UNIVERSITY OF NEVADA, RENO, NEVADA, FRIDAY, FEBRUARY 23, 1951

## UN grading system not unusual---Irwin

### Interpretation of present system hazy

By Joseph Abbott

The grading system in use at the University of Nevada is similar to that used at nine out of ten colleges, says Professor Ralph A. Irwin, Professor Irwin, chairman of the psychology department, maintained that the present system is probably the best method of grading, providing it is not misunderstood or misused.

Professor Irwin was interviewed in connection with an editorial on the marking system which appeared in the Sagebrush.

The grading system used here consists of four passing grades, A, B, C, and D, and three other grades denoting a condition, a failure or an incomplete.

The mark A denotes that quality of work which may generally be expected from approximately the best ten students out of one hundred in any given course or subject.

The mark of B denotes that quality produced by the next twenty students; C denotes that quality produced by the middle forty, and D that quality produced by the next twenty students below the middle

## Snow banquet social light of ski carnival

Sorority open houses, the annual Snow Banquet and the Snow Ball were the highlights of social events celebrating Ski Carnival last weekend.

Nancy Miller of the University of Oregon was chosen queen of the Carnival by the Nevada ski team. Miss Miller won over four other candidates.

Delta Delta Delta sorority was awarded the trophy for the most original inside decorations. Their theme was "Penguin Island." Lambda Chi Alpha, who built a ski tow in their front yard, won honors for the best outside decorations.

A student assembly Thursday officially opened the Ski Carnival. A new feature, sweater day, was introduced and all students were asked to wear ski sweaters.

Open houses were held by the four sororities Friday evening in the various chapter houses which were decorated in appropriate snow themes. The sorority houses were judged earlier on their decorations by the entertainers at the Riverside hotel.

The Snow Banquet, which was termed "very successful" by Ski Carnival chairman, Skip Wigg, was held at the Trocadero. Honored guests were members of the visiting ski teams and President Malcolm Love of the university, Mayor Francis C. Smith of Reno, and Mr. E. V. Miller of Salem, Oregon.

Mr. Miller, who represented the mayor of Salem, Oregon, presented the keys of the city to Mayor Smith. Highlight of the Snow Ball was the crowning of Nancy Miller, queen. Skip Wigg presented Miss Miller with a carnation crown and trophy as a memento of the occasion. Miss Miller in turn presented the Tri-Deltas and Lambda Chis with their trophies.

Art Cox and his band provided music for the evening. Skip Wigg announced that the dance failed to meet expenditures by five dollars.

## AIR GUARD RULE FAVORS SENIORS

### Deferments extended

Seniors with the Nevada Air National Guard will now be permitted to finish their studies. A new directive from Air Force headquarters permits the granting of three month furloughs to upperclass students who expect to graduate in June, according to information received from Stead National Guard Air Base.

Four University of Nevada men to profit by this new ruling are Robert M. McCormack, Earl P. Gilmore, Hans R. Jepsen, and Lawrence C. Leonard. All four are members of the 192d Fighter Squadron of the Nevada Air National Guard.

The local outfit is scheduled to enter federal service on March 1, and shortly thereafter its headquarters will be moved from Reno to Austin, Texas.

Originally, leaves of absences were granted only up to the tenth of April.

## Plans begun for Engineers Day

Plans for Engineers Day are still in the tentative stage. The only thing that has been definitely decided upon is the date. The new date chosen is April 21.

A committee has been selected to choose the candidates for the queen contest. This is a new plan. Candidates in the past were chosen by the sororities and the queen was voted in by the engineers.

This year the engineers plan not only to elect the queen but also to select the candidates for the position, according to Dave Cochran, mechanical engineering and chairman of the queen committee.

Other members of this committee are: R. K. Vassar, geological engineering; Bill Flangas, metallurgical engineering; Dick Gorman, electrical engineering; Kenneth Stone, civil engineering; Dave Collings, civil engineering; and Bob Ramsey, civil engineering.

Committees have been named, according to Bill Woods, president of the Associated Engineers. The committees will make reports at their next meeting, and by next week more definite plans can be announced, he said.

## Coed wins soph office; first since World War II

Robyn Forsyth, Gamma Phi Beta, won the office of sophomore class manager this week, the first coed since World War II to hold such an office.

The Berkeley, California, girl took the special election which had been called when the sophomore class manager, Bob Gallagher, was called to the Navy.

