SAGEBRUSH is published Tuesdays and Fridays by the ASUN but does not necessarily reflect its or the University's views. Phone: 784-4033 or 784-6697. Address: P.O. Box 8037, University Station, Reno, Nev., 89507. Subscriptions cost \$6 a year. Advertising rates on request. Printed by the Sparks Tribune, P.O. Box 887, Sparks, Nev., 89431. Second class postage paid at Reno, Nev.

# Letters: Best behavior

To the Editor:

As a member of the ASUN Senate and a representative of the students, I feel compelled to relate my feelings and knowledge to the students with regard to the pep rally to be held on Friday at 3 p.m. at Evans Park. The main purpose of this rally is to acquaint the students with the football team and to promote more student spirit and interest, with the proceeds going to the Boosters Club.

The main point of my letter, however, is this: Beer will be served at this function as well as soft drinks and hot dogs. However, proper identification must be shown in order to purchase the beer. No minors will be served. The Reno City Council has granted the students the privilege of using Evans Park and serving beer. The Reno Police Department has also cooperated fully by attending two meetings, the latter of which was the Sept. 8 Senate meeting, and expressing their views. They say simply that a minor in possession of alcohol, or anyone causing a major disturbance, or anyone who is obviously intoxicated is subject to arrest and will be removed from the area. I ask you to understand that the Reno Police Department is under a great deal of pressure and they have no recourse but to make these arrests.

My plea to the students of UNR is to please stay within the guidelines of good conduct and to see to it that others do the same. Contrary to popular belief, it is not necessary to become intoxicated in order to have a good time. So let's set a good precedent and insure future activities by demonstrating a responsible attitude towards ourselves and others and have a good time. Hope to see everyone at the pep rally and at the game on Saturday—and thank you for your cooperation.

Sincerely yours, Mark J. Quinlan ASUN Senator

### Mailbox welcomed

To the Editor:

I am a recent transfer student from UNLV, and I would like to praise the ASUN Activities Board for sponsoring the Blue Mailbox Coffee House. The Blue

Letters to the editor of the SAGEBRUSH are welcome, but must be signed to be published. Initials will be printed on request. Also, a phone number must be included for verification. Letters containing 300 words or less will receive first consideration and longer letters may be subject to condensation for space requirements. Only letters in good taste will be published. SAGEBRUSH's address is P.O. Box 8037, Reno, Nev., 89507.

Mailbox is a great place for a student to go and escape the bar and gambling atmosphere, while also enjoying live entertainment, mellow people and free coffee or tea.

I would like to encourage all my fellow students to drop by the Blue Mailbox and enjoy the pleasant and pleasing vibrations which radiate from this establishment. It is open on Friday and Saturday nights from 9 p.m. to 1 a.m., and is free to ASUN members and a measly buck charge to non-ASUN members.

I hope that ASUN continues to promote and advance the Blue Mailbox because 1) it is a worthwhile thing, and 2) it is something that UNLV doesn't have, which makes UNR one notch ahead of her sister.

> Yours truly, Don Kennedy

Alleges Affirmative Action failure

# Smith wins sex battle out of court

**Dennis Myers** 

After years of waiting, Dr. Catherine Smith has triumphed in her long battle with the UNR administration over alleged sex discrimination in the Music Department.

Dr. Smith was granted tenure by the university Board of Regents Friday, the end result of an out-of-court settlement executed by Smith and the university last May.

As part of the settlement, Dr. Smith dropped her lawsuit against the Board of Regents, President Max Milam and Arts and Science College Dean Robert Gorrell. In return, she was guaranteed continuity of employment while the issue of tenure was examined, and an independent review of the question of tenure. In addition, the university agrees in the settlement:

-that beginning July 1, Dr. Smith would be awarded a full-time "B" contract as assistant professor of music for the 1976-77 school year;

-that expenses of the tenure review committee (which ultimately included music educators from California and New Mexico) would be borne by the university;

-that Dr. Smith will be given consideration for promotion this fall;

-that Dr. Smith would be permitted to review her personnel file to "ensure that no materials. . . reflect adversely on her qualifications or standing in the academic community because of her filing of administrative complaints or (her) lawsuit;"

-that travel, legal and other costs shall be paid to Dr. Smith's attorney, Phyllis Halsey Atkins.

