

German Students Are Given Aid by American Service

GENEVA, Switzerland (NSFA).—More than a thousand German emigrant students have been given financial or other forms of assistance within the last nine months by International Student Service, the organization designated by James G. MacDonald, high commissioner for German refugees, to take full responsibility for all assistance granted to emigrant students. Some 111 students have received scholarships by which they have been enabled either to continue their studies in their chosen fields or to take reorientation work which will fit them for professions in which they are more likely to find employment. Others have been given detailed advice with regard to possibilities and conditions of study outside Germany, based on elaborate information compiled about study and living conditions in university centers of Europe and America.

In a recent report of the organization, some emphasis is laid on the situation of non-Aryan students and professors who have been prevented, through legal measures, from carrying on their academic work in Germany. Keeping this fact in mind, says the report, the I.S.S. is carrying on the work "with a view to relieving the congestion in certain university centers. As the majority of the refugees are Jews, this has tended to create a feeling of anti-Semitism in countries where it had hitherto not existed." It is pointed out that relief has been strictly constructive in character, for those students alone who have plans and good prospects of being able to support themselves within a reasonably short period. Assistance is intended for all German citizens, irrespective of race or political opinions, who have studied in Germany and who have left the country. In addition, responsibility has been taken for students unable to study in Germany who were not German citizens but whose means of subsistence came from Germany. Every student is treated as an individual case, and efforts have been made to persuade those students to whom financial help has not been given to reorientate.

The sum of \$15,000 has been involved in the work, of which the main part has been carried on by the Geneva, Paris and London offices of International Student Service. Committees in Holland, Scotland and the United States, as well as special collaborators in Belgium, Italy, Palestine, Spain and Turkey, have also played important roles.

Yale Begins Drive To Get in Touch With New Students

NEW HAVEN, Conn. (NSFA).—In the belief that the break from school to college should be made no more disruptive than necessary, Yale is starting this spring a program designed to improve the articulation of school and college work. The first step has been the creation of an advisory committee on programs of study, of which Professor H. Emerson Tuttle, master of Davenport college, is chairman, to provide more intimate contacts than heretofore with the schools and with those boys in the schools who intend to come to Yale.

Professor Tuttle will visit the schools, conferring with the masters and with any boy who may care to meet him, to the end that the course of study pursued by the boy, especially in his last year or two at the secondary school, may prepare him as effectively as possible for the work he may wish to do at Yale. Special emphasis will be placed on the possibility of putting the student into sophomore work or advanced freshman work in subjects where his school training has gone far enough to make this possible.

There has been some of this placement of freshmen in advanced courses for several years, but the procedure proposed is expected to stimulate both the school and the boy to attempt more advanced work because of the explicit assurance before coming to Yale that, if the work be well done, the student may definitely count on entering the more advanced courses when he arrives.

According to President James Rowland Angell "it is not intended to shorten the ordinary four year course by this procedure, but rather to make it more significant and intellectually vital."

"The whole plan," President Angell says, "will involve the interpretation to the school and to the boy of the offerings of the study program at Yale, both in freshman year and later, and will certainly do much to relieve the not infrequent complaint that freshman work is merely a repetition of what they had previously been familiar with, and as such lacking in expected interest and stimulation."

"It is essential to bear in mind that a college course of studies should, if possible, be planned as a comprehensive whole, extending over the normal four year undergraduate period," it is pointed out. "A good college course is not a series of one year programs. Since college work culminates in the advanced upperclass work in some field of concentration, it is the latter which gives purpose and unity to the whole college experience."

James Hammond To Edit Section Of China Paper

James D. Hammond, graduate of the University of Nevada in 1930 and former editor of the Sagebrush, has recently been promoted to the position of editor of the Shipping Green of the China Press, the largest English language newspaper in continental Asia, according to word received here.

The Shipping Green section contains interviews with notables who arrive on liners from all parts of the globe. Hammond meets the ships as they dock in Shanghai, and has personally interviewed well known persons who have visited there. He also conducts a column for the Press.