The freshman managership was won by Bill Kottinger, Sigma Nu. This office was vacated when Paul Vietti enlisted in the Navy.

## Portland takes ski meet; Nevada two points behind

### Giannotti high man with a first and third

This Portland University coed was chosen queen of the Nevada Ski Carnival last weekend by members of the Nevada ski team. The 17-year-old beauty's name is Nancy Miller, a freshman at Oregon, majoring in interior decorating.

## Military ball on March 17

The annual Military Ball will be held March 17 in the Mapes Ballroom, according to Scabbard and Blade, the honorary military organization.

Committee chairmen were appointed at the last meeting of the Scabbard and Blade by Larry Means, president of the organization. They are: Paul Stimac, chairman of the dance. Vic Corbett, in charge of decorations; Jack Shevlin, ticket chairman; Buck Wells, chairman of queen candidates and their election; Sam Savini, chairman of the Saber Arch; and Ted Klimazewski, publicity chairman.

According to Buck Wells the highlight of the evening will be the coronation of the queen by Governor Charles Russell. The queen will be chosen from a list of candidates submitted by the various sororities and women's dormitories on campus. The candidates to date include: Joan Foster and Maud-Kathrin Carl, Gamma Phi Beta; Lynn Horner and Barbara Carruth, Delta Delta Delta; Jean Wilton and Andrea Anchart, Kappa Alpha Theta; and Shiela Murray and LaVonne Brown-Pi Beta Phi; Mary Getto, Martha Oviatt, Manzanita Hall. Marcia Malcolm, Shirley Powell, Artemisia Hall.

Jack Shevlin has announced that the tickets for the dance will be \$1.20 per couple and are now on sale from any member of Scabbard and Blade. Tickets may also be purchased at the door.

Two and two-tenths points was the margin of victory last weekend, as the University of Portland won out over six Pacific coast ski teams in the University of Nevada twelfth annual Winter Carnival.

Winning the three day contest at Mount Rose, the Portland team entered the final event, jumping, on Sunday trailing Nevada by three points and leading the University of California team by a scant three-tenths of a point.

### Superior Jumping

Superior jumping proved the winning factor, though, and the Pilots from Portland won with 388.83 points. The Nevada team trailed with 386.66 points, and the University of California placed third with 376.50.

Portland took the early lead of the meet on Friday by taking the cross country race, with Cal, UCLA and Nevada following in that order. The lead was cut when both Nevada and Cal outjointed the leaders in the first run of the slalom and the downhill races which were held Saturday.

Roger Wicham of College of Pacific was the individual winner of Friday's cross country race, finishing only twenty-eight seconds ahead of Mead Schmoedel of Portland and thirty-seven seconds ahead of Nevada's John Gianotti.

### Gianotti Wins Downhill

In the downhill race, it was Gianotti who sparked the Nevada team to life with a winning time of 38.5 seconds. In that time Gianotti sailed over a 4200 foot course which dropped an estimated 1000 vertical feet on the north face of Slide Mountain.

He was followed by teammate Pat Meyers, who covered the distance in 39.8 seconds, and Bart Brom of Cal who turned in a 39.9 time.

The first run of the slalom course Saturday afternoon saw Portland's lead further cut when they dropped into fifth place despite the efforts of Bob Skoch, the 105 pound midget of the team, who turned in the best time of the run. Nevada's Pat Meyers placed second and Bart Prom of Cal, third.

The second run of the slalom Sunday saw Portland climb back into the running with a third place in the slalom race; however, Nevada also took the lead by placing four men in the first thirteen places.

Alan Ramsey of the host team took the event with a combination time of 98 seconds, which was just one-tenth of a second faster than Portland's Skoch, with Bart Prom of Cal placing third.

### Nevada Leads for a While

With the score standing at Nevada 291.66, Portland 288.83, and California 288.50, the teams entered the final event of the meet, jumping, Sunday afternoon and Portland retained its lead and the team championship.

Ron Rattimaker and Bill Conway sparked the Pilots by taking first and second place respectively, and the team placed four men in the first fifteen places to gain the needed points to overcome their host's lead.

Gianotti gained team and individual points with a first place in the downhill, third in cross country, and thirteenth in the jumping. Bad falls on the first day without great success on the second left him 31st in the slalom standings.

