

# Miller vs Donathan In Debate Tonight

"Liberal"

"Conservative"

DALE DONATHAN

"The Great Debate," this year's version of it, will pit conservative and liberal arguments on the United Nations against each other in the dining commons tonight.

Steve Miller, organizer and librarian of the Realist Alliance, a University of Nevada student conservative outfit, and Dale Donathan, president of the local chapter of the Collegiate Council for the United Nations, are scheduled to debate at 7:30 p. m.

Their topic will be "Resolved: Support of the United Nations is in the American National Interest." Donathan will take the affirmative side; Miller will argue the negative.

Only students and faculty will be admitted, said Santini.

The debate climaxes a Miller-Donathan feud that began last semester with the publication of "The Realist." That issue charged that Donathan had halted the interest of a foreign student in the Alliance by saying it was "subversive."

A short time later, a rival leaflet attacking the Realist Alliance appeared on campus, which followed by another blast of "The Realist."

Tonight, the pair will put on the oratorical gloves and slug it out in a debate program that includes 20-minute speaking periods for both men, followed by ten-minute rebuttals.

Kicking off a student union-sponsored series of "soap box" lectures and debates, the arguments will be followed by questions from the floors, said Clark Santini, who set up the debate.

Donathan, 21, is a graduate of Smith Valley high school, and is a senior majoring in political science. He is also a member of Phi Alpha Theta, the Young Democrats, and Lambda Chi Alpha.

Miller, a 22-year-old sophomore, graduated from Humboldt County high school and served three years in the Army. He has drawn cartoons for the Sagebrush, and is a member of Sigma Delta Chi.

### Religious Poet Added To TUB Lecture Sked

Brother Antoninus, a widely-known religious poet, has been scheduled to lecture on campus in late March by the Student Union lectures committee. The exact date has not been set.

Hailed by many as the best religious poet of his generation, Brother Antoninus now serves as lay brother at St. Albert's College in Oakland, the Dominican house of studies for the western province. He was received into the Dominican Order in 1951.

Eleven books of his collected poems have been published since 1935, the year when "These Are The Ravens" was printed. His latest book of poems, "Hazards of Holiness," was published last year. "The Crooked Lines of God" came out in 1959.

Born as William Everson in 1912 in Sacramento, Calif., he attended Fresno State College before deciding to become a poet and a lay brother.

In 1949, he was granted a Guggenheim Fellowship and entered the Catholic Church. At about the same time, he was one of a group of poets in the Bay Area who came to be known as the core of the so-called "San Francisco Renaissance."

During World War II he headed a fine arts program at Camp Angel, Waldport, Ore., and founded the "Untide Press", a publicational experiment of the war years.

### Kennecott, Forestry Interviews Today

Employment interviews for prospective graduates and alumni will be held by Nevada Mines division of Kennecott Copper, and the U. S. Forest service on campus today.

Interested persons should make an appointment in room 104, Clark administration.

Earlier interviews have been conducted on campus by North American Aviation, United States Firestone Tire and Rubber Company.

Fifty-mile hiker Rex Wilson of Sigma Alpha Epsilon (center) receives moral support from fraternity brothers Bill Palmer, left, and Steve Fleming. This picture was taken after 35 miles of tramping east of Sparks. One of the five SAE's who started, only Wilson, and Larry Kees, (background) finished.—Sagebrush photo.

### S. I. Hayakawa Skeds Second Campus Talk

Dr. S. I. Hayakawa, noted semanticist who spoke on the University of Nevada campus last spring, will reappear this Friday in another student union-backed lecture.

He will speak on "Success and Failures of Communism."

The first of three speakers on the student union's "On Conformity and Dissent" lecture schedule, Dr. Hayakawa will speak in the dining commons at 8 p. m. Students and faculty will be admitted free, while there will be a one dollar admission charge to the outside public.

A specialist in general semantics, Dr. Hayakawa is interested in the ways language affects people. He has been a professor of language arts at San Francisco State college since 1955.

A holder of degrees from three universities, Dr. Hayakawa has authored several books, including "Language in Action," a Book-of-the-Month club selection. He is also the editor of "ETC.," a professional quarterly journal for semanticists.

The topic of his May, 1962 speech was "The Use and Misuse of Language; Thoughts on Thermonuclear Gamesmanship."

### Board Approves \$6,151 in Funds

The finance control board approved eight budgets totaling \$6,151 at its regular meeting last week. The largest item was a \$1,792 item for forensics, presented by Dr. Griffin of the speech-drama department.

The board also rejected a \$320 budget presented by the Collegiate Council for the United Nations. Budgets approved included:

Womens' Recreation Association, \$880; band, \$1,380; AWS, \$431; Brushfire, \$911; University Theater, \$300; election board, \$410; public relations, \$47.

