NEVADA COED TO

BE CHOSEN FOR

QUEEN CONTEST

(See Page 3)

Eight Coeds Vie For Junior Prom Queen

Eight University of Nevada coeds, representing campus living groups, will vie for the title of Junior Prom Queen.

Voting for the candidates will take place Thursday, March 31 and Friday, April 1, in the Jot Travis Student Union.

All campus males will be eligible to vote for the annual campus contest, termed "The best

Delta Delta Delta

SUE MCGOVERN

ever" by Jr. Class President Gerry Roberts.

The all-school semi-formal affair is scheduled for Saturday, April 2 from 9 p.m. to midnight at the Hidden Valley Country Club.

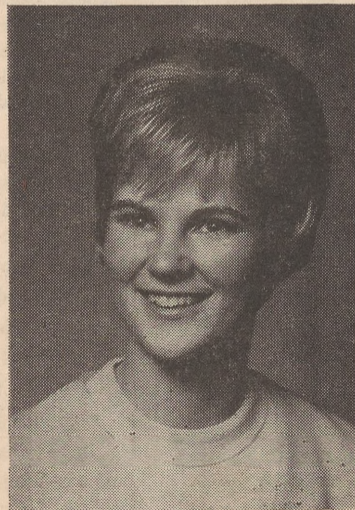

Two hundred couples will dance to the music of "The Strangers."

The queen will be crowned during intermission.

This year's queen candidates are as follows:

SUSAN MCGOVERN represents Delta Delta Delta in the race for the queen title. Born and raised in San Francisco, the 20 year old junior is majoring in history.

Kappa Alpha Theta

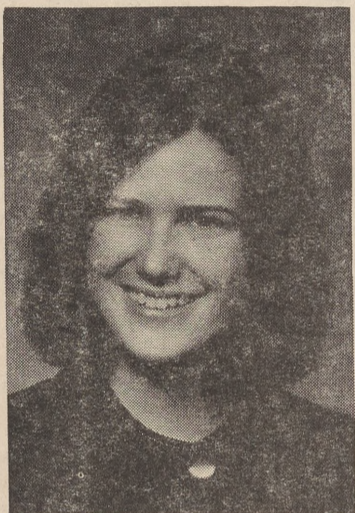

PHYLLIS TEIPNER

Her interests include sketching and listening to records. Sue likes "Hud" type people, dill pickles and dislikes fog and earthquakes. This 5' 6" candidate has dark brown hair, green eyes, and her ambition is to work for the government.

PHYLLIS TEIPNER, a medical technology major, was born in Monroe, Louisiana, but presently lives in Reno. This 20 year old junior represents Kappa Alpha Theta. She has blonde hair, blue eyes and lists her hobbies as ski-

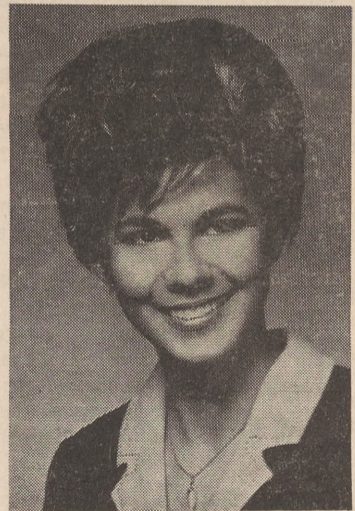

Artemisia

DEBBY GRAHAM

ing and sailing. She likes people, good entertainment, travel and dislikes cats, olives, shots and

Gamma Phi Beta

JULIE TYSON

disorder. Her ambition is to graduate, go into cancer research and then get married.

Off Campus Independent

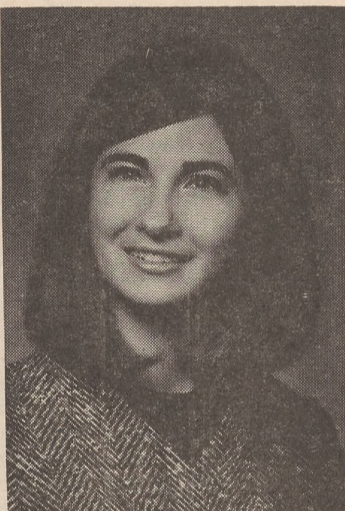

GRETCHEN GEYER

GRETCHEN GEYER represents the Off Campus Independents. She is 20 years old and has brown

hair and brown eyes. This biology major was born in Iowa, but now lives in Sparks. Her interests

Manzanita Hall

JEANINE EARL

are skiing, tennis, water-skiing and sketching. She likes snow, friends and sun and dislikes wind,

Pi Beta Phi

MARYLYNNE FRY

lies and two-faced people. Gretchen's ambition is to graduate.

JULIE TYSON is Gamma Phi Beta's candidate for Junior Prom

Juniper Hall

HARRIET HYATT

Queen. This 20 year old, brown haired, brown eyed coed is 5'5" tall. She was born and raised in Reno and is a medical technology major. Her likes include snow, bright colors and sunshine and

she has no real dislikes. Julie's ambition is to work as a medical technician in a large hospital in San Francisco or Los Angeles.

