WHITE VESTS, CANES AND DERBIES FLAUNTED

Hug Named Freshman Football Coach by Committee

HUG SELECTED AS COACH OF YEARLING TEAM BY OFFICIALS

Freshmen Will Play 2
Games With Junior
Colleges

MORE PUBLICITY

"Grid-graph" will flash
News of Games Not
Held at Home

Proctor Hug, '25, was appointed to the position of freshman football coach at a meeting of the Finance Control Committee last Tuesday evening.

It was also decided that the Committee be authorized to arrange for two games for the freshman team, the first of which will be held in Reno on November 14, against the Sacramento Junior College. The other will probably be played away from home against the Chico State Teachers College.

Thornton Chairman
C. M. Thornton was appointed chairman of a committee which is to try to arouse more interest and enthusiasm about the "grid-graph." Another committee composed of Professor Charles Haseman, Zaida Reed and Professor J. E. Martie, was appointed for the purpose of considering ways and means of advertising the games more widely.

The "grid-graph," which is a miniature football field operated by electricity, was purchased last year to bring the out-of-town games here. The contrivance is a big board on which is a gridiron with lights to indicate the players and with score boards at the side. When the football team plays away from home, this board is put into operation. Thornton's committee is to see that more people attend these proxy games which are usually held in a downtown theater.

Several bills were paid, and budgets were discussed, but were laid aside until the next meeting of the committee.

The finance control committee meets on the first and third Tuesday evenings of each month, and Professor Thompson states that any one who desires it may have access to the meetings at any time.

HORN TOOTERS HOLD OPENING

PROGRAM WILL INCLUDE
FOOTBALL GAMES;
R.O.T.C. WORK

Shraps and flats eddying down from the heights of Stewart Hall mark the beginning of university band practice for the coming season. Already there is a turnout of some twenty-five men who constitute a fairly well-balanced band. With a few more practices to perfect technique and tone, the band will be ready to play this fall for the series of football games at Nevada.

Although a call is extended for experienced players, the band will be able to accommodate beginners as well. Horns and similar equipment are owned by the organization for the use of those not possessing them. This year, as in the past, the band is connected with the R. O. T. C. battalion and will participate in conjunction with it during parades and inspection.

A good band is something of which the university can well be proud, says Professor Kent, director, and asks all players of band instruments to turn out.

SCRUGHAM TO GIVE ADDRESS

Governor J. G. Scrugham will deliver an address on "The Hydro-Electric Development of the Boulder Dam," on Wednesday evening, September 15th, in the auditorium of the Education building, at eight o'clock. This address is to be given under the auspices of the University of Nevada students' branch of the American Institute of Electrical Engineers.

FALSE FRISKY FROGS FLAUNT FAIR FRILLS

"Rana Onca Cope," due to the efforts of Prof. A. H. Wright, of the chair of Zoology of Cornell University, Ithaca, N. Y., may now be added to Nevada's list of desert curiosities. "Rana Onca Cope" is the scientific name for a peculiar small-sized frog found along the banks of Vegas Creek, Las Vegas, Nevada, by Prof. Wright. These frogs generally appear a bright metallic green, with folds of yellowish brown. They seem to possess the power of changing from brown to light or dark green and at times to a shining gold or iridescent bronze.

AIMS OF N. S. F. NOW DEFINITE SAY MEMBERS

MATHESON VISITING HERE
BRINGS REPORT OF
LAST MEETING

Walker G. Matheson, '25, has just returned from the summer meeting of the National Students Federation of America, recently concluded at the University of California.

Matheson says that three definite aims of the association were decided upon at the session. These to be the organization of a students' travel bureau, for the purpose of exchange of students between American and foreign universities; second, the establishment of 15 or 20 scholarships to allow American students to study at different universities in this country, the object being to promote greater co-operation; and third, the establishment of a students' camp on the Pacific coast.

The National Federation of Students was organized last Christmas, the University of Nevada becoming a member last semester. Already there are seven member colleges in the Federation, and 12 affiliated universities. Vassar was the last regular college to join, and at the present time Eastern and three Western Colleges are expected to soon become members.

William Anderson, of the University of Nevada and President of the Cosmopolitan Club, was elected treasurer of the Federation.

U. N. ORCHESTRA BEING PLANNED

Plans for the formation of a University of Nevada Orchestra are being completed by E. E. Williams, assistant professor of romance languages. This year Professor Williams, who has acted as director of the orchestra last year, hopes to create two teams. The inexperienced members will comprise the second team, and they will be promoted to the first team when they attain the necessary proficiency.

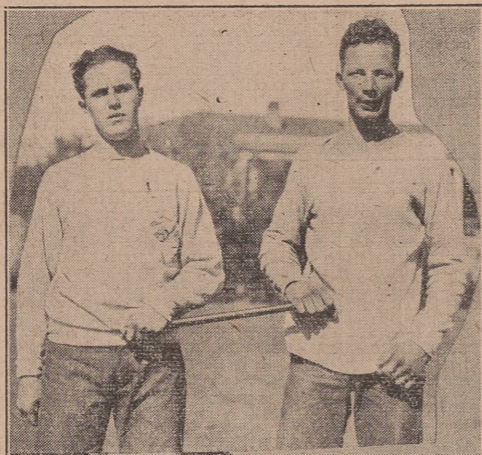

Professor Williams is anxious that all students who can play any instrument, whether or not they have had previous orchestral experience, show up for practice. People who wish to tryout may see Prof. Williams at his room in Merrill Hall during meetings. If a sufficient number of people turn out and practice faithfully, several trips and public appearances are assured.

TOUR PLANNED BY GLEE CLUB

Forty men, including nearly all of last year's veterans, have already signed up for men's glee club. Bill Clinch, '26, president; Cruz Venstrom, '27, manager, and Dr. Charles Haseman, director, are looking forward to a successful season.

Among the activities planned is a tour of the state with a picked group of twenty men participating, and, if accepted, a number will be given at the Woives' Frolic. If the date can be arranged a concert dance will also be given on the second Friday of December in the Gym.

No formal concerts will be attempted until next semester, and, in order not to conflict with other Campus functions, the state tour is being planned to be completed by April 1. Dr. Haseman states that with the Campus lending its support, this year's Glee Club will be better than ever.

Here are the first action pictures from the front line trenches. The two young gentlemen at the top are Vernon Cantlon, '28 (left), and Alden McCullum, '28, cane bearers. The center picture shows the smoke screen clearing from Mackay field just as the cane went over the goal line. The general football melee is depicted in the lower inset.

"HELL" IN YELL IS CRITICIZED; TO BE HEARD ON ENGINEERS' DAY

Hi there, waiter, steam more beer. We're a bunch of engineers; Bevel gears, devil gears, What the HELL, Engineers!

"Hell," that much maligned and indispensable part of the engineers' yell, has just suffered a raking over the coals. The Associated Engineers' meeting on September 2, called to outline the semester's program, was the scene of a very spirited discussion over the engineer yell being given in the "row-house." Complaint had reached the association that the word, "hell," included in the cheer, was shocking and distressing the women who eat at the dining hall.

The meeting was instantly divided against itself. The upper classmen were of the opinion that the women

enjoyed the yell. Several declared that the fair sex heartily joined in the cheering, emphasizing the disturbing word. The conservative element came out of the near-battle victoriously. With the exception of Engineers' Day and meeting nights the famous cheer will be excluded forever from the dining hall.

When order was restored it was discovered that an engineer's song book is under construction. Several engineer composers and poets are now hard at work and their efforts will soon be sung at every opportunity. Dean Sibley explained the purposes and functions of the association to the new men whose interest in the organization was shown by their large attendance.

YELL LEADER PROVIDED FOR

University of Nevada yell leaders will hereafter be upperclassmen, elected at the regular election in the spring according to an amendment passed in election for this office and for that of representative at large to the Publications Board, left vacant by the appointment of Harold Coffin, '26, as editor of the Artemesia, will be held next Friday in the Mackay School of Mines building, from 10 to 12.

Bert Spencer, '26, was appointed chairman of the Home-coming Day Committee by Proctor Hug, A. S. U. N. President. The Whelps, pep organization offered their service as aides to the yell-leader in arranging for rallies and pep meetings.

An amendment to the A. S. U. N. Constitution was offered by Athletic Manager Thornton, providing that the playing time necessary to win a Block N in football be increased to one hour and five minutes. This amendment will be voted on at the next meeting of the Student Body.

Ruth Hands, '27, after attending the College of Pacific for a year, is again registered on the campus.

James ("Rabbit") Bradshaw, '22, will coach athletics at Santa Cruz High School this season.

