, Reed, McNamara, Scott, Westervelt, Byrkit, Conrad, Hitchroth, Greenwald, Jacks, Williams, Turner, Duncan, Baird and Eccleston; Hosts: Frisch, Bunnell, Taylor, Soenson, Carleson, Ross, Harmon, Geo. Cann, Bill Cann, Sadigan, Rutler, Skinner, LaKamp, Wilson, Carroll, Boyer, North, Hicks, Donovan, McDonald, Lister, Proctor, Robinson, Williams, Simpson, Packard, Dean Knight, Rhodes, Durham, Shirley, Gorman, Quillici, Brown, Aine, Fredericks, Brown, Spencer, Harris, Anderson, Skeen.

ALPHA TAU OMEGA

On Monday evening the members of the Junior Class of Alpha Tau Omega were hosts at a delightful dinner at their home on University Avenue. In the center of the long table was an evergreen bordered lake, whose surface mirrored the golden sails of tiny boats which floated upon it. Far out in the water rose the cliffs of a rocky island, topped by a mediaeval stone castle from whom narrow windows bright lights gleamed. Candles with black and gold shades bearing the fraternity emblem gave light at the end of the table and tall gilt baskets filled with long stemmed tea roses reached up toward the graceful streamers which festooned the ceiling. Dainty favors and place cards marked places for Prof. and Mrs. R. C. Thompson, Mr. and Mrs. L. A. Ferris and Misses Rose Mitchell, Betty Hunter, Mary Margaret Shaughnessy, Frances Yerington, Letitia Sawle, Dorothy Williams, Ruby Spoon, Mary Cox, and Messrs George Hobbs, Donald Finlayson, Harry Duncan, Otis Wright, Herbert Marshal, Leslie Burke, Peter Perry, Merle Hardy and Alven Pierson.

D. K. T.

On Monday evening at the home of Mrs. Frank E. Humphrey, Miss Genevieve Chatfield took the final degrees of membership of the D. K. T. sorority. After the services a brief business meeting was held. The members present were Misses Gladys Smith, Vera Wickland, Louise Sullivan, Marian Muth, Janet Marshall, Effie Mack, Leona Bergman, Isabel Bertschy, Evelyn Walker, Louella Murray, Beatrice LeDuc, Hazel Murray, Marian Lothrop, Alma Boeke, Genevieve Chatfield, Rowene Thompson and Esther Crump. Mesdames Frank E. Humphrey, George B. Thatcher and A. E. Hill.

Genevieve Morgan has returned to the Hall after spending a week in Virginia. She has been convalescing after an operation on her throat.

Nina Kitzmeyer spent the week-end with her sister, Zelma, at the Hall.

Frances Yerington spent a few days of the past week in Carson.

Adda Vickers has returned to the Hall after a short confinement in the hospital.

During the week-end, Willamida Lee visited her home in Carson.

Last Friday, the sophomore girls were hostesses to the women of the Hall and several men and women from town at an afternoon tea. Teas are held regularly at Manzanita and everyone is cordially invited to come between the hours of three and five on Friday.

RENO NIGHTS

U. of N.

THE HUMAN SNAKE

Of the various species of reptiles, the human snake is the most deadly and despised. It is from this type rather than his comparatively harmless scaly brothers that the common expression, "low as a snake" has arisen. He is present wherever members of the helpless sex are found and it is to be lamented that our campus is infested with this reptilian scourge.

This insidious creature prefers to work at night. Creeping up to Manzanita he lies in wait for his helpless victim whom he grasps by the arm or as is more often the case, by the waist. He then conducts the more or less unresisting victims to his lair.

This lair is usually a dark secluded spot such as the Training Quarters or the front steps of the Mining Building. After they have arrived at this dark spot he fills her innocent young mind with such flattery as his cunning serpentine intellect summons up readily. This flattery and a marcel are his chief weapons.

Nothing seems to interfere with this snaky monster and his unholy passion for co-eds. In spite of storm and tempest's roar he can be seen any night on the campus. Like any other predatory reptile he prefers to pursue his phantom glidings in the shelter of the darkest nights.