Hammond, who wrote the "Gab and Gossip" column for the Fallon Standard before he went to China, has resumed the writing of a column for his home town paper similar to the one which he writes for the oriental paper.

The column, in which he discusses eccentricities of celebrities, as well as stories of stowaways and beggars in the orient as they have been told to him by authorities, is written under the pen name of J. D. H. and is called "Jackrabbing Abroad." His column in the Fallon Standard will appear for four weeks and it is possible that it will be continued.

College Newspapers Now Less Provincial, Declared

College newspapers are becoming more and more interesting because provincialism is on the decline, according to an editorial which appeared in the Trojan of the University of Southern California.

"The college newspaper is growing provincial. This is what a sociology professor at Yale told a group of eastern college editors recently, and with him we disagree. Provincialism has been one of the faults of the college newspaper of the past, unfortunately. Few editors have looked beyond their own campuses for material to run in their columns, and few have bothered to inquire what was going on in the world and interpret it for their readers. But to say that provincialism is growing is an untruth, because it is actually on the decline.

"Ten years ago current topics were seldom if ever recorded in the editorial columns; today the paper has become both a mirror and a moulder of public opinion.

"It must not be supposed that the greater interest of the college editor in the affairs of government and the nation is due to a remarkable and peculiar influx of intelligence into the editorial chairs of the nations universities. Rather it is but an indication of the greater consciousness on the part of youth in the importance of acquiring early both a knowledge of and an interest in government."

U. S. C. Forms Civic Council

LOS ANGELES, Cal.—The University of Southern California announces the organization of the Civic Affairs Council of government and the department of political science of the University. It has for its members service and women's clubs; civic, patriotic and religious organizations; and educational, business and professional groups.

National Institution of Public Affairs to Train Students in U. S.

Plan Similar to Rhodes Scholarship for Selecting Posts in Washington School for Study of Politics

NEW YORK, N. Y. (NSFA).—Formation of the National Institution of Public Affairs to provide practical training for college students in public service and leadership was announced by Chester H. McCall, assistant to the secretary of commerce, Thursday in a radio address sponsored by the National Student Federation and broadcast over the Columbia network. On a plan similar to the selection of Rhodes scholars, the students of the institution will be chosen from juniors, seniors and graduates of universities and colleges throughout the country. Present plans call for the first students to come to Washington early in 1935.

The National Institution of Public Affairs is an outgrowth of the proposal for a "laboratory for leadership in public affairs" presented by McCall at the last annual congress of the National Student Federation. Preliminary steps and details of the organization of the student training course have been developed by Otis T. Wingo Jr., secretary of the organization committee, working in conjunction with the central office of the National Student Federation.

The institution, self-governing, privately financed, non-partisan and non-political, but enjoying the cooperation of the national administration, will bring this group of young

American Council on Education; Dr. Walter M. W. Splawn, member of the Interstate Commerce commission, former president of the University of Texas and former dean of the graduate school, American university; Dr. Charles E. Clark, dean of the Yale university school of law, and Dr. Arnold Bennett Hall, director of the Institute for Government Research, Brookings institution, and former president of the University of Oregon.

In addition to the Washington activity, the institution will promote, through the National Student Federation, the formation of non-partisan public affairs clubs at colleges and universities throughout the country. These clubs will study the practical operation of government and concrete aspects of public affairs, and their members will be encouraged to engage in the campaigns of their own political parties.

Civic duties and responsibilities will be the keynote of the institution's nationwide program. Sixteen such clubs have already been organized under the auspices of the N.S.F.A. and the associated students of the

LUCKIES are All-Ways kind to your throat
— so round, so firm, so fully packed
no loose ends

We like to tell about the finer tobaccos in Luckies—the choicest Turkish and domestic, and only the mild, clean center leaves—they taste better—then "It's toasted"—for throat protection. But we're just as proud of the way Luckies are made. They're so round and firm, so free from loose ends. That's why Luckies always "keep in condition"—do not dry out. Luckies are always—in all-ways!—kind to your throat.

NOT the top leaves—they're under-developed—they are harsh!

They taste better

NOT the bottom leaves—they're inferior in quality—coarse and sandy!