David Finch, ex-'27, is again enrolled in the University. Finch left the Hill in 1923 to teach at Rochester,

DEBATE LEADERS AWAY ON TRIP

H. P. Miller, debate coach; Donnell Richards, president of Clionia, and Donald Church, intercollegiate debate manager, will leave this week-end for a short visit to San Francisco to attend the Memorial Arts exhibit.

Arrangements for the debating season, which were to have been made at a meeting last Tuesday, will be made while the three debate leaders are in San Francisco.

Tryouts for the Intercollegiate debate teams will be announced in a few weeks.

FROSH BECOME COGNIZANT OF MYSTERIES OF LINCOLN HALL

Forty-two new men were initiated into the fellowship of Lincoln Hall during the early hours of Thursday morning.

The crashing of paddles, shouts of command and ones that threw fear into the new thoroughly awake frosh, thundered and echoed along the halls. A hustling of blindfolded men into a chain gang into the library for roll call; then with cries of, "Frosh tail!" the neophytes were off on a three-hour course of primary university training.

In the realm of Manzanita, rules of nature and even of etiquette were discarded. The faith of the initiates was inconceivable; they prayed for rain, and, lo! it came in small successive showers; they asked for the hands of

WORLDISTS WILL ORGANIZE SOON

Letters have been sent to the new and old foreign students attending the University of Nevada inviting them to attend the meetings of the Cosmopolitan Club and announcing the program for this semester.

The registrar's list shows a large increase in the number of foreign students for 1925, and it is thought that this increase will cause a corresponding jump in the membership of the Cosmopolitan Club.

The first meeting of the organization will be announced in the next issue of the "Brush."

SOPHOMORES WIN CHANCE TO WEAR FAMOUS CLASS ATTIRE

SECOND YEAR MEN WIN BOTH CANE AND POSTER
RUSHES. FIRST DOUBLE VICTORY SINCE '24
BEAT '23 AND '25

C. SOUTER TO ADDRESS HILL AT ASSEMBLY

LOCAL JUDGE WILL TALK
CONSTITUTION DAY;
BAND TO PLAY

Judge Clyde S. Souter, formerly of New Jersey, has been scheduled to deliver the address on Constitution day at the first regular assembly to be held in the Auditorium of the Education building, Friday, September 18. The program is of a patriotic nature, and it is expected that the cadet band will furnish music for the occasion. A larger attendance of faculty members and students than that of last year will be expected.

The second lecturer scheduled to address the faculty and students is Chester Rowell, of California. This assembly will take place early in October. He will be brought here under the joint auspices of the League of Women Voters and the University. Mr. Rowell has been prominent in political life in California and is a well-known writer on social and political questions.

It is planned to have a lecture once a month held at the assembly hour on Friday.

ARTEMESIA TO HOLD TRYOUTS

Tryouts will be held next week for all those interested in working on the Artemesia staff.

"The high standards of last year's issue will be upheld," Coffin said, "and we hope that new ideas and new material will be brought in that will make this year's Artemesia the best ever."

The Artemesia staff would greatly appreciate the use of any other college year books that the students have. Good care will be given these books and a prompt return is assured.

Copies of the first two issues of The Sagebrush may be obtained at the Sagebrush office, Room 102, Physics Building.

AGGIE DEAN TO JUDGE PRODUCTS

Dean Robert Stewart, of the Agriculture College, will be the judge of farm products at the State Fair held in Fallon on September 4. He will attend the County Fair at Elko as the judge of the farm products, September 11.

F. W. Wilson, professor of Animal Husbandry, will act as judge of beef, cattle and horses at the County Fair held in Elko.

MANZANITA AZIE:

"That fresh blind-date said he wanted to see more of me."

Canes and white vests, badges denoting two successful years of victory in the annual rushes, and that no class has had the privilege to wear since the class of '24, have been the emblems of the sophomores since winning the rush Saturday.

Dodging through a thick smoke screen, Vernon Cantlon, '28, raced through the freshman ranks in a fine exhibition of open field running and placed one of the two sophomore canes behind the freshman line in 20 seconds. This time is one of the fastest that have been made in placing the cane across the line on Mackay field. The record was made by Proctor Hug when the class of '25 defeated the class of '26 in 14 seconds.

When the victory was won in such short time the two classes grouped in front of the bleachers and gave their own yells and a big six for their opponents. The freshmen girls, clad in the gingham skirts of their childhood days, paper curls and smeared with grease paint and decorated knees joined in the chorus.

A snake dance was started by the class of '28, only to be broken up by the rush of angry frosh. The bleachers yelled for more fight. As the rush ended, before the two classes had even thoroughly mixed, the upper class committee separated them and called a short rest while they placed three footballs on the field for another rush. They mixed again. Footballs soared and the men heaved, tugged and clawed.

FROSH "BIBLE" TEST IS GIVEN

FRESHMEN ARE STOPPED
ON CAMPUS TO ANSWER
OFFICIAL QUIZ

Examinations of the "bible" were given the freshmen Monday by the upper class committee while the students went from class to class on the campus. This is the first year such action has been taken.

"What are the traditions of the University? Who are the student body officers? Do you know the school song?" These and many other questions were shot at the wearers of the blue dinks. In most instances the answers were returned just as freely and in an approved manner. In a few cases the frosh fell down on the ex. A larking party was held today. Some of the latter bunch were guests at the affair.

FOSTER TO BE ABSENT; BUCKMAN FILLS PLACE

Thomas R. Buckman, '22, Washoe county agricultural agent, was called to Elko last week on a field inspection to certify seed potatoes.

During the absence of Robert G. Foster, assistant director of the agricultural service, who has been granted a nine-months' leave of absence by the board of regents, the duties of this office will be assumed by Tom Buckman.

Dorothy Ross, '23, and Ethel Perkins, '25, are visiting in Reno for a month.

Life and Military Are Just One Long Drill

Today a company of recruits marched along the main driveway of the campus, back from Mackay field, past the Aggie building and the Library.

Sunlight was in the sky and on the mountain tops; the campus drouzed in early morning gray. Not many students were on the Hill at that hour, and the grounds seemed deserted by life and color, save for the tramp of the marching "rookies" and the bobbing of blue dinks along the driveway.

The touch of color harmonized with the blue of the sky, the gray tint of the hills, and the somber shades of the lake. It emphasized the sparkling eyes and the color of youth in the faces of the marchers as they halted at attention. The odd-shaped, to-be-battered blue dinks seemed symbolic of the eagerness and freshness

of that group—recruits in the student army, in college, and in life. Four years from now the same company will be marching down the campus driveway. Its ranks will be depleted, but those who are there will march with steeper and surer step. There will be no splash of blue; instead, a level of black touched with the lighter color of swaying tassels. Past the Aggie building and the Library they will march, and for the last time will stand at attention by the side of Stuart hall, still young, still eager—but trained and eager for the world beyond the confines of the University campus.

STANFORD MEN RATED ABOVE COMMON HERD

Stanford students are physically well above the average, according to W. H. Barrow, physical director of Leland Stanford University. The statement is based on a comparison of health statistics of the university and the soldiers of the late war.

"Although height and weight are no definite indication of health," commented Dr. Barrow, "it is interesting to note that our students average over one inch more in height and over three pounds more in weight than the men examined for the draft. It is evident that the men at Stanford, over 90 per cent of whom indulge in physical exercise under the university supervision, represent a selected group physically as well as mentally."

VASSAR STUDENTS PLAN AGAINST ANOTHER WAR

The students at Vassar in order to prevent war have determined to minimize misunderstandings between nations by cultivating individually and collectively an international point of view. They therefore resolve to become acquainted with ideas and individuals of other nations and races by establishing scholarships for foreign students, by reading and subscribing for foreign papers and periodicals and by corresponding with other countries.

Bricks and Boquets

Crash! A splintering of wood cut short by the frightened cries of women and hoarse yells from men. A tangled mass of wood and human wreckage. The swirl of men and women dashing to the scene and the clang of the ambulance as it dashes to the doorway and dashes off again with a load of victims for the hospital.

Perhaps not even a death. Only broken bones, bruised bodies and scars marring familiar features for life. It's the wornout, rickety, and sadly abused stairway in Morrill Hall, extending from the candy booth to the second floor.

Those once strong steps are getting thin now. They are getting thin from wear, old age and abuse. It creaks and mutters unnoticed when the students gather for a friendly little chat between classes. Some day there will be too many gathered there at one time for a bit of friendly gossip and the stairway will give way, the students will be injured and maimed and then the new staircase will have to be put in—but too late to do any good.

The University is financially unable to tear down Stewart Hall at this time, but for a little, very little, expense we could be safe—not sorry.