The seriousness of this reptilian plague lies in the fact that after a co-ed has had two or three experiences with one of these scaly monsters she succumbs to his hissing lies. In the parlance of the campus she is said to have "fallen for his line." From this time on she is an object of pity and an outcast among her sisters.

U. of N.

Love's Sacrifice

He was the youngest English professor at the college.

That evening, after supper, he called up that dear little pupil of his that lived down the street to have his customary half hour's chat with her.

A clicking noise sounded in his ear, followed by a sweet silvery voice.

"Oh, Werner, is that you?"

It was the dear little girl.

He answered gleefully: "This is he."

"Oh, tell me. Is Werner there?"

He spoke a little louder.

"This is he."

"He's there isn't he? Tell him to come to the phone, please."

He swallowed a lump in his throat,

Thrilling

figdget on his left foot, drew a little closer to the mouthpiece and spoke with all the voice he could muster.
"This is he."
The sweet voice trailed off into a sigh depicting mental anguish.
"Oh, dear me! I'm so sorry Werner isn't there. When will he be in?"
It was a hard thing to do, but he did it. With a resigned look on his face, he dropped the receiver, and throwing all correctness of speech to the winds, cupped his hands to his mouth and shouted:
"This is him, Werner!"
When he picked up the receiver the silver voice floated ecstatically back to him:
"Oh, Werner, you old kidder, why did you fool me so."

Eyes to the Front.
In McGill University, Montreal, the co-eds of the freshman class are distinguished by a bit of bright green ribbon worn around the ankles. Perhaps it is time to brand our freshmen.

U. of N.
OUR WEEKLY BLAT.
The stillness of the night was suddenly broken by the loud, strident tones of a man's voice. He was arguing, expostulating with, bitterly abusing some one. Bitter, sarcastic invective poured from his lips yet no word came from the poor unfortunate upon whom these vials of wrath were being poured.
"And t'think all I've dun fer you," continued the voice. Still he failed to elicit any reply from the other.

"Haven't I given you grub? Ain't I made your life easy? And dis is de way you repay me?" At last I was beginning to get something out of this jumble of words. It was evidently the old case of one criminal giving the other the "double cross," and the fact that his duplicity had been discovered meant that terrible consequences would follow. It was also plain by this time that the speaker had worked himself into such a rage that he was no longer master of his passions.
"Squealing, huh," he shrieked in a veritable frenzy of rage. "You swine, you." And grabbing the animal by his tail he hurled the pig through the window, resolving never again to house pets under the steps.—J. W. K.

MALONE QUALIFIES AS PICTURE MODEL

The 1922 Artemisia has received a number of advertising circulars from different engraving companies. In looking over one of them a familiar face strikes the old Nevada student. The picture of George "Molly" Malone was selected from last year's Artemisio by a prominent engraving firm for the purpose of illustrating well-chosen backgrounds for half-tone cuts. His picture is set in various back-grounds, and altogether covers two pages. This is quite a compliment by the engraving company to the ability of last year's staff, as the pictures are always selected because of their superior quality and finish. We cannot help but congratulate the company on its choice as they have picked, perhaps unwittingly, a representative athlete from the far West. In the two pages of pictures "Molly's" natural manly pulchritude is set off by a short aggressive pompadore and a big Block N sweater.

PROFESSOR SEARS IS AUTHOR OF NEW CHEMICAL MANUAL

Member of University Faculty Produces Work on Qualitative Analysis With Many Improvements in Method

Professor George W. Sears of the Department of Chemistry at the University of Nevada has recently written a new work on qualitative analysis, which is now in the hands of the publishers and which will probably be placed on the market within the next two or three months.

The new manual is of exceptional interest to teachers of chemistry in colleges in that it contains an entirely new and systematic method of analysis for acids. It is based on the same principles of separation and detection as are commonly used in metal analysis and has proven successful in the work of students at the University of Nevada for the past two years.