Dr. Smith's troubles began almost four years ago when she brought complaints of sex 34

discrimination before a university review committee. At that time, she brought a complaint to the UNR Commission on the Status of Women claiming discrimination in hiring and promotion in the Music Department; following denial of the complaint, she appealed to the hearing committee of the UNR Commission on Human Relations.

In early 1975, in testimony before a joint meeting of the Senate and Assembly Judiciary Committees of the Nevada Legislature, Dr. Smith produced statistics she had compiled showing, she alleged, a failure of the Affirmative Action program at UNR.

Following her first complaints within the university system, she began encountering numerous difficulties as a faculty member, and ultimately she was terminated effective June 1975. (She remained at UNR into 1976 only through negotiations during court proceedings in 1975.)

Dr. Smith responded by calling the case to the federal government. After some study, the United States Department of Labor filed suit on behalf of Dr. Smith and three other female faculty members. The suit, charging "willful discrimination" by the university, was a first-in-the-nation use of new federal equal pay laws by the Labor Department, which selected the Nevada cases in the belief that the case against UNR was strong enough to guarantee success in the crucial first court test of the new laws. Coincidentally, at the time of the filing of the labor suit, the U.S. Department of Health, Education and Welfare had begun monitoring Music Department hiring practices at UNR with an eye to ferreting out patterns of sex discrimination. The monitoring was later ended without action

Following the filing of the Labor Department suit, Dr. Smith also filed suit against the Board of Regents, Milam and Dean Gorrell. She was supported by the Nevada State Education Association and the National Society of Professors. Depositions had been taken by Dean Gorrell and Dr. Smith when the settlement was reached.

The arrangements included in the out-of-court settlement for the tenure review stipulated that "Catherine Smith will be reviewed and considered for tenure by a three-person committee composed of one person selected by Catherine Smith, one person selected by the administration (of UNR) and a third person" selected by the attorneys for both sides from lists of UNR faculty members compiled by each side. Dr. Smith selected composer Leland Smith at Stanford University. (The two Smiths are not related.) The university selected William Rhodes, chairman of the Department of Music at the University of New Mexico. The faculty member selected was Political Science Department Chairman Joe Crowley. The committee recommended tenure—a recommendation which was accepted by the Board of Regents.

Dr. Smith feels the entire episode was unnessarily prolonged by "poor administrative judgments"—particularly a cavalier attitude toward the principle of equal opportunity.

The university must still deal with the Labor Department suit, which was not dealt with by the out-of-court settlement.

NO VACANT SPACES—The largest student parking area—the Mackay Stadium lot at the north end of campus—is filled nearly to capacity daily. Many students, as well as staff and faculty, park along university area streets to avoid long walks from their cars to classrooms and offices.

# Where to park?

Sylva Maness/Meleva Wiltse

A thousand more parking stickers have been issued this year than last, according to UNPD Chief Keith Shumway.

Although parking spaces are more difficult to find, Shumway said he is pleased that motorists are generally observing the parking regulations.

There have been some problems on city streets, particularly near the railroad tracks on Record Street and the surrounding area, Shumway reported. The Reno Police Department has been issuing citations and towing in that area, explained Shumway.

The city's police department has also noticed the extensive street parking. "You mean to tell me the University of Nevada even has parking?" said Capt. Robert Smart of RPD's Traffic Division.

The department has not received any complaints from UNR area residents yet, the captain said. "But it may take a couple of weeks for the students to begin using the street parking and a couple weeks after that before I hear anything, if there is a problem," he noted.

A parking proposal outlining major changes in campus parking was submitted to UNR President Max Milam last spring by the UNR Traffic and Parking Board.

Last week Milam told the Sagebrush he would release the report to the public as soon as school started. It is expected to be sent to the Faculty Senate for review, then circulated to faculty, students and staff.

So far, the report has not been released.

Shumway, a member of the board, said he is anxious to have some action taken on the parking study because the problem of finding parking spaces on campus seems more critical this year.