JEANINE EARL was born and raised in McGill, Nevada. This 20 year old hopeful represents Manzanita Hall. Jeanine is 5'3" tall, has blue eyes and light brown hair. Her major is foreign languages and her interests are art, music, modern dance, painting and skiing. She wants to enter the Foreign Service after graduation.

DEBBY GRAHAM representing Artemisia Hall, was born in Vallejo, California. The 19 year old coed is 5' 7½" tall and has blue eyes and light brown hair. She is an art major and enjoys the outdoors. She dislikes humidity, shoveling snow, and putting chains on cars. Her ambition is to become a scientific illustrator.

MARYLYNNE FRY, the 5'4" blonde haired, blue eyed coed, represents Pi Beta Phi. This 20 year old was born in Santa Barbara and was raised in Reno. She is a physical education major and her interests include skiing and swimming. Marylynne likes Lake Tahoe and hopes to be a teacher and airline stewardess.

HARRIET HYATT was born and raised in New York. The 20 year old representative of Juniper Hall has blue eyes and blonde hair. Her major is Social Psychology and her interests and hobbies include painting, traveling and horseback riding. She likes dancing and fun and her ambition is to become a social worker.

Candidates Have Photo Expense With Campaigns

Included in the expenses of most campaigns conducted at the University of Nevada is the expense to each candidate of having his pictures taken and duplicated to appear on numerous posters and billboards.

The advantages of these pictures are many. Primarily, they allow the voter to become visually acquainted with the candidates. The voter can then pick the candidate out on campus and put him under surveillance. Conversely, the voter may have seen the candidate many times; but he doesn't know the person's name and, perhaps, is not aware that he is a candidate. Thus, previous surveillance pays off for the voter. However, it must be understood that these two advantages can suddenly turn into disadvantages for the usually snobbish or irresponsible candidate.

Amazingly, these pictures disappear immediately after the returns are announced. Many of the disappearances can be credited to a zealous buildings and grounds department. Because elections are usually held in March, the wind accounts for another large portion. The pictures sent to sorority and fraternity houses and residence halls are rapidly snatched up by inhabitants enamored of the candidates. However, this year's elections have established a "first." This year the ATO campaign mascot ate a large number of the posters.

Manzanita's Feathered Folk Provided With New Sanctuary

University of Nevada's ducks have a new home. The Manzanita lake island project is now completed and will provide sanctuary for ducks, geese, sea gulls, and even perhaps some swans.

In an official report to University Engineer Ed Pine, John Sala, head of buildings and grounds, gave a complete run-down on the island. The major cost was \$671.25 for the concrete conduit which was laid around the base of the island to prevent excessive erosion.

Byers Construction Company provided 600 yards of fill for the

project at no cost to the university. Fence posts and cable used to support the conduit was obtained either from the construction company or from surplus sales at a "small" cost.

The university invested two yards of topsoil for the landscaping, plus three mulberry trees, nine juniper pfitzer, and four forsythia. The Nevada State Tree Nursery provided three golden willow trees, and 12 juniper scopulorum.

The project was completed in 136 working man hours.

Feather And Macaroni Art Displayed

Walking into the home economics building a student will notice a display made up of bright colors and odd objects used together to form a complete collection of "abstract art."

The display is made up of colleges made of cloth, feathers, cotton, macaroni, rocks and colored paper. It also includes finger-paintings, clay models, and one wall of vegetable paintings. These paintings were done using apples, celery, carrots, and various other vegetables instead of paint brushes.

Children from the Child Development Lab did the art in class. The lab is made up of a very select group of children. It represents the perfect nursery school and is composed of children with different racial and cultural backgrounds, different types of family employment patterns, different educational backgrounds in the family, different socio-economic backgrounds, a variety in the ages of the parents, various family sizes, and a limited number of handicapped children.

The Hot No Sagebrush

Published by the Associated Students of the University of Nevada on Tuesday and Friday during the school year excepting holidays and examination periods. Office: Journalism Building basement, campus. Phone FA 9-3051.

Press: Western Printing and Publishing Co., 1845 Prater Way, Sparks. Phone 358 4411. Second Class Postage paid at Reno, Nevada. Mailing address: Box 8037, University Station, Reno. Price: \$2 per semester, \$4 per year, and five cents per newsstand copy.

This is an official publication of the ASUN and as such its contents do not constitute official University policy.

Benefits Of New Housing Proposal May Not Prove So Advantageous

A new housing proposal, which may be on the April agenda for the Board of Regents would seem to give dorm women the break many have been hoping for.

The new housing policy, proposed by Dean Sam Basta, would require all unmarried, undergraduate students, under 21 not living with parents or relatives, to live in dorms, sororities, or approved residences. However, students would be required to live in these facilities only when such housing is available. The dean of students would be authorized to make exceptions when warranted.

Right now the University requires all unmarried undergraduate women under 21 to live in dorms.

As a result, a few women have been turned away from the University in the past when dorms are filled. But the proposed ruling would allow women to live in approved housing rather than be turned away.

Many women are anxious to move out of the dorms, which they feel are too restrictive. Further, the Dining Commons food, they feel, is too starchy and fattening. Complaints have also been heard concerning the quality and flavor of the D. C. diet in the past.

