Democracy Topic Of Lecture

Saul D. Alinsky, sociologist and director of the Industrial Areas Foundation of Chicago, will be the second speaker in the Sperry-Hutchinson Foundation Series entitled "Democracy As We Know It."

Mr. Alinsky's topic will be "The Elan Vitae of Democracy."

The lecture will be given Thursday, March 3, at 8 p.m. in the Thompson Education building auditorium at the University of Nevada.

Mr. Alinsky has been a sociologist with the Institute for Juvenile Research in Chicago and a number of the state prison classification board of the Illinois State Penitentiary System.

In addition, Alinsky has contributed numerous articles to sociology, criminology and psychology publications and has lectured on criminology, community organization and organized labor at various universities.

The lecture series is the result of a \$1,500 grant from the foundation. Remaining speakers include Rev. James Pike, Bishop of the California Episcopal Church, and Ferenc Nagy, former Prime Minister of Hungary.

The lecture series is free, but it is requested that tickets be obtained in advance.

Tickets can be obtained by writing to S & H Lecture Series, room 104, Jot Travis Union. Tickets are also available at Shelly's Hardware in the Village Shopping Center in Reno.

Alinsky's accomplishments are somewhat summed up by a 1965 Newsweek article which says that his career has been "a quarter-century career of mobilizing the city poor to fight for their own destinies."

He became director of the Chicago foundation in 1939, and

SAUL D. ALINSKY
Sociologist and director of Industrial Areas Foundation of Chicago

waged a pre-governmental war on throughout this organization has poverty.

The sociologist began his career as a criminologist after graduating from the University of

Chicago in 1930. He completed his graduate work at the same university in 1932.

He is a member of the American Sociological Society and the American Prison Association.

High School, Colleges Enroll In Stage Band Festival

High school and college stage bands from five states have enrolled in the 5th annual University of Nevada Stage Band Festival, March 18-19.

Schools from Nevada, Utah, Idaho, Oregon, and California have been accepted in the performing bands classification. Each band will perform in a 20-minute concert which is open to the public. A panel of judges will select "all-star" bands from three classes of schools based on student body enrollment.

Two trophies presented by the University of Nevada Alumni Association, along with the "Benny Goodman" Stage Band Award will be awarded to the three top bands.

Two guest artists will be featured at the festival in performances, clinics, and lecture demonstrations. They are Jack Sheldon, noted Hollywood trumpeter-actor-singer, and Raoul Romero,

talented Las Vegas composer-arranger-saxophonist.

Through the cooperation of Reno Local No. 368, American Federation of Musicians, an "all-star" professional band of Reno-Tahoe area musicians will also perform at the festival. This concert is made possible by a grant of the Recording Industries Music Performance Trust Funds.

High Schools enrolled by states include: Nevada: Sparks, White Pine, Mineral County, and Wooster High School, Utah: Bear River, (Tremonton), Skyview (Smithfield), and from Salt Lake City, East, Granger, and Highland High Schools.

Idaho: Preston, Minico (Rupert), West Side (Dayton).

Oregon: Douglas (Winston), Milwaukie, Putnam, and Clackamas.

California: Sacramento, Luther Burbank (Sacramento), El Camino (South San Francisco), Skyline (Oakland), San Leandro High

School, South San Francisco, Hanford, El Dorado (Placerville), Central Valley and Shasta Union (Redding), Westmoor (Daly City), Portola, El Cerrito, Bancroft Junior High (San Leandro), Pacific (San Leandro), Arroyo (San Lorenzo) and Gonzales High School.

ROTC Cadet PE Course Offered

"To increase the level of cadet physical proficiency, poise, bearing, self-confidence, and leadership, supervisory, and instructional ability."

This is the stated purposes of P. E., sections 21 and 22, according to Major John Halvorson. The course is given for ROTC cadets in preparation for the advanced corp's summer camp at Fort Lewis, Washington.

In addition to undergoing the physical exercise, cadets, on a

Enrollment Gains 19 Per Cent Over Last Spring Semester

Enrollment at the University of Nevada is up 19 per cent over last year at this time, but when the figures have been studied they show the college is not being used as an "out" from the draft and the war in Viet Nam.

