

County Librarian Compiles List of Nevada Authors

University of Nevada graduates and faculty members are prominently placed on a list of Nevada authors being compiled by H. W. Miles, Washoe county librarian.

Of the 14 authors of bulletins, pamphlets or magazine articles now listed, 13 are either members of the faculty or graduates of the university.

On the list compiled of authors of a book or books, although the percentage is not so pronounced, the university still holds a prominent place with its graduates and faculty members. Seventeen of the present compilation of 40 authors are members of the University of Nevada, or have formerly been associated with the university.

Miles stated that he would continue this compilation until the majority of Nevada authors had been listed. The names will be inscribed on the east windows of the library building.

The following are university graduates and faculty members listed to date:

Alumni—Mack, Effie; Norcross, Frank H.; Pargellis, Stanley M.; Siebert, Frederick M. (deceased).

Faculty members—Adams, Maxwell; Boardman, H. P.; Carpenter, Jay A.; Church, J. E.; Doten, Sam R.; Chappelle, B. F.; Hall, John W.; Higginbotham, A. L.; Hill, H. W.; Gianelli, Vincent P.; Murgotten, F. C.; Sears, Geo. W.; Sibley, F. H.; Wier, Jeanne E.; Hicks, Charles R.

Sound Waves Seen By Students With Physics Equipment

Have you ever seen a sound wave transformed into a blue line of light that undulates across an oval gray window in the side of a little brown box, showing the exact shape of the wave?

Students who would like to see this phenomenon should take a look at the oscilloscope now being exhibited by Dr. Sigmund W. Lefson of the physics department.

This instrument, which was purchased last semester as part of the equipment for the advanced electrical classes, is the forerunner of the future television receiving sets, according to Dr. Lefson.

The primary use of the oscilloscope is in studying the shape of a wave, such as a sound wave, or the electrical waves sent out by a radio transmitter.

The essential part of the oscilloscope is a vacuum and cathode ray tube. The actual figures seen by the observer are made by electrons from this ray gun that shoots them off at a speed of 16,000 miles per hour, or about one-eleventh the speed of light. These electrons strike the glass plate that the observer sees, which is coated with willemite. The electron stream causes the willemite to glow, tracing out the pattern made by the electron beam.

By attaching this set-up to certain other instruments and using ear phones in conjunction with it, the sound made by the wave can also be heard.

This oscilloscope, Dr. Lefson said, is part of the regular equipment of any up to date physics laboratory.

Finance Control Approves Budgets

Nine budgets totaling \$2026.76 were approved last week by the finance control committee following three consecutive meetings, according to Joe T. McDonnell, graduate manager.

The track budget of \$677.25 was the largest sum allowed one activity, while university play-productions' budget of \$340.00 was the next-heaviest appropriation.

The annual Mackay day celebration to be held March 30 was assured ample financial backing when the finance group allotted \$107.50 for current expenses.

A generous portion of the A.S.U.N. dollar went to the women, with \$322.92 allowed W.A.A. and the A.W.S. budget of \$229.65 being approved.

For debate, \$244.44 was set aside. The forensic department has planned a strenuous season.

The remainder of funds apportioned A. S. U. N. activities went to band, news bureau and the A.S.U.N. signboard at Fourth and Virginia streets.

Full semester audits of the Sagebrush and the Artemisia were examined by the committee and approved as submitted. A \$75 requisition for dues to the Pacific Coast Managers' association was also honored by the finance control committee.

Six Candidates Recommended for Master's Degree

Six men and women, five of them graduates of the University of Nevada, have been advanced to candidacy for a master's degree by the graduate committee. If their work is acceptable they will receive their degrees on May 13.

This number compares favorably with the record for last year, when seven master of arts degrees were granted and two masters of science.

Two students, Harold Curran '34 and Harry Ervin '34, are seeking their master's degree in economics. Curran has a minor in history, while Ervin's minor is in philosophy.

Ruth Eleanor Bixby '33, daughter of Professor F. L. Bixby, is a candidate for a degree in French, with a minor in German. Lois Hutchinson '35 has English as her major and psychology for a minor. Emily Ross, a graduate of Stanford with the class of '34, who is now teaching mathematics at the university, is seeking a degree in mathematics, with German as her minor.

Sessions Wheeler '34 is the only candidate for a master of science degree. He is taking advanced work in botany and agronomy, with zoology for a minor.

Neca Jones; salad, Colene Hollan; cleanup, June McGuire.

Each chairman will have a committee to work with her, but these will not be appointed until later.

It costs Uncle Sam \$19,000 to educate a cadet at West Point.

Magazine Contests Hold No Interest For U. N. Scribes

In spite of the apparently golden opportunities being offered by various magazines and organizations for short stories, orations, essays and poetry, no University of Nevada student has as yet taken advantage of any of them, as far as Professor A. E. Hill of the English department knows.