Dean Basta has said it's the University's responsibility to make living in a residence hall a privilege and not a penalty. Many women living in the dorms who feel it's certainly not a privilege would seem to indicate the University has fallen down in this respect.

However, a second glance at the proposed rule may prove not so advantageous for the women.

The new eight-story dorm under construction across from White Pine Hall is going to need some residents after it is completed. Although it is mandatory for women to live in dorms, University men may live where they wish.

The University may find it difficult to fill six dorms after all the women have been accepted.

With the new dorm and other buildings, the University has to meet financial obligations to the Federal housing and Home Administration. Revenue to help meet these obligations are received through dorm fees.

Requiring all students under 21 to reside in dorms would insure no vacancies in the residence halls and a steady income each semester.

HAMPTON YOUNG, Assistant Editor.

High School Science Fair Held

The Northern Nevada Science Fair, open to junior and senior high school students, was held at the University of Nevada's Atmospherium-Planetarium, March 25-27.

Phi Sig Founder's Day

The Grand Nation President of Phi Sigma Kappa was the guest speaker at a founders' day dinner-dance at the Holiday Inn on Friday, March 25. Alvin S. Rudisill spoke on brotherhood, scholarship and character, as well as general fraternity news.

The Fair was planned to help foster interest in the many scientific fields and to recognize individual student research activities.

Student exhibits and papers were judged by representatives of science-related industries in this area and staff members of the University of Nevada.

Outstanding students may win an all-expense paid trip to the National Science Fair-International to be held in Dallas, Texas, this May.

"THOSE GUYS"

Campus Vocalists Successful

By Jack Porray
Staff Writer

A summer working in Northern California, and a recording contract with a major record company are just two of the things in the near future of "Those Guys," a local singing group.

The group has been in existence since 1962, when the men of the Sigma Alpha Epsilon song team realized that they had more than just a group of friends singing for Mackay Day. They auditioned at Shakey's Pizza Parlor and landed a job singing Wednesday nights during the school year.

There were five members at that time. Bud Olsen, Cal Wilson, Bob Backus, Tod Brendlen and Tom Marshall. The group remained together during the 62-63 school year, then disbanded for the summer.

Due to the graduation of Wilson and Backus, the group added two new members the next year, Sig Rogich, now the editor of the Sagebrush, and Don Hackstaff. This year 63-64, the group again won the Mackay Day song team contest.

ARMY CALLS

Olsen went into the Army during the 64-65 school year and the group disbanded. After his return this year, he recruited two new members, and the three now use the original name of "Those Guys." The two new members are Jeff Reeves, and Rick Shelby.

The new group has been together since September of 1965, and plans to be in the San Francisco area during the summer singing in a club there. It will audition at Magoo's in Los Gatos, the Drinking Gourd in San Fran-

cisco, and Ricardo's in San Jose during the Easter vacation.

Olsen, a Junior in Business Management is the only member of the group who plays when they sing in public, but all are accomplished musicians in their own right. Both Shelby and Reeves play the guitar, and Shelby plays the banjo as well.

WOMAN NEEDED

The group is currently looking for a female singer, possibly to take over the lead. Olsen and Reeves do all the harmonizing, and Shelby the melody of their songs. They sing mostly folk music, but do rock and roll on occasion.

Some of the appearances of the performers have been on

Betty Skogland's "Be My Guest Show," when they met Fred Waring. They sang for Grant Sawyer's testimonial dinner in Sparks early this year, and were the official singers in this year's Wolves Frolic.

They are currently awaiting word on their taping sessions, and hope to land a recording contract. They have two songs of their own, "Some Day Baby," and "Misty Christy," written by Don Hackstaff. During public appearances, Shelby sings bass and baritone, Olsen, baritone and tenor, and Reeves, tenor.

Favorite singing group of "Those Guys" is the Kingston Trio, and their favorite rock and roll group is the Drifters.

'Learning For Doing' Is Motto Of Nevada Resource Center

"Learning for doing" is the motto of the new Teaching and Resource Center recently established at the University of Nevada.

The center, mostly for teachers or those who are planning on becoming teachers, teaches its students to use all the latest equipment on the theory that if you know how to use the equipment, when the opportunity arises it will be used.

The TRC, with Dr. Calvin H. Reed, in charge, is located in the old parochial school behind the former St. Alberts church.

Consisting of eight classrooms, seven of which are in use by the center, the TRC is trying to provide opportunity for students and teachers to learn new ideas in teaching, new ways of doing

things that will help children find learning an enjoyable process, not something that has to be done until he reaches a certain age, said Dr. Reed, director of the center.

The eighth classroom is currently being used by the psychology department for graduate students, but after the end of the semester, it will revert to the TRC.

Classrooms in the building are being used for development of instructional material, teaching techniques, demonstrations with groups of children will be shown, and lab facilities for students and teachers will be available. Students may use any of the equipment there. Both elementary and secondary teachers participate in the center.