Figures obtained from K. D. Jessup, deputy director of admissions, show there was a seven and one-half percent decrease in enrollment this semester com-

pared to the past fall semester.

The figures for last year's spring semesters show only a six and one-half percent decrease.

Dean of Men James Hathhorn divided those not returning to school into three categories. They are those who graduated in January, eligible students who do not return, and ineligible students who are not allowed to return.

The average net loss between the fall and spring semester is 250 students. Many officials had been expecting a smaller than average decrease this year because of the present draft requirements needed to get a student deferment.

Dean Hathhorn explained that he thought that the students at the University of Nevada were "responsible, sincere, and intelligent young people who would not go to school just to avoid their commitment to the military."

He also said the draft "is not the primary reason men go to school, though it might be a secondary motivator in getting better grades and graduating from college in the normal four year period."

The enrollment figures seem to support the Dean. As Jessup pointed out, "The draft does not seem to have played a significant difference in men attending the University of Nevada."

Hathhorn also listed benefits the college student or graduate could gain in the military as a result of his education. While attending the University a man could join the advance ROTC program and upon graduation get a commission. The Dean said all of the services want college graduates in their officer training programs.

Flu On Campus Does Not Reach Epidemic Size

The flu epidemic which has closed public schools in Washoe County and accounted for at least 16 deaths in nearby California has not reached any major proportions on the University of Nevada campus.

According to the staff of the University of Nevada Health service only 15 per cent of the cases of illness recorded with the Service have been the same strain of flu virus that has reached epidemic proportions in the local area.

Winter colds, tonsillitis, and other common diseases, however, have accounted for the comparatively high illness count on campus. The Health Service has an out-patient rate of about 100 persons a day.

Students who become ill with headache, minor sore throats, general body aches and a fever; the general symptoms of the flu, are advised to get plenty of rest, drink lots of fluids, and take aspirin.

Nursing Student Travels Wide To Attend Four Conferences

Miss Nancy Johnson, president of the National Student Nurses Association, plans to attend four conferences during February and March in Illinois, California, New Jersey and Idaho.

Her first trip would be to the National Conference of Profes-

sional Student Organizations in Chicago, where she would represent the nursing profession. This conference will be attended by law students, medical students, students of pharmacetics and various other professions.

She also plans to attend the California State Student Nurses Convention in Los Angeles in March.

Miss Johnson will speak at the Northeastern Interstate Conference of student nurses in New Jersey and again, later in March, at the Idaho Student Nurses State Convention in Boise, Idaho.

Filing Date Set

ASUN First Vice President Chuck Murphy has announced March 7 as the final day to file for an ASUN office. Filing for those who wish to run for an ASUN position must be completed by 5 p.m. that day.

Wolf Pack To Face Favored Fresno

The University of Nevada Wolf Pack readies for the NCAA regional playoffs in Fresno this weekend.

With an undefeated league record behind it, the Silver and Blue will face the Fresno State Bulldogs in the opening game Friday night.

The games should be sellouts, and with some support the Nevada five could pull some upsets. Fresno has to be the favorite, playing on its home court. And Seattle Pacific, ranked eighth nationally, cannot be counted out.

The other team will probably be Cal Poly or San Diego, since the Rebels from Nevada Southern suffered a 68-65 defeat at the hands of Cal Poly, and San Diego has defeated Fresno State this season.

Regardless of the fourth team, the tournament looks like a good one. Try to support the Wolf Pack.

Many are driving down and some have even chartered buses for the trip. A loud roar for the team from Nevada might spurt us on to a regional win. . . .

Congratulations must be given to the coaches and members of the 1965 basketball squad. The University has much to be proud of in this year's cage specialists.

Faculty And Students Abuse University

The University of Nevada continues to receive abuse from careless students and faculty members.

Stay off the grass . . . lakings might be a good answer for those who are too lazy to use the sidewalks. If lakings are out, then fines should be levied for anyone caught breaking these rules.

The Nevada Southern campus issues \$2.50 fines for walking on the grass. At least the Las Vegas school is thinking of the future, which apparently doesn't concern many here.