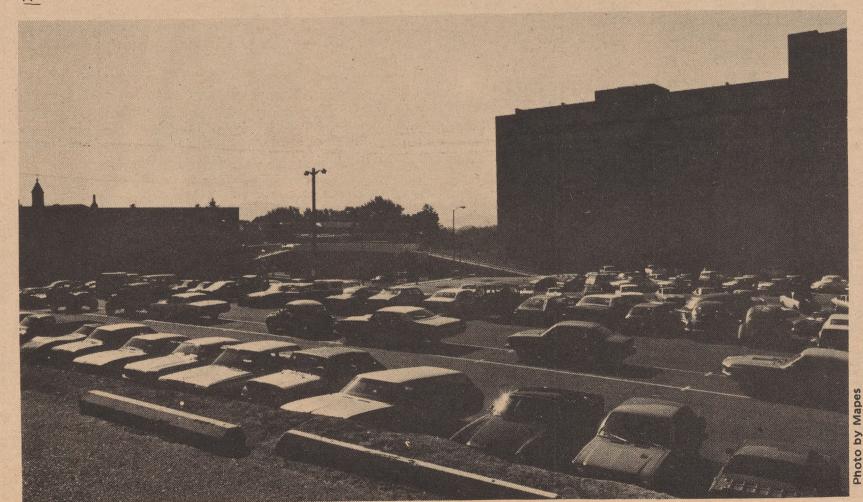

The proposal is reported to include three main areas of parking: fee zones with gates, meters and free or \$1 areas. There would be 1,000 meters, and faculty fee parking would increase by more than 400. Student fee parking, faculty "B" zones, staff "A" zones and visitor spaces would be eliminated.

In general, fee parking would be established within the core of the campus with free parking in peripheral

Shumway admitted that people with money would get the prime areas of parking, even though they may not be the ones who need close-in parking the most.

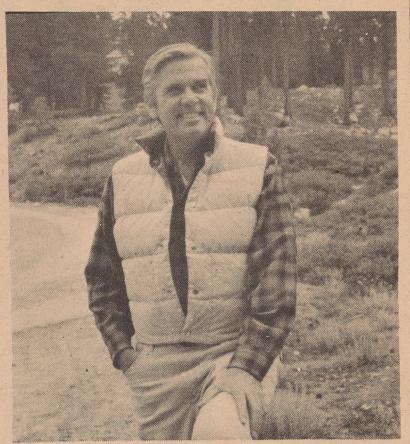

It has been predicted there will be a large increase in meter income if the changes are approved.

LIMITED FACILITIES—Many university motorists park in the Nye Hall parking lot because of its accessibility to the central campus. But those who arrive early are the ones who get the close-in spaces. Latecomers are forced to park in outlying lots. Parking problems appear to be the worst during the morning hours.

The ASUN Research and Investigations Office (RIO), beginning its second year on campus, is now under the direction of Greg Swain.

Initiated by last year's ASUN president, Pat Archer, the office was established to provide students with a vehicle through which problems can be examined to their satisfaction. These problems may range from student-faculty conflicts to clarification of students' rights within the administrative procedures.

The effectiveness of this office will be greatly diminished unless we continue to make use of the resources and powers to which it is entitled on our behalf, Swain

Swain is seeking applications from students interested in working on his staff. Those who wish to participate should contact Peggy Martin in the ASUN Office for application forms and further information.

-Horn, ASUN

### Aid available

The Financial Aid Office announces that it is still taking applications for aid this academic year. Students who need assistance for this semester or in the spring should contact the Office of Financial Aid on the second floor of Thompson Student Services Center.

Money is still available for both semesters for loans. grants and work-study positions.

### Pass the popcorn

Thirteen "great romantic films" will be shown by the Department of Art during the fall semester.

The films are open to students and will begin at 7 p.m. on Wednesday nights as part of a cinema class. Further information may be obtained by calling the department. The films include the following:

Sept. 15-Camille, 1937. Sept. 22-Stella Dallas, 1938. Sept. 29—Madame X, 1966.

Oct. 6-Now Voyager, 1942. Oct. 13-Back Street, 1941 and 1961. Oct. 20-An Affair to Remember, 1956.

Oct. 27—Casablanca, 1943. Nov. 3-Dark Victory, 1941.

Nov. 10-Love Story, 1970. Nov. 17-The Roman Spring of Mrs. Stone, 1961.

Dec. 1-All That Heaven Allows, 1956. Dec. 8-Breezy, 1973.