Frosh Walk Away With Interclass Meet Saturday

First Year Men Win Seven Events to Gather 69 Points

MANY RECORDS FALL

Dick Haman Smashes Two Records, McDow Runs 100 Yards in 10 Flat

Completely outpacing the other teams entered in the meet, the freshman class team scored a total of 69 points to win the interclass track meet Saturday. Dick Haman, star freshman athlete, broke two standing records of the university during competition.

Haman established new shot put and discus records and placed first in four events, the shot put, discus, high hurdles and high jump.

Frosh Win Seven Events

Freshmen led in the meet with a total of 69 points, juniors second with 30, sophomores third with 28 and seniors last with 18 points. The freshman team won seven events taking firsts in the 100 yard dash, shot put, high hurdles, high jump, low hurdles, discus and broad jump. Times made in the meet, according to Coach C. E. "Buck" Mitchell although not outstanding, indicate that Nevada will probably have a strong team this year. Mitchell was especially pleased with the showing made by the freshman tracksters, saying that "with training, the freshmen will probably develop into a championship team for Nevada."

Mitchell was elated by McDow's 10 flat time for the 100 yard dash in the first meet of the year and the performance of Richards, freshman, in the broad jump. Richards won the event with a 22 feet 3 inch leap and should raise this from one to two feet more before the season is over.

The meet showed that the varsity team is strong in the distance runs, with Paul Leonard winning the mile and two mile runs, the javelin, with Stowell winning this event, the 440 and the 880 yard runs, and the pole vault.

Hromadka, veteran Wolf hurler, did not take part in the meet Saturday, but is expected to represent the Wolf Pack in intercollegiate meets.

The results of the meet:

100 yard dash—McDow (F), first; H. Hill (J), second; Hart (S), third; Leighton (S), fourth. Time, 10 seconds.
440 yard dash—West (S), first; D. Hart (J), second; Richards (F), third; Beemer (S), fourth. Time, 55.2 seconds.
Shot put—Haman (F), first; Smalley (F), second; Gerow (S), third; Turner (J), fourth. Distance, 46 feet 11 inches.
High hurdles—Haman (F), first; Warren (F), second; Maule (F), third; Lemmon (F), fourth. Time, 11.1 seconds.
Javelin—Stowell (S), first; Miles (F), second; Smith (F), third; Mangum (F), fourth. Distance, 152 feet 5 inches.
Pole vault—Caldwell (S), first; Callahan and Robb tied for second place. Height, 10 feet.
Two mile run—P. Leonard (J), first; Arentz (S), second. Time, 10 minutes 59 seconds.
880 yard run—P. Leonard (J), first; Ward (S), second; Leavitt (S), third; Devore (F), fourth. Time, 2 minutes 12 seconds.
High jump—Haman (F), first; Hart (S), second; Hill (J), third; McGuire (S) and Hawkins (S) tied for fourth. Height, 6 feet.
180 yard dash—Hart (S), first; Hill (J), second; Segerbloom (F), third. Time, 18.8.
Low hurdles—Zadow (F), first; Maule (F), second. Time, 21.5.
Discus—Haman (F), first; Smalley (F), second; Gerow (S), third; Stephens (S), fourth. Distance, 127 feet 2 inches.
Broad jump—Richards (F), first; Hart (S), second; Havens (F), third; Mangum (F), fourth. Distance, 22 feet 3 inches.
A mixed relay team of Richards, Ward, Warren and Austin won the relay.

Comstock Visited By Mining Group

A field trip was made by the Crucible Club last Saturday to the Comstock, by invitation of the American Institute of Mining and Metallurgical Engineers. About twenty of the club members availed themselves of the opportunity of visiting the Virginia City property.

Underground explorations were made of the Arizona, Comstock, Overman, and Dayton mines. Professor Gianelli gave insights upon the geological formation of the Dayton mine, and later lectured on his work, "The First Thorough Study of the Comstock in Thirty Years," in which he pointed out the faulty parts of the new conception of geology made in exploration of the Comstock.
Among the several men, other than students, who went on the trip were Professors Smythe, Palmer and Sanford.