LITTLE MAN ON CAMPUS

Grant Given To Study Chimps

Dr. R. Allen Gardner, Associate Professor of Psychology, has announced that he has received a \$27,000 grant to study the "Acquisition of Sign Language in the Chimpanzee". What Dr. Garner proposes is a direct attack upon the question of "whether non-human primates are capable of acquiring language; namely, to attempt to teach a human language to a chimpanzee."

"The use of hands being a prominent feature of chimpanzee behavior, and the striking similarity of the chimpanzee hand to that of the human," Dr. Gardner says, "provide a mode of response that is well suited to chimpanzees, while also qualifying as a common human language."

The services of a teacher of deaf children will be available to Dr. Gardner. She is Mrs. June Hudgens, who has had experience teaching deaf children at the British Columbia School for the Deaf and St. Mary's School for the deaf in Buffalo, New York.

Other people who can use sign language will also be called upon to test the ability of the chimpanzee to communicate with humans other than his trainers.

The principles of stimulus-response reinforcement will be used besides the services of teachers of the deaf. Dr. Gardner says "for the chimpanzee and for the type of behavior that we wish to obtain, hand movements should be analogous to bar-pressing for the rat, to key pecking for the pigeon, and babbling in human infants." Bar - pressing and key packing are used in stimulus-response experiments with animals and birds.

In this project the chimpanzee should be taught not only to ask for different foods and toys but also to answer questions about what he has already eaten and what toys he has played with, Dr. Gardner says.

"For a project such as we propose, it is essential that a very young animal be raised in close association with the investigators and other human beings."

Dr. Gardner's project will also provide a comprehensive record of the development of the chimpanzee. The chimpanzee will be under constant observation and frequently filmed. Also included in the project will be the use of development tests normally used on human infants.

Rep. Walter S. Baring has said recently he feels that the grant is

"ridiculous" and that he intends to write President Johnson a letter about it.

Dr. Paul F. Secord, chairman of the Psychology Department, says, "Decisions on all federal grants are made by panels of the nation's most distinguished scientists. Obviously they do not feel this research is ridiculous or they would not have made the decision."

Baring is protesting the federal grant because aid for impacted school districts in Nevada is being cut back.

Dr. Gardner says, "Budgets for federal support in universities and budget for supports in impacted areas are separate and independent."

Poems By English Professor Selected For Library Display

A book of poems written by George Herman, instructor in English, and printed and bound in an unusual form by Mr. and Mrs. Kenneth Carpenter, has been selected for display in various libraries in the west, including the University of Nevada library. The collection of poems, all about sparrows, was produced on a hand - operated 1836 Columbian

The work was selected by a California book collectors and printers organization as one of the finest books produced during 1965. As a result of the selection, the "Rounce and Coffin Club of Los Angeles" will feature the book in its yearly exhibits.

Publishing of the book was by the "Black Rock Press, owned and

operated by Assistant Librarian Kenneth Carpenter and his wife. The Carpenters purchased the unusual press about two years ago and have run it as a hobby. Their press, invented in 1813 and weighing 2,400 pounds, is one of the earliest American models. The Carpenters have one of three existing models with the inventor's name on them.

The Carpenters are now planning to print a book of poetry by Brother Antonimus, a contemporary California friar who wrote under the name of William Everson. They have received a grant from the University's Committee for Planning and Research to publish the Antonimus collection.

Famous Botanist On DRI Staff

By James Nelson

A world renown botanist is a staff member of the University of Nevada Desert Research Institute.

Dr. Fritz Warmolt Went has won an international reputation for his extensive work in the study of plant growth substances, air pollution, climate, and agriculture.

With an interest from fundamental biology to meteorology, Dr. Went is said to be a "leading authority in plant physiology and one of the nation's most distinguished scientists."

He has been elected to membership in the American National Academy of Science in Paris and the Royal Academies of Science in the Netherlands and Belgium.

At the California Institute of Technology he conducted landmark experiments on plant-climate relationships, and during this time he did extensive field work in the ecology of desert plants in the Mt. Charleston area of Southern Nevada.

According to a university spokesman, Dr. Went is regarded as one of the foremost authorities in experiments on the kinds of plants which can flourish in Nevada desert areas.

A pioneer in the field of plant hormones, Dr. Went in recent years has turned to the study of environmental influences on plant growth.