Dec. 15-Two for the Road, 1967

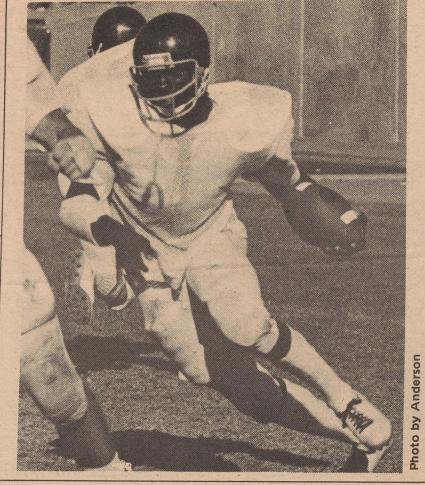

### PRSSA unites

The Public Relations Student Society of America (PRSSA) will hold its first meeting of the year Tuesday at noon in the Journalism Reading Room in Mack Social Science Building to discuss activities for the coming year and to meet new members.

Available to members of PRSSA is a national referral service to find jobs in public relations, a professional magazine and social activities. All students interested in public relations should attend the meeting.

### Have a seat

Question: Is there still time for students in the College of Arts and Science to represent their college in the

Answer: You bet your sweet Vincent Bugliosi there is! Two Senate seats await undergraduates in the College of Arts and Science who have at least a 2.2 GPA.

If you qualify, applications and further information may be obtained by contacting Peggy Martin in the ASUN Office. Deadline is 5 p.m. Wednesday, Sept. 15. -Horn, ASUN

The Student Council for Exceptional Children will meet Wednesday, Sept. 22 at 7 p.m. in the East/West Room in Jot Travis Student Union.

Discussed will be how students can help exceptional children get more out of life. Community projects for special children will also be discussed.

All persons interested in helping these children are welcome to attend.

### No swimming

The UNR swimming pool will be closed Saturday and Sunday to meet chlorination requirements.

This is a procedure which is generally required every two or three months, according to Recreation Building spokesmen. Pool hours are 12-1 p.m., 4-6 p.m. and 7-9:30 p.m. on weekdays, and 1-5 p.m. Saturday and Sunday unless there is a home football game.

# Shorts Child's Art

### Off to stock market

The first University of Nevada calves born at the Gund Ranch agricultural field laboratory have now grown and gone to market to culminate the initial cattle cycle on the university-owned property.

Dr. Anthony L. Lesperance, animal nutritionist and ranch manager, said 75 steer calves born at the Gund in October 1974 have recently been slaughtered. The animals were fattened to finishing weights at the university's Newlands Field Laboratory in Fallon.

"Marketing of the steers," Lesperance said, "marked a milestone in our effort to turn the Gund into a producing cattle operation." He noted the steers graded "high-good." He pointed out that a second group of 75 steer calves is also now on feed.

When the cattle program was launched nearly three years ago, the university was able to stock the Gund Ranch with 150 cows and 150 heifers, or a herd of 300. The cattle are run on deeded land at the ranch and also on a federal range allotment.

### Pick up a bottle

The ASUN will begin giving away 5,000 plastic bottles Monday as part of a water conservation program, according to Assistant Dean of Students Pete Perriera.

Information fliers will be inside each bottle with instructions to explain how to install them in the toilet

The plastic jug displaces a quart of water in the toilet tank and saves about a gallon of water every day for each member of the household. The Sundowner Hotel has ordered 700 bottles from the ASUN and will save about 120,000 gallons of water a month.

The bottles will be given to students, faculty and staff at UNR. Perriera said he will use the Activities Office in the Student Union to distribute the bottles. He said the 5,000 bottles represent a savings of about 20,000 gallons of water a day if the household has four people.

Perriera has been chosen to conduct the distribution of 50,000 conservation kits to all Reno-Sparks residents. He was selected by a Truckee Meadows water conservation group. The kits include a plastic bottle and a water flow restrictor for shower nozzles.

### Youth southbound

A Reno youth has been selected to accompany a Desert Research Institute team of scientists on a three month expedition to Antarctica.