### 50 Miles of Vigah . . .

## Two SAE's Finish Fallon-Reno Hike

By MIKE SLOAN

The 50-mile hike from Fallon to Reno is gone but not forgotten for SAE's Larry Kees and Rex Wilson. The two University students completed the trek late Saturday afternoon after spending 17 hours on the road.

The three other members of Sigma Alpha Epsilon's original five-man expedition were forced to drop - out by agonizing aches and pains.

Duncan Knowles and Art "Skip" Broton were the first to leave the group after completing 35 miles; Dick Short, the organizer of the hike, covered 46 miles before giving way to blistered feet.

Kees and Wilson were cheered across the finish line by a large crowd gathered in front of the Grand Cafe, where the two men were offered steak dinners by the management as a reward for their efforts. They declined the offer.

The entire party departed from outside Fallon late Friday night in high spirits, but it soon became apparent that all five were laboring under the handicap of having attended the SAE initiation banquet prior to starting.

Several other groups took to the highways over the weekend in answer to President Kennedy's fitness challenge. The most successful was a party of four Junior High school teachers who completed the distance in a record time of 12 hours and 59 minutes.

Perhaps the least reassuring demonstration of physical fitness was that offered by members of the various law-enforcement agencies in the Reno area. Not one of the several officers who started were able to finish.

But the older generation expressed mild distain for the three SAE's who failed to finish.

Bill Campbell, a 1960 graduate of the University of Nevada, Manzanita hall dorm resident, and himself a member of Sigma Alpha Epsilon, was one of the four teachers who finished the hike. He later commented on his undergraduate brothers.

"Youth is deteriorating," he said.

### Twain Lectures Wednesday Night

Two lectures on Mark Twain's Nevada adventures highlight this week's campus observance of the Mark Twain Festival. They are scheduled for 7:30 p. m. Wednesday in the dining commons.

Dr. William C. Miller will speak on "The Comstock as Mark Knew It," and Dr. Walter Van Tilburg Clark will talk on "Mark's Friend, Alf."

Admission is free.

### Senate to Hear Tax Report

The tax exemption proposal of a Wisconsin student government will get a further airing before the ASUN senate Wednesday night.

A report on the proposal will be submitted by Charles Batchelder, chairman of a special senate committee set up to study the move at the last meeting.

The movement originated at the Milwaukee Institute of Technology, and has been endorsed by student governments at three other colleges.

Senators will also hear a special report from Pat White, chief justice of the Student Judicial Council.

Reports from the finance control board and the second vice president's office will also be presented.

### Filing Deadline Eight Days Away

Wednesday, Feb. 27 at 5 p. m. has been set as the deadline filing for any ASUN office. Students must pay a \$5 deposit and meet the requirements set down in the constitution to file.

Those filing will face primary elections March 6, followed one week later, March 13, with general elections.

Applicants should see Mike Mackedon, ASUN president, for information regarding the campaigns. Election victors will take office April 15.

An entire new slate of ASUN officers will be selected for the coming year with the exception of senior men's and women's senators at large.

### One-Hundred Invited To Blue Key Dance

One hundred outstanding University men received invitations to an "exclusive" Blue Key dance last week.

The Mapes Sky Room affair, titled, "The First Annual Blue Key Invitational" will run from 9-til midnight this Friday night.

## Sagebrush Editorials . . .

### Better Fred Than Red

Students who expected a John Birch-style rally at Thursday's lecture by Dr. Fred Schwarz had to be disappointed. There was none of that; but there were some interesting facts brought to light.

Dr. Schwarz did not employ mob tactics to arouse the crowd against communism, nor did he spend the evening making anti-Red charges that would be difficult to prove. Instead, he reeled off some statements that could hardly be called controversial, but could be called facts. For instance:

—The communist conspiracy is attempting to encircle the free world in five ways: numerically, militarily, economically, educationally and psychologically.

—Communists will not press their plans to completion until the morale of American youth has decayed to a point where death is considered too high a price for freedom.

—Communists believe they are ordained to rule the world.

—Krushchev has not really pulled out of Cuba.

It doesn't take much looking to determine that the above statements are not only true facts; they are frightening facts as well. Communism is attempting to encircle the free world; many of today's collegians espouse the "Better Red than dead," theory; and the Reds don't seem to be discouraged over their setback in Cuba.

Why should they?

When it is considered that Krushchev had nothing in Cuba in the first place, and that today he has 5,000 combat-ready troops 90 miles from the state of Florida, it would seem that "Red retreat" is not the best term that could be applied.

Dr. Schwarz' methods may be open to criticism, but his facts appear secure. If students dispute his facts, then they are themselves guilty of attempting to turn back the hands of the clock—to a time when the United States said it would keep foreign powers out of the western hemisphere, then went ahead and did it.