Louis Titus, '24, is at Morgan Hill, Calif, teaching in the agriculture and forge departments.

CLAMP PUT ON CAL'S CO-EDS

The 1,000 or more women freshmen enrolled in the University of California last week, besides returning co-eds, will soon learn that the women's executive committee has been active during the summer vacation.

In outlining a campaign to promote intellectual pursuits rather than frivolities, the committee let it be known that it will not tolerate:

- Coming home from dances after 1 o'clock.
- Entertaining masculine friends after 10:30 p. m.
- Hose rolled below the knee.
- Too generous use of rouge and lipstick.
- All extremes in dress and conduct.
- Indulgence in cigarettes.
- Petting parties.
- Drinking intoxicants.

Notice will be served on all women students that violation of the code will mean trial before the women's committee.

FLAPPER

- Tight fur coat—
- And dainty shoes—
- A constant thirst
- For boys, an' booze.
- II
- Hat down on nose—
- Face full of gum.
- You may look good—
- But Gosh, you're dumb.
- III
- Lips too red—
- Slink in your walk—
- No brains a-tall,
- Just talk, talk, talk.

SHEIK

- Bell bottomed pants—
- A vacant look—
- A bright red tie
- And a blank bank book.
- A flask of booze—
- An air that's meek—
- And there you have
- The average Sheik.

ATWOOD BANS SPEAKER; THEN SEVERAL MAGAZINES

Last year President Atwood of Clark University dismissed a meeting at which Scott Nearing was speaking, so the March 23 issue of "The Nation" reminds us. "The Nation" and "The New Republic" commented upon his action as a violation of academic freedom. Now neither "The Nation" nor "The New Republic" appears on the Clark library shelves. Dr. Atwood dropped the magazines because he desired "to have a library for research rather than a reading room."

Strict Requirements

Stricter matriculation requirements, refusal of the entrance committee to admit pupils who have "flunked" out from other institutions, and an increase in tuition have all served to keep enrollment down. But in spite of these the number steadily increases.

More than 5,000 teachers were enrolled in the 15 extramural courses conducted in 40 different communities by the school of education of Pennsylvania State College.

In addition, nearly 800 teachers pursued correspondence courses offered by that school.

LANGUAGE LUNCH

A French, German, or Spanish luncheon is served each week in the model apartment of the Pasadena (Calif.) Junior College, under the leadership of the teachers, for pupils studying those languages. The idea is carried out in the menu and table decorations, and as far as possible the language of the country is spoken.

DR. W. W. CAMPBELL THINKS MANY KNOWN PLANETS MAY BE PEOPLED

President W. W. Campbell of the University of California, who presided over the meeting of the International Astronomical Association, which met recently in London, expressed his belief that every planet known to astronomers today, with the exception of the sun, is inhabited.

President Campbell stated, however, that the forms of life were probably far different from those known on this planet.

"Life is everywhere evolved in conformity with its environments," he said in his address. "Thus forms of life on earth and in the sea are very different. A fish would probably wonder how man was able to live on the dry ground."

Probably Different
President Campbell expressed the opinion that life on the planets was probably as different from man as man is from fishes, for each form of life would have to adapt itself to the atmosphere of its particular planet.

"Professor W. H. Wright of Lick Observatory recently demonstrated that Mars possesses an atmosphere of considerable density, probably proof that Mars could support life as we know it here," said President Campbell in upholding his theory.

Dr. Campbell presided over the meeting of the International Astronomical Association before setting sail for the United States to resume his duties in the university.

ELEVEN MEN TO GET CIRCLE N

Professor Charles Haseman was appointed to represent the student body on the Finance control yesterday, by the Executive committee at its first meeting this year.

Proctor Hug, president of the student body, recommended that Haseman be again given the power to handle the student's financial affairs, as he has done in the past. Athletic awards were made and a motion was passed that a special election would be held to fill the vacancy on the Publication Board by the election of Harold Coffin as editor of the Artesia.

Circle N's were awarded to R. C. Ede, G. Farbrother, R. Hansen, Ira Herbert, Dana Leet, Whiting Martin, J. Molina, W. Neubaumer, W. K. Scott, L. Wallace and Wender for having made qualifying marks as members of the rifle team.

NATIONAL P. T. A. WORKS FOR PERFECT PHYSIQUE

The National Congress of Parents and Teachers is co-operating with the Interior Department, Bureau of Education, in a campaign for a 100 per cent physically perfect school population entering the first grade. In order that good school work may be done, parents are urged to see that the youngsters entering school for the first time are in first-class physical condition. It will save loss of time from school, suffering, and expense if they are given a thorough physical examination, their eyes and teeth, throat and nose looked after, and care taken that they are properly fed, rested, sunned, exercised, cleansed, and clothed, ready for the opening of school in September.

Edith Frandsen, '26, has returned to college after a semester's absence due to illness. She has spent the past six months in Berkeley and at La Jolla.

NEBRASKA STUDENTS
Seventy-six per cent of all men students and 38 per cent of all women students at the University of Nebraska are wholly or partially self-supporting. Exclusive of the College of Law, the average expenditure per student for the nine months is shown by a recent survey to be \$714.66 for the men, and \$729.85 for the women.

Loren Christensen, '23, is teaching general science at the Sunnyvale High School.

WHY STUDENTS ARE STUPID

By WILLIAM ALLEN WHITE
Forty years ago and more, when an American boy or girl went to college, it was to satisfy a desire for education. A student of the last generation who went to college found little here in the social end of the school; organized inter-collegiate athletics did not draw him at all. There were none. If he was a country boy, he came from a family in which there were a few well-read books. If he was a town boy, he came from a family where there was a slightly wider environment of books. But books inspired him. Books and a love of reading, the desire to widen his mental horizon by getting into the knowledge of his generation and the wisdom of the ages furnished the primary urge that sent the American boy or girl to college until thirty years ago.

During the last twenty years, two things have happened: First, the colleges have become tremendously attractive to youth, quite apart from the course of study. Second, the rise of the economic status of the average American family has made it possible for thousands of young people to go to these attractive colleges, who have no cultural background whatever, who are not interested in books and reading, and who regard education as merely an equipment for making a living.

Hence we have the hordes of stu-

NEGLIGENCE IS CAUSE OF LOSS

ARMY OF MAIL SLEUTHS COSTS POSTOFFICE LARGE TOTAL

Carelessness on the part of the American public in failing to place a return address on its mail is responsible for a large part of the yearly financial deficit to the United States Post Office. Not only must a costly army of postal detectives be employed to open misdirected mail, but the correspondents of the country are caused much inconvenience through having their mail opened, advises the postal department.

If, because of inadequate or incorrect address, a piece of mail must be taken out of the regular postal machinery for "directory service" or "hospital service," it becomes a "nixie." It is during its existence as a "nixie" that the misdirected correspondence is expensive to the government.

A "nixie" demands special attention from the very best clerks, and although valuable time is lost to the mailer or intended recipient, in the long run the postal service loses most. In Chicago 400 workers do nothing but handle "nixies," while the service costs New York \$500 daily. In all the "nixie" costs the government about \$1,740,000 a year.

When the trained postal sleuths can find no clue of a forwarding address, the mail is opened at the dead letter office. Out of every five letters received at this office the needed clue is found in one and it is sent on its way. The other four are destroyed. Thus annually 21,000,000 letters find their resting place in the morgue of the dead letter office through the failure of the letter writer to put the return address on his envelope.

EASTERN DEAN DECLARES WOMEN BETTER STUDENTS

Basing his decision on the number of flunk notices just mailed, Dean E. H. Wilkins has declared that masculine "dumbbells" outnumber the "dumb doras" at the University of Chicago this year by three to one. Of the 405 "dumbbells" sent out, 305 went to male students. According to Dr. Wilkins, the freshmen suffered more than any other class and unless they catch up they will be "busted."

pid, ineducable college students. The college spirit, outside of college athletics, society and hooch, never touches them. They are strangers to the academic life—as isolated and remote as the wild savage of the forest from all that went with the cloistered life in our old American collegiate tradition. Perhaps the college softens them a little. Perhaps seeing the books in the library and thumbing and memorizing the texts for their classrooms does pull off some of their barbarous paint. Perhaps they will make homes in which the Cosmopolitan and Motion Picture Magazine and sets of uncut and unread books may decorate the rooms. So perhaps their children, feeding upon this poisoned pabulum, will get some inkling of the love of books and the desire for things of the spirit. Perhaps in another fifty years the college will be an influence in the higher life of the state and of the nation.

But just now the college is the haunt of a lot of leather-necked, brass-lunged, money-spending snobs who rush around the campus snubbing the few choice spirits who come to college to seek out reason and the will of god.