Professor Hill has never known of a university student who won anything in one of these contests, although there have probably been some entries, he said.

At present prizes ranging from cash awards and typewriters to fellowships in English are being offered.

Essay contests are being sponsored by the Biospherical Review and Webster's International Dictionary. The American College Quill club, the Story magazine and the Golden Book magazine are asking for short stories, while the Women's Christian Temperance Union is offering prizes for orations and verse.

Debate Mentor Announces Series

Debate Coach Robert Griffin announced last Tuesday that the two best speakers on the debate squad, with the exception of Bryce Rhodes and William Cashill, will get their names on the Ginsburg debate trophy.

A series of debates will be held, and at each debate the speakers will be rated according to their ability.

The four getting the highest rating will draw for partners in a public debate.

The two winners of this debate will get their names on the trophy and will debate Rhodes and Cashill in another public debate.

Brush Distributed In Eighteen States

That the University of Nevada Sagebrush is a widely distributed paper was disclosed this week by LaRue Stark, business manager. Over 32 colleges in 18 states receive the Brush weekly, he said.

Every issue of the Sagebrush is sent to colleges and universities from Washington to Alabama and from southern California to Maine. Two issues are sent to foreign countries, one to the University of Vancouver in British Columbia and the other to San Jose, Costa Rica.

Eleanor Doan, an assistant women's editor, has just finished a complete file of exchanges that the Sagebrush receives from other universities, which is useful in finding out what is happening on different camps throughout the country. This is the first time that a complete file of other college papers has been kept.

Bacteria Content In Milk Studied By Nevada Profs

Tests to determine the possibility of reducing the bacteria content of milk by means of high voltage electrical discharges will be resumed this semester by Dean F. H. Sibley and Prof. J. J. Sandorf.

Working for the University of Nevada engineering experiment station, these two men have performed several series of experiments in electrical sterilization of milk, and report that definite results have been obtained.

Four years ago Laurel Nichols, university engineering student, noted that passing current from an automobile spark coil through jars of milk caused the milk so treated to have different characteristics than that which was not treated. Nichols brought his findings to Prof. Sibley, who obtained Prof. Sandorf's aid in making a further investigation of the subject.

The experimenters stated that after several hundred discharges of 10,000 volts each, the bacteria content of the various milk samples tested is materially reduced. The process requires little power.

Should this method prove a successful means of sterilizing milk it may lead to revolutionary changes in the industry. The pasteurization process now in general use necessitates heating and cooling milk, which involves considerable expense.

Chairmen Chosen For Mackay Lunch

The chairmen for the Mackay day luncheon which is to be given by the Home Economics club were appointed by Kathrine Nichols at the last meeting of the group:

The chairmen are: Tables, Eleanor Bateman; equipment, Ruth Bails; kitchen, Margaret Gorman; serving,

WOLF PACK MEETS CAL AGGIES IN FINAL GAME

Wolf Pack Plays Davis Mustangs To Windup Season

Nevada Over Cal Aggies Victories Only Chance To Redeem Name

FINAL GAMES

Mustangs Play Strong Game In Spite of Poor Record

In an attempt to close the season with a pair of victories, the Nevada Wolf Pack will take on the California Aggies tonight at Davis in the first of a two-game series.

Both teams will be trying to improve mediocre records for the season, having staged a close race for the doubtful honors of the cellar position in the Far Western conference, now held by the Wolves. Nevada's only conference win came at the expense of Chico State in the first game of the season.

The Aggies, while their record is far from impressive, have held down every team they played to close scores, and have displayed remarkable improvement as the season progressed. "Crip" Toomey's chief scoring threat will be big "Gil" Dobbas, lanky center, who has accounted for the majority of the farmers' points this year.

Reserves Fast

The Wolves showed their best form of the season Tuesday night against the clever Broadway Clowns, and the hitherto weak reserves turned in a good game. Coach J. E. Martie pulled a fast move against the visitors in starting his second-string, and the regulars, who have been known all season as a "first-half team," were able to go at top speed throughout the second part of the game.

The varsity was passing with a dazzling attack and the fast break, together with accurate shooting for the first time this year, proved an unstoppable combination against the visitors.

Team Leaves

Coach Martie took twelve players on the trip to California, leaving last night. Manager Charles Jensen accompanied the team.

Martie did not indicate which players would start the first game against the Aggies, but one of the combinations used Tuesday night will be in the starting line-up.

One combination offers Nevada's three husky football players as possible starting guards. George Sharp and Vernon Tapogna, who earned letters last year, saw considerable service in practices throughout the week. George Hadlen played the entire first half Tuesday night. All three of these men have been handicapped by injuries this season, but have now rounded into perfect condition.