Over 15 years of work in both areas are summarized in his book, "The Experimental Control of Plant Growth." Dr. Went's interest in plant ecology has its fullest expression in the Missouri Botanical Garden in St. Louis, where, in the Climatron, a climate-controlled display green-

house that he designed, plants from a wide variety of habitats are under investigation.

Work in this field has also led to the "biotron" concept, a facility which controls the light, temperature, insolation, humidity, and similar factors which influence plant growth.

In 1933 he became associated with the California Institute of Technology where he remained for some 25 years before becoming director of the Missouri Botanical Garden in 1958. At the same time, he was named professor of botany at Washington University, St. Louis, Missouri, a post he held before coming to the University of Nevada.

His career in teaching and research began in 1922 when he

first served as assistant at the University of Utrecht in Holland.

From 1929 to 1932, he served in Java, holding positions as plant physiologist and as head of the foreigners laboratory at the Botanical Gardens, and as instructor of botany at the medical college in Batavia.

Dr. Went received his formal education at the University of Utrecht, Holland, where he was awarded the A.B. degree in 1922, the M.A. degree in 1925, and the Ph.D. in 1927.

The University of Paris granted him an honorary Ph.D. in 1956, and McGill University, Montreal, Canada, awarded him the honorary Doctor of Science degree in 1959.

Nevada Rolls Over Gators; Pack Hits Season High-112

By Mike Parman
Sports Editor

Nevada became the second team in Far Western Conference history to go undefeated in league play, by downing the visiting San Francisco St. Golden Gators, 112-100 Saturday. It was a season high for the Wolves.

It was the Pack's 16th straight basketball win, and gave them a 20-5 mark overall. The win was the 12th in conference.

The Pack will now head for the NCAA West Coast college regionals at Fresno St. this weekend.

Playing one of its best games of the season, Nevada jumped into an early lead and led by as much as 21 points late in the game. The Gators could not stop the Wolves' scoring attack, that saw all five starters score in double figures, with four of them getting 20 or more.

The game was high-lighted by a scoring duel between Nevada's Bob Gilliam and the Gators' Ev (Goose) Adams. Both played exceptional games, with Gilliam netting 29 and Adams 27. "Tick" Gilliam also set up many baskets and played an excellent floor game.

The Pack went into a full-court press at the start of the game, and caused several San Francisco ball-handling errors. Nevada was behind only once, 4-2.

Nevada began hitting well early in the game and led at the half, 54-44. Nevada was getting second and third shots at the bucket as the rebounding team of Bill Nicholson, Larry Moore, and Nap Montgomery was very effective.

Nevada broke the game open late in the second half, when it scored seven straight points to go ahead, 81-60. San Francisco went into a full-court press thereafter, but Nevada turned it against them by throwing the

NEVADA'S BILL NICHOLSON jumps for control of ball late in San Francisco game.

ball the full-length of the court several times to score on easy layins. It was on such a pass that Bill Nicholson scored on a layin to put Nevada over the century mark with the Pack's 101st point.

For the second straight night, Nicholson's defensive play spark-

ed the Nevada defense. Blocking shots throughout, he even stopped a four-on-one situation late in the game by tying the ball up.

The balanced scoring attack of Nevada found Gilliam scoring 29, Frank Brunco 23, Montgomery 21, Moore 20, and Nicholson 17.

Chico Wildcats Nail Down FWC Wrestling Championship

The University of Nevada wrestling team placed fifth in the Far Western Conference tournament held this weekend. Chico State won the tournament, followed by Cal Aggies, Humboldt, San Francisco, Nevada, Sacramento State, Hayward, and Sonoma State.

Nevada won its fifth place standing with one second place, three third places, and a fourth place in the individual weight classes. Last year the wrestlers could only pick up two fourth places in the tournament.

Bob Seymore was the top Nevada finisher, placing second in the 191-pound weight division.