### Work Moves Ahead on Atmospherium

With construction moving into its final stages on the University's newest structure, Desert Research Institute officials have set an April completion date for the atmospherium-planetarium.

The building is located in the extreme northern portion of campus.

Construction has been completed to date on foundation walls, underground walls, and the projection room. An 18,000-gallon water storage tank has been completed, and builders have also been pouring and forming the main foundation slab.

The first facility of its kind, the

atmospherium will feature lapsed-time photographers of the entire sky, projected on the dome to show the development of hurricanes, thunderstorms, Sierra Wave clouds and other atmospheric phenomena.

The atmospherium converts to a planetarium when a star projector is put in the domed ceiling, revealing the night sky.

A museum, laboratories and auditorium will also be housed in the building.

As soon as the building is completed, programs and classes for students and the public will be scheduled.

### Stop Knocking The "Dipper"

Feb. 15, 1963

Editor, the Sagebrush:

In regards to this morning's edition of the Sagebrush, I should like to express my sincere attitudes towards a certain subject which, I'm sure, many people are concerned with.

After reading the opening paragraph of "Take Five," my mind was completely made up to protest the jest (or shall I say ridicule) of Bill Robinson. I must say, that every single edition of the Sagebrush that has come off the press since second semester has contained some trivial remark pertaining toward the Dipper.

It seems to me that after one, or even twice, that the people concerned could just "live and let live." There is an abundance of other activities and happenings going on without having to resort to the issue of the Dipper being off the team every week.

Just off the cuff, I'm sure the Dipper is getting a big laugh out of all your statements, too, don't you think?

Do everyone a favor, Mr. Firpo, (and anyone else concerned with this) and put yourself in Bill Robinson's shoes for a minute or two. I realize your job is to print news, but I and many others, believe that "old news is no news." Do you get the hint?

It amazes me how everyone can say the Dipper is Mr. "Big" when he's wearing no. 54 jersey and sinking 25 points a game, and then when scholastic misfortune strikes him (as it does a large percentage of the student body) he automatically becomes (in the eyes of many) a neophyte.

In my opinion this is something worth pondering. Why can't we just let the issue drop, let the Dipper become a regular student, and maybe next semester we can let the "Hero-worship concept" dominate us again.

Respectfully Submitted,  
 MONTIE C. PIERCE

### What Were the SAE's Really Up To?

Editor, the Sagebrush:

A small note of correction is due Mr. Knowles for his misuse of the

### Letters to the Editor

Spanish language in his recent column of February 15.

Unless the SAE's were preparing for a "honeymoon" trek, I'm quite positive they didn't carry with them "boda-bags" to "curb the winter chill" (boda means wedding). It is entirely safe to suspect that they did equip themselves with a few "botats", kidney-shaped goatskin wine-bags. As a safeguard against making the same mistake for future reference, I might offer the word "chaokoha," which is plain old Basque for the same thing.

Sincerely,  
 JILL BLACK

### Carnival Fighters Should Try Boxing

Editor, the Sagebrush:

This year the Winter Carnival had one of its finest years. The competition was keen and the school spirit high.

It's a shame that a couple of indiscreet, negligent students of the University of Nevada decided to turn this annual outdoor event into a boxing match. These certain individuals should be reprimanded for such disreputable behavior which undoubtedly reflected upon our school. If those students cannot take part in a school activity without starting a brawl, then we suggest they try their skill in the boxing ring.

J. S. GAYNOR  
 STU SCHRAEDER

### Students Should Oppose Discrimination

Editor, the Sagebrush:

On February 14th I had a conversation with Dean Basta, which he has said I may refer to publicly in a letter to this column.

Dean Basta's office has been and is opposed to discrimination on and off campus with regard to race, religion or creed. For example, those who discriminate are not included in the university list of employers and landlords recommended for students. In the university at large a student's race or religion is not a factor in admissions, application of academic standards, or discipline.

Dean Basta stated, moreover, that he is in favor of free expression of student opinion on matters of discrimination so long as the ex-

pression is regulated by the sense of responsibility which that requires, a sense of responsibility that calls for adherence to laws regarding conduct, and the use of peaceful negotiations and communication. Active demonstrations should be used only after the other means have failed.

I feel that students who think they have discovered unjust discrimination in practice should observe the responsibilities of free expression, and should be intelligent and dignified in order not to

# Engineer to Speak

Mr. G. I. Samstead, a 1955 graduate of the University of Nevada now engaged in nuclear-power de-

G. I. SAMSTEAD

velopment, will speak to members of the American Institute of Electrical Engineers Thursday evening. His topic will be "nuclear ther-

mionic space-power systems." The talk is scheduled for 7 p. m. in room 101, electrical engineering building.