BRUSH PICKS WINNERS

Here's the way we pick 'em to finish in tomorrow's interfraternity meet. What do you think?

Name	Event	House
Arentz	Mile	Lambda Chi Alpha
Hart	Four-forty	Phi Sigma Kappa
West	Shotput	Phi Sigma Kappa
Haman	High Hurdles	Sigma Phi Sigma
Haman	Javelin	Sigma Phi Sigma
Stowell	Pole Vault	Sigma Phi Sigma
Caldwell	Two-Mile	Sigma Phi Sigma
Arentz	Half-Mile	Lambda Chi Alpha
Leonard	High Jump	Sigma Nu
Haman	Low Hurdles	Sigma Phi Sigma
Zadow	Two-Twenty	Alpha Tau Omega
Hart	Four-Forty	Phi Sigma Kappa
Haman	Discus	Sigma Phi Sigma
Richards	Broad Jump	Sigma Nu
	Relay	Sigma Nu

In comparing the results of the Chico State-San Francisco State track meet and the U. of N. interclass track meet, which were held recently it seems that Chico and Nevada should be evenly matched for this track season. Leaving out the interclass events which were won by the freshman team, the Nevada varsity men stack up well in comparison with the California men.

In the mile run Leonard, who made it in 4:42.2 Saturday, should have little trouble with Schneider of Chico, who ran the event in 4:51.3. Chico won the high jump with a 5 feet 10 1/2 inch leap, an inch and a half short of the mark set by Haman, Nevada frosh, last week. The remainder of the events are in doubt with Chico probably having a slight advantage.

From the looks of things Fresno State will have little competition in the high jump event during the Far Western conference meet. Walter Marty, sensational high jumper cleared the bar at the height of 6 feet 9 1/2 inches, breaking the world indoor record set by him recently. To show how this ranks in comparison with Nevada high jumpers, Haman won the event at 6 feet in the interclass meet Saturday, while the University of Nevada record is 6 feet 2 1/4 inches.

Las Vegas residents, according to the Review-Journal's "Punts, Pokes and Putouts" column, are now working to have the Wolf Pack meet the University of Washington team on the Las Vegas gridiron next season in October if possible. With the rapidly growing population of the southern Nevada district showing a great interest in collegiate sports, a game such as this would prove a drawing card, and as it is now planned, such a game would probably become an annual custom.

Besides the profit to the university that would result from such a game the appearance of the Nevada football team in Las Vegas would also probably do much to bring more southern Nevada players to Nevada. It is my belief that some action on this proposal should be taken immediately.

Getting back to the campus, the intramural baseball tournament is now at its peak, and it seems that Phi Sigma Kappa is well on the way to the tournament trophy.

Nevada May Play Washington Grid Men in Las Vegas

The possibility of a football game between the Wolf Pack and the University of Washington Huskies at Las Vegas in October was expressed this week by John F. Cahlan, '25, in his "Punts, Pokes, Putouts" column in the Las Vegas Review-Journal.

With the idea in mind of making Las Vegas more attractive to tourists, Cahlan is starting a publicity campaign to induce college football teams to stop there for their training period and hopes to promote several games there this fall. He also believes it is possible to bring major league ball teams to Las Vegas for spring training.

"I understand that the University of Washington is desirous of playing a game in Las Vegas early in October," Cahlan writes. "I'm sure that if the University of Nevada's schedule is so arranged, we can get the Wolves to come here to play the Huskies on that turf field, and it wouldn't cost much money either. And don't think it wouldn't be a football game, for the Wolves are going to have a football team this coming fall and may surprise the lads."

Cahlan also hopes to bring the Notre Dame football team to Las Vegas every year for its training period in preparation for their annual game with the University of Southern California.

High Schools Open Track at Sparks

High school track activity for this season will have its official opening at the Sparks High school field today. Four schools are entered in the meet, including Sparks, Reno, Carson and Stewart.

Competition should be great as the schools have comparatively strong teams. As the case has been the past several years, Sparks and Reno are reported the class of the field and the meet should develop into a duel between them.