## They loved him in Carson President debuts with U's budget; legislators like him and his ideas

By Don Loveless

Giving the University of Nevada the most favorable representation it has had before the state legislature in recent years, Dr. Malcolm Love, president of the university, outlined and reviewed his proposed university budget for the next two years before the members of the senate finance and assembly ways and means last week.

President Love said that the Board of Regents had requested that he represent them and the university in legislative conferences. This was welcome news to the senators who, in the past, had to gather news of the operations of the university from several sources.

Because of the wide range of the activities covered by the budget, most students at Nevada will be affected directly or indirectly.

### Budget Request

President Love said that the university was requesting \$1,860,000 in state funds, which was the amount Governor Charles Russell recommended for the university in his budget message last month. In order to conform to the governor's request, some \$233,660 will have to be cut from the amount the university had requested in its original budget.

He went on to say this would be done by cutting the operational budget of the various colleges, schools, departments, and divisions of the university. He was not ready to say how much each would be affected because the plans for cutting down are still under consideration.

Stressing the need for repairs and improvements at the university, President Love told the lawmakers he requested \$528,000 of the postwar fund for a "minimum repair budget."

"It is my desire to see to it that the buildings now on the campus be maintained so as to serve the needs of the institution," he told them.

Included in this request are recommendations of \$135,000 to be spent in the construction of an addition to the electrical engineering building; \$13,500 for the construction of

a new greenhouse; and \$139,750 for renovations and additions to the heating system.

Also mentioned were the facts that the outside of Lincoln hall is in rather good condition and that only the interior need be repaired. This would cost around \$70,000 and work could be done during the summer months, according to President Love.

He also pointed out that a previous recommendation had been made to tear down Lincoln hall and to build a new men's dormitory. This would cost more than \$500,000, he said, and recommended repairing the old hall instead.

When pressed about which project would have to be dropped if the legislature did not grant the total requested, Dr. Love said that this was, in his opinion, the minimum that the university could ask for. But, he added, if something had to be postponed he guessed it would have to be the new wing on the engineering building to be used for the electrical engineering department.

On the whole, the president showed the legislators that the university is willing to cut down if necessary, but that he thought all he asked for was necessary.

"The University of Nevada is flatly opposed to 'spending as will,'" he said.

### Athletic Program

Another point of Dr. Love's budget was the much publicized athletic program.

On this subject Dr. Love said the university will no longer "tolerate deficient financing." He said the

new policy adopted by the Board of Regents last semester would be continued.

This policy, he explained, is that the individual student-athlete would be responsible for all expenses in connection with his attendance at the university, if the alumni or some other organization does not provide such aid.

It was explained to the legislature that the alumni association had taken over the responsibility of providing scholarship aid for competent athletes. This, he assured the legislature, will not allow the university to become involved in the financial difficulties that it faced last year because of its athletic program.

Dr. Love mentioned the possibility of curtailing all the sports program at the university if there is a lack of state support and if gate receipts drop. Dr. Love said that if the legislature wants no state money expended for the administration of an athletic program, it can rest assured none will be. But he also said that

## Five organizations interview engineers for positions

Senior students in the engineering colleges have been interviewed for future positions by representatives of five different organizations: General Electric company, Westinghouse, Wright-Patterson field, Dayton, Ohio, Inyokern Naval Ordnance Test Station, and the North American Aviation Inc.

Since these companies all engage in some essential government work, there is a possibility of a deferment, but none have been definitely promised, according to Dean S. G. Palmer, dean of the college of engineering. All of the representatives of these companies have been on campus within the last month.

if this is the case the university will have to change its athletic programs to meet the situation.

## Crucible club off on field trip

Sixteen members of the Crucible club plan to leave on a field trip tomorrow morning. They will go to the Nevada Massachusetts tungsten mine, which is located 45 miles east of Lovelock.

Students going on the trip will see the mine in actual operation. Bill Maher, mining student, made the arrangements for the visit to the mine.

The following men have signed to make the trip: Elwin Fisk, Fred Lee, Earle Dempsey, Frank Neff, Jim Miller, Val Larson, John Harmon, Selby Marks, Bill Williamson, John Roberts, Jack Crowell, Gordon Pflug, Ed Tempinski, Louis Avery, Dick Williamson, and Ralph Groning.

In World War II the peak strength of the armed forces of the allies was 49,038,900. The Axis had 21,871,500.