★ Letters To The Editor ★

Fraternity Comments

Dear Editor and Fraternity Member:

I would like to make a few statements about those great institutions on our campus—FRATERNITIES. What belonging to a fraternity does for a young man is simply marvelous. It gives him companions to do things with, a wider social circle, other members to help him with his studies, brotherhood and fellowship. All these and many more (I'm sure) are the advantages of belonging to a fraternal order. Yes, fraternal brothers do all sorts of wonderful things together. Why just last Friday while in the library trying to squeeze in a few extra minutes of study, I noticed one of these wonderful groups of fraternal brothers sitting together at a table studying. My but they must be quite a studious group to have such a high GPA, and still have all that time for their numerous social activities. Few, if any must have to work his way through college as this independent does. Anyway, back to the studious group in the library. They certainly must be an intelligent group because they seemed to be able to study several subjects at once. Besides studying aerodynamics, they were concentrating on voice patterns and volumes. Just imagine studying the loudness of talk and laughter and its effect on other students, while practicing for next year's football season by throwing books at each other. It's amazing what a fraternal group teaches boys in the ways of becoming men. But most important in their studies was their self-taught class in aerodynamics. Although they were tearing up our wonderful newspaper for their experiments, it still was exciting to watch their

spiraled cones sailing across the library. Only one thing I didn't understand, why were they so interested in seeing if they could hit other students? Could it have been a class in guided missiles and we were the enemy? But we didn't have any weapons, besides I'm a peace loving man I greatly dislike war, so I wouldn't return their missiles.

INDEPENDENTLY WRITTEN

Robert James Mort, Jr.

P.S. Sorry for the length but in your Greek paper surely you can squeeze in an independent letter once in a while. Also excuse the typing as I'm not too proficient in that.

A Litter Bit Hurts

Editor, Sagebrush:

I was astonished to see, the morning following the campus elections, the University buildings and grounds employees cleaning up the campaign debris. It would certainly seem that students who consider themselves adult enough to participate in campus politics would also be mature enough to remove their posters from the much-discussed University lawns, and not expect it to be done for them.

Sue Toll

New Parking Lot

Editor, Sagebrush:

I was happy to learn that the University of Nevada has opened a new parking lot for ALL the students. This new parking lot was discovered quite by accident however. It seems that one day recently, Wednesday 23 to be exact, the parking lot was opened to five cars, five little cars. These five cars were not little enough however, because one of them had to park on our already crowded sidewalks.

To get back to the subject at hand, I am happy to hear that the University has opened a new parking lot for ALL students. It is a pity however, that the parking lot was directly in front of the library and on the sidewalks in front of the library.

I would like to thank the University Police for their approval to ALL students to park on the sidewalks of this fine school, it is very generous of the police in light of the fact that the police find it fit to tag cars parked in bona fide Student A parking lots.

John W. Mullen

Amendment No. 3

Editor, Sagebrush:

In the March 22 issue of the Sagebrush, your advocated passing amendment No. 3 of the recent ASUN elections. Your reasoning stated that "anyone willing to work for an office should be entitled to that office."

In reading over this amendment and checking the election results, I note that a so-called "Independent" is still afforded a free senate seat by simply filing for a position sought only by affiliated candidates. Your reasoning appears to conflict with this amendment. Should affiliation, be it Greek or any other recognized campus organization, have any bearing on the right of a student to represent his or her college?

An ASUN college senator is a representative of his or her college; other campus affiliation should not effect a person "willing to work for an office." Do you agree?

Respectfully,
Charles Steiner

Wolf Pack Captures Conference Boxing Tournament

By Mike Parman
Sports Editor

The University of Nevada boxing team regained the California Collegiate Boxing Conference championship by edging the University of California, 4-3, Saturday in Reno.

Winning conference crowns for the Pack were Bill Georgeson, 147-pounds; Mike Schellin, 156; Tony Schueller, 164; and Ben Blinn, heavyweight. California had three winners, Chico St. 2, and Stanford one.

In addition, Nevada's Schellin was named the tourney's outstanding boxer. Tim Fitzgerald, who lost a thriller to Scheuller, was given the sportsmanship award.

Nevada claimed its first win when Georgeson, the defending CCBC champ in the 147-pound class, opened up with inside body clouts in the third and final round to defeat John Harder of Cal. The match was one of the closest of the night, with Harder mauling the speedy Georgeson and attempting to tie him up.

FINE EXHIBITION

In a beautiful boxing exhibition, the Pack's Mike Schellin edged out Cal's Greg Monohan with a last round rally

that saw him land a series of left hooks and straight rights to the head. The taller Monahan had used his reach to good advantage in the first two rounds, although he could not connect with the shifty 156-pound Pack boxer.

In one of the best fights of the night, colorful Tony Schueller outslugged Tim Fitzgerald of Chico to win the 164-pound title.

Scheuller used a strong jab and hard rights to the head to shake up his opponent, although Fitzgerald scored with hard left hooks to make the fight close. Scheuller's last-round punching gave him the slit nod.

In the final bout of the night, Nevada's burley Ben Blinn, 210 pounds, outslugged huge Wayne Cook, 240, in the heavyweight final. Cook, from Chico, was in trouble in the last round as Blinn blasted him with hard rights. The turning point may have been when the Nevada fighter landed several rib-cracking jabs to the body in the second.