BORN OF BATTLE

DID you get up early the other morning and watch the sun come up from the other bank of the ravine and glisten on panes of the greenhouse? Did you see twenty-six determined second-year men file up through the long morning shadows past the dairy building and start to cross the Orr ditch bridge. Did you see some forty-odd freshmen, faces puckered with loss of sleep, stand their ground and battle for a tradition? Curses, sweat, straining muscles, grimness and laughter—the Poster rush.

And did you see from Mackay bleachers last Saturday, mimic warfare, smoke screen, rather ragged but effective, the clash of '28 and '29, piles of bodies, panting, a shot—the Cane rush.

Then the serpentine, and for the first time since '21, the white vests, canes and derbys at the get-together dance. All this fighting was for a Nevada tradition, and it was seasoned with an attitude of good nature.

Now look at the cartoon on the right-hand side of this page, "The Keystone". It was for the foundation of this University arch that those fellows fought. It wasn't class hatred nor personal grudge.

Emerging from those squirming, choking masses came to the freshmen the first insight of their new life. The next day they felt they really "belonged". Their ideas of college had changed, they were part of the crowd; they had started in building the Arch.

RAMBLIN' WRECKS

THE man who plans on an engineering career is greatly mistaken if he is one of these smug individuals who go about complaining of their courses. "I don't need English. What good is history, hygiene, poly sci.? All I want is my math and science. I'm going to be an engineer and I don't need that stuff."

The Pacific Coast, the Middle West and the East are dotted with "Engineering" colleges which boast loudly about giving only the subjects "necessary" for engineering students. They have none of the so-called cultural subjects, and as a result turn out inferior engineers which are not entitled to be ranked as true members of the profession.

The real engineer should be as polished, well versed and have just as good general background as the doctor or the lawyer. He not only should have this, but he must have it or he ends perhaps as a straw boss or a ten-day "engineer"—the jetsam of the profession.

THE RUSH IS ON

"WHAT is rushing?" asked a freshman girl, timidly. "Does it mean that you can't be friends with the freshmen?"

It is thus that the flurry of dates and teas and bedroom discussions impresses the one who has not been "dated".

Rushing is the means by which the sorority women seek to know the new women who have come to the campus and by which they try to convince the "material" that each particular group is the best. The rules, which are drafted by a representative council called Panhellenic, bind all sorority members to such things as "No more than three-minute conversation on the campus" making necessary an aloofness which is construed by many as pure snobbery.

Rushing is a period of strained relations which must be tolerated because there seems to be no other practicable way, but it is only for two weeks this year, after which time the freshmen will find that even sorority women are Nevadans first, and that "hello" is the password of the one big fraternity, A. S. U. N. —S. G. T.

There is no eight-hour-day for a real booster.

Oysters will be back before long and then you'll have to pick out the blame pearls before eating any.

The man who has not anything to boast of but his illustrious ancestors is like a potato—the only good belonging to him is under ground.—Sir Thomas Overby.

QUADDOLOGY by Casper

AND so I says to the Prexy, "Walt," I says, "Why is the President of the Junior class like a bucket of gray paint?" Well, of course, he didn't get that one on account of my only giving him about fifteen guesses, and besides I made it up myself, and so I divulged the secret.

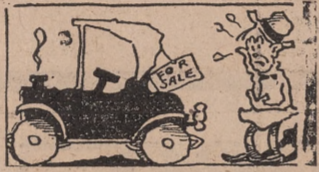

"Because neither of them wear garters," I says. And that was that. B B B

This week's most appropriate song hit, dedicated to frosh who queen, is entitled: "Inside a Silvery Stream." B B B

QUESTION:
Dear Cas, Now that they have painted the Tram green, how are we to tell a freshman 'rom said tram? — Art. Sensiance.

ANSWER:
Dear Art, Don't tell a freshman anything, any time, from the Tram or any place else. Please do not abbreviate my name. B B B

Rushing rules made by the Pan-Hellouten committee make it a criminal offense for a sorority woman to treat a frosh girl to more than two-bites' worth of eats at one time. Rumor has it that the inter-fraternity council is now preparing a petition asking the famous Pan-Hell committee to extend the ruling to apply to fraternity men as well as sorority women. B B B

"IF I HAD A CAR I WOULD TAKE MY GIRL OUT RIDING IF I HAD A GIRL." B B B

All Rumors to the Contrary
I call my girl, "Hinges," not because she is something to adore, but because she squeaks when I slam her. B B B

And then I have a friend, and he calls His girl "Hinges," too. You see he was Away from her All summer, and He calls her "Hinges"—because she is so rusty! B B B

What's More
It seems that most of the Sophs got pretty badly crippled up in the fights, on account of I notice that most of them have to carry canes to get around. B B B

Clever Idea That—
Of the Sophs using smoke bombs to hide their attack in the cane rush. What they should have done, though, is to have given Canton the cane and a bum five-cent cigar and let him make his own smoke screen. B B B

Several of the lads shook a pretty mean left hind hoof, at that. And the fancy footwork of the talented couples was enjoyed by all, in spite of the fact that the pipe-the-flight line got a little over-anxious and crowded in, confining the dancing to the north wall. B B B

An Alabama newspaper cracks wise in saying that the part of an automobile that causes more accidents than any other is the nut that holds the wheel. Which is not so bad, us college boys would say, as the nut that doesn't hold the wheel. B B B

QUESTION:
At Nevada, is it considered naughty or nice for a girl to go auto-riding with a boy after dark? I am just seventeen. My name is Henrietta.

ANSWER:
Both—if he is the right kind of a boy. You are old enough. Don't feel badly about your name. Remember that you have the same chance of being President of the United States that I have. B B B

Notice
You don't have to commit a murder or install a telephone to get your name in print. Write to this colym. Traveling salesman jokes are the only things that are barred.

Honest, folks, if you knew how hard it was for me and Brisbane and the others to think of things to put in our colyums you would help us out. B B B

And in closing we would admonish you one and all to: Pity the poor Frosh who put All of his Father's spare Change in the Telephone Over at Morrill Hall, thinking that It was a Slot machine!

THE KEYSTONE

Troubadors of the Tram

THE WHOOFLE BIRD
Have you ever heard of the Whoofle Bird
That lives in the land Go See?
He sings as he swings each day and night
From his nest which hangs in the Gum Drop Tree.

And the Whoofle Bird is made of cheese,
With cheese holes for his eyes,
(He wears galoshes on his feet
Of most enormous size.)

The Whoofle pecks at the moon each night,
That's why it wanes, they say;
And he eats the stars as he roams the sky,
And drinks the milk from the Milky Way.

Sometimes when you've been very bad,
He'll fly close to your roof;
And if you have been awfully bad,
You'll hear him sing, "Whoofle Whoofle!" —Zelda Reed.

GODAWFL
Men, big, swarthy men, stinking of garlic, sweat, tobacco, curses, growls, more curses, more growls, terrible oaths, dim light, low room, rustle of papers, loud hammering, shriek of a woman, lights out, darkness, stillness, a moan, lapping of sea water against pilings, lack of words, lack of idea, you finish it, we can't. —Archie.

FISHES AND THINGS
I wish I were a little bird,
A speck up in the sky,
And I could fly and fly and fly
And fly and fly and fly.
Or that I was a cloud of grey
Blown close to earth some stormy day.
Or maybe I would like to be
A fish that swims down in the sea;
But when night comes I have no wish
To be a bird, or cloud, or fish;
To sleepy-land my way I win,
And let my mother tuck me in. —S. I. E.

Last Laughs

Before Congress Stepped In—
The professor was giving a class lecture on "gravity."

"Now," he said, "it is the law of gravity that keeps us on this earth."
"But, what I want to know," inquired one small frosh, "how did we stick on before the law was passed?"

The Silver Lining—
Police Sergeant—"Is the man dangerously wounded?"
Patrolman—"Two of the wounds are fatal, but the other one isn't so bad."

A Blessing Thinly Disguised—
Teacher—"Now, suppose I am leaving the school and a man comes up to me gives me a blow which knocks me down and my head strikes the pavement with great force and I am killed. What is the consequence?"
Pause. Finally a scholar rises and says: "We should have a holiday!"

Valery won his reputation with a few plaquettes and he is now hailed as the discoverer of a new world of poetry.

EMILY POST AND HER NEW NOVEL
Following "Etiquette: The Blue Book of Social Usage," comes a new novel, now on the press, by Emily Post, distinguished figure in society in New York and Tuxedo Park.

The life of the inner circles of the "400" from the days when it comprised only 400 until the present is the theme. It will be interesting because the characters have been drawn from real life. Especially to the "400".