# Coeds drop in enrollment same as men

Each woman loses two-tenths a man

By Willard Esplin

With the latest release as to the registration figures for the spring semester of 1951 two facts seem evident.

Men are going to war; and without men, college holds little appeal for a great many women.

With the start of the Korean crisis it was expected that enlistments,

drafting, and the calling up of reserve outfits would decrease the male population on campus, so those men who were due to stay in school looked forward to an over-population of females and therefore, a reduction of the men-over-women odds which the women at Nevada have enjoyed for so long.

A great disappointment is due them, though, for contrary to the situations on other campuses throughout the country, the odds have dropped very little, for just as many women, in comparison, are dropping out of the U of N as are men.

In the spring of 1949, there were 1245 men and 463 women on campus, giving each girl an estimated two and seven-tenths of a man.

One year later, though, each woman lost two-tenths of a man when the enrollment figures slipped to 1185 men as compared to 469 women.

This year it was expected that the manpower on campus would be decreased by a considerable sum and that the number of women might even increase, therefore getting the odds a bit closer to the male dream of six women on campus for every man.

There will be no gleeful grins and shouts in the fraternities and men's halls, though, for although the male population on campus has dropped three hundred and thirty-eight in the past year, the women population has been decreased by almost fifty, so that the men-over-women

odds have been decreased by only four-tenths of a man.

They now stand at 2.1 men for each woman on campus, with 846 men being registered as of February 20 and 420 women.

So the hopes of the men who plan to be on campus rise a little with the thoughts of what might come with the next draft of their fellow students, and the women cringe with

the very same thoughts, or swear that, like their other coeds who have left, they will not put up with college if there aren't enough men around to put up with them.

The reputable English language contains approximately 700,000 words. Possibly 300,000 more words may be stigmatized as vulgar or obsolete.

# Aggie horse show set for May 12-13

Fifth annual show

The fifth annual Aggie club Horse Show will be held at Reno Rodeo grounds on May 12 and 13, it was announced this week.

Directing the two day show this year is Raymond Alzola of Elko, assisted by Ed Bush of Reno. Alzola is a senior student in the college of agriculture and will obtain his degree in animal husbandry in June.

Proceeds from the show will be used to send the university's livestock judging team to various livestock shows throughout the west.

The show is put on entirely by Aggie club members attending the University of Nevada, making it possible for students to see some of the best horses in western United States.

This year, as in the past, there will be the quarter horse, Arabian, Palomino, three-gaited, five-gaited, fine harness, trail horse and cutting classes. Two new attractions have been added: a Nevada stock horse class and an invitational jumping class. In addition there will be several special attractions and features. Two races are also scheduled for each day.

## Dean of mines takes over

### School now equal to college of engineering

Dr. Vernon E. Scheid, formerly of the University of Idaho, has taken over the newly created office of the dean of the Mackay School of Mines. The school of mines will now be on an equal level with the college of engineering on the campus. Dean Scheid is taking the place of Professor Jay A. Carpenter, director of Mackay School of Mines, who will retire in June after 25 years of service as head of the mining school.

"The Mackay School of Mines has a good name as a school, and there is a good foundation on which we hope to continue the educational efforts of the school," said Dean Scheid. He arrived with his wife and two children on February 1.

Dr. Vernon E. Scheid, professor

of geology, has held the office of the chairman of the department of geology-geography at the University of Idaho. He was born and raised in Baltimore, and lived in Idaho since 1934.

Scheid received his education at the Baltimore Polytechnical Institute, where he studied for four years, after which he attended the Johns Hopkins University at Baltimore. In 1928 he gained the degree of bachelor of arts. After one year's work he went back to the university to do four years of post graduate work, and three years of teaching at Johns Hopkins followed.

Moved to Idaho, Mr. Scheid taught there for eight years, and in 1942 joined the U. S. Geological Survey, which was established to investigate strategic mineral deposits in the United States. He returned to Idaho as chairman of the department of geology-geography at the state university.

During his career, Dr. Scheid published a number of technical articles and reports of the Pacific northwest. Dr. Scheid received his doctor's degree in 1946, his work being completed already in 1933.

Dean Scheid has already moved into a new home at 1139 The Strand, in Reno.

## BUCK A MONTH CLUB ORGANIZED FOR ATHLETICS

A "Dollar A Month" club is being organized this week for the financial support of the university athletic scholarship program, it was announced by Max Dodge, president of the alumni association.