Reno is strong in the distances, but Herb Foster, Reno coach, has yet to find a capable man in the field events. Rodriguez in the distance runs, Pincolini in the quarter-mile and Kine in the sprints are the only veterans of last year.

Sparks has a well balanced squad, with reliable men in all events. Powers, Sorenson and Speers have had several years' experience and should prove their worth this year.

Little is known about the comparative strength of Carson and Stewart, but both schools are capable of putting over a surprise on their larger rivals.

exclusive distributor for the Wilson Western Sporting Goods line, and will be known as the sportsmen's headquarters.

U. S. College Students Said Not To Be Rich

MADISON, Wis.—Students in modern colleges are not members of the idle rich, is the result of survey at the University of Wisconsin. Over two-thirds of the parents of students here are engaged in occupations under the headings of "trade," "manufacture," "agriculture." The parents of the students for the most part have not had a college education.

Two coeds of Alleghany College were punished for walking to and from church with male escorts.

Interclass matches in archery will be held next week and intramural matches the following week, Mary Swett, archery manager, announced this week.

The varsity will consist of the four girls making the highest scores in the interclass matches. Announcement was made this week of the girls making the highest scores so far in practice shooting.

Fresno Survey Shows Honor Students Lead In Campus Activities

FRESNO, April 12.—No longer will honor students of Fresno State college hang their heads in shame when accused of spending all their time "grinding away" on studies!

Following a recent statement by a student leader that honor students do not serve their school by participating in extra-curricular activities, the college news bureau conducted an investigation covering the past four years—statistics being available only for that period—and found that the honor student contributes twice as much to school activities as does the average student body member.

Using The Key, honorary scholarship society of the college, sponsored by Phi Beta Kappa, as the honor group, and Omicron Pi and Tokalon, honorary activity societies for men and women respectively, as the active students group, the news bureau statistician unearthed some interesting data. Only eleven per cent of the graduating classes of 1930-31-32-33 were members of either Tokalon or Omicron Pi, whereas 23 per cent of the graduating Key members in this same period were members of these activity societies.

In other words, The Key, in which membership is on the basis of high scholarship only, and which includes about one-tenth of the graduating classes, has contributed one-fourth of the students most active in extra-curricular affairs.

Commenting on the survey, Dr. Frank W. Thomas, college president, stated that "apparently students who excel in scholarship excel in other lines as well."

Ellen Warner of Ely was the house guest of Marjorie Cannon over the weekend.

Y.W.C.A. Outlines Final Activities

Following the selection of the new Y.W.C.A. cabinet heads, various plans have been formulated for the remainder of the semester for the music and floating university groups under the direction of Roberta Browne and Mary Pappas.

FERA Workers May Rewire Gym

Estimates and preliminary ground work will be made on new FERA campus projects as soon as those which are now unfinished are completed, according to J. B. Lynch, superintendent of buildings and grounds, permanent of buildings and grounds.

A tentative estimate, however, has been made for rewiring of the university gymnasium. New plans for light placements, wiring and equipment are being included in the estimate, of which safer conduits and control switches are essential parts, Lynch said.

Campus Players Name Bill Mack As Head for Year

High School Forensic Plans Are Discussed at Meeting

At a meeting of Campus Players held recently at the home of Blythe Bulmer, Bill Mack was elected to succeed Wayne Van Voorheis as president of the organization for the coming year.

At the same time Helene Per Lee was elected vice president, Grace Semenza received the secretarial office and Helen Lewis was elected the new treasurer.

Officers appointed by the new president and which have their functions in the actual production of plays and at formal meetings of the dramatic group are: wardrobe mistress, Dorothy Shidler; marshal, Tom Morris, and sergeant at arms, Darrel Barry.

"Dr. Smith, former president of the Institute," Professor Carpenter said, "visited me here to go over the work of the committee with him."

Having been associated with the Survey from 1896 to 1931, and as director since 1907, Smith is regarded as one of the country's leading geologists. He is also the author of reports and other publications, including "Strategy of Minerals," published in 1919.

The University of Nevada is but one of the many mining schools to which the distinguished geologist has invited during his stay in the West.