Among the largest one-man shovels in the world is this electric giant engaged in open-pit mining on the Mesabi Range in northern Minnesota. It picks up eight cubic yards of iron ore at a gulp, which it dumps into a waiting car.

A day's work in a minute

Mesabi Range, renowned iron ore deposit, is yielding its mineral wealth at the rate of 16 tons for every bite of an electric scoop.

A man with a shovel would work a whole day to mine and load eight cubic yards of iron ore which this 300-ton electric giant moves in one minute.

Of course, all mining is not done on the surface. But there are many mines in which electricity has changed our conception of mining operations. Wires, penetrating even to the deepest shafts and galleries, have brought light, power, ventilation and added safety to those who must work in the very bowels of the earth.

Electricity's contribution to mining may be of particular interest to the student of mining engineering, but it is of general interest to all college men as still another example of how electricity is simplifying the world's work.

In every branch of mining operations G-E equipment is very much in evidence. And there are engineers of the General Electric Company especially assigned to mining problems and requirements, just as there are others specializing in all major applications of electricity.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.

SOCIAL EVENT CALENDAR FOR TERM CHOSEN

All the week-ends except five have been taken by different organizations for social activities, it was decided at the first meeting of the social calendar committee which met Wednesday afternoon.

At this meeting it was again stressed that all social activities to which University women are invited must close at twelve, and must be properly chaperoned. Notice of chaperones are to be given Miss Mack or Prof. Leach five days before the event.

All Saturday nights are reserved for Campus activities until the Monday preceding them, it was stated by the committee.

- September 4—Sigma Nu and Sigma Phi Sigma.
- September 5—Open.
- September 11—Phi Sigma Kappa hay ride and Beta Kappa.
- September 12—Block N Campus Dance.
- September 18—Open.
- September 19—Open.
- September 25—Kappa Alpha Theta or Lincoln Hall.
- September 26—Open.
- October 2—Open.
- October 3—Open.
- October 9—Trowel and Square and Pi Beta Phi.
- October 10—Open.
- October 16—Manzanita.
- October 17—Sophomore Hop.
- October 23—Open.
- October 24—Open.
- October 30—Wolf Frolic (tentative).
- October 31—Aggie Home Coming Dance.
- November 6—Sundowners.
- November 7—Open.
- November 13—Open.
- November 14—Open.
- November 20—Sigma Nu.
- November 21—Junior Prom.
- November 25—Open.
- November 26—Thanksgiving Vacation.
- December 4—Phi Sigma Kappa and Sigma Alpha Omega.
- December 5—Lincoln Hall.
- December 11—Glee Club Concert.
- December 12—Open.
- December 18—Open.
- December 19—Christmas Vacation.

CIVIL SERVICE HOLDS EXAMS

The United States Civil Service Commission announces the opening of examinations for Junior Cartographic Engineers to fill vacancies in the Coast and Geodetic Survey, Washington, D. C., and in positions requiring similar qualifications at an entrance salary of \$1,800 a year.

The work of the cartographic engineers is technical in character. It consists of field surveys of the bureau, correction of charts guiding vessels traversing the navigable tidal waters of the United States and its possessions, and of other professional work in related physiographic problems. Competitors will be rated on practical questions, drawing, lettering, general education, training and experience.

Information and application blanks may be obtained from the United States Civil Service commission, Washington, D. C., or the secretary of the board of U. S. civil service examiners at the postoffice.

LABORATORY INSTALLED NEAR LOVELOCK BY PROF.

E. E. Williams, assistant professor of modern languages, has installed a new tungsten laboratory for the Pacific Smelting and Metals Corporation at their mine and mill in the Nightingale district, north of Lovelock. Since Prof. Williams has returned to the University, Hans Lohse, '25, major in chemistry, who had been on the staff of the laboratory, has taken full charge of the same.

Williams, in speaking of the laboratory, said, "Although this is perhaps the first laboratory of the kind to be established in the state, it has already won commendation for the accuracy of its work."

FORMER SAGEBRUSH HEAD MARRIES IN YERINGTON

John R. Ross, '23, editor of the Sagebrush in '22, '23, was married in Yerington recently to Margaret Burns. Ross was a member of Sigma Nu fraternity while at the University of Nevada, and is now completing his law course at Stanford University, expecting to practice in this state.

Warner Still, '27, spent the summer as bell hop at the Tahoe Tavern.

IN SOCIETY

Arvella Coffin, '22, has returned from San Francisco, where she spent the summer taking special work in French. She will teach again this year in the junior high school.

Word has been here received of the birth of a son to Mrs. William H. Martin in San Jose last Monday. Mrs. Martin was formerly Miss Mildred Thompson, ex-'25, while Bill Martin, '22, a member of Sigma Alpha Epsilon fraternity, is remembered as a former Nevada football star. He is now coaching in San Jose.

Members and pledges of Sigma Alpha Epsilon fraternity entertained with an informal dance Friday evening at their new home on Evans avenue. Miss Louise M. Sissa acted as the patroness for the evening.

Kappa Alpha Theta fraternity announces the pledging of Frances Nelson, '28, Monday evening at the chapter house on Ralston street.

Announcement has been received of the marriage of Miss Margaret Burns of Yerington to John R. Ross, '22, of Yerington, Nevada, early in August.

Mrs. Ross attended the summer session at Nevada this year. She, a member of Sigma Nu fraternity, will resume his post-graduate study in law at Stanford in October.

Sigma Nu fraternity announces the pledging of Wyman Sexsmith, '29, of Virginia City, Thursday.

Manzanita Hall entertained with its first tea of the semester Friday afternoon from four to six o'clock. Punch and wafers took the place of the proverbial English tea.

Both men and women are invited to Manzanita teas which are to be held every Friday afternoon.

PROFS TO HAVE GET-TOGETHER

A reception in honor of the new members of the faculty and their wives will be given by the Women's Faculty Club at the home economics room in the agricultural building, on the evening of Saturday, September 12. It is to be an informal get-together with all faculty members and their wives invited.

The social is in place of the usual luncheon given at the beginning of each university year. Mrs. S. B. Dotten is chairman of the committee in charge of arrangements.

M. A. HARRELL ARRIVES HERE

Marshall A. Harrell has been added to the faculty as instructor in geology and as assistant in the State Mining Laboratory. Harrell took his A. B. at the University of Indiana in 1921 and has since been high school principal at Commiskey, Indiana, and Shelby, Iowa. From 1923 to 1925 he was a graduate assistant at the University of Iowa.

STUDENTS FROM EAST VISIT U. N.

Harold Duborg, '26, and Henry Caldwell, '26, returned to Reno for a few days from Annapolis, where they have been attending the naval academy.

Caldwell held the boxing championship for the 168-pound class and was the star pitcher for his fraternity while here. He has since been placed on the all-American selections by Walter Camp as a half-back on the Navy football team.

TAX QUESTION IS DISCUSSED

Professor Fletcher Harper Swift was the guest of honor and speaker at a schoolmaster's luncheon given last Saturday at the Golden Hotel by Dean Hall.

President Clark, State Superintendent Hunting and his deputies, Dean Adams, several professors and others interested in education were among those invited to meet Prof. Swift. After the luncheon the party motored to Pyramid Lake for dinner.

Prof. Swift is an authority on school finances and has spent 18 years at the University of Minnesota. Last year he was a visiting professor at Columbia. He has been prominent in various tax surveys and was influential in promoting the tax systems of Arkansas and Oklahoma.

The topic of discussion at the luncheon Saturday was financing education by taxation. Prof. Swift advocates a reorganization of the tax system for the purpose of equalizing educational opportunities.

FOOD BUREAU GRADES EGGS

Inspector Cokefair, of the food and drug division of the University of Nevada, has just returned from an extended trip testing stock and stock scales.

The food and drug department of the University plan an exhibit at the State Fair at Fallon and at Elko. The exhibit will display federal standards, the grading of eggs being the feature. The department is collaborating with the cantaloupe growers of the Fallon and Fernley districts again this year in hopes of placing even a better melon on the market. The laboratory is making tests to determine whether or not the melon will be in good condition at destination.

HALL WELCOMES ALL NEW WOMEN

Manzanita Hall welcomed its new students at a house meeting called last Thursday evening in the parlor by President Charlotte Gibson. The welcome to the new students was cordially given by Miss Mack, Dean of Women of the University.

Heads of the new committees were appointed and introduced to the new students, after which the house rules and regulations were read. The annual signing of the register by all the residents of Manzanita Hall closed the meeting.

Stags Congregate at Saturday Skid

White vests and canes, a crowded floor, and a Charleston or two featured the get-together dance that was held at the gymnasium Saturday night.