Samstead, who graduated from Nevada with a BS degree in electrical engineering, is project developmental engineer in the direct electrical conversion unit of the Vallecitos atomic laboratory. It is operated by General Electric.

He is responsible for the design, testing and performance of both electrically - heated and nuclear-heated thermionic converters. In addition, he is project engineer in charge of the design and testing of a series-connected two-cell thermionic converter.

His talk, which interested students and faculty may attend, will cover such topics as the need for advanced space-power systems, the physical demands on such systems, and the potential ability of nuclear thermionic power systems to meet these demands.

He will also review the current status of thermionics, including experimental work, and review possible thermionic space-power systems.

# Proposed Amendment May OK Employment of Foreign Students

Foreign students may be legally employed on campus if the state legislature agrees to amend a law which requires that all state jobs be given to American citizens.

In a meeting with the Senate education committee university officials expressed approval for SB-84, which would allow the University to hire "aliens."

Aliens are valuable in professional and technical jobs on campus, and as graduate assistants, said Dr. Charles J. Armstrong, University president. Amendment to the bill would exempt only these three categories, said committee members.

Dr. Armstrong said the school would prefer an overall exemption, but would be satisfied with something less.

Four of the Committee members said they would accept the bill as amended. A fifth member, Sen. Bruce Parks, (D-Mineral) opposed the bill on the grounds that he "had been getting a lot of static" on it.

The original bill, preventing the

employment of aliens by the state, was passed in 1919. It provided that "only citizens or wards of the United States or persons who have been discharged from the military service of the United States shall be employed by any officer of the State of Nevada, any political subdivision of the State or by any person acting under or for such an officer in any department of the state of Nevada or of the political subdivisions of the state."

The law also provides, in section four, that, except for work on public roads (when approved employees may not be available), no money shall be paid out of the state treasury or out of the treasury of any political subdivision of the state, to any person employed on any of the work mentioned unless the person is a native citizen, ward, or naturalized citizen of the state.

The amendment will affect about fifty University of Nevada students if passed.

## Art Dept. Presents Ten-Minute Films

Two ten - minute films were shown Wednesday in the art department, free to students and public alike.

Titled "Abstract in Concrete," and "Through the Looking Glass," they dealt with reflections in pavement on a rainy night, and a dream - like presentation, respectively.

Similar programs are presented throughout the year.

# Juniper Hall Opening Slated For April 1

April 1 is now the new target date for the completion and furnishing of Juniper Hall, slated to be the newest women's dormitory on campus.

The now dormitory, originally scheduled for completion last September, is now getting the finishing touches, and it is hoped construction will be completed within a month. The dormitory should be ready for occupancy April 1, shortly after mid-semester.

Who will live in Juniper Hall and when they may move in is still a bit hazy.

A University official has said that if the building is completed and accepted this semester, and if anyone is going to move into it, the men of Artemisia Hall will move in for the rest of the semester.

Artemisia Hall needs repairs, and it would be best not to have anyone living in the building during the work, the spokesman said.

Next year's policy, however, designates White Pine hall and Lincoln hall as men's dormitories. The women will live in Manzanita and Juniper halls, and, if necessary, Artemisia hall.

# Russ Browne Commissioned In Marine Corps

Russell J. Browne Jr., who graduated from the University of Nevada in January, 1963, was commissioned a second lieutenant, U. S. Marine Corps Reserve, on February 9.

The commissioning ceremony, witnessed by Lt. Browne's father and family, was conducted in San Francisco.

Lt. Browne received a Bachelor of Arts degree in political science at the University of Nevada. He is a member of Alpha Tau Omega, and served as chapter president of that fraternity.

Lt. Browne completed two summers of Marine Corps platoon leaders class training while enrolled in college. He will report to active duty on May 25 at Marine Corps schools, Quantico, Va., for the Marine officers basic school.

# Prof Will Star In Campus Film

Theodore E. Conover, asst. prof. of journalism, will be playing the key role in a film for the Public Relations Society of America.

The film, which will be taken by the audio-visual department under the direction of Dr. Donald G. Potter, will explain the nature of Professor Conover's PRSA fellowship last summer.

The Nevada campus and Journalism classrooms will be the setting of the 15-minute movie.

University public relations students will also be seen in the film as Professor Conover explains the planning, organization, and evaluation of public relations projects.

## Laborer to Directorship Is Kinnear Success Story

Eds. Note:

As the race for the famed Kinnear Trophy starts its second leg the Sagebrush prints a biographical sketch of John C. Kinnear as researched by Jack Tigie, intramural sports director.

By DUNCAN KNOWLES

"An outstanding leader of his profession and of international reputation," notes Nevadans and Nevada of John Charles Kinnear, mining engineer of McGill, Nevada, who rose to the directorship of Kennecott Copper Corporation.