The general arrangement of the subject matter is the outgrowth of over ten years experience with beginning students, and the aim of the text is to train students not only in the method of analytical chemistry, but also in the principles underlying chemical reactions from the standpoint of the law of mass action. Except in a few places where an undue amount of manipulation would be involved, only quantitative methods are used. All procedures outlined in the book have been thoroughly tested in the laboratories of the University of Nevada by students under actual working conditions, and the excellent results obtained assure the practicability of the system.

The need for a new and more systematic method of analysis for acids has long been felt among university teachers, and it is expected that this book will arouse considerable interest upon its publication.

Professor Sears received his M. S. and Ph. D. from the University of Illinois and has been connected with the Department of Chemistry at the University of Nevada since 1917. Since coming here, Professor Sears has done much in helping to raise the standard of his department to its present high position, and his many friends will be glad to know that the results of his experiences here are to be included in his text book, which will doubtless be adopted by many other colleges.

U. of N.

U. TELUM GIVES QUANTITY OF FREE ADVICE TO THOSE WHO SEEK DATES

There are students, who, in their constant search for pleasure in the form of week-end campus dances, rush excitedly into the office of the President, and, seemingly oblivious to the fact that the gentleman whom they are inconveniencing has appointed a committee to attend to their needs, begin clamoring loudly for a date. For the benefit of such students, the person at the business end of the typewriter desires to inform them that the Student Affairs Committee will consider their requests and decide whether the date shall be given or not.

The Student Affairs Committee has been in existence for several years. Its duty is to consider all applications made by student organizations for week-end dates. Blanks, which are to be filled out and handed to the Committee, without any trouble to the President, may be secured from the President's secretary.

Although the committee has been functioning for some time, there seems to be doubt, ignorance, or an attitude of indifference in the minds of many students regarding whom they are to see in reference to the coveted Friday and Saturday evening reservations.

In order to make the matter perfectly clear to the general public these rules could be very well followed.

1. Make applications to Vice-President Lewers, Miss Mack, or Professor Turner.

2. Hand in the application at an early date.

3. Above all, do not, bother the President with little non-essentials concerning your dances.

U. of N.

The rooster like a lot of men,
Can crow to beat the deuce;
But when you crowd him for results,
You find he can't produce.

GYM WAS ELABORATELY DECORATED FOR PROM

The Junior Prom Saturday night showed all the attractive features which had been anticipated.

The predominate effect in the decorative scheme was brought out by huge masses of cedar boughs. Circling the balcony and suspended from it, filling corners, and scattered along the walls, these greens gave a woods setting, filling the gymnasium with their fragrance. The branches were effectively intertwined with narrow strips of green and white crepe paper. A pink gauze was stretched across the ceiling of the gym; the electric lights from above were made to shine through this pink and cast a rosy glow over the room. At one end of the gym was a Block N in electric lights of blue; at the opposite end were the numerals of '23 outlined in white lights. At times, during the dance, all lights, save these, were extinguished. The marked effect of shadow and light was extremely pretty.

The programs were of blue and white, in the shape of pennants, stamped with "Nevada" and the traditional junior hat, adorned with the letter of '23. During the evening delicious punch and mints were served.

The juniors have proven themselves good entertainers. The clever phases in novelty and originality merit much credit.

Patrons and Patronesses of the affair were: President and Mrs. Walter E. Clark, Mr. and Mrs. A. E. Turner, and Miss Margaret Mack.

COMMUNICATED

ROLES IN ONE ACT PLAYS CARRY NO GUARANTEE OF MEMBERSHIP IN "PLAYERS"

It is the wish of the membership committee of the Campus Players to correct a false impression that has gained currency on the campus. It is this: That anyone who has made the cast of the one act plays to be given next week is sure of membership in the club, or that anyone who did not make the cast has lost all chances of becoming a member. This is not at all true. Those who have made the casts are not elected to membership just by virtue of that fact. These plays are tryouts for them, and they must be judged by the entrance committee. It does not mean that others cannot become members. Any student at any time may be elected to membership by proving his interest and ability to the entrance committee. There are many students on the Hill who have dramatic ability, but who for some reason were not able to try out for the plays, or else there were not enough suitable parts for them.