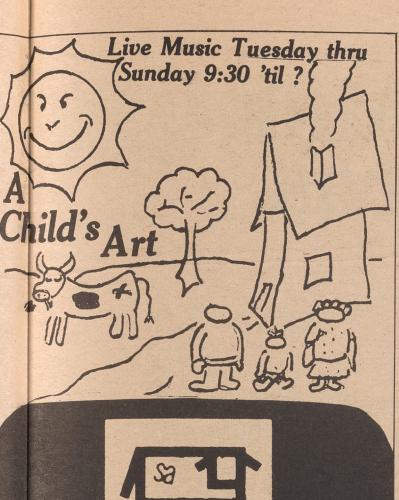

Jeff Jesch, a graduate of Wooster High School, will leave Reno Oct. 9, traveling through Hawaii, American Samoa and New Zealand before arriving at McMurdo,

Jesch, DRI scientist Dr. George Linkletter and Prof. Joseph Warburton will train for survival at McMurdo, then set up camp about 350 miles away near the Ross Ice Shelf where they will live until mid-January. The DRI project involves studying the chem-

istry of Antarctic ice and snow for pollutants.

When asked what he thought of the trip, Jesch said, "I think it's great. I'm looking forward to it very much." He won the trip as a DRI junior research fellow-

## Regents form group

The Board of Regents last Friday established a committee to investigate the adminisstrative authority of student government leaders over student-owned enterprises.

The committee was formed as a result of action taken in May by the ASUN Senate asking for the resignation of ASUN Bookstore Manager Cris Cufflin. This request was overridden by President Max Milam, thus creating a question of who has the authority to hire and fire employes whose wages are funded by student fees or by funds generated by student enterprises,

According to Jim Stone, ASUN president, the purpose of the committee is to determine the rights of student government in the hiring and firing of its employes, and to determine where the legal status of student government emanates from.

"The committee was formed to work out a solution to the problems to avoid the same type of issue coming up again," Stone said.

The committee is composed of Milam, Stone, Chancellor Neil Humphrey, Regents John Tom Ross and Dr. Fred M. Anderson; Larry Lessly, legal counsel for the regents; Frankie Sue Del Papa, legal counsel for ASUN and an at-large student member chosen

The recommendation to establish this committee came out of a personnel session which Stone was not allowed to attend.

"I have no idea to what depth the regents discussed the bookstore matter. However, if I could have been there a lot of things could have been straightened out," said Stone.

The first meeting is scheduled for Sept. 20. The committee is expected to make recommendations to the regents at their October meeting.

Stone recently released a copy of a consultant report evaluating the management of the ASUN Bookstore. The report, prepared on July 8 by A.O. Jackson, manager, University of New Mexico Bookstore; and Robert F. Newton, business manager, Auxiliary Services, Ball State University; notes a "definite need for the strengthening of security, such as the physical protection of the merchandise on the sales floor and in the storage and receiving areas.'

It recommends some type of security personnel to be provided, especially during the

The report also specifies that the "bookstore manager is responsible for the total operation of the store, with the authority to delegate duties and responsibilities, with the necessary feedback to the administration to determine that the manager is performing these duties in a proper manner and on a timely basis."

### Primaries not expected to draw many students

Ken Wiltse

Washoe County Registrar of Voters David L. Howard said he would "like to encourage every registered voter to take the time and vote," on Sept. 14 for the primary elections. He asked each voter to bring a sample ballot, which lists the precincts and can be used as a reference while voting.

Assembly District 29 encompasses the UNR campus. This is the fourth ward and has four precincts. Howard said, "The fourth ward historically has the lowest percentage of voter turnout of the 10 assembly districts in Washoe County. Since the 1972 elections, when the 18-year-old was given the right to vote, he noted, "there has never been a successful voter registration drive at UNR."

He noted that a couple of years ago he spent a week in the Student Union at UNR to register voters. The result was a "really disappointing" 13 people. Howard said he regarded it as a waste of manpower and time.

"Since the 1972 elections, when the 18-year-old

was given the right to vote...there has never been a

successful voter registration drive at UNR."

The primaries give Republican and Democratic voters a chance to select who will run for U.S. Senator in this year's general election. Republicans will also decide the candidate for Representative in Congress for the November election. Democrats in District 29 will select two candidates for State Senator of District 1 and one candidate for State Assemblyman of District 29.

All voters will vote on two of the 10 candidates for the Washoe Medical Center Board of Trustees with the top four vote-getters facing a run off in the November election for the two available seats. All voters will also decide on the \$1.5 million bond issue to build a Senior Service Center for senior citizens. The Center would be located on land made available by Washoe County on the south end of the fairgrounds.