Though born in Scotland in 1885 he was educated in Salem, Massachusetts. In 1907 he graduated from the Massachusetts Institute of Technology with a Bachelor of Science in Mining and Metallurgy.

Following graduation, he came to Goldfield with his bride, where he worked for several mining companies and syndicates. Kinnear's first jobs were underground mining positions which led to engineering consultation in the company offices. For a while, he went to Utah to operate a mining lease.

Late in 1910, Kinnear joined the Nevada Consolidated Copper Company, which became a division of Kennecott Copper Corporation.

His first job was laborer on the bull gang in the smelter department. Within 10 years, having been laborer, foreman, smelter engineer, assistant superintendent, assistant to the general manager, he was made the Nevada general manager for Kennecott Copper Corporation.

In 1945, Kinnear was made vice president and director of the company. His scope of operations included the direction of Kennecott's entire operations in the United States and South America. During this tenure, although his legal residence is McGill, Nevada, his headquarters were in New York City. He maintained offices in Utah, New Mexico, Arizona and Nevada.

The mining industry has honored him in many ways. For more than twenty years Kinnear was president of the Nevada Mine Operator's Association, a director of the American Mining Congress, American Institutet of Mining and Metallurgical Engineers and on the Nevada State Advisory Mining Board. He was president of the Mining and Metallurgical Society of America.

His civic interests were numerous. He was a member of the Nevada State Board of Education for twenty years and served as president for ten years.

He was president and director of the Nevada Northern Railway and director of the Ely National Bank. He is a Shriner, Mason and Elk.

Although now a resident of Los Altos, Calif. he returns several times a year, not only to inquire into the operations of Kennecott's Nevada unit, but to keep up his participation in his Nevada interests.

In June, 1949, at the invitation of the Board of Regents and the

President of the University of Nevada, he delivered the Commencement Day address and received the honorary degree of Doctor of Laws.

Following his retirement from the Kennecott Copper Corporation in 1952, John Kinnear was appointed as a special consultant to the office of the President of Defense Mobilization in Washington.

His son, John Charles Kinnear, Jr. is following the same path as his father. He graduated from the Massachusetts Institute of Technology in 1938 and is now employed in a managerial position with Kennecott Copper, having worked with their Nevada Mines Division.

## Phi Kappa Phi Names Twenty-one Seniors to Society Membership

Twenty-one University of Nevada seniors were initiated into Phi Kappa Phi, national scholastic honorary society, in ceremonies held Thursday in the Fine Arts building.

The new members all had at least the necessary 3.20 grade-point average, and were approved for membership by the active chapter.

A reception followed the ceremonies.

Elected to Phi Kappa Phi membership were:

College of Arts and Science—Betty Aerick, Margo A. Bartlett,

Faun M. Dixon, James A. Hammond, Hilda G. Jottis, Marilyn Kotter Perrozzi, Mary C. Maine, Kathleen Miller, Ellen A. Murphy and Linda Young.

College of Business Administration—Lois J. Arends, Warren E. Hull, and David Lippencott.

College of Education—Gay L. Farnsworth, Kevin B. McGreevey, Ann L. Miller, Sarah A. Pedersen, Georgeanne Rice and Jeanne M. Sadler.

College of Engineering—Stanley Bush and Michael E. Bishop.

College of Agriculture (Home Economics) — Lucy H. Barnard.

Mackay School of Mines—James R. Matthews.

## Dean Holstine At Two Conventions

Dr. Garold D. Holstine, dean of the College of Education, attended two conventions last week.

Dean Holstine attended the two-day annual National Association of Secondary School Principals Convention in Pittsburgh, Penn., Monday and Tuesday.

On Thursday, the Dean attended a convention in Chicago. He was the official delegate from Nevada at the annual convention of the American Association of Colleges for Teacher's Education.

The standing volume of woodland administered by the Bureau of Land Management was more than 205 million board feet of timber in 1960.

## Assistant Named In History Dept.

Judith Franklin, a graduate student in history, has received an assistantship in the history department. She will work with Dr. Paul Smith and Dr. James Tigner this semester.

Miss Franklin, attending the University of Nevada on a full scholarship from Gamma Phi Beta sorority, received her BA from Wittenburg University in Springfield, Ohio, last June.

A native of Pittsburgh, Penn., she is working toward an MA in history.

She is scholarship chairman of the Nevada chapter of Gamma Phi Beta.

Who knows water better than a fish?

The fish we employ as water experts are tiny Sticklebacks. We pay them liberally in brine-shrimp, no salary deductions.

It's all because we use millions of gallons of water daily in our refineries. After use, it is treated with algae, bacteria, chemicals, sunshine and oxygen, to make sure the water is clean and pure when we return it to stream or sea.