No one should feel that he is discriminated against. Students are always eligible by complying with the entrance requirements.

U. of N.

LIONS AT LUNCH ENTERTAINED BY UNIVERSITY TRIO

At the Fathers and Sons' Banquet, given by the Lions Club recently, the University Trio played several selections for the guests and members. The University Trio is made up of three excellent musicians: Miss Genevieve Chatfield, Mr. Ruel Taylor and Mr. Theodore Johnson.

The trio has won much praise for their ability, not only at the Lion's luncheon but also at different times during the past semester when they have played at various functions.

The selections played at the luncheon were:
Rachmanoff's Prelude.
Godart's Waltz in B Flat.
Tales of Hoffman.

The University Trio has also been asked to play for the Sparks Progressive Club, during the coming week.

U. of N.

Times are changing! Times are changing! Women are coming into their own.

It used to be that the men gave the women their frat pins—that's the way it used to be in the good old days.

But it was only a week or so ago that a buxom lad of some twenty hard winters appeared in the Library with a sorority pin securely lashed to his coat.

ATHLETIC MANAGER ACCEPTS POSITION WITH LOCAL FIRM

John Harrison has resigned as Athletic Manager and withdrawn from school to accept the position of advertising manager for the local distributing branch of the Osen Motor Sales Company. The territory over which his jurisdiction extends includes half of Nevada and the northern portion of California, in which divisions are twelve dealers.

Harrison's debut into the advertising world was made a week or so ago when he edited the first volume of a monthly booklet setting forth the merits of the Dodge Brothers' car. The pamphlet was illustrated with cartoons drawn by Mel Irving with whom the Campus has become acquainted, this semester, through his clever pen and ink work for the Sagebrush.

SUGAR WEEK WILL ESTABLISH MARKET FOR HOME PRODUCT

The Reno Chamber of Commerce has issued a proclamation proclaiming a "Sugar Week" for Nevada. The purpose of this sugar week is to market in Nevada the sugar refined by the Lahontan Sugar Refining Company of Nevada. This is a comparatively new industry here, and it is hoped that through the means of this sugar week, that a permanent market can be found in the state for all sugar raised and refined within the state.

U. of N.

EDUCATIONAL PROGRESS IN SOUTH PHENOMENAL

Dr. Clark has returned from his trip through the South and East full of praise for the rapid industrial, commercial and educational development, especially in the South. The things that most impressed the President were the rapid strides toward betterment being taken by the state universities and the state legislatures throughout the Southern states.

In 1920 the University of Louisiana had no definite policy; at the best, it had, perhaps, a very indifferent plan and equipment. At this time the University's running expenses were two hundred thousand dollars, which was the proceeds from a special tax.

The state legislature is now carrying out a program that will give the University of Louisiana seven million dollars for her plant and equipment between 1920 and 1925.

After 1925 the legislature will give the University one million each year for running expenses.

The University of Alabama is, financially, one of the most fortunate colleges in the South. It owns twenty-five thousand acres of coal land that is, at a conservative estimate, valued at twenty-five or thirty millions.

The State of North Carolina, which a generation ago spent only fifty thousand dollars for all types of education, granted, in its last legislature, a million and a half for new buildings and equipment during this biennial. And more than this the legislature promised an additional million and a half for the coming biennial. The running expense for this biennial will be five hundred thousand per year.

When such figures as these are compared with the pitifully small sums devoted to university work up until 1915 a good idea may be had of the remarkable development going on in the region.

KAPPA LAMBDA HAS FIRST INITIATION

Last Sunday morning at 1 o'clock, Kappa Lambda, the new local fraternity recently organized on the Campus, held its first initiation. The four pledges were put through several real tests on the Quad and from there the scene of action was transferred to the top floor of Stewart Hall where the more formal procedures were staged. Several novel features were introduced to entertain the old members at the expense and inconvenience of the initiates. After the ceremonies, which lasted several hours, the fraternity members adjourned to the Grand Cafe where a special breakfast was served.