KUTSUMOTO REPEATS

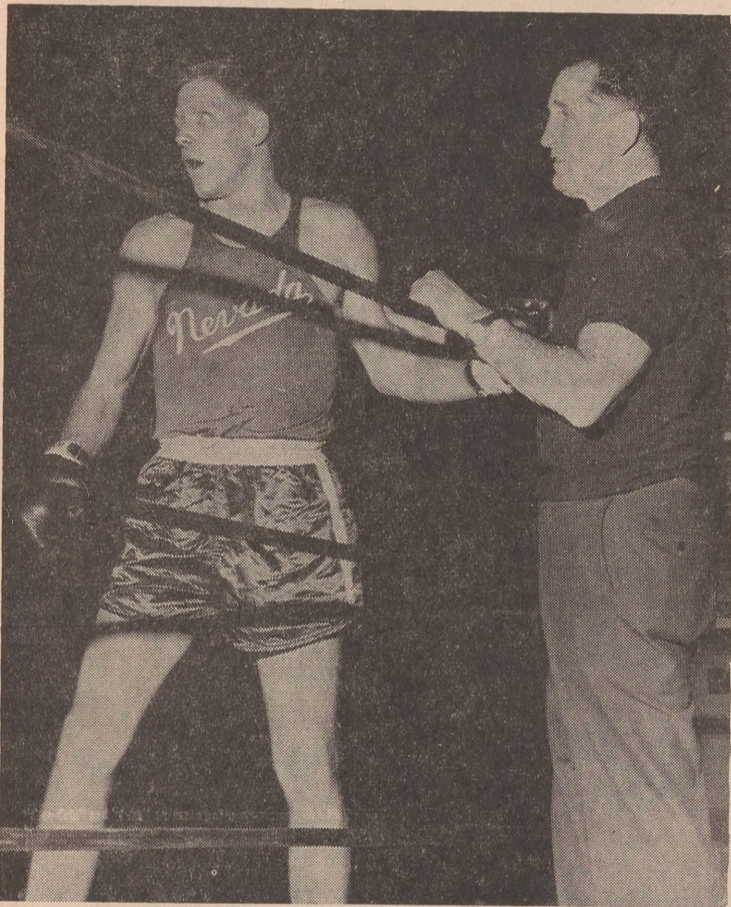

Nevada's Bob Engle could not stop the windmilling attack of Chico's Ken Katsumoto and lost the 132-pound final to the Chico fighter. Gatsumoto won his third conference title over the less-experienced Pack fighter.

Defending champ Pete Cowan of Cal left-hooked his way past Dave Widmer of Nevada to win the 139-pound crown. Widmer, showing plenty of guts as he bored in all the way, absorbed punches for two and a half rounds before the Cal fighter with a crushing right to the chin to leave Cowan on rubber legs as the bout ended.

Stanford's only entry, Tom Jenks, avenged an early season loss by handing Riley Beckett his first loss of the season. Jenks used a hard left jab all the way, and connected with thumping left hooks to the midsection in the last round to win. Beckett, however, landed hard rights to the head throughout to keep the bout close.

Nevada's Mike Smithwick punished Cal's Ray Kropp in the first round, but tired rapidly after that to lose the decision in the 180-pound final. Kropp began to score with counter punches in the second round and had the Nevada fighter in trouble. Smithwick came back in the last round with hard lefts, but could not overcome the Cal fighter's lead.

In the 125-pound division, Dale Chamblin of Cal scored a second round knockdown to defeat Chico's Mickey Maxwell in a close fight. Maxwell had defeated the Pack's Dave Halstead the previous night.

NEVADA'S 164-pound champion, Tony Scheuller, awaits decision in bout against tough Tim Fitzgerald. Scheuller won a close nod.

Nevada Nine Clobbers NSU Rebels Twice As Pitcher Dallimore No-Hits Southerners

A pair of University of Nevada moundsmen handcuffed the Rebels of Southern Nevada in Las Vegas Saturday to help the Wolf Pack win a pair of games 6-0, 6-1. Fred Dallimore threw a brilliant no-hitter in the first game, and his teammate Carl Bossieux came on in the night-cap to hold the Rebels to three hits.

Dallimore used an array of breaking pitches to shut-out the Rebels. Dallimore allowed only four walks in the ball game and was in trouble only once. In the seventh inning the Rebels threat-

ened with a pair of walks but Bob Gillham saved the no hit, shut-out for Dallimore on a fine back-to-the-field catch that ended the game.

Bossieux, in allowing only three hits, struck out 10 Rebel batsmen. Bossieux's shut-out was spoiled by an unearned run in the second inning.

Nevada's offensive attack was led by Gillham who was four for seven on the day, including a two-run homerun in the first game. Mike Sala provided the big blow in the second game with a three-run double in the sixth inning. Other Pack members picking up big "hits" on the day included Steve Small and Steve Cryer in the second game. Owen

Toy hit for a two bagger in the first game.

The Wolf Pack, now 6-5, on the season will meet the Chico Wildcats in the first conference game of the season on Saturday at Moana Stadium. Game time is tentatively set for 12 noon.

Movie Tonight

"Ballad of a Soldier," a film about Russia after World War II, will be shown tonight at 7 and 9 p.m. in the Fine Arts theater.