A line of stags by the entrance, another in the center of the hall and a few more that had strayed to the other side of the house gave the dancing couples the once over as they glided past, smiled, or frowned, and told each other just what they thought of boyish bobs and August nights.

STUDIES AGAIN TAKEN UP BY STAFF MEMBERS

Amy Goodman, '27, returned last Thursday night, and will assume her duties as news editor. Dut to an operation, she was delayed in returning to the campus.

Gertrude Coddington, '28, another member of the 'Brush staff, returned last Friday night from a trip to Yellowstone National Park.

JANITOR FOR ENGINEERS RETURNS AFTER ILLNESS

T. W. Carroll, janitor of the mechanical and electrical engineering buildings and instructor in the foundry, who has been laid up with rheumatism since August 7th, has resumed his former duties.

TENNIS STARTS OFF IN HURRY

Tennis is starting off in a hurry this year and a call will be sent out soon for players. The Western Nevada tournament is to be held on September 19 and 20 at Carson City. "Doc" Martie has entered a complete team in this meet and it only remains to pick the members.

Last year the tennis squad had a very successful season, winning most of its games and finishing with a bunch in fine condition. Martie hopes to repeat this year, but the playing remains in the hands of the participants and he can only do his share if the players will turn out.

Teams are to be placed in the men's and women's doubles and singles and in the mixed classes.

RUBYIAT OF A COLLEGE MAN

BY H. C. WITWER

FROM SON TOM TO HIS FATHER

am broke now, Pater, as I go to my first class in matriculation tomorrow and I have got to buy a book on Greek Tuition in order to pass the examination. I can get one at a second-hand book store here for \$175, so please send that amount at once, as I would not like to get behind in my studies. You can be sure that I have learned my lesson in regard to gambling and certainly a big surprise. I expected \$200. However, it is all gone anyway, now on. I have every confidence that you will come to my assistance, Pater, and as an evidence of this I have laid odds of eight to five with a dozen or more fellows that the first mail will

Dear Pater: Your interesting and special delivery letter reaches me something more than a few moments ago and I am so anxious to answer it at once that I am not even waiting to read it. The money order for a hundred dollars which you had the good judgment to enclose was certainly a big surprise. I expected \$200. However, it is all gone anyway, now on. I have every confidence that you will come to my assistance, Pater, and as an evidence of this I have laid odds of eight to five with a dozen or more fellows that the first mail will

so as a matter of fact I could really credit you with having sent me \$1,000 rather than \$100, being broke anyway. This is what is known as "Logic," Pater. It is a rather intricate study, if you know what I mean, but you can see I am already proficient at it, though I have scarcely been here long enough to learn the yell.

brings at least \$175 for the book on Greek Tuition and probably \$500 for my other and varied needs.

While on the absorbing study of logic, Pater, I have given a great deal of thought to the annoying problem of my being continually in a state of insufficient funds, as we Latin scholars remark, and I have hit on what I think is a happy solution. It is, of course, quite humiliating to me to have to write incessantly to anyone's father, let alone my own, for money. Yet one must have one's pieces-of-eight, and, as the French have it, "Alpha beta gamma delta." So, therefore, if you will open a modest checking account for me, say—oh—three or ten thousand dollars, I can handle my finances from this end without recourse to you, except in the event of overdrafts, which are naturally unavoidable.

I have been sleeping at the Epsilon Omega Kappa Tau Sigma Delta House here, but in a few days I will be parked in a dormitory. I suppose you will no doubt ponder over what is the E. O. K. T. S. D., Pater, so as I have already started on a fresh page I will explain. It is nothing less than a Greek fraternity, Pater, which I belong to and it's about like the Elks or the Masons, only vastly different—if you know what I mean. I have already given twenty-two frat pins to as many co-eds, which is the highest honor a co-ed can get from any university, according to we boys.

It will probably interest you to know that I have instantly obeyed your command to lay aside the galloping dominees while at college and that your belief that the science of crap shooting was not one of the studies here is correct. I am saying this on the authority of the faculty. I'm sure also that you will be glad to hear that I have taken up stud poker in place of African golf, and that brings us around to the hundred dollars you sent me. The boys here shake a wicked straight flush, Pater, and that hundred had as much chance as a person would have going to Gehenna for the purpose of selling celluloid collars to the natives. After two hours of "deuces wild," I gave the winners an I. O. U. shower and resigned. It is particularly annoying that I

While I am disclosing the mysteries of college life, Pater, I may as well explain what a co-ed is, too. A co-ed is what makes college absolutely painless and a relaxation in a man's life. Also, Pater, you can get more education from a co-ed in the course of a term than you can from the college proper in forty years! I am sending you a bill which was given to me personally by mistake this morning. It includes tuition, matriculation, athletic, literary society and dormitory fees and the figures on the bottom represent the total amount of the bill and not the roster of the college, as one might believe. When I come out of here at the expiration of four years I will be the first full-fledged Bachelor of Arts in our family and you will be proud of me, Pater, when I hang out my A. B. shingle and start in practice.

FACULTY MEN ON SICK LIST COMING BACK

Two members of the university faculty have been ill during the summer and have been forced to seek treatment in San Francisco. Doctor Leon W. Hartman, head of the Department of Physics, has been suffering from throat trouble and has spent several weeks in California. He is now back on the campus teaching some of his classes.

Director John A. Fulton of the Mackay School of Mines was seriously ill in July after an operation on his nose. He has been recuperating in San Francisco and expects to return to Nevada in a short time. The

oldest daughter of the Fulton family has also been quite ill, but is now recovering.

WHELPS START YEAR'S WORK

Organization for the year was started by the Whelps with a meeting held last Thursday afternoon. The group plans to co-operate with the Buck-grabbers and the vigilance committee in maintaining a reasonable semblance of order in the rushes, and other activities of the campus.

The Whelps issue a call for all men students, upper or lower classmen, who want to work out for a membership in this organization. A meeting was held yesterday afternoon, when all applicants were considered and their duties explained by "Fat" Mensinger, the new president.

MASONIC CLUB AGAIN ACTIVE

Initiation of new members and election of officers was held at the first Trowel and Square Campus Masonic Society meeting of the year Tuesday night. Although inactive last year, the organization is planning an active program in conjunction with campus activities for this semester and next.

The newly elected officers are: Don Mensinger, president; Fredrick Gilmour, vice-president; Willard Smiley, secretary; Ray Hendricksen, treasurer, and Carroll Carrington, sergeant-at-arms.

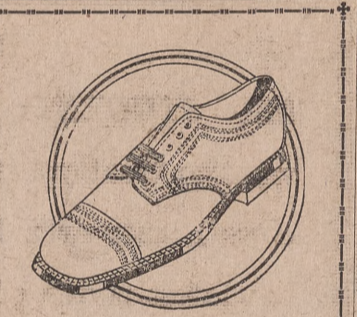

Professors Go On Search for Animal Exhibits

Charles L. Brown, instructor in biology at the University of Nevada; E. R. Sans, director of predatory animal control in Nevada, and Percy Nash, field representative of the United States biological survey, have returned from a trip through the southern part of the state, where they were in search of various biological exhibits to be used in the Nevada Transcontinental Highways Exposition.

While none of the animals were caught on the trip, their haunts were mapped out and trappers will search for them during the trapping season.

Most of the taxidermist work will be done by Brown, although he will receive additional help on the more difficult exhibits.

BOOKS, MAPS NOW IN LIBE

A shelf of worthwhile books, and a literary map of the United States have been recently installed in the University library.

The shelf of worthwhile books contains from ten to twelve novels and plays taken from Ass. Don Dickinson's "One Thousand Best Books." This book itself is on the shelf and is a guide to all the better fiction. Such stories as "The Three Musketeers," "Les Miserables," and "Don Quixote" will be found here.

The literary map deals mainly with the United States, although a small portion of Canada is shown. This may be totally different from the customary map. It is a literary map, and instead of the conventional location of states, cities, rivers, and mountains, there is the name of a place in a story, or the name of the story itself. In the southern section, "Brer Rabbit's Briar Patch" and "Uncle Tom's Cabin" are easily located. In the west such notable places of the fiction world as "Bret Hart's Roaring Camp," "The Californians," stand as landmarks for the days of the California gold rush. In a very clear way the best books of the most noted writers are given.

These new acquisitions to the library have been installed for the benefit of the college men and women, and to promote their interest in the better books of today and yesterday.

ENGINEERING DEPARTMENT INVITED TO CONVENTION

The engineering department of the University has received an invitation to attend the 19th annual convention of the Illuminating Engineers Society, which will be held in New York on September 18. No decision as to the acceptance of the invitation has been made by the department up to the present time.