The charter members of Kappa Lambda are: Francis Walsh, Anthony Zeni, Eldon Wittwer, Howard Westervelt, Lawrence Quill, William Thomas, Hulbert Horn, Lloyd Coates, Henry Ahlers, Willis Pressel, Ottoway Peck, James Koehler, Theodore Elges, and William Romwall.

The new members are Sydney Robinson, Ennis Kinsella, Clinton Smith and Sydney Holt.

SCIENTIFIC ENGINEERING

THINNING DEPOSITS OF IRON ORE REJUVENATED BY ELECTRICAL SCIENCE

This is the Iron Age. An Aluminum Age may follow—but its sun is far below the eastern horizon.

Iron is essential to the present high degree of usefulness and independence which the United States enjoys among the nations of the world. Necessary production and improvement of iron and steel depend upon research by metallurgists, chemists, physicists, engineers and geologists.

Each year there are consumed in the United States about 75,000,000 tons of iron ore. Methods of smelting now in vogue demand ore containing 50 per cent or more of iron. Known deposits meeting this requirement are being rapidly depleted. To be sure, they will last many years. But what next? One answer is: New deposits of rich ore may be found in our country; but the search has already been diligent. If found, rich ore bodies may not be advantageously situated in respect to transportation, blast furnaces or steel mills. A second reply is—Import: there are rich ore deposits in other countries, some of which are already controlled by Americans. Objections are obvious, especially in times of national defense, when iron is most needed.

A third solution of this problem has long been sought by scientists and inventors. Large sums of money have been devoted to experiments. Success at length seems assured. It is the economic utilization of low-grade ores. There are vast deposits of such iron ores conveniently situated as to transportation and existing iron and steel industries. D. C. Jackling and associated engineers, members of the American Institute of Mining and Metallurgical Engineers, after exhaustive research followed by experiments on a semi-commercial scale, have developed a practical process. Five years of hard work were necessary in which all previous knowledge was utilized and hundreds of thousands of dollars were spent.

Large quantities of low-grade ores are of the magnetic variety. It is to such ores that the new process applies. There are estimated to be many billions of tons. These ores are to be quarried in huge quantities, crushed and ground, and then the iron-bearing particles will be separated from the remainder by electro-magnetic methods. This selected portion is sintered (par-

tially fused so as to form masses) and crushed to convenient size. A rich concentrate results, in acceptable condition for the blast furnace.

Extended experience in mining and working these lean ores will doubtless bring improvements, and, with continued research, great economies may be effected. This beneficiating of low-grade iron ores, so as to make them usable, must be accomplished if the United States is to continue to hold its position as a steel producer on the present scale. The studies have not been confined to any single ore deposit. Ores from many localities have been put through the tests. Machinery and methods of great value to the iron and steel industry, as a whole, have been developed. The first unit (costing \$4,000,000) of a large plant for the concentration of these low-grade ores is under construction in Minnesota. The cost of the complete plant has been put at \$60,000,000; its capacity would be 100,000 tons of rock daily, yielding 40,000 tons of concentrates.

SOPHOMORES SELECT SCRANTON TO STEER '24 SHIP OF STATE

Chester Scranton will guide the class of '24 for the next semester.

The Sophomores last Thursday held their regular election and such is their decision. Louise Grubnau was unanimously chosen to assist him in the office of vice-president. Chris Sheerin was also unanimously elected to look after the sophomore money.

Rivalry ran high among the candidates for secretary. Justine Badt won out over her nearest opponent by two votes, receiving thirty to Bessie Jones' twenty-eight and Frankie Heward's twenty-four.

The nomination of candidates for the class offices was held last Wednesday. Scranton and Cahlan were nominated for President, and Bessie Jones, Justine Badt and Frankie Heward for secretary. Louise Grubnau and Chris Sheerin were elected unanimously at this time. It was decided at this meeting that those members who had not paid their class dues would lose their privilege to vote on the following day. The result was that most of the belated dues were paid.