As an ultimate safeguard, we let our Sticklebacks test the water, before it is released. If they like it, we know it will be happy water for any fish.

The object is to keep our streams and coastal waters pollution-free with abundant fish to nibble your hooks, and clean playgrounds for your water sports.

Many other industries which depend upon water are equally careful. Our common concern is to protect a priceless heritage.

Planning ahead to serve you better

STANDARD OIL COMPANY OF CALIFORNIA

# Gloomy Weekend on Nevada Sports Scene; Pack Loses In Skiing, Boxing, Basketball

## Chico Wildcats Outbox Nevada In 1963 Opener

Chico State spoiled Nevada's 1963 boxing beginnings by dealing the Wolf Pack fighters a 5½ to 4½ loss in the Wildcats' California home Saturday night.

Three Silver- and- Blue boxers started the season on a winning note.

Skip Houk stretched his undefeated string into its second season, taking only two rounds to defeat Paul Guedet on a technical knockout. Guedet stayed with Houk's furious punching in the first round, but the Reno All-American slipped in a left hook to end it all for the Chico welterweight with 1:40 remaining in the round.

Jim Evans piled up more Nevada points with a victory in the

(Continued on Page 6)

CHICO FEILBACK GRABS for the ball in weekend wolf Pack basketball action against San Francisco State Friday night. Frisco won it 77-71. Artemisia photo

## Frisco, Alameda End Title Hopes For Wolf Pack

Unable to offer enough support to individual stars Bob Donlan and Stewart Johnson, Nevada's skidding basketball team dropped two important Far Western Conference games in Reno last weekend.

Friday night, a torrid Pack second half could not keep pace with potent league-leading San Francisco State, and the Gators rang up a 77-71 victory. Saturday evening, Alameda State breezed by a tired, discouraged Wolf Pack 76-72, and handed the Nevadans their third loss in a week.

Stewart Johnson put on a sensational scoring show in the San Francisco game, hitting consistently from his favorite position near the corner out-of-bounds lines. But Johnson was well-matched by San Francisco's Brad Duncan, who slipped in 34 counters.

Frisco held a 42-28 halftime lead after an early Nevada effort that kept pace with the Gators throughout the first quarter. The Pack putt on a last minute rally, after slowly shaving the Frisco lead, and pulled within two points of the Bay City crew in the last minute. But the Gators held on to win it.

Lack of rest and rebounding power was too much for Nevada Saturday night, as Alameda State held off frequent Silver and Blue threats. Most of the Pack spurts were led by the floor play of Joe deArrieta, and the offensive gems of Bob Donlan. Donlan totaled 21 points in his finest performance of the year.

The double defeat just about drops Nevada out of the FWC picture with a 4-4 league mark, against league leading San Francisco's 7-1 record.

This is why ski poles will never look the same again...

Nearest thing to pure weightlessness! Dual taper fulcrum concept equalizes severe stresses throughout entire pole axis... hi-tensile missile aluminum (75,000 psi) has highest weight/strength ratio ever achieved... feather basket (22 grams) is drawn aluminum and natural lo-temp rubber.

## Sierra Tops Invitational

Led by Norwegian ace Thor Mjoen, tiny Sierra College of Auburn skied their way to first place in the Northern California Intercollegiate Invitational Ski championship Sunday at Slide Mountain.

The two-day meet, sponsored by Sierra College, saw the amazing Mjoen take two first places, a second, and a third as Sierra totaled 384.0 points.

The University of Nevada took second place with 360.5 points as Chico State, winner of the Nevada Winter Carnival a week ago, fell to fourth behind a surprising Stanford team. Other finishers were California, fifth; College of the Siskiyous, sixth, and San Jose State, seventh.

Nevada copped first place in team jumping as Bud Sorenson and Dave Small finished 1-2. Jim Acheson finished in eleventh place.

In the cross country event, Sorenson finished third, Bob Kean, sixth; Mike Brunetto, eighth, and Dave Small, ninth.

Freshman Lane Monroe placed second behind Mjoen in the grueling downhill event on Slide mountain's John Fremont run. Other Nevada finishers were Mike Brunetto, sixth; Bud Sorenson, seventh, and Bob Kean, 15.

Nevada's poorest showing was in the slalom, held on Slide's Silver Dollar Run. Mike Brunetto took

fifth place. Bob Kean sailed across the finish line in eleventh position; Bud Sorenson placed sixteenth, and Lane Monroe followed him with a 17th place finish.

## CCUN Will Show China, India Films

Films of the Near East will be included in a Thursday night showing sponsored by the Collegiate Council for the United Nations. Other movies will also be shown from China and India.

The Thursday showing is scheduled for 7 p. m. in the Fine Arts building.