The Mackay school of mines and its exhibits will be featured in a short subject motion picture on the revival of mining in the west, which will be produced soon by Metro-Goldwyn-Mayer.

George J. Lancaster, cinematographer, was on the campus recently taking shots of the statue in front of the Mines building and many of the mining relics on display in the museum.

These relics included Clarence Mackay's safe, which is more than 75 years old; the famous bullion scales used by the Consolidated Virginia and California Mines, which have weighed over \$100,000,000 in gold and silver from the "Great Bonanza," and several checks in large amounts signed by John W. Mackay, noted figure of early Nevada history.

The motion picture, a sequel to "Ghost Towns of Nevada," shown in Reno several years ago, will portray the revival of mining activity in these same ghost towns and will make a comparison of present day mining methods with those of 1850.

Accompanied by Thomas Boise, his assistant, Lancaster left Reno to visit other towns in the state. Lancaster is a member of the American Society of Cinematographers.

Amelia Zorich, sophomore arts and science student, who is living at the Pi Beta Phi house, spent the weekend in Truckee visiting her parents.

Band to Sponsor Change in Awards

Herbert Peck, president of Kappa Kappa Psi, national honorary band fraternity, announced recently that the fraternity will submit an amendment to the student body constitution during the Mackay day luncheon. The amendment is intended to change article 4, part 2, section 8, part e, of the constitution to read as follows:

"Band: To be eligible for an award in band, a bandsman must be a member of the A.S.U.N., shall have successfully completed five semesters in the University of Nevada band, and be recommended by the director."

"The award shall be a 6 inch by 6 inch white chenille lyre with a superimposed 4 inch by 4 inch blue chenille block N. The blue chenille N shall have a white background."

"The purpose of the amendment," Peck said, "is to raise the standard of the band to a higher level, and to reward members of the band with a suitable recognition of their services to the associated student body."

Dirt To Be Dished On Hill Big Shots At Scandal Show

'Mrs. Voice of Experience' Will Give the Lowdown On Big Shots

With the manuscript for the Y.W.C.A.-Chi Delta Phi Scandal show completed and practices starting immediately, the campus will receive its annual dirt treat on Friday, April 20, at 11:25, according to Dortha Robertson, president of Chi Delta Phi.

Judging from the chuckles and smothered giggles issuing from one of the windows of Artemisia hall Tuesday afternoon, while the manuscript was being read, not many of the campus "hall of fame" have missed the eyes and ears of "Mrs. Voice of Experience," and "It's All in Fun," the play proper, will be a revelation to each member of the audience.

The play, which was written by Lois Hutchinson, will be directed by Margaret Martin, who affirms her cast will be so good that it won't be necessary to resort to the identification placards of past years.

Dirt sleuths have been busy gathering material for the past month and as a consequence most of the campus mysteries have been solved, but it's all in fun, just as the title of the play suggests.

One "dirt diver" states vehemently, "Even a Scotchman will get his dime's worth at this show."

Those in charge of the scandal show are: Margaret Martin, director; Lois Hutchinson, author; Mary Williams, Inez MacGillivray and Florine Frank, publicity. All members are contributing dirt.

U. N. Professor's Hat in Ring for Mining Position

Carl Stoddard, associated with the geology department of the University of Nevada since 1931, last week announced that he will seek the position of State Mining Inspector in the coming election. Stoddard has filed his announcement of candidacy with William McKnight, Democratic state chairman.

Receiving his early education in Nevada schools, Stoddard attended the University in 1894, and, since 1911, he has been active in geologic and mining engineering fields. He was originally connected with the state Bureau of Mines, but upon the death of the late Dean J. Claude Jones, he was given a position in the school of mines.

Before becoming a member of the university staff, Stoddard served as an economic geologist with the Southern Pacific and Associated Oil companies.

Nominations Made At Special A.S.U.N. Meeting Monday

Nominations for the office of A.S.U.N. president, occupied the sole attention of the students at the first special meeting of the association Monday afternoon.

In response to the call for nominations the names of James Cazier, William McMenamin and Victor Carroll were placed before the students. Several seconding speeches were also made by backers of the various candidates.