It is too late to register for the primary elections, but the registrar said students have until Oct. 2 to register for the Nov. 2 general election. He said anyone 18 years old or older, a citizen of the United States, a resident of Washoe County for 30 days and who has lived in his precinct for 10 days immediately preceding the election is qualified to

Registration should be done at the Registrar of Voters' Office, Room 125 of the County Courthouse on Court and Virginia Streets. Voter registration is permanent, unless there is a failure to vote in the state general election held in November of the evennumbered years.

Howard said that about 60 per cent of the people able to register have not done so at this time. He pointed to a recent survey that shows 37 per cent of all unregistered voters are apathetic about registering. Since World War II, Howard continued, trends in voter registration have reflected the condition of society. During times of relative calm, people feel more comfortable with their government and a corresponding decrease in registered

Reflecting on his own college days, Howard said that students are transient people—always coming and going. He said that especially freshmen and sophomore students have "more important things to do than to get registered and to vote."

# How much do you think an Army officer earns, to start?

# Bench change moves UNR together, alone

Steve Martarano

New head football coach Chris Ault has been telling everybody that the football team is just an extension of the student body and the closer they get, the better.

So for Saturday's Pack home opener against Hayward State, at least one phase of that plan will be evident.

In past years, the football bench was located on the west side of the field, below the main grandstand. All UNR fans sat in the west stands with the visitors' bench and fans on the east side.

But this year, UNR's bench will be moved to the east side, with the students sitting directly above. The visitors' bench will be on the west side, with the general admission and reserved seats. The visiting fans will also sit on that side.

Ault encourages the students, now away from the other spectators, to "whoop and holler" as much as they want, with no distractions.

Game time is 1:30 p.m. Saturday and, according to Ault, the best student turnout in years is expected.

### Cold, hard facts

Terri Gunkel

Fact: The University of Nevada Wolf Pack, although not a winning team last year, defeated the Hayward Pioneers 17-10 in Hayward.

Fact: Last season Hayward was 0-10, and this year has 28 returning lettermen. UNR's record was 3-8, and the Pack has 26 lettermen returning.

Fact: The Wolf Pack has a new coach who has never had a losing season, and he has recruited a number of highly touted freshmen.

Fact: After only a few weeks of coaching the Pack last spring, Chris Ault led his team to a devastating 41-6 win over the Alumni, who the previous year had proceeded to trounce the Pack.

Conclusion: The 1976 Wolf Pack should have no problems defeating Hayward in its season opener Saturday at 1:30 p.m. in Mackay Stadium. Right? Wrong.

According to UNR Sports Information Director Bob Shriver, Hayward, under the direction of second year coach Tim Tierney, has "vastly improved," picking up numerous transfers from California junior colleges and especially from the University of California-Riverside football program which was dropped this year due to a lack of money.

UC-Riverside, which played in Division II along with Cal Poly San Luis Obispo, a UNR opponent, was the division champion for the past three years and boasted a number of All-Conference players. From Riverside, Hayward reportedly picked up seven or eight players, including "four or five starters," according to Shriver.

In a press release Thursday morning, Tierney announced the Pioneers' new winning attitude. He said they had "reached a turning point" and had a "solid offensive and defensive nucleus-an attitude conducive to winning." Not trying to act skeptical, but doesn't that sound familiar?

At any rate, some of Hayward's players which it might be beneficial to watch are quarterback Kevin Mouser, a JC transfer from Los Medanos, Calif.; returning letterman Jim Magana who caught 57 passes last season and was named as an All-Conference performer; Ray Siri, a 6-2, 235-pound All-Conference center; and other All-Conference performers, Bill Versino, a 6-4, 238-pound defensive tackle; free safety Dan Howry; Darryl Logans, a 5-9, 175-pound running back; and John Gorman, a 6-0, 205-pound nose guard from Riverside.

From the home side of Mackay Stadium, Ault has named his offensive and defensive starters. On the offense they are Roberto Selden, center; Mark Brandenburg and Thor Peterson, guards; Stan Loftus and Ron Parker, tackles; Brian Bishop Parise, tight end; Jeff Tisdel, quarterback; Steve Senini, wide receiver; and Mike Rippee, Wayne Ferguson and Tony Monroe, running backs.