### UPTOWN BARBER SHOP

## THE SAFE WAY to stay alert without harmful stimulants

NoDoz keeps you mentally alert with the same safe refresher found in coffee and tea. Yet NoDoz is faster, handier, more reliable. Absolutely not habit-forming.

Next time monotony makes you feel drowsy while driving, working or studying, do as millions do... perk up with safe, effective NoDoz tablets.

Another fine product of Grove Laboratories.

# CAMPUS CALENDAR

Call FA 9-3051 for items in calendar.

- Tuesday, Feb. 19:**  
—Miller-Donathan debate, dining commons, 7 p. m.
- Wednesday, Feb. 20:**  
—“Glass and You,” ASCE film, room 213, Palmer Engineering, 12 noon.  
—Blue Kay, Knight's Cafe, 12 noon.  
—Senate, Aggie Conference room, 7 p. m.  
—Rifle club, rifle range, 7 p. m.  
—Phi Mu Epsilon, room 126, Agriculture building, 7 p. m.  
—CCUN films, fine arts building, 7 p. m.  
—“The Comstock as Mark Twain Knew It,” lecture by Dr. William C. Miller; “Mark's Friend, Alf,” lecture by Walter Van Tilburg Clark, dining commons, 7:30 p. m.
- Thursday, Feb. 21:**  
—CCUN films, Fine Arts building, 7 p. m.  
—AIEE, room 100, electrical engineering building, 7 p. m.
- Friday, Feb. 22:**  
—Basketball, Nevada v. Humboldt, at Arcata, 8 p. m.  
—“Success and Failures of Communication,” TUB lecture by Dr. S. I. Hayakawa, dining commons, 8 p. m.
- Saturday, Feb. 23:**  
—Basketball, Nevada v. Chico, at Chico, 8 p. m.
- Sunday, Feb. 24:**  
—AWS breakfast, dining commons, 9:30 a. m.  
—“Pleasure of His Company,” TUB film, education auditorium, 7 and 9 p. m.  
—Canterbury club, St. Stephens Episcopal church, 7 p. m.  
—Campus Christian Association, CCA center, 7 p. m.
- Monday, Feb. 25:**  
—English club poetry readings, Fine Arts lounge, 4 p. m.  
—“Umberto D,” University film classic, University theater, 7 and 9 p. m.

## ... Outbox Nevada

(Continued from Page 5)

heavyweight division. Evans gained points on counter punches and right leads in the second and third rounds to decision Roger Anderson of Chico.

Returning letterman Dave Stix fought explosively in and out of clinches, and his relentless close-in punching was too much for John Thomson in the 156-pound division. Thomson fought frantically in the opening moments of each round, but Stix held off this initial onslaught, and carried the points through the balance of each round.

Chris Wilson was the only other Nevada bright spot, earning a draw against Ron Duval in the 165-

pound division. Both fighters scored on left jabs in a bout marked by frantic fighting in every round.

In other bouts:

—Doug Paul, Chico, took advantage of Mike Christopher's sprained ankle and decisioned the Nevadan.

—Jerri Courter, Chico, stopped Nevada's Mike Gottschak with 50 seconds of the third round remaining.

—Bobby McSpadden, Chico, decisioned Nevada's Gene Montrose in an action packed 139-pound clash.

—Carlin Jardine, 132, decisioned Larry Williamson of Nevada.

—Nevada took forfeits in the 125-pound, and 132-pound

## Newspaper Sleuth Travels To Churchill, Lander Counties

John Folkes, who is now working for the Desert Research Institute as a research assistant to help with the microfilming of old Nevada newspapers, will be traveling to Churchill and Lander counties this week.

“Now we have all the library's newspapers organized”, reported Folkes. This clears the way for statewide travel to secure records of other important old newspapers for the project, he said.

The library has a collection of some of the oldest papers published in Nevada. Among these is the only copy of the “Gold Circle Miner”, published in Midas, a Nevada boom town in the days of the gold rush.

Folkes will visit Fallon, Austin, and Battle Mountain to microfilm such historic papers as the Fallon Eagle-Standard; Reese River Rev-

eille, (Austin); various Battle Mountain papers, and two papers from towns no longer on Nevada's map—the Kimberly News, published in Kimberly, (later known as Hilltop, in Lander County) and the Churchill News, published in White Plains, once a part of Churchill county.

“We hope to have the most complete collection of Nevada newspapers available at the University library”, said Folkes.

## AWS Candidates Introduced Sunday

The annual AWS breakfast, at which candidates for the office of AWS president are introduced, will be held Sunday, Feb. 24, at 9:30 a.m. in the dining commons. Dot Gallagher and Joanie Westfield are seeking that office.

Women in living groups may sign up for the breakfast in their dorms or sororities. Non-affiliated women should call Marsha Frankovich at FA 9-0484. The charge is one dollar.