The dollar a month club will be a state-wide organization made up of people who want to help the scholarship effort by dollar donations.

The membership can be established by mail or by local collection committees.

"One thousand dollars means 12 full year scholarships," said Dodge. The scholarship committee got a "solid reception" throughout the southern section of the state, it was reported by Max Dodge.

The committee covering southern

Nevada was seeking financial support for the scholarship program.

The committee consists of: Jack Streeter, prominent Reno lawyer; J. Sheeketski, director of athletics and head football coach, and Max Dodge.

kateers, campus folk and square dancing group, is Jo Ann Barbash. Yvonne Dubbins is vice president, and Luanne Laughlin is secretary-treasurer. Mr. and Mrs. Edwin Worley are the advisers for the club.

Folk and square dancing will be taught to everyone, students as well as faculty members, at a party to be held Thursday, March 1, at 7:30 p.m. in the old gym.

# OK—let's have it UN air ROTC gets 'yes' vote in student poll

Seventy-two per cent of the students canvassed, in a campus poll this week, are strongly in favor of reactivating an air reserve officers training corps unit at the University of Nevada.

Of the remaining students, 14 per cent were merely in favor, 13 per cent were indifferent, and one per cent opposed the proposal.

Last week, President Malcolm A. Love held a conference with two officers from Hamilton Field, California, regarding the reactivation of the air unit. The officers, Lt. Col. A. L. Coenen and Lt. Kenneth York, were in Reno to make a survey of the facilities at Stead air base, and to assist with the application and reappraisal of the facilities for handling such a unit in Reno.

"I feel that if the students want such a unit, and I think they do, and if President Love's recommendations are approved and followed, advanced military will hold a place for every male student in the university," stated Lt. Col. J. C. Smee, head of Nevada's military department.

He said that the general technical course and the administrative logistics course, would take in every male student in the university. The former being applicable to the engineers, and the latter to agriculture and arts and science students.

### Infantry Would Be Dropped

If the proposal goes through, the infantry ROTC will be withdrawn and all basic ROTC students will be required to take the air training. However, those juniors now enroll-

# Faculty welfare is discussion at profs' meet

A report by the Faculty Welfare Committee was featured at a meeting of the Nevada chapter of the American Association of University Professors at Artemisia hall Wednesday evening, February 21.

Professor Jay A. Carpenter, chairman of the committee, divided the discussion into seven different topics, one of the committee members discussing each topic.

Taking part in the discussion were Dr. Frederick Traner, who spoke on sabbatical leave; Dr. Dwight Billings, reporting on alien employment; Professor Joseph Robertson, who discussed honorary degrees; Dr. Robert A. Hume, talked about the timing of notices for retirement; Dr. Maurice Beesley on health and accident policies for faculty members; Mr. Raines Miller on the possibility of obtaining federal social security, and Professor Carpenter, who took the subject of faculty voting privileges.

### ed in the advance infantry group will be allowed to finish and obtain their commissions.

"Both the infantry and air units cannot survive together," Colonel Smee said. "The reason being that only one can pay for itself at this university."

Last year, he said, the withdrawal of the infantry ROTC was under consideration, until the Air Force decided to remove all air administrative courses, thus leaving only the maintenance engineers courses. This was not plausible so the air ROTC was removed instead.

One of the advantages of an air ROTC, according to the administration, is that students now contemplating enlisting in the services might be encouraged to remain in college to get an air force commission.

# Illegal parkers may be suspended

Students may be suspended from classes if they neglect to pay fines for violation of traffic rules on the campus within ten days after the ticket was written.

This warning was issued today by Art Cox, traffic officer on the campus.

"There are a number of violators on the campus who have not paid fines, and some of them are due," Cox said. "To prevent suspension from classes they should pay immediately."

Cox also pointed out again that any car parked on the campus must display a parking permit. The permit is available at the office of Cox in the basement of Morrill hall where the car has to be registered. He emphasized that there is no charge for the registration or for the permit.

No student is allowed to park his or her car south of the crosswalk extending east from the Education building to the Mackay school of mines, according to Cox.

# World Federalist addresses students

Samuel R. Levering, vice-chairman of the National Executive Council for the United World Federalists, spoke to journalism and education classes last Monday. Mr. Levering was in Reno to speak to Reno Rotarians and at a city-wide citizens

meeting Monday evening at the Riverside hotel.