On the defense is Casey Stevens and Carl Selden, guards; Don Smerek and Jim Gair, tackles; Ed Smith, defensive end; Doug Drake and George Gaynor, linebackers; Willie Turner and Alex Willis, cornerbacks, Tony Madau, free safety; and Tom Foster, strong safety.

"We've made a lot of strides. I think we're a better ballclub," said Ault, "but our biggest problem is that we haven't played a game. We need a game badly. We're tired of hitting each other and just talking about it."

He said he felt the secondary was the Pack's strongest group of players with three returnees and Madau, who earned a starting spot during spring practice. Willis, a 6-2 junior, led the Pack in pass interceptions last season with five for a total 114 yards. Three of those were in the Hayward game.

Ault said his "second most talented group" is the wide receivers led by junior Steve Senini. He caught 15 passes last season, two for touchdowns, and a total 278 yards.

"The defense is a step ahead of the offense," said Ault. "They came fast and it's little easier to play. You just cut them loose. I don't think we have a weak point as such," but he added that his philosophy is to "improve each day."

Well, both teams have improved since last year. Saturday will be the test to see who improved the most.

# Basketball man for all seasons

Bob Carlson

As most eyes on campus are focused on the Wolf Pack football season, there are a few men at UNR thinking basketball.

The man who is undoubtably concerned the most is Jim Carey, UNR's new head basketball coach. He was selected from a field of over 90 applicants after Jim Padgett's unexpected June retirement.

Carey takes the reins of a team that had its best season ever in the West Coast Athletic Conference last year. UNR placed third behind Pepperdine and the University of San Francisco. However, the Pack lost three starters last year-Mike Mardian, Perry Campbell and all-time WCAC rebound champ Pete Padgett, a prospect that would frighten some men.

But not Jim Carey. He says, "I'm an eternal optimist." The man knows that UNR possesses the talents of Edgar Jones, who, as a freshman last year, was named to Basketball Weekly's freshman All-American team. Carey also knows that half of last year's squad is returning for this season. On top of this, Carey and the UNR coaching staff have recruited men such as Stanley Murdock, Don Collins, Steve Hunter and Larry Johnson who will add quickness and good size to the team.

The only sour note Carey has been confronted with to date is an injury to Herb Billups. Recently Billups, who started at forward for the Pack last season, badly damaged his ankle playing basketball. Last week Billups underwent surgery and is expected to be

out of action for about 12 weeks. Entering his twentieth year of coaching, Carey has never had a losing season. He came to Reno from Arizona State University where he had been assistant coach to Ned Wulk since 1972. ASU finished sixth in the nation in 1975.

As head coach at Ellsworth Junior College in Iowa, Carey's teams posted a 312-97 record including the national junior college championship in 1971. The same year he was voted the National Junior College Coach of the Year.

Carey met with his scholarship players last week and talked basketball philosophy as well as setting some team goals for the season.

"I feel the players are very receptive young men," he said. He says he is looking forward to a good season. "I think we're going to fool people who look at Nevada-Reno as a team that lost three starters." UNR must face the likes of Stanford, Oregon State, North Carolina State and UNLV, as well as participate in two tough tournaments—the Astro-Bluebonnet Classic in Houston and the Nevada Wolf Pack Classic. "We're going to go into each game with a winning attitude," Carey said.

When talking about team performance Carey is equally determined. "We're going to pressure teams on both ends of the court," he said. "My job is to make sure our shot selection is good."

While Carey may seem to be all basketball, he isn't. "You can't play the game without student support," he said. He is concerned about the number of students who will get to see the Wolf Pack play once the team vacates the Centennial Coliseum in January. The Coliseum will be occupied for four months by a bowling congress, forcing the Pack to move to the university's gymnasium which only holds 2,700. Twice last season, games at the Coliseum, which holds over 6,000, were sold out, so numbers over what the gym can accommodate are not unlikely.

Carey would like to see a complex built for basketball and other university events so

that all students may be able to attend.

While the college basketball season does not begin for fans until Nov. 26, it is in the mind of one man right now. Carey's approach to basketball looks like a new one for northern Nevada. Not only is he concerned about his team, but he has a genuine concern about his fans.

## Hewlett-Packard wrote the book on advanced pocket calculators.

# And it's yours free!

Hewlett-Packard built the world's first advanced pocket calculator back in 1972. And led the way ever since.