This how the Nevada team fared in the tournament:

123 pounds: Leonard Batchelder lost two matches, one to the Cal Aggies and one to Hayward. 130 pounds: Bill Teglia lost two matches, one to the Aggies and one to Chico. 137 pounds: Ken Gledhill lost two matches, one to Sacramento State, another to the Cal Aggies. (Gledhill was just released from the infirmary with the flue and, according to Coach Lee Newell, was not up to par.) 145 pounds: Duane Quick had two draws, one to last year's champion and the other to the boy who finished third last year. 152 pounds: Charles Ballard placed third by losing his first match only to come back to win two matches. 160 pounds: Earl Wilkens placed third by losing his first match to last year's champion and winning his next match over Ed Brown of Chico State. 167 pounds: Roy Kreizenback placed fourth. He won his first match over San Francisco

and lost to Humboldt and Chico. The second loss to Chico was in an overtime match. 177 pounds: Chip Carter, who was wrestling with the pain of a slight shoulder separation suffered last week at Sacramento, lost his first two matches. 191 pounds: Bob Seymore: placed second by winning his first match and losing his second to Grover Ford of the Cal Aggies. Heavyweight: Larry Stiff placed third.

Athlete Of Week Goes To Gilliam

The Sagebrush staff has re-established an old tradition, that of choosing an "Athlete of the Week."

The staff chose basketball guard Bob Gilliam as the outstanding competitor for the week ending Feb. 28.

Gilliam received the award by a very narrow margin over the rest of Nevada's basketball squad, who played outstanding ball in scoring two more Pack victories.

Gilliam, however, played one of his best games to date by scoring 29 points against San Francisco St. Saturday.

From the End of the Bench

by Mike Parman

HOW WELL NEVADA WILL DO IN THE NCAA REGIONALS AT FRESNO is anybody's guess. But we certainly will be in the running. Along with host Fresno St., the tourney is composed of Seattle Pacific, and, as it looks now, Cal Poly of Pomona.

The Pomona team had to come from behind to defeat Nevada Southern, 68-65, in Pomona Saturday night. They also defeated Fresno St., 72-70. Nevada defeated NSU twice, so it looks like we have a pretty good chance.

Probably the toughest team the Pack could face in the regionals is Seattle Pacific, ranked eighth in the nation by one of the wire services. However, if the hustling Pack plays like it did against S. F. State, Seattle Pacific won't be ranked eighth much longer.

AS IT LOOKS NOW, Nevada's heavyweight Dale Landon will fight no more. Landon, the defending conference champion, has a very bad knee that pops out when he throws a punch. He received the injury during football.

TOUGH LUCK goes to Nevada boxer Ken Barrencea, who lost via a TKO to Cal's Dave Archibald Saturday night. Long tall Ken floored his man in the second and was ahead on points with the bout almost over. With only a few seconds remaining, he ran into a hard right.

NEVADA WILL FIELD ONE OF ITS BEST track teams this season. In case you don't know, we have a shot putter who has tossed the put 59 feet. But things aren't going to be as easy as they seem. As usual, Sac. St. can be expected to give the Pack a hard time.

JUST LOOKING AROUND, I see that Nevada Southern defeated Cal Poly of Pomona earlier in the year at the convention center. I don't have the score, but it was a whole batch of points. P. S. Don't confuse the Pomona team with Cal Poly (SLO) whom both the U. of N. and NSU defeated.

IF YOU ARE IN FRESNO this weekend, why not give the Wolf Pack some support?

Cal Bears Hand Pack Boxers First Defeat

BERKELEY — The University of California boxing team edged Nevada, 6-5, in a meet at the Cal campus Saturday night. It was the first loss of the season for Nevada. Cal is undefeated.

Nevada was hampered by flu, with both Jim Wright and Bill Georgeson out of action. Georgeson is the defending conference champion.

Mike Schellin led the Nevada boxers by scoring a first-round TKO over Cal's John Harder in the 156-pound class. Schellin used a combination of lefts and rights to batter his opponent.

Dave Halstead, Riley Beckett, and Tony Schueller also won for Nevada.

Halstead, 126-pounder, decided Mike Jay by winning the last round by a good margin.

Schueller, 165-pounder, had Cal's Jim Moore in trouble in the last round to win a decision. Moore started off strongly, but faded in the face on Schueller's two-fisted attack.

Beckett, 172-pounds, came on strong in the last round to de-

feat Dave Newhouse. The bout was close in the first two rounds, but superior conditioning paid off.

Nevada's 180-pounder, Mike Smithwick, tasted defeat for the first time in college boxing by losing a close decision to Cal's Ray Kropp.