Levering outlined the policy of the UWF and compared it with other organizations in world government.

### Women's ski meet carnival feature; Cal gal wins

#### Nine Nevada femmes enter touch slalom

While teams competing for the championship of the twelfth annual Winter Carnival were resting between events last Sunday afternoon at Mount Rose, nine Nevada women and three visitors took to the hill for the women's slalom course.

Set on the site of the men's course, which was still hot from the morning's competition, the women's course was not as long nor as difficult as the men's but tough enough so that forerunners Les Hawkins and Bill Briner took 34 and 36 seconds, respectively, to make the run.

The visitors fared the best of the day. Caron Lee of the University of California turned in the best time of 40 seconds to take the event from her nearest competitor, Marvella Chandler of Nevada. Unofficial results showed Mickey Smith of Cal as placing fifth and Larry Harris of

#### College of Pacific placing seventh.

Time ranged from the 40 second winner to 102 seconds for the course and penalties in comparison with men's racing were few.

The following girls, all of Nevada, raced in addition to those mentioned above.

They are: Joan Metzgar, Mickey Francis, Coco Brown, Dorothy Barrett, Diane Lewers, Ann Boero, Jeanne Fulstone and Eleanor Fulstone.

### SF engineers to hear student

Kenneth Stone, electrical engineering student, will speak tonight to the San Francisco section of the American Institute of Electrical Engineers at San Francisco. Tuesday he won the trip as a prize for the best of three papers submitted for judging by three electrical engineering students.

# Pack meets Gaels tonight

## Silver and Blue's last series to honor former students and alumni

The University of Nevada Wolf Pack will be out to better its existing .500 percentage (11 wins and 11 defeats) when it takes to the hardwood tonight against the St. Mary's Gaels from Moraga in the last series of the season. The university frosh team, which has lost but three games this season, will furnish the preliminary fireworks by meeting the Carson City Capitols at 6:30.

Tonight and tomorrow will be alumni nights and all alumni, former students, and friends of the university will be honored. The university band will be on hand, and door prizes will be given away at the half-time intermission.

The Gaels, who are the oldest rivals on the Nevada schedule, are fighting for a western berth in the national tournaments, allotted to independents, and have indicated that they are confident of taking both games from the Pack.

In their last two games, the Gaels have trumped USF, Friday, but were nosed out Saturday, by Santa Clara, 52-50, a team they had beaten twice earlier in the season.

St. Mary's will enjoy a terrific advantage in height, with a six-foot eight-inch center, Ben Gibson, the tallest. At forwards, the Galloping Gaels will start Mike Cimino (6-2), and Drew Turner (6-1). George McLaughlin (6-4) and Bob Steinkamp (6-2) will open at the guard positions.

The Pack split a series with Loyola last week at Las Vegas, losing the first tilt, but taking the second by a sizeable margin.

Coach Jake Lawlor will probably start with captain Burt Larkins and Dan Vidovich, who received a tremendous ovation from the Las Vegas fans as a result of his sterling play in the second game with Loyola, at the guard positions, and Roger Bissett at center.

At forward spots, Lawlor will have four hustlers from which to pick his starters. Jock Michienzi, who pumped in necessary points in the Loyola series, appears to have the inside track, along with Earl Jarrett. Jerry Wyness and John Buccambuso

### Highlanders out of ball tourney

The Highlanders basketball team was dropped from the interfraternity basketball tournament last week, announced Doctor J. E. Martie, director of the physical education department, because they forfeited too many games.

The Highlanders are an organized group of men who live in the veter-

erans dormitories in Highland Terrace.

The group had a fine record of six wins and only two losses up until the time of the forfeits.

According to the rules, any team that forfeits two consecutive games is automatically dropped from the tournament.

Doctor Martie also stated that according to the tournament rules, no

player of the dropped team can transfer to any other team to continue playing.

#### CHESS CLUB

A chess club will be formed Thursday, March 1, at 7 p.m. in the YWCA snack bar.

Tom Arata, who is organizing the club, invites beginners as well as experienced players to attend the meeting.

### Prof. Larson wins Ph.D.

Dr. E. R. Larson, professor of geological engineering, recently received his Ph.D. in geology from Columbia University. He received his degree for work on the stratigraphy of the Platin group in southeastern Missouri.

The actual number of languages computed by officers of the French Academy is put at 2,796.