Entertainment will include a talk on Europe.

## THE CURSE OF THE CAMPUS: NO. 1

Hate me if you will, but I must speak. We college types are far too complacent. Sure, we've got plenty to be proud of. We've got atom smashers, we've got graduate schools, we've got new peaks in scholarship, new highs in academic honors. And yet, in the midst of these triumphs, we have failed dismally to make any progress in solving the oldest and most horrendous of all campus problems: we've still got roommates.

To be sure, all roommates are not bad. There is the well-documented case of Hilquit Glebe, a student at the Manhattan College of Agriculture, majoring in curds and whey, who admitted publicly that he actually liked his roommate—an odd admission when you consider that this roommate, Mervis Trunz by name, was frankly not too winsome a fellow. He practiced his tympani in his room, he kept an alligator, and he collected airplane tires.

But, on the other hand, Mervis bought two packs of Marlboro Cigarettes every day and gave one of them to Hilquit and—I ask you—who can stay mad at a man who gives you Marlboro Cigarettes? Who, upon tasting that flavorful blend of Marlboro tobaccos, upon drawing through that pure white Marlboro filter, upon exulting in this best of all possible cigarettes, Marlboro—who, I say, can harden his heart against his neighbor? Certainly not Hilquit. Certainly not I. Certainly not you, as you will find when you scurry to your nearest tobacconist and buy a supply. Marlbors come in soft pack or Flip-Top Box. Tobacconists come in small, medium, and large.

But I digress. Roommates, I say, are still with us and I fear they always will be, so we better learn how to get along with them. It can be done, you know. Take, for instance, the classic case of Dolly Pitcher and Molly Madison.

Dolly and Molly, roommates at a prominent Midwestern girls' school (Vassar) had a problem that seemed insoluble. Dolly could only study late at night, and Molly could not stay awake past nine o'clock. If Dolly kept the lights on, the room was too bright for Molly to sleep. If Molly turned the lights off, the room was too dark for Dolly to study. What to do?

Well sir, those two intelligent American kids found an answer. They got a miner's cap for Dolly! Thus, she had enough light to study by, and still the room was dark enough for Molly to sleep.

It must be admitted, however, that this solution, ingenious as it was, had some unexpected sequelae. Dolly got so enchanted with her miner's cap that she switched her major from 18th Century poetry to mining and metallurgy. Shortly after graduation she had what appeared to be a great stroke of luck: while out prospecting, she discovered what is without question the world's largest feldspar mine. This might have made Dolly very rich except that nobody, alas, has yet discovered a use for feldspar. Today Dolly, a broken woman, squeezes out a meagre living making echoes for tourists in Mammoth Cave.

Nor has Molly fared conspicuously better. Once Dolly got the miner's hat, Molly was able to catch up on her long-lost sleep. She woke after eight days, refreshed and vigorous—more vigorous, alas, than she realized. It was the afternoon of the annual Dean's tea. Molly stood in line with her classmates, waiting to shake the Dean's hand. At last her turn came, and Molly, full of strength and health, gave the Dean a firm handshake—so firm, indeed, that all five of the Dean's knuckles were permanently fused.

The Dean sued for a million dollars, and, of course, won. Today Molly, a broken woman, is paying off her debt by walking the Dean's cat every afternoon for ten cents an hour.

© 1963 Max Shulman

We, the makers of Marlboro and the sponsors of this column, will not attempt to expertize about roommates. But we will tell you about a great pocket or purse mate—Marlboro Cigarettes—fine tobacco, fine filter, fine company always.

## ... Discrimination

(Continued from Page 2)

defeat their own ends by excess.

Let us, then, negotiate before we picket or fight.

Whatever may come to pass it is good to know that the administration supports students' efforts to correct injustice—and this support may in itself help us to regulate our passions in order to better accomplish our ends.

## ADVANCED AEROSPACE PROGRAMS AT DOUGLAS

have created outstanding career opportunities for

## SCIENTISTS and ENGINEERS

B.S. degrees or better

Assignments include the following areas:

**Servo-Mechanisms**—relating to all types of control problems

**Electronic Systems**—relating to all types of guidance, detection, control and communications

**Propulsion**—relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics

**Environmental**—relating to air conditioning, pressurization and oxygen systems

**Human Factors**—analysis of environment affecting pilot and space crews, design of cockpit consoles, instrument panels and pilot equipment

**Heat Transfer**—relating to aircraft, missile and space vehicle structures

**Structures**—relating to cyclic loads, temperature effects, and the investigation of new materials, methods, products, etc.

**Aerodynamics**—relating to wind tunnel, research, stability and control

**Solid State Physics**—relating to metal surfaces and fatigue

**Space vehicle and weapon system studies**—of all types, involving a vast range of scientific and engineering skills