"HOME EC" HEAD RETURNS AFTER EUROPEAN TRIP

Professor Sarah L. Lewis, head of the Home Economics department, returned on August 26th from a three-months' tour of Europe. While on her trip, Professor Lewis spent some time in the British Isles.

FORMER WOLF MANAGER AND WIFE VISIT CAMPUS

Fred Johns, '27, and his wife were visitors on the campus Monday and Tuesday. Johns was business manager elect of the Desert Wolf for this year, but is not returning here for school. He is attending the junior branch of the University of California at Sacramento.

WALKER MATHESON VISITS CAMPUS OVER WEEK-END

Walker G. Matheson, '25, last year's editor of The Sagebrush, was a visitor on the campus during the first part of the week. He stopped over on his way to Harvard, where he will take up a scholarship granted him while at the University of California.

GRID MEN TO PLAY LONGER TO WIN AWARD

Motion To Be Presented At Next Meeting of A. S. U. N.

COAST GAMES ARE TEST E. Walthers, Chairman of Block N Annual Dance September 12

A motion that a man to receive his letter in football this year, must play at least one hour and five minutes in the four hardest games of the season, was passed by the Block N Society at its first meeting of the year.

At the first business meeting of the student body this motion will be brought up for official sanction, and if passed will become effective this season. In talking over this motion, the Block N decided that the games with California, Arizona, St. Mary's and Santa Clara will be the contests on which the rating will be based.

It has been planned to hold the annual Block N dance on the night of September 12. A committee has been appointed to make the arrangements with Earle Walthers at the head and Bill Starke and Archie Watson as assistants.

Since Claude Galmarino has not returned to the campus, it was necessary to elect a new treasurer for the society and Harry Frost was selected for the position. Frost is a fourth year man and a member of the Block N for three years and so is well qualified for the job.

W. A. A. CREATES NEW RULINGS

Beside the business of the picnic, at their meeting on Tuesday the W. A. A. decided that they would use a system of posters to promote interest in the various sports. These placards are to be made by women of the association and will be displayed in prominent places on the campus a few days before each sport is scheduled to begin.

It was further decided that should a senior woman win her sweater before Mackay Day, it should be presented to her without delay.

Can Wear Them
In the past many have won their sweaters only to graduate and so have no chance to wear them on the campus. If the award is made as soon as earned, this difficulty will be overcome.

The women at the meeting also held a discussion on the idea of presenting blankets to senior women who have taken part in athletics for four years. No decision was reached on this subject and it will be brought up at a future meeting. The women were almost unanimously in favor of the motion as they feel that it will give them something more to work for in their athletics.

MADIGAN HUNTS FOR NEW FULLBACK FOR NEXT YEAR

Coach "Slip" Madigan of St. Mary's College is on the lookout this season for another good fullback. "Red" Strader, varsity football star of last year, will be in the lineup again, but he graduates this season and Madigan is looking to the future. It will take a real man to fill the place left by Strader, as he holds the record for having made more yards on line bucks than any man in the United States in recent years.

Thirty nationalities are represented among the 2,200 pupils enrolled in public school No. 96, New York City. Nearly all the children, however, were born in this country.

GRID MEN OUT EVERY DAY TO GET PRACTICE

Although regular football practice can not start until the 15th of the month, a big bunch of fellows are showing up every night to get used to the feel of the thing. So far they have gone through but little actual practice, having spent their time trying for fast starts, passing and snagging passes and open field running. A little tackling has been tried, but the real work cannot start until they begin on the dummy.

Varsity men of last year have taken charge of the fellows, and prospects look bright for some good finds among the new men.

As Shaw stated Tuesday night for the Gazette, he is looking for fast, brainy players. He wants men who are big, but he will not stand for all bulk and no brains. A heavy man is alright if he can move fast and think while he is moving, was one of the things which Shaw emphasized.

Under the new system which "Buck" plans to introduce, the tactics which he emphasizes are necessary. Speed is the main factor in the Notre Dame shift, and Nevada will use a form of this shift on the field this season. A man must have brains to use the shift, and size is not one of the requirements, so it looks like the small men will really get their chance this year.

Despite the bad weather, the future Wolves will continue their workouts daily until practice time drops round, so that they will be up to condition when the games do come up, for conditions is one of the new coaches' strong points.

FROSH PIGSKIN MEN TO HAVE BUSY SEASON

Prospects of Good Babe Team is Best in Many Years

Freshmen football prospects for the season of 1925 are beginning to look brighter than any previous year that the Wolf-cubs have participated in the gridiron sport.

Close to fifty of the men who are out each afternoon in moleskins are freshmen, and among this aggregation there is some mighty fine material already showing up. One of the surest signs that the yearlings will have a strong combination is the fact that there are a good supply of big men.

Hug to Coach
"Bunny" Hug will again coach the first-year men, and judging from the freshmen teams that he has turned out in the past, when material was scarce, Nevada is scheduled to have a powerful babe eleven. Hug has been watching his understudies for the past week and will continue to do so for another; then he will begin to mould a team which will take part in the hardest season ever outlined for a Nevada frosh eleven.

Games Booked
Already the managerial department has booked games with two California college teams. Encounters have been scheduled with the varsities of Chico State Teachers' College and Sacramento Junior College. The Chico battle will take place in Chico, while the Junior College melee will be held on Mackay Field. These two games will be the first inter-collegiate contests that a Nevada freshman team has taken part in.

A game with the eleven of Grass Valley High School, which is Captain Tom Roach's alma mater, and two or three engagements with high school teams of the state will complete the schedule.

Peter Perry, '24, and J. Bernard Koehler, '24, are with the Mercantile Trust company in San Francisco.

BLOCK LETTERS ARE AWARDED TO TEN WOLF TRACK STARS

Block N's, the highest honor that Nevada bestows upon its athletes, were awarded to ten members and the manager of this year's track team by the executive committee late last night. Medals were also granted to five men in recognition of their ability to break records.

Men to receive the coveted letter for their athletic prowess on the cinder path were: Tom Raycraft, Archie Watson, Vernon Cantlon, Bill Nesbit, Charles Horsey, Erwin Morrison, Hans Lohse, Al Lowry, Ralston Crew and Leslie Clover. All of these tracksters either broke records or performed in stellar fashion.

Ray Misener, as manager of one of the best track seasons that a Silver and Blue team ever had, was also awarded a letter, as is the custom.

Gold medals were awarded Vernon Cantlon, Charles Horsey, Bill Nesbit, Tom Raycraft and Archie Watson for breaking long-standing school records. Raycraft, Horsey, Nesbit and Cantlon will have engraved on their medals the notice that they are joint holders of the 880 relay, and Watson's medal will have the new high jump record upon it.

Only Lowry and Lohse will be lost to the team next spring, and looking at the prospects at this early date, Nevada should be able to hold its own in the first Far Western conference meet. Besides the veterans who will be eligible, there will be some of last year's best track men in suits.

E. K. HALL TAKES CAMP'S PLACE AS GRID MENTOR

Football again has a czar to dictate over the realms of gridiron sportdom in the person of E. K. Hall, who succeeds the late Walter Camp as the editor of the Football Guide. The new king takes up his duties as the authority on the premier college sport with the intentions of keeping the activity on the same level his lat friend had.

Hall has long been considered a keen student of football, having performed during his college days at Dartmouth and was coach at Illinois for two years. His choice of men qualified for an All-American team will be watched with much interest by followers of the pigskin exercise.

D. A. E. INITIATES AT FIRST MEET

Luethal Austin, '24, was initiated into membership in Delta Alpha Epsilon, English honor society, at the first regular meeting of the year held Thursday night at the home of Mildred Klaus on Washington street.

Music and readings by the members served as entertainment, while plans for the year's activities were discussed over refreshments.

Miss Austin, who is instructor in English, was supposed to have been initiated in May at the annual banquet of the society, but she was unable to attend.

Football a-la-Notre Dame style seems to be the vogue this year on the Pacific Coast. The varsities of Santa Clara, St. Mary's, and Nevada will display the finer points of the system made famous by Knute Rockne. Santa Clara, one of Wolf-Pack's principle opponents this year, is also sending its men through the paces of conditioning in preparation of a hard season. Seventy-two men signed for the initial turn-out for the Silver and the Blue.

THE PLACE TO MEET THE GANG
Block N Billiard Parlors
Telephone 1369 210 N. Virginia St.

MANAGER JOB IS STILL OPEN

C. M. Thornton, athletic manager, announced this week that all first-year men who are interested in trying out for positions as football managers, should be present at the training quarters Monday afternoon at 4 o'clock. He also stated that due to three of the four sophomore managers not returning to the campus this semester, there will be an opening on the staff for three men of sophomore standing.