### I'd Like to Know...

You may have heard that a suit has been filed by the Antitrust Division in Washington to break up Standard of California as well as six other West Coast oil companies. Many people have written us protesting this action, have asked pertinent questions. We believe these questions should be answered for everyone. We take this way of doing so. If you have a question, write:

"I'D LIKE TO KNOW"  
225 Bush Street,  
San Francisco 20

## "Would breaking up big oil companies affect national defense?"

Mrs. Marie-Louise Auer, Pasadena housewife, writes: *It seems to me like a bad time to be tampering with our industries, as the antitrust lawyers want to do. Or does it matter? Would breaking up big oil companies affect national defense?*

*Mrs. Marie-Louise Auer.*

Here at Standard, one of the seven Western oil companies under attack, we see clear public benefit in having big com-

panies in the business at all times. We believe we serve you well. But let's consider now just "bigness" and defense:

Today, military needs come first. Just recently, need for aviation gasolines jumped 275% in the West alone. Big oil companies supplied it.

Next: industry's demands. You know how industrial output keyed U.S. strength in World War II. It takes big companies to meet big needs.

Company bigness also means big-scale research, improved products. Example: oils developed by Standard which tripled range of U.S. subs.

For hard jobs, the U.S. uses our bigness and integration. Today, our U.S. projects include atomic research and a synthetic rubber plant.

Our taxes also aid defense. As one big company, we paid over \$95,000,000 last year, more than we would pay as several smaller companies.

Meanwhile, bigness and integration enable us to keep on supplying products you need. Isn't this what you want from your oil company?

**STANDARD OIL COMPANY OF CALIFORNIA**  
• plans ahead to serve you better

# Mastroianni in athletic department for first major step of reorganization

With the ultimate goal of bringing the athletic department closer into the folds of the university and giving it broader duties and responsibilities, student, alumni, faculty, administration, and athletic department leaders are planning a reorganization of the department.

The first step was taken two weeks ago when Gene Mastroianni, former graduate manager, was moved into the department to act as athletic manager.

In his new position, Mastroianni will work under athletic director Joe Sheeketski, investigating and preparing reports on the different phases of the university athletic program.

These reports, which will deal with athletic schedules, budgets and personnel, will be prepared by the department and submitted to the Board of Athletic Control which will either approve or disapprove them. The BAC is a committee composed of representatives of students, faculty, alumni, and administration.

The office of graduate manager has been given to Jim McNabney, former assistant to Mastroianni, who will manage ASUN funds.

The move is not designed to create a new department on campus, but rather to strengthen the athletic department.

# UN grading system

(Continued from Page 1)

ed in the catalogue was equivalent to a directive from the university. He stated that the policy of his department was to follow the marking system as literally as possible.

In determining his students' marks, Dr. Traner said that he first lists the numerical scores in ranking order. He then assigns A's to the top ten per cent, B's to the next twenty per cent, etc. He stressed, however, that he does not arbitrarily fail the lowest ten per cent. Other factors including effort and interest are considered when grading the bottom scores.

### Horse Racing

Dr. Traner was asked what allowances he makes for students who have obtained a numerical score only a half point or so from the ten per cent who are given A's.

He compared this situation to a horse race. He said that even if a horse is only a tenth of a second behind the winner, he can only be placed second.

Dr. Traner was careful to explain that in his opinion no one is qualified to say who is an A student except by using the catalogue definition of an A. He maintained that an A could only mean that work which ranked in the top ten per cent of the class.

Dr. Traner also stated that often

complaints were the result of a misunderstanding of the marking system as interpreted by the education department.

## AWARDS APPROVED FOR SAGEBRUSH, ARTEMISIA HEADS

Keys for outstanding service in the field of campus publications were recommended and approved for the heads of four departments connected with campus publications at a meeting last Monday of the publications board.

The recipients of the awards will be Mark Curtis, editor of the Sagebrush; Lowell Miller, business manager of the Sagebrush; Jim Morrison, editor of Artemisia; and Ted Lokke, business manager of Artemisia.

Awards of Metallic "N's" were proposed for the other members of the staffs of the two publications.

Natalie Curtis, Pi Beta Phi, passed candy at her sorority house this week to announce her pinning to Bill Higgins, ATO.

## THE CAMPUS FAVORITE

The girl? Oh sure! But I really meant that delicious, chocolaty TOOTSIE ROLL. Try them. Buy them wherever candy is sold.