Cal's Paul Bell decisioned Nevada's Bob Engle in the 132-

pound fight. Bell took the first two rounds to win.

The Pack's Mike Slagle lost a third-round TKO to Tim Rogers in the 147-pound division.

In another 156-pound match, Nevada's John Deacon lost a close decision to Greg Monahan when he tired in the last round.

Dave Archibald, Cal 172-pounder, came from behind to TKO Ken Barrencea in the last round.

CLASSY BOB GILLIAM scores two points against Hayward State. Gilliam scored nine points against the Pioneers.

Wolves Bop Pioneers, 80-69

The University of Nevada Wolf Pack won its 11th straight Far Western Conference basketball game, by downing visiting Cal State at Hayward, 80-69, in a basketball game Friday night.

Nevada bolted to a big lead in the first half, and then laid off in the second half. Hayward was very cold in the early mo-

ments of the game, and fell behind, 33-12. Nevada led at the half, 41-23.

Hayward continued to trail by 18-20 points until they closed the gap to eight with three minutes to play. But good defensive work by Nevada's Bill Nicholson stopped the rally.

Nevada used a deliberate style of play late in the game to force the Pioneers to commit fouls.

Taking scoring honors for the Pack was Frank Bruno, with 22. He and guard Bob Gilliam also set up Larry Moore and Nap Montgomery for easy layins under the basket.

Montgomery scored 16 points,

while teammate Moore had 15, Nicholson 14, Gilliam 9, and George Corder 4.

High for the Pioneers was Howard Foster, with 14 markers.

Burrell Athlete Of The Year Wolf Pack Gymnasts Round Out Season Of Improvement

Otis Burrell, Nevada's seven-foot plus high jumper, and Bill Ireland, Pack baseball coach, received honors at the Sierra Nevada Sportswriters and Broadcasters award banquet Sunday night.

Burrell was named Athlete of the Year and Ireland Coach of the Year.

Burrell, who recorded the best jump in the nation earlier this year (7-2½) is back from a meet in San Francisco where he went 7-0, although placing second.

The Pack high jumper set a Far Western Conference high jump record in the championships at Sacramento St. last year to finish the league track season undefeated.

Ireland, who coached the Nevada nine to the NCAA District Eight championship last year, steered the Pack to a position as one of the better teams on the West Coast.

The University of Nevada gymnastics team is rounding out its second season in intercollegiate competition. Dr. Art Broten heads the gymnasts again this year. Dr. Broten pointed out the increased emphasis on gymnastics in the past few years after the United States' poor showing in the Olympics. The Nevada gymnasts have two meets remaining. After last weekend's Nevada State Championships, they meet with Sacramento City College on March 4, and they compete in the conference championship at Chico State on March 12.

College gymnasts compete in seven different events: the high bar, trampoline, horizontal bar, long horse, parallel bars, still rings, and the side horse.

Only four of the Far Western Conference schools have gymnastics teams. San Francisco, Chico State, Sacramento State, and Nevada have teams now, but the other schools in the conference should have teams in the near future.

Although the Nevada team's win-loss record is not impressive, this year's team has shown great improvement, according to Dr. Broten. The team is comprised

chiefly of freshmen and sophomores and should show great strength in the coming years.

This year's team members are Joe Rooney, soph, Reno; Robert Baker, soph, Sparks; John Howell, soph, Reno; John Hancock, junior, Reno; John Plane, soph, Denver, Colorado; Al Lansdon, soph, Reno; Allen Terkeldsen, soph, Reno; Howard Herz, soph, Reno; Gary Athanacio, soph, Reno; Tim Martin, freshman, Gardnerville; Gus Nunes, Cuba; Keith Cobb, freshman, Reno; and Jeff Reeves, freshman, Reno. Joe Rooney is the captain of this year's team.

SAE's Honor Founders At Banquet

The one-hundred and tenth Anniversary celebration was held by Sigma Alpha Epsilon on Saturday, February 26. To celebrate the founder's day a dinner dance was held at the Nugget Convention Center in Sparks. Dinner was preceded by a cocktail party.