If you're about to invest in your first pocket calculator—one that will serve you through college and beyond-you'll need all the information you can get to make a wise decision. That's why Hewlett-Packard's put together an objective, informative 24-page guide entitled, "What To Look For Before You Buy An Advanced Calculator." And it's yours-Free!

In it you will find such helpful information as: A survey of types of calculators available; Programming; Logic systems; Applications; Functions; Features; Construction; Accessories; Memory; Service and much, much more.

Get your free copy of "What To Look For Before You Buy An Advanced Calculator," at your campus bookstore or telephone 800-538-7922 (in Calif. 800-662-9862) toll-free for the name of your nearest dealer.

### HEWLETT-PACKARD **PRESENTS** THE FIRST FAMILY OF ADVANCED CALCULATORS.

### HP-21 Scientific. New low price. \$80.00\*

The HP-21 makes short work of the technical calculations even so-called "nontechnical" courses require. If you need a calculator for more than simple arithmetic -this is it -especially at its new low price.

- 32 built-in functions and operations.
- Addressable memory.

- Performs all standard log and trig functions (in radians or degrees).
- Performs rectangular/polar conversion, register arithmetic and more.
- Two selectable display modes: Fixed point and scientific.
- Lowest-priced HP Scientific calculator.

### **HP-22 Business Management** \$165.00\*

The HP-22 easily handles the kinds of calculations you face in business courses today, in management tomorrow. Breeze through business math calculations. Build existing statistical data into reliable forecasts. If you're going into business administration, this is the calculator for you.

- · Combines financial, mathematical and statistical capabilities.
- Performs complex time-value-of-money computations including interest rates.
- Performs rates of return and discounted cash flows for investment analysis.
- Performs extended percent calculations, accumulated interest, amortization, etc.
- Ten addressable memories.
- Full decimal display control.

### HP-25C Scientific Programmable with Continuous Memory. \$200.00\*

The HP-25C is our keystroke programmable. It can solve automatically the repetitive problems every science and engineering

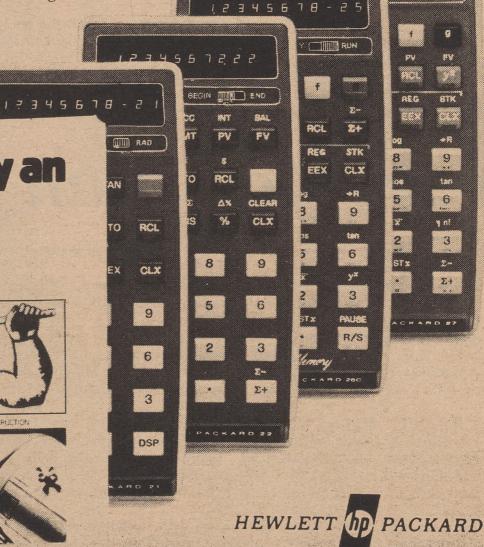

student faces. What's more, its Continuous Memory capability lets you retain programs and data even when it's turned off.

- Continuous memory capability.
- 72 built-in functions and operations.
- Keystroke programmability.
- Branching, conditional test and full editing capability.
- Eight addressable memories.
- We also offer the HP-25, (without the Continuous Memory feature) for \$145.00\*

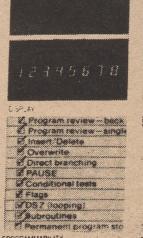

### HP-27 Scientific/Plus \$200.00\*

The HP-27 is for the science or engineering student—whose course work extends into business administration. The reason: It features every pre-programmed scientific function we've ever offered, plus comprehensive stat and financial functions. That's why we've dubbed it our Scientific/Plus.

- 28 pre-programmed exponential, log and trig functions, 15 statistical functions, 10 financial functions - 53 in all.
- 10 addressable memories 20 memories
- 6 selective clearing options give you flexible use of memories.
- Fixed decimal, scientific or engineering display formats.

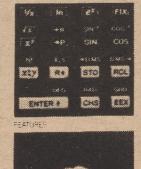

What to look for before you buy an advanced calculator.

22000

Sales and service from 172 offices in 65 countries. Dept. 658G, 19310 Pruneridge Avenue, Cupertino, CA 95014.