It was announced by President Wallace that nominations would close Tuesday noon, and that any further names to be submitted for the presidential race must be given to Secretary Florine Frank or President Wallace before that time.

The primary election was announced for Wednesday, while the general election was set for Friday, according to the president.

Finance Control Asks for Budgets

Preliminary estimates for all activities for the coming fall semester will be submitted to finance control committee at its regular meeting next Tuesday, according to Joe McDonnell, executive secretary to that body.

The budgets at this time will be considered in order that McDonnell will be able to draw up a preliminary school budget for A. S. U. N. expense next semester.

Social Hours Continue Until Semester Ends

Another social hour was enjoyed by a large number of students last Wednesday and plans are being formulated for four more of these events this semester. The music was furnished by Callahan's orchestra.

According to Lino Del Grande, who is in charge of these weekly affairs, the committee is planning new features for the remainder of the hours. Next week it is planned that two or three acts of entertainment be provided.

Rochester university has abolished 8 o'clock classes.

Hildebrand, star Cleveland pitcher, was an All-American basketball player at Butler University in Indianapolis during the season of 1929.

FINAL ROLE

Jean McIntyre, veteran of many campus plays, will make her last appearance on the boards here when she plays the leading feminine role in "Tommy," domestic comedy, to be produced here on April 23, 24 and 25.

Epperson Manager Elko Independent

Julian Epperson, a former journalism student at the University of Nevada, has recently been appointed manager of the Elko Independent, according to dispatches from Elko.

Epperson was prominent in campus dramatics as well as in journalistic activities. He attended classes here in 1930-31 and after leaving college took a position with the Sparks Tribune.

Two other former journalism students, Chris Sheerin '24 and Eber Steninger ex-32, are employed by Elko papers. Sheerin is associate editor of the Elko Free Press, while Steninger is also connected with the Free Press.

Future Farmers

(Continued from Page One)

In this contest by President Walter E. Clark of the University of Nevada, Leavitt repeated his oration over KOH Tuesday on the regular Farm Bureau program. He will represent Nevada at the regional contest of the group in Salt Lake City June 4.

A silver medal for second place in the contest was awarded John Ahern of Fallon who spoke on "Organized Farmers in an Organized World." Third place and a bronze medal was awarded Loyal Willis of Yerington whose subject was "Why Co-operate?"

Press Convention Closes Saturday

After settling many questions dealing with publications and making suggestions for the meeting next year, the first annual Press club convention for high school editors ended Saturday with a banquet at the Lambda Chi Alpha house.

A proposed tour of the campus was one of the suggestions made by several of the fifteen delegates attending. This, they said, would acquaint them with the university and its various buildings and points of interest.

Badges or markers of some sort for Press club members and visiting publication representatives were proposed, which would enable everyone to become acquainted with each other. A more definite schedule of events was also suggested, which would allow the time and place of meetings, banquets and tours to better advantage.

This is the first convention of this type ever held at Nevada and it was so successful that they will be held every year, Ed Montgomery, president of the Press club, said. Problems dealing with the financial, advertising, editorial and business end of high school annuals and newspapers are discussed and solutions offered.

At the meetings, which were conducted informally, several campus publication leaders spoke on the various phases of press activities. William McMenamin, editor of the Sagebrush, spoke on the editorial side of the paper Friday morning, while William Crowell, business manager, told of the business management of the university paper at the afternoon session. Robert Creps, editor of Artemisia, outlined the handling of yearbooks at the Saturday meeting.

The art of making and employing linoleum block cuts for university and high school newspapers was also presented by Sam Ackerman, head of the Sagebrush art department.

The committee in charge of the convention consisted of Frank Sullivan, Frank Mildren, Myra Sauer and Mary Williams.

LAMBDA CHI PLEDGES

Lambda Chi Alpha fraternity announces the pledging this week of Tom Prunty and Walter Bowrin of Sparks. Both men are sophomores.

No dances, cigarettes or bridge games are allowed on the campus at Muskingum college.