This year special tribute was paid the members of T.H.P.O.,

the local fraternity which preceded the SAE chapter at Nevada almost fifty years ago. The funds raised at the dinner dance will be allocated by the alumni for the purchase of new initiation robes and equipment for the campus undergraduate chapter.

Queen Selections

Off Campus Independent women will nominate Junior Prom and Mackay Day queen candidates Thursday at noon in the Tahoe Room of the Jot Travis Student Union.

All independent women are urged to attend the meeting.

A secret handshake won't help you make V.P. at General Electric.

Something that *will* help move your career along at a healthy clip is a strong, steady hand when responsibility and important duties are thrust upon you. *Plus* a firm grip on your special field of interest, whether it's marketing, finance or nuclear physics.

And it won't hurt a bit if you also

want to strengthen your grip on the subject that interests you. General Electric runs one of the world's largest "graduate schools," with courses in everything from advertising to microelectronics. You can stay on top of developments in your field by periodically going to school at G.E. . . . and learning from G-E

"professors," selected from the country's top ranks of engineering, marketing and manufacturing experts.

If you want to work and study and get ahead in this kind of company, this company wants you. Come to General Electric, where the young men are important men.

Progress Is Our Most Important Product

MAJESTIC

Proposed Use Of Stead Excellent For P.E. Utilization

By Lee Harlan

The offices of the department of health, physical education and recreation in the gymnasium are crammed full of desks, books, lockers, athletic equipment, and people. Sounds of youthful activity permeate the building. Nowhere in sight is there space that is not being utilized for some purpose.

The office of the department chairman gives evidence that its occupant is a busy and active man.

Dr. George Arthur Broten, chairman of the department, views the proposed use of Stead Air Force Base by the university as an extension to the main campus as a particular boon to his department.

At present, he points out, enrollment in many of the physical education classes is limited because of the lack of space available to the instruction program. Much of the intramural sports program has to be held off the campus, and many classes are held at municipal facilities.

This decentralization of the athletic program creates problems other than transportation and coordination, he says. "With more and better facilities at our disposal, we could show better economy in teaching. Some of our instructors could handle twice the number of students in each if adequate space were available."

At present the department does not maintain a testing and research center, or a physical fitness clinic, due to the fact that there is no room or facility at present to maintain them.

"To be able to develop and expand a testing and research center is vital to any department. A physical fitness program is also a must," the chairman explained.

For the university, implementation of these programs would contribute to the improvement of coaching techniques, raise the level of the graduate department, bring in students of a higher caliber, and offer subjects on a higher level than is now possible, according to Dr. Broten.

"Right now we can't fit them all into one gym at one time," he said.

A special program of adapted physical education for the physically handicapped student is considered a prior-

ity program by Dr. Broten, and would be started immediately if the Stead facilities become available.

"A program of this sort would provide challenging activity and beneficial recreation to the handicapped individual. Many physical impairments can be relieved or corrected by properly supervised exercise and training," he said.

The facilities at Stead offer a gymnasium, tennis court and an outdoor swimming pool.

"The gym at Stead is small but well built," says Dr. Broten. "It would be ideal for testing and research into human performance, and the physical fitness program, in addition to providing space for programs now limited at the university gym."

The Stead gym has a basketball floor, office space, weight room, equipment room, locker rooms, and handball and squash courts.

"The proposed research would be involved mainly with the area of exercise physiology and human performance," explained Dr. Broten.

"Studies would be made to establish more valid and reliable tests of strength and endurance for predictive purposes. The large area of somatotyping (body build) and relationship to sports performance would be studied extensively."

"This expanded research program would lead further into the rapidly growing area of sports medicine," Dr. Broten stated.

"Efforts to improve physical fitness would be carried on with full regard for all fitness qualities; spiritual, mental, emotional, and social," he continued. "Physical fitness is achieved through a sensible balance of all activities adapted to age, maturity and capability of the individual."

There are no indoor courts at the campus gym, and all other activities have to be combined, overlapping in the existing facility.

Locker space at the university has reached the saturation point, and students are required to double up in the existing space.

According to department figures, there are now about 2,100 students under instructions in campus athletics and other recreation activities. They make up about 55% of the total student enrollment. Pointing to the participation in some of these programs, Dr. Broten indicated that there are 28 intramural basketball teams on campus, and intramural cross country racing draws nearly 175 students each year.