IMPROVEMENTS ADD TO EFFICIENCY IN SAGEBRUSH OFFICE

Friend Alk Discourses on the Advantages of Being a Scoop Artist With All the Latest, Modern, Improved Equipment at Hand

By ALKALI

Do you know, it isn't half-bad to be on the "Brush" staff this year. In fact, I kind of feel sorry for the student who hasn't got his or her name in the mast head; that list of names which is always printed above the editorials and which nobody ever reads. There's one good thing about that mast head, however,—it helps to fill up space; just as this article does.

But to pick up the threads of the story, resume the article, get back to the point; or, in plain campus slang, to drive on—the Sagebrush staff is a mighty nice organization to belong to, because if you are a member of the staff you can loaf in the Sagebrush office and that's what I've taken 138 words (count 'em) to tell you.

Now that I've filled a little space by writing a lot of stuff that could easily be condensed into one sentence, I feel much better and will now try to tell you something about that office which I mentioned in the last paragraph.

It was a sorry looking sight when we first moved into it last September. Littered with papers, the desks covered with the accumulation of a summer's dust and the windows sealed with cobwebs, it didn't seem as if it would ever be a place where one would want to work or where one could work; but an afternoon with a broom, dust-cloth and mop worked wonders and slowly but surely the south-east room in the basement of the Physics Building began to look more like an office and less like a trash heap.

The first week of school there was only one typewriter on which to pound out enough copy to fill eight pages, the second week there were two, and a little later a third was added to the collection. At this time, an urgent call for a table, which would be the right height for a typist to work on, was made by the staff members. Through the permission of President Clark, the kindness of Mr. Lynch, and the purse of the Business Manager lumber was purchased and a table, or shelf, built along the north wall of the room. This satisfied for a time, the nimble-fingered exponents of the Hunt and Poke system, but it didn't satisfy them long. Reporters are awfully temperamental, anyway, and soon Bolshevickick muttering reach the Editor's ears to the effect that an adequate filing system was needed for the thirty-odd newspapers that came, every morning, from other schools. So once again the Business Manager had to dig down and dig up and, with Al Preston's supervision, a filing rack was built and placed in a corner of the room. The thirty-odd exchanges are now out of the way, yet easily accessible, and several students, transfers from other schools, drop into the office once or twice a week to get the latest "home town" news. But, as the lady remarked as she threw the rolling pin at her husband, "That ain't all, there's more to come!"

And more has come. Within the last

two weeks, two more typewriters have been placed in commission and there are now five machines on active service with the Sagebrush news-hounds. And they see active service, too, believe me. If you have your doubts about this statement, come down to the office some Monday or Tuesday, when the last mad rush to get copy written is in progress. If the smoke from red-hot keys doesn't make your eyes smart and their ceaseless clatter doesn't make your ears ring, I'll miss my guess.

Seems to me I told you a while back, yes, I know I did, that the Sagebrush office was a good place to loaf. Well, it is, when there's no work to do, but that's not often. However, working or loafing, in the "Brush" headquarters you are sure of comfort. So situated that it gets its full quota of sunshine and with a radiator that really radiates, in winter or summer, the room is always comfortable. Even in zero weather, the office is warm enough so that a reporter may take off his coat, roll up his sleeves, and work in approved newspaper fashion. But the office is not only comfortable, it is also convenient. Just a feather's throw from campus headquarters, Morrill Hall, and with no long flights of steps to climb; why, it just couldn't be located any better.

Guess I've filled about a column so I can quit now, with a perfectly clear conscience, and turn this collection of disjointed ravings over to the Editor and his blue pencil. But, before I go, if you think I've done nothing but rave, why come on into the office some day and get acquainted,—with the office, I mean. That's all.

U. of N.

FOOTBALL LETTERS AWARDED VARSITY

President Eddie called to order a meeting of the A. S. U. N. in the Education Building on Friday at 11:15.

Yell Leader Hughes aroused opening enthusiasm with a big "NEV" yell. The attendance was smaller than that at any previous student body meeting, but the "NEV" and Varsity yells rang with the proper spirit in spite of the diminishing rooting section.