At center Martie will use either the veteran Bruce Gould or Jack Roguin, who started against the Broadway Clowns. Gould is at the present time ranking high among the leading scorers of the Pacific coast colleges.

Nevada's regular guard pair, Oly Glusovich and Clayton Phillips, displayed passing on the fast break Tuesday night that at times had the tired visitors bewildered. They were also following in their shots better than at any time during the season.

At forwards, either Whit DeLaMare and Orr Tregellas or Les Gray and Malcolm Jones will be used. Probably the first pair will receive the nod to start. Joe Kelley will alternate at either center or forward.

Baseball Supplies Are Selected by Inter-Frat Group

Selection of equipment for the forthcoming baseball season and cup awards for fraternity sports were discussed at a meeting of Inter-Fraternity council Monday afternoon which was attended by the athletic managers of the Greek-letter houses. The season will begin about the first of April.

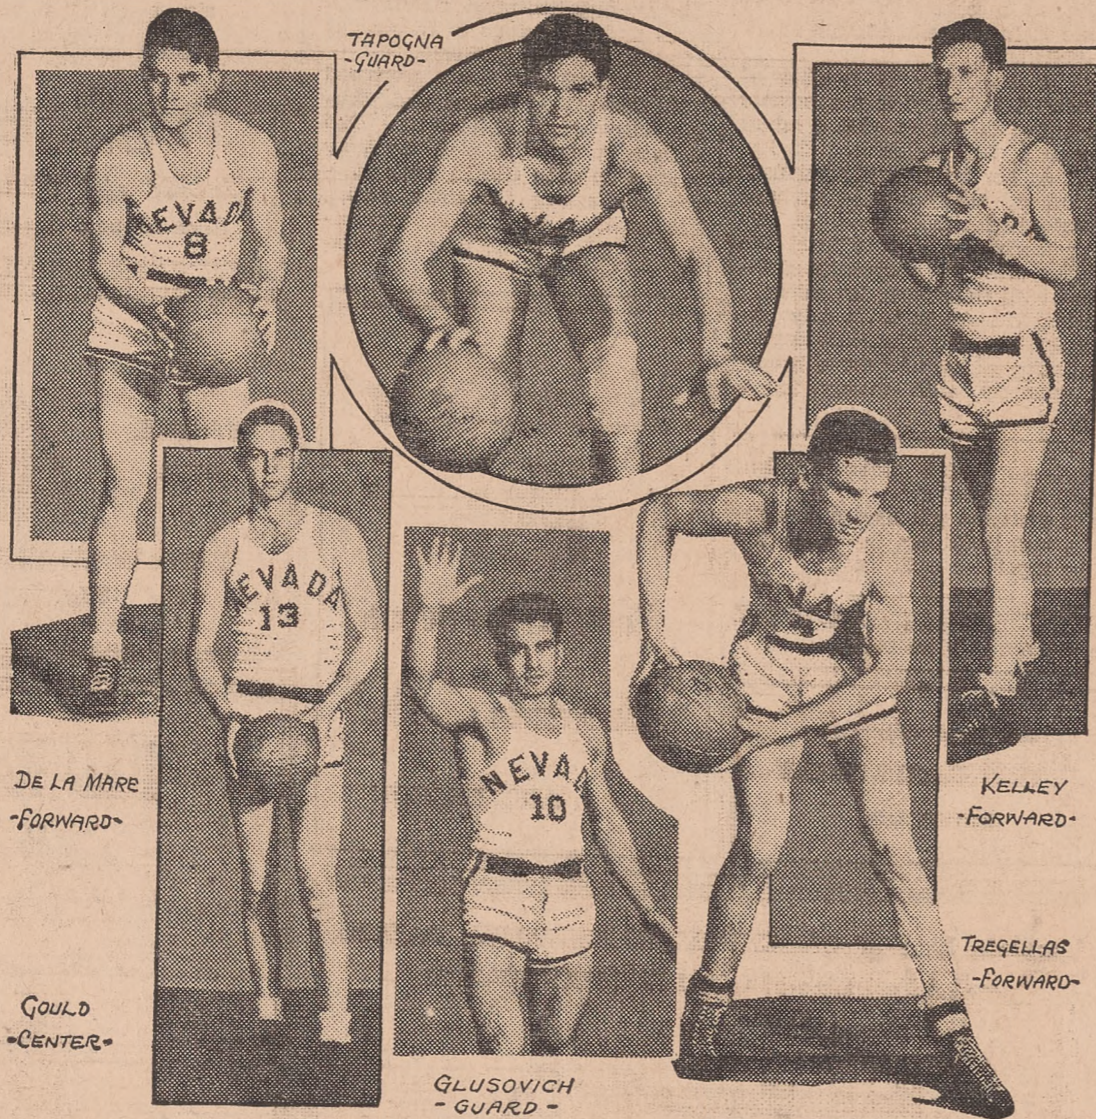

Eight dozen regulation baseballs, five dozen bats and other equipment were selected by the managers, assisted by Allen Lansdon. The balls chosen have been especially designed for this region, having very heavy covers.