Jobs are Important
These football manager jobs are important posts, as it is the junior managers that handle most of the business connected with the sport.

In order to be in line for the position of football manager, which is held at present by Ray Hendricksen, an aspirant must have first had experience while a freshman and sophomore.

"The more aspirants, the better," are the words of both Thornton and Hendricksen.

BOWER'S PICNIC GIVEN BY W. A. A.

A get-together picnic was given by the Women's Athletic Association yesterday at Bowers' Mansion for all new women students in an effort to interest them in athletics.

After an hour spent in swimming and games, hot dogs, buns and pickles were served by the twenty-five W. A. A. members present.

The picnickers returned in time to allow the freshmen women to reach Manzanita by eight o'clock.

Teachers of Dayton, Ohio, spent \$3,517 during the past year to meet the expenses of professional training under the auspices of the extension department of the Dayton teachers' club. This is only one phase of the professional work done by the Dayton teachers.

MINOR SPORTS PROGRAM SET

CHAFFEE HEADS SWIMMING FOR COMING YEAR; PLACES OPEN

"Doc" J. E. Martie, acting head of the Physical Education Department, has outlined a program for this semester which will encourage Nevada's participation in tennis and swimming. These two minor sports had a very good success in their first year and Martie feels that more opportunities will be given students this year to further these activities.

Swimming will be handled by Lawrence Chaffee, who succeeds Bob Ackerman as the instructor in aquatic maneuvers. Chaffee has had much experience in teaching humans to compete with fish. He has been working as a life-guard at one of the prominent California valley swimming pools this summer and is in good condition to teach.

Competition with other schools will probably be scheduled if a team is rounded into shape, and enough interest is shown.

Tennis got off to a good start last spring and everything looks to an even better year this fall. There are quite a few new tennis stars enrolled and they expect to give the veterans much trouble.

Tryouts for the singles squad of the men's tennis team are to close promptly at noon on Saturday. The ones who will get a chance to try for a place on the team to represent the University in the tournament will be picked sometime in the afternoon. Regular practice will be started some time the first of the week, probably Monday, if the weather permits.

THIEVES PILFER SCHOOL OF CUPS

Eight silver loving cups, trophies of the Fallon high school for athletic and debating teams, some of which were won at the University, were missing from the high school last week. The robbery took place some time during the night, as the front door was found jammed when the janitor arrived in the morning.

The vandalism is thought to be the work of novices, the same who robbed the cash drawers of a local drug store a few days ago.

"GRAND OLD MAN" OF FOOTBALL ILL

Knute Rockne, famous football mentor, has been ordered to the Wisconsin woods by his physicians. Overwork is blamed for his illness and a long rest has been prescribed. However, he will probably be on hand when the grid season gets under way. Rockne has been teaching in several summer coaching schools, besides having charge of track and spring football at Notre Dame. It is claimed that he has not had a vacation for over two years and is almost in a state of nervous breakdown.

A real honest-to-goodness welcome awaits you boys, both old and new. We don't want you to forget you are always welcome at the

MANY ORGANIZATIONS ARE NOW OPEN FOR ASPIRANTS

"What can I join?" is the query of the freshmen at the beginning of the new semester. With the Nevada campus supposedly over-organized, there are enough honorary groups to fit the abilities of any one willing to work.

Phi Kappa Phi heads the list of honorary organizations as a national scholastic fraternity. Senior men and women of high standing are eligible, as are faculty members.

For the athletes, there is the men's Block N, whose members are wearers of the N. Gothic N consists of sportsmen who excel in scholarship, sportsmanship and all athletics.

Journalism Award
In the field of newspaper work, Italic N is an honor organization for those students who have earned their letter in work on The Sagebrush. Press Club consists of the members of the staffs of the various campus publications—Artemesia, Desert Wolf, and Sagebrush.

Campus Players is the Hill's dramatic society, its members being selected at the tryouts, one-act plays held every year. Lions and Cactus are debating societies, and D. A. E. is the women's honor English organization, composed of majors and minors

FIRST LAKINGS OF YEAR HELD

With a mighty splash nine members of the class of 1929 started off the semester's laking parties. Accused of queening these offenders of Nevada's traditions were speedily found guilty and justice served.

Lacking the scrappy characteristics of previous laking parties the offenders were punished without hardly a struggle. Then '28, looking for more victims, unceremoniously dragged another too despondent from the Aggie building and he, too, joined his brethren in attempting to swallow Manzanita Lake. Graham, '29, also became curiously incriminated, and the bystanders. After a spirited chase he was finally captured and given a swimming lesson with the rest. '29's first offenders were Robinson, Watson, Dakin, McQuillan, Lamb, Ocheltree, and Busby.

"LORRY" LEADS LIFE OF ADVENTURE SINCE FIRST DRAGGED OUT OF HIDING

Lorenzo, the Magnificent, otherwise known as the Lorenzo de Medici, and familiarly designated as "Lorry," finds himself, that is the head of himself, played in the sanctuary of The Sagebrush offices.

"Lorry" has enjoyed a kidnapping time since he has been on Nevada's campus. A former instructor in physics and a prominent student were the first to steal Lorenzo away from the Art department. The purpose of the act being to scare any midnight prowlers away from the instructor's precincts in the Physics building, for Lorenzo is ghastly pale and stares and stares with an aggravating intensity that provokes one to flight.

Lorenzo, patron of art, literature and science in Florence during the latter part of the fifteenth century, now has transferred his affections to newspaper row, since his most recent kidnapping, smiling with plaster affection upon members of the staff.

"MOPS" SPORTS JOYFULLY THROUGH A LIFE YET GAY

Snipes and Old Copy Fall Prey to Pup as He prowls About Sacred "Sanctum" of "Brush"

"Mops" is a small but very lively pup and his home is a certain sorority house on Sierra street. He is enthusiastically adored and has brown spots, accordion-pleated ears and a fan tail. He sports a pawsy tie and the latest thing in plus fours. The loving disposition goes without saying.

"Mops" is already a favorite at the Sagebrush office where he contemptively digests all the otherwise useless copy.

It is rumored that the pup has a family tree—he has a brother residing at Prexy Clark's, and Dr. Young of the Psychology Department was his former owner.

No wonder he enjoys the intellectual flavor of the "Brush" copy.

MONDAY WILL BE SCHOOL HOLIDAY

Monday, September 6, Labor Day, will be an official University holiday. All classes will be excused on that day.

RED APPLE WILL NOT BE PRIZE THIS YEAR

The conventional ripe, red apple of The "Brush" will not be the award for the best story contest this year. Instead, an appropriate prize will be picked and packed, waiting for the "brusher" who shows the best style, brings in the most stories, and decorates the bulletin board the most times.

Beginning with this issue of The Sagebrush the contest will continue throughout the year. The award, however, will be made known at the end of this semester.

JONES ENJOYS VARIED SUMMER

Professor J. Claude Jones of the Mackay School of Mines spent an active summer in California and Nevada acting as instructor for the regular vacation class in geographic and topographic mine surveying class, geological expert in a Humboldt river law case, and as a mine examiner for the Natural Soda Products company.

While examining the mine property he made an inspection trip of the famous Cerro Gordo Mine.

The regular month-end meeting of the board of regents is to be held on August 31 to discuss plans for the college year.

MRS. CHAPPELLE CHOSEN PSYCHOLOGY ASSISTANT

Mrs. E. F. Chappelle was elected assistant in the department of psychology under Prof. James R. Young, at the meeting of the board of regents held Monday morning, at which monthly business was presented.

Payrolls and other university affairs were passed on Thursday afternoon at a second meeting of the board.

SOPHS VICTORIOUS

(Continued from Page 1)
ed at each other for the next ten minutes. The final gun went off with all three balls in the freshman side of the field and the sophs had won for the second time during the day.

Strategy Used
Strategy played an important part in this year's rush in the form of smoke bombs and a woman. Just before the rush began, a number of the bombs were thrown on the field and the smoke rolled over the green in huge clouds. A few minutes before, a sophomore dressed as a woman sauntered into the ranks of the class of '28 and was hidden from view.

The freshmen took this into consideration and when the rush started the woman was the main attraction. The hoax worked. She drew a good crowd, but there was no game in her possession.

The rush was the last of the formal hostility between the two classes. Further activities will consist of small laking parties, the first of which will probably be held today.

Maybe Hayride

In former years it has been the custom of the freshmen to stage a hayride some night early in the semester. The sophomores had the task of breaking up the hayride if they could. Last year the ride drew some unfavorable comment. It is not known if the tradition will be upheld this year or not. The upperclass committee will meet this afternoon and discuss the question.