An additional 250 students participate in the varsity inter-collegiate program.

The swimming pool, tennis courts and bowling alley will provide for instructed courses in the athletic program, and will also be used by the students for their own recreation.

Dr. Broten is careful to point out, however, that the use of the Stead facilities to extend the physical education program, would still not meet all of the requirements of the department.

"Acquisition and use of the facilities at Stead Air Force base would only handle our present overflow. It would not meet the future needs of the university."

"Just for the swimming program alone, an inside pool is needed for a good, all-round aquatics program in this type of climate. The Stead pool would not lessen the need of an inside facility on the campus," Dr. Broten explained, as he considered additional plans for the university and its ability to handle the ever increasing student enrollment.

To meet the projected needs of the university, the board of regents in their master plan for campus expansion have called for construction of a physical education complex consisting of a gymnasium, class rooms, offices, swimming pool and various special courts and rooms.

They have suggested that the present facility be retained as a women's gymnasium for both regular classes and activities, giving this need priority over a proposal that the building be converted into a dining hall to service the dormitory complex now under construction at the campus.

Art Exhibit Features Original American Prints

Exhibitions of original American prints, and twenty paintings done in polymer plastic and mixed media, are now being featured at the University of Nevada art and lounge galleries.

Called "The Printmaker's Image," the collection of American prints in the art gallery of the Church Fine Arts building includes 34 prints dating from the 19th century to today.

Among them are "Bibi Valentine," a delicate etching by James A. McNeill Whistler; "Aetna Waking," a colorful abstract

woodcut by Carol Summers, and "The Post," a serigraph by Ben Shahn.

Other artists represented in the collection include George Bellows, Sam Francis, Mahroni Uoung, Leonard Baskin, and Dean Meeker.

A panel describes the major processes of print-making in terms of tools, techniques, and the tone and surface characteristics of the final products.

The exhibition is one of nine touring IBM shows which last year exhibited in 100 cities in

the United States. The show will be at the university until March 1.

Sigma Xi Meeting To Feature Speech

"Production of Exotic Material for Color TV Screens" is the topic for a speech at the monthly Sigma Xi Club meeting on March 8 at 7:30 p.m.

Dr. C. J. Lewis, director of research, Chemical Division, Colorado School of Mines Research Foundation, will speak in room 207 of the Mackay School of Mines.

Sororities Initiate 59 New Actives

The sororities on the University of Nevada Campus initiated fifty-nine new members last week. Pi Beta Phi initiated fifteen women. They were: Delores Barcellos, Patsy Bollensen, Sally Colton, Nancy Drake, Jacque Fabian, Barbara Gottschalk, Myrtle Hawkins, Stephanie Lorrigan, Debbie Moore, Georgia Nannini, Suzette Swanson, and Linda Vargas.

Gamma Phi Beta initiated eleven. The initiates are: Ellen Bedell, Lou Breen, Julie Cassinelli, Jackie Ennis, Donna Hage, Linda Hoover, Ada Kelly, Jody Margerum, Melani Murray, Muriel Paille, and Sherry Wood.

Delta Delta Delta initiated fif-

teen. They were: Kay Barrett, Ingrid Broten, Zo Ann Catalano, Sue Ferris, Claudia Hartman, Annette Konus, Debbie Rose, Mary Samon, Toni Semenza, Pat Semenza, Sandi Swan and Sherry Wiley.

Kappa Alpha Theta initiated eighteen women Sunday, February 27. The new members are: Linda Audrain, Lyn Beeghly, Jane Boloso, Jody Dube, Miki Elcano, Janet Emmons, Ardyth Felesina, Charlotte Ferrari, Elizabeth Hannifan, Frances Jones, Edith La Fond, Barbara Nelson, Susan Nelson, Pam Quilici, Toni Robustellini, Linda Rukel, Julie Savage and Jean Urrutia.

Haiti Student Rey To Speak At Meet

Miss Nancy Rey, a student at the University of Nevada, will again talk to the French Club about her country, Haiti. The meeting will be held in the Hardy Room of the Jot Travis Student Union Building tonight at 7:30.

Miss Rey will use exhibits to illustrate her talk.