A.W.S. Will Send Letters to Prep Women This Year

Circulars Secure List of Graduating Seniors in High Schools

Preparing to welcome women who intend to enter the university as freshmen next fall, the Associated Students group is sending letters asking for lists of graduating seniors to each high school in the state this week, according to Marthine Solares, A. W. S. president.

Last year the letters were overlooked and it was not till then that their actual value in overcoming registration difficulties was realized.

As soon as all the names have been received, which will not be for some time they will be catalogued and then each one will be assigned to a responsible woman on the campus, whose duty will be to get in touch with the girl and take charge of her during registration.

During the absence of Marthine Solares and Nell Lozano, outgoing and incoming presidents of A. W. S., who will be attending A. W. S. convention at Tucson next week, Dean Mack will see to the mailing of the mailing of the circulars.

Chemistry Club Picnics Saturday

Members of the Chemistry club of the University of Nevada spent Saturday afternoon at Bowers mansion, where they enjoyed swimming and games.

Refreshments were served in the late afternoon. In addition to students, attending the picnic were Dean and Mrs. Maxwell Adams, Dr. S. A. Lough, Dr. and Mrs. M. W. Deming and son Donald and Dr. and Mrs. G. W. Sears.

About 25 persons were present during the afternoon.

An anti-pan society has been organized by students at the Stevens Institute of Technology to deal with advocates of "the lowest form of humor."

U.N. Musicians Start Concerts

With the university double trio, formed by six members of the women's glee, singing at the Rotary club last Monday, the music department started an extensive program that is expected to carry through until commencement, according to Professor T. H. Post, head of the department.

On April 25 Marjorie Stout, Miriam Clark, Anna Blundell, Abigail Hackett, Mary Louise Durkee and Norma Jean Mills, all members of the trios, will make an appearance in Greenville for a concert in celebration of California's public school week. Mr. and Mrs. T. H. Post and Mrs. Ihrig, violinist, will do the accompanying.

The following evening they will give a concert for a similar occasion in Portola, assisted by the Portola High school band.

The University of Nevada will begin its contribution to the annual national music week program April 29, with a band concert, which will be given on the lawn below the tram.

Stating that the annual spring concert will be given through the courtesy of the Twentieth Century club this year, Post said he was presenting a varied program, with the men's and women's glee and the university community orchestra participating. Both the men's double quartet and the women's double trio as well as the combined glee clubs will do special numbers.

Polc has been officially recognized by the University of Illinois.

Routine Business Attended To By Financial Group

Finance Control committee held a short meeting Tuesday of last week to consider routine affairs of financial matters.

Preliminary plans were discussed whereby in the future the business managers of the Sagebrush and Artemisia would be bonded in order to protect themselves and the student body at large. Also, plans for incorporating the A. S. U. N. were talked over.

Chairman Wilson reported that CWA workers had been withdrawn by the government and therefore the proposed women's rest room in the student union building would at this time have to remain at a standstill. It was declared that the work might be obtained from the FERA, however.

A requisition for A. S. U. N. ballots was approved by the committee and an informal discussion concerning an auditing system for university publications was held.

National Officer Visits Beta Kappa Chapter

Conducting an inspection of the Nevada chapter, Dr. H. L. Church, Grand Arkon of the Beta Kappa fraternity recently visited the Nevada group.

Following routine business connected with the fraternity, members of the organization entertained the visitor at an informal party. Guests of the fraternity at the affair were Dean Rueben C. Thompson, Dean Robert Stewart, and Professor Vincent P. Gianella.

— what it means — to store
70 million dollars worth of tobacco
— 4½ miles of warehouses —

Everything that Science knows about is used in making Chesterfields. One thing we do is to buy mild, ripe tobaccos and then lock up these tobaccos in modern storage warehouses to age and mellow like rare wines. It takes about 3 years to age the tobaccos for your Chesterfield, for Time does something to tobacco that neither man nor machine can do.

It means something to keep 70 million dollars worth of tobacco in storage. It means just this:
We do everything possible to make Chesterfield the cigarette that's milder, the cigarette that tastes better.

the cigarette that's Milder the cigarette that TASTES BETTER