"Time Magazine" says of the film: "It is an original, beautiful, patriotic journey through war-churned Russia."

Promotions Made By Military

An overnight tactical problem will be encountered by the ROTC Department's Counterguerrilla Unit on the weekend of April 1 and 2, said Master Sergeant Howard Johnston, the group's advisor.

The 30-hour exercise will start at Geiger Grade Friday afternoon, and will proceed to Happy Valley and the surrounding areas by Friday evening and Saturday.

"The purpose of the problem," stated Sergeant Johnston, "is to test the Cadets' ability to perform in actual tactical conditions."

Conducting reconnaissance patrols, raids, and other simulated field maneuvers will be covered. In addition, application of map reading and land navigation skills, as well as the use of silent weapons will be taught in the "mock war."

Live chickens will be used for

food, and the tasks of capturing and preparing the fowl for meals will be assigned to certain cadets.

Forty to fifty cadets are expected to participate in the exercise with senior cadets acting as platoon leaders.

The problem will end early Saturday so that cadets may attend the Junior Prom Saturday night.

New Chemistry Lecture Series To Begin Soon

The Reynold C. Fuson lecture series in chemistry will be initiated in the University of Nevada chemistry department April 14-15. The series will be an annual affair in honor of Dr. Fuson, distinguished visiting professor of chemistry.

A former student of his at the University of Illinois will give the first lecture. He is Dr. Richard Arnold, president of the Mead Johnson Research Center in Evansville, Indiana. The lecture will be on "Reversible Olefin-Carbonyl Reactions" and Cyclic Transition States in Organic Chemistry."

Dr. Fuson came to the University of Nevada after retiring from the University of Illinois in 1963.

Dr. Fuson said the primary purpose of the lecture series is to bring distinguished chemists to the campus. "This is necessary for the Ph.D. program that is developing," he said.

Dr. Fuson said he has "great faith" in the chemistry program at the University of Nevada. He teaches both undergraduate and graduate courses.

He has held many prominent positions in the field of chemistry. He was a National Research Fellow in 1924 and instructor in 1925 at Harvard University.

From 1927 to 1963 he was professor of chemistry at the University of Illinois and was made Professor Emeritus in 1963.

For ten years he served as councilor in the American Chemical Society and was associate editor of the Journal of the American Chemical Society.

Dr. Fuson was elected to the National Academy of Sciences in 1944 and served as chairman of the chemistry section from 1950 to 1953.

On the National Defense Research Committee he served as official investigator and as responsible investigator on the Committee on Medical Research.

He has received various awards in recognition of his contributions to chemistry. In 1965 he was elected honorary member of Sigma Sigma Kappa, a national chemistry society.

Since being at Nevada, he has revised two text books used in the chemistry department. One is for graduate work.

Women's Dorm Plans Open House

Everyone will have a chance to visit the women's dorms Sunday, April 3.

Manzanita Hall is having open house from 2 p.m. until 5 p.m., and Juniper Hall will be open from 3 p.m. to 6 p.m.

The residents' rooms will be open to all visitors. Entertainment will be provided, and refreshments will be served at both open houses.

Coed To Represent State In College Queen Pageant

One Nevada coed, a student at either the University of Nevada or Nevada Southern University, will be selected this spring by a national panel of judges to represent this state in the 12th annual National College Queen Pageant. The pageant will be held in New York City from June 10 through June 20, 1966.

The contest is recognized by both students and educators as a "significant search to find and to honor the nation's most outstanding college girl."

The pageant is not a beauty or talent contest. Participants are judged on scholastic ability, campus activities, interest in community service, attractiveness, poise, personality, and good grooming.

All contestants compete in a series of forums and seminars concerning education, campus life, current events, art, literature, fashions, and career goals. They are also judged on their skills in home economics.

Judges include editors, publishers, and United Nations diplomats. The ten days in New York City also include entertainment and sight-seeing in the New York area.

The national winner of the contest is guaranteed financial earnings for her efforts in modeling, endorsements, and personal appearances, which include appearances at Disneyland; and in the Macy's Thanksgiving Day parade and the Tournament of Roses Parade.

State contestants will be selected from each of the fifty states and flown to New York City for competition.

Further information concerning the pageant may be obtained by calling Lyn Armbruster Milligan, who represented Nevada in last year's contest, at 322-0871.

Small School Lab Established

A small schools laboratory has been established by the University of Nevada and has been in operation a week. The lab will provide school districts help in planning and in organizing a master plan to construct new school facilities in the district. It will give enrollment projections, latest ideas in classrooms, said Dr. James C. Davis, professor in the Department of School Administration and Supervision.

"With increasing populations, most school districts are now involved in planning for new facilities, and it was decided that a

planning center was needed," said Dr. Davis.

The center will help school districts plan facility utilization, development of education specifications, site selections, analysis of financial capabilities for future construction, and any problem that relates to the planning for additional facilities for a school district.

ICC Brochure Budget Approved

A budget of \$150 has been approved by the Finance Control Board for the publication of an Inter-Club Council Organization Brochure at the Fall Registration 1966.