Phil Frank, Chairman of the Artemisia Committee, reported much progress and showed the results of the diligent work of himself and his committee. A great deal of the work left unfinished by last year's management has been cleared up.

The Student Body Treasurer, Mel Sanders, submitted a detailed report of the finances and the report was accepted.

Jack Pike, President of the Junior Class, extended a cordial invitation to all students to attend the Junior Prom on Saturday night.

It was moved and carried that the Stanford game be made the letter game. Letters were awarded to the following men: Fisher, Hobbs, Pierson, Duborg, Carlson, Reynolds, Martin, Bradshaw, Reed, Foster, Colwell, Middleton, Scranton, Church and Johnson.

The final motion was carried that six sweaters and six blankets be purchased with student body funds to be given to the men who had earned them during the football season.

The Joy Of Giving

On one day in the year all Christendom pauses in the pursuit of gain and dedicates itself to the idea that giving is better than getting.

And what would "He" or "She" rather have than your photograph?

WHERE IS BLOCK N'S GAY SILVER SERVICE?

'23 Would Have Trophies Placed Where Common Students Could Share With Block N, Nevada's Past Athletic Glory

To the Editor:

In reading an article about Home-Coming Day at the University of Washington I noticed the following sentence: "A special feature will be the display of Washington trophies." The question instantly came to my mind, has Nevada any trophies and if so, where are they?

I am aware of the fact that in the Library there are a couple of tarnished cups set high up on card-index cases which the curious student may, if he looks closely, learn have been awarded for inter-class athletics. But hasn't this school some real trophies some place that would be of interest to all the students? Aren't there some cups or other forms of rewards standing, dust-covered, in some forgotten corner that would recall past victories to new students as well as old? If there are, I wish to suggest that they be brought to light and placed in a case in the Library where all may see them or, if this plan be impractical, that they at least be unearthed once each semester at some Block N Society dance.

NOTE—The University of Nevada has a goodly collection of trophies, which, however, are allowed to languish year after year in glass cases in the Training Quarters. In addition to these silver cups there is a large collection of excellently framed pictures of banner athletic teams and interesting data concerning track and field records. The men who made them, the members of Block N, hold their meetings in the Training Quarters and are the only ones who now enjoy these exhibits. If practicable, they should be more openly displayed, or at least should be brought out once or twice each year at the big Block N dances.

FROSH NOMINATE AND ELECT FOR 1922 SEMESTER

One of the final meetings of the semester was held by the Freshman class last Tuesday afternoon. Nominations were made for next semester's officers. The presidency was unanimously given to Bill Organ, Frosh Athletic Manager for the past semester. The other nominations were:

For Vice-President—Hester Mills, Ann Porter, Alice Norcross, Jane Kervin.

For Secretary—Katherine Schaeffer, Margaret Griffin, Rae Griswold.

For Treasurer—Tom Mullan, John Fulton.

A meeting will take place on Thursday for the purpose of holding the election. The retiring president, Rene LeMaire expressed his thanks to his fellow classmates for their kindness and support.

A busy-business meeting was held in which it was decided to pay the remaining amount on a bill of almost a hundred dollars presented to the freshmen by Louis Berrum of Moana, for damages alleged to have occurred during the frosh-soph hay-ride. Forty dollars has already been paid on the bill.

President-elect Organ will lead the class of 1925 through its second semester, and aid them in putting on a successful Glee.

RENO ENGINEER TO ADDRESS ELECTRIC CLUB DECEMBER 8

The regular business meeting of the Electric Club was held at four p. m. December 1st, in the Electrical Building. After a short meeting plans were laid for the meeting Thursday night, December 8th, at which time Mr. Wentworth of the Reno Power, Light and Water Company will speak to the Electric Club and all Engineers who care to come.

All Engineering students of the University are invited to this meeting to hear Mr. Wentworth. After the program refreshments will be served. We would like to have a good crowd out, as we think Mr. Wentworth has something that will interest all of us.

Thursday night, 7:30 p. m., Room 101 Electrical Building.