Baseball, track and handball cup awards were submitted by the committee in charge.

Present line-ups of fraternity teams were brought up, and Grant Rice of Delta Sigma Lambda said that his house would not enter a team this year. The Independents have not named a team, but may enter one in the league.

The new inter-fraternity constitution will be considered by the various tongs and suggestions for changes will be presented the council by tong representatives.

PLAY LAST GAMES

These members of the Nevada Wolf Pack will meet the Cal Aggies tonight and tomorrow night

in the final games of the present season. Although the Pack has had a poor season, these men have

all shown great improvement, according to J. E. "Doc" Martie, basket mentor. Watch them next year.

Nevada Trackmen Will Participate In Five Contests

Cinder Artists Are Scheduled To Meet S. F. State Teachers

"The Wolf Pack of the cinders" will engage in five track meets this spring, three of them on Mackay field.

A meet with Chico State Teachers April 20, however, will be the only intercollegiate competition that the local fans will see.

The interclass and interfraternity meets will be used to get the team in condition and provide Coach "Brick" Mitchell with an opportunity to study his men.

In addition to these three engagements, the Nevada team will meet San Francisco State Teachers' college in San Francisco and participate in the Far Western conference meet in Sacramento.

To Meet Teachers

San Francisco State Teachers is a new member among the Nevada competitors, and all reports credit them with a good track team. The strength of the Nevada team depends largely on the development of several promising sophomores. Hopes are high for a good Nevada year.

The schedule for the season is as follows:

- April 6—Interclass meet.
- April 13—Interfraternity meet.
- April 20—Chico State Teachers (at Reno).
- April 27—San Francisco State Teachers (at San Francisco).
- May 4—Far Western conference meet (at Sacramento).

Junior Varsities High in Tourney

With the city league basketball tournament winding up its scheduled games this weekend, the junior varsity aggregations, the Blues and the Whites, are both virtually assured of being among the four leading contenders who will vie for the title in the play-off.

Next week, the four leaders in both A and B divisions will engage in an elimination tournament to determine the city championship.

The Reno Printing company still occupies the top spot in the A division, while the Blues and the Whites are tied for second place along with the Y.M.C.A. and the Martinez Electric company. The outcome of their game with the Martinez quintet this weekend decides for the Whites whether

they will be included in the leading four.

Last year the Whites nosed out the Bearcats to annex the city title

Patronize Reno merchants.

Prep Hoopsters Plan Tournament

The annual western Nevada high school basketball championship will be decided here February 27, when 15 high school teams will fight for the honor of being one of the four teams to represent the western zone in the state scholastic tournament.

Schools entering teams are: Lovelock, Fallon, Fernley, Wadsworth, Gerlach, Sparks, Reno, Virginia City, Dayton, Carson, Stewart, Gardnerville, Smith Valley, Yerington and Hawthorne.

No definite information has been received as yet, but the dates and places the games will be played is as follows: Feb. 27—3:30 p. m., one game, Reno gymnasium; 7:00 p. m., three games, Reno High gymnasium; 7:00 p. m., three games, Sparks High gymnasium.

Feb. 28—4:30 p. m., one game, U. N. gymnasium; 7:00 p. m., three games, U. N. gymnasium. March 1—7:30 p. m., two games, U. N. gymnasium. March 2—7:30 p. m., two games, U. N. gymnasium, finals.

Three Teams Tie For First Place In Hoop Tourney

After a hectic weekend of basketball, the Far Western conference finds itself with three teams tied for first place. These teams are Fresno State, San Jose State and College of the Pacific.

Splitting last week's series, Fresno and San Jose remained deadlocked for the lead with Pacific.

Fresno won the first night by a close score in an overtime period, while the second night San Jose turned the tables and took the Bulldogs. Each of the first place teams has lost two games.

In order to remain in the running San Jose will have to win both games this weekend from Chico, since neither of the other two teams has any conference games yet to play. If San Jose wins this weekend, there will probably have to be a playoff to determine the Far Western championship.

Chico is in second place and may

be able to redeem itself somewhat by taking the fast playing quintet of San Jose. The cellar champion also will be determined this week, when Nevada takes on the Cal Aggies in a two game series. Each team has but one win, and victory for either will help its standing greatly. The standings for each team follow:

	W.	L.
Fresno State	4	2
San Jose State	4	2
Pacific	4	2
Chico State	5	3
Cal Aggies	1	4
Nevada	1	5