The new recognition policy, now pending in Senate will be discussed at the next ICC meeting Thursday, March 31 at 7:30 p.m. in the Travis Lounge.

I.C.C. By-laws have gone before Senate and the council is now an approved organization.

A proposal for \$3 dues per club per semester will be discussed.

Each club should select a representative.

Wolf Pack Trackmen Ramble Past Outgunned Chico State

By Mike Parman

It was like David and Goliath, except that Goliath won. The Nevada track team ran Chico St. off the track in posting a 114-31 win over the Wildcats in the first meet on the new Nevada track. Several individual bests were produced in the meet, but for the most part Nevada relaxed its way to the win. Otis Burrell, number one high-jumper in the nation, rested his leg injury and did not compete in the jump.

ble winner, grabbing the 440-yard intermediate hurdles in a time of 42.9 and the 330-yard sticks in 37.8.

John Hancock pole-vaulted to a career best with a winning vault of 14-0. Al Lansdon took second for the Pack.

Another career best occurred in the shotput when Howard Briles won the event with a 53-11 toss. This was more than a foot further than his old mark.

In the three mile run, a five man race rapidly turned into a two man Nevada duel as Mark Wynne and Don McCarthy both lapped all Chico entries and ran close together the entire way. Wynne opened up in the last hundred yards to win.

Otis Burrell edged Nevada's Vic Simmons to win the 120-yard high hurdles in 14.6. The winning time was .2 off his Nevada record.

Chico won only three of the 17 events. Winning two of them for the Wildcats was sprinter Bob

Wallace, who triumphed in both the 100 and 220-yard dashes.

Chico also won the javelin, when Rich Miller outdistanced the Pack with a throw of 215-7½.

440-yard relay—1, Nevada (Burrell, Williamson, McCoy, Hendrikson), 42.6; (Chico failed to finish).

100-yard dash—1, Perry (N) 49.2; 2, Laurin (N) 50.3; 3, McCoy (N) 50.8.

200-yard dash—1, Wallace (C) 10.1; 2, Williamson (N) 10.3; 3, Boyne (N) 10.4.

120-yard high hurdles—1, Burrell (N) 14.6; 2, Simmons (N) 14.7; 3, Maloney (C) 14.9.

330-yard intermediate hurdles—1, Perry (N) 37.7; 2, Laurin (N) 39.8; Torbohn (C) 42.5.

300-yard relay—1, Nevada Curtis, Forbyn, Brown, Sinnott; 2, Chico State.

Final team score—Nevada 114, Chico State 31.

Tennis Team Defeats Chico

The University of Nevada tennis team won its second straight match, with a Saturday triumph over visiting Chico St. The final score was 5-4, Nevada.

The Wolf Pack won three of six singles matches and two of three doubles.

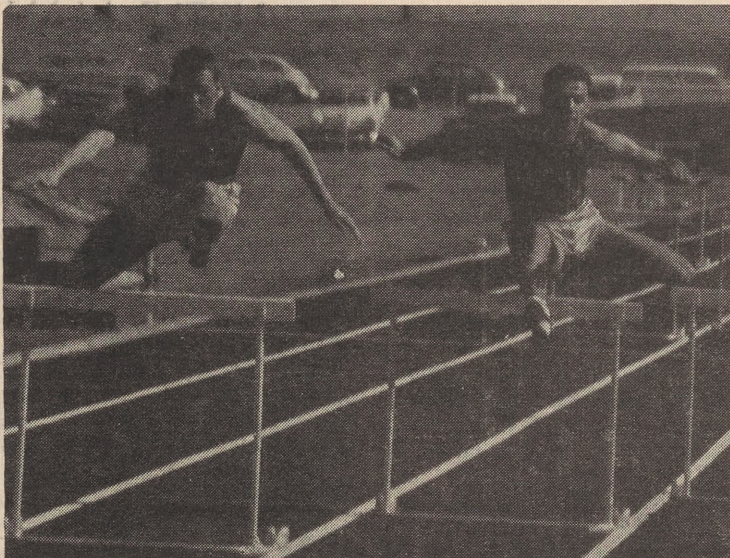

The Nevada netters will travel to Hayward St. next weekend. The win put the Wolf Pack record at 2-1 for the season.

SINGLES

Tim Howard (N) def Phil Krohn, 3-6, 7-5, 6-4; Al Pierce (N) def Bob Steffen, 6-3, 6-4; Jim Middleton (C) def George Wisham, 6-2, 6-2; Mike Lesser (C) def John Young, 6-4, 6-3; Jack Raycraft (N) def Art Belton, 6-2, 6-2.

DOUBLES

Howard-Pierce (N) def Steffen-Moag, 8-6, 6-4; Krohn-Middleton (C) def Wisham-Chism, 6-1, 6-4; Young-Raycraft (N) def Lesser-Belton, 6-3, 6-2.

TWO NEVADA HURLERS bolt into the lead in one of Saturday's races against Chico State. (Sagebrush Photo)

From the End of the Bench

By Mike Parman

MIKE SMITHWICK went into the conference boxing championships with a very painful wisdom tooth, which was badly aggravated in a sparring session last week.

POLE VAULTER DAVE TAYLOR gashed his wrist in his first competition vault in Saturday's meet against Chico St. Taylor was bothered the rest of the day, and did not place, although he pole vaulted 15-0 in the warm-up.

RILEY BECKETT had won seven straight this year, including a win over Tom Jenks of Stanford earlier in the year. Jenks was the man who defeated Riley in the title fight. It was just a case of badluck.

EVERY WINNING TIME in Saturday's track meet in the new stadium was automatically a new stadium record. The Pack was not really pushed, so a lot of stadium records are going to be broken this year.

THE TWO REFEREES FOR THE CCBC TITLE FIGHTS were both Nevada boxing alums. Most everyone remembers Mills Lane, who was a NCAA champ. The other ref was Sammy Macis, also a champion some years ago.

THIS IS RUMOR, but what's this about a seven foot center playing for Nevada Southern next year. There has been some talk about this. Reports claim he had a 30 point per game scoring average for a Southern California junior college last season.

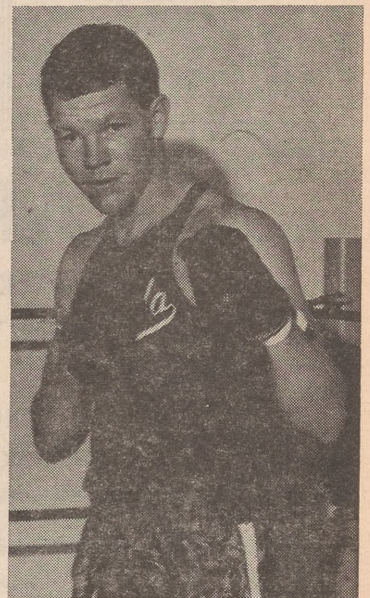

Mike Schellin Athlete Of Week

Mike Schellin, newly crowned CCBS champion, was picked by the Sagebrush staff as "Athlete of the Week", for the period ending March 27.

more, who pitched a no-hitter against Nevada Southern. Dallimore was last week's Sagebrush pick.

Schellin was picked for the award on the basis of his outstanding performance in the tourney. He won two fights, one by knockout in the first round, and was picked as the outstanding boxer in the championships.

The Sagebrush also feels that special recognition should be given Nevada pitcher Fred Dallimore.

MIKE SCHELLIN Nevada's best

Taus Take First

Alpha Tau Omega's No 3 table tennis team scored an upset in the final round of the championship tournament by defeating Sigma Nu's No. 1 team by scores of 21-18, and 21-16 in the first and third games. Sigma Nu won the second match 21-17.

Sigma Nu's No. 1 and No. 3 teams placed second and third respectively.

Women Conduct Experiment With Detergent And Water

Three women students at the University of Nevada wash 80 pieces of cloth per day. The women are taking part in an experiment to determine the effects of detergent type and water temperature on the laundering of textiles.

The experiment, being carried out in conjunction with Arizona, California, Colorado, Hawaii, and Oregon, started in November, and will continue through July.

Fabric used is an Acala 4-42 cotton. The artificial soil is composed of clay particles and components which simulate sebum and is applied at a uniform method at all stations.

The detergents include both a liquid, for use in cold water, and a heavy duty detergent for use in hot water.

The most important condition is that all elements of the experiment remain constant. These include the amount of fabric, detergent and water, length of the

washing cycle, type of rinse, number of washings, temperature and resoiling. Water purity is the main variable.

The women work for two hours each day soiling and washing 80 samples of cloth. This makes four loads which are washed in various detergents. After six washings five of the 80 samples are sent to the main station for further testing. When completed the women hope the results will benefit everyone who washes clothes.

YWCA Film Tour Goes To Europe Tomorrow 3 P.M.

A tour of Europe through slides is the topic of the next YWCA Kaleidoscope to be held this Wednesday, March 30 at 3 p.m. in the Travis Lounge.

The "tour" will be conducted by Dr. Dana Davis of the Secondary Education Department of the College of Education. Dr. Davis taught for a number of years in Army Dependent Schools in Europe, and acquired an extensive collection of slides of her travels during this time. Dr. Davis will highlight attractions of the major European cities she was able to visit.

All interested students and faculty are invited to attend the program.

Nevada Receives Additional Grant For Work Study

The University of Nevada has received an additional grant of \$25,339 to be used in the federally-sponsored College Work-Study program on both campuses of the university.

"This money along with the previously approved spring semester grant of \$50,389 is for use from now through June 30, 1966," said William E. Rasmussen, director of financial aids at the university.

Rasmussen said the supplementary funds are intended to provide new work-study opportunities for a number of needy students who could not previously qualify under the "rather rigid Federal regulations."

The new Higher Education Act does provide, if funds permit, that work-study jobs may be offered to full-time, regularly enrolled students in good standing who need additional earnings from campus employment in order to stay in college the rest of the semester.

This grant is under the terms of the Higher Education Act of 1965.

"The intent of the work-study aid is to help needy students meet their financial obligations and at the same time gain experience and knowledge of value to them in obtaining their degree or professional goal," says Rasmussen.

Rasmussen pointed out that the employing department or division of the university has the responsibility of making the work assignment meaningful to the student employee as well as being of value to the university.
